Environmental Science, Policy and Management

Overview

The Environmental Science, Policy, and Management (ESPM) Graduate Program provides a wealth of opportunities for students interested in careers in academia, government, and non-governmental agencies worldwide. Our faculty are internationally recognized, and ESPM is the campus hub for connections to other renowned Berkeley programs in the environment such as the Energy and Resources Group, Agricultural and Resource Economics, Goldman School of Public Policy, Integrative Biology, Berkeley Natural History Museums, and Berkeley Law. The Berkeley campus maintains close ties to world-class research facilities at the Lawrence Berkeley National Laboratory, U.S. Geological Survey, California Academy of Sciences, Stanford University, and many other institutions. Students admitted to our program work with their research mentor to select courses, individualize their training, and conduct research projects that meet their interests and goals. Our core graduate courses provide an introduction to the wide breadth and deep expertise of research on the environment within our department and help students apply for funding opportunities early in their graduate program.

The PhD program is the main graduate program in ESPM for students entering with or without previous masters degrees, though we also offer limited numbers of MS degrees in our specialized Master of Range Management and Master of Forestry programs. The goal of the program is to provide both a strong disciplinary education and broadly based experience in cross-disciplinary communication and problem solving. To achieve this, the program leading to the PhD in environmental science, policy, and management requires that students complete three core courses and take additional coursework in the following three areas: area of specialization, research skills, and experiential breadth.

Disciplinary Emphasis

The disciplinary emphasis is the broadest academic area encompassing the student's interests. The three disciplinary emphases within the department are Ecosystem Sciences, Organisms & Environment, and Society & Environment. A student pursuing a strongly interdisciplinary program may study more than one of these disciplines in depth. Specific coursework within each field will be chosen by the guiding committee in consultation with the student and approved by the graduate mentor.

Area of Specialization

The area of specialization is a narrower field within the context of the disciplinary emphasis. Some examples of these areas are microbial community ecology, ecosystem function, arthropod population and community ecology, biological control of arthropods, arthropod biodiversity science, American environmental history and policy, international forest management, biogeochemistry, Mediterranean grassland ecosystems, remote sensing, and forest management, to name a few.

Application

Prospective graduate students are encouraged to contact a potential PhD mentor directly prior to the application deadline. If possible, prospective graduate students should plan to visit the campus, department, and graduate program. As part of their application, each student will be asked to identify one of the three disciplinary emphases (ecosystem sciences, organisms & environment, and society & environment) most closely associated with her/his interests. If you have questions about which emphasis to choose, please ask your prospective mentor. It is not uncommon for students in ESPM to be co-mentored by two professors, often with different disciplinary emphases. The area of specialization is determined after entry into the program, in consultation with the guiding committee and PhD mentor.

Environmental Science, Policy and Management

ESPM 2 The Biosphere 3 Units

Terms offered: Fall 2021, Fall 2020, Fall 2019

An introduction to the unifying principles and fundamental concepts underlying our scientific understanding of the biosphere. Topics covered include the physical life support system on earth; nutrient cycles and factors regulating the chemical composition of water, air, and soil; the architecture and physiology of life; population biology and community ecology; human dependence on the biosphere; and the magnitude and consequences of human interventions in the biosphere.

The Biosphere: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

The Biosphere: Read Less [-]
ESPM 5 FROM FARM TO TABLE: FOOD SYSTEMS IN A CHANGING WORLD 4 Units
Terms offered: Summer 2021 Second 6 Week Session, Summer 2020 Second 6 Week Session, Summer 2019 Second 6 Week Session
This course explores the journey of the U.S. food supply from the farm to the family table. The ecology, management, and politics of farming under a global change scenario, the impact of our changing patterns of demand on food processing and retail, the opportunities and costs of exports, and the way different groups access, use, and consume food.

FROM FARM TO TABLE: FOOD SYSTEMS IN A CHANGING WORLD: Read More [+]

Hours & Format
Summer: 6 weeks - 7.5 hours of lecture and 2.5 hours of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Huntingter, Iles, DeMaster
FROM FARM TO TABLE: FOOD SYSTEMS IN A CHANGING WORLD: Read Less [-]

ESPM 6 Environmental Biology 3 Units
Terms offered: Fall 2021, Fall 2020, Fall 2019
Basic biological and ecological principles discussed in relation to environmental disruptions. Human interactions with the environment; their meaning for animals and plants. Discussion of basic ecological processes as a basis for understanding environmental problems and formulating strategies for their solution.

Environmental Biology: Read More [+]

Rules & Requirements
Prerequisites: One course in introductory college biology is recommended. Intended for nonscience majors

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Chapela
Environmental Biology: Read Less [-]

ESPM 9 Environmental Science Case Study Seminar 3 Units
Terms offered: Spring 2012, Spring 2011, Spring 2010
Utilizing a field intensive seminar format, the course will introduce lower division students to the process of addressing real environmental problems. Through a progression of case studies, students will explore a spectrum of research design and implementation approaches. By the end of the semester, they will be able to frame a researchable question, design a protocol for gathering relevant information, analyze the information, and derive an objective conclusion. Throughout the semester, students will present case study results in oral and written form.

