L & S 2 Democracy in Crisis? 1 Unit

Terms offered: Fall 2020

Is democracy in crisis and does it have a future? How do we make sense of the rise of democratically elected but authoritarian figures like Trump, Putin, Modi, Bolsonaro? Are capitalism and social media the problem or the solution to failing democracies? Can democracy ever shed its racist, sexist, propertied and colonial foundations? This class aims to help you deepen these questions, and generate new ones.

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of lecture per week

L & S 4 Openness to Opposing Views 1 Unit

Terms offered: Fall 2025, Summer 2025 Second 6 Week Session

What does it mean to be open to opposing views? This course emphasizes the Berkeley Changemaker themes of critical thinking, effective communication, and productive collaboration. You will combine critical examination of evidence-based, multi-disciplinary research and theories with personal self-reflection and practice in engaged discourse. These are interwoven with implementable strategies, directly applicable to the public, private, and civic sectors, to help you develop a sharper sense of how to engage productively with those whose perspective might be radically different from your own. As you do so, you will be exposed to approaches from academic disciplines across UC Berkeley and will sharpen your changemaking skillset.

Hours & Format

Fall and/or spring: 8 weeks - 2 hours of lecture per week

Summer: 6 weeks - 2 hours of lecture per week

L & S 5 Introduction to Entrepreneurship 2 Units

Terms offered: Fall 2012, Spring 2012, Fall 2011

This course is designed for freshmen and sophomores who wish to know about entrepreneurship, its importance to our society, and its role in bringing new ideas to market. Students will understand the entrepreneurial business process and how they might become involved in those processes in their future careers--in whatever direction those careers might lead. This class will explore the structure and framework of entrepreneurial endeavors--both inside and outside the business world. The course will answer questions such as: What is entrepreneurship? What is opportunity recognition and selection? How can you create and define competitive advantage? How can you think about people in the entrepreneurial context? How can you garner support (financial and other) for an entrepreneurial venture? What do you do when nothing works as planned? And, how do you focus on doing right and doing well?

Terms offered: Fall 2025, Summer 2025 Second 6 Week Session, Spring 2025, Spring 2024, Fall 2023, Summer 2023 Second 6 Week Session
Berkeley Changemaker impact occurs across many fronts: scientific, artistic, social, and entrepreneurial. This course helps students identify as a Berkeley Changemaker and learn the critical thinking, communication, and collaboration skills to become one. Combining disciplines across UC Berkeley, the course also helps launch the Berkeley Discovery arc. Students develop their own leadership styles and discover how they can create and lead diverse teams to act upon the world. Values in Berkeley's DNA like Questioning the Status Quo and going Beyond Yourself support students in leading from whatever position they occupy, preparing them to leave their mark on campus, in their communities, or beyond. L & S 20C Arts and Literature 3 or 4 Units

Terms offered: Spring 2009

This course features significant engagement with arts, literature or language, either through critical study of works of art or through the creation of art. Art enables us to see the familiar world with new, often questioning eyes, and makes distant times and places, characters, and issues come alive in our imagination, which is essential to almost all intellectual endeavor. The Arts and Literature breadth requirement is intended to provide students with knowledge and appreciation of the creative arts so that, for the duration of their lives, engagement with art can be, variously, a wellspring of creativity, a lodestar for critical perspectives, and a touchstone of aesthetic quality--in sum, a continuing source of learning and serious pleasure.

Hours & Format

Fall and/or spring: 15 weeks - 3-4 hours of lecture and 1 hour of discussion per week

Summer:

8 weeks - 5.5-7.5 hours of lecture and 1.5 hours of discussion per week

10 weeks - 4.5-6 hours of lecture and 1.5 hours of discussion per week

L & S 22 Sense and Sensibility and Science 4 Units

Terms offered: Spring 2025, Spring 2023, Spring 2022

Every day we make decisions that can and should be informed by science. We make decisions as individuals, as voters, and as members of our various communities. The problem is, we don't do it so well—a fact sadly apparent in political debates. This course aims to equip students with basic tools to be better thinkers. We will explore key aspects of scientific thinking that everyone should know, especially the many ways that we humans tend to fool ourselves, and how to avoid them—including how to differentiate signal from noise, evaluate causal claims, and avoid reasoning biases. We'll then look at the best models for using science to guide decisions, combining both evidence and values, with the ultimate goal of bettering the world.

