Global Urban Humanities

The Global Urban Humanities Graduate Certificate provides an academic structure for the study of contemporary and historical cities using methods from the environmental design disciplines, the arts and humanities, and the interpretive social sciences. Global Urban Humanities is an emerging interdisciplinary field in which hybrid methods of investigation, including artistic and interpretive as well as analytical approaches, are applied to the study of urban form and experience.

Through a three-course series, the Certificate offers PhD and Master’s degree students the opportunity to supplement their major areas of study with courses that explore cities through a variety of disciplinary approaches. In particular, the Certificate emphasizes the intersection of interpretive approaches from the arts and humanities (including close reading, formal analysis, discourse analysis and the making of artistic work products) with methods from the environmental design disciplines (including spatial analysis, representation, and iterative design interventions as a means of research).

The Certificate Program is led by Principal Investigators Jennifer Wolch, Dean of the College of Environmental Design and Anthony J. Cascardi, Dean of Arts & Humanities Division of the College of Letters & Science.

Any UC Berkeley graduate student in good standing (GPA of 3.0 or better) may apply. To apply, students should send their Berkeley course transcript and their completed Graduate Application Form to the Global Urban Humanities Initiative. Applications are accepted twice a year during the fall and spring semesters.

Application forms and the student handbook can be found here (http://globalurbanhumanities.berkeley.edu/graduate-certificate).

There are three required courses for the Global Urban Humanities Graduate Certificate:

- a Core Seminar
- a Core Interdisciplinary Research Studio
- an Elective

Core Seminar

The Core Seminar will introduce you to theories and methods for investigating urban form and the human experience in cities through readings, discussion, written assignments, and exercises that may include ethnographic interviewing, mapping, and visual representation. You will be helping shape the emerging field of urban humanities through readings that may include authors, such as Michel de Certeau, Partha Chatterjee, Guy Debord, David Harvey, Henri Lefebvre, Kevin Lynch, Richard Sennett, and Abdoumaliq Simone. The course will be offered in Spring 2020 as The City, Arts and Public Space and will be taught by an instructor from the Arts & Humanities and an instructor from CED.

Core Interdisciplinary Research Studio

The Core Interdisciplinary Research Studio will give you an opportunity to conduct a fieldwork-based investigation of a city. The course is inspired by the tradition of studio pedagogy in architecture and urban planning and results in work products that often take the form of visual products as well as written essays. This research studio is designed to provide a unique experience that allows students without a background in design to fully participate in the studio experience along with students who do have that background. No previous design experience or ability to produce visual products is required. The course will be offered in Spring 2019 as Berlin: The Guilt Environment taught by Lauren Kroiz (History of Art) and Andrew Shanken (Architecture).

Elective Courses

The elective course is an opportunity for further exploration of topics or methods in the study of cities. For the elective requirement, you are required to take a course outside your home discipline and division. (Exceptions will be considered by petition. For the purposes of this requirement, History will be counted as a Humanities discipline even though it is in the Social Sciences Division.) You can find a list of electives here (http://globalurbanhumanities.berkeley.edu/graduate-certificate-elective-course-list). You may petition to count courses not on this list using the program’s Elective Petition Form, which can be found on this page (http://globalurbanhumanities.berkeley.edu/graduate-certificate).

Global Urban Humanities Fellowships

The Global Urban Humanities Fellowships for PhD students at UC Berkeley support research on contemporary and historical cities that engages approaches from the arts and humanities and the humanistic social sciences, and from the disciplines of architecture, landscape architecture, urban design, and urban planning. GUH Fellowships are awarded to PhD students who will have advanced to candidacy by Spring 2020. GUH Graduate Student Fellows receive up to $21,000 in a stipend, which may be used to cover fees and other expenses.

Global Urban Humanities Initiative Student Publication Grants

Global Urban Humanities Initiative Student Publication Grants support the development of innovative student publications with stipends of $5,000 per student for interdisciplinary editorial teams, plus $4,000 for production costs. Each team must include one graduate student from the College of Environmental Design and one from the Arts & Humanities Division. In the past, we have supported publications that present their material in both written and web-based formats.

Global Urban Humanities courses regularly hire graduate student instructors and researchers (GSIs and GSRe). Please visit our GUH website Opportunities (http://globalurbanhumanities.berkeley.edu/Links%20and%20Resources) page for more information.

The Global Urban Humanities Initiative will offer travel and/or course support grants and summer salary to interdisciplinary faculty teams teaching our graduate and undergraduate studios. The grantees for the undergraduate and graduate studios for 2019-2020 have already been selected. To learn more, visit the GUH website (http://globalurbanhumanities.berkeley.edu/interdisciplinary-team-teaching-opportunities).

Global Urban Humanities will also offer course enhancement grants to faculty to expand and improve Arts & Humanities, interpretive Social Sciences, and College of Environmental Design undergraduate and graduate courses. We accept applications in the spring of each year. Details are available on the GUH website (http://guide.berkeley.edu/graduate/degree-programs/global-urban-humanities/).
Intellectual Community
The Global Urban Humanities Graduate Certificate provides a unique opportunity for making connections with students from across the campus with a shared interest in global cities, including urban areas in the United States. Participation in the Certificate program makes you part of an active community of scholars, urban practitioners and artists engaged in developing new methods of research and teaching.

Global Perspective
The Certificate is based on the notion that learning occurs in many directions and that cities in the Global South are important sources of knowledge and not just objects of study. The same is true of diverse neighborhoods within global cities in North America and the Western world.

Interdisciplinary Approach
The certificate offers a framework for incorporating theories and methods for interrogating urban places from disciplines both within and outside students’ home departments. For students planning to enter the design and planning professions, the Certificate will provide an opportunity to incorporate critical approaches from the humanities in their work. For students in the humanities and social sciences, the Certificate will facilitate their participation in coursework that addresses both urban form and urban experience, and provide a chance to experience the research studio method, a pedagogy central to environmental design education.

Enhancement of Employability
For PhD students, the Certificate will demonstrate not only your knowledge of cities but your exposure to methods of experiential, project-based learning that may be valued by academic employers. GSI and GSR opportunities may give you a chance to build your pedagogy portfolio. For students in professional programs, the Certificate shows your interest in the human dimension of cities and your ability to interpret urban culture and experience through ethnography, storytelling, mapping, visual representation and other methods.
