Economics

Overview

Founded in 1903, the Department of Economics at UC Berkeley is well known for the excellence of its teaching and advising, with a strong reputation for producing outstanding PhD graduates as well as rigorous and innovative economic research. In recent years, Berkeley economics PhDs have been hired at many other leading institutions, including Harvard, MIT, Yale, the U.S. Federal Reserve, and the World Bank. The department is also consistently ranked among the world's top research departments. Berkeley faculty have won 5 Nobel Prizes, 5 John Bates Clark Medals, and 21 Alfred P. Sloan Research Fellowships (http://emlab.berkeley.edu/econ/awards.shtml/#nobel) (an average of 1 per year since 1995). Berkeley economics faculty and students have done groundbreaking work in economic theory, econometrics, macroeconomics, and all major fields of applied research, and they have served as policymakers at the highest levels, both in the U.S. and abroad.

Libraries

The Thomas J. Long Business Library (http://www.lib.berkeley.edu/BUSI) houses the major collection of business administration materials on the UC Berkeley campus. The Long Library's collections emphasize the academic and scholarly aspects of business to support the research and teaching mission of the University. Special strengths of the collection include business ethics; company and business history; corporate finance; corporate social responsibility; entrepreneurship; family business; high-technology industries; innovation and technological change; and nonprofit management. The collection, which spans the physical library, off-site storage in Richmond, and the web, includes over 150,000 books, 1.6 million microforms, and thousands of subscriptions in digital format. A large digital library in the social sciences supports the interdisciplinary research needs of graduate students and faculty.

The Mathematics Statistics Library (http://www.lib.berkeley.edu/math/aboutlibrary/econlab.html) maintains a reserve collection of software manuals for the Econometrics Lab (http://emlab.berkeley.edu/eiml). The books are owned by the Econometrics Lab but circulated by the library on their behalf.

Research Centers

Faculty and students in the department participate in many research centers. For further information, see the department's website (https://www.econ.berkeley.edu/about-us/research-centers).

ECON 2 Introduction to Economics--Lecture Format 4 Units

Terms offered: Spring 2019, Spring 2018, Spring 2017

The course provides a survey of economics principles and methods. It covers both microeconomics, the study of consumer choice, firm behavior, and market interaction, and macroeconomics, the study of economic growth, unemployment, and inflation. Special emphasis is placed on the application of economic tools to contemporary economic problems and policies. Economics 2 differs from Economics 1 in that it has an additional hour of lecture per week and can thus cover topics in greater depth. It is particularly appropriate for intended economics majors.

ECON 133 Global Inequality and Growth 4 Units
Terms offered: Spring 2019, Summer 2018 First 6 Week Session, Spring 2018
This course provides an introduction to the analysis of economic inequalities and the interplay between inequality and economic growth. It focuses on three sets of core questions: 1) How does inequality evolve over the path of development? 2) What are the theories that can explain the degree of economic inequalities and its dynamic? 3) How do policies affect inequalities, and what types of policies can foster equitable growth? The course addresses these issues from a global and historical perspective: it comprehensively deals with the United States today, but also with inequality in China, India, Latin America, and Europe, as far back as 1700.
ECON 134 Macroeconomic Policy from the Great Depression to Today 4 Units
Terms offered: Spring 2018, Spring 2013, Spring 2012

ECON 139 Intermediate Financial Economics 4 Units
Terms offered: Spring 2019, Fall 2018, Spring 2018
This is a 4-unit advanced undergraduate course designed for undergraduates in Economics, Statistics, Mathematics, and Industrial Engineering/Operations Research who are interested in financial economics and finance. This course will stress the link between financial economics and equilibrium theory. Less attention will be devoted to purely financial topics such as the valuation of derivatives. This course is intended as the segue between a first course in financial economics (at the undergraduate level) and graduate-level courses in financial economics and finance.
The idea is to introduce students to the full range of topics typically covered by a financial economics and/or discrete time asset pricing course at the doctoral level.

**ECON 219A Foundations of Psychology and Economics 3 Units**
Terms offered: Fall 2018, Fall 2017, Fall 2016
This course presents psychological and experimental economics research demonstrating departures from perfect rationality, self-interest, and other classical assumptions of economics and explores ways that these departures can be mathematically modeled and incorporated into mainstream positive and normative economics. The course will focus on the behavioral evidence itself, especially on specific formal assumptions that capture the findings in a way that can be used by economists. Economic applications will be used for illustrative purposes, but the course will emphasize formal theory.

Terms offered: Spring 2019, Fall 2018, Spring 2018, Fall 2015, Fall 2014, Fall 2013  
This seminar features current research of faculty, from UC Berkeley and elsewhere, and of advanced doctoral students who are investigating the efficacy of economic and non-economic forms of organization. An interdisciplinary perspective--combining aspects of law, economics, and organization--is maintained. Markets, hierarchies, hybrids, bureaus, and the supporting institutions of law and politics all come under scrutiny. The aspiration is to progressively build toward a new science of organization.

Terms offered: Spring 2019, Spring 2018, Spring 2017  
Government intervention changes opportunities and incentives for firms, families, individuals, service providers, and state and local government. This course considers the incentive effects of government expenditure programs. The primary emphasis will be in the examination of the effect of social expenditure programs on individuals and families. Most of the papers will be empirical. The course will not contain an explicit section on methodology and econometric techniques; instead, relevant econometric techniques (e.g., discrete choice, duration analysis) will be discussed in the context of the empirical literature.