L & S 23 The Humanities 4 Units

Terms offered: Fall 2015, Fall 2001

Today the humanities, once considered the jewels of a liberal arts education, find they must justify their very existence. In 1967, Ronald Reagan, then Governor of California, argued against taxpayers "subsidizing intellectual curiosity." By 2015, the Wisconsin governor had reduced his university's mission to "meeting the state's workforce needs." Is this self-styled "commonsensical" thinking valid? Should the humanities try to make themselves more professional or "scientific"? Rather than seeing the humanities as a series of independent disciplines focused on different specific ends, this course argues that the humanities map the many ways that human beings have sought to be human throughout human history.

L & S 25 Thinking Through Art and Design @Berkeley 3 Units

Terms offered: Spring 2024, Spring 2023, Fall 2022

This course introduces students to key vocabularies, forms, and histories from the many arts and design disciplines represented at UC Berkeley. It is conceived each year around a central theme that responds to significant works and events on the campus, providing an introduction to the many art and design resources available to students on campus. Students will compare practices from across the fields of visual art, film, dance, theater, music, architecture, graphic design, new media, and creative writing, and explore how different artists respond formally to the central themes of the course, considering how similar questions and arguments are differently addressed in visual, material, embodied, sonic, spatial, and linguistic forms.

L & S 40D Historical Studies 3 or 4 Units

Terms offered: Fall 2014, Fall 2009

Each lower-division course in this series deals primarily with the human events, institutions and activities of the past. Historical Studies are particularly important because, to paraphrase the philosopher George Santayana, those who fail to learn the lessons of history are doomed to repeat its mistakes. The study of history provides us with perspective on the human condition and with an appreciation of the origins and evolution of the numerous cultures and social orders that have populated the earth. Whether students study history to understand how our world evolved from the past or to focus on the distinctions between the present and previous eras, they will come away with a richer understanding of and appreciation for human experience.

L & S 40E Learning from Disney 4 Units

Terms offered: Fall 2024, Spring 2022, Fall 2020

The word “Disney” refers to a man who died in 1966, a film studio that became a global media corporation, six amusement parks/resorts, an oeuvre of audio-visual texts with hundreds of characters and millions of associated products, and a theory of space and landscape design. The word also suggests a set of ideological messages about gender, race, ethnicity, sexuality and nationhood. This course will focus on all things “Disney” to introduce students to the study of American history, Hollywood films as cultural representations, and the American built environment.

L & S 54 Mindfulness and Meditation: Traditional and Scientific Perspectives 2 Units

Terms offered: Fall 2018

In this course, we will bring together scholarly inquiry with applied practice. Throughout the semester we will read from contemporary scientific literature on meditation and mindfulness practices – looking at the research from multiple angles: psychological, neurobiological, physiological, and social. In tandem, throughout the semester, we will learn and practice techniques of meditation and concentration. For those with no experience, this class is intended to be an introduction to meditation, and those with existing experience, it is presented as a context in which to deepen one's practice in community and to explore new methods.

Objectives & Outcomes

Student Learning Outcomes: Develop familiarity with the subjects of mindfulness and meditation, understanding how these subjects are employed in the contemporary media, in clinical settings, and in scientific research, as well as their historical origins.

Learn and practice how to apply these basic techniques in a variety of situations such as resting, listening, walking, eating, and sleeping – in short, everyday life.

Learn how to practice several basic mindfulness and meditation techniques involving relaxation and attentional focus.

