Architecture

Overview

The Department of Architecture at UC Berkeley has a strong tradition of fostering design and research. The faculty offer rigorous undergraduate and graduate programs and carry out leading research in constructed and speculative environments, architectural technologies, and architectural humanities. The multidisciplinary interests of faculty and graduate students form the basis of exciting new research collaborations with a variety of other disciplines, including anthropology, biology, international studies, engineering, new media, and urban studies.

The Department’s evolution has been nourished by social, cultural, and environmental values, reflected in our innovative teaching, scholarly research, critical design inquiry, and synthetic practice. Over fifty years later, our founding principles remain a strong underpinning of our department, while supporting our continual exploration of emerging theory and knowledge in design thinking, innovative materials and technologies, digital design and fabrication, and sustainability. And these fundamental principles and values have never been more relevant. They are precisely what are needed most in our discipline today, and in our world at large, to help us tackle the complex environmental challenges we face in profound and meaningful ways.

Rather than embracing a single conception of architecture, by intention, we welcome and value distinct views that broaden each of our own horizons. We are interested in the entire life cycle of the building process, from conceptualization, through design and representation, craft and construction, and the performance of both constructed and virtual environments. All of this guided to re-vision, to re-imagine, and to re-make the future of our dwelling environments.

Accreditation

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in Architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an 8-year, 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards. Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

University of California, Berkeley, College of Environmental Design, Department of Architecture offers the following NAAB-accredited degree programs:

- MArch (requires pre-professional degree 120 credits + 48 graduate credits)
- MArch (requires non-professional degree + 72 credits)

Next accreditation visit for all programs: 2024

Architecture Lecture Series

The Department of Architecture sponsors a lecture series that offers students the opportunity to hear internationally acclaimed speakers. These speakers often also participate in classes and seminars as part of their visit to campus. For a schedule of speakers and events in this lecture series, please see the Architecture Department website (http://ced.berkeley.edu/events-media/lecture-series).

Undergraduate Programs

Architecture (http://guide.berkeley.edu/undergraduate/degree-programs/architecture): BA, Minor
Environmental Design and Urbanism in Developing Countries (http://guide.berkeley.edu/undergraduate/degree-programs/environmental-design-urbanism-developing-countries): Minor
History of the Built Environment (http://guide.berkeley.edu/undergraduate/degree-programs/history-built-environment): Minor
Social and Cultural Factors in Design (http://guide.berkeley.edu/undergraduate/degree-programs/social-cultural-factors-environmental-design): Minor
Sustainable Design (http://guide.berkeley.edu/undergraduate/degree-programs/sustainable-design): Minor

Graduate Programs

Architecture (http://guide.berkeley.edu/graduate/degree-programs/architecture): MArch, MAAD, MS, PhD

ARCH 11A Introduction to Visual Representation and Drawing 4 Units
Terms offered: Fall 2019, Summer 2019 8 Week Session, Fall 2018 Introductory studio course: theories of representation and the use of several visual means, including freehand drawing and digital media, to analyze and convey ideas regarding the environment. Topics include contour, scale, perspective, color, tone, texture, and design. Introduction to Visual Representation and Drawing: Read More [+]

Rules & Requirements

Prerequisites: ENV DES 1 with C- or better

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 6 hours of studio per week
Summer: 8 weeks - 3.5 hours of lecture and 11 hours of studio per week

Additional Details

Subject/Course Level: Architecture/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Formerly known as: Environmental Design 11A

Introduction to Visual Representation and Drawing: Read Less [-]
ARCH 11B Introduction to Design 5 Units
Terms offered: Summer 2019 8 Week Session, Spring 2019, Summer 2018 8 Week Session
Introduction to design concepts and conventions of graphic representation and model building as related to the study of architecture, landscape architecture, urban design, and city planning. Students draw in plan, section, elevation, axonometric, and perspective and are introduced to digital media. Design projects address concepts of order, site analysis, scale, structure, rhythm, detail, culture, and landscape.
Introduction to Design: Read More [+]

Rules & Requirements
Prerequisites: ARCH 11A with C- or better

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture, 2 hours of laboratory, and 6 hours of studio per week
Summer: 8 weeks - 6 hours of lecture, 3.5 hours of laboratory, and 11 hours of studio per week

Additional Details
Subject/Course Level: Architecture/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Formerly known as: Environmental Design 11B

ARCH 24 Freshman Seminars 1 Unit
Terms offered: Spring 2019, Spring 2018, Spring 2017
The Berkeley Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Berkeley Seminars are offered in all campus departments, and topics vary from department to department and from semester to semester.
Freshman Seminars: Read More [+]

Rules & Requirements
Repeat rules: Course may be repeated for credit when topic changes.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of seminar per week

Additional Details
Subject/Course Level: Architecture/Undergraduate
Grading/Final exam status: The grading option will be decided by the instructor when the class is offered. Final exam not required.

ARCH 39A Freshman/Sophomore Seminar 2 - 4 Units
Terms offered: Fall 2012, Fall 2003, Fall 2002
Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.
Freshman/Sophomore Seminar: Read More [+]

Rules & Requirements
Prerequisites: Priority given to freshmen and sophomores
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2-4 hours of seminar per week
Summer: 8 weeks - 4-8 hours of seminar per week

Additional Details
Subject/Course Level: Architecture/Undergraduate
Grading/Final exam status: The grading option will be decided by the instructor when the class is offered. Final exam not required.

ARCH 84 Sophomore Seminar 1 or 2 Units
Terms offered: Fall 2012, Spring 2012, Fall 2011
Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.
Sophomore Seminar: Read More [+]

Rules & Requirements
Prerequisites: At discretion of instructor
Repeat rules: Course may be repeated for credit when topic changes.

Hours & Format
Fall and/or spring:
5 weeks - 3-6 hours of seminar per week
10 weeks - 1.5-3 hours of seminar per week
15 weeks - 1-2 hours of seminar per week
Summer:
6 weeks - 2.5-5 hours of seminar per week
8 weeks - 1.5-3.5 hours of seminar and 2-4 hours of seminar per week

Additional Details
Subject/Course Level: Architecture/Undergraduate
Grading/Final exam status: The grading option will be decided by the instructor when the class is offered. Final exam required.

