Medical Anthropology

The Joint UCB/UCSF PhD in Medical Anthropology is one of the pioneering programs in the discipline both nationally and globally. The program provides disciplinary leadership and an outstanding and comprehensive training leading to the PhD degree. No other program offers the Joint Program's combination of excellence in critical medical anthropology; psychiatric and psychological anthropology; gender and queer theory; disability studies; health, citizenship, immigration and the global; violence in wartime and peacetime as a medical topic; studies of science, technology and modernity; intersections of medicine and social theory; and innovative ethnographic scholarship.

Topics of active research include:

- Violence and trauma
- Psychiatric and psychological anthropology, ethno psychiatry, and psychoanalysis
- Genomics and ethics
- Transplantation and organ and tissue commodification
- Citizenship, immigration, refugeeism, and the body
- Youth and child survival
- Hunger, infectious disease, development, and governmentality
- Traditional medicine and its modernity
- Sexuality, gender, and the commodity form
- Geriatrics and dementia
- Death, dying, and the politics of "bare life"
- Disability studies

The core faculty on the Berkeley side of the Joint Program form an organized research group called Critical Studies in Medicine, Science, and the Body. This group links medical anthropology, science and technology studies, postcolonial anthropology, disability studies, critical development and humanitarianism studies, psychological and psychoanalytic anthropology, and linguistic anthropology. There are eight faculty members in the group:

- Charles L. Briggs, Co-Director of Medical Anthropology, Co-chair of Berkeley Center for Social Medicine, and Program Director of Folklore
- Lawrence Cohen, Co-Director of Medical Anthropology, Director of Institute for South Asia Studies
- Cori Hayden
- Seth Holmes, Co-chair of Berkeley Center for Social Medicine, Equity Officer of Medical Anthropology, and Co-director of MD/PhD Track in Medical Anthropology (UCB and UCSF)
- Karen Nakamura, Graduate Advisor of Medical Anthropology and Director of Disability Studies Lab
- Stefania Pandolfo
- Paul Rabinow, Director of the Project on Genomics and Society
- Nancy Scheper-Hughes, Emerita, Chancellors Professor of the Graduate School, Founder of Medical Anthropology and Director of Disability Studies Lab
- Seth Holmes, Co-chair of Berkeley Center for Social Medicine, Equity Officer of Medical Anthropology, and Co-director of MD/PhD Track in Medical Anthropology (UCB and UCSF)

Together with sociocultural colleagues at Berkeley and medical anthropology colleagues at UCSF and with graduate students and postdoctoral scholars in the Joint UCB-UCSF Medical Anthropology Program and in the Department of Anthropology, these scholars have created both the most diverse and the most contemporary program in the field. Alumni from this program have moved on to leading positions across the country and the world and continue to move the field in new directions.

The expansion of traditional medical anthropology at Berkeley into Critical Studies in Medicine, Science, and the Body reflects several disciplinary breakthroughs associated with our faculty. Though variants of “medical anthropology” are almost as old as the parent discipline of anthropology, the field of Medical Anthropology emerged in post-war North America as an effort to link international public health, ethnomedicine, and allied social science in the service of the anthropology of development. The field shared both the promise and the limits of modernization theory more generally. Both the critical Marxist and symbolic/phenomenological/ interpretive challenges of the 1970s and 1980s thickened debate, along with closer links to historical analyses of the scholarly medical traditions and the development of qualitative methodologies concurrent with the expansion of NIH, NIMH, and other governmental programs of research support.

Despite the rapid growth of the field at this time, most research remained auxiliary to the categorical if not the political and economic imperatives of biomedicine. With the arrival of Nancy Scheper-Hughes, Berkeley became a leader in defining “critically interpretive medical anthropology.” Critical medical anthropology refused the theory/applied divide that characterized so many departments and programs, arguing the impossibility of separating “theoretical” debate in cultural anthropology and the human sciences on the one hand and more engaged commitment to the health and survival of communities and groups, on the other. Scheper-Hughes’s articulation of a critical anthropology of hunger as well as the violence continuum in times of war and of peace offer powerful examples of the change in the field she was instrumental in creating.