L & S C60T What is Beauty? 4 Units

Terms offered: Fall 2018, Fall 2011

What or who decides whether something is beautiful or not? What purpose do beauty and art serve? Where do originality, genius, and inspiration come from? What do art and beauty have to do with freedom and human progress? We will examine primarily western European and North American approaches to beauty as presented in works of philosophy, literary theory, and theories of art and aesthetics, exploring key theoretical questions as they evolve among several intellectual arenas over many centuries.

L & S C60U Revolutionary Thinking: Marx, Nietzsche, Freud 4 Units

Terms offered: Spring 2025, Spring 2023, Spring 2020

We will explore the ways in which Marx, Nietzsche, and Freud--three of the most important thinkers in modern Western thought--can be read as responding to the Enlightenment and its notions of reason and progress. We will consider how each remakes a scientific understanding of truth, knowledge, and subjectivity, such that rationality, logic, and the powers of human cognition are shown to be distorted, limited, and subject to forces outside our individual control. All lectures and readings in English.

L & S C60V Moral Provocations: Job, Abraham, Moses 4 Units

Terms offered: Spring 2022, Spring 2021

How do we know what the "moral" of a story is? We will focus on three biblical narratives that have frequently been interpreted as teaching moral lessons: the story of Job, the story of Abraham and the binding of Isaac, and the story of Moses giving the law. These stories have been interpreted variously in moral terms--e.g. as demonstrating the virtues of faith, obedience, mercy, and forgiveness, and as teaching us about guilt, punishment, reward, and human frailty. They have also been analyzed as existential parables, psychological dramas, and political allegories. The goal of this class is to examine how a range of different, and often provocative, interpretations of these stories' moral lessons rest on particular ways of reading.

L & S C60X Big Words in Law 4 Units

Terms offered: Spring 2022

In this class we will consider big words in law that are key to our present, understood as plural and global. Each semester, the course will focus on twelve timely words that demand our attention and critical reflection. We will choose words that are often mobilized in political battles, approaching them not as fixed units of speech but as sites for arguments and visions for the planet we co-inhabit. The objective is not to secure a definition for the word; it is rather to open it up and to gain appreciation for its different layers, operations, and sometimes unrealized meanings. Because law and legal words are themselves contested, we will also consider the differing commitments that people display toward what counts as law for them.

L & S 70C Living on the Edge 4 Units

Terms offered: Spring 2023, Spring 2022, Spring 2021

Introduction to natural and human-induced hazards and their impacts on current and future development. The course explores dangers posed by geologic-, atmospheric-, pandemic-, and climate change-hazards and their impacts on human health and well-being. Examples of these dangers include earthquakes, tsunamis, volcanic eruptions, hurricanes, the COVID-19 pandemic, extreme heat, and drought. The course evaluates these hazards in the context of long-term hazards and risks to society and options for future adaptation and mitigation. The course explores the way scientists and engineers understand and evaluate hazards, vulnerability, and risk: three central and unifying concepts explored throughout the semester.

L & S C70B Global Warming 4 Units

Terms offered: Not yet offered

This course examines global warming as both a geophysical and social issue. We will introduce the physical science that explains the problem, from the basic concepts of climate (carbon cycle, greenhouse effect, climate feedbacks) through to the models that project future climate changes and their impacts. Social scientific perspectives will cover the history of climate science, the geographical and political-economic implications of fossil fuels for industrial production, and the regulatory and ethical challenges posed by the current and prospective impacts of global warming. We will provide students with a solid understanding & information base with which to analyze and evaluate ongoing developments and debates surrounding climate change.

L & S 76 Beauty and the Beholder: Approaching Art at the Berkeley Art Museum 4 Units

Terms offered: Fall 2017

This seminar-style course will take up a range of questions related to art works, aesthetic theory, the politics of art, and the relationship between artistic form and meaningful content by way of examinations of specific works at the UC Berkeley Art Museum and Pacific Film Archive (BAM/ PFA). Students will see how experts from several different disciplines approach works of art: What questions do scholars bring to an art work? What is a formal analysis vs. a critical interpretation of an art work? How do curators approach art? Are we supposed to 'learn from' an art work or 'experience' it or have some particular 'relationship' to it? Is art a matter of conveying feeling, a message, or an encounter with beauty?

