NAV SCI 1 Introduction to Naval Science 2 Units
Terms offered: Fall 2020, Fall 2019, Fall 2018
This curriculum provides guidelines for introducing students to the organization of the Department of Defense and the naval service, the long-held customs and traditions of the service, basic leadership, ethics and character development, the duties of a junior officer, and basic information concerning shipboard procedures and safety. It is the intent of this course to stimulate the students' interest for study and investigation in future courses.

Introduction to Naval Science: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Naval Science/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.

Introduction to Naval Science: Read Less [-]

NAV SCI 2 Sea Power and Maritime Affairs 2 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Traces the U.S. historical evolution of sea power, its concepts, theories and applications. Emphasizes the impact of world situation, U.S. national interest, changing technology, and naval leadership on the evolving concept of sea power. Relates historical developments to current trends. Examines briefly the U.S. Merchant Marine’s and the former Soviet Navy’s impact on sea power policy formulation.

Rules & Requirements

Prerequisites: Consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture per week
Summer: 10 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Naval Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Sea Power and Maritime Affairs: Read Less [-]

NAV SCI 3 Leadership and Management I 3 Units
Terms offered: Fall 2020, Fall 2019, Fall 2018
This course will cover basic management, decision making, and moral leadership. The student will learn to establish meaningful goals, prioritize among competing demands, and plan and forecast in a task-centered organization. The course includes exposure to measures of organizational effectiveness, methods to overcome resistance to change, effective communications, and techniques to aid in counseling, team building, and resolution of disciplinary and personnel matters.

Leadership and Management I: Read More [+]

Hours & Format

Fall and/or spring: 10 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Naval Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Leadership and Management I: Read Less [-]

NAV SCI 10 Naval Ship Systems I 3 Units
Terms offered: Spring 2020, Spring 2018, Spring 2017
Principles of design and operation of ships. Emphasis on description and analysis of major types of propulsion plants, both conventional and nuclear. Principles of thermodynamic cycles, electrical theory, power generation and distribution, auxiliary machinery systems. Ship construction, strength and stability in intact and damaged conditions. Factors and design criteria for seaworthiness, structural integrity, and operational employment.

Naval Ship Systems I: Read More [+]

Rules & Requirements

Prerequisites: Mathematics 1A or 16A

Repeat rules: Course may be repeated for credit with instructor consent.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Naval Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Naval Ship Systems I: Read Less [-]

NAV SCI 11 Naval Ship Systems II 3 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
This course continues the study of naval ship systems with emphasis on design and operation of major types of ships. Emphasis on description and analysis of major types of propulsion plants, both conventional and nuclear. Principles of thermodynamic cycles, electrical theory, power generation and distribution, auxiliary machinery systems. Ship construction, strength and stability in intact and damaged conditions. Factors and design criteria for seaworthiness, structural integrity, and operational employment.

NAV SCI 12A Navigation and Naval Operations I 3 Units
Terms offered: Spring 2020, Spring 2019, Fall 2017
Theory, principles, and procedures of terrestrial and celestial navigation and piloting techniques. A study of coordinating systems, including the celestial coordinate system, nautical charts and publications, position fixing, dead reckoning, nautical astronomy, the theory and methods of celestial navigation, and the theory and prediction of tides and current.

NAV SCI 12B Navigation and Naval Operations II 3 Units
Terms offered: Fall 2020, Fall 2019, Fall 2018
Introduction to the various aspects of ship operations at sea. Principles of terrestrial navigation including the rules of the road for prevention of collisions at sea, vector analysis of relative motion, ship behavior and characteristics in maneuvering, precise ship positioning, use of aids to navigation, meteorology, and electronic navigation.

NAV SCI 20 Evolution of Warfare 3 Units
Terms offered: Not yet offered
Progressive analysis of the evolution of warfare from the ancient world to the present. Emphasis placed on causes of continuity and/or change of methods, as well as the influence of economic, moral, political, and technological factors on strategic thought.

NAV SCI 154 Fundamentals of Maneuver Warfare 3 Units
Terms offered: Spring 2020
This course prepares future military officers and other leaders for service by studying modern tactical principles, current military developments, and other aspects of warfare and their interactions with and influences on maneuver warfare doctrine.

Additional Details
Prerequisites: 12A or consent of instructor

Additional Details
Subject/Course Level: Naval Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.

NAV SCI 412 Leadership and Ethics 3 Units

Terms offered: Spring 2020, Spring 2019, Spring 2018

This course is the capstone leadership course. It is intended to provide the ethical foundation and tools required for success as a leader of a diverse work force, often under circumstances of substantial stress. The course is divided between the art of leadership and the technical aspects of integrating personnel development with the management of resources, although the emphasis is on leadership. It is designed to be given as a seminar or lecture/discussion in which principles, concepts, and concrete subjects are presented, discussed, and debated.
