Molecular and Cell Biology

Overview

The teaching and research activities of the Department of Molecular and Cell Biology (MCB) concern the molecular structures and processes of cellular life and their roles in the function, reproduction, and development of living organisms.

This agenda covers a broad range of specialized disciplines, including biochemistry, biophysics, molecular biology, structural biology, genetics, genomics, bioinformatics, cell biology, developmental biology, tumor biology, microbiology, immunology, pathogenesis and neurobiology.

The types of living organisms from which the departmental faculty draws its working materials are as diverse as its disciplinary specializations — ranging from viruses and microbes through plants, roundworms, annelids, arthropods, and mollusks, to fish, amphibia, and mammals.

The faculty of the department is organized into five divisions: Biochemistry and Molecular Biology; Cell and Developmental Biology; Genetics, Genomics, and Development; Neurobiology; and Immunology and Pathogenesis.

Research Facilities

The Cancer Research Laboratory is a research institute on the Berkeley campus that carries on a research, teaching, and service program designed to foster interdepartmental participation in cancer research. Some of the Department of Molecular and Cell Biology faculty are also members of the Cancer Research Laboratory. The central research program represents a multidisciplinary approach to an understanding of the mechanism of neoplastic transformation using a variety of systems. Graduate student and postdoctoral research programs are supported in various areas of tumor biology, biochemistry, cell biology, endocrinology, genetics, immunology, molecular biology, and tumor virology. The Cancer Research Laboratory also operates three research facilities:

1. Flow Cytometry Facility (https://crl.berkeley.edu/flow-cytometry-facility)
2. Molecular Imaging Center (https://crl.berkeley.edu/molecular-imaging-center)

Instrumentation in the facilities is operated by highly trained staff, and training is offered in methods and techniques associated with each facility. For more information, visit the CRL website. (http://crl.berkeley.edu/?q=crl)

The Functional Genomics Laboratory at Berkeley enables researchers to conduct state-of-the-art research in functional genomics, with a focus on using Next Generation sequencing technologies. These technologies include the sequencing of entire genomes of selected model systems and the ability to survey genome-wide patterns of gene expression and now allow the dissection of biological processes at unprecedented levels of detail. In particular, this research facility provides the infrastructure, technologies, and computational resources for the performance of DNA microarray experiments, which allow the analysis of mRNA expression from tens of thousands of genes at a time. The Functional Genomics Laboratory currently possesses all the equipment necessary for conducting DNA microarray experiments, including thermal cyclers; fluidics robots; microarray printing robots; laser-scanning microscopes for microarray scanning; an Affymetrix workstation and scanner; and dedicated computers for data analysis and storage of informatics databases. For more information, go to this website (http://qb3.berkeley.edu/fgl).

The Robert D. Ogg Electron Microscope Laboratory is an instructional and research unit of the College of Letters and Science. It houses equipment for transmission electron microscopy (TEM) and scanning electron microscopy (SEM). The staff is skilled not only in the operation and maintenance of instruments but also in standard and most specialized techniques of sample preparation. Qualified undergraduates and graduate students, postdoctoral associates, faculty, and research staff in biological and physical sciences, once trained, may make arrangements for use of the instruments in research. Instruction is provided both in classes and in individual training. Registered students and faculty are not charged for training. Nominal charges are made for use of the laboratory for individual research work. With permission from the director, non-UC personnel can be accepted for training or laboratory use. Equipment can be used outside normal hours. The laboratory provides demonstrations of the electron microscope and preparative techniques for on-campus classes and can make special arrangements for tour groups. For more information, go to this website (http://em-lab.berkeley.edu/EML).

MCELLBI 15 Current Topics in the Biological Sciences 2 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Students in this course will critically examine modern methods of biological investigations and their social implications. Relevant literature will be used to present basic biological concepts that address the cultural, technological and health aspects of current topics in the biological sciences. Designing and evaluating scientific questions will be stressed.
Current Topics in the Biological Sciences: Read More [+]
Rules & Requirements
Prerequisites: Suitable for freshmen who plan to major in a biological science
Repeat rules: Course may be repeated for credit when topic changes.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Instructor: Matsui
Current Topics in the Biological Sciences: Read Less [-]

MCELLBI C31 Big Ideas in Cell Biology 3 Units
Terms offered: Spring 2014, Spring 2012
An introduction for students who do not intend to major in biology but who wish to satisfy their breadth requirement in Biological Sciences. Some major concepts of modern biology, ranging from the role of DNA and the way cells communicate, to interactions of cells and creatures with their environment, will be discussed without jargon and with attention to their relevance in contemporary life and culture.
Big Ideas in Cell Biology: Read More [+]
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Instructor: Wilt
Also listed as: L & S C30X
Big Ideas in Cell Biology: Read Less [-]

MCELLBI 32 Introduction to Human Physiology 3 Units
Terms offered: Summer 2020 8 Week Session, Fall 2019, Summer 2019 8 Week Session
A comprehensive introduction to human biology. The course will concentrate on basic mechanisms underlying human life processes, including cells and membranes; nerve and muscle function; cardiovascular, respiratory, renal, and gastrointestinal physiology; metabolism, endocrinology, and reproduction.
Introduction to Human Physiology: Read More [+]
Rules & Requirements
Prerequisites: One year high school or college chemistry
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Summer: 8 weeks - 6 hours of lecture and 2 hours of discussion per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Ball
Introduction to Human Physiology: Read Less [-]

MCELLBI 32L Introduction to Human Physiology Laboratory 2 Units
Terms offered: Summer 2020 Second 6 Week Session, Fall 2019, Summer 2019 Second 6 Week Session
Experiments and demonstrations are designed to amplify and reinforce information presented in 32. Exercises include investigations into the structure and function of muscle, nerve, cardiovascular, renal, respiratory, endocrine, and blood systems.
Introduction to Human Physiology Laboratory: Read More [+]
Rules & Requirements
Prerequisites: 32 or may be taken concurrently
Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture and 3 hours of laboratory per week
Summer:
6 weeks - 2 hours of lecture and 8 hours of laboratory per week
8 weeks - 2 hours of lecture and 6 hours of laboratory per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Instructor: Ball
Introduction to Human Physiology Laboratory: Read Less [-]
MCELLBI 38 Stem Cell Biology, Ethics and Societal Impact 3 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Innovations in bioengineering and use of stem cells will significantly impact our ability to combat human disease, genetic disorders and physiological dysfunction. An understanding of human stem cell biology will be critical to make informed decisions on our health and public policy.

Rules & Requirements

Repeat rules: Course may be repeated for credit with instructor consent.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Firestone, Ball

MCELLBI 41 Genetics and Society 3 Units
Terms offered: Spring 2016, Spring 2013, Summer 2012 8 Week Session
Basic communication of inheritance; gene mapping; gene expression and genetic disease in animals and humans; social inheritance of genetics.

Rules & Requirements

Prerequisites: Primarily for students not specializing in biology

Credit Restrictions: Students will receive no credit for Molecular and Cell Biology 41 after completing Biology 1A, Biology 1B, or Letters and Science 18.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Summer:
6 weeks - 7.5 hours of lecture per week
8 weeks - 6 hours of lecture and 2 hours of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Rine, Urnov

MCELLBI C44 Biology for Voters 3 Units
Terms offered: Spring 2017, Spring 2015, Spring 2014
This is a Discovery Course for non-Biology majors designed to introduce lower-division college students to biology through the lens of the contemporary problems facing people, the planet and the species of the planet. Modern genetic contributions will be presented on such issues as genetic engineering of plants and animals, the emergence of new pathogens, the role of genetic variation among individuals, and the extent to which DNA is and isn’t destiny. Each week will close with the presentation and discussion of a defining biological challenge facing the world.

Objectives & Outcomes

Student Learning Outcomes: The learning objectives will be, at one end, to understand what an experiment is, how is it controlled and what does one need to know about an experiment to be able to rely upon any conclusion. That is the fundamental issue in all science, and is frequently overlooked in many media accounts of science. A second objective is to learn enough of the language of biology to be able to ask the kind of informed questions that we would want all elected representatives to pay attention to. A third objective is for students to cultivate confidence that through non-specialized information sources they can become informed consumers of contemporary scientific thought, and to develop those habits of intellect to think about evidence in a scientific manner. A fourth objective is for students to enjoy the abundance of high quality books, articles and multimedia that will enable a lifetime of discovery outside the structure of a college course.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Rine, Urnov

Also listed as: L & S C30Y

Biology for Voters: Read Less [-]
MCELLBI 50 The Immune System and Disease 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Course will discuss how the immune system resolves, prevents, or causes disease. A general overview of the immune system will be covered in the first five weeks followed by five weeks discussing infectious diseases including anthrax, mad cow, herpes, malaria, tuberculosis, and HIV. In addition, other lectures will focus on current immunology topics including vaccines, autoimmunity, allergy, transplantation, and cancer.

The Immune System and Disease: Read More [+]

Rules & Requirements
Prerequisites: High school chemistry or Chemistry 1A and high school biology or Biology 1A. Biology 1AL is not required
Credit Restrictions: Students will receive no credit for Molecular and Cell Biology 50 after completing Molecular and Cell Biology 102, C100A/Chemistry C130, or Chemistry 135.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Beatty

The Immune System and Disease: Read Less [-]

MCELLBI 55 Plagues and Pandemics 3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Discussion of how infectious agents cause disease and impact society at large. We will examine historical and current examples of plagues and pandemics and consider the question of what we should do to ameliorate the impact of infectious disease in the future. The course is intended for non-majors and will begin by briefly providing necessary background in microbiology and immunology. The primary focus in each subsequent week, however, will be on discussing a particular infectious disease. The course will be broad in scope covering biological, historical, ethical and social implications of each disease.

Plagues and Pandemics: Read More [+]

Rules & Requirements
Credit Restrictions: Students will receive no credit for Molecular and Cell Biology 55 after completing Molecular and Cell Biology 100, C100A/Chemistry C130, 100B, 102, 103, C103/Plant and Microbial Biology C103/Public Health C102, 150, or Chemistry 135.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Beatty, Vance

Plagues and Pandemics: Read Less [-]
MCELLBI C61 Brain, Mind, and Behavior 3 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Introduction to human brain mechanisms of sensation, movement, perception, thinking, learning, memory, and emotion in terms of anatomy, physiology, and chemistry of the nervous system in health and disease. Intended for students in the humanities and social sciences and others not majoring in the biological sciences.

Brain, Mind, and Behavior: Read More [+]

Rules & Requirements

Credit Restrictions: Students will receive no credit for Molecular and Cell Biology/Psychology C61 after taking Molecular and Cell Biology 61, N61, W61, Molecular and Cell Biology 104, C100A/Chemistry C130, Molecular and Cell Biology 110, 130A, 136, 160, C160/Neuroscience C160 or Integrative Biology 132. A deficient grade in Molecular and Cell Biology 61, N61, or W61 can be removed with Molecular and Cell Biology C61. Students cannot credit for both MCELLBI/PSYCH C61 AND Psych 110.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Presti

MCELLBI W61 Brain, Mind, and Behavior 3 Units
Terms offered: Summer 2020 First 6 Week Session, Summer 2019 First 6 Week Session
This course deals with the structure and function of the human nervous system, with an emphasis on how brain physiology and chemistry are related to human behavior. This is a comprehensive introduction to the exciting field of contemporary neuroscience for students of all backgrounds and interests, including those from the humanities and social sciences, as well as physical and biological sciences. The Final Examination will be administered in a proctored setting. See Schedule of Classes for meeting information. This course is web-based.

Brain, Mind, and Behavior: Read More [+]

Rules & Requirements

Credit Restrictions: Students will receive no credit for MCELLBI/PSYCH W61 after taking MCELLBI 61, N61, C61, MCELLBI 104, C100A/Chemistry C130, MCELLBI 110, 130A, 136, 160, C160/Neuroscience C160 or Integrative Biology 132. A deficient grade in MCELLBI 61, N61, OR C61 can be removed with W61. Students cannot credit for both MCELLBI/PSYCH C61 AND Psych 110.

Hours & Format

Summer: 6 weeks - 7 hours of web-based lecture and 2.5 hours of web-based discussion per week

Online: This is an online course.

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Presti

Brain, Mind, and Behavior: Read Less [-]
MCELLBI C62 Drugs and the Brain 3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
The history, chemical nature, botanical origins, and effects on the human brain and behavior of drugs such as stimulants, depressants, psychedelics, analgesics, antidepressants, antipsychotics, steroids, and other psychoactive substances of both natural and synthetic origin. The necessary biological, chemical, and psychological background material for understanding the content of this course will be contained within the course itself.

Drugs and the Brain: Read More [+]

Rules & Requirements
Credit Restrictions: Students will receive no credit for Molecular and Cell Biology C62/Letters and Science C30T after completing Molecular and Cell Biology C100A/Chemistry C130, 104, 110, 130, 136, 160 Integrative Biology 132.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Summer: 8 weeks - 4.5 hours of lecture and 2 hours of discussion per week

MCELLBI 63 Introduction to Functional Neuroanatomy 3 Units
Terms offered: Summer 2020 Second 6 Week Session, Summer 2019 Second 6 Week Session, Summer 2018 Second 6 Week Session
This course emphasizes beginning anatomy of the brain and spinal cord to individuals interested in understanding the dynamics of motor and sensory functions in the human body. Students in the Departments of Education, Psychology, and Integrative Biology, as well as students interested in medicine and the life sciences, are especially encouraged to attend.

Introduction to Functional Neuroanatomy: Read More [+]

Rules & Requirements
Credit Restrictions: Students will receive no credit for Molecular and Cell Biology 63 after completing Molecular and Cell Biology 104, C100A/Chemistry C130, Molecular and Cell Biology 110, 130A, 136, 160, 161, C160/Neuroscience C160 or Integrative Biology 132.