Terms offered: Fall 2025, Summer 2025 Second 6 Week Session

What does it mean to be open to opposing views? This course emphasizes the Berkeley Changemaker themes of critical thinking, effective communication, and productive collaboration. You will combine critical examination of evidence-based, multi-disciplinary research and theories with personal self-reflection and practice in engaged discourse. These are interwoven with implementable strategies, directly applicable to the public, private, and civic sectors, to help you develop a sharper sense of how to engage productively with those whose perspective might be radically different from your own. As you do so, you will be exposed to approaches from academic disciplines across UC Berkeley and will sharpen your changemaking skillset.

L & S 120B Arts and Literature 3 or 4 Units

Terms offered: Fall 2008

This upper division course features significant engagement with arts, literature or language, either through critical study of works of art or through the creation of art. Art enables us to see the familiar world with new, often questioning eyes, and makes distant times and places, characters, and issues come alive in our imagination, which is essential to almost all intellectual endeavor. The Arts and Literature breadth requirement is intended to provide students with knowledge and appreciation of the creative arts so that, for the duration of their lives, engagement with art can be, variously, a wellspring of creativity, a lodestar for critical perspectives, and a touchstone of aesthetic quality--in sum, a continuing source of learning and serious pleasure.

Hours & Format

Fall and/or spring: 15 weeks - 3-4 hours of lecture and 1 hour of discussion per week

Summer:

8 weeks - 5.5-7.5 hours of lecture and 1.5 hours of discussion per week

L & S C120T Ideas of Education 4 Units

Terms offered: Spring 2025, Spring 2024, Spring 2021

What is the purpose of education? Should the university prepare students for the job market or emphasize the pursuit of knowledge for its own sake? Is knowledge a value in itself? This course explores these questions, among others, while concentrating on the German idea of Bildung. It introduces students to the classical idea of education and self-formation by reading a wide range of texts from German philosophy, intellectual history, and literature. Furthermore, the course traces the history of this idea by exploring how Bildung informs contemporary literary works and film. Emphasis will be on issues of class, race, and gender.

L & S 121 Origins in Science and Religion 4 Units

Terms offered: Spring 2019, Spring 2015, Spring 2013

This course explores the concepts of origins in science and religion and their cultural contexts and entanglements, from antiquity to the present. Guiding questions include these: What are origins, and why do we want to know about them? How does this desire manifest itself in different ways of constructing and analyzing knowledge? What sorts of intellectual processes, standards, and tests can be applied to different concepts of origins? What happens when different notions of origins clash?

L & S 122 Time 4 Units

Terms offered: Spring 2013, Spring 2003, Spring 2001

Augustine said, famously, that he always thought he understood what time was until he started thinking about it. That was when he realized he had no idea. This course will address various aspects of the nature of time, including the way we experience it, the way it organizes our everyday world, and the way it stands if it does at the foundation of the physical universe. The course will be devoted both to understanding, and to understanding the relations among, these three aspects of temporality.

L & S 124 Consciousness: Buddhist and Neuroscientific Perspectives 3 Units

Terms offered: Spring 2017, Spring 2014, Spring 2002

Twenty-five years ago the Dalai Lama suggested that a dialogue between Buddhist practitioners and Western scientists interested in the nature of consciousness and its relationship to the world might lead to new ideas and be of benefit to both communities. While science and religion are not generally considered to be natural collaborators, the dialogue that ensued quickly gained momentum and catalyzed new strands of research, most notably in the area of the neuroscience of meditation and emotion. We will continue this dialogue, first by laying the necessary groundwork in our respective fields, and then by exploring areas of convergence and divergence around certain themes.

