L&S 1 Exploring the Liberal Arts 2 Units
Terms offered: Fall 2016, Fall 2015, Fall 2014
This is a course for entering students, particularly those who are undecided about the major they would like to pursue. It provides an introduction to the intellectual landscape of the College of Letters and Science, revealing the underlying assumptions, goals, and structure of a liberal arts education. Topics include the difference between the College of Letters and Science and the professional schools, the rationale behind the breadth requirement, the approaches and methodologies of each of the divisions in the college, and the benefits of engaging in research as an undergraduate. The ultimate goal of the course is to transform the students into informed participants in their own educational experiences, so that they can make the most of their years at Berkeley.

L & S W1 Exploring the Liberal Arts 2 Units
Terms offered: Summer 2020 8 Week Session, Summer 2019 8 Week Session, Summer 2018 8 Week Session
This is a course for entering students, particularly those who are excited to be here but uncertain of where to start their explorations. It provides an introduction to the intellectual landscape of the College of Letters and Science, revealing the underlying assumptions, goals and structure of a liberal arts education. Guest speakers, drawn largely from the faculty and recent graduates of L&S, will shed light on the nature and attractions of their disciplines. The ultimate goal of the course is to transform students into informed participants in their own educational experiences at Berkeley.

L & S 1W Exploring the Liberal Arts Hybrid Course 2 Units
Terms offered: Fall 2020, Fall 2019, Fall 2018
A hybrid course for entering students, particularly those who are undecided about the major they would like to pursue. It provides an introduction to the intellectual landscape of the College of Letters and Science, revealing the underlying assumptions, goals, and structure of a liberal arts education. Topics include the rationale behind the breadth requirement, the approaches and methodologies of each of the divisions in the college, and the benefits of engaging in research as an undergraduate. The ultimate goal of the course is to transform the students into informed participants in their own educational experiences, so that they can make the most of their years at Cal.

Instructor: Schwartz

L & S W1 Exploring the Liberal Arts 2 Units

L & S 2 Democracy in Crisis? 1 Unit
Terms offered: Fall 2020
Is democracy in crisis and does it have a future? How do we make sense of the rise of democratically elected but authoritarian figures like Trump, Putin, Modi, Bolsonaro? Are capitalism and social media the problem or the solution to failing democracies? Can democracy ever shed its racist, sexist, propertyed and colonial foundations? This class aims to help you deepen these questions, and generate new ones.
Democracy in Crisis?: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture per week

L & S 5 Introduction to Entrepreneurship 2 Units
Terms offered: Fall 2012, Spring 2012, Fall 2011
This course is designed for freshmen and sophomores who wish to know about entrepreneurship, its importance to our society, and its role in bringing new ideas to market. Students will understand the entrepreneurial business process and how they might become involved in those processes in their future careers--in whatever direction those careers might lead. This class will explore the structure and framework of entrepreneurial endeavors--both inside and outside the business world. The course will answer questions such as: What is entrepreneurship? What is opportunity recognition and selection? How can you create and define competitive advantage? How can you think about people in the entrepreneurial context? How can you garner support (financial and other) for an entrepreneurial venture? What do you do when nothing works as planned? And, how do you focus on doing right and doing well?

L & S C5 Introduction to Entrepreneurship 2 Units
Terms offered: Fall 2020, Fall 2019, Fall 2018, Spring 2017
This course offers students a taste of what it's really like to start a business. In addition to learning key foundational entrepreneurial concepts such as idea generation & evaluation, customer & product development, creating a business model, fundraising, marketing, and scaling & exiting a business, students will also hear from successful entrepreneurs who share their perspectives and best practices. Students will apply core concepts by working in teams to evaluate and select a venture idea that they will then develop throughout the semester.

