XMBA 200P Problem Finding, Problem Solving 1 Unit
Terms offered: Prior to 2007
Problem Finding, Problem Solving (PFPS) teaches basic skills drawn from the fields of critical thinking, design thinking and systems thinking that support innovation. Specifically, it covers ways of collecting information to characterize a problem, framing and re-framing that problem, coming up with a range of solutions and then gathering feedback to assess those solutions. Following Confucius's notion: 'I hear and I forget. I see and I remember. I do and I understand.' The class consists primarily of hands-on exercises to experiment with and learn the tools and techniques presented, applying them to the design and testing of alternative business models for start-up and other businesses.

XMBA 236M Turnarounds 2 Units
Terms offered: Prior to 2007
This course introduces the world of operational and strategic turnarounds of troubled and underperforming businesses. It focuses on the leadership practices that work in fixing flawed enterprises, from underperforming businesses to those on the brink of a death spiral. Most time in the course is spent learning how to more effectively lead companies that are underperforming or in trouble. The course is taught by cases, with the view that the best way to learn leadership is by taking the perspective of business leaders facing crises that demand new direction. Since a rescue plan only works if it is embraced, students take various roles in the cases, including bosses, subordinates, boards and lenders.

XMBA 290P Applied Innovation 2 Units
Terms offered: Prior to 2007
We are in the midst of a digital transformation that is changing how industries work and how we will live and work. Responding to this massive change requires that we learn approaches to framing and solving problems different from the analytical approaches most of us have learned and practiced in our careers. Enter design thinking. Designers have long practiced immersion in ambiguous situations, imagining and conceptualizing alternative futures, and learning through experimentation and failure. This course teaches students new ways of collecting data to characterize a problem space, enabling them to frame and reframe problems, generate a range of possible solutions, and then gather feedback to assess those solutions.