The rise of this movement at Berkeley led to a period in the late 1980s and early 1990s with two dominant programs in graduate training, critical medical anthropology in the Joint Program at Berkeley and UCSF and interpretive medical anthropology at Harvard. Lawrence Cohen came from Harvard in 1992 to join Scheper-Hughes. Their teaching and joint research produced a critical and ongoing conversation bringing together the leading formations in the field. Cohen has worked to link debates between critical, interpretive, and biocultural medical anthropologies to broader theoretical questions of materialization that have emerged in feminist and queer scholarship. Cohen has worked at this intersection on diverse topics, including aging, organ transplant and donation, gender and bodies.

The rapid growth of science studies and the increasing centrality of both science and the body to contemporary debate in the academy posed new challenges to medical anthropology. Paul Rabinow has studied the new genomics intensively, leading to multiple books and to the development of what he has termed an anthropology of reason. Against too-easy criticism of scientific and medical practice that did not question what Michel Foucault called the “speaker’s benefit” of the critic, Rabinow offered a method and a form of analysis that offered a way out of the endless battles of the “Culture Wars.” Berkeley anthropology emerged as the most powerful alternative to the dominant approaches to the sociology of science and science studies. From the mid-1990s and on, these two streams of medical anthropology and the anthropology of reason have been in closer and sharper interaction. Far from pushing
students towards either pole, the debate constituted a space for encouraging students to link critical, interpretive, and genealogic analysis.

In a world of linking new genomics, bioinformatics, and pharmacotherapy to corporate medicine and public-private hybrid structures internationally, “bioethics” has become ever more ubiquitous and empty a critical practice. The question of ethics and more generally of human and non-human futures links the current work of Cohen, Rabinow, Schepers-Hughes, and Hayden. Cori Hayden (former Director and current core faculty member of the Center for Science, Technology, Medicine and Society), along with colleagues at Berkeley and UCSF, has continued to develop new approaches to the social studies of science, including bioethics. Her work on global and Latin American pharmaceutical politics, intellectual property, and the ethics of clinical trials has led to new understandings of privatization and “public-ization,” the “popular” and populism, and relationships between distinction and copying.

To the question of ethics and to the related investigation of trauma, loss, and healing, Stefania Pandolfo brings a rigorous anthropological conversation incorporating contemporary philosophy, psychology, psychoanalysis and her field research in a Moroccan psychiatric hospital. Pandolfo’s work provides a bridge allowing for analysis linking medical anthropology and recent social theories of language, melancholy, and the body. Pandolfo has offered extensive training to graduate students in the anthropology of psychology, psychiatry, and medicine, linking a reexamination of existential psychiatry and a close engagement with the work of scholars from Benjamin and Blanchot to Freud, Lacan, and Binswanger to both Mahgrebi and European clinical and theoretical work.

The strong center of gravity in psychological and psychiatric anthropology is expanded by the work of Schepers-Hughes on emotions and critical psychiatry as well as of Karen Nakamura on mental illness and related social movements. Nakamura’s work has served as a nexus for gender and queer theory, psychological anthropology, and disability studies at Berkeley. Along with others in the Haas Institute for a Fair and Inclusive Society’s Disability Studies Cluster, she has helped build one of the world’s most active, engaged and diverse networks for disabilities studies.

By tracing genealogies of the unexamined imbrication of theories of language, knowledge, performativity, and representation with research on biomedicine, public health, and traditional medicine, the Joint UCB-UCSF Medical Anthropology Program enables students to critically synthesize linguistic and critical medical anthropology in such a way as to transform both realms of anthropological inquiry. Charles L. Briggs has explored these connections through research on narrative and statistical representations of epidemic disease in Latin America; urban violence and its problematic representations; and a five-country study of how understandings of health, disease, citizenship, and the state are profoundly shaped by media coverage of health, all in collaboration with Clara Mantini-Briggs.