Sophomore Seminar: Read Less [-]
ARCH 98 Special Group Study 1 - 4 Units
Terms offered: Fall 2019, Spring 2019, Spring 2018
This is a special topics course intended to fulfill the individual interests of students, and provide a vehicle for professors to instruct students based on new and innovative developments in the field of architecture.
Special Group Study: Read More [+]

Rules & Requirements
Credit Restrictions: Enrollment is restricted; see the section on Academic Policies-Course Number Guide in the Berkeley Bulletin.<BR/>
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1-4 hours of directed group study per week

Additional Details
Subject/Course Level: Architecture/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Special Group Study: Read Less [-]

ARCH 98BC Berkeley Connect 1 Unit
Terms offered: Fall 2019, Spring 2019, Fall 2018
Berkeley Connect is a mentoring program, offered through various academic departments, that helps students build intellectual community. Over the course of a semester, enrolled students participate in regular small-group discussions facilitated by a graduate student mentor (following a faculty-directed curriculum), meet with their graduate student mentor for one-on-one academic advising, attend lectures and panel discussions featuring department faculty and alumni, and go on field trips to campus resources. Students are not required to be declared majors in order to participate.
Berkeley Connect: Read More [+]

Rules & Requirements
Credit Restrictions: Enrollment is restricted; see the section on Academic Policies-Course Number Guide in the Berkeley Bulletin.
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of seminar per week

Additional Details
Subject/Course Level: Architecture/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Berkeley Connect: Read Less [-]

ARCH 100A Fundamentals of Architectural Design 6 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Introductory courses in the design of buildings. Problems emphasize conceptual strategies of form and space, site relationships and social, technological and environmental determinants. 100A focuses on the conceptual design process.
Fundamentals of Architectural Design: Read More [+]

Rules & Requirements
Prerequisites: Arch 11A & 11B With a C- or better. Must be taken in sequence

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture, 2 hours of laboratory, and 6 hours of studio per week
Summer: 8 weeks - 4 hours of lecture, 3 hours of laboratory, and 12 hours of studio per week

Additional Details
Subject/Course Level: Architecture/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Fundamentals of Architectural Design: Read Less [-]

ARCH 100B Fundamentals of Architectural Design 6 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
Introductory courses in the design of buildings. Problems emphasize conceptual strategies of form and space, site relationships and social, technological and environmental determinants. 100B stresses tectonics, materials, and energy considerations. Studio work is supplemented by lectures, discussions, readings and field trips.
Fundamentals of Architectural Design: Read More [+]

Rules & Requirements
Prerequisites: Arch 100A with a C- or better. Must be taken in sequence

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture, 2 hours of laboratory, and 6 hours of studio per week
Summer: 8 weeks - 4 hours of lecture, 3 hours of laboratory, and 12 hours of studio per week

Additional Details
Subject/Course Level: Architecture/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Fundamentals of Architectural Design: Read Less [-]
ARCH 100C Architectural Design III 5 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
This is a studio course in architectural design. Students work on individual and group design projects that build on topics from Architecture 100B with additional integration of conditions pertinent to architectural production that may include architectural precedents, context, landscape and urban issues, envelope, performance, structure, and tectonics in the design of buildings.
Architectural Design III: Read More [+]
Rules & Requirements
Prerequisites: Arch 100B with a C- or better

ARCH 100D Architectural Design IV 5 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
Students work on individual and/or group design projects that build on topics from previous studios with additional integration of conditions pertinent to architectural production that may include architectural precedents, context, landscape and urban issues, envelope, structure, and tectonics in the design of buildings. It may also include relevant and pertinent social, cultural, and technological issues facing architecture and design.
Architectural Design IV: Read More [+]
Rules & Requirements
Prerequisites: Arch 100B with a C- or better

ARCH 102A Capstone Project Preparation Seminar 3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
This course is a course in architectural research methods with an emphasis on collaborative work. Students will work on individual facets of a collective topic of critical importance to the contemporary discipline of architecture within areas of faculty expertise. These include: architectural history and theory, structures, materials and methods of construction, building performance, energy and environment, and social factors and human behavior in architecture and the environment. The goal of Capstone Preparation is to develop a coherent research proposal that will be used as a topic for the Capstone Project course taken the following semester.
Capstone Project Preparation Seminar: Read More [+]
Objectives & Outcomes
Course Objectives: Ability to communicate research findings through oral, written and graphic modes of presentation to a variety of audiences. Comprehension of the ethics and professional responsibilities of research and how they relate to the discipline of architecture. Develop a research proposal of scholarly significance, identifying and effectively communicating the information sources, skill sets, and research process required to pursue the project. Formulate clear and precise questions, interpret information using abstract ideas, consider culturally diverse points of view, and reach well-reasoned conclusions. Gather, record, evaluate and apply information relevant to a research problem. Identify and critically assess the knowledge base and body of literature relevant to a specific research project. Understand the role of applied research in environmental design and its impact on human conditions, behavior and impact on the environment. Work with others to coordinate individual research ventures addressing a larger collective topic, and to learn to work in a supervised collaborative team.
Rules & Requirements
Prerequisites: Architecture 100A, Architecture 100B

ARCH 102B Architecture Capstone Project 5 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
Through individual and collective efforts, students will address topics selected in the previous semester under the guidance of faculty mentors. Topics in the field which may serve as a basis for capstone projects include: the history and theory of architecture; structures; the materials and methods of construction; building performance; energy and the environment; and social factors and human behavior. This course is aimed at students who wish to strengthen their understanding of the research methods used by the discipline of architecture and related disciplines (e.g., engineering or history), and is not solely design oriented.
Architecture Capstone Project: Read More [+]

Objectives & Outcomes

Course Objectives: Communicate complex research questions, ideas and findings clearly, both orally and in writing, to a broad community. Demonstrate a critical understanding of how resources, including literature and data, are used in critical study and how these resources can be assessed for their validity and reliability. Demonstrate analytic skills. Understand the nature of research questions in the field, and how to choose appropriate architectural research methods given time, cost and skill constraints. Demonstrate critical thinking. Analyze, compare and critique information gathered. Organize a coherent argument. Derive objective conclusions based on the information and inquiry. Learn how to work in a supervised, collaborative research team, drawing on the diverse skills and knowledge of peers and faculty mentors. Understand the ethics and professional responsibilities of research and how this relates to the discipline of architecture.

