Agricultural and Resource Economics

The Department of Agricultural and Resource Economics offers programs leading to PhD degrees. Due to quota limitations, students are rarely admitted for the master’s degree, although it may be awarded to students who are pursuing work toward the PhD in our program (or in another field at Berkeley) after fulfillment of the appropriate MS requirements.

The Agricultural and Resource Economics Program is relatively flexible; however, the program stresses economic theory, quantitative methods, and two elective fields defined in consultation with the graduate adviser. Some common elective fields include development economics, natural resource or environmental economics, agricultural policy, and international markets and trade.

Admission to the University

Minimum Requirements for Admission

The following minimum requirements apply to all graduate programs and will be verified by the Graduate Division:

1. A bachelor’s degree or recognized equivalent from an accredited institution;
2. A grade point average of B or better (3.0);
3. If the applicant has completed a basic degree from a country or political entity (e.g., Quebec) where English is not the official language, adequate proficiency in English to do graduate work, as evidenced by a TOEFL score of at least 90 on the iBT test, 570 on the paper-and-pencil test, or an IELTS Band score of at least 7 on a 9-point scale (note that individual programs may set higher levels for any of these); and
4. Sufficient undergraduate training to do graduate work in the given field.

Applicants Who Already Hold a Graduate Degree

The Graduate Council views academic degrees not as vocational training certificates, but as evidence of broad training in research methods, independent study, and articulation of learning. Therefore, applicants who have already have academic graduate degrees should be able to pursue new subject matter at an advanced level without the need to enroll in a related or similar graduate program.

Programs may consider students for an additional academic master’s or professional master’s degree only if the additional degree is in a distinctly different field.

Applicants admitted to a doctoral program that requires a master’s degree to be earned at Berkeley as a prerequisite (even though the applicant already has a master’s degree from another institution in the same or a closely allied field of study) will be permitted to undertake the second master’s degree, despite the overlap in field.

The Graduate Division will admit students for a second doctoral degree only if they meet the following guidelines:

1. Applicants with doctoral degrees may be admitted for an additional doctoral degree only if that degree program is in a general area of knowledge distinctly different from the field in which they earned their original degree. For example, a physics PhD could be admitted to a doctoral degree program in music or history; however, a student with a doctoral degree in mathematics would not be permitted to add a PhD in statistics.
2. Applicants who hold the PhD degree may be admitted to a professional doctorate or professional master’s degree program if there is no duplication of training involved.

Applicants may apply only to one single degree program or one concurrent degree program per admission cycle.

Required Documents for Applications

1. Transcripts: Applicants may upload unofficial transcripts with your application for the departmental initial review. Unofficial transcripts must contain specific information including the name of the applicant, name of the school, all courses, grades, units, & degree conferral (if applicable).
2. Letters of recommendation: Applicants may request online letters of recommendation through the online application system. Hard copies of recommendation letters must be sent directly to the program, by the recommender, not the Graduate Admissions.
3. Evidence of English language proficiency: All applicants who have completed a basic degree from a country or political entity in which the official language is not English are required to submit official evidence of English language proficiency. This applies to institutions from Bangladesh, Burma, Nepal, India, Pakistan, Latin America, the Middle East, the People’s Republic of China, Taiwan, Japan, Korea, Southeast Asia, most European countries, and Quebec (Canada). However, applicants who, at the time of application, have already completed at least one year of full-time academic course work with grades of B or better at a US university may submit an official transcript from the US university to fulfill this requirement. The following courses will not fulfill this requirement:
   • courses in English as a Second Language,
   • courses conducted in a language other than English,
   • courses that will be completed after the application is submitted, and
   • courses of a non-academic nature.

Applicants who have previously applied to Berkeley must also submit new test scores that meet the current minimum requirement from one of the standardized tests. Official TOEFL score reports must be sent directly from Educational Test Services (ETS). The institution code for Berkeley is 4833 for Graduate Organizations. Official IELTS score reports must be sent electronically from the testing center to University of California, Berkeley, Graduate Division, Sproul Hall, Rm 318 MC 5900, Berkeley, CA 94720. TOEFL and IELTS score reports are only valid for two years prior to beginning the graduate program at UC Berkeley. Note: score reports can not expire before the month of June.

Where to Apply

Visit the Berkeley Graduate Division application page (http://grad.berkeley.edu/admissions/apply/).

Agricultural and Resource Economics

A,RESEC 201 Production, Industrial Organization, and Regulation in Agriculture 4 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
Basic concepts of micro and welfare economics: partial and general equilibrium. Industrial organization: monopolistic competition, vertical integration, price discrimination, and economics of information with applications to food retailing, cooperatives, fishing, and energy. Production, Industrial Organization, and Regulation in Agriculture: Read More [+]

Rules & Requirements
Prerequisites: Economics 201A or equivalent or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.

