Letters and Science (L&S)

Courses

L & S 1 Exploring the Liberal Arts 2 Units
Terms offered: Fall 2016, Fall 2015, Fall 2014
This is a course for entering students, particularly those who are undecided about the major they would like to pursue. It provides an introduction to the intellectual landscape of the College of Letters and Science, revealing the underlying assumptions, goals, and structure of a liberal arts education. Topics include the difference between the College of Letters and Science and the professional schools, the rationale behind the breadth requirement, the approaches and methodologies of each of the divisions in the college, and the benefits of engaging in research as an undergraduate. The ultimate goal of the course is to transform the students into informed participants in their own educational experiences, so that they can make the most of their years at Berkeley.

L & S 1W Exploring the Liberal Arts Hybrid Course 2 Units
Terms offered: Fall 2017
A hybrid course for entering students, particularly those who are undecided about the major they would like to pursue. It provides an introduction to the intellectual landscape of the College of Letters and Science, revealing the underlying assumptions, goals, and structure of a liberal arts education. Topics include the rationale behind the breadth requirement, the approaches and methodologies of each of the divisions in the college, and the benefits of engaging in research as an undergraduate. The ultimate goal of the course is to transform the students into informed participants in their own educational experiences, so that they can make the most of their years at Cal.

L & S W1 Exploring the Liberal Arts 2 Units
Terms offered: Summer 2017 8 Week Session, Summer 2016 10 Week Session, Summer 2016 8 Week Session
This is a course for entering students, particularly those who are excited to be here but uncertain of where to start their explorations. It provides an introduction to the intellectual landscape of the College of Letters and Science, revealing the underlying assumptions, goals and structure of a liberal arts education. Guest speakers, drawn largely from the faculty and recent graduates of L&S, will shed light on the nature and attractions of their disciplines. The ultimate goal of the course is to transform students into informed participants in their own educational experiences at Berkeley.

L & S 5 Introduction to Entrepreneurship 2 Units
Terms offered: Fall 2012, Spring 2012, Fall 2011
This course is designed for freshmen and sophomores who wish to know about entrepreneurship, its importance to our society, and its role in bringing new ideas to market. Students will understand the entrepreneurial business process and how they might become involved in those processes in their future careers--in whatever direction those careers might lead. This class will explore the structure and framework of entrepreneurial endeavors--both inside and outside the business world. The course will answer questions such as: What is entrepreneurship? What is opportunity recognition and selection? How can you create and define competitive advantage? How can you think about people in the entrepreneurial context? How can you garner support (financial and other) for an entrepreneurial venture? What do you do when nothing works as planned? And, how do you focus on doing right and doing well?

Introduction to Entrepreneurship: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 1.5 hours of lecture per week

L & S 20C Arts and Literature 3 or 4 Units
Terms offered: Spring 2009
This course features significant engagement with arts, literature or language, either through critical study of works of art or through the creation of art. Art enables us to see the familiar world with new, often questioning eyes, and makes distant times and places, characters, and issues come alive in our imagination, which is essential to almost all intellectual endeavor. The Arts and Literature breadth requirement is intended to provide students with knowledge and appreciation of the creative arts so that, for the duration of their lives, engagement with art can be, variously, a wellspring of creativity, a lodestar for critical perspectives, and a touchstone of aesthetic quality--in sum, a continuing source of learning and serious pleasure.

Arts and Literature: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3-4 hours of lecture and 1 hour of discussion per week

Summer:
8 weeks - 5.5-7.5 hours of lecture and 1.5 hours of discussion per week
10 weeks - 4.5-6 hours of lecture and 1.5 hours of discussion per week

L & S 22 Sense and Sensibility and Science 3 Units
Terms offered: Spring 2017, Spring 2016, Spring 2014
The approaches to problem solving developed by scientists have proven to be effective, and yet we as individuals, groups, and larger societies do not often seem to be able to take advantage even of rational approaches to problems—let alone the “hyperrationality” offered by science. Rationality by itself does not solve any problems or answer any questions. Its efficaciousness depends on how we combine it with our drives, goals, and desires—and perhaps our less-linear algorithm-based intuitions.