Rules & Requirements

Prerequisites: Architecture 102A

Hours & Format

Fall and/or spring: 15 weeks - 4 hours of seminar and 4 hours of studio per week

Additional Details

Subject/Course Level: Architecture/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructor: Ubbelohde

Deep Green Design: Read Less [-]

ARCH 105 Deep Green Design 4 Units
Terms offered: Spring 2014, Fall 2013
This course explores the issues and practices of green architectural design through critical readings of seminal and current texts, lectures, films, field trips and projects that use both design and analysis as means of inquiry. The course examines varied approaches to sustainable design including using nature and wilderness as models, biophilia, biomimicry, material sources and reuse, accounting systems such as LEED, Zero Net Carbon and the 2030 Challenge, and the Living Building Challenge. Deep Green Design: Read More [+]

Rules & Requirements

Prerequisites: Completion of a minimum of one design studio, two studios preferred

Hours & Format

Fall and/or spring: 15 weeks - 4 hours of seminar per week

**ARCH 110AC The Social and Cultural Processes in Architecture & Urban Design 3 Units**
Terms offered: Fall 2019, Fall 2018, Fall 2017
This class focuses on the significance of the physical environment in human life as citizens and as future design professionals and it introduces students to the field of human–environment studies. It shows how the social sciences and design can be mutually engaged, enriching the context for design evaluation and critique. Berkeley has long been known for attention to the social perspective on architecture, and this course falls in that tradition.
The Social and Cultural Processes in Architecture & Urban Design: Read More [+]

**Rules & Requirements**

**Credit Restrictions:** Students will receive no credit for Architecture 110AC after completing Architecture 110.

**Requirements this course satisfies:** Satisfies the American Cultures requirement

**Hours & Format**

Fall and/or spring: 10 weeks - 3 hours of lecture and 1.5 hours of discussion per week

**Additional Details**

**Subject/Course Level:** Architecture/Undergraduate

**Grading/Final exam status:** Letter grade. Alternative to final exam.

Instructor: Chiesi

Formerly known as: 128

Architectural Internship: Read Less [-]

**ARCH 111 Housing: An International Survey 3 Units**
Terms offered: Spring 2014, Spring 2013, Spring 2012
Introduction to international housing from the Architectural and City Planning perspective. Housing issues (social, cultural, and policy) ranging from micro-scale (house) to macro-scale (city) presented with a comparison of housing situations in developed and developing countries.
Housing: An International Survey: Read More [+]

**Hours & Format**

ARCH 122 Principles of Computer Aided Architectural Design 4 Units
Terms offered: Fall 2009
This course introduces students to Architecture's New Media; why and how computers are being used in architecture, and what are their current and expected impacts on the discipline and practice of architecture. Topics include presentation and re-presentation (including sketching, drafting, modeling, animating, and rendering); generating design solutions (including generative systems, expert systems, genetic algorithms, and neural networks); evaluation and prediction (using examples from structures, energy, acoustics, and human factors); and the future uses of computers in architectural design (including such topics as construction automation, smart buildings, and virtual environments). The laboratories introduce students to REVIT, a state-of-the-art architectural software, including drafting, modeling, rendering, and for building information modeling. This course is co-listed with 222.
Principles of Computer Aided Architectural Design: Read More [+]
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of laboratory per week
Summer: 8 weeks - 6 hours of lecture and 2 hours of laboratory per week

ARCH 127 Workshop in Designing Virtual Places 4 Units
Terms offered: Spring 2010
This course introduces students to designing web-accessible, Multi User, Virtual Environments (MUVEs), inhabited through avatars. Such worlds are used in video games and web-based applications, and are assuming their role as alternative 'places' to physical spaces, where people shop, learn, are entertained, and socialize. Virtual worlds are designed according to the same principles that guide the design of physical spaces, with allowances made for the absence of gravity and other laws of nature. The course combines concepts from architecture, film studies, and video game design. It uses a game engine software and a modeling software to build, test, and deploy virtual worlds.
Workshop in Designing Virtual Places: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar and 1.5 hours of laboratory per week
Summer: 8 weeks - 2-8 hours of lecture per week

Additional Details
Subject/Course Level: Architecture/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Workshop in Designing Virtual Places: Read Less [-]

ARCH 129 Special Topics in Digital Design Theories and Methods 1 - 4 Units
Terms offered: Spring 2019, Fall 2018, Summer 2018 8 Week Session
Topics cover advanced and research-related issues in digital design and New Media, related to architecture. For current offerings, see department website.
Special Topics in Digital Design Theories and Methods: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor

ARCH 130 Introduction to Architectural Design Theory and Criticism 4 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
This class introduces students to the history and practice of design theory from the late 19th century to the present, with emphasis on developments of the last four decades. Readings and lectures explore specific constellations of theory and practice in relation to changing social and historical conditions. The course follows the rise of modernist design thinking, with particular emphasis on the growing influence of technical rationality across multiple fields in the post World War II period. Systematic approaches based in cybernetics and operations research (amongst others) are examined in the context of wider attempts to develop a science of design. Challenges to modernist design thinking, through advocacy planning and community-based design, the influence of social movements and countercultures, and parallel developments in postmodernism within and beyond architecture, provide the critical background for consideration of recent approaches to design theory, including those informed by developments in digital media and technology, environmental and ecological concerns, questions surrounding the globalization of architectural production, and the development of new materials.

ARCH 133 Architectures of Globalization: Contested Spaces of Global Culture 3 Units
Terms offered: Fall 2010, Fall 2009
This seminar examines the relationship between architecture and the processes associated with globalization. The social and spatial changes connected to the global economic restructuring of the last four decades are explored in relation to distinctive national conditions and their connection to historical forces such as colonization and imperialist. Theoretical arguments about international urban political economy, uneven development, deindustrialization, and the growth of tourism and service industries, are grounded in specific urban and architectural contexts. Case studies explore issues such as urban entrepreneurialism and the branding of cities and nationstates; heritage practices and the postcolonial politics of place; border cities, and the urbanism of transnational production; cities, terrorism, and the global architecture of security; critical regionalism, localism, and other responses to debates on place and placelessness. Readings and class discussions examine course themes in a comparative framework and consider their implications for architectural design, education, and professional practice.