**L & S C12 The Berkeley Changemaker 2 Units**
Terms offered: Spring 2021, Summer 2020 3 Week Session
The course is a discovery experience: Students discover their own leadership styles, and they discover how they can create teams — and act upon the world — to effect positive change. Students will learn how to imagine better futures, and then learn how to mobilize others to help create them. Changemakers make their impact through scientific breakthroughs, artistic imagination, social action projects, and entrepreneurial ventures. Online class sessions will cover both theoretical and practical topics, such as critical thinking, persuasive communication, problem framing, hypothesis testing, and leading and working with teams.

The ultimate goal of the course is to help incoming students discover their own identity as Berkeley Changemakers.

**L & S 20C Arts and Literature 3 or 4 Units**
Terms offered: Spring 2009
This course features significant engagement with arts, literature or language, either through critical study of works of art or through the creation of art. Art enables us to see the familiar world with new, often questioning eyes, and makes distant times and places, characters, and issues come alive in our imagination, which is essential to almost all intellectual endeavor. The Arts and Literature breadth requirement is intended to provide students with knowledge and appreciation of the creative arts so that, for the duration of their lives, engagement with art can be, variously, a wellspring of creativity, a lodestar for critical perspectives, and a touchstone of aesthetic quality—in sum, a continuing source of learning and serious pleasure.

Arts and Literature: Read More [+]

**Hours & Format**
Fall and/or spring: 15 weeks - 3-4 hours of lecture and 1 hour of discussion per week
Summer:
8 weeks - 5.5 hours of lecture and 1.5 hours of discussion per week
10 weeks - 4.5-6 hours of lecture and 1.5 hours of discussion per week

**Additional Details**

**Subject/Course Level:** Letters and Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**L & S 20E Edible Stories: Representing California Food Culture 4 Units**
Terms offered: Spring 2019, Fall 2016
Focusing on California writers and artists, this course will include a wide range of food-related texts and images in order to explore the relationship between representation, interpretation and cultural identity. Students will examine fiction, film, photography, food memoirs, paintings, advertising, cookbooks and television to help them think critically about issues of form, medium and audience. Assignments will help students develop “humanities” skills such as writing personal essays, doing cultural “close readings,” analyzing literary and visual representations, and organizing and writing materials and web designs that contribute to larger conversations about California, food and representation.

**L & S C20T Introduction to Western Art: Renaissance to the Present 4 Units**

Terms offered: Spring 2021

An introduction to the historical circumstances and visual character of Western art from the Renaissance to the present. Not a chronological survey, but an exploration of topics and themes central to this period. For example: What tasks did painting and sculpture perform in the past? For whom, at whose expense? How do the rise of landscape painting, the cult of the artist, and the new emphasis on the nude relate to the emergence of modern society? Do stylistic labels like Classicism, Realism, Impressionism, and Modernism help us answer such questions? This course is recommended for potential majors and for students in other disciplines, both humanities and sciences.

**Credit Restrictions:** Students will receive no credit for HISTART C11 after completing HISTART 11. A deficient grade in HISTART C11 may be removed by taking HISTART 11.

**Rules & Requirements**

---

**L & S 22 Sense and Sensibility and Science 4 Units**

Terms offered: Spring 2021, Spring 2020, Spring 2018

Every day we make decisions that can and should be informed by science. We make decisions as individuals, as voters, and as members of our various communities. The problem is, we don't do it so well—a fact sadly apparent in political debates. This course aims to equip students with basic tools to be better thinkers. We will explore key aspects of scientific thinking that everyone should know, especially the many ways that we humans tend to fool ourselves, and how to avoid them—including how to differentiate signal from noise, evaluate causal claims, and avoid reasoning biases. We'll then look at the best models for using science to guide decisions, combining both evidence and values, with the ultimate goal of bettering the world.

**Rules & Requirements**

**Prerequisites:** Instructor approval may be required in order to achieve a balanced class

**Hours & Format**

*Fall and/or spring:* 15 weeks - 4 hours of lecture and 1 hour of discussion per week

**Additional Details**

**Subject/Course Level:** Letters and Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**L & S 23 The Humanities 4 Units**

Terms offered: Fall 2015, Fall 2001

Today the humanities, once considered the jewels of a liberal arts education, find they must justify their very existence. In 1967, Ronald Reagan, then Governor of California, argued against taxpayers "subsidizing intellectual curiosity." By 2015, the Wisconsin governor had reduced his university’s mission to "meeting the state’s workforce needs."