Hours & Format
Summer:
4 weeks - 12 hours of lecture per week
6 weeks - 7.5 hours of lecture per week
8 weeks - 6 hours of lecture per week

Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Introduction to Functional Neuroanatomy: Read Less [-]
MCELLBI 63L Introduction to Neuroanatomy Lab 2 Units
Terms offered: Summer 2020 Second 6 Week Session, Summer 2019 Second 6 Week Session
This lab course is an introduction to mammalian neuroanatomy for non-MCB majors. We will do dissections, explore physical anatomical models, and observe microscopic structures within preserved brain slices from a variety of mammalian species. The hands-on exploration of anatomy is key to understanding how the different functional regions of the nervous system are interconnected. Besides gaining a better understanding of anatomy, you will gain important scientific skills such as conducting parts of a neurological exam, fluorescent and light microscopy, reading MRI scans and conducting fine dissections. The course will culminate with a group project using the online Allen Brain Atlas to investigate a novel scientific question.
Introduction to Neuroanatomy Lab: Read More [+]

Rules & Requirements

Prerequisites: MCELLBI 63 (may be taken concurrently) or equivalent

Credit Restrictions: Students will receive no credit for Molecular and Cell Biology 63L after taking Molecular and Cell Biology 160L or 163L

MCELLBI C64 Exploring the Brain: Introduction to Neuroscience 3 Units
Terms offered: Summer 2020 8 Week Session, Summer 2019 8 Week Session, Summer 2018 8 Week Session
This course will introduce lower division undergraduates to the fundamentals of neuroscience. The first part of the course covers basic membrane properties, synapses, action potentials, chemical and electrical synaptic interactions, receptor potentials, and receptor proteins. The second part of the course covers networks in invertebrates, memory and learning behavior, modulation, vertebrate brain and spinal cord, retina, visual cortex architecture, hierarchy, development, and higher cortical centers.

Exploring the Brain: Introduction to Neuroscience: Read More [+]

Rules & Requirements

Prerequisites: High school chemistry or Chemistry 1A; high school biology or Biology 1A. Biology 1AL is not required

Credit Restrictions: Students will receive no credit for Molecular and Cell Biology/Psychology C64 after taking Molecular and Cell Biology C61/Letters and Science C30W, Molecular and Cell Biology C104, 100A/Chemistry C130, Molecular and Cell Biology 110, 130A, 136, 160, C160/Neuroscience C160, or Integrative Biology 132. Students may remove a deficient grade in Molecular and Cell Biology C64/Psychology C64 after Molecular and Cell Biology 64.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Summer: 8 weeks - 4 hours of lecture and 2 hours of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

MCELLBI 88 Immunotherapy of Cancer: Success and Failures 2 Units
Terms offered: Spring 2018, Spring 2017
We will work with a variety of datasets that describe a molecular view of cells and how they divide. We will learn about the processes that cause cells to become specialized (differentiate) and to give rise to cancer (transform). We will analyze data on genetic mutations in cancer that distinguish tumor cells from normal cells. We will learn how mutations are detected by the immune system and the basis of cancer immunotherapy. Finally we will analyze data on clinical trials of cancer immunotherapy to define the correlates of success in curing the disease. The students are expected to gain an understanding of data that reveals the basics of cell physiology and cancer, how immunotherapies of cancer work and their current limitations.
Immunotherapy of Cancer: Success and Failures: Read More [+]
Rules & Requirements
Prerequisites: Foundations of Data Science: COMPSCI C8, DATASCI C8, INFO C8 or STAT C8

MCELLBI C95B Introduction to the Biotechnology Field and Industry: Impact, History, Therapeutics R&D, Entrepreneurship and Careers 2 Units
Terms offered: Spring 2019
This course offers an introduction to the field of biotechnology and will cover the history of the field, its impact on medicine and society, key methodologies, important therapeutic areas, and the range of career options available in the biopharmaceutical industry. In addition to lectures on innovation and entrepreneurship, students will hear from lecturers with expertise ranging from molecular biology to clinical trial design and interpretation. Several case studies of historically impactful scientists, entrepreneurs, and biotherapeutic companies will be presented. Students will work in teams to create and develop novel biotechnology company ideas to present in class. Intended for students interested in the Biology +Business program.

MCELLBI C96 Studying the Biological Sciences 1 Unit
Terms offered: Fall 2019, Fall 2018, Fall 2017
Freshmen will be introduced to the "culture" of the biological sciences, along with an in-depth orientation to the academic life and the culture of the university as they relate to majoring in biology. Students will learn concepts, skills, and information that they can use in their major course, and as future science professionals. Restricted to freshmen in the biology scholars program.

MCELLBI 98 Directed Group Study 1 - 4 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Lectures and small group discussions focusing on topics of interest, varying from semester to semester. Directly Group Study: Read More [+] Rules & Requirements
Prerequisites: Freshmen and sophomores only
Repeat rules: Course may be repeated for credit without restriction.

Rules & Requirements
Prerequisites: 3.3 GPA and consent of instructor
Credit Restrictions: One unit of credit is given for every three hours of work in the lab per week to a maximum of 4 units.
Repeat rules: Course may be repeated for credit without restriction.

Fall and/or spring: 15 weeks - 1-4 hours of independent study per week
Summer: 8 weeks - 1.5-7.5 hours of independent study per week
10 weeks - 1.5-6 hours of independent study per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

Supervised Independent Study: Read Less [-]

MCELLBI 100B Biochemistry: Pathways, Mechanisms, and Regulation 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018

This course surveys cellular metabolism with a focus on the underlying bioenergetics, mechanisms, and chemistry. Lectures will cover major principles in the biochemistry of metabolism and also highlight selected topics including signaling, transport, metabolic engineering, and human diseases related to metabolic dysfunction. The course is designed for majors in the biochemistry and molecular biology, genetics and development, or immunology emphases.

Biochemistry: Pathways, Mechanisms, and Regulation: Read More [+]

Rules & Requirements
Prerequisites: C100A/Chemistry C130

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Savage, Zoncu, Marletta

Biochemistry: Pathways, Mechanisms, and Regulation: Read Less [-]

MCELLBI C100A Biophysical Chemistry: Physical Principles and the Molecules of Life 4 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019

Thermodynamic and kinetic concepts applied to understanding the chemistry and structure of biomolecules (proteins, DNA, and RNA). Molecular distributions, reaction kinetics, enzyme kinetics. Bioenergetics, energy transduction, and motor proteins. Electrochemical potential, membranes, and ion channels.

Biophysical Chemistry: Physical Principles and the Molecules of Life: Read More [+]

Rules & Requirements
Prerequisites: Chemistry 3A or 112A, Mathematics 1A, Biology 1A and 1AL; Chemistry 3B or 112B recommended

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Summer: 8 weeks - 5.5 hours of lecture and 2 hours of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Also listed as: CHEM C130

Biophysical Chemistry: Physical Principles and the Molecules of Life: Read Less [-]
MCELLBI 102 Survey of the Principles of Biochemistry and Molecular Biology 4 Units
Terms offered: Summer 2020 8 Week Session, Spring 2020, Fall 2019
A comprehensive survey of the fundamentals of biological chemistry, including the properties of intermediary metabolites, the structure and function of biological macromolecules, the logic of metabolic pathways (both degradative and biosynthetic) and the molecular basis of genetics and gene expression.
Survey of the Principles of Biochemistry and Molecular Biology: Read More [+]

Rules & Requirements

Prerequisites: Biology 1A, 1AL, and Chemistry 3B (or equivalent courses). Recommended: a course in physical chemistry

Credit Restrictions: Students will receive no credit for 102 after taking 100B or C100A/Chemistry C130 or Chemistry 135.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Summer:
8 weeks - 6 hours of lecture and 2 hours of discussion per week
10 weeks - 4 hours of lecture and 2 hours of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Survey of the Principles of Biochemistry and Molecular Biology: Read Less [-]

MCELLBI C103 Bacterial Pathogenesis 3 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
This course for upper division and graduate students will explore the molecular and cellular basis of microbial pathogenesis. The course will focus on model microbial systems which illustrate mechanisms of pathogenesis. Most of the emphasis will be on bacterial pathogens of mammals, but there will be some discussion of viral and protozoan pathogens. There will be an emphasis on experimental approaches. The course will also include some aspects of bacterial genetics and physiology, immune response to infection, and the cell biology of host-parasite interactions.
Bacterial Pathogenesis: Read More [+]

Rules & Requirements

Prerequisites: MCELLBI 100, 102 or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Portnoy

Also listed as: PLANTBI C103

Bacterial Pathogenesis: Read Less [-]

MCELLBI 104 Genetics, Genomics, and Cell Biology 4 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
This course will introduce students to key concepts in genetic analysis, eukaryotic cell biology, and state-of-the-art approaches in genomic medicine. Lectures will highlight basic knowledge of cellular processes with the basis for human diseases, particularly cancer. Prerequisite courses will have introduced students to the concepts of cells, the central dogma of molecular biology, and gene regulation. Emphasis in this course will be on eukaryotic cell processes, including cellular organization, dynamics, and signaling.
Genetics, Genomics, and Cell Biology: Read More [+]

Rules & Requirements

Prerequisites: 102

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Summer: 8 weeks - 6 hours of lecture and 2 hours of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Genetics, Genomics, and Cell Biology: Read Less [-]
MCELLBI 110 Molecular Biology: Macromolecular Synthesis and Cellular Function 4 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019

Rules & Requirements
Prerequisites: C100A (may not be taken concurrently); Plan 1 Emphasis 1 (BMB) majors should take 100B prior to 110
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

MCELLBI C112 General Microbiology 4 Units
Terms offered: Fall 2019, Fall 2018, Summer 2018 10 Week Session
This course will explore the molecular bases for physiological and biochemical diversity among members of the two major domains, Bacteria and Archaea. The ecological significance and evolutionary origins of this diversity will be discussed. Molecular, genetic, and structure-function analyses of microbial cell cycles, adaptive responses, metabolic capability, and macromolecular syntheses will be emphasized.

Rules & Requirements
Prerequisites: Biology 1A and 1B
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Summer: 10 weeks - 5 hours of lecture and 1.5 hours of discussion per week

MCELLBI C110L General Biochemistry and Molecular Biology Laboratory 4 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Experimental techniques of biochemistry and molecular biology, designed to accompany the lectures in Molecular and Cell Biology 100B and 110. General Biochemistry and Molecular Biology Laboratory: Read More [+]

Rules & Requirements
Prerequisites: 110 (may be taken concurrently)
Hours & Format
Fall and/or spring: 15 weeks - 2-2 hours of lecture and 6-8 hours of laboratory per week
Summer: 10 weeks - 5 hours of lecture and 1.5 hours of discussion per week

MCELLBI C112L General Microbiology Laboratory 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Experimental techniques of microbiology designed to accompany the lecture in C112 and C148. The primary emphasis in the laboratory will be on the cultivation and physiological and genetic characterization of bacteria. Laboratory exercises will include the observation, enrichment, and isolation of bacteria from selected environments.

Rules & Requirements
Prerequisites: C112 (may be taken concurrently)
Hours & Format
Fall and/or spring: 15 weeks - 4 hours of laboratory and 1 hour of discussion per week
Summer: 10 weeks - 6 hours of laboratory and 1.5 hours of discussion per week

General Biochemistry and Molecular Biology Laboratory: Read Less [-]
**MCELLBI C114 Introduction to Comparative Virology 4 Units**

Terms offered: Spring 2020, Spring 2019, Spring 2018

This course will provide a comparative overview of virus life cycles and strategies viruses use to infect and replicate in hosts. We will discuss virus structure and classification and the molecular basis of viral reproduction, evolution, assembly, and virus-host interactions. Common features used during virus replication and host cellular responses to infection will be covered. Topics also included are common and emerging virus diseases, their control, and factors affecting their spread.

Introduction to Comparative Virology: Read More [+]

**Rules & Requirements**

Prerequisites: Introductory chemistry (Chemistry 1A or 3A-3B or equivalent) and introductory biology (Biology 1A, 1AL, and 1B or equivalent) and general biochemistry (Molecular and Cell Biology C100A or equivalent--preferably completed but may be taken concurrently)

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Glaunsinger

Also listed as: ESPM C138/PLANTBI C114

Introduction to Comparative Virology: Read Less [-]

---

**MCELLBI C116 Microbial Diversity 3 Units**

Terms offered: Fall 2019, Fall 2018, Fall 2017

This course for upper-division and graduate students will broadly survey myriad types of microbial organisms, both procaryote and eucaryote, using a phylogenetic framework to organize the concept of “biodiversity.” Emphasis will be on the evolutionary development of the many biochemical themes, how they mold our biosphere, and the organisms that affect the global biochemistry. Molecular mechanisms that occur in different lineages will be compared and contrasted to illustrate fundamental biological strategies. Graduate students additionally should enroll in C216, Microbial Diversity Workshop.

Microbial Diversity: Read More [+]

**Rules & Requirements**

Prerequisites: Upper-division standing. C112 or consent of instructor and organic chemistry (may be taken concurrently)

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Coates

Microbial Diversity: Read Less [-]
The Cancer Karyotype: What it is and What it Does 1 Unit
Terms offered: Spring 2020, Fall 2019, Spring 2019
The prevailing mutation theory holds that 3-6 gene mutations convert normal to cancer cells. But, this theory does not explain why cancers:
1) are autonomous and immortal – unlike any conventional mutations; 2) have individual clonal karyotypes and parallel clonal transcriptomes – much like conventional species; 3) Carcinogens generate cancer only after conspicuous latent periods of years to decades – but mutations change phenotypes immediately; 4) are at once clonal and heterogeneous within clonal margins; and 5) form metastatic and drug-resistant subspecies with variant karyotypes. To explain these unexplained characteristics, this course tests a new theory that carcinogenesis is a form of speciation.

Cell and Systems Biology 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
This course will provide a detailed discussion of a wide range of topics in cell biology emphasizing experimental approaches and key experiments that have provided important insights. The course is aimed at conveying an understanding of how cellular structure and function arise as a result of the properties of cellular macromolecules. An emphasis will be placed on the dynamic nature of cellular organization and will include a description of physical properties of cells (dimensions, concepts of free energy, diffusion, biophysical properties). Students will be introduced to quantitative aspects of cell biology and a view of cellular function that is based on integrating multiple pathways and modes of regulation (systems biology).