Architectures of Globalization: Contested Spaces of Global Culture: Read Less [-]
ARCH 136 The Literature of Space 3 Units
Terms offered: Spring 2012, Spring 2011, Spring 2010
The concept of space as it is applied to the fields of architecture, geography and urbanism can be understood as a barometer of the condition that we call "modernity." This course explores connections between the larger cultural frameworks of the past century, and the idea of space as it has been perceived, conceived and lived during this period. Readings include essays from the disciplines of philosophy, geography, architecture, landscape, and urbanism, and short works of fiction that illustrate and elucidate the spatial concepts. The readings are grouped according to themes that form the foundation for weekly seminar discussions. Chronological and thematic readings reveal the force of history upon the conceptualization of space, and its contradictions.

ARCH 140 Energy and Environment 4 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
This course provides undergraduates and graduates with an introduction to issues of physical building performance including building thermodynamics, daylighting, and solar control. The course presents the fundamentals of building science while recognizing the evolving nature of building technologies, energy efficiency, ecology, and responsible design. The course begins with a detailed explication of the thermal properties of materials, heat transfer through building assemblies, balance point temperature, solar geometry, and shading analysis. Students apply these principles later in the course to a design project. The latter part of the course also provides a survey of broader building science topics including mechanical system design, microclimate, and current developments in energy-efficient design.

ARCH 139 Special Topics in Architectural Design Theory and Criticism 1 - 4 Units
Terms offered: Fall 2019, Spring 2019, Fall 2018
Topics cover contemporary and historical issues in architectural design theory and criticism. For current offerings, see department website. Special Topics in Architectural Design Theory and Criticism: Read More [+]

ARCH 142 Sustainability Colloquium 1 or 2 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Presentations on a variety of topics related to sustainability, offering perspectives from leading practitioners: architectural designers, city planners, consultants, engineers, and researchers. Students can enroll for one unit (required attendance plus reading) or two units (with additional writing assignments).

Sustainability Colloquium: Read More [+]

Design and Computer Analysis of Structure: Read Less [-]
ARCH 155 Structure, Construction, and Space 3 Units
Terms offered: Fall 2009
In profound buildings, the structural system, construction materials, and architectural form work together to create an integrated work of art. Current practice segregates these three areas by assigning separate and rigid roles to 1) an engineer, 2) a contractor, and 3) an architect. The goal of this class is to blur these traditional boundaries and erase the intellectual cleft though hands-on experience. Students are given weekly assignments which focus on one or more of the three areas. They may be asked to analyze a structure, to construct something from actual materials, or research a case study and present it to the class. Each assignment is geared to help students integrate construction and structural issues into their architectural design, so that they can maintain control of the entire design process.

ARCH 160 Introduction to Construction 4 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
This introduction to the materials and processes of construction takes architecture from design to realization. The course will cover four material groups commonly used in two areas of the building assembly (structure and envelope): wood, concrete, steel, and glass. You will understand choices available and how materials are conventionally used. By observing construction, you’ll see how our decisions affect the size of materials, connections, and where they are assembled. Architects must understand not only conventions, but also the potential in materials, so we will also study unusual and new developments.

ARCH 173 Case Studies in Modern Architecture 3 Units
Terms offered: Fall 2010, Fall 2009
This course examines developments in design, theory, graphic representation, construction technology, and interior programming through case studies of individual buildings. Our survey technique will be highly focused rather than panoptic. Each lecture will delve deeply into one or two buildings to examine program, spatial organization, graphic representation, critical building details, construction technology, and the relationship of the case study building with regard to other contemporary structures and the architect’s overall body of work. From this nucleus, we will spiral outward to consider how the case study is embedded within a constellation of social and economic factors crucial to its design and physical realization. This survey of “modernism’s built discourses” provides multiple perspectives on the variety of architectural propositions advanced to express the nature of modernity as a way of life.

ARCH C174 Architecture in Depression and War 4 Units
Terms offered: Spring 2010
The Great Depression and World War II are arguably the two most influential events for the development of the built environment in the 20th century. Not only did they alter the socio-economic and political landscape on which architecture and urban planning depend, but they also led to technological innovations and vital debates about the built environment. This course examines the 1930's and 1940's topically, studying the work of the New Deal, corporate responses to the Depression and war, the important connections between architecture and advertising, the role of the Museum of Modern Art in the promotion of Modernism, the concept of the ideal house, and key tests, theories, and projects from the period.

ARCH 175 Introduction to Architectural Theory 1945-Present 3 Units
Terms offered: Prior to 2007
This seminar provides an introduction to architectural theory since 1945, with emphasis on developments over the last three decades. Class readings and discussions explore the post-World War II crisis within modernism, postmodernism within and beyond architectural culture, and more recent developments around issues such as rapid urbanization, sustainability, the politics of cultural identity, and globalization. Transformations in architectural theory are examined in relation to historical forces such as the economy, the growth and transformation of cities, and the changing relationship between design professions and disciplines. The influences of digital media, new materials and production techniques on architectural education and practice are explored and the implications for architectural theory assessed. Key issues are anchored in case studies of buildings, urban spaces, and the institutions and agents of architectural culture.

ARCH 176 American Architecture 3 Units
Terms offered: Prior to 2007
The first half of this course surveys American architecture from Colonial times to contemporary trends. Stylistic and spatial analysis is linked with the socioeconomic, political, and environmental influences on architecture, issues on originality, American exceptionalism, the influence from abroad, regionalism, and the role of technology. The second half delves more deeply into the history of specific building types--house, church, museum, library--grafting the earlier themes onto a history of modern institutions as they took shape in the United States.

ARCH 177 California Architecture 3 Units
Terms offered: Fall 2019
Many California architects came from other places: Maybeck from New York via the Ecole des Beaux Arts; Schindler and Neutra from Vienna; Frank Gehry from Chicago. But, once they arrived, their encounters with the Golden State produced new and original forms of architecture. This seminar will examine the qualities of the state’s environment, culture, economy, and population that have produced unique buildings and landscapes during the 20th century. It will look at both Northern and Southern California architecture, starting with canonical designers then moving beyond them to consider lesser-known regional architects whose work embodies local characteristics.