L & S 23 The Humanities 4 Units
Terms offered: Fall 2015, Fall 2001
Today the humanities, once considered the jewels of a liberal arts education, find they must justify their very existence. In 1967, Ronald Reagan, then Governor of California, argued against taxpayers “subsidizing intellectual curiosity.” By 2015, the Wisconsin governor had reduced his university’s mission to “meeting the state’s workforce needs.” Is this self-styled “commonsensical” thinking valid? Should the humanities try to make themselves more professional or “scientific”? Rather than seeing the humanities as a series of independent disciplines focused on different specific ends, this course argues that the humanities map the many ways that human beings have sought to be human throughout human history.

L & S 25 Thinking Through Art and Design @Berkeley 3 Units
Terms offered: Fall 2017, Spring 2017, Spring 2016
This course introduces students to key vocabularies, forms, and histories from the many arts and design disciplines represented at UC Berkeley. It is conceived each year around a central theme that responds to significant works and events on the campus, providing an introduction to the many art and design resources available to students on campus. Students will compare practices from across the fields of visual art, film, dance, theater, music, architecture, graphic design, new media, and creative writing, and explore how different artists respond formally to the central themes of the course, considering how similar questions and arguments are differently addressed in visual, material, embodied, sonic, spatial, and linguistic forms.

L & S C30U Americans and the Global Forest 4 Units
Terms offered: Spring 2017, Spring 2015, Spring 2014
This course challenges students to think about how individual and American consumer decisions affect forest ecosystems around the world. A survey course that highlights the consequences of different ways of thinking about the forest as a global ecosystem and as a source of goods like trees, water, wildlife, food, jobs, and services. The scientific tools and concepts that have guided management of the forest for the last 100 years, and the laws, rules, and informal institutions that have shaped use of the forests, are analyzed.

L & S C30Y Biology for Voters 3 Units
Terms offered: Spring 2017, Spring 2015, Spring 2014
This is a Discovery Course for non-Biology majors designed to introduce lower-division college students to biology through the lens of the contemporary problems facing people, the planet and the species of the planet. Modern genetic contributions will be presented on such issues as genetic engineering of plants and animals, the emergence of new pathogens, the role of genetic variation among individuals, and the extent to which DNA is and isn’t destiny. Each week will close with the presentation and discussion of a defining biological challenge facing the world.
Biology for Voters: Read More [+]

Objectives Outcomes
Student Learning Outcomes: The learning objectives will be, at one end, to understand what an experiment is, how is it controlled and what does one need to know about an experiment to be able to rely upon any conclusion. That is the fundamental issue in all science, and is frequently overlooked in many media accounts of science. A second objective is to learn enough of the language of biology to be able to ask the kind of informed questions that we would want all elected representatives to pay attention to. A third objective is for students to cultivate confidence that through non-specialized information sources they can become informed consumers of contemporary scientific thought, and to develop those habits of intellect to think about evidence in a scientific manner. A fourth objective is for students to enjoy the abundance of high quality books, articles and multimedia that will enable a lifetime of discovery outside the structure of a college course.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Letters and Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

L & S C30Z Bioinspired Design 3 Units  
Terms offered: Spring 2017  
Bioinspired design views the process of how we learn from Nature as an innovation strategy translating principles of function, performance and aesthetics from biology to human technology. The creative design process is driven by interdisciplinary exchange among engineering, biology, art, architecture and business. Diverse teams of students will collaborate on, create, and present original bioinspired design projects. Lectures discuss biomimicry, challenges of extracting principles from Nature, scaling, robustness, and entrepreneurship through case studies highlighting robots that run, fly, and swim, materials like gecko-inspired adhesives, artificial muscles, medical prosthetic devices, and translation to start-ups.

L & S 40C Hollywood: The Place, the Industry, the Fantasy 4 Units
Terms offered: Fall 2017, Fall 2015, Fall 2011
This course is about the history of the Hollywood "Dream Factory," focusing on both parts of that phrase. We will examine the historical and geographical development of the motion picture industry from the rise of the studio system to the "new" entertainment economy of the 1980's, as we think about the way films have constructed powerful and productive fantasies about the boundaries between public and private, work and play, commerce and art, fantasy and reality. Our topics will include the history of labor in the culture industry, the implications of shifts in the spatial organization of film production, and the effects of Hollywood on the larger politics of southern California.