MCELLBI 130 Cell and Systems Biology 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
This course will provide a detailed discussion of a wide range of topics in cell biology emphasizing experimental approaches and key experiments that have provided important insights. The course is aimed at conveying an understanding of how cellular structure and function arise as a result of the properties of cellular macromolecules. An emphasis will be placed on the dynamic nature of cellular organization and will include a description of physical properties of cells (dimensions, concepts of free energy, diffusion, biophysical properties). Students will be introduced to quantitative aspects of cell biology and a view of cellular function that is based on integrating multiple pathways and modes of regulation (systems biology).

MCELLBI 118 The Cancer Karyotype: What it is and What it Does 1 Unit
Terms offered: Spring 2020, Fall 2019, Spring 2019
The prevailing mutation theory holds that 3-6 gene mutations convert normal to cancer cells. But, this theory does not explain why cancers:
1) are autonomous and immortal – unlike any conventional mutations; 2) have individual clonal karyotypes and parallel clonal transcriptomes – much like conventional species; 3) Carcinogens generate cancer only after conspicuous latent periods of years to decades – but mutations change phenotypes immediately; 4) are at once clonal and heterogeneous within clonal margins; and 5) form metastatic and drug-resistant subspecies with variant karyotypes. To explain these unexplained characteristics, this course tests a new theory that carcinogenesis is a form of speciation.

Grading/Final exam status: Letter grade. Final exam required.

MCELLBI 137L Physical Biology of the Cell 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2017

Biology is being revolutionized by new experimental techniques that have made it possible to measure the inner workings of molecules, cells and multicellular organisms with unprecedented precision. The objective of this course is to explore this deluge of quantitative data through the use of biological numeracy. We will develop theoretical models that make precise predictions about biological phenomena. These predictions will be tested through the hands-on analysis of experimental data and by performing numerical simulations using Matlab. A laptop is required for this course, but no previous programming experience is required.

Molecular and Cell Biology/Undergraduate

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

MCELLBI 140 General Genetics 4 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
An in depth introduction to genes, their sexual and asexual transmission in individuals and populations, and gene regulation in prokaryotes and eukaryotes. Gene manipulation by recombination, molecular cloning and genome editing is presented in contexts ranging from fundamental mechanisms of chromosome biology to applications in development, aging and disease. Human genetic variation and quantitative evaluation are illuminated. Non-Mendelian and epigenetic modes of inheritance of transposable elements, prions and chromatin states are paired with discussions of groundbreaking technology rewriting the rules of how the genome is analyzed, with attention to the ethical considerations ranging from the history of eugenics to modern controversies.

Rules & Requirements

Prerequisites: Biology 1A and 1AL

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

MCELLBI 140L Genetics Laboratory 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018

Experimental techniques in classical and molecular genetics.

Rules & Requirements

Prerequisites: Molecular and Cell Biology 104 or 140. May be taken concurrently

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 6 hours of laboratory per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.

MCELLBI 160L Neurobiology Laboratory 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Experimental analyses of properties and interactions of nerve cells and systems, illustrating principal features and current methods. Techniques employed include computer simulation of neuron properties, electrophysiological recording and stimulation of nerves and cells, digitally enhanced video imaging of outgrowth, fluorescence immunocytochemistry, analysis of sensory: CNS mapping, human-evoked potential recording, sensory psychophysics.
Neurobiology Laboratory: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A, 1AL; Physics 8A, 8B; MCB 160 or equivalent (may be taken concurrently). Recommended: a course in physical chemistry

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture and 8 hours of laboratory per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Neurobiology Laboratory: Read Less [-]
MCELLBI 161 Circuit, Systems and Behavioral Neuroscience 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Comprehensive survey of circuits and systems neuroscience, including sensory and motor systems, learning and memory, neuromodulatory systems and brain state and higher functions. Biological and computational principles of neural circuit function. Analysis from the level of small circuits to behavior.
Circuit, Systems and Behavioral Neuroscience: Read More [+]
Rules & Requirements
Prerequisites: Molecular and Cell Biology 160

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

MCELLBI 163L Mammalian Neuroanatomy Lab 4 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Development, structure (gross and microscopic), and functional relationships of the mammalian nervous system.
Mammalian Neuroanatomy Lab: Read More [+]
Rules & Requirements
Prerequisites: Biology 1A/1AL, Molecular and Cell Biology 160 but can be taken concurrently. Molecular and Cell Biology 161 is recommended

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture and 6 hours of laboratory per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Roelink, Lammel, Ball

MCELLBI 165 Neurobiology of Disease 3 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
The molecular, cellular, and neural circuit basis of neurological disease. Includes neurochemistry and reward systems, neural development and its disorders, addiction, neurodegenerative and neuropsychiatric disorders. Students will read and discuss primary papers from the research literature.
Neurobiology of Disease: Read More [+]
Rules & Requirements
Prerequisites: Molecular and Cell Biology 160

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Caporale

Neurobiology of Disease: Read Less [-]
MCELLBI 166 Biophysical Neurobiology 3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Electrochemistry and ion transport phenomena, equivalent circuits, excitability, action potentials, voltage clamp and the Hodgkin-Huxley model. Biophysical properties of ion channels. Statistical and electrophysiological models of synaptic transmission, Quantitative models for dendritic structure and neuronal morphogenesis. Sensory transduction, cellular networks as computational devices, information processing and transfer.
Biophysical Neurobiology: Read More [+]

Objectives & Outcomes

Course Objectives:
1) Derive equations for Nernst and GHK membrane potential from fundamental physics concepts.
2) Describe the experiments and theory underlying the Hodgkin-Huxley model.
3) Understand biophysical properties of gating particles called ion channels.
4) Apply and solve equivalent circuit models to describe resting and excitable cells, synaptic transmission and sensory transduction.
5) Use Poisson, Gaussian and binomial distributions to analyze the gating of ion channels, synaptic transmission, and absolute sensitivity of vision.
6) Model dendritic structure based on quantitative descriptors of shape and energy minimization theory.
7) Explain experiments and models of sensory transduction, neuronal integration and lateral inhibition.

Rules & Requirements

Prerequisites: Biology 1A, 1AL, Physics 8A-8B, Chemistry 1A, 3A/3AL-3B, or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Elul, Isacoff, Miller
Biophysical Neurobiology: Read Less [-]

MCELLBI 170L Molecular and Cell Biology Laboratory 4 Units
Terms offered: Summer 2020 First 6 Week Session, Summer 2019 First 6 Week Session
This laboratory class is designed for molecular biology, cell biology and genetics majors to give them an overview of techniques and applications done in these three fields. This is an intense lab class, and you have to be ready to work at a fast pace throughout the 6 weeks span of the course.
Molecular and Cell Biology Laboratory: Read More [+]

Rules & Requirements

Prerequisites: Molecular and Cell Biology 102, 104, 110 or 140
Credit Restrictions: Students will receive no credit for Molecular and Cell Biology 170L after taking Molecular and Cell Biology 133L, 140L or C110L/Chemistry C110L

Hours & Format
Summer: 6 weeks - 5 hours of lecture and 14 hours of laboratory per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Instructor: Le Blanc
Molecular and Cell Biology Laboratory: Read Less [-]

MCELLBI 180 Undergraduate Teaching of Biology 1A Laboratory 1 or 2 Units
Terms offered: Spring 2012, Spring 2007, Fall 2006
Course consists of a weekly three-hour training session that focuses on laboratory techniques, instructional aids, and problem solving, plus an additional three hour weekly laboratory where the UGSI is required to assist a GSI in the instruction of laboratory (answering questions, providing demonstrations, etc.).
Undergraduate Teaching of Biology 1A Laboratory: Read More [+]

Rules & Requirements

Prerequisites: Biology 1A, 1AL with a minimum grade of B. Appointment as a UGSI in biology by consent of instructor. Restricted to undergraduate students
Repeat rules: Course may be repeated for credit up to a total of 4 units.

Hours & Format
Fall and/or spring: 15 weeks - 3-6 hours of session per week
Summer: 8 weeks - 6-12 hours of session per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Undergraduate Teaching of Biology 1A Laboratory: Read Less [-]
MCELLBI 180C Undergraduate Teaching of Molecular and Cell Biology 32 Laboratory 1 - 2 Units
Terms offered: Fall 2012, Fall 2011, Fall 2010
Course consists of a weekly three-hour training session that focuses on laboratory techniques, instructional aids, and problem solving, plus an additional three-hour weekly laboratory where the UGSI is required to assist a GSI in the instruction of laboratory (answering questions, providing demonstrations, etc.). Students will be graded on lecture and laboratory attendance and preparation of one quiz.
Undergraduate Teaching of Molecular and Cell Biology 32 Laboratory: Read More [+]
Rules & Requirements
Prerequisites: 32, 136, or Integrative Biology 132 and Molecular and Cell Biology 32L or Integrative Biology 132L laboratory courses in physiology with minimum grades of B. Appointment as a UGSI in physiology by consent of instructor
Repeat rules: Course may be repeated for credit up to a total of 4 units.
Hours & Format
Fall and/or spring: 15 weeks - 3-6 hours of session per week
Summer: 6 weeks - 7.5-15 hours of session per week
8 weeks - 5.5-11 hours of session per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam required.
Undergraduate Teaching of Molecular and Cell Biology 32 Laboratory: Read Less [-]

MCELLBI N184 Intro to CRISPR: From Basic Biology to Genome Editing Technology 1 Unit
Terms offered: Summer 2020 3 Week Session, Summer 2019 3 Week Session, Summer 2018 3 Week Session
This 3 week course will address topics in genome editing and CRISPR-Cas9 research, including basic and enhanced CRISPR methods, cellular repair mechanisms, regulation of gene expression, bioinformatics, applications to various organisms, and bioethics. Students will learn from a collection of local experts about ongoing campus research, and gain the background knowledge to understand current publications and applications of genome editing.
Intro to CRISPR: From Basic Biology to Genome Editing Technology: Read More [+]
Rules & Requirements
Prerequisites: BIOLOGY 1A or equivalent
Hours & Format
Summer: 3 weeks - 4 hours of lecture per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam required.
Instructors: Hockemeyer, Wilson
Intro to CRISPR: From Basic Biology to Genome Editing Technology: Read Less [-]
MCELLBI N184L Intro to CRISPR Lab: From Basic Biology to Genome Editing Technology
1 Unit
Terms offered: Summer 2020 3 Week Session, Summer 2019 3 Week Session
This 3 week lab course will focus on applications of CRISPR technology as a platform for genome editing and functional genomics. The program will consist of a hands-on laboratory experience demonstrating how CRISPR systems work in situ, as well as use genome editing both in vitro and in vivo. Students will utilize fundamental molecular biology techniques and learn additional protocols specific to genome editing. Two bioinformatics based lessons will cover the essential programs and analyses used in the genome editing field. This course requires concurrent enrollment in a lecture component (MCELLBI N184), where lecturers will address topics in genome editing and CRISPR-Cas9 research.

Intro to CRISPR Lab: From Basic Biology to Genome Editing Technology: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A/1AL or equivalent course. MCELLBI N184 (may be taken concurrently)

Hours & Format
Summer: 3 weeks - 14 hours of laboratory per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Instructors: Hockemeyer, Wilson

Intro to CRISPR Lab: From Basic Biology to Genome Editing Technology: Read Less [-]

MCELLBI 191 Senior Research Thesis 3 Units
Terms offered: Not yet offered
This course is intended for advanced undergraduates wishing to pursue independent research projects under the mentorship of an Molecular and Cell Biology faculty member. To apply for MCELLBI 191, the research project must be rigorous and provide significant training in biology.

Senior Research Thesis: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor and departmental adviser
Credit Restrictions: Students will receive no credit for MCELLBI 191 after completing MCELLBI H196B, or MCELLBI H196A.

Hours & Format
Fall and/or spring: 15 weeks - 9 hours of independent study per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.

Senior Research Thesis: Read Less [-]

MCELLBI 194 Undergraduate Student Instructor for Molecular and Cell Biology Courses 1 - 2 Units
Terms offered: Fall 2018, Fall 2017
UGSIs will work under supervision of instructor and/or GSI. The UGSI will attend three hours of lecture per week where they will assist a GSI in instruction (answering questions, providing demonstrations, facilitating activities, etc.). In addition, UGSIs will meet with students from their section for zero to three hours of tutoring per week depending on the number of units. UGSIs do not evaluate students' work or assign grades. UGSIs will be graded on attendance and preparation of one lesson plan and one quiz. Required to attend any mandatory preparatory and review meetings.

Undergraduate Student Instructor for Molecular and Cell Biology Courses: Read More [+]

Rules & Requirements
Prerequisites: Must have completed course applying to UGSI with a grade of B or better; or consent of instructor
Repeat rules: Course may be repeated for credit up to a total of 4 units.

Hours & Format
Fall and/or spring: 15 weeks - 3-3 hours of lecture per week
Summer: 8 weeks - 6-6 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Alternative to final exam.