Is this self-styled "commonsensical" thinking valid? Should the humanities try to make themselves more professional or "scientific"? Rather than seeing the humanities as a series of independent disciplines focused on different specific ends, this course argues that the humanities map the many ways that human beings have sought to be human throughout human history.

**Rules & Requirements**

**Hours & Format**

*Fall and/or spring:* 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Additional Details**

**Subject/Course Level:** Letters and Science/Undergraduate

**Grading/Final exam status:** Letter grade. Alternative to final exam.

L & S 25 Thinking Through Art and Design @Berkeley 3 Units
Terms offered: Spring 2021, Fall 2020, Spring 2020
This course introduces students to key vocabularies, forms, and histories from the many arts and design disciplines represented at UC Berkeley. It is conceived each year around a central theme that responds to significant works and events on the campus, providing an introduction to the many art and design resources available to students on campus. Students will compare practices from across the fields of visual art, film, dance, theater, music, architecture, graphic design, new media, and creative writing, and explore how different artists respond formally to the central themes of the course, considering how similar questions and arguments are differently addressed in visual, material, embodied, sonic, spatial, and linguistic forms.

Instructor: Wilt

Also listed as: MCELLBI C31

Big Ideas in Cell Biology: Read Less [-]

L & S C30Y Biology for Voters 3 Units
Terms offered: Spring 2017, Spring 2015, Spring 2014
This is a Discovery Course for non-Biology majors designed to introduce lower-division college students to biology through the lens of the contemporary problems facing people, the planet and the species of the planet. Modern genetic contributions will be presented on such issues as genetic engineering of plants and animals, the emergence of new pathogens, the role of genetic variation among individuals, and the extent to which DNA is and isn’t destiny. Each week will close with the presentation and discussion of a defining biological challenge facing the world.

**Objectives & Outcomes**

**Student Learning Outcomes:** The learning objectives will be, at one end, to understand what an experiment is, how it is controlled and what does one need to know about an experiment to be able to rely upon any conclusion. That is the fundamental issue in all science, and is frequently overlooked in many media accounts of science. A second objective is to learn enough of the language of biology to be able to ask the kind of informed questions that we would want all elected representatives to pay attention to. A third objective is for students to cultivate confidence that through non-specialized information sources they can become informed consumers of contemporary scientific thought, and to develop those habits of intellect to think about evidence in a scientific manner. A fourth objective is for students to enjoy the abundance of high quality books, articles and multimedia that will enable a lifetime of discovery outside the structure of a college course.

**Hours & Format**
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Additional Details**
Subject/Course Level: Letters and Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

L & S C30Z Bioinspired Design 3 Units
Terms offered: Spring 2021, Spring 2020, Spring 2019
Bioinspired design views the process of how we learn from Nature as an innovation strategy translating principles of function, performance and aesthetics from biology to human technology. The creative design process is driven by interdisciplinary exchange among engineering, biology, art, architecture and business. Diverse teams of students will collaborate on, create, and present original bioinspired design projects. Lectures discuss biomimicry, challenges of extracting principles from Nature, scaling, robustness, and entrepreneurship through case studies highlighting robots that run, fly, and swim, materials like gecko-inspired adhesives, artificial muscles, medical prosthetic devices, and translation to start-ups.

L & S 40C Hollywood: The Place, the Industry, the Fantasy 4 Units
Terms offered: Fall 2019, Fall 2017, Fall 2015
This course is about the history of the Hollywood “Dream Factory,” focusing on both parts of that phrase. We will examine the historical and geographical development of the motion picture industry from the rise of the studio system to the “new” entertainment economy of the 1980’s, as we think about the ways films have constructed powerful and productive fantasies about the boundaries between public and private, work and play, commerce and art, fantasy and reality. Our topics will include the history of labor in the culture industry, the implications of shifts in the spatial organization of film production, and the effects of Hollywood on the larger politics of southern California.