L & S C60T What is Beauty? 4 Units
Terms offered: Fall 2011
What or who decides whether something is beautiful or not? What purpose do beauty and art serve? Where do originality, genius, and inspiration come from? What do art and beauty have to do with freedom and human progress? We will examine primarily western European and North American approaches to beauty as presented in works of philosophy, literary theory, and theories of art and aesthetics, exploring key theoretical questions as they evolve among several intellectual arenas over many centuries.

L & S C60U Revolutionary Thinking: Marx, Nietzsche, Freud 4 Units
Terms offered: Fall 2015, Spring 2013
We will explore the ways in which Marx, Nietzsche, and Freud--three of the most important thinkers in modern Western thought--can be read as responding to the Enlightenment and its notions of reason and progress. We will consider how each remakes a scientific understanding of truth, knowledge, and subjectivity, such that rationality, logic, and the powers of human cognition are shown to be distorted, limited, and subject to forces outside our individual control. All lectures and readings in English.

L & S 70B Physical Science 2 - 4 Units
Terms offered: Spring 2015, Spring 2011, Spring 2009
Physical scientists seek to understand the universe, from its microscopic substructure to its largest structures, from our own earth to the edge of the universe and the beginning of time. Students fulfilling Physical Science breadth in the College of Letters & Science may be motivated by the pure pleasure of penetrating the mysteries of the universe, or by more practical considerations such as a desire to take an intelligent stance on such topics as greenhouse gases and space exploration. Whether students opt for the practical or the theoretical or a combination of both, students choosing a lower-division course in this series will learn to formulate problems clearly and think quantitatively, critically, and abstractly.

L & S 70C Living on the Edge 4 Units
Terms offered: Spring 2017
Introduction to the geologic setting and natural hazards along the Pacific Rim and a general discussion of their impacts current and future development of the coastal zone. Dangers posed by earthquakes, tsunamis, volcanic eruptions, extreme climatic events, landscapes affecting human health, and sea level rise will be discussed using observations of response to past events in the context of analyzing long-term risks to society and options for future development and mitigation.

L & S 70A Physics and Music 3 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015
Physics and Music is a course designed to help students think about how to approach the world with the eyes, ears, and mind of a scientist. We will use the domain of music and sound to ask what we can learn about the nature of reality and the methods that we humans have developed to discover how the world works. The mysteries of music have long inspired scientists to invent new tools of thought, and some of the earliest scientific concepts were invented to understand music. Surprisingly the concepts that underlie our approach to music appear again and again in the world around us, and they are still at play in the very latest theories and experiments of fundamental physics.

Rules & Requirements
Credit Restrictions: No credit for students who have taken L&S C70W / Physics C21.

Hours & Format

L & S 76 Beauty and the Beholder: Approaching Art at the Berkeley Art Museum 4 Units
Terms offered: Fall 2017
This seminar-style course will take up a range of questions related to art works, aesthetic theory, the politics of art, and the relationship between artistic form and meaningful content by way of examinations of specific works at the UC Berkeley Art Museum and Pacific Film Archive (BAM/PFA). Students will see how experts from several different disciplines approach works of art: What questions do scholars bring to an art work? What is a formal analysis vs. a critical interpretation of an art work? How do curators approach art? Are we supposed to ‘learn from’ an art work or ‘experience’ it or have some particular ‘relationship’ to it? Is art a matter of conveying feeling, a message, or an encounter with beauty?

L & S C103 Edible Education: Telling Stories About Food and Agriculture 2 Units
Terms offered: Fall 2012
As the costs of our industrialized food system become impossible to ignore, a national debate over the future of food and farming has begun. Telling stories about where food comes from, how it is produced (and might be produced differently) plays a critical role in bringing attention to the issues and shifting politics. Each week a prominent figure in this debate explores what can be done to make the food system healthier, more equitable, more sustainable, and the role of storytelling in the process.

L & S 120B Arts and Literature 3 or 4 Units
Terms offered: Fall 2008
This upper division course features significant engagement with arts, literature or language, either through critical study of works of art or through the creation of art. Art enables us to see the familiar world with new, often questioning eyes, and makes distant times and places, characters, and issues come alive in our imagination, which is essential to almost all intellectual endeavor. The Arts and Literature breadth requirement is intended to provide students with knowledge and appreciation of the creative arts so that, for the duration of their lives, engagement with art can be, variously, a wellspring of creativity, a lodestar for critical perspectives, and a touchstone of aesthetic quality—in sum, a continuing source of learning and serious pleasure.