Undergraduate Student Instructor for Molecular and Cell Biology Courses: Read Less [-]
MCELLBI H196A Honors Research 1 - 4 Units
Terms offered: Fall 2015, Fall 2014, Spring 2014
Individual research and thesis preparation under the supervision of a faculty member. Acceptance to the Molecular and Cell Biology Honors Program is required. Contact the MCB Undergraduate Affairs Office, 3060 Valley Life Sciences Building, for application and details. Honor students must complete at least two semesters of research, taking a minimum of 4 units and a maximum of 8 units of H196A-196B. If desired, one semester of 199 can be used to replace H196A.
Honors Research: Read More [+]
Rules & Requirements
Prerequisites: Senior honors status and consent of instructor
Repeat rules: Course may be repeated for credit up to a total of 4 units.
Hours & Format
Fall and/or spring: 15 weeks - 1-4 hours of independent study per week
Summer: 8 weeks - 1.5-7.5 hours of independent study per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Honors Research: Read Less [-]

MCELLBI H196B Honors Research 1 - 4 Units
Terms offered: Spring 2016, Spring 2015, Spring 2014
Individual research and completion of thesis under the supervision of a faculty member. This course satisfies the thesis requirement for the Molecular and Cell Biology Department Honors Program. Contact the MCB Undergraduate Affairs Office, 3060 Valley Life Sciences Building, for program details and an application. Honor students must complete at least two semesters of research, taking a minimum of 4 units and a maximum of 8 units of H196A-196B. One semester of H196B is required.
Honors Research: Read More [+]
Rules & Requirements
Prerequisites: Senior honors status and consent of instructor
Repeat rules: Course may be repeated for credit up to a total of 4 units.
Hours & Format
Fall and/or spring: 15 weeks - 1-4 hours of independent study per week
Summer: 8 weeks - 1.5-7.5 hours of independent study per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Honors Research: Read Less [-]

MCELLBI 197 Supervised Internship 1 Unit
Terms offered: Fall 2016
Supervised experience relevant to specific topics of biology in off-campus organizations. Written report and evaluation from internship supervisor required.
Supervised Internship: Read More [+]
Rules & Requirements
Prerequisites: Consent of MCB Faculty, restricted to MCB majors and prospective majors only. Certification from supervisor that credit is required
Repeat rules: Course may be repeated for credit with instructor consent.
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of internship per week
Summer: 8 weeks - 6 hours of internship per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Supervised Internship: Read Less [-]

MCELLBI 198 Directed Group Study 1 - 4 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Lectures and small group discussions focusing on topics of interest, varying from semester to semester.
Directed Group Study: Read More [+]
Rules & Requirements
Prerequisites: Upper division standing
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 1-4 hours of directed group study per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Directed Group Study: Read Less [-]
MCELLBI 199 Supervised Independent Study and Research 1 - 4 Units
Terms offered: Fall 2015, Spring 2015, Fall 2014
Enrollment restrictions apply; see the Introduction to Courses and Curricula section of this catalog.
Supervised Independent Study and Research: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 1-4 hours of independent study per week
Summer:
6 weeks - 1-4 hours of independent study per week
8 weeks - 1-4 hours of independent study per week
10 weeks - 1-4 hours of independent study per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Supervised Independent Study and Research: Read Less [-]

MCELLBI 200A Fundamentals of Molecular and Cell Biology 3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
The goal of this course is to provide graduate-level instruction on molecular and cellular biosciences from a highly-integrated systems perspective, rather than using a more classic, techniques-oriented format. A collection of approaches, and a focus on critical thinking and problem solving, will be used to show how fundamental, highly-significant biological problems are “cracked open.” Reading will be assigned from a mix of classic and current peer-reviewed papers selected by the instructors.
Fundamentals of Molecular and Cell Biology: Read More [+]
Rules & Requirements
Prerequisites: 200A and 200B must be taken concurrently. Combined course required and restricted to all MCB first-year graduate students
Hours & Format
Fall and/or spring: 15 weeks - 6 hours of lecture per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Instructors: Marqusee, Rio, Drubin, Rine, Vance, Feller
Fundamentals of Molecular and Cell Biology: Read Less [-]

MCELLBI 200B Fundamentals of Molecular and Cell Biology 3 Units

MCELLBI C205 Modern Optical Microscopy for the Modern Biologist 3 Units
Terms offered: Not yet offered
This course is intended for graduate students in the early stages of their thesis research who are contemplating using modern microscopy tools as part of their work. It endeavors to cut through the confusion of the wide array of new imaging methods, with a practical description of the pros and cons of each. In addition to providing an intuitive physical understanding how these microscopes work, the course will offer hands on experience with cutting-edge microscopes where students will be able to see firsthand how different imaging modalities perform on their own samples, and where they will be able to access computational tools for the visualization and analysis of their data.
Modern Optical Microscopy for the Modern Biologist: Read More [+]

Rules & Requirements
Credit Restrictions: Students will receive no credit for MCELLBI 205 after completing MCELLBI 205, or MCELLBI 205. A deficient grade in MCELLBI 205 may be removed by taking MCELLBI 205, or MCELLBI 205.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Instructors: Betzig, Ji
Formerly known as: Molecular and Cell Biology 205
Also listed as: PHYSICS C218

Modern Optical Microscopy for the Modern Biologist: Read Less [-]

MCELLBI 206 Physical Biochemistry 3 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Application of modern physical concepts and experimental methods to the analysis of the structure, function, and interaction of large molecules of biological interest.
Physical Biochemistry: Read More [+]

Rules & Requirements
Prerequisites: MCB C100A or equivalent. Admission to the course requires formal consent of instructors, except for MCB graduate students and graduate students in the laboratories of MCB faculty

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.

Physical Biochemistry: Read Less [-]
MCELLBI C212B Chemical Biology II -
Enzyme Reaction Mechanisms 1 Unit
Terms offered: Spring 2020, Spring 2019, Spring 2018
This course will focus on the principles of enzyme catalysis. The course will begin with an introduction of the general concepts of enzyme catalysis which will be followed by detailed examples that will examine the chemistry behind the reactions and the three-dimensional structures that carry out the transformations.
Chemical Biology II - Enzyme Reaction Mechanisms: Read More [+]

Hours & Format
Fall and/or spring: 5 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Also listed as: CHEM C271B
Chemical Biology II - Enzyme Reaction Mechanisms: Read Less [-]

MCELLBI C212C Chemical Biology III -
Contemporary Topics in Chemical Biology 1 Unit
Terms offered: Spring 2020, Spring 2019, Spring 2018
This course will build on the principles discussed in Chemical Biology I and II. The focus will consist of case studies where rigorous chemical approaches have been brought to bear on biological questions. Potential subject areas will include signal transduction, photosynthesis, immunology, virology, and cancer. For each topic, the appropriate bioanalytical techniques will be emphasized.
Chemical Biology III - Contemporary Topics in Chemical Biology: Read More [+]

Hours & Format
Fall and/or spring: 5 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Also listed as: CHEM C271C

MCELLBI 218A Mapping Metabolic Drivers of Disease using Chemoproteomic and Metabolomic Platforms 2 Units

Terms offered: Spring 2020, Fall 2019, Spring 2019
We will discuss current research in the following three areas: 1) mapping metabolic drivers of human diseases using chemoproteomic and metabolomic platforms; 2) expanding the druggable proteome through mapping and pharmacologically interrogating proteome-wide hyper-reactive and ligandable hotspots; 3) mapping proteome-wide targets of environmental and pharmaceutical chemicals towards understanding novel toxicological mechanisms.

Mapping Metabolic Drivers of Disease using Chemoproteomic and Metabolomic Platforms: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Nomura

Mapping Metabolic Drivers of Disease using Chemoproteomic and Metabolomic Platforms: Read Less [-]

MCELLBI 218B Research Review in Biochemistry and Molecular Biology: Trace Elements in the Plant Lineage 2 Units

Terms offered: Spring 2020, Fall 2019, Spring 2013

Research Review in Biochemistry and Molecular Biology: Trace Elements in the Plant Lineage: Read More [+] 

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Research Review in Molecular Mechanisms of Membrane Transport: Read Less [-]
MCELLBI 218O Research Review in Biochemistry and Molecular Biology: Chemical Biology and Enzymology 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Topics at the interface of chemistry and biology with a particular focus on mechanisms of enzyme catalysis.
Research Review in Biochemistry and Molecular Biology: Chemical Biology and Enzymology: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Marletta

Research Review in Biochemistry and Molecular Biology: Chemical Biology and Enzymology: Read Less [-]

MCELLBI 218P Research Review in Biochemistry and Molecular Biology: Chemical Biology and Neuroscience 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Molecular approaches to designing and deploying tools for voltage imaging and brain mapping.
Research Review in Biochemistry and Molecular Biology: Chemical Biology and Neuroscience: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Yildiz

Research Review in Biochemistry and Molecular Biology: Chemical Biology and Neuroscience: Read Less [-]

MCELLBI 218Q Research Review in Biochemistry and Molecular Biology: Single Molecular Imaging of Macromolecular Enzymes 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Yildiz laboratory combines molecular biology and single molecule biophysical techniques to understand mechanisms that underlie cellular organization and motility. Specific focuses of the lab are to dissect 1) the mechanism of cytoplasmic dynein motility, 2) the regulation of intraflagellar transport, and 3) the protection and maintenance of mammalian telomeres.
Research Review in Biochemistry and Molecular Biology: Single Molecular Imaging of Macromolecular Enzymes: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructors: Miller, Evan

Research Review in Biochemistry and Molecular Biology: Single Molecular Imaging of Macromolecular Enzymes: Read Less [-]

MCELLBI 218R Research Review in Biochemistry and Molecular Biology: The Protein Folding Problem 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Protein structure, stability, design, and the pathway of protein folding.
Research Review in Biochemistry and Molecular Biology: The Protein Folding Problem: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Marqusee

Research Review in Biochemistry and Molecular Biology: The Protein Folding Problem: Read Less [-]
MCELLBI 218S Research Review in Biochemistry and Molecular Biology: Cryo-Electron Microscopy of Macromolecules 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Structure-function studies of the cytoskeleton and large molecular machines by cryo-electron microscopy and image reconstruction.
Research Review in Biochemistry and Molecular Biology: Cryo-Electron Microscopy of Macromolecules: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Nogales
Research Review in Biochemistry and Molecular Biology: Cryo-Electron Microscopy of Macromolecules: Read Less [-]
MCELLBI 218T Electron Cryo-tomography of Macromolecular Complexes 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Different methods for determining how the in situ structure and arrangement of macromolecular complexes influence cell morphology and function will be discussed via literature review and implemented through lab-based research and discussions.
Electron Cryo-tomography of Macromolecular Complexes: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Davies
Electron Cryo-tomography of Macromolecular Complexes: Read Less [-]
MCELLBI 218V Research Review in Biochemistry and Molecular Biology: Biophysics of Macromolecule Transport Across Membranes 2 Units
Terms offered: Fall 2014, Spring 2014, Fall 2013
Review of current literature and discussion of original research.
Research Review in Biochemistry and Molecular Biology: Biophysics of Macromolecule Transport Across Membranes: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Krantz
Research Review in Biochemistry and Molecular Biology: Biophysics of Macromolecule Transport Across Membranes: Read Less [-]
MCELLBI 218X Research Review in Biochemistry and Molecular Biology: Chemical Reactions of Metabolism 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Define how metabolic reactions function in the context of the cellular system in order to elucidate the so-called design principles of metabolic function.
Research Review in Biochemistry and Molecular Biology: Chemical Reactions of Metabolism: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Savage
Research Review in Biochemistry and Molecular Biology: Chemical Reactions of Metabolism: Read Less [-]
MCELLBI 218Z Molecular and Cellular Mechanisms of Nutrient Sensing 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
In our laboratory, we study the molecular mechanisms of nutrient sensing and growth control. Specific areas of interest include the mTOR pathway, energy sensing, lysosomal biology and translational control.
Molecular and Cellular Mechanisms of Nutrient Sensing: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Zoncu

Molecular and Cellular Mechanisms of Nutrient Sensing: Read Less [-]

MCELLBI 219A Structural Membrane Biology 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
The mechanisms by which protein complexes use their structures to bud, bend, and sever membranes will be covered in research reports and reviews of the current literature and in discussion of current experiments in the field.
Structural Membrane Biology: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Hurley

Molecular and Cellular Mechanisms of Nutrient Sensing: Read Less [-]

MCELLBI 219B Regulation of Translation 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Understanding the molecular basis and physiological role of translational regulation in gene expression with an emphasis on global profiling and functional genomics.
Regulation of Translation: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Ingolia

Regulation of Translation: Read Less [-]

MCELLBI 219F Research Review in Biochemistry and Molecular Biology: Eukaryotic Gene Expression 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Protein-DNA interactions and the control of gene expression in eukaryotes.
Research Review in Biochemistry and Molecular Biology: Eukaryotic Gene Expression: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Tjian

Research Review in Biochemistry and Molecular Biology: Eukaryotic Gene Expression: Read Less [-]
MCELLBI 219G Virus-Host Interactions 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Understanding the creative strategies viruses use to manipulate gene expression in host cells, with a focus on RNA-based regulation of gene expression.

Virus-Host Interactions: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor.
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Glaunsinger

Virus-Host Interactions: Read Less [-]

MCELLBI 219J Research Review in Biochemistry and Molecular Biology: Structure and Function of RNA 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
RNA structure, folding, and function. Specific topics include ribozyme mechanisms, RNA-mediated translation initiation, and protein targeting and secretion.

Research Review in Biochemistry and Molecular Biology: Structure and Function of RNA: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor.
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Doudna

Research Review in Biochemistry and Molecular Biology: Structure and Function of RNA: Read Less [-]

MCELLBI 219H Research Review in Biochemistry and Molecular Biology: Molecular and Cell Biology of Listeria monocytogenes Pathogenesis 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Discussion of recent research on the genetics, cell biology, and immunology of the model facultative intracellular bacterial pathogen, Listeria monocytogenes Pathogenesis.

Research Review in Biochemistry and Molecular Biology: Molecular and Cell Biology of Listeria monocytogenes Pathogenesis: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor.
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Portnoy

Research Review in Biochemistry and Molecular Biology: Molecular and Cell Biology of Listeria monocytogenes Pathogenesis: Read Less [-]

MCELLBI 219S Research Review in Biochemistry and Molecular Biology: Structural Biology of Signaling and Replication 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Mechanisms and structure in DNA replication and eukaryotic cell signaling.