In addition, Charles L. Briggs and Clara Mantini-Briggs study challenges to neoliberal health policies and new understandings of health, citizenship, and the state emerging from revolutionary healthcare in Venezuela. Also at the intersection of health and citizenship, Seth Holmes studies labor, health, and health care in the context of transnational migration and food systems. Against this background, he has explored the ways in which perceptions of race, class, and citizenship play into (and, at times, challenge and resist) the naturalization and normalization of social and health inequalities. Holmes also studies the ways in which health professionals come to understand and respond to social difference and the ways race and racialization function differently in the lives of indigenous Mexican immigrant youth depending on spatial and social context.

Other Berkeley anthropology faculty bring important resources to graduate student training in the critical analysis of medicine, science, and psychiatry. Laura Nader was instrumental in helping to define the field and remains a leading scholar of medicine and the state. Stanley Brandes has studied many topics of relevance to the field, including alcohol and culture and questions of death and the body. Aihwa Ong helped define the field of global anthropology and continues to work on biotechnology in various sites in North America, Southeast Asia, and China. Mariane Ferme has analyzed and written on global health and development, including epidemics, outbreaks and their responses.

Our program is deepened by strong relationships with colleagues asking related questions across the Berkeley campus in units including History, English, Political Science, Sociology, City and Regional Planning, Comparative Literature, Gender and Women Studies, Critical Theory, Public Health and beyond. In addition, our colleagues on the UCSF side of the Joint Program contribute cutting-edge anthropological work on global health, humanitarianism, critical studies of racialization, metrics in the health sciences, urban health, social studies of science and genetics, gender and health, aging and death, dental health, ethics of research and care, and medical history. The breadth and depth of our core faculty at Berkeley, our links with colleagues across the Berkeley campus, and our close educational and research collaboration with faculty on the UCSF side of the Joint Program make this one of the broadest and most dynamic contexts for medical anthropology in the country and the world.

Admission to the University

Minimum Requirements for Admission

The following minimum requirements apply to all graduate programs and will be verified by the Graduate Division:

1. A bachelor’s degree or recognized equivalent from an accredited institution;
2. A grade point average of B or better (3.0);
3. If the applicant comes from a country or political entity (e.g., Quebec) where English is not the official language, adequate proficiency in English to do graduate work, as evidenced by a TOEFL score of at least 90 on the iBT test, 570 on the paper-and-pencil test, or an IELTS Band score of at least 7 on a 9-point scale (note that individual programs may set higher levels for any of these); and
4. Sufficient undergraduate training to do graduate work in the given field.

Applicants Who Already Hold a Graduate Degree

The Graduate Council views academic degrees not as vocational training certificates, but as evidence of broad training in research methods, independent study, and articulation of learning. Therefore, applicants who already have academic graduate degrees should be able to pursue new subject matter at an advanced level without need to enroll in a related or similar graduate program.

Programs may consider students for an additional academic master’s or professional master’s degree only if the additional degree is in a distinctly different field.

Applicants admitted to a doctoral program that requires a master’s degree to be earned at Berkeley as a prerequisite (even though the applicant already has a master’s degree from another institution in the same or
a closely allied field of study) will be permitted to undertake the second master's degree, despite the overlap in field.

The Graduate Division will admit students for a second doctoral degree only if they meet the following guidelines:

1. Applicants with doctoral degrees may be admitted for an additional doctoral degree only if that degree program is in a general area of knowledge distinctly different from the field in which they earned their original degree. For example, a physics PhD could be admitted to a doctoral degree program in music or history; however, a student with a doctoral degree in mathematics would not be permitted to add a PhD in statistics.

2. Applicants who hold the PhD degree may be admitted to a professional doctorate or professional master’s degree program if there is no duplication of training involved.

Applicants may apply only to one single degree program or one concurrent degree program per admission cycle.

Required Documents for Applications

1. Transcripts: Applicants may upload unofficial transcripts with your application for the departmental initial review. If the applicant is admitted, then official transcripts of all college-level work will be required. Official transcripts must be in sealed envelopes as issued by the school(s) attended. If you have attended Berkeley, upload your unofficial transcript with your application for the departmental initial review. If you are admitted, an official transcript with evidence of degree conferral will not be required.

2. Letters of recommendation: Applicants may request online letters of recommendation through the online application system. Hard copies of recommendation letters must be sent directly to the program, not the Graduate Division.