The Bible in Western Culture: Read Less [-]

L & S 120C The Bible in Western Culture 4 Units
Terms offered: Fall 2017, Fall 2015, Fall 2013
The ways that people understand the Bible are deeply linked with their ways of understanding and living in the world. We will explore the changes in biblical interpretation over the last two thousand years as a key to the shifting horizons of Western culture, politics, and religion. Topics will range widely, from the birth of the Bible to ancient heresies to modern philosophy, science, and literature. This will be a genealogy of western thought as it wrestles with its canonical text.

L & S 121 Origins in Science and Religion 4 Units
Terms offered: Spring 2015, Spring 2013, Spring 2003
This course explores the concepts of origins in science and religion and their cultural contexts and entanglements, from antiquity to the present. Guiding questions include these: What are origins, and why do we want to know about them? How does this desire manifest itself in different ways of constructing and analyzing knowledge? What sorts of intellectual processes, standards, and tests can be applied to different concepts of origins? What happens when different notions of origins clash? Origins in Science and Religion: Read More [+]
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

L & S 122 Time 4 Units
Terms offered: Spring 2013, Spring 2003, Spring 2001
Augustine said, famously, that he always thought he understood what time was until he started thinking about it. That was when he realized he had no idea. This course will address various aspects of the nature of time, including the way we experience it, the way it organizes our everyday world, and the way it stands if it does at the foundation of the physical universe. The course will be devoted both to understanding, and to understanding the relations among, these three aspects of temporality. Time: Read More [+]

L & S 124 Consciousness: Buddhist and Neuroscientific Perspectives 3 Units
Terms offered: Spring 2017, Spring 2014, Spring 2002
Twenty-five years ago the Dalai Lama suggested that a dialogue between Buddhist practitioners and Western scientists interested in the nature of consciousness and its relationship to the world might lead to new ideas and be of benefit to both communities. While science and religion are not generally considered to be natural collaborators, the dialogue that ensued quickly gained momentum and catalyzed new strands of research, most notably in the area of the neuroscience of meditation and emotion. We will continue this dialogue, first by laying the necessary groundwork in our respective fields, and then by exploring areas of convergence and divergence around certain themes. Consciousness: Buddhist and Neuroscientific Perspectives: Read More [+]

**L & S 126 Energy and Civilization 4 Units**  
Terms offered: Fall 2017, Fall 2016, Fall 2004  
Energy is one of the main drivers of civilization. Today we are at the precipice of what many hope will be a major paradigm shift in energy production and use. Two transitions are needed. On the one hand, we must find ways to extend the benefits of our existing energy system to the impoverished people living in the developing world while continuing to provide these benefits to the people of the developed world. On the other hand, we must completely overhaul the existing system to fight climate change and other forms of air and water pollution. Are these shifts truly within our reach? Can we achieve both simultaneously? If so, how? This Big Ideas course will grapple with these questions using an interdisciplinary systems approach.

**L & S 140C Historical Studies 3 or 4 Units**  
Terms offered: Fall 2008  
Each upper-division course in this series deals primarily with the human events, institutions and activities of the past. Historical Studies are particularly important because, to paraphrase the philosopher George Santayana, those who fail to learn the lessons of history are doomed to repeat its mistakes. The study of history provides us with perspective on the human condition and with an appreciation of the origins and evolution of the numerous cultures and social orders that have populated the earth. Whether students study history to understand how our world evolved from the past or to focus on the distinctions between the present and previous eras, they will come away with a richer understanding of and appreciation for human experience.

**L & S C138 Art and Activism 4 Units**  
Terms offered: Fall 2016, Spring 2015  
This course explores the intersections between aesthetic practice and social change. Students will investigate—in both theory and practice—the capacity of art making to cultivate transformation of themselves, their relationships, their practices, their institutions, and the larger economic and socio-political structures in which they function, locally and globally. Focusing on historical and contemporary artists and political issues, we ask: 1) How is art impacted by social change? 2) How has art been used toward social change? and 3) How can we, as course participants, use art to bring about social change?