Research Review in Biochemistry and Molecular Biology: Structural Biology of Signaling and Replication: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor.
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Kuriyan

Research Review in Biochemistry and Molecular Biology: Structural Biology of Signaling and Replication: Read Less [-]
MCELLBI 219T Research Review in Biochemistry and Molecular Biology: Signal Transduction Mechanisms 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Discussion of recent research on various aspects of signal transduction mechanisms in eukaryotic cells, including G protein-coupled receptors, protein kinase cascades, synthesis and mobilization of lipid mediators, calcium sensing and response pathways, activation and inhibition of gene expression, and the biochemical basis of signal desensitization and physiological adaptation, with strong emphasis on genetic and molecular analysis of these systems, especially in the yeast
Research Review in Biochemistry and Molecular Biology: Signal Transduction Mechanisms: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Thorner
Research Review in Biochemistry and Molecular Biology: Signal Transduction Mechanisms: Read Less [-]

MCELLBI 219U Research Review in Biochemistry and Molecular Biology: Single Molecule Biophysics 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Methods of single molecule manipulation and visualization that are used to characterize the structure and mechanochemical properties of translocating DNA binding protein such as RNA polymerase and to investigate the mechanical denaturation of single protein molecules will be covered in research reports and reviews of the current literature and in discussion of current experiments in the field.
Research Review in Biochemistry and Molecular Biology: Single Molecule Biophysics: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Bustamante
Research Review in Biochemistry and Molecular Biology: Single Molecule Biophysics: Read Less [-]

MCELLBI 219X Research Review in Biochemistry and Molecular Biology: Cell Surface Glycoconjugate Interactions 2 Units
Terms offered: Spring 2018, Fall 2017, Spring 2017
Research Review in Biochemistry and Molecular Biology: Cell Surface Glycoconjugate Interactions: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Bertozzi
Research Review in Biochemistry and Molecular Biology: Cell Surface Glycoconjugate Interactions: Read Less [-]
MCELLBI 219Y Research Review in Biochemistry and Molecular Biology: Regulation of HIV Gene Expression 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Regulation of HIV gene expression by viral proteins and cellular cofactors will be covered in research reports and reviews of the current literature and in discussion of current experiments in the field.

Research Review in Biochemistry and Molecular Biology: Regulation of HIV Gene Expression: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Zhou

Research Review in Biochemistry and Molecular Biology: Regulation of HIV Gene Expression: Read Less [-]

MCELLBI 230 Advanced Cell Biology 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Advanced treatment of topics in cell biology.
Advanced Cell Biology: Read More [+]

Rules & Requirements
Prerequisites: 130. Formal consent of instructors required, except for MCB graduate students and graduate students in the laboratories of MCB faculty

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Instructor: Zhou

Advanced Cell Biology: Read Less [-]

MCELLBI 219Z Research Review in Biochemistry and Molecular Biology: Telomere Synthesis and Dynamics 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Emphasizes a study of the replication of eukaryotic telomeric DNA. Special focus on techniques in protein biochemistry and molecular biology.

Research Review in Biochemistry and Molecular Biology: Telomere Synthesis and Dynamics: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Zhou

Research Review in Biochemistry and Molecular Biology: Telomere Synthesis and Dynamics: Read Less [-]
MCELLBI 236 Advanced Mammalian Physiology 5 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Principles of mammalian (primarily human) physiology emphasizing physical, chemical, molecular, and cellular bases of functional biology. The following topics will be covered: cellular and membrane ion and nonelectrolyte transport; cell and endocrine regulation; autonomic nervous system regulation; skeletal, smooth, and cardiac muscle; cardiovascular physiology; respiration; renal physiology; gastrointestinal physiology. Discussion section will study advanced physiological topics, including: presentations by the faculty; problem sets; discussion of the primary literature and of reviews; two presentations by each student on topics in current physiological research.

MCELLBI 237L Advanced Physical Biology of the Cell 4 Units
Terms offered: Spring 2020, Spring 2019
Biology is being revolutionized by new experimental techniques that have made it possible to measure the inner workings of molecules, cells and multicellular organisms with unprecedented precision. The objective of this course is to explore this deluge of quantitative data through the use of biological numeracy. We will develop theoretical models that make precise predictions about biological phenomena. These predictions will be tested through the hands-on analysis of experimental data and by performing numerical simulations using Matlab. A laptop is required for this course, but no previous programming experience is required.

MCELLBI C237 Stem Cells and Directed Organogenesis 3 Units
Terms offered: Spring 2015, Spring 2014, Spring 2013
This course will provide an overview of basic and applied embryonic stem cell (ESC) biology. Topics will include early embryonic development, ESC laboratory methods, biomaterials for directed differentiation and other stem cell manipulations, and clinical uses of stem cells.

MCELLBI 239B Research Review in Cell and Developmental Biology: Regulation of the Cell Cycle 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Review of current literature and discussion of original research.

MCELLBI 236 Advanced Mammalian Physiology: Read More [+]
MCELLBI 237L Advanced Physical Biology of the Cell: Read More [+]
MCELLBI C237 Stem Cells and Directed Organogenesis: Read More [+]
MCELLBI 239B Research Review in Cell and Developmental Biology: Regulation of the Cell Cycle: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of discussion per week
Summer: 8 weeks - 6 hours of lecture and 2 hours of laboratory per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Instructor: Garcia

Advanced Mammalian Physiology: Read Less [-]
Advanced Physical Biology of the Cell: Read Less [-]
Stem Cells and Directed Organogenesis: Read Less [-]
Research Review in Cell and Developmental Biology: Regulation of the Cell Cycle: Read Less [-]
MCELLBI 239BB Research Review in Cell and Developmental Biology: Mechanics and Dynamics of Cell Movements 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Research in our laboratory is focused on the mechanics and dynamics of cell movements on the purified protein, single cell, and tissue levels. For these studies, we are developing new instruments to quantify cell and molecular mechanics based on optical microscopy, force microscopy, and microfabrication.

Research Review in Cell and Developmental Biology: Mechanics and Dynamics of Cell Movements: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Fletcher

Research Review in Cell and Developmental Biology: Mechanics and Dynamics of Cell Movements: Read Less [-]

MCELLBI 239C The Regulation of Meiotic Gene Expression and Cellular Morphogenesis 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
The mechanisms that link cellular differentiation programs and dynamic gene regulation in complex eukaryotic systems remain mysterious. Such programs drive diverse and central biological processes including organismal development, immune function, disease progression, and meiosis. This course is focused on the molecular basis for the cellular remodeling accompanying meiosis, the highly conserved process by which gametes are produced.

The Regulation of Meiotic Gene Expression and Cellular Morphogenesis: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Brar

The Regulation of Meiotic Gene Expression and Cellular Morphogenesis: Read Less [-]

MCELLBI 239EE Research Review in Cell and Developmental Biology: Cell Morphogenesis 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Review of current literature and discussion of original research.

Research Review in Cell and Developmental Biology: Cell Morphogenesis: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Heald

Research Review in Cell and Developmental Biology: Cell Morphogenesis: Read Less [-]
MCELLBI 239F Research Review in Cell and Developmental Biology: Nucleocytoplasmic Transport 2 Units
Terms offered: Spring 2015, Fall 2014, Spring 2014
Review of current literature and discussion of original research.
Research Review in Cell and Developmental Biology: Nucleocytoplasmic Transport: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Weis

Research Review in Cell and Developmental Biology: Nucleocytoplasmic Transport: Read Less [-]

MCELLBI 239FF Research Review in Cell and Developmental Biology: Signal Transduction and Tumor Suppressor Genes 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Review of current literature and discussion of original research.
Research Review in Cell and Developmental Biology: Signal Transduction and Tumor Suppressor Genes: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Luo

Research Review in Cell and Developmental Biology: Signal Transduction and Tumor Suppressor Genes: Read Less [-]

MCELLBI 239G Research Review in Cell and Developmental Biology: Mitochondrial biology 2 Units
Terms offered: Spring 2020, Spring 2008, Fall 2007
Review of relevant literature and discussion of current research: Mitochondrial dynamics, transport and inheritance; replication, segregation and distribution of mitochondrial genomes; underlying mechanisms of human mitochondrial disease.
Research Review in Cell and Developmental Biology: Mitochondrial biology: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Lewis

Research Review in Cell and Developmental Biology: Mitochondrial biology: Read Less [-]

MCELLBI 239HH Research Review in Cell and Developmental Biology: Mechanisms of Control of Growth and Cell Proliferation 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Identifying pathways that restrict growth and cell proliferation in vivo.
Research Review in Cell and Developmental Biology: Mechanisms of Control of Growth and Cell Proliferation: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Hariharan

Research Review in Cell and Developmental Biology: Mechanisms of Control of Growth and Cell Proliferation: Read Less [-]
MCELLBI 239I Research Review in Cell and Developmental Biology: Cytoskeleton and Cell Motility 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Review of current literature and discussion of original research. Research Review in Cell and Developmental Biology: Cytoskeleton and Cell Motility: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Welch

Research Review in Cell and Developmental Biology: Cytoskeleton and Cell Motility: Read Less [-]

MCELLBI 239J Research Review in Cell and Developmental Biology: Steroid Hormone and Growth Factor Action 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Review of current literature and discussion of original research. Research Review in Cell and Developmental Biology: Steroid Hormone and Growth Factor Action: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Firestone

Research Review in Cell and Developmental Biology: Steroid Hormone and Growth Factor Action: Read Less [-]

MCELLBI 239K Research Review in Cell and Developmental Biology: Secretion and Cell Membrane Assembly 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Cell surface growth with emphasis on the unicellular eukaryote S. cerevisiae. Research Review in Cell and Developmental Biology: Secretion and Cell Membrane Assembly: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Schekman

Research Review in Cell and Developmental Biology: Secretion and Cell Membrane Assembly: Read Less [-]

MCELLBI 239KK Research Review in Cell and Developmental Biology: Assembly and Subcellular Organization of Bacterial Organelles 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Review of current literature and discussion of original research. Research Review in Cell and Developmental Biology: Assembly and Subcellular Organization of Bacterial Organelles: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Komeili

Research Review in Cell and Developmental Biology: Assembly and Subcellular Organization of Bacterial Organelles: Read Less [-]
MCEL2021 M Research Review in Cell and Developmental Biology: MicroRNA Functions in Cancer Development, Mouse Tumor Models 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Malignant transformation represents the endpoint of successive genetic lesions that confer uncontrolled proliferation and survival, unlimited replicative potential, and invasive growth.
Research Review in Cell and Developmental Biology: MicroRNA Functions in Cancer Development, Mouse Tumor Models: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: He

Research Review in Cell and Developmental Biology: MicroRNA Functions in Cancer Development, Mouse Tumor Models: Read Less [-]

MCEL2021 Q Research Review in Cell and Developmental Biology: Regulation of Cell Polarity in Drosophila 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Mechanisms underlying the establishment and maintenance of cellular organization in epithelia and other cell types.
Research Review in Cell and Developmental Biology: Regulation of Cell Polarity in Drosophila: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Bilder

Research Review in Cell and Developmental Biology: Regulation of Cell Polarity in Drosophila: Read Less [-]
MCELLBI 239R Research Review in Cell and Developmental Biology: Telomere Biology of Human Stem Cells 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
The goal of our laboratory is to understand the key functions of telomeres and telomerase in tissue homeostasis, tumorigenesis, and aging. To this end, we generate genetically engineered human pluripotent and adult stem cell models to measure telomere and telomerase function during cellular differentiation and tumor formation.

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Hockemeyer

Research Review in Cell and Developmental Biology: Telomere Biology of Human Stem Cells: Read More [+]

MCELLBI 239T Research Review in Cell and Developmental Biology: The Cell Biology of Fertilization 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Research in our lab is focused on the cell biology of mammalian fertilization. Our lab uses biophysical, biochemical, and molecular genetics methods to study sperm ion channels and transporters that regulate sperm motility, chemotaxis, and the acrosome reaction. A better understanding of these processes will eventually lead to the development of effective tools to control and preserve male fertility, improve the reproductive health of human population worldwide, and advance family planning.

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Lishko

Research Review in Cell and Developmental Biology: The Cell Biology of Fertilization: Read More [+]

MCELLBI 239U Research Review in Cell and Developmental Biology: The Cytoskeleton and Morphogenesis 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Review of current literature and discussion of current research.

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2-0 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Drubin

Research Review in Cell and Developmental Biology: The Cytoskeleton and Morphogenesis: Read Less [-]
MCELLBI 239V Research Review in Cell and Developmental Biology: Molecular Mechanisms of Transduction in Touch and Pain Receptors 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Review of current literature and discussion of current research. Current research focuses on elucidating the molecular mechanisms of somatosensory mechanotransduction.
Research Review in Cell and Developmental Biology: Molecular Mechanisms of Transduction in Touch and Pain Receptors: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Bautista
Research Review in Cell and Developmental Biology: Molecular Mechanisms of Transduction in Touch and Pain Receptors: Read Less [-]

MCELLBI 239W Research Review in Cell and Developmental Biology: Leech Embryology and Development 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Review of current literature and discussion of original research.
Research Review in Cell and Developmental Biology: Leech Embryology and Development: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Weisblat
Research Review in Cell and Developmental Biology: Leech Embryology and Development: Read Less [-]

MCELLBI 239Z Research Review in Cell and Developmental Biology: Chromosome Remodeling and Reorganization During Meiosis 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
How chromosomes are reorganized during meiosis to accomplish the pairing, recombinatin, and segregation leading up to successful gamete production.
Research Review in Cell and Developmental Biology: Chromosome Remodeling and Reorganization During Meiosis: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Dernburg
Research Review in Cell and Developmental Biology: Chromosome Remodeling and Reorganization During Meiosis: Read Less [-]

MCELLBI 240 Advanced Genetic Analysis 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Principles and practice of classical and modern genetic analysis as applied to eukaryotic organisms, including yeast, nematodes, , mice and humans; isolation and analysis of mutations; gene mapping; suppressor analysis; chromosome structure; control of gene expression; and developmental genetics.
Advanced Genetic Analysis: Read More [+]
Rules & Requirements
Prerequisites: Graduate standing with 110 or 140 or consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Instructors: Koshland, Meyer
Advanced Genetic Analysis: Read Less [-]
MCELLBI C243 Seq: Methods and Applications 3 Units
Terms offered: Spring 2015, Spring 2014
A graduate seminar class in which a group of students will closely examine recent computational methods in high-throughput sequencing followed by directly examining interesting biological applications thereof. Seq: Methods and Applications: Read More [+]