L & S 40D Historical Studies 3 or 4 Units
Terms offered: Fall 2014, Fall 2009
Each lower-division course in this series deals primarily with the human events, institutions and activities of the past. Historical Studies are particularly important because, to paraphrase the philosopher George Santayana, those who fail to learn the lessons of history are doomed to repeat its mistakes. The study of history provides us with perspective on the human condition and with an appreciation of the origins and evolution of the numerous cultures and social orders that have populated the earth. Whether students study history to understand how our world evolved from the past or to focus on the distinctions between the present and previous eras, they will come away with a richer understanding of and appreciation for human experience.

L & S 40E Learning from Disney 4 Units
Terms offered: Fall 2020
The word “Disney” refers to a man who died in 1966, a film studio that became a global media corporation, six amusement parks/resorts, an oeuvre of audio-visual texts with hundreds of characters and millions of associated products, and a theory of space and landscape design. The word also suggests a set of ideological messages about gender, race, ethnicity, sexuality and nationhood. This course will focus on all things “Disney” to introduce students to the study of American history, Hollywood films as cultural representations, and the American built environment.

L & S C40T Introduction to American Studies: Hollywood: the Place, the Industry, the Fantasy 4 Units
Terms offered: Spring 2013
This course will introduce students to the interdisciplinary field of American Studies, taking the “Hollywood Dream Factory” as the central theme. Focusing on both parts of that phrase, the course will proceed along a double path. We will examine the historical and geographical development of the motion picture industry from the rise of the studio system to the “new” entertainment economy of the 1980’s and we will examine ways Hollywood is represented in literature and film.
L & S C46 Climate Change and the Future of California 4 Units
Terms offered: Spring 2021, Spring 2018, Spring 2016
Introduction to California geography, environment, and society, past and future climates, and the potential impacts of 21st-century climate change on ecosystems and human well-being. Topics include fundamentals of climate science and the carbon cycle; relationships between human and natural systems, including water supplies, agriculture, public health, and biodiversity; and the science, law, and politics of possible solutions that can reduce the magnitude and impacts of climate change.

L & S 54 Mindfulness and Meditation: An Introduction 1 Unit
Terms offered: Fall 2018
The practices associated with mindfulness and meditation derive from traditions thousands of years old. Contemporary psychological and biological research has demonstrated that regular practice of simple-to-learn mindfulness procedures results in benefits to mental and physical health, including improved attention, improved sleep quality, and reduced mental and physical toxic responses of the body to stress. Students will develop an understanding of how these subjects are employed in the contemporary media, in clinical settings, and in scientific research, as well as their historical origins, and learn how to practice several basic mindfulness and meditation techniques, and apply these basic techniques in their everyday lives.

L & S 54 Mindfulness and Meditation: An Introduction: Read More [+]

Objectives & Outcomes
Student Learning Outcomes: Develop familiarity with the subjects of mindfulness and meditation, understanding how these subjects are employed in the contemporary media, in clinical settings, and in scientific research, as well as their historical origins.

Learn and practice how to apply these basic techniques in a variety of situations such as resting, listening, walking, eating, and sleeping – in short, everyday life.

Learn how to practice several basic mindfulness and meditation techniques involving relaxation and attentional focus.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture per week

Additional Details
Subject/Course Level: Letters and Science/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Alternative to final exam.

L & S C60T What is Beauty? 4 Units
Terms offered: Fall 2018, Fall 2011
What or who decides whether something is beautiful or not? What purpose do beauty and art serve? Where do originality, genius, and inspiration come from? What do art and beauty have to do with freedom and human progress? We will examine primarily western European and North American approaches to beauty as presented in works of philosophy, literary theory, and theories of art and aesthetics, exploring key theoretical questions as they evolve among several intellectual arenas over many centuries.
What is Beauty?: Read More [+]

L & S C60U Revolutionary Thinking: Marx, Nietzsche, Freud 4 Units
Terms offered: Spring 2020, Spring 2018, Fall 2015
We will explore the ways in which Marx, Nietzsche, and Freud--three of the most important thinkers in modern Western thought--can be read as responding to the Enlightenment and its notions of reason and progress. We will consider how each remakes a scientific understanding of truth, knowledge, and subjectivity, such that rationality, logic, and the powers of human cognition are shown to be distorted, limited, and subject to forces outside our individual control. All lectures and readings in English.

