

Demography

Overview

The Department of Demography offers an interdisciplinary training program leading to the MA and PhD in demography. Demography is the systematic study of human populations, a topic central to many pressing policy issues such as the economic development of Third World countries, population aging, the environment, health and mortality, family and household change, immigration, and ethnicity. Demography also has strong intellectual and institutional ties to other fields such as sociology, economics, social history, anthropology, biology, public health, and statistics.

Faculty in the Demography Department also participate in the Graduate Group in Sociology and Demography (<http://guide.berkeley.edu/graduate/schools-departments-graduate-groups/sociology-demography/>), which administers a PhD in Sociology and Demography (<http://guide.berkeley.edu/graduate/schools-departments-graduate-groups/sociology-demography/>).

There is no undergraduate major in Demography, but the department offers an undergraduate minor in Demography. Seniors may take graduate courses with the consent of the instructor.

Facilities and Library

Training and research explore anthropological, economic, historical, mathematical, statistical, and social aspects of demography. Computer applications — including exploratory statistical analysis and microsimulation techniques — are strongly emphasized. The department has advanced computing facilities consisting of a network of unix servers supporting statistical computing, instructional computing, web services, large data storage and backup, and provisions for research projects with protected data. Multiple modes of secure remote connection to the network are supported.

Events and Colloquia

The Demography Brown Bag (<https://populationsciences.berkeley.edu/news/brown-bag-talks/>) series is an opportunity for the campus demography community to present either works in progress or completed works in an informal setting. The lectures are hosted during the school year every Wednesday at noon in the Demography Conference Room.

The Demography Department offers conferences and workshops (<https://www.populationsciences.berkeley.edu/conferences/>) throughout the year sponsored jointly with the Berkeley Population Center (<http://www.popcenter.berkeley.edu/>) at UC Berkeley, and/or the Center for the Economics and Demography of Aging (CEDA) (<http://ceda.berkeley.edu/>). Noted demographers and scholars from related fields contribute to these events, which brings together specialists interested in demography from the entire Bay Area, including Stanford University and UC Davis, and beyond. The Demography Department also offers a Formal Demography Workshop once a year in the summer.

Undergraduate Program

Demography (<http://guide.berkeley.edu/undergraduate/degree-programs/demography/>): Minor

Graduate Programs

Demography (<http://guide.berkeley.edu/graduate/degree-programs/demography/>): MA, PhD

Sociology and Demography (<http://guide.berkeley.edu/graduate/degree-programs/sociology-demography/>): PhD

DEMOG 5 Fundamentals of Population Science 3 Units

Terms offered: Summer 2019 Second 6 Week Session, Summer 2018 Second 6 Week Session, Fall 2011

This course provides an accessible introduction to the social science of demography. The course is organized around cases in which population issues raise policy or ethical dilemmas (example: China's one child policy). Through these cases, students will learn how demographers use models and data to acquire knowledge about population. Throughout the course, students will also learn to read, interpret, evaluate, and produce tabular and graphical representations of population data.

Fundamentals of Population Science: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 3-3 hours of lecture and 0-1 hours of discussion per week

Summer:

6 weeks - 7.5-7.5 hours of lecture and 0-2.5 hours of discussion per week
8 weeks - 6-6 hours of lecture and 0-2 hours of discussion per week
10 weeks - 4.5-4.5 hours of lecture and 0-1.5 hours of discussion per week

Additional Details

Subject/Course Level: Demography/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Johnson-Hanks

Fundamentals of Population Science: Read Less [-]

DEMOG 88 Immigration: What do the data tell us? 2 Units

Terms offered: Fall 2019, Fall 2018, Fall 2017

This course will cover the small but important part of the rich history of human migration that deals with the population of the United States--focusing on the 20th and 21st Centuries. We will use the tools of DS8 to answer specific questions that relate to the themes of this course:

- (1) Why do people migrate?
- (2) Is immigration good or bad for receiving (and sending) countries?
- (3) How do immigrants adapt and how do societies change in response?

In addition to scientific questions, this course will also address the demographic and political history of immigration in the US -- an understanding of which is crucial for understanding both the broad contours of US history and the particular situation in which we find ourselves today.

Immigration: What do the data tell us?: [Read More](#) [+]

Objectives & Outcomes

Student Learning Outcomes: This course will enhance the experience of DS8 by challenging students to use the tools of DS8 to address current questions with real data. By accessing and using much larger and messier datasets than are used in the main course, students will gain technical skills as well as confidence in their ability to use data to answer questions.

