**Development Engineering**

Through coursework, research mentoring, and professional development, the Designated Emphasis in Development Engineering (DE in DevEng) prepares students to develop, pilot, and evaluate technological interventions designed to improve human and economic development within complex, low-resource settings.

The DE in DevEng is an interdisciplinary training program for UC Berkeley doctoral students from any department whose dissertation research includes topics related to the application of technology to address the needs of people living in poverty. Students from all departments can apply (https://blumcenter.berkeley.edu/academics/deveng/apply/).

With initial support from USAID’s Global Development Lab (https://www.usaid.gov/GlobalDevLab/), the program builds upon ongoing research in technological innovations, human-centered design, development economics, remote sensing and monitoring, data science, and impact analysis at UC Berkeley. The program also features a National Science Foundation Traineeship for Innovations at the Nexus of Food, Energy, and Water Systems, InFEWS (https://blumcenter.berkeley.edu/academics/inews/).

DevEng students are connected to an ecosystem of researchers and practitioners at Berkeley via the Graduate Group in Development Engineering (https://blumcenter.berkeley.edu/academics/deveng/people/), and also have access to a dynamic global network.

**What is a Designated Emphasis?** A “Designated Emphasis” (DE) is a campus-wide system that provides doctoral students with certification in specialties outside their home discipline, to be added to their doctorates.

To be admitted to the Designated Emphasis in Development Engineering, an applicant must already be accepted into a PhD program at the University of California, Berkeley. Before applying for the DE, interested PhD students should arrange a consultation meeting with one of the development engineering faculty advisers. Students must apply at least one semester before their PhD qualifying examination. Admission to the Designated Emphasis in Development Engineering is determined by the development engineering faculty advisers on a rolling basis throughout the academic year.

After the initial consultation meeting, a student must submit the application by email to the Graduate Student Affairs Officer, Development Engineering Faculty Adviser, and to the Development Engineering Chair. The application must contain:

1. Application forms for Admission to the Designated Emphasis in Development Engineering.
2. Letter of intent summarizing research interests and educational or employment background in issues related to development economics or development engineering.
3. A list of courses you expect to use to satisfy the elective requirement and a timeline for completion.
4. Letter of recommendation from a member of the development engineering faculty graduate group (or the student's graduate adviser).

For the application (https://blumcenter.berkeley.edu/academics/deveng-de/apply/) and detailed information on the Development Engineering Designated Emphasis, please see its website (https://blumcenter.berkeley.edu/academics/deveng/)..

For further information regarding admission to graduate programs at UC Berkeley, please see the Graduate Division’s Admissions website (http://grad.berkeley.edu/admissions/).

* If you have applied to InFEWs, you will have submitted these documents except the timeline and courses. Please submit that within one year of the InFEWs application.

**Coursework/Curriculum**

The Designated Emphasis in Development Engineering requires a total of five courses, comprised of two core courses and three electives. Of the two core courses, Dev Eng C200/Mech Eng C200/MBA 290T must be taken prior to the qualifying examination. Electives must be selected from the areas listed below: 1) Problem Identification and Project Design, 2) Evaluation Techniques and Methods for Measuring Social Impact, and 3) Development Technologies. The three electives must span at least two areas. Of the three electives, only one can be from the student’s home department. Students are encouraged to take one elective prior to the qualifying examination, but this is not required. All course work should be taken for a letter grade. See the program website (http://deveng.berkeley.edu/) for more information.

Qualifying Examination
All students must apply and be accepted to the Designated Emphasis in Development Engineering at least one semester before their qualifying examination. At least one faculty member of Development Engineering must participate in the qualifying examination committee and will evaluate the exam from relevant perspectives. Satisfactory performance on the qualifying examination for the PhD will be judged according to the established rules in the student’s home department. Online forms must be submitted with approval from both the department and the designated emphasis, at least one month in advance of the exam. For more details, please see the website (http://deveng.berkeley.edu/#quals).

Note: If none of the faculty advisers/committee members on your qualifying exam or dissertation are in the Graduate Group in Development Engineering, consider encouraging one of them to apply for membership in the Graduate Group in Development Engineering. The faculty should contact the faculty chair (see Contact Information tab on right sidebar).

Advancing to Candidacy
Students must have a designated emphasis member on the dissertation committee as well as obtaining the approval of the designated emphasis Head Graduate Advisor at the time of applying for candidacy. The Graduate Student Affairs Officer must affirm completion of the Designated Emphasis course work on the Academic Progress Report after advancing to candidacy and prior to graduation.

Dissertation
The dissertation must contain themes relevant to the field of Development Engineering (e.g., technology for economic and social development). The student’s dissertation committee must include at least one faculty in development engineering who can evaluate the dissertation from relevant perspectives.