ARCH 178 Visionary Architecture 3 Units
Terms offered: Prior to 2007
This course explores architectural visions as historical windows, examining them from a number of angles. Using a variety of case studies drawn from different media (architectural theory, film, advertisements, architectural projects, and so on) and periods (turn of the century, the Modern Movement, Depression, World War II, 1960’s, etc.) it provides a sampling of possibilities and models for the final student project, an in-depth, original research paper. Several themes thread their way through the course, including the role of the “unbuilt” in architectural practice; the uses of the future in the construction of national and personal identities, cultural narratives, and modern mythologies; and the importance of the future as cliche, and the role of play in cultural production.

ARCH 179 Special Topics in the History of Architecture 1 - 4 Units
Terms offered: Fall 2019, Spring 2019, Fall 2018
Special topics in Architectural History. For current section offerings, see departmental announcement.

ARCH 188 Utopian Freehand Drawing and Painting: Architecture and the City 3 Units
Terms offered: Not yet offered
The intention of this class is to keep alive this type of free (irrational, exploratory, open and playful) passion and make us realize that on the one hand the interdependence between Design and Drawing, and on the other hand, that any of our artistic productions may contain architectural ideas that are nascent, not yet fully developed but useful seeds for our future practice. With this objective in mind, each week, besides producing a single (large) drawing-painting, students will reflect on this process and on the architectural design lessons learned, in the form of an itemized list of condensed realizations.

Rules & Requirements
Prerequisites: A previous architectural history class. For undergraduates, ARCH 170B or equivalent

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar per week

ARCH 203 Integrated Design Studio 5 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
The Integrated Design Studio is the penultimate studio where students incorporate their accumulated knowledge into architectural solutions. The students demonstrate the integrative thinking that shapes complex architectural design and technical solutions. Students will possess an understanding to classify, compare, summarize, explain and/or interpret information. The students will also become proficient in using specific information to accomplish a task, correctly selecting the appropriate information and accurately applying it to the solution of a specific problem while also distinguishing the effects of its implementation.

Rules & Requirements
Prerequisites: Graduate standing
Repeat rules: Course may be repeated for credit when topic changes.

ARCH 204 Final Project Studio: Studio Thesis Option 5 Units
Terms offered: Spring 2011, Spring 2010
Focused design research as the capstone project for graduate students.

ARCH 204A Thesis Seminar 3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Focused design research as the capstone project for graduate students.

ARCH 204B Thesis Studio 5 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
Focused design research as the capstone project for graduate students.

ARCH 205A Studio One, Fall 5 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
The first semester of a one-year, post-professional design studio intended for those students who have a professional architecture degree and wish to explore current design issues in a stimulating, rigorous, and highly experimental studio setting.

ARCH 205B Studio One, Spring 5 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
This course is the second semester of a one-year, post-professional studio intended for those students who have a professional architecture degree and wish to explore current design issues in a stimulating, rigorous, and highly experimental studio setting.
ARCH 207A Architecture Lectures Colloquium 1 Unit
Terms offered: Fall 2019, Fall 2018, Fall 2017
This course accompanies the required introductory design studio in the three-year option of the Master of Architecture program. It is the first in a series of three one-unit colloquia, scheduled consecutively for the first three semesters of the program. Students will attend all Wednesday evening lectures of the College of Environmental Design lecture series. Every third week, they will meet with the instructor for a one-hour discussion.

Rules & Requirements
Repeat rules: Course may be repeated for credit when topic changes.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture per week

Additional Details
Subject/Course Level: Architecture/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.

ARCH 207B Architecture Research Colloquium 1 Unit
Terms offered: Fall 2019, Spring 2019, Spring 2018
This course accompanies the second semester of the required introductory design studio in the three-year option of the Master of Architecture program. It is the second in a series of three one-unit colloquia, scheduled consecutively for the first three semesters of the program. For a one-hour session each week, faculty in the department of architecture and other departments of the College of Environmental Design will present lectures on their research and design practice.

Rules & Requirements
Prerequisites: Co-requisite with Architecture 200B
Repeat rules: Course may be repeated for credit when topic changes.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture per week

Additional Details
Subject/Course Level: Architecture/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.

ARCH 207C Professional Practice Colloquium 1 Unit
Terms offered: Fall 2018, Fall 2017, Fall 2016
This course accompanies the required comprehensive design studio in the three-year option of the Master of Architecture program. It is the third in a series of three one-unit colloquia, scheduled consecutively for the first three semesters of the program.

Rules & Requirements
Repeat rules: Course may be repeated for credit when topic changes.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture per week

Additional Details
Subject/Course Level: Architecture/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.

ARCH 207D The Cultures of Practice 3 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
The nature of architectural practice, how it has evolved and how it is changing in today's world is the theme of the class. The course considers how diverse cultures--both anthropological and professional--contribute to practice, and how the culture of practice evolves. The class has three five-week modules, devoted to the following themes: traditions of practice, research in the culture of the profession, and innovations in practice.

Rules & Requirements
Prerequisites: 201

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar per week

Additional Details
Subject/Course Level: Architecture/Graduate
Grading: Letter grade.
Instructors: Comerio, Cranz

Subject/Course Level: Architecture/Graduate
Grading: Letter grade.
Instructor: Cranz

Body-Conscious Design: Shoes, Chairs, Rooms, and Beyond: Read More [+]

ARCH 212 Body-Conscious Design: Shoes, Chairs, Rooms, and Beyond 3 Units
This seminar prepares students to evaluate and design environments from the point of view of how they interact with the human body. Tools and clothing modify that interaction. Semi-fixed features of the near environment, especially furniture, may have greater impact on physical well being and social-psychological comfort than fixed features like walls, openings, and volume. Today, designers can help redefine and legitimize new attitudes toward supporting the human body by, for example, designing for a wide range of postural alternatives and possibly designing new kinds of furniture. At the urban design scale, the senses of proprioception and kinesthetics can be used to shape architecture and landscape architecture. This course covers these topics with special emphasis on chair design and evaluation. The public health implications of a new attitude toward posture and back support are explored. The course heightens students’ consciousness of their own and others’ physical perceptions through weekly experiential exercises. Students produce three design exercises: shoe, chair, and a room interior.