L & S 128 Crowds and Clouds 4 Units

Terms offered: Spring 2018

What is a crowd? Is it a swarm of bodies on the street, a dancing flash mob, or a set of data points culled from social media? This class investigates how digital cloud technologies cluster us together into formations that could be understood as both pleasurable and dangerous. We will look at how visual artists and social theorists have addressed issues such as self-tracking, fears around immigration, and crowdsourcing. We will also investigate how surveillance, big data, and social media are used by current governments and reframed by insurgent political movements. We approach the topic through historically grounded, interdisciplinary scholarship in the visual arts, art history, ethnography, literature, and geography.

L & S 133 Sense and Sensibility and Science 4 Units

Terms offered: Not yet offered

Every day we make decisions that can and should be informed by science. We make decisions as individuals, as voters, and as members of our various communities. The problem is, we don't do it so well—a fact sadly apparent in political debates. This course aims to equip students with basic tools to be better thinkers. We will explore key aspects of scientific thinking that everyone should know, especially the many ways that we humans tend to fool ourselves, and how to avoid them—including how to differentiate signal from noise, evaluate causal claims, and avoid reasoning biases. We'll then look at the best models for using science to guide decisions, combining both evidence and values, with the ultimate goal of bettering the world.

L & S 140C Historical Studies 3 or 4 Units

Terms offered: Fall 2008

Each upper-division course in this series deals primarily with the human events, institutions and activities of the past. Historical Studies are particularly important because, to paraphrase the philosopher George Santayana, those who fail to learn the lessons of history are doomed to repeat its mistakes. The study of history provides us with perspective on the human condition and with an appreciation of the origins and evolution of the numerous cultures and social orders that have populated the earth. Whether students study history to understand how our world evolved from the past or to focus on the distinctions between the present and previous eras, they will come away with a richer understanding of and appreciation for human experience.

L & S C140V The History and Practice of Human Rights 4 Units

Terms offered: Fall 2024, Fall 2023, Fall 2022

This course examines the historical development of human rights to the present day, focusing especially (but not exclusively) on the nineteenth and twentieth centuries. More than a history of origins, however, this course will contemplate the relationships between human rights and other crucial themes in the history of the modern era, including revolution, slavery, capitalism, colonialism, racism, and genocide. As a history of international and global themes and an examination of specific practices and organizations, this course will ask students to make comparisons across space and time and to reflect upon the evolution of human rights in international thought and action—from imperial beginnings to the crises of our time.

L & S 160D Philosophy and Values 3 or 4 Units

Terms offered: Fall 2013, Spring 2013, Spring 2012

According to Aristotle, every exercise of our faculties has some good for its aim. Every discipline taught in the College of Letters & Science has ethical implications, and to study a particular subject without considering these implications can be a sterile--and in extreme cases hazardous--exercise. The urge and ability to ponder such questions as the meaning of life distinguish human beings from the other animals. In an increasingly complex world, in which traditional values are often called into question, students of the College are encouraged to reflect upon their own assumptions as well as the assumptions of other times and cultures. In these upper-division Philosophy and Values courses students in the College will be encouraged to ponder the types of questions that will enhance their ability to understand their heritage, their contemporaries, and themselves.

L & S C160V Human Happiness 3 Units

Terms offered: Fall 2025, Fall 2024, Fall 2023, Spring 2022

This course will take an interdisciplinary approach to an understanding of happiness. The first part of the course will be devoted to the different treatments of happiness in the world's philosophical traditions, focusing up close on conceptions of the good life in classical Greek and Judeo-Christian thought, the great traditions in East Asian thought (Taoism, Buddhism, Confucianism), and ideas about happiness that emerged more recently in the age of Enlightenment. With these different perspectives as a framework, the course will then turn to treatments of happiness in the behavioral sciences, evolutionary scholarship, and neuroscience. Special emphasis will be given to understanding how happiness arises in experiences of the moral emotions, including gratitude, compassion, reverence and awe, as well as aesthetic emotions like humor and beauty.
