Philosophy

The Graduate Program in Philosophy at Berkeley offers a first-rate faculty, a stimulating and friendly community of graduate students, and the resources of one of the world's finest research universities.

Two features distinguish our profile from that of other leading graduate programs in philosophy:

1. The department has strengths in all the main areas of philosophy, including epistemology, philosophy of mind, metaphysics, philosophy of language, logic, ethics, the history of philosophy, and philosophy of science. We aim at diversity and breadth of coverage, rather than concentration on one or two areas of philosophical activity.
2. Second, the program at Berkeley is structured to give students a high degree of independence in tailoring their studies to their interests.

Those wishing to pursue graduate studies in philosophy can choose among several routes to a PhD at Berkeley:

1. The Philosophy Department's graduate program leads to a PhD in Philosophy.
2. Students with strong interests in Ancient Philosophy may want to take advantage of a special ancient concentration within the philosophy program.
3. Students with strong interests in the History and Philosophy of Science may want to explore the special HPS concentration within the philosophy program.
4. Students with strong interests in formal logic may pursue them in the Philosophy Department, in the Mathematics Department (http://guide.berkeley.edu/graduate/degree-programs/mathematics), or in Berkeley's interdisciplinary program leading to a PhD in Logic and the Methodology of Science (http://guide.berkeley.edu/graduate/degree-programs/logic-methodology-science), to which the Philosophy Department has close ties.

Admission to the University

Minimum Requirements for Admission

The following minimum requirements apply to all graduate programs and will be verified by the Graduate Division:

1. A bachelor's degree or recognized equivalent from an accredited institution;
2. A grade point average of B or better (3.0);
3. If the applicant comes from a country or political entity (e.g., Quebec) where English is not the official language, adequate proficiency in English to do graduate work, as evidenced by a TOEFL score of at least 90 on the iBT test, 570 on the paper-and-pencil test, or an IELTS Band score of at least 7 on a 9-point scale (note that individual programs may set higher levels for any of these); and
4. Sufficient undergraduate training to do graduate work in the given field.

Applicants Who Already Hold a Graduate Degree

The Graduate Council views academic degrees not as vocational training certificates, but as evidence of broad training in research methods, independent study, and articulation of learning. Therefore, applicants who already have academic graduate degrees should be able to pursue new subject matter at an advanced level without need to enroll in a related or similar graduate program.

Programs may consider students for an additional academic master's or professional master's degree only if the additional degree is in a distinctly different field.

Applicants admitted to a doctoral program that requires a master's degree to be earned at Berkeley as a prerequisite (even though the applicant already has a master's degree from another institution in the same or a closely allied field of study) will be permitted to undertake the second master's degree, despite the overlap in field.

The Graduate Division will admit students for a second doctoral degree only if they meet the following guidelines:

1. Applicants with doctoral degrees may be admitted for an additional doctoral degree only if that degree program is in a general area of knowledge distinctly different from the field in which they earned their original degree. For example, a physics PhD could be admitted to a doctoral degree program in music or history; however, a student with a doctoral degree in mathematics would not be permitted to add a PhD in statistics.
2. Applicants who hold the PhD degree may be admitted to a professional doctorate or professional master's degree program if there is no duplication of training involved.

Applicants may apply only to one single degree program or one concurrent degree program per admission cycle.

Required Documents for Applications

1. Transcripts: Applicants may upload unofficial transcripts with your application for the departmental initial review. If the applicant is admitted, then official transcripts of all college-level work will be required. Official transcripts must be in sealed envelopes as issued by the school(s) attended. If you have attended Berkeley, upload your unofficial transcript with your application for the departmental initial review. If you are admitted, an official transcript with evidence of degree conferral will not be required.
2. Letters of recommendation: Applicants may request online letters of recommendation through the online application system. Hard copies of recommendation letters must be sent directly to the program, not the Graduate Division.
3. Evidence of English language proficiency: All applicants from countries or political entities in which the official language is not English are required to submit official evidence of English language proficiency. This applies to applicants from Bangladesh, Burma, Nepal, India, Pakistan, Latin America, the Middle East, the People's Republic of China, Taiwan, Japan, Korea, Southeast Asia, most European countries, and Quebec (Canada). However, applicants who, at the time of application, have already completed at least one year of full-time academic course work with grades of B or better at a US university may submit an official transcript from the US university to fulfill this requirement. The following courses will not fulfill this requirement:
   - courses in English as a Second Language,
   - courses conducted in a language other than English,
   - courses that will be completed after the application is submitted, and
   - courses of a non-academic nature.
If applicants have previously been denied admission to Berkeley on the basis of their English language proficiency, they must submit new test scores that meet the current minimum from one of the standardized tests. Official TOEFL score reports must be sent directly from Educational Test Services (ETS). The institution code for Berkeley is 4833. Official IELTS score reports must be mailed directly to our office from British Council. TOEFL and IELTS score reports are only valid for two years.