Body-Conscious Design: Shoes, Chairs, Rooms, and Beyond: Read Less [-]

Theory and Methods in the Social and Cultural Basis of Design: Read Less [-]
ARCH 215 Landscape, Architecture, Infrastructure, and Urbanism 3 Units
Terms offered: Spring 2014, Spring 2013, Spring 2012
This seminar aims to explore how the physical and conceptual understanding of landscape can enrich current forms of architectural and urban design practice. At the junction of landform, infrastructure, urban design, and architecture lies a rich field of possibilities that is increasingly superseding the narrower field of each of the disciplines by themselves. In the past century, contemporary culture and technology—automobiles, televisions, cell phones, and the internet have socially, culturally, environmentally, and physically reshaped the urban fabric, calling into question the very definition of urbanity. The course will explore the implications for public space in an era of increased security and risk mitigation and how designers may direct the various invisible forces which give form to the world around us.
Landscape, Architecture, Infrastructure, and Urbanism: Read More [+]

Subject/Course Level: Architecture/Graduate
Grading: Letter grade.
Instructor: Davids

ARCH 216 The Sociology of Taste in Environmental Design 3 Units
Terms offered: Fall 2016, Fall 2012, Fall 2011
Taste is at work in the way we display our things as much as in the qualities of things themselves. A performance-oriented model of taste observes that objects fall into two broad categories: pragmatic (that support behavior) and symbolic (that identify a person). People visually organize these two categories of objects using both explicit and subconscious aesthetic rules to produce visually unified displays. Depending on how it is used, how it is placed in relation to other things, an object's meaning can vary. The display of taste is where objects take on--and shed--meanings, depending on how they are combined with one another. This seminar reviews the extensive body of 20th-century theories about taste for design creation, design education, and for client-professional relations.

ARCH 217 Social Aspects of Housing Design: Mid-Rise Urbanism 3 Units
Terms offered: Fall 2012, Fall 2011
The course explores strategies to bring coherence and continuity back to the city focusing on mid-rise, higher density urbanism and the potential and difficulties of this scale of urban fabric to contribute to the form of cities, without losing the potential of choice and diversity. The seminars are organized in case studies revolving around four cities: Amsterdam, Barcelona, Beijing, and New York. Design exercises parallel the case studies as a way to test and challenge the potentials of mid-rise urbanism.

ARCH 218 Housing, Urbanization, and Urbanism: Design, Planning, and Policy Issues in Developing Countries 4 Units
Terms offered: Prior to 2007
This seminar is concerned with the study of housing, urbanization, and urbanism in developing countries, studying not only the physical landscapes of settlements, but also the social, economic, political, and cultural dimensions. This course's focus will be on housing, its lens will be their processes of urbanization, and its intent will be to investigate the space for action by the professionals of the "urban" in the arena of housing. While the emphasis of the course will be on the diverse trajectories of developing countries, "First World" experiences will also be used to illuminate the specific transnational connections and their use in the making of housing theory and policy. The seminar complements the series of lectures offered in 111 and City Planning 111.
Housing, Urbanization, and Urbanism: Design, Planning, and Policy Issues in Developing Countries: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 1.5 hours of lecture and 1.5 hours of seminar per week

ARCH 221 Graduate Seminar in Digital Design Theories and Methods 3 Units
Terms offered: Spring 2013, Spring 2010, Fall 2009
This seminar is intended to help graduate students develop a coherent research agenda in the area of digital design theories and methods. In addition, it is intended to serve as a forum for the exchange of ideas (e.g., work in progress, potential directions for research, etc.) in the area of shared interest. The course provides students with a set of questions as guides, readings, and guest lectures.

Rules & Requirements
- Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
- Fall and/or spring: 15 weeks - 3 hours of seminar per week
- Summer: 8 weeks - 6 hours of lecture and 2 hours of laboratory per week

Additional Details
- Subject/Course Level: Architecture/Graduate
- Grading: Letter grade.

Graduate Seminar in Digital Design Theories and Methods: Read More [+]

ARCH 222 Principles of Computer Aided Architectural Design 4 Units
Terms offered: Fall 2009
This course introduces students to Architecture's New Media; why and how computers are being used in architecture and what are their current and expected impacts on the discipline and practice of architecture. Topics include presentation and re-presentation (including sketching, drafting, modeling, animating, and rendering); generating design solutions (generative systems, expert systems, genetic algorithms, and neural networks); evaluation and prediction (using examples from structures, energy, acoustics, and human factors); and the future uses of computers in architectural design (including such topics as construction automation, smart buildings, and virtual environments). The laboratories introduce students to a REVIT, a state-of-the-art architectural software, including drafting, modeling, rendering, and building information modeling. This course is co-listed with 122. Graduate students will have a discussion section instead of the laboratory that 122 students undertake.

Rules & Requirements
- Prerequisites: Consent of instructor

Hours & Format
- Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
- Summer: 8 weeks - 6 hours of lecture and 2 hours of laboratory per week

Additional Details
- Subject/Course Level: Architecture/Graduate
- Grading: Letter grade.

Principles of Computer Aided Architectural Design: Read More [+]

ARCH 226 Collaboration by Digital Design 3 Units
Terms offered: Prior to 2007
This project-based seminar studies the problem of multi-disciplinary and cross-cultural collaboration in the building industry. It employs two complementary approaches: 1) a theoretical approach, which examines the nature of collaboration in general and in architecture in particular, looks at the methods that have been used to foster and support it, and interrogates their advantages and shortcomings; and 2) a practical approach, which use a web-based multi-person design 'game' that allow students to play different roles (architect, clients, engineer, builder, etc.) while collaborating in the design of a building.

Rules & Requirements
- Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
- Fall and/or spring: 15 weeks - 3 hours of seminar per week

Additional Details
- Subject/Course Level: Architecture/Graduate
- Grading: Letter grade.

Collaboration by Digital Design: Read Less [-]
ARCH 227 Workshop in Designing Virtual Places 4 Units
Terms offered: Spring 2010
This course introduces students to designing web-accessible, Multi User, Virtual Environments (MUVEs), inhabited through avatars. Such worlds are used in video games and web-based applications, and are assuming their role as alternative 'places' to physical spaces, where people shop, learn, are entertained, and socialize. Virtual worlds are designed according to the same principles that guide the design of physical spaces, with allowances made for the absence of gravity and other laws of nature. The course combines concepts from architecture, film studies, and video game design. It uses a game engine software and a modeling software to build, test, and deploy virtual worlds.