3. Evidence of English language proficiency: All applicants from countries or political entities in which the official language is not English are required to submit official evidence of English language proficiency. This applies to applicants from Bangladesh, Burma, Nepal, India, Pakistan, Latin America, the Middle East, the People’s Republic of China, Taiwan, Japan, Korea, Southeast Asia, most European countries, and Quebec (Canada). However, applicants who, at the time of application, have already completed at least one year of full-time academic course work with grades of B or better at a US university may submit an official transcript from the US university to fulfill this requirement. The following courses will not fulfill this requirement:
   • courses in English as a Second Language,
   • courses conducted in a language other than English,
   • courses that will be completed after the application is submitted, and
   • courses of a non-academic nature.

If applicants have previously been denied admission to Berkeley on the basis of their English language proficiency, they must submit new test scores that meet the current minimum from one of the standardized tests. Official TOEFL score reports must be sent directly from Educational Test Services (ETS). The institution code for Berkeley is 4833. Official IELTS score reports must be mailed directly to our office from British Council. TOEFL and IELTS score reports are only valid for two years.

Where to Apply
Visit the Berkeley Graduate Division application page (http://grad.berkeley.edu/admissions/apply).

Admission to the Program
The Department of Anthropology at Berkeley, and the Graduate Group in Anthropology at the University of California at San Francisco, currently offer a joint PhD in medical anthropology. Students may apply to enter the program through either the Berkeley or the San Francisco campus but not to both. The point of entry determines the student’s home base during the program. Financial aid, primary advising, and other routine services are provided by the campus through which the student enters the program. All students, however, benefit by taking required coursework on both campuses and by the participation of the faculty on both sides of the program on all qualifying examinations and on the doctoral dissertation committees. The degree is the same and bears the name of both campuses.

Applications to all graduate programs are considered once each year for admission the following fall semester. The application period opens in early September, and the deadline for receipt of both department and Graduate Division applications is December 1. Applications are screened by the anthropology faculty, and selections are made on the basis of academic excellence, letters of recommendation, GRE scores, relevant experience, and a strong statement of intellectual and professional purpose.

The minimum requirement for admission to the Berkeley doctoral program in anthropology and in medical anthropology is a BA. The UCSF program in medical anthropology requires a master’s degree in anthropology or a related discipline, or a postbaccalaureate professional degree.

Normative Time Requirements

Normative Time to Advancement
Normative time to advancement is three years of coursework.

Normative Time in Candidacy
Normative time in candidacy is one to two years of dissertation research, and one to two years of writing the dissertation.

Total Normative Time
Total normative time is 6 years.

Time to Advancement

Select one of the following:

- ANTHRO 211 (UCSF)
- ANTHRO 219 Topics in Medical Anthropology [4] (UCB)
- ANTHRO electives per approved study list

Foreign Language(s)
In addition to English, the program requires at least one other language. This language may be a language of international scholarship, a literary
language, or a field language. The required language must be directly relevant to the research.

**Field Papers**

Students will write two field statements on topics in medical anthropology (for example, comparative medical systems, the anthropology of the body, reproduction, psychiatry and anthropology, political economy of health, science and biotechnology, or shamanism). The third field statement is usually on the student's chosen ethnographic/geographical area (for example, Latin American peasants, urban India, or post-colonial southern Africa). Each field statement is prepared with a faculty sponsor. Medical anthropology students usually work with three professors from the Anthropology Department. Field statements should not exceed 20 pages, excluding the bibliography.

**Prospectus**

The dissertation prospectus is the intellectual justification and research plan for the dissertation. Medical Anthropology students must get their prospectus signed by all three dissertation committee members and file it at the end of their third year, either before or after the PhD oral qualifying examination. There is no designated length for a medical dissertation prospectus, but the average proposal should be about 10-12 pages plus bibliography.

**Time in Candidacy**

**Advancement**

When the student has passed the oral qualifying examination, submitted his or her dissertation prospectus, proposed his or her dissertation committee (see Dissertation Committee below) he or she may be advanced to candidacy for the PhD by the dean of the Graduate Division.

