XGEOG 50AC California 4 Units
Terms offered: Fall 2020, Fall 2019, Fall 2018
California had been called 'the great exception' and 'America, only more so.' Yet few of us pay attention to its distinctive traits and to its effects beyond our borders. California may be 'a state of mind,' but it is also the most dynamic place in the most powerful country in the world, and would be the 8th largest economy if it were a country. Its wealth has been built on mining, agriculture, industry, trade, and finance. Natural abundance and geographic advantage have played their parts, but the state's greatest resource has been its wealth and diversity of people, who have made it a center of technological and cultural innovation from Hollywood to Silicon Valley. Yet California has a dark side of exploitation and racialization.