Rules & Requirements

Prerequisites: Prerequisites and Restrictions (if any): Corequisite or Prerequisite: Foundations of Data Science (COMPSCI C8 / INFO C8 / STAT C8). This course is a Data Science connector course and is meant to be taken concurrent with or after COMPSCI C8/ INFO C8 / STAT C8. Students may take more than one Data Science connector course if they wish, concurrent with or after having taken the C8 course

Hours & Format

Fall and/or spring: 15 weeks - 1-2 hours of lecture, 0-1 hours of discussion, and 0-1 hours of laboratory per week

Additional Details

Subject/Course Level: Demography/Undergraduate

Grading/Final exam status: Letter grade. Alternate method of final assessment during regularly scheduled final exam group (e.g., presentation, final project, etc.).

Instructor: Carl Mason

Immigration: What do the data tell us?: [Read Less](#) [-]

DEMOG 98 Directed Group Study 1 - 4 Units

Terms offered: Fall 2017, Spring 2017, Fall 2016

Undergraduate research by small groups.

Directed Group Study: [Read More](#) [+]

Rules & Requirements

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 1-3 hours of tutorial per week

DEMOG 130 Demography of Deaths, Diseases, and Disasters 4 Units

Terms offered: Prior to 2007

Fundamentals of demographic analysis of health and mortality with a special focus on global public health challenges including those induced by climate change. Class will focus on essential concepts from demography and public health, global and historical shifts in mortality and morbidity patterns, and the determinants of health and mortality over the life course, including environmental determinants. Students' will develop their own research project related to health and mortality using real-world demographic data. Students will learn to interpret, construct, and calculate common demographic and public health indicators, and will develop a basic toolkit for analyzing health and mortality data.

DEMOG 145AC The American Immigrant Experience 4 Units

Terms offered: Spring 2015, Spring 2014, Spring 2013

The history of the United States is the history of migration. The course covers the evolution of the American population from about 20,000 BC with the goal of understanding the interdependent roles of history and demography. As an American cultures class, special attention is given to the experiences of 18th- and 19th-century African and European immigrants and 20th- and 21st-century Asian and Latin American immigrants. Two substantial laboratory assignments; facility with a spreadsheet program is assumed.

The American Immigrant Experience: [Read More \[+\]](#)

Hours & Format

DEMOG 161 Population Apocalypse in Film and Science 3 Units

Terms offered: Fall 2015, Spring 2015

Despite our astonishing demographic success as a species, humans are haunted by the idea of apocalyptic demise. This course explores scientific and cultural narratives of population catastrophe particularly as presented in film. Noah's flood; nuclear annihilation; overpopulation; and climate change all raise the question: Does human nature carry within it the seeds of our inevitable destruction? In this course, we will grapple with both the science and the art in which this question is embedded.

Population Apocalypse in Film and Science: Read More [+]

Hours & Format

DEMOG C165 Family and Household in Comparative Perspective 3 Units

Terms offered: Spring 2012, Fall 2008, Spring 2005

How are families and households organized around the world? Which aspects of household and family vary, and which are constant? What are the relationships between household and family on the one hand and the political, economic, or broad social patterns on the other? This course examines all of these questions, taking historical and contemporary examples from Africa, Asia, Europe, and the Americas.

Family and Household in Comparative Perspective: Read More [+]

DEMOG 180 Social Networks 4 Units

Terms offered: Fall 2022, Fall 2021, Fall 2020

The science of social networks focuses on measuring, modeling, and understanding the different ways that people are connected to one another. We will use a broad toolkit of theories and methods drawn from the social, natural, and mathematical sciences to learn what a social network is, to understand how to work with social network data, and to illustrate some of the ways that social networks can be useful in theory and in practice. We will see that network ideas are powerful enough to be used everywhere from UNAIDS, where network models help epidemiologists prevent the spread of HIV, to Silicon Valley, where data scientists use network ideas to build products that enable people all across the globe to connect with one another.

Social Networks: Read More [+]

Rules & Requirements

Prerequisites: Suggested: Introduction to Statistics (Computer Science/ Information/Statistics C8 or "Data 8"), Pre-calculus (Mathematics 32), Python, or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3-3 hours of lecture and 0-1 hours of discussion per week

Summer:

6 weeks - 7.5-7.5 hours of lecture and 0-2.5 hours of discussion per week
8 weeks - 6-6 hours of lecture and 0-2 hours of discussion per week
10 weeks - 4.5-4.5 hours of lecture and 0-1.5 hours of discussion per week