L & S C60V Moral Provocations: Job, Abraham, Moses 4 Units
Terms offered: Spring 2021
How do we know what the “moral” of a story is? We will focus on three biblical narratives that have frequently been interpreted as teaching moral lessons: the story of Job, the story of Abraham and the binding of Isaac, and the story of Moses giving the law. These stories have been interpreted variously in moral terms--e.g. as demonstrating the virtues of faith, obedience, mercy, and forgiveness, and as teaching us about guilt, punishment, reward, and human frailty. They have also been analyzed as existential parables, psychological dramas, and political allegories. The goal of this class is to examine how a range of different, and often provocative, interpretations of these stories’ moral lessons rest on particular ways of reading.

L & S 70A Physics and Music 3 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015
Physics and Music is a course designed to help students think about how to approach the world with the eyes, ears, and mind of a scientist. We will use the domain of music and sound to ask what we can learn about the nature of reality and the methods that we humans have developed to discover how the world works. The mysteries of music have long inspired scientists to invent new tools of thought, and some of the earliest scientific concepts were invented to understand music. Surprisingly the concepts that underlie our approach to music appear again and again in the world around us, and they are still at play in the very latest theories and experiments of fundamental physics.
Physics and Music: Read More [+]
Rules & Requirements
Credit Restrictions: No credit for students who have taken L&S C70W / Physics C21.

L & S 70B Global Warming 4 Units
Terms offered: Fall 2018, Spring 2015, Spring 2011
This course examines global warming as both a geophysical and social issue. We will introduce the physical science that explains the problem, from the basic concepts of climate (carbon cycle, greenhouse effect, climate feedbacks) through to the models that project future climate changes and their impacts. Social scientific perspectives will cover the history of climate science, the geographical and political-economic implications of fossil fuels for industrial production, and the regulatory and ethical challenges posed by the current and prospective impacts of global warming. We will provide students with a solid understanding & information base with which to analyze and evaluate ongoing developments and debates surrounding climate change.
Global Warming: Read More [+]

L & S 70C Living on the Edge 4 Units
Terms offered: Spring 2021, Spring 2020, Spring 2019
Introduction to natural and human-induced hazards and their impacts on current and future development. The course explores dangers posed by geologic-, atmospheric-, pandemic-, and climate change-hazards and their impacts on human health and well-being. Examples of these dangers include earthquakes, tsunamis, volcanic eruptions, hurricanes, the COVID-19 pandemic, extreme heat, and drought. The course evaluates these hazards in the context of long-term hazards and risks to society and options for future adaptation and mitigation. The course explores the way scientists and engineers understand and evaluate hazards, vulnerability, and risk: three central and unifying concepts explored throughout the semester.
Living on the Edge: Read More [+]

Rules & Requirements
Prerequisites: Basic high school math, physics and chemistry
Credit Restrictions: No credit for students who have taken Civil Engineering 70

L & S C70T The Planets 3 Units
Terms offered: Spring 2021, Spring 2020, Spring 2019
A tour of the mysteries and inner workings of our solar system. What are planets made of? Why do they orbit the sun the way they do? How do planets form, and what are they made of? Why do some bizarre moons have oceans, volcanoes, and ice floes? What makes the Earth hospitable for life? Is the Earth a common type of planet or some cosmic quirk? This course will introduce basic physics, chemistry, and math to understand planets, moons, rings, comets, asteroids, atmospheres, and oceans. Understanding other worlds will help us save our own planet and help us understand our place in the universe.
The Planets: Read More [+]

