

City Planning

Minor

The City Planning minor provides students with the knowledge of how cities function, how urban processes might be researched, and how urban environments can be transformed through planning, policy, design, and social action. While the minor cannot convey the full scope of city planning, various combinations of courses in the minor program can, we feel, augment a major program with a particular slant or emphasis on planning issues or processes.

Declaring the Minor

To declare, students must submit the CED Minor Declaration Form (<https://ced.berkeley.edu/advising/undergraduate-advising/undergraduate-students/major-minor-requirements/>), available on the CED website. Once this request has been approved, you will see the minor added to your Cal Central student profile. It is your responsibility to track your progress towards minor completion using the Academic Progress Report and CED Advising Services.

DEADLINE TO SUBMIT FORM: Prior to the start of classes for a student's final semester.

Other Major and Minor Programs Offered by the Department of City and Regional Planning

Geospatial Information Science and Technology (<http://guide.berkeley.edu/undergraduate/degree-programs/geospatial-information-science-technology/>) (Minor only; offered in conjunction with the College of Natural Resources)

Urban Studies (<http://guide.berkeley.edu/undergraduate/degree-programs/urban-studies/>) (Major only)

Students who have a strong interest in an area of study outside their major often decide to complete a minor program.

General Guidelines

- All minors must be declared no later than one semester before a student's Expected Graduation Term (EGT).
- A letter grade of C- or higher is required in two of the lower division requirements listed below to declare the minor. To declare, students must submit the CED Minor Declaration Form (<https://ced.berkeley.edu/advising/undergraduate-advising/undergraduate-students/major-minor-requirements/>), available on the CED website.
 - DEADLINE TO SUBMIT FORM:** One semester prior to a student's final semester.
- Each course used to fulfill minor requirements must be completed with a letter grade of C- or above.
- Students must earn a 2.0 GPA in the upper division requirements for the minor.
- Any course used in fulfillment of minor requirements may also be used to fulfill major and upper division CED non-major requirements.
- Courses used to fulfill a breadth requirement may also be used to satisfy minor requirements.
- Students may apply the non-CED version of a CED cross-listed course towards the minor.

- Students may use up to two courses taken abroad to fulfill upper division minor requirements, with faculty approval of the individual courses.

Prerequisites

Select two courses from the following, from different subject areas:

Economics

ECON 1	Introduction to Economics [4]
ECON 2	Introduction to Economics--Lecture Format [4]
ENVECON C1/ECON C3	Introduction to Environmental Economics and Policy [4]
or AP Economics, Micro (passing score of 3 or above); or IB ECON HL	

Environmental Design

ENV DES 1	Introduction to Environmental Design [3]
ENV DES 4A	Design and Activism [3]
ENV DES 4B	Global Cities [3]
ENV DES 4C	Future Ecologies: Urban Design, Climate Adaptation, and Thermodynamics [3]
ENV DES 5	Cities and Sites [4]

Statistics

CIV ENG 93	Engineering Data Analysis [3]
DATA C8	Foundations of Data Science [4] (cross-listed w/ COMPSCI C8, INFO C8, & STAT C8)
STAT 2	Introduction to Statistics [4]
STAT 20	Introduction to Probability and Statistics [4]
STAT 21	Introductory Probability and Statistics for Business [4]
STAT C131A	Statistical Methods for Data Science [4]
or AP Statistics (passing score of 3 or above)	

Upper Division

Five courses

Select one upper division core:

CY PLAN 110	Introduction to City Planning [4]
OR	
ENV DES 100	The City: Theories and Methods in Urban Studies [4]

Select four additional upper division courses

At least three courses must be from List 1 below (Planning courses), and not more than one course must from List 2 below (Planning-related courses); all four courses may be from List 1.

List 1: Planning Courses

CY PLAN 101	Introduction to Urban Data Analytics	4

CY PLAN C88 Data Science for Smart Cities 2 Units

Terms offered: Spring 2024, Spring 2023, Spring 2022

Cities become more dependent on the data flows that connect infrastructures between themselves, and users to infrastructures.

Design and operation of smart, efficient, and resilient cities nowadays require data science skills. This course provides an introduction to working with data generated within transportation systems, power grids, communication networks, as well as collected via crowd-sensing and remote sensing technologies, to build demand- and supply-side urban services based on data analytics.

Data Science for Smart Cities: Read More [+]

Objectives & Outcomes

Course Objectives: Become familiar with urban big data and sensor data collection techniques.

Develop intuition in various machine learning classification algorithms, as well as regression modelling.

Develop intuition in various machine learning classification algorithms, as well as regression modelling.

Foster critical thinking about real-world actionability from analytics.

Learn how to use data science techniques in urban decision-making and scenario generation.

Student Learning Outcomes: Develop capabilities in a range of data science techniques.

Gain the ability to solve problems in smart city research and practice.

Think critically about how to assess analytics for cities.

Use data analytics in the smart city domain.

Rules & Requirements

Prerequisites: This course is a Data Science connector course and is meant to be taken concurrent with or after Foundations of Data Science COMPSCI C8/INFO C8/STAT C8. Students may take more than one Data Science connector course if they wish, concurrently or after taking the C8 course

CY PLAN 101 Introduction to Urban Data Analytics 4 Units

Terms offered: Summer 2024 8 Week Session, Summer 2023 8 Week Session, Summer 2022 8 Week Session

This course (1) provides a basic intro to census and economic data collection, processing, and analysis; (2) surveys forecasting and modeling techniques in planning; (3) demonstrates the uses of real-time urban data and analytics; and (4) provides a socio-economic-political context for the smart cities movement, focusing on data ethics and governance.

Introduction to Urban Data Analytics: Read More [+]

Objectives & Outcomes

Student Learning Outcomes: This course will teach students systematic approaches to collecting, analyzing, modeling, and interpreting quantitative data used to inform robust research, and, ultimately, urban planning practice and policymaking. This contributes to the urban studies major's objective of introducing students to "conceptual tools, analytical methods, and theoretical frameworks to understand urban environments, such as economic analysis, social science theory, and visualization technologies," with the objective of training undergraduates for a future career or further graduate study in the field of urban studies and planning.

CY PLAN C139 Urban and Sub-national Politics in Developing Countries 4 Units

Terms offered: Fall 2017, Fall 2013

Over half of the world's population is now urban. As urban populations swell, metropolitan areas in both the developed and the developing world struggle to provide basic services and address the negative externalities associated with rapid growth. Sanitation, transportation, pollution, energy services, and public safety typically fall to sub-national governments.

Yet local sub-national institutions face difficulties as they tackle these challenges because development tends to spill over political boundaries and resources are limited. Such difficulties are particularly acute in the developing world due to tighter resource constraints, weak institutions, and the comparative severity of the underlying problems. Moreover, democratization and decentralization suggest that urban governance and service delivery may have become more democratic, but present challenges with respect to priority setting, coordination, and corruption.

CY PLAN 160 The Origins and Practice of Community Development 4 Units

Terms offered: Spring 2023, Spring 2021

Community development, broadly defined as efforts to improve the quality of life in low-income communities, has existed in multiple forms for centuries. However, in the 1950s and 1960s, the United States witnessed the development of a professionalized field of community development, encompassing a wide range of institutions, policies, and programs.

This course provides students with an overview of the origins of the community development field and the key theories that motivate both practice and policy. Throughout the course, case studies will provide a real-world perspective on community development and how practitioners are working to create healthy and economically vibrant communities for all.