Rules & Requirements
Prerequisites: Graduate standing in Math, MCB, and Computational Biology; or consent of the instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Instructor: Pachter
Also listed as: MATH C243
Seq: Methods and Applications: Read Less [-]

MCELLBI C244 Discrete Mathematics for the Life Sciences 4 Units
Terms offered: Spring 2013
Introduction to algebraic statistics and probability, optimization, phylogenetic combinatorics, graphs and networks, polyhedral and metric geometry.
Discrete Mathematics for the Life Sciences: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Also listed as: MATH C239
Discrete Mathematics for the Life Sciences: Read Less [-]

MCELLBI 249BB Research Review in Genetics and Development: Aging and Protein Homeostasis 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Central to the aging process is the unfolding of the proteome. Specific areas under study include cellular responses to protein misfolding and coordination of these responses across an organism.
Research Review in Genetics and Development: Aging and Protein Homeostasis: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Dillin
Research Review in Genetics and Development: Aging and Protein Homeostasis: Read Less [-]

MCELLBI 249C Research Review in Genetics and Development: Nucleic Acid-Protein Interactions and Control of Gene Expression 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Biochemical and molecular genetic aspects of eukaryotic messenger RNA splicing and transposition, with an emphasis on as an experimental system.
Research Review in Genetics and Development: Nucleic Acid-Protein Interactions and Control of Gene Expression: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Rio
Research Review in Genetics and Development: Nucleic Acid-Protein Interactions and Control of Gene Expression: Read Less [-]
MCELLBI 249D Research Review in Genetics and Development: Mechanisms of Genetic Regulation in Yeast 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Genes, gene products and molecular mechanisms that control cell types in the unicellular eukaryote. Research Review in Genetics and Development: Mechanisms of Genetic Regulation in Yeast: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Rine

Research Review in Genetics and Development: Mechanisms of Genetic Regulation in Yeast: Read Less [-]

MCELLBI 249E Research Review in Genetics and Development: Molecular Genetics of Drosophila 2 Units
Terms offered: Spring 2005, Fall 2004, Spring 2004
Gene regulation and developmental neurobiology. Research Review in Genetics and Development: Molecular Genetics of Drosophila: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: G. Rubin

Research Review in Genetics and Development: Molecular Genetics of Drosophila: Read Less [-]

MCELLBI 249F Research Review in Genetics and Development: Neuronal Development 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Molecular and genetic approaches to the problem of how neurons develop, with emphasis on and . Research Review in Genetics and Development: Neuronal Development: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Garriga

Research Review in Genetics and Development: Neuronal Development: Read Less [-]

MCELLBI 249G Research Review in Genetics and Development: Developmental and Evolutionary Genetics 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
We study how genes control pattern formation during development and pattern modification during evolution. Research Review in Genetics and Development: Developmental and Evolutionary Genetics: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Miller

Research Review in Genetics and Development: Developmental and Evolutionary Genetics: Read Less [-]
MCELLBI 249H Investigating Cellular Aging and Chromosome Segregation during Gametogenesis 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
This course focuses on understanding 1) how cellular aging is affected during gametogenesis, the developmental program that produces gametes for sexual reproduction and 2) how chromosome segregation is regulated during meiosis, the specialized cell division that generates gametes.
Investigating Cellular Aging and Chromosome Segregation during Gametogenesis: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Unal
Investigating Cellular Aging and Chromosome Segregation during Gametogenesis: Read Less [-]

MCELLBI 249HH Research Review in Genetics and Development: Human Population Genetics and Evolutionary Biology 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Research focuses on use of statistical and computational approaches to study questions in human genetics and evolutionary biology. This includes, but is not limited to, studying (1) how different evolutionary processes such as mutation rate evolve across primates, (2) when key events (such as introgression and adaptations) occurred in human history, and (3) how we can leverage large-scale datasets to identify genetic variants related to human adaptation and disease.
Research Review in Genetics and Development: Human Population Genetics and Evolutionary Biology: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Moorjani
Research Review in Genetics and Development: Human Population Genetics and Evolutionary Biology: Read Less [-]
MCELLBI 249J Research Review in Genetics and Development: Developmental and Molecular Genetics of C. elegans 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Molecular and genetical analysis of sex determination and dosage compensation in the nematode.

MCELLBI 249K Research Review in Genetics and Development: Animal Origins 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Evaluation of current research on choanoflagellates, sponges, and animal origins. Intended to complement ongoing research for graduate students.

MCELLBI 249L Imaging Single Molecules: Fashion or Game Changer? 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Research review in genetics, genomics and development. We will explore how the detection of single particles (DNA, RNA, proteins) can help with understanding cellular organization and enzymatic processes dynamics and kinetics. Most of the experiments described will be drawn from the gene expression and nuclear organization literature.

MCELLBI 249M Research Review in Genetics and Development: Saccharomyces Cerevisiae Microtubule Cytoskeleton 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Review of current literature and discussion of current research.
MCELLBI 249MM Physical Biology of Living Organisms 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Research review in genetics, genomics and development. In development a single cell goes through a series of repeated divisions and these cells read the program encoded in their DNA in order to become familiar cell types such as those found in muscle, liver, or our brains. The goal of our lab is to uncover the rules behind these decisions with the objective of predicting and manipulating developmental programs from just looking at DNA sequence. In order to reach this predictive understanding we combine physics, synthetic biology, and new technologies to query and control developmental decisions in real time at the single cell level in the fruit fly embryo.

Physical Biology of Living Organisms: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Garcia

Physical Biology of Living Organisms: Read Less [-]

MCELLBI 249N Research Review in Genetics and Development: Gene Regulation 2 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Current literature and research in gene regulation will be covered in research reports and reviews of the current literature and in discussion of current experiments in the field.

Research Review in Genetics and Development: Gene Regulation: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Levine

Research Review in Genetics and Development: Gene Regulation: Read Less [-]

MCELLBI 249O Research Review in Genetics and Development: Genome Sequences 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Biochemistry, cancer biology and virology, cell biology, computational biology, genetics, microbiology, molecular and cell physiology.

Research Review in Genetics and Development: Genome Sequences: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Eisen

Research Review in Genetics and Development: Genome Sequences: Read Less [-]
MCELLBI 249Q Research Review in Genetics and Development: Computational Genomics 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Recent developments in computational methods for genomics and their application for understanding the structure and function of genes encoded in completely sequenced genomes.
Research Review in Genetics and Development: Computational Genomics: Read More [+] Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Brenner
Research Review in Genetics and Development: Computational Genomics: Read Less [-]

MCELLBI 249S Research Review in Genetics and Development: Evolution of Development Mechanisms 2 Units
Terms offered: Fall 2019, Spring 2019, Fall 2018
Evolution of development mechanisms with a focus on the genes that regulate segmentation and regionalization of the body plan.
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Patel
Research Review in Genetics and Development: Evolution of Development Mechanisms: Read Less [-]

MCELLBI 249T Research Review in Genetics, Genomics and Development: Evolution of Genomes 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Comparative analysis of eukaryotic genomes to inform the origins and diversification of animals and plants.
Research Review in Genetics, Genomics and Development: Evolution of Genomes: Read More [+] Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Rokhsar
Research Review in Genetics, Genomics and Development: Evolution of Genomes: Read Less [-]

MCELLBI 249V Research Review in Genetics and Development: Induction in Vertebrate Development and ES Cell Differentiation 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
The Roelink laboratory is interested in the mechanisms of embryonic induction, the phenomenon in which a group of cells changes the developmental fate of neighboring cells via the release of inducers.
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Roelink
Research Review in Genetics and Development: Induction in Vertebrate Development and ES Cell Differentiation: Read Less [-]
MCELLBI 249W Research Review in Genetics and Development: Archaeal Genetics and Methane Metabolism 2 Units
Terms offered: Spring 2020, Spring 2013, Spring 2012
Discussions pertaining to the development of new genetic tools for archaeal model organisms with a particular emphasis on methane metabolizing archaea in order to characterize their physiology, evolution and metabolism.
Research Review in Genetics and Development: Archaeal Genetics and Methane Metabolism: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Nayak
Research Review in Genetics and Development: Archaeal Genetics and Methane Metabolism: Read Less [-]

MCELLBI 249X Research Review in Genetics and Development: Comparative Genomics and Computational Biology 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
The fundamental problem of comparative genomics: the determination of the origins and evolutionary history of the nucleotides in all extant genomes. My work incorporates various aspects of genomics, including the reconstruction of ancestral genomes (paleogenomics), the modeling of genome dynamics (phylogenomics and systems biology), and the assignment of function of genome elements (functional genomics and epigenomics).
Research Review in Genetics and Development: Comparative Genomics and Computational Biology: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Pachter
Research Review in Genetics and Development: Comparative Genomics and Computational Biology: Read Less [-]
MCELLBI 249Y Research Review in Genetics and Development: Mechanisms of Gene Control in Vertebrate Animals 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
This course will focus on mechanisms of gene control in vertebrate animals, particularly in the area of vertebrate development. Amphibian egg formation, mesoderm induction, neural induction, and patterning of the nervous system at the molecular level. Control of transcription, post-transcriptional control of gene expression (including control of RNA turnover and RNA localization).
Research Review in Genetics and Development: Mechanisms of Gene Control in Vertebrate Animals: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Harland
Formerly known as: 218Y
Research Review in Genetics and Development: Mechanisms of Gene Control in Vertebrate Animals: Read Less [-]

MCELLBI 249Z Research Review in Genetics and Development: Chromosome Structure and Integrity, Genome Evolution 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Use of genetic, cell biological, and biochemical approaches in budding yeast to understand genome integrity, genome evolution, and most recently desiccation tolerance.
Research Review in Genetics and Development: Chromosome Structure and Integrity, Genome Evolution: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Koshland
Research Review in Genetics and Development: Chromosome Structure and Integrity, Genome Evolution: Read Less [-]

MCELLBI 250 Advanced Immunology 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Molecular and cellular analysis of the immune response emphasizing concepts and methodology. Innate immunity, pathogen sensors, antibodies and T cell receptors, lymphocyte activation, tolerance and selection. Antigen processing, T cell subtypes, and T regulatory cells. NK cells, tumor surveillance, and AIDS.
Advanced Immunology: Read More [+]

Rules & Requirements
Prerequisites: 100, 110, 140, 150 or consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Advanced Immunology: Read Less [-]
MCELLBI 251 The Regulation of Immune System Development and Function 1 Unit
Terms offered: Spring 2020, Fall 2019, Spring 2019
This is an advanced seminar course which will consider current research questions and experimental approaches in molecular and cellular immunology. Each registrant will present a 30-minute research talk describing the problems they are studying, the approach they are taking, their preliminary data, and technical problems. Other course participants (including basic immunology faculty) will provide criticism and suggestions.

The Regulation of Immune System Development and Function: Read More [+]

Rules & Requirements

Prerequisites: 250 or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of lecture per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Winoto

The Regulation of Immune System Development and Function: Read Less [-]

MCELLBI 259A Mycobacterium Tuberculosis (Mtb) 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
The TB field has entered a new era with the convergence of genetic tools, genome sequencing, bioinformatics, advanced imaging techniques, animal models of infection, and high-throughput assays that allow us to study this multi-faceted interaction between Mtb and its host. We use all of these tools to probe the molecular and cellular events that enable M. tuberculosis to evade host defense mechanisms.

Mycobacterium Tuberculosis (Mtb): Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Cox

Mycobacterium Tuberculosis (Mtb): Read Less [-]

MCELLBI 259B Research Review in Immunology and Pathogenesis: Specificity of T Lymphocytes 2 Units
Terms offered: Spring 2019, Fall 2018, Spring 2018
Mechanisms of immune surveillance by T lymphocytes.

Research Review in Immunology and Pathogenesis: Specificity of T Lymphocytes: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Shastri

Research Review in Immunology and Pathogenesis: Specificity of T Lymphocytes: Read Less [-]

MCELLBI 259C Research Review in Immunology and Pathogenesis: Nuclear Receptor-Mediated Regulation of Neuroinflammation 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
In this course we will discuss our research as well as recent literatures focusing on understanding of 1) How is homeostasis in the CNS regulated by innate immune functions of microglia? 2) How can we intervene in dysfunction of microglia-mediated immune functions using NRs signaling and transcription?