ARCH 233 Architectures of Globalization: Contested Spaces of Global Culture 3 Units
Terms offered: Fall 2010, Fall 2009
This seminar examines the relationship between architecture and the processes associated with globalization. The social and spatial changes connected to the global economic restructuring of the last four decades are explored in relation to distinctive national conditions and their connection to historical forces such as colonization and imperialism. Theoretical arguments about international urban political economy, uneven development, deindustrialization and the growth of tourism and service industries, are grounded in specific urban and architectural contexts. Case studies explore issues such as urban entrepreneurialism and the branding of cities and nation-states; heritage practices and the postcolonial politics of place; border cities, and the urbanism of transnational production; cities, terrorism and the global architecture of security; critical regionalism, localism and other responses to debates on place and placelessness. Readings and class discussions examine course themes in a comparative framework and consider their implications for architectural design, education and professional practice.

ARCH 236 The Literature of Space 3 Units
Terms offered: Spring 2012, Spring 2011, Spring 2010
The concept of space as it is applied to the fields of architecture, geography, and urbanism can be understood as a barometer of the condition that we call “modernity.” This course explores connections between the larger cultural frameworks of the past century, and the idea of space as it has been perceived, conceived, and lived during this period. Readings include key essays from the disciplines of philosophy, geography, architecture, landscape, and urbanism, and short works of fiction that illustrate and elucidate the spatial concepts. The readings are grouped according to themes that form the foundation for weekly seminar discussions. Chronological and thematic readings reveal the force of history upon the conceptualization of space, and its contradictions.

ARCH 237 Ulterior Speculation: Monographs and Manifestos 3 Units
Terms offered: Spring 2013, Spring 2012, Spring 2011
An examination and analysis of architectural manifestos and monographs from the first half of the 20th century to today. The class analyzes the possibilities and limits of grounding a discourse in practice as well as theory. The seminar complements thesis preparation or can serve as an introduction to critical thinking in architecture.

Rules & Requirements
Prerequisites: This course is open to all graduate students and upper division undergraduates

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar per week

Additional Details
Subject/Course Level: Architecture/Graduate
Grading: Letter grade.

Architectures of Globalization: Contested Spaces of Global Culture: Read More [+]
ARCH 238 The Dialectic of Poetics and Technology 3 Units
Terms offered: Spring 2019, Spring 2017, Fall 2016
This seminar examines the relationship between technology and design philosophy in the work of architects through analysis of individual buildings within the context of the complete oeuvre and an examination of the architect's writings and lectures. The seminar poses the following questions: What is the role of technology in the design philosophy of the architect and how is this theoretical position established in the architect's writings, lectures, interviews? How is this position revealed through the work moves to the developing world? How is this position negotiated in the design and construction of an individual building? Is this a successful strategy for achieving technical performance? Is this a successful strategy for achieving a coherent theoretical statement? A series of lectures explores these questions in relation to the architect and a set of required readings introduces the work of the architect and explores the relationship between technology and design philosophy. Students choose one building to investigate in parallel with the methods and issues discussed in class. These studies are presented in class as completed and assembled for submission as a final project.

ARCH 239 Special Topics in Architecture Design Theory and Criticism 1 - 4 Units
Terms offered: Fall 2019, Spring 2019, Fall 2018

ARCH 240 Advanced Study of Energy and Environment 3 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
Minimizing energy use is a cornerstone of designing and operating sustainable buildings, and attention to energy issues can often lead to greatly improved indoor environmental quality. For designers, using computer-based energy analysis tools are important not only to qualify for sustainability ratings and meet energy codes, but also to develop intuition about what makes buildings perform well. This course will present quantitative and qualitative methods for assessing energy performance during design of both residential and commercial buildings. Students will get hands-on experience with state-of-the-art software -- ranging from simple to complex -- to assess the performance of building components and whole-building designs.

ARCH 241 Research Methods in Building Sciences 3 Units
Terms offered: Fall 2018, Fall 2017, Fall 2015
Required for doctoral students in the area of environmental physics. Research Methods in Building Sciences: Read More [+]

ARCH 248 The Dialectic of Poetics and Technology 3 Units

ARCH 244 The Secret Life of Buildings 3 Units
Terms offered: Fall 2011, Fall 2010, Fall 2009
This exploratory seminar addresses a secret life of buildings related to physical performance. Students examine architectural, lighting, and mechanical systems in existing buildings with attention to energy use, occupant well-being, and architectural spacemaking. The seminar applies a collection of measurement techniques, often involving novel approaches, to reveal operating patterns in the complex environment of contemporary buildings. The personal experience students gain in performing the evaluations contributes to the students' experiential base at a formative time. Analysis of data collected in the field and the comparison of these data to values given by simulation tools provides a foundation for understanding the more abstract tools and standards used by designers in practice. The juxtaposition of design intention and post-occupancy performance can be a powerful learning experience now, as well as preparation for evaluating building performance in the future.
The Secret Life of Buildings: Read More [+]

ARCH 245 Daylighting 3 Units
Terms offered: Spring 2017, Spring 2014, Fall 2012
This seminar introduces theories, technologies, design strategies and analytical methods of architectural daylighting, including issues of visual experience, integration with electrical lighting and energy use. The course provides foundation for intelligent daylighting design by developing frameworks for thinking about design, performance and tools. The work examines two archetypal daylighting conditions: a toplighted (roof-lighted) space and a side-lighted (window-lit) space with range of methods including readings, on-site observation and measurement, case studies, design exercises and analysis through models and simulation. This is a graduate seminar: attendance, pin-ups, readings and engaged participation are required each week.

**ARCH 252 Form and Structure 3 Units**
Terms offered: Fall 2019

The class investigates the interplay between geometry and structural behavior of different structural systems categorized with respect to their load-bearing mechanism. Special focus is placed on form-active and surface-active structures like cable nets, membranes, gridshells, and continuous shells. The class will begin by providing a holistic overview of ancient and cutting-edge form-finding approaches and analysis methods. Using playful physical experiments, students will gain a hands-on understanding of how different structural states can affect the shape of a structure and how this interrelation could be used creatively to drive the design process.