**Dissertation**

This committee typically consists of four professors: the student's adviser as the committee chair, an inside member from the UCB Anthropology Department, an inside member from the Medical Anthropology program at UCSF, and an outside member from another department at UCB. The dissertation committee chair and the outside member must be members of the UCB Academic Senate.

**Required Professional Development**

**Teaching**

Graduate students are encouraged to serve at least two semesters as a graduate student instructor (GSI) in the course of earning the PhD. The department believes it is training its students to be college and university professors with a high regard for excellence in teaching as well as research. GSI-ships in Anthropology are awarded to students at least once in their careers as graduate students and students are also encouraged to apply to other departments on campus.

ANTHRO 210 Special Topics in Physical Anthropology 4 Units
Terms offered: Fall 2014, Fall 2012, Spring 2012
Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Anthropology/Graduate
Grading: Letter grade.

ANTHRO 217 Discourse and of the Body 4 Units
Terms offered: Spring 2019, Spring 2018, Spring 2016
This course juxtaposes discourse analysis and approaches to health and biomedicine, querying how ideologies of language and communication provide implicit foundations for work on health, disease, medicine, and the body and how biopolitical discourses and practices inform constructions of discourse.
Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar per week
Additional Details
Subject/Course Level: Anthropology/Graduate
Grading: Letter grade.
Instructor: Briggs

ANTHRO 219 Topics in Medical Anthropology 4 Units
Terms offered: Fall 2018, Fall 2014, Spring 2014
Comparative study of mental illness and socially generated disease: psychiatric treatment, practitioners, and institutions.
Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Anthropology/Graduate
Grading: Letter grade.

ANTHRO 240A Fundamentals of Anthropological Theory 5 Units
Terms offered: Fall 2018, Fall 2017, Fall 2016
Anthropological theory and practice--following the rest of the world--have been undergoing important restructuring in the past decade. The course is organized to reflect this fact. We will begin by looking at recent debates about the nature and purpose of anthropology. This will provide a starting point for reading a series of classic ethnographies in new ways as well as examining some dimensions of the current research agenda in cultural anthropology.
Rules & Requirements
Prerequisites: Enrollment is strictly limited to and required of all anthropology and medical anthropology graduate students who have not been advanced to candidacy
Hours & Format
Fall and/or spring: 15 weeks - 4-6 hours of seminar per week
Additional Details
Subject/Course Level: Anthropology/Graduate
Grading: Letter grade.
Instructor: Required of all graduate students in social/cultural anthropology.

ANTHRO C254 Topics in Science and Technology Studies 3 Units
Terms offered: Fall 2018, Fall 2017, Fall 2016, Fall 2014, Fall 2013
This course provides a strong foundation for graduate work in STS, a multidisciplinary field with a signature capacity to rethink the relationship among science, technology, and political and social life. From climate change to population genomics, access to medicines and the impact of new media, the problems of our time are simultaneously scientific and social, technological and political, ethical and economic.

ANTHRO C261 Theories of Narrative 4 Units
Terms offered: Spring 2011, Summer 2006 10 Week Session, Spring 2006
This course examines a broad range of theories that elucidate the formal, structural, and contextual properties of narratives in relation to gestures, the body, and emotion; imagination and fantasy; memory and the senses; space and time. It focuses on narratives at work, on the move, in action as they emerge from the matrix of the everyday preeminently, storytelling in conversation--as key to folk genres--the folktale, the legend, the epic, the myth.

ANTHRO C262A Theories of Traditionality and Modernity 4 Units
Terms offered: Fall 2018, Fall 2017, Fall 2016
This seminar explores the emergence of notions of tradition and modernity and their reproduction in Eurocentric epistemologies and political formations. It uses work by such authors as Anderson, Butler, Chakrabarty, Clifford, Derrida, Foucault, Latour, Mignolo, Pateman, and Poovey to critically reread foundational works published between the 17th century and the present--along with philosophical texts with which they are in dialogue--in terms of how they are imbricated within and help produce traditionalities and modernities.

Theories of Traditionality and Modernity: Read More [+]

Rules & Requirements