L & S 76 Beauty and the Beholder: Approaching Art at the Berkeley Art Museum
4 Units
Terms offered: Fall 2017
This seminar-style course will take up a range of questions related to art works, aesthetic theory, the politics of art, and the relationship between artistic form and meaningful content by way of examinations of specific works at the UC Berkeley Art Museum and Pacific Film Archive (BAM/PFA). Students will see how experts from several different disciplines approach works of art: What questions do scholars bring to an art work? What is a formal analysis vs. a critical interpretation of an art work? How do curators approach art? Are we supposed to ‘learn from’ an art work or ‘experience’ it or have some particular ‘relationship’ to it? Is art a matter of conveying feeling, a message, or an encounter with beauty? Beauty and the Beholder: Approaching Art at the Berkeley Art Museum: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar per week
Additional Details
Subject/Course Level: Letters and Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Feldman

L & S 88 Data Science Connector 2 - 4 Units
Terms offered: Spring 2019, Fall 2018, Spring 2018
Connector courses are intended to connect the Foundations of Data Science (COMPSCI C8/INFO C8/STAT C8) course with particular fields of study. They will apply the concepts and techniques of the foundation course to topics of interest in a particular discipline in order for students to develop critical thinking in data in subject areas that most interest them; these courses also provide a more nuanced understanding of the context in which the data comes into existence.
Data Science Connector: Read More [+]
Rules & Requirements
Prerequisites: Letters and Science 88 is meant to be taken concurrently with Computer Science C8/Statistics C8/Information C8. Foundations of Data Science. Students may take more than one 88 (data science connector) course if they wish, ideally concurrent with or after having taken the C8 course
Repeat rules: Course may be repeated for credit when topic changes.
Hours & Format
Fall and/or spring: 15 weeks - 2-4 hours of seminar per week
Additional Details
Subject/Course Level: Letters and Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Data Science Connector: Read Less [-]

L & S C101 Edible Education: The Rise and Future of the Food Movement 2 Units
Terms offered: Spring 2016, Spring 2015, Spring 2014
As a subject, food is multi-disciplinary, drawing on everything from economics and agronomy to sociology, anthropology, and the arts. Each week experts on organic agriculture, school lunch reform, food safety, animal welfare, hunger and food security, farm bill reform, farm-to-school efforts, urban agriculture, food sovereignty, local food economies, etc. will lecture on what their areas of expertise have to offer the food movement to help it define and achieve its goals.

L & S C103 Edible Education: Telling Stories About Food and Agriculture 2 Units
Terms offered: Fall 2012
As the costs of our industrialized food system become impossible to ignore, a national debate over the future of food and farming has begun. Telling stories about where food comes from, how it is produced (and might be produced differently) plays a critical role in bringing attention to the issues and shifting politics. Each week a prominent figure in this debate explores what can be done to make the food system healthier more equitable, more sustainable, and the role of storytelling in the process.

L & S 120B Arts and Literature 3 or 4 Units
Terms offered: Fall 2008
This upper division course features significant engagement with arts, literature or language, either through critical study of works of art or through the creation of art. Art enables us to see the familiar world with new, often questioning eyes, and makes distant times and places, characters, and issues come alive in our imagination, which is essential to almost all intellectual endeavor. The Arts and Literature breadth requirement is intended to provide students with knowledge and appreciation of the creative arts so that, for the duration of their lives, engagement with art can be, variously, a wellspring of creativity, a lodestar for critical perspectives, and a touchstone of aesthetic quality—in sum, a continuing source of learning and serious pleasure.

Grading/Final exam status: Letter grade. Final exam required.

L & S 120C The Bible in Western Culture 4 Units
Terms offered: Spring 2021, Fall 2017, Fall 2015
The ways that people understand the Bible are deeply linked with their ways of understanding and living in the world. We will explore the changes in biblical interpretation over the last two thousand years as a key to the shifting horizons of Western culture, politics, and religion. Topics will range widely, from the birth of the Bible to ancient heresies to modern philosophy, science, and literature. This will be a genealogy of western thought as it wrestles with its canonical text.