Production, Industrial Organization, and Regulation in Agriculture: Read Less [-]

A,RESEC 210 Probability and Statistics 4 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
This is an introduction to probability theory and statistical inference. It is primarily intended to prepare students for the graduate econometrics courses 212 and 213. The emphasis of the course is on the principles of statistical reasoning. Probability theory will be discussed mainly as a background for statistical theory and specific models will, for the most part, be considered only to illustrate the general statistical theory as it is developed.

Rules & Requirements
Prerequisites: Graduate standing or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 4 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.
Instructor: Mahajan

Probability and Statistics: Read Less [-]
A,RESEC 211 Mathematical Methods for Agricultural and Resource Economists 4 Units
Terms offered: Fall 2015, Fall 2014, Fall 2013
The goal of this course is to provide entering graduate students with the basic skills required to perform effectively in the graduate program and as professional economists. The lectures place heavy emphasis on intuition, graphical representations, and conceptual understanding. Weekly problem sets provide the opportunity to master mechanical skills and computational techniques. Topics covered include real analysis, linear algebra, multivariable calculus, theory of static constrained optimization, and comparative statics.
Mathematical Methods for Agricultural and Resource Economists: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 4 hours of lecture and 1 hour of discussion per week
Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.
Mathematical Methods for Agricultural and Resource Economists: Read Less [-]

A,RESEC 212 Econometrics: Multiple Equation Estimation 4 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
Introduction to the estimation and testing of economic models. Includes analysis of the general linear model, asymptotic theory, instrumental variable, and the generalized method of moments. In addition, a survey of time series, analysis, limited dependent variables. Students will use computers to conduct statistical analyses.
Econometrics: Multiple Equation Estimation: Read More [+]
Rules & Requirements
Prerequisites: 211 or consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 4 hours of lecture and 1 hour of discussion per week
Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.
Econometrics: Multiple Equation Estimation: Read Less [-]

A,RESEC 213 Applied Econometrics 4 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
Standard and advanced econometric techniques are applied to topics in agriculture and resource economics. Techniques include limited dependent variables, time series analysis, and nonparametric analysis. Students will use computers to conduct statistical analyses.
Applied Econometrics: Read More [+]
Rules & Requirements
Prerequisites: 211 and 212 or equivalent or consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week
Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.
Applied Econometrics: Read Less [-]

A,RESEC 214 New Econometric and Statistical Techniques 4 Units
Terms offered: Spring 2012, Spring 2011, Spring 2010
Theory and application of new and emerging approaches to estimation and inference. Bayesian, maximum entropy, and other new applications to economic problems will be emphasized. Students will use computers to conduct statistical analyses.
New Econometric and Statistical Techniques: Read More [+]
Rules & Requirements
Prerequisites: 211, 213 or equivalent or consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week
Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.
New Econometric and Statistical Techniques: Read Less [-]
A,RESEC 219A Econometric Project Workshop 2 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
Techniques for preparing econometric studies, including finding data sources, the reporting of results, and standards for placing research questions with existent literature. With faculty guidance, students prepare approved econometric projects, present projects to the class, provide comments on other student projects, and revise projects in response to faculty and student comments.

Econometric Project Workshop: Read More [+]

Rules & Requirements
Prerequisites: 210, 211, and 212 or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.
Instructors: Auffhammer, Sadoulet

Econometric Project Workshop: Read Less [-]

A,RESEC 219B Econometric Project Workshop 2 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
Techniques for preparing econometric studies, including finding data sources, the reporting of results, and standards for placing research questions with existent literature. With faculty guidance, students prepare approved econometric projects, present projects to the class, provide comments on other student projects, and revise projects in response to faculty and student comments.

Econometric Project Workshop: Read More [+]

Rules & Requirements
Prerequisites: 210, 211, and 212 or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.
Instructors: Auffhammer, Sadoulet

Econometric Project Workshop: Read Less [-]

A,RESEC 232 Empirical International Trade and Investment 2 Units
Terms offered: Spring 2010, Spring 2009, Spring 2007
Empirical aspects on international trade, foreign investment, and the environment. Issues related to testing various trade models. Topics include: testing trade models (HO, Ricardo, Specific Sector); gravity models; linkages between openness and growth; trade orientation and firm performance; pattern of trade; trade and the environment; labor markets and trade. New topics in international trade with empirical applications, such as trade models with heterogeneous firms, outsourcing and foreign investment.

Empirical International Trade and Investment: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 8 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.

Empirical International Trade and Investment: Read Less [-]

A,RESEC 241 Economics and Policy of Production, Technology and Risk in Agricultural and Natural Resources 3 Units
Terms offered: Fall 2022, Fall 2017, Fall 2016
This course covers alternative models of production, resource and environmental risk management; family production function; adoption and diffusion; innovation and intellectual property rights; agricultural and environmental policies and their impact on production and the environment; water resources; pest control; biotechnology; and optimal control over space and time.