**ARCH 255 Structure, Construction, and Space 3 Units**
Terms offered: Prior to 2007

In profound buildings, the structural system, construction materials, and architectural form work together to create an integrated work of art. Current practice segregates these three areas by assigning separate and rigid roles to 1) an engineer, 2) a contractor, and 3) an architect. The goal of this class is to blur these traditional boundaries and erase the intellectual cleft through hands-on experience. Students are given weekly assignments which focus on one or more of the three areas. They may be asked to analyze a structure, to construct something from actual materials or research a case study and present it to the class. Each assignment is geared to help students integrate construction and structural issues into their architectural design so that they can maintain control of the entire design process.

Structure, Construction, and Space: Read Less [-]
ARCH 256 Structural Design in the Studio 1 - 3 Units
Terms offered: Spring 2016, Fall 2015, Fall 2013
Teaching structures to architecture students on their own turf: in a design studio. The course is organized around weekly desk reviews and assignments for students enrolled in a 201 design studio or thesis. The reviews and assignments focus on the structural issues of the students’ projects. A central goal of the course is to help students understand structural issues as they relate to design and to help them become comfortable with structural concepts so that they can begin to integrate the structure and architecture. The course can be taken for 1 unit, 2 units, or 3 units depending on the amount of time a student wishes to commit to it. A final report showing the evolution of each student’s project with clear reference to how structural understanding influenced design decisions is required of all students regardless of units taken. Enrollment strictly limited to 10 students.

ARCH 260 Introduction to Construction, Graduate Level 3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
This course addresses the methods and materials of construction. While students will not be experts at the end of the semester, the course should give students the confidence to feel comfortable on a construction site or when designing a small building for a studio. The course will focus on four major territories: structural materials, building envelope, built elements such as stairs and cabinets, and costs, labor conditions, conventional practices, and the regulatory environments that control design.

Introduction to Construction, Graduate Level: Read More [+]
Rules & Requirements
Prerequisites: Graduate standing or consent of instructor

Grading: Letter grade.
Instructor: Davids

ARCH 264 Off-Site Fabrication: Opportunities and Evils 3 Units
Terms offered: Fall 2017, Fall 2010, Fall 2009
This seminar looks at the implications of off-site fabrication in architecture: consistent, protected environments; worker efficiency and safety; coordination of trades; cheaper, semi-skilled labor; construction periods shortened; and completion dates more predictable. Off-site fabrication can allow for increased refinement and trial assemblies. However, it may also create monotonous sameness when the processes and results are not considered with care.
Off-Site Fabrication: Opportunities and Evils: Read More [+]

Rules & Requirements
Prerequisites: 160, 260 or consent of instructor

ARCH 265 Japanese Craft and Construction 3 Units
Terms offered: Spring 2011, Spring 2009, Spring 2005
The class addresses the role craft and construction play in Japanese architecture and applies these lessons to the evaluation of an exemplary recent building having unusual technical features. Buildings are expressions of theoretic and technical intent and a response to cultural and economic forces; Japanese architecture is regarded as particularly innovative. In studying a system where there is an emphasis on collaboration, students also see the values of North American systems of architectural production.

ARCH 273 Case Studies in Modern Architecture 3 Units
Terms offered: Fall 2010
This course examines developments in design, theory, graphic representation, construction technology, and interior programming through case studies of individual buildings. Our survey technique will be highly focused rather than panoptic. Each lecture will delve deeply into one or two buildings to examine program, spatial organization, critical building details, construction technology, and the relationship of the case study building with regard to other contemporary structures and the "architect's overall body of work". From this nucleus, we will spiral outward to consider how the case study is embedded within a constellation of social and economic factors crucial to its design and physical realization. This survey of "modernism's built discourses" provides multiple perspectives on the variety of architectural propositions advanced to express the nature of modernity as a way of life.

**ARCH 275 Introduction to Architectural Theory 1945 - Present 3 Units**

Terms offered: Prior to 2007

This seminar provides an introduction to architectural theory since 1945, with emphasis on developments over the last three decades. Class readings, and discussions explore the post-World War II crisis within modernism, postmodernism within and beyond architectural culture, and more recent developments around issues such as rapid urbanization, sustainability, the politics of cultural identity and globalization. Transformations in architectural theory are examined in relation to historical forces such as the economy, the growth and transformation of cities, and the changing relationship between design professions and disciplines. The influences of digital media, new materials and production techniques on architectural education and practice are explored and the implications for architectural theory assessed. Key issues are anchored in case studies of buildings, urban spaces, and the institutions and agents or architectural culture.

**Rules & Requirements**

**Prerequisites:** The course is open to upper division undergraduates and graduate students.

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of seminar per week

**ARCH 277 California Architecture 3 Units**

Terms offered: Fall 2019

Many California architects came from other places: Maybeck from New York via the Ecole des Beaux Arts; Schindler and Neutra from Vienna; Frank Gehry from Chicago. But, once they arrived, their encounters with the Golden State produced new and original forms of architecture. This seminar will examine the qualities of the state’s environment, culture, economy, and population that have produced unique buildings and landscapes during the 20th century. It will look at both Northern and Southern California architecture, starting with canonical designers then moving beyond them to consider lesser-known regional architects whose work embodies local characteristics.

**California Architecture:** Read More [+]

**Rules & Requirements**

**Prerequisites:** A previous architectural history class

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of seminar per week

**ARCH 278 Visionary Architecture 3 Units**

Terms offered: Prior to 2007

This course explores architectural visions as historical windows, examining them from a number of angles. Using a variety of cases studies drawn from different media (architectural theory, film, advertisements, architectural projects, and so on) and periods (turn of the century, the Modern Movement, Depression, World War II, 1860's, etc.) It provides a sampling of possibilities and models for the final student project, an in-depth, original research paper. Several themes thread their way through the course, including the role of the "unbuilt" in architectural history and architectural practice; the uses of the future in the construction of national and personal identities, cultural narratives, and modern mythologies; the importance of the future as cliche, and the role of play in cultural production.

ARCH 375 Seminar in the Teaching of Architecture 2 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
This class is intended for first-time graduate student instructors, especially those working in studio and lab settings. The class covers a range of issues that normally come up when teaching, offers suggestions regarding how to work well with other graduate student instructors and faculty, and how to manage a graduate student instructor's role as both student and teacher. The greatest benefit of this class comes from the opportunity to explore important topics together. Using a relatively light, but provocative set of readings, the seminar will explore the issues raised each week. There will be one assignment intended to help students explore their own expectations as educators.