Research Review in Immunology and Pathogenesis: Nuclear Receptor-Mediated Regulation of Neuroinflammation: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Saijo

Research Review in Immunology and Pathogenesis: Nuclear Receptor-Mediated Regulation of Neuroinflammation: Read Less [-]
MCELLBI 259D Research Review in Immunology and Pathogenesis: Mycobacterial Biology and Host-Pathogen Interactions 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
We will discuss macrophage biology and innate immunity in the context of infection with "Mycobacterium tuberculosis" through discussion of current research from the Stanley Lab and both cutting edge and classic literature in relevant fields.
Research Review in Immunology and Pathogenesis: Mycobacterial Biology and Host-Pathogen Interactions: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Stanley
Research Review in Immunology and Pathogenesis: Mycobacterial Biology and Host-Pathogen Interactions: Read Less [-]

MCELLBI 259E Research Review in Immunology and Pathogenesis: Regulation of T Cell Receptor Genes Expression 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Molecular biology of T cell receptor genes and their transcription controlling proteins/genes. Programmed cell death during thymocyte differentiation.
Research Review in Immunology and Pathogenesis: Regulation of T Cell Receptor Genes Expression: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Winoto
Research Review in Immunology and Pathogenesis: Regulation of T Cell Receptor Genes Expression: Read Less [-]

MCELLBI 259F Research Review in Immunology and Pathogenesis: Natural Killer (NK) Cell and T Cell Receptors 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Molecular and biological basis for recognition by natural killer cells and T cells.
Research Review in Immunology and Pathogenesis: Natural Killer (NK) Cell and T Cell Receptors: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Raulet
Research Review in Immunology and Pathogenesis: Natural Killer (NK) Cell and T Cell Receptors: Read Less [-]

MCELLBI 259G Research Review in Immunology and Pathogenesis: T Cell Development 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Molecular and cellular aspects of thymocyte differentiation.
Research Review in Immunology and Pathogenesis: T Cell Development: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Robey
Research Review in Immunology and Pathogenesis: T Cell Development: Read Less [-]
MCELLBI 259H Research Review in Immunology and Pathogenesis: B Cell Differentiation 2 Units
Terms offered: Fall 2019, Fall 2018, Fall 2015
Molecular basis of terminal B cell differentiation. Role of transcription factors in B cell activation.
Research Review in Immunology and Pathogenesis: B Cell Differentiation: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Rules & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Sha
Research Review in Immunology and Pathogenesis: B Cell Differentiation: Read Less [-]

MCELLBI 259J Research Review in Immunology and Pathogenesis: Immune Evasion by Viruses 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
The mechanisms used by viruses to counteract the pressure of the immune system.
Research Review in Immunology and Pathogenesis: Immune Evasion by Viruses: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Rules & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Coscoy
Research Review in Immunology and Pathogenesis: Immune Evasion by Viruses: Read Less [-]

MCELLBI 259K Research Review in Immunology and Pathogenesis: Epigenetic Control for Regulatory T Cell Function in Cancer and Autoimmunity 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Intersecting the fields of cancer biology, immunology, and epigenetics to strengthen our own immune defense mechanisms against our own cancers by reprogramming T cell function specifically within the tumor microenvironment.
Research Review in Immunology and Pathogenesis: Epigenetic Control for Regulatory T Cell Function in Cancer and Autoimmunity: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Rules & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Dupage
Research Review in Immunology and Pathogenesis: Epigenetic Control for Regulatory T Cell Function in Cancer and Autoimmunity: Read Less [-]

MCELLBI 259M Research Review in Immunology and Pathogenesis: Innate Immunity and Innate Control of Adaptive Immunity 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Innate immunity and innate control of adaptive immunity.
Research Review in Immunology and Pathogenesis: Innate Immunity and Innate Control of Adaptive Immunity: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Rules & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Barton
Research Review in Immunology and Pathogenesis: Innate Immunity and Innate Control of Adaptive Immunity: Read Less [-]
MCELLBI 259N Research Review in Immunology and Pathogenesis: Immunology, Microbiology, and Genetics of Bacterial Pathogenesis 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Role of innate host responses in defense against intracellular bacterial pathogens.
Research Review in Immunology and Pathogenesis: Immunology, Microbiology, and Genetics of Bacterial Pathogenesis: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Vance
Research Review in Immunology and Pathogenesis: Immunology, Microbiology, and Genetics of Bacterial Pathogenesis: Read Less [-]

MCELLBI C261 Cellular and Developmental Neurobiology 3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
This course covers the molecular/cellular basis of neuron excitability (membrane potentials, action potential generation and propagation, ion channels), synaptic transmission and plasticity, sensory receptor function, and developmental neurobiology.
Cellular and Developmental Neurobiology: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Also listed as: NEUROSC C261
Cellular and Developmental Neurobiology: Read Less [-]

MCELLBI C262 Circuit and Systems Neurobiology 3 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Advanced coverage of current research problems in systems-level neuroscience, and experimental and computational techniques used for these studies.
Circuit and Systems Neurobiology: Read More [+]

Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Also listed as: NEUROSC C262
Circuit and Systems Neurobiology: Read Less [-]

MCELLBI 269A Research Review in Neurobiology: Special Topics in Neuroplasticity 2 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Molecular and cellular studies of nerve growth, axon guidance, synaptic formation, and synaptic plasticity using electrophysiological and optical imaging techniques.
Research Review in Neurobiology: Special Topics in Neuroplasticity: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Poo
Research Review in Neurobiology: Special Topics in Neuroplasticity: Read Less [-]
**MCELLBI 269B Research Review in Neurobiology: Synaptic Transmission and Neuromodulation 2 Units**

Terms offered: Spring 2020, Fall 2019, Spring 2019

Review of current literature and discussion of original research. Research Review in Neurobiology: Synaptic Transmission and Neuromodulation: Read More [+]

**Rules & Requirements**

**Prerequisites:** Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

**Repeat rules:** Course may be repeated for credit without restriction.

**Hours & Format**

Fall and/or spring: 15 weeks - 2 hours of seminar per week

**Additional Details**

**Subject/Course Level:** Molecular and Cell Biology/Graduate

**Grading:** Offered for satisfactory/unsatisfactory grade only.

**Instructor:** Zucker

Research Review in Neurobiology: Synaptic Transmission and Neuromodulation: Read Less [-]

---

**MCELLBI 269C Research Review in Neurobiology: Molecular Mechanisms of Neuronal Plasticity 2 Units**

Terms offered: Spring 2020, Fall 2019, Spring 2019

Research in our laboratory focuses on understanding how neurons use biochemical pathways to integrate diverse types of information in order to adjust synaptic strength and modulate neuronal excitability, and how these interactions go awry in disease. To investigate this we are taking a multi-disciplinary approach incorporating molecular, biochemical, imaging, and electrophysiological analyses in mouse and human cells. Research Review in Neurobiology: Molecular Mechanisms of Neuronal Plasticity: Read More [+]

**Rules & Requirements**

**Prerequisites:** Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

**Repeat rules:** Course may be repeated for credit without restriction.

**Hours & Format**

Fall and/or spring: 15 weeks - 2 hours of seminar per week

**Additional Details**

**Subject/Course Level:** Molecular and Cell Biology/Graduate

**Grading:** Offered for satisfactory/unsatisfactory grade only.

**Instructor:** Bateup

Research Review in Neurobiology: Molecular Mechanisms of Neuronal Plasticity: Read Less [-]

---

**MCELLBI 269D Research Review in Neurobiology: Signaling Within and Between Neurons 2 Units**

Terms offered: Spring 2020, Fall 2019, Spring 2019

Review of recent research in molecular mechanisms involved in intracellular and extracellular signaling in the nervous system. Research Review in Neurobiology: Signaling Within and Between Neurons: Read More [+]

**Rules & Requirements**

**Prerequisites:** Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

**Repeat rules:** Course may be repeated for credit without restriction.

**Hours & Format**

Fall and/or spring: 15 weeks - 2 hours of seminar per week

**Additional Details**

**Subject/Course Level:** Molecular and Cell Biology/Graduate

**Grading:** Offered for satisfactory/unsatisfactory grade only.

**Instructor:** Kramer

Research Review in Neurobiology: Signaling Within and Between Neurons: Read Less [-]

---

**MCELLBI 269E Molecular and Biophysical Neuroscience 2 Units**

Terms offered: Spring 2020, Fall 2019, Spring 2019

Review of research in molecular and biophysical aspects of sensory transduction and electrical signaling in the nervous system. Molecular and Biophysical Neuroscience: Read More [+]

**Rules & Requirements**

**Prerequisites:** Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of the instructor

**Repeat rules:** Course may be repeated for credit without restriction.

**Hours & Format**

Fall and/or spring: 15 weeks - 2 hours of seminar per week

**Additional Details**

**Subject/Course Level:** Molecular and Cell Biology/Graduate

**Grading:** Offered for satisfactory/unsatisfactory grade only.

**Instructor:** Brohawn

Molecular and Biophysical Neuroscience: Read Less [-]
MCELLBI 269F Optogenetic Dissection of Neural Circuits 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Research review in neurobiology. Review of recent optogenetic strategies for dissecting neural connectivity, function, and dysfunction in the rodent and primate brain.
Optogenetic Dissection of Neural Circuits: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Lammel
Optogenetic Dissection of Neural Circuits: Read Less [-]

MCELLBI 269G Research Review in Development and Application of Advanced Methods for In Vivo Imaging 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Development and application of optical imaging methods for clearer, deeper, and faster imaging of biological tissue in vivo, including a critical review of the current research.
Research Review in Development and Application of Advanced Methods for In Vivo Imaging: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Ji
Research Review in Development and Application of Advanced Methods for In Vivo Imaging: Read Less [-]

MCELLBI 269I Research Review in Neurobiology: Stem Cells and Gene Therapy in the Nervous System 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
The basic investigation of neural differentiation of stem cells, as well as the use of stem cells and gene delivery for neuroregeneration.
Research Review in Neurobiology: Stem Cells and Gene Therapy in the Nervous System: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Schaffer
Research Review in Neurobiology: Stem Cells and Gene Therapy in the Nervous System: Read Less [-]

MCELLBI 269J Research Review in Neurobiology: Taste Recognition in Drosophila 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
The molecular and cellular basis of taste perception in the model organism.
Research Review in Neurobiology: Taste Recognition in Drosophila: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Scott
Research Review in Neurobiology: Taste Recognition in Drosophila: Read Less [-]
MCELLBI 269M Research Review in Neurobiology: Insect Neurophysiology 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Drosophila mutants that have behavioral abnormalities to unravel new and basic features of nervous system structure and function.
Research Review in Neurobiology: Insect Neurophysiology: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Tanouye
Research Review in Neurobiology: Insect Neurophysiology: Read Less [-]

MCELLBI 269O Research Review in Neurobiology: Neural Circuits for Sensory Processing and Behavior 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Microcircuitry of the cerebral cortex that underlies sensory processing and adaptive behavior.
Research Review in Neurobiology: Neural Circuits for Sensory Processing and Behavior: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Adesnik
Research Review in Neurobiology: Neural Circuits for Sensory Processing and Behavior: Read Less [-]

MCELLBI 269Q Research Review in Neurobiology: Sensory Processing and Plasticity in Cerebral Cortex 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
How the cerebral cortex processes sensory input and stores information about the sensory world. We focus on the rat's primary somatosensory (S1) cortex.
Research Review in Neurobiology: Sensory Processing and Plasticity in Cerebral Cortex: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Feldman
Research Review in Neurobiology: Sensory Processing and Plasticity in Cerebral Cortex: Read Less [-]

MCELLBI 269R Research Review in Neurobiology: Potassium Channels and Synaptic Plasticity 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Review of current literature and discussion of original research.
Research Review in Neurobiology: Potassium Channels and Synaptic Plasticity: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 1 hour of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Isacoff
Research Review in Neurobiology: Potassium Channels and Synaptic Plasticity: Read Less [-]
MCELLBI 269S Research Review in Neurobiology: Molecular Mechanisms of Olfaction 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Review of current literature and discussion of original research. Research Review in Neurobiology: Molecular Mechanisms of Olfaction: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Ngai

Research Review in Neurobiology: Molecular Mechanisms of Olfaction: Read Less [-]

MCELLBI 269T Research Review in Neurobiology: Processing of Visual Information in the Mammalian Brain 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Review of current literature and discussion of original research. Research Review in Neurobiology: Processing of Visual Information in the Mammalian Brain: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Dan

Research Review in Neurobiology: Processing of Visual Information in the Mammalian Brain: Read Less [-]

MCELLBI 269U Research Review in Neurobiology: Diseases/Retina 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Evaluation of current research in molecular mechanisms underlying diseases of the retina. Research Review in Neurobiology: Diseases/Retina: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Flannery

Research Review in Neurobiology: Diseases/Retina: Read Less [-]

MCELLBI 269W Research Review in Neurobiology: Neural Activity Affecting the Assembly of Neural Circuits 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
How neural activity affects the assembly of neural circuits. Research Review in Neurobiology: Neural Activity Affecting the Assembly of Neural Circuits: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Feller

Research Review in Neurobiology: Neural Activity Affecting the Assembly of Neural Circuits: Read Less [-]
MCELLBI C277 Communicating Quantitative Information 2 Units
Terms offered: Spring 2020, Spring 2019
This course will cover several aspects of communicating quantitative information, with a primary focus on visualizations for publications, presentations, and posters. Other topics include sharing of data and analyses, such as new publication models and interactive notebooks, as well as lifecycle data management and publication. Primary discussion will be on conceptual issues, and students will be expected to use various systems and resources as self-directed homework.
Communicating Quantitative Information: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 1.5 hours of seminar and 1.5 hours of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Instructor: Brenner
Also listed as: PLANTBI C277
Communicating Quantitative Information: Read Less [-]

MCELLBI 280A Selected Topics in Molecular and Cell Biology 1 Unit
Terms offered: Spring 2012, Spring 2011, Spring 2010
The course will focus on fundamental principles, essential concepts, and recent advances in select topics in molecular and cell biology. Topics include genomics and computational biology, molecular evolution, neurons and synapses, microbiology and immunology, macromolecular structure and function, and scientific writing. Courses are taught in tandem and maybe taken individually.
Selected Topics in Molecular and Cell Biology: Read More [+]

Rules & Requirements
Prerequisites: Graduate standing or consent of instructor
Repeat rules: Course may be repeated for credit when topic changes.