Economics and Policy of Production, Technology and Risk in Agricultural and Natural Resources: Read More [+]

Rules & Requirements
Prerequisites: 201 and 202, or Economics 201A-201B, or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.

Economics and Policy of Production, Technology and Risk in Agricultural and Natural Resources: Read Less [-]
A,RESEC 242 Quantitative Policy Analysis 3 Units
Terms offered: Spring 2022, Spring 2021, Spring 2019
Production versus predatory government behavior, rent seeking, social waste, and their trade-offs with the provision of growth-promoting public goods. Three failure types are distinguished: market, government, and organizational. The roles of public versus special interests are modeled to determine degree and extent of organizational failures in collective group behavior. Alternative frameworks are used to evaluate various types of policy reform.

Rules & Requirements
Prerequisites: 211 or consent of instructor

A,RESEC C251 Microeconomics of Development 3 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
Theoretical and empirical analyses of poverty and inequality, household and community behavior, and contract and institutions in the context of developing countries.

Rules & Requirements
Prerequisites: Consent of instructor

A,RESEC C253 International Economic Development Policy 3 Units
Terms offered: Spring 2022, Fall 2020, Fall 2019, Fall 2018
This course emphasizes the development and application of policy solutions to developing-world problems related to poverty, macroeconomic policy, and environmental sustainability. Methods of statistical, economic, and policy analysis are applied to a series of case studies. The course is designed to develop practical professional skills for application in the international arena.

Rules & Requirements
Prerequisites: Consent of instructor

A,RESEC 249 Agricultural, Food, and Resource Policy Workshop 1 Unit
Terms offered: Fall 2022, Spring 2022, Fall 2021
Presentation and criticism of ongoing research by faculty, staff and students. Not necessarily offered every semester.

Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Agricultural, Food, and Resource Policy Workshop: Read More [+]

Agricultural, Food, and Resource Policy Workshop: Read Less [-]
A,RESEC 259 Rural Economic Development Workshop 1 Unit
Terms offered: Fall 2022, Spring 2022, Fall 2021
Presentation and criticism of ongoing research by faculty, staff and students. Not necessarily offered every semester.
Rural Economic Development Workshop: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Rural Economic Development Workshop: Read Less [-]

A,RESEC 261 Environmental and Resource Economics 3 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
Theory of renewable and nonrenewable natural resource use, with applications to forests, fisheries, energy, and climate change. Resources, growth, and sustainability. Economic theory of environmental policy. Externality; the Coasian critique; tax incidence and anomalies; indirect taxes; the double dividend; environmental standards; environmental regulation; impact of uncertainty on taxes and standards; mechanism design; monitoring, penalties, and regulatory strategy; emissions markets. Environmental and Resource Economics: Read More [+]
Rules & Requirements
Prerequisites: Ph.D.-level economic theory or consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.
Environmental and Resource Economics: Read Less [-]

A,RESEC 262 Non-market Valuation 3 Units
Terms offered: Spring 2014, Spring 2012, Spring 2011
The economic concept of value; historical evolution of market and non-market valuation; revealed preference methods: single site demand, multi-site demand, corner solution models, and valuation of quality changes; averting behavior; the hedonic method; contingent valuation; other stated preference methods: ranking, choice, conjoint analysis; the value of life and safety; sampling and questionnaire design for valuation surveys. Non-market Valuation: Read More [+]
Rules & Requirements
Prerequisites: Ph.D.-level economic theory or consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.
Non-market Valuation: Read Less [-]

A,RESEC 263 Dynamic Methods in Environmental and Resource Economics 3 Units
Terms offered: Spring 2018, Spring 2016, Fall 2013
This course studies methods of analysis and optimal control of dynamic systems, emphasizing applications in environmental and natural resource economics. Continuous-time deterministic models are studied using phase plane analysis, the calculus of variations, the Maximum Principle, and dynamic programming. Numerical methods are applied to discrete stochastic and deterministic dynamic models. Dynamic Methods in Environmental and Resource Economics: Read More [+]
Rules & Requirements
Prerequisites: Ph.D.-level economic theory or consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.
Dynamic Methods in Environmental and Resource Economics: Read Less [-]
A,RESEC 264 Empirical Energy and Environmental Economics 3 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
This course is designed to help prepare graduate students to conduct empirical research in energy and environmental economics. The course has two broad objectives. The first is to develop an in-depth understanding of specific empirical methods and research designs that are routinely used in the field of energy and environmental economics. The second is to familiarize students with some of the economic theories and institutions that are most relevant to empirical work in this area. Empirical Energy and Environmental Economics: Read More [+]

Rules & Requirements

Prerequisites: 212 and 213; or equivalent

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week