Where to Apply
Visit the Berkeley Graduate Division application page (http://grad.berkeley.edu/admissions/apply).

Admission to the Program
In reviewing applications, the admissions and fellowships committee looks for evidence that applicants have the training and intellectual characteristics they will need for success in a rigorous graduate program such as ours. Candidates for admission are not required to have majored in philosophy, but applicants who have not taken a considerable number of courses in the subject are unlikely to be admitted. The intellectual characteristics that the committee looks for include the ability to write clear and well organized argumentative prose, the ability to discriminate between promising and unpromising lines of inquiry, the capacity to develop independent arguments and insights, and a nuanced appreciation of philosophical problems and issues.

A complete online application would contain the following:

1. Transcripts for all your undergraduate and graduate study
2. Three letters of recommendation from those familiar with your philosophical work
3. A representative sample of your best written work in philosophy (no more than 20 pages)
4. Your results from the Graduate Record Examination (The Advanced Philosophy test is not required)
5. A personal history statement
6. A statement of purpose (applicants who wish to be considered for the philosophy of action concentration in Ancient Philosophy (https://philosophy.berkeley.edu/graduate/ancient) or History and Philosophy of Science (https://philosophy.berkeley.edu/graduate/hps) should indicate this in their statement of purpose)

Normative Time to Advancement
Total normative time to advancement is two to three years.

During the first stage of their graduate education, students meet the department’s course distribution requirements and prepare to take the qualifying examination. This examination assesses the student’s strengths in areas chosen by the student in consultation with supervising faculty.

Total Normative Time
Total normative time is six years.

Curriculum
Philosophy General Concentration
During the first stage of the program, students are expected to acquire a broad background in philosophy and develop their philosophical abilities by fulfilling the following requirements:

Course Distribution Requirement
Before taking the qualifying exam the student must complete eight courses at the 100- or 200-level completed with a grade of A- or higher. At least four of the eight courses must be graduate seminars. The eight courses must satisfy the following distribution requirements:

Two of the eight courses must be in the history of philosophy: one in ancient philosophy and one in modern philosophy. The courses may be on any individual philosopher or group of philosophers drawn from the following lists:

- Ancient: Plato, Aristotle
- Modern: Descartes, Hobbes, Locke, Berkeley, Hume, Spinoza, Leibniz, and Kant

Four of the eight courses must be in the following areas, with at least one course from each area:

- Area 1: Philosophical logic, philosophy of language, philosophy of science, and philosophy of mathematics
- Area 2: Metaphysics, epistemology, philosophy of mind, and philosophy of action
- Area 3: Ethics, political, social and legal philosophy, and aesthetics

A seventh course may be any philosophy course in the 100 or 200 series except for 100, 195-199, 200, 250, 251 and 299.

An eighth course may be either any philosophy course as specified above or a course from another department which has been approved by the graduate adviser.

In exceptional cases, students may, at the discretion of the graduate adviser, meet one distribution requirement by presenting work done as a graduate student elsewhere: typically a graduate thesis or work done in a graduate-level course. Meeting a distribution requirement in this way will not count as meeting any part of the four-seminar requirement.

Ancient Philosophy, Joint Program
This program is offered jointly by the Departments of Philosophy and Classics (http://classes.berkeley.edu). It is administered by an interdepartmental committee. It is designed to produce scholars with a broad range of expertise both in philosophy and classics, with the intention of bridging the gap between the two subjects. It provides the
Qualifying Exams

Students should aim to take the qualifying examination by the end of the fifth enrolled semester, and they must take it by the end of the sixth enrolled semester.

In order to take the examination the student must have fulfilled the department’s course requirements and must have passed the language requirement.

Prospectus Stage

In the semester after passing the qualifying examination the student must take two PHILOS 299 individual study courses of 4 units each with the two inside members of his or her dissertation committee for the purpose of preparing a dissertation prospectus.

The dissertation prospectus should be submitted both to the inside members of the committee and to the graduate adviser by the end of that semester. It should consist of about fifteen pages and outline plans for the dissertation. Alternatively, the prospectus may consist of parts of a possible chapter of the dissertation together with a short sketch of the dissertation project.

Following submission of the prospectus, the candidate will meet with the inside members of the committee for an informal discussion of the candidate’s proposed research.

Additional Requirements

Teaching

Each student pursuing the PhD degree is expected to serve as a graduate student instructor for at least two semesters. In the first semester as a GSI, students must complete either PHILOS 375 (Graduate Student Instructor Teaching Seminar) or a 300-level course with another department. Other requirements for first-year GSIs are available on the GSI Teaching & Resource Center (http://gsi.berkeley.edu).

Dissertation Seminar

Students in the first two years after declaring candidacy must register for PHILOS 295 (Dissertation Seminar) for at least one semester each year, during which they must present a piece of work in progress, and are expected to attend the seminar all year. The seminar meets every other week. All students working on dissertations are encouraged to attend the seminar.