L & S C120T Ideas of Education 4 Units
Terms offered: Spring 2021
What is the purpose of education? Should the university prepare students for the job market or emphasize the pursuit of knowledge for its own sake? Is knowledge a value in itself? This course explores these questions, among others, while concentrating on the German idea of Bildung. It introduces students to the classical idea of education and self-formation by reading a wide range of texts from German philosophy, intellectual history, and literature. Furthermore, the course traces the history of this idea by exploring how Bildung informs contemporary literary works and film. Emphasis will be on issues of class, race, and gender.

L & S 121 Origins in Science and Religion 4 Units
Terms offered: Spring 2019, Spring 2015, Spring 2013
This course explores the concepts of origins in science and religion and their cultural contexts and entanglements, from antiquity to the present. Guiding questions include these: What are origins, and why do we want to know about them? How does this desire manifest itself in different ways of constructing and analyzing knowledge? What sorts of intellectual processes, standards, and tests can be applied to different concepts of origins? What happens when different notions of origins clash? Origins in Science and Religion: Read More [+]

L & S 122 Time 4 Units
Terms offered: Spring 2013, Spring 2003, Spring 2001
Augustine said, famously, that he always thought he understood what time was until he started thinking about it. That was when he realized he had no idea. This course will address various aspects of the nature of time, including the way we experience it, the way it organizes our everyday world, and the way it stands if it does at the foundation of the physical universe. The course will be devoted both to understanding, and to understanding the relations among, these three aspects of temporality.

L & S 124 Consciousness: Buddhist and Neuroscientific Perspectives 3 Units
Terms offered: Spring 2017, Spring 2014, Spring 2002
Twenty-five years ago the Dalai Lama suggested that a dialogue between Buddhist practitioners and Western scientists interested in the nature of consciousness and its relationship to the world might lead to new ideas and be of benefit to both communities. While science and religion are not generally considered to be natural collaborators, the dialogue that ensued quickly gained momentum and catalyzed new strands of research, most notably in the area of the neuroscience of meditation and emotion. We will continue this dialogue, first by laying the necessary groundwork in our respective fields, and then by exploring areas of convergence and divergence around certain themes.

**L & S 126 Energy and Civilization 4 Units**

Terms offered: Fall 2019, Fall 2018, Fall 2017

Energy is one of the main drivers of civilization. Today we are at the precipice of what many hope will be a major paradigm shift in energy production and use. Two transitions are needed. On the one hand, we must find ways to extend the benefits of our existing energy system to the impoverished people living in the developing world while continuing to provide these benefits to the people of the developed world. On the other hand, we must completely overhaul the existing system to fight climate change and other forms of air and water pollution. Are these shifts truly within our reach? Can we achieve both simultaneously? If so, how? This Big Ideas course will grapple with these questions using an interdisciplinary systems approach.

Energy and Civilization: Read More [+]

**L & S C138 Art and Activism 4 Units**

Terms offered: Spring 2020, Spring 2019, Spring 2018

This course explores the intersections between aesthetic practice and social change. Students will investigate—in both theory and practice—the capacity of art making to cultivate transformation of themselves, their relationships, their practices, their institutions, and the larger economic and socio-political structures in which they function, locally and globally. Focusing on historical and contemporary artists and political issues, we ask: 1) How is art impacted by social change? 2) How has art been used toward social change? and 3) How can we, as course participants, use art to bring about social change?

Art and Activism: Read More [+]

L & S 140C Historical Studies 3 or 4 Units
Terms offered: Fall 2008
Each upper-division course in this series deals primarily with the human events, institutions and activities of the past. Historical Studies are particularly important because, to paraphrase the philosopher George Santayana, those who fail to learn the lessons of history are doomed to repeat its mistakes. The study of history provides us with perspective on the human condition and with an appreciation of the origins and evolution of the numerous cultures and social orders that have populated the earth. Whether students study history to understand how our world evolved from the past or to focus on the distinctions between the present and previous eras, they will come away with a richer understanding of and appreciation for human experience.