**L & S C140U The Archaeology of Health and Disease 4 Units**  
Terms offered: Fall 2013, Spring 2011  
This course explores how archaeologists and bioarchaeologists study human families' and communities' conceptualizations and experiences of health and health care cross-culturally and through time. Students will be exposed to case studies drawing upon skeletal and material cultural evidence.

**Rules & Requirements**

**Credit Restrictions:** Students who take UGBA 193B will not receive credit for L & S 126.

**Hours & Format**

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Additional Details**

**Subject/Course Level:** Letters and Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

L & S C140V The History and Practice of Human Rights 4 Units
Terms offered: Fall 2016, Fall 2015, Fall 2014
A required class for students in the human rights minor (but open to others), this course examines the development of human rights. More than a history of origins, it explores the relationships between human rights and other crucial themes in the history of the modern era. As an exam of international trends and an examination of specific practices, it will ask students to make comparisons across space and time and to reflect upon the evolution of human rights in both thought and action.

Terms offered: Spring 2011, Spring 2009, Spring 2008
Each upper-division course in this series involves the study of the contemporary politics, culture, arts or socio-economic structure of at least one country other than the United States. International Studies courses sensitize students to the immense diversity of cultures and social orders in the world today. As connections and communication between nations become more frequent, it is important that students of the College of Letters & Science have exposure to the essential difference and similarities among various peoples of the earth. The International Studies breadth requirement is designed to foster a spirit of open-mindedness that characterizes a well-educated citizen of the world, and to equip our graduates to thrive in an age of increasing globalization.

L & S 160B Effective Personal Ethics for the Twenty-First Century 3 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015
Each ethical decision we make (or avoid) co-creates who we are, our lives, our relationships, and the world we live in. Readings from Aristotle through the existentialists, an exploration of comparative religion, studies in intra- and inter-personal psychology, and cases from literature to business will orient and inspire and support students' quests to find and live their deepest values. We will investigate those characteristics and habits of human nature that hinder affirmative ethical behavior (and the realization of maximum human potential generally), and explore characteristics and practices that can foster each student's inherent imagination, creative capacity, integration, and fully satisfying participation in his or her life.

L & S 160V Human Happiness 3 Units
Terms offered: Fall 2017, Spring 2016, Spring 2015
This course will take an interdisciplinary approach to an understanding of happiness. The first part of the course will be devoted to the different treatments of happiness in the world's philosophical traditions, focusing up close on conceptions or the good life in classical Greek and Judeo-Christian thought, the great traditions in East Asian thought (Taoism, Buddhism, Confucianism), and ideas about happiness that emerged more recently in the age of Enlightenment. With these different perspectives as a framework, the course will then turn to treatments of happiness in the behavioral sciences, evolutionary scholarship, and neuroscience. Special emphasis will be given to understanding how happiness arises in experiences of the moral emotions, including gratitude, compassion, reverence and awe, as well as aesthetic emotions like humor and beauty.

L & S 160D Philosophy and Values 3 or 4 Units
Terms offered: Fall 2013, Spring 2013, Spring 2012
According to Aristotle, every exercise of our faculties has some good for its aim. Every discipline taught in the College of Letters & Science has ethical implications, and to study a particular subject without considering these implications can be a sterile--and in extreme cases hazardous--exercise. The urge and ability to ponder such questions as the meaning of life distinguish human beings from the other animals. In an increasingly complex world, in which traditional values are often called into question, students of the College are encouraged to reflect upon their own assumptions as well as the assumptions of other times and cultures. In these upper-division Philosophy and Values courses students in the College will be encouraged to ponder the types of questions that will enhance their ability to understand their heritage, their contemporaries, and themselves.

L & S 180B Language and Power 4 Units
Terms offered: Spring 2006
"Sticks and stones/ Can break my bones/ But words will never hurt me"—but is that really so? People do things with words and in turn words do things to people. Language can inform or deceive, seduce or insult, make us fall in love or kill our reputation. What is it about language that gives it that power? How can sounds in a conversation, signs on a page make us laugh or cry? What does it take to speak and be not only heard but actually responded to? How do our words remember, imagine, anticipate, respond to the words of others? And how can we acquire conversational power? This course will explore the workings of language as social symbolic power in everyday life, as well as the relation between language and identity, ideology and myth.