Hours & Format
Fall and/or spring: 5 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Selected Topics in Molecular and Cell Biology: Read Less [-]
MCELLBI 280D Selected Topics in Molecular and Cell Biology 1 Unit
Terms offered: Fall 2019, Fall 2018, Fall 2017
The course will focus on fundamental principles, essential concepts, and recent advances in select topics in molecular and cell biology. Topics include genomics and computational biology, molecular evolution, neurons and synapses, microbiology and immunology, macromolecular structure and function, and scientific writing. Courses are taught in tandem and maybe taken individually.
Selected Topics in Molecular and Cell Biology: Read More [+]
Rules & Requirements
Prerequisites: Graduate standing or consent of instructor
Repeat rules: Course may be repeated for credit when topic changes.
Hours & Format
Fall and/or spring: 5 weeks - 3 hours of lecture and 1 hour of discussion per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Selected Topics in Molecular and Cell Biology: Read Less [-]

MCELLBI 280E Selected Topics in Molecular and Cell Biology 1 Unit
Terms offered: Spring 2012, Spring 2011, Spring 2010
The course will focus on fundamental principles, essential concepts, and recent advances in select topics in molecular and cell biology. Topics include genomics and computational biology, molecular evolution, neurons and synapses, microbiology and immunology, macromolecular structure and function, and scientific writing. Courses are taught in tandem and maybe taken individually.
Selected Topics in Molecular and Cell Biology: Read More [+]
Rules & Requirements
Prerequisites: Graduate standing and consent of instructor
Repeat rules: Course may be repeated for credit when topic changes.
Hours & Format
Fall and/or spring: 5 weeks - 3 hours of lecture and 1 hour of discussion per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Selected Topics in Molecular and Cell Biology: Read Less [-]

MCELLBI 280F Selected Topics in Molecular and Cell Biology 1 Unit
Terms offered: Fall 2016, Spring 2012, Spring 2011
The course will focus on fundamental principles, essential concepts, and recent advances in select topics in molecular and cell biology. Topics include genomics and computational biology, molecular evolution, neurons and synapses, microbiology and immunology, macromolecular structure and function, and scientific writing. Courses are taught in tandem and maybe taken individually.
Selected Topics in Molecular and Cell Biology: Read More [+]
Rules & Requirements
Prerequisites: Graduate standing and consent of instructor
Repeat rules: Course may be repeated for credit when topic changes.
Hours & Format
Fall and/or spring: 5 weeks - 3 hours of lecture and 1 hour of discussion per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Selected Topics in Molecular and Cell Biology: Read Less [-]

MCELLBI 288 Data Science for Molecular and Cell Biology 2 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Data science is rapidly becoming a critical skill for molecular and cell biologists. This course provides a survey of data science concepts and methods, including practical statistical inference and modeling, data visualization and exploration, elementary machine learning, and simulation. The course is practically oriented. Diverse real-world datasets, along with simulated data, will be used to develop skills and intuition.
Selected Topics in Molecular and Cell Biology: Read More [+]
Rules & Requirements
Prerequisites: Graduate standing in the biological sciences or permission from instructors. Prior introductory exposure to programming is desired, e.g., through Data Science 8, MCB Python “boot camp,” or self taught from introductory programming tutorials. Please see http://python.berkeley.edu/resources/ for suggested resources. No prior statistics is assumed. The course is not suitable for students with advanced training in statistics or machine learning
Repeat rules: Course may be repeated for credit with instructor consent.
Hours & Format
Fall and/or spring: 15 weeks - 1.5 hours of lecture and 1.5 hours of discussion per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructors: Rokhsar, Eisen
Selected Topics in Molecular and Cell Biology: Read Less [-]
MCELLBI 290 Graduate Seminar 1 Unit
Terms offered: Spring 2020, Fall 2019, Spring 2019
Graduate student presentations on selected research topics in molecular and cell biology. Several sections covering different topics offered each semester. Concurrent enrollment in more than one section is permitted. List of topics to be announced before each semester.
Graduate Seminar: Read More [+]

Rules & Requirements
Prerequisites: Graduate standing in the department or consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1-2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.

Graduate Seminar: Read Less [-]

MCELLBI 291A Introduction to Research 2 - 12 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Closely supervised experimental work under the direction of an individual faculty member; an introduction to experimental methods and research approaches in particular areas of molecular and cell biology.
Introduction to Research: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2-12 hours of independent study per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade. This is part one of a year long series course. Upon completion, the final grade will be applied to both parts of the series.

Introduction to Research: Read Less [-]

MCELLBI 291B Introduction to Research 2 - 12 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Closely supervised experimental work under the direction of an individual faculty member; an introduction to experimental methods and research approaches in particular areas of molecular and cell biology.
Introduction to Research: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2-12 hours of independent study per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade. This is part two of a year long series course. Upon completion, the final grade will be applied to both parts of the series.

Introduction to Research: Read Less [-]

MCELLBI 292 Research 3 - 12 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Individual research under the supervision of a faculty member.
Research: Read More [+]

Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.

Research: Read Less [-]
MCELLBI N292 Research 3 - 6 Units
Terms offered: Summer 2009 10 Week Session, Summer 2008 10 Week Session, Summer 2006 10 Week Session
Individual research under the supervision of a staff member.
Research: Read More [+]

Rules & Requirements

Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Summer: 8 weeks - 3-6 hours of independent study per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Research: Read Less [-]

MCELLBI 293A Research Seminar 2 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Seminar on presentation and evaluation of results in area of student's individual research interests.
Research Seminar: Read More [+]

Rules & Requirements

Prerequisites: Concurrent enrollment in 291A or 292

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Research Seminar: Read Less [-]

MCELLBI 293C Responsible Conduct in Research 1 Unit
Terms offered: Spring 2020, Spring 2019, Spring 2018
The purpose of this course is to ensure that research trainees receive ample training in Responsible Conduct in Research. Students also gain an understanding of federal, state, and UC Berkeley policies and resources available to further support their research endeavors.
Responsible Conduct in Research: Read More [+]

Rules & Requirements

Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 1.5 hours of lecture and 1.5 hours of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Sharma
Responsible Conduct in Research: Read Less [-]

MCELLBI 293D Rigor and Reproducibility in Research 1 Unit
Terms offered: Prior to 2007
The purpose of this course is to ensure that research trainees receive training in Rigor and Reproducibility in Research. Students also gain an understanding of federal, state, and UC Berkeley policies and resources available to further support their research endeavors.
Rigor and Reproducibility in Research: Read More [+]

Rules & Requirements

Prerequisites: Consent of Instructor

Hours & Format

Fall and/or spring: 15 weeks - 1.5 hours of lecture per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Sharma
Rigor and Reproducibility in Research: Read Less [-]
MCELLBI 293R Responsible Conduct of Research Refresher 1 Unit  
Terms offered: Prior to 2007  
This refresher course will cover topics in responsible conduct in research drawing from case studies of the Association of American Medical Colleges and the NIH. Students will review case studies in preparation for class discussion. Required of all 4th year MCB graduate students funded on NIH training grants.  
Responsible Conduct of Research Refresher: Read More [+]  
Objectives & Outcomes  
Course Objectives: Collaborative research including collaborations with industry  
Data acquisition and laboratory tools; management, sharing and ownership  
Mentor/mentee responsibilities and relationships  
Policies regarding human subjects, live vertebrate animal subjects in research, and safe laboratory practices  
Research misconduct and policies for handling misconduct  
Responsible authorship and publication  
The scientist as a responsible member of society, contemporary ethical issues in biomedical research, and the environmental and societal impacts of scientific research  
Rules & Requirements  
Prerequisites: Consent of instructor. Must be a 4th year MCB graduate student  
Hours & Format  
Fall and/or spring: 15 weeks - 1 hour of seminar per week  
Additional Details  
Subject/Course Level: Molecular and Cell Biology/Graduate  
Grading: Offered for satisfactory/unsatisfactory grade only.  
Instructor: Sharma  
Responsible Conduct of Research Refresher: Read Less [-]  

MCELLBI 293S Foundations of Biostatistical Practice 1 Unit  
Terms offered: Fall 2018, Spring 2018  
This course is designed to introduce students to the foundations of statistics in the context of biological research. Rather than focusing on a catalog of specific methods (by essence non-exhaustive and rapidly outdated), the course emphasizes general concepts and approaches necessary for sound statistical practice. Topics covered include: exploratory data analysis (EDA); data visualization; inferential reasoning; models and assumptions; statistical computing; computationally reproducible research. The statistical methods and software are motivated by and illustrated on data structures that arise in current biological and medical research.  
Foundations of Biostatistical Practice: Read More [+]  
Rules & Requirements  
Prerequisites: Consent of instructor  
Hours & Format  
Fall and/or spring: 15 weeks - 1 hour of lecture and 1 hour of discussion per week  
Additional Details  
Subject/Course Level: Molecular and Cell Biology/Graduate  
Grading: Offered for satisfactory/unsatisfactory grade only.  
Foundations of Biostatistical Practice: Read Less [-]  

MCELLBI 294 Current Topics in Biomedical Sciences 1 Unit  
Terms offered: Spring 2020, Fall 2019, Spring 2019  
This course will discuss cutting-edge topics in biochemistry, structural biology, cell biology, developmental biology and genetics. Lectures will be given by internationally recognized biomedical scientists that visit the Molecular and Cell Biology Department and present work currently performed in their laboratories. The class will include topics ranging from structural analysis of important signaling molecules, live cell imaging and high resolution microscopy of critical cellular structures, to genetic dissection of essential signaling networks in cells and developmental pathways in multicellular organisms. It is the goal of this class to expose students to both the breadth and highest standards of current biomedical research.  
Current Topics in Biomedical Sciences: Read More [+]  
Rules & Requirements  
Prerequisites: Molecular and Cell Biology graduate students only  
Repeat rules: Course may be repeated for credit without restriction.  
Hours & Format  
Fall and/or spring: 15 weeks - 2 hours of lecture per week  
Additional Details  
Subject/Course Level: Molecular and Cell Biology/Graduate  
Grading: Offered for satisfactory/unsatisfactory grade only.  
Current Topics in Biomedical Sciences: Read Less [-]
MCELLBI 295 Careers for Life Sciences Ph.D’s 1 Unit
Terms offered: Spring 2020, Spring 2019, Spring 2018
This course is designed to assist graduate students in the biological sciences with planning their postgraduate careers. Weekly guest speakers will present their experiences on a variety of topics. Postdoctoral students are invited. Topics may include academia; job searches; setting up a laboratory; patent law/technology transfer; public policy/regulatory affairs; bioinformatics; science writing/technical support; forensic science; postdoctoral positions in industry; teaching, and other topics of interest.
Careers for Life Sciences Ph.D’s: Read More [+]

Rules & Requirements
Prerequisites: Open to graduate and postdoctoral students

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Careers for Life Sciences Ph.D’s: Read Less [-]

MCELLBI 296 Molecular and Cell Biology Colloquium 0.0 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Meetings for the presentation of original work by faculty, visiting lecturers, and graduate students.
Molecular and Cell Biology Colloquium: Read More [+]

Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1.5 hours of colloquium per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Molecular and Cell Biology Colloquium: Read Less [-]

MCELLBI C296 Doctoral Seminar in Computational Biology 2 Units
Terms offered: Fall 2019, Fall 2018
This one-year interactive seminar builds skills, knowledge and community in computational biology for first year PhD and second year Designated Emphasis students. Topics covered include concepts in human genetics/genomics, laboratory methodologies and data sources for computational biology, workshops/instruction on use of various bioinformatics tools, critical review of current research studies and computational methods, preparation for success in the PhD program and career development. Faculty members of the graduate program in computational biology and scientists from other institutions will participate. Topics will vary each semester.
Doctoral Seminar in Computational Biology: Read More [+]

Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Instructors: Moorjani, Rokhsar
Also listed as: CMPBIO C293
Doctoral Seminar in Computational Biology: Read Less [-]

MCELLBI 380 Teaching of Molecular and Cell Biology 1 - 2 Units
Terms offered: Spring 2016, Fall 2015, Spring 2015
Teaching laboratories and/or discussions for Molecular and Cell Biology courses: analysis of specific format and problems. Two units of credit for those with 50% teaching appointment; one unit of credit for those with 25% teaching appointment.
Teaching of Molecular and Cell Biology: Read More [+]

Rules & Requirements
Prerequisites: Appointment as graduate student instructor or consent of instructor
Repeat rules: Course may be repeated for credit up to a total of 4 units.

Hours & Format
Fall and/or spring: 15 weeks - 0-1 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Professional course for teachers or prospective teachers
Grading: Offered for satisfactory/unsatisfactory grade only.
Teaching of Molecular and Cell Biology: Read Less [-]
MCELLBI 481B Instrumentation in Molecular and Cell Biology: Transmission Electron Microscopy 1 - 4 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Individualized laboratory instruction.
Instrumentation in Molecular and Cell Biology: Transmission Electron Microscopy: Read More [+]

Rules & Requirements
Prerequisites: Graduate standing; consent of instructor and sponsorship of a faculty member

Hours & Format
Fall and/or spring: 15 weeks - 1-4 hours of independent study per week
Summer:
6 weeks - 2.5-10 hours of independent study per week
8 weeks - 2-7.5 hours of independent study per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Other professional
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructors: Dernburg, Karpen
Instrumentation in Molecular and Cell Biology: Transmission Electron Microscopy: Read Less [-]

MCELLBI 481C Instrumentation in Molecular and Cell Biology: Scanning Electron Microscopy 1 - 4 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Individualized laboratory instruction.
Instrumentation in Molecular and Cell Biology: Scanning Electron Microscopy: Read More [+]

Rules & Requirements
Prerequisites: Graduate standing; consent of instructor and sponsorship of a faculty member

Hours & Format
Fall and/or spring: 15 weeks - 1-4 hours of independent study per week
Summer:
6 weeks - 2.5-10 hours of independent study per week
8 weeks - 2-7.5 hours of independent study per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Other professional
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructors: Dernburg, Karpen
Instrumentation in Molecular and Cell Biology: Scanning Electron Microscopy: Read Less [-]

MCELLBI 601 Individual Study for Master’s Students 1 - 8 Units
Terms offered: Fall 2006, Spring 2005, Spring 2001
Individual study for the comprehensive or language examinations in consultation with the field adviser.
Individual Study for Master's Students: Read More [+]

Rules & Requirements
Credit Restrictions: Course does not satisfy unit or residence requirements for master's degree.
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1-8 hours of independent study per week
Summer: 8 weeks - 1.5-15 hours of independent study per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate examination preparation
Grading: Offered for satisfactory/unsatisfactory grade only.
Individual Study for Master's Students: Read Less [-]

MCELLBI 602 Individual Study for Doctoral Students 1 - 8 Units
Terms offered: Spring 2006, Spring 2005, Fall 2004
Individual study in consultation with the major field adviser. Intended to provide an opportunity for qualified students to prepare themselves for the various examinations required of candidates for the Ph.D.
Individual Study for Doctoral Students: Read More [+]

Rules & Requirements
Prerequisites: Restricted to Ph.D. candidates
Credit Restrictions: Course does not satisfy unit or residence requirements for doctoral degree.
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Summer:
6 weeks - 1-8 hours of independent study per week
8 weeks - 1-8 hours of independent study per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate examination preparation
Grading: Offered for satisfactory/unsatisfactory grade only.
Individual Study for Doctoral Students: Read Less [-]