L & S C140V The History and Practice of Human Rights 4 Units
Terms offered: Fall 2020, Fall 2018, Fall 2016
This course examines the historical development of human rights to the present day, focusing especially (but not exclusively) on the nineteenth and twentieth centuries. More than a history of origins, however, this course will contemplate the relationships between human rights and other crucial themes in the history of the modern era, including revolution, slavery, capitalism, colonialism, racism, and genocide. As a history of international and global themes and an examination of specific practices and organizations, this course will ask students to make comparisons across space and time and to reflect upon the evolution of human rights in international thought and action—from imperial beginnings to the crises of our time.

L & S 160B Effective Personal Ethics for the Twenty-First Century 3 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
Each ethical decision we make (or avoid) co-creates who we are, our lives, our relationships, and the world we live in. Readings from Aristotle through the existentialists, an exploration of comparative religion, studies in intra- and inter-personal psychology, and cases from literature to business will orient and inspire and support students’ quests to find and live their deepest values. We will investigate those characteristics and habits of human nature that hinder affirmative ethical behavior (and the realization of maximum human potential generally), and explore characteristics and practices that can foster each student’s inherent imagination, creative capacity, integration, and fully satisfying participation in his or her life.

L & S 160D Philosophy and Values 3 or 4 Units
Terms offered: Fall 2013, Spring 2012
According to Aristotle, every exercise of our faculties has some good for its aim. Every discipline taught in the College of Letters & Science has ethical implications, and to study a particular subject without considering these implications can be a sterile--and in extreme cases hazardous--exercise. The urge and ability to ponder such questions as the meaning of life distinguish human beings from the other animals. In an increasingly complex world, in which traditional values are often called into question, students of the College are encouraged to reflect upon their own assumptions as well as the assumptions of other times and cultures. In these upper-division Philosophy and Values courses students in the College will be encouraged to ponder the types of questions that will enhance their ability to understand their heritage, their contemporaries, and themselves.

L & S C160V Human Happiness 3 Units
Terms offered: Spring 2021, Spring 2020, Fall 2018
This course will take an interdisciplinary approach to an understanding of happiness. The first part of the course will be devoted to the different treatments of happiness in the world's philosophical traditions, focusing up close on conceptions or the good life in classical Greek and Judeo-Christian thought, the great traditions in East Asian thought (Taoism, Buddhism, Confucianism), and ideas about happiness that emerged more recently in the age of Enlightenment. With these different perspectives as a framework, the course will then turn to treatments of happiness in the behavioral sciences, evolutionary scholarship, and neuroscience. Special emphasis will be given to understanding how happiness arises in experiences of the moral emotions, including gratitude, compassion, reverence and awe, as well as aesthetic emotions like humor and beauty.

L & S 180B Language and Power 4 Units
Terms offered: Spring 2018, Spring 2006
"Sticks and stones/ Can break my bones/ But words will never hurt me"—but is that really so? People do things with words and in turn words do things to people. Language can inform or deceive, seduce or insult, make us fall in love or kill our reputation. What is it about language that gives it that power? How can sounds in a conversation, signs on a page make us laugh or cry? What does it take to speak and be not only heard but actually responded to? How do our words remember, imagine, anticipate, respond to the words of others? And how can we acquire conversational power? This course will explore the workings of language as social symbolic power in everyday life, as well as the relation between language and identity, ideology and myth.

L & S C180Y Gender, Sex and Power 4 Units
Terms offered: Fall 2020
Gender, sex, and power shape and influence our cultural and social world in obvious and in hidden ways. Bay Area artists and activists focus on illuminating, shifting, redefining, and making use of the juncture of gender, sex, and power to bring about new opportunities and new futures. We will first explore the terrain of academic definitions of gender, sex, and power and the connections among them, emphasizing how gender/sex/power is interlinked with racism, classism, colonialism, and dis/abilism. Topics addressed will include: labor, migration and belonging; food, shelter, and land; health and health care; sexuality and love; and politics and political action.