Environmental Science Case Study Seminar: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Fairfax, Spencer
Environmental Science Case Study Seminar: Read Less [-]

ESPM C10 Environmental Issues 4 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
Relationship between human society and the natural environment; case studies of ecosystem maintenance and disruption. Issues of economic development, population, energy, resources, technology, and alternative systems.

Environmental Issues: Read More [+]

Rules & Requirements
Credit Restrictions: Students will receive no credit for C10 after taking 10.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Welter
Also listed as: L & S C30V
Environmental Issues: Read Less [-]
ESPM C11 Americans and the Global Forest 4 Units
Terms offered: Spring 2017, Spring 2015, Spring 2014
This course challenges students to think about how individual and American consumer decisions affect forest ecosystems around the world. A survey course that highlights the consequences of different ways of thinking about the forest as a global ecosystem and as a source of goods like trees, water, wildlife, food, jobs, and services. The scientific tools and concepts that have guided management of the forest for the last 100 years, and the laws, rules, and informal institutions that have shaped use of the forests, are analyzed.

Americans and the Global Forest: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Also listed as: L & S C30U

ESPM C22AC Fire: Past, Present and Future Interactions with the People and Ecosystems of California 4 Units
Terms offered: Fall 2021, Fall 2020, Fall 2019
The course presents a diachronic perspective on human-fire interactions with local ecosystems in California that spans over 10,000 years. The course will provide an historical perspective on human-fire interactions at the landscape scale using a diverse range of data sources drawn from the fields of fire ecology, biology, history, anthropology, and archaeology. An important component includes examining how diverse cultures and ethnicity influenced how people perceived and used fire at the landscape scale in ancient, historical and modern times. The implications of these diverse fire practices and policies will be analyzed and the consequences they have had for transforming habitats and propagating catastrophic fires will be explored.

Fire: Past, Present and Future Interactions with the People and Ecosystems of California: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Instructors: Stephens, Lightfoot

Also listed as: ANTHRO C12AC

Fire: Past, Present and Future Interactions with the People and Ecosystems of California: Read Less [-]

ESPM 24 Freshman Seminar 1 Unit
Terms offered: Spring 2022, Fall 2021, Spring 2021
The Freshman Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Freshman Seminars are offered in all campus departments, and topics may vary from department to department and semester to semester. Enrollment limited to fifteen freshman.

Freshman Seminar: Read More [+]

Rules & Requirements
Repeat rules: Course may be repeated for credit when topic changes.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of seminar per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: The grading option will be decided by the instructor when the class is offered. Final Exam To be decided by the instructor when the class is offered.

Freshman Seminar: Read Less [-]
ESPM 39E Freshman/Sophomore Seminar 1 - 3 Units
Terms offered: Fall 2012
Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.
Freshman/Sophomore Seminar: Read More [+] Rules & Requirements
Prerequisites: Priority given to freshmen and sophomores
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2-4 hours of seminar per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: The grading option will be decided by the instructor when the class is offered. Final exam required.
Freshman/Sophomore Seminar: Read Less [-]

ESPM 40 Insects and Human Society 3 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
An introduction to the diversity and natural history of insects in natural and human environments. The course examines the wonder of insects, their interactions with the living world, and their contributions to and impacts on human society.
Insects and Human Society: Read More [+] Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week
Summer: 8 weeks - 4 hours of lecture and 4 hours of discussion per week

Grading/Final exam status: Letter grade. Final exam required.
Instructors: Will, Almeida
Insects and Human Society: Read Less [-]

ESPM 42 Natural History of Insects 3 Units
Terms offered: Fall 2021, Fall 2020, Fall 2019
An outline of the main facts and principles of biology as illustrated by insects, with special emphasis on their relations to plants and animals, including humans.
Natural History of Insects: Read More [+] Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Will
Natural History of Insects: Read Less [-]

ESPM 44 Biological Control 2 Units
Terms offered: Fall 2014, Fall 2013, Fall 2012
Regulation of populations of organisms, especially insects, through interactions with parasites, predators, pathogens, competitors.
Discussion of examples from agricultural, forest, urban, and recreational environments.
Biological Control: Read More [+] Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Mills
Biological Control: Read Less [-]
ESPM C46 Climate Change and the Future of California 4 Units
Terms offered: Spring 2022, Spring 2021, Spring 2018, Spring 2016
Introduction to California geography, environment, and society, past and future climates, and the potential impacts of 21st-century climate change on ecosystems and human well-being. Topics include fundamentals of climate science and the carbon cycle; relationships between human and natural systems, including water supplies, agriculture, public health, and biodiversity; and the science, law, and politics of possible solutions that can reduce the magnitude and impacts of climate change.
Climate Change and the Future of California: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Ackerly, Sedlak, Silver, Weissman
Also listed as: L & S C46
Climate Change and the Future of California: Read Less [-]

ESPM 50AC Introduction to Culture and Natural Resource Management 4 Units
Terms offered: Spring 2022, Fall 2021, Summer 2021 Second 6 Week Session
An introduction to how culture affects the way we use and manage fire, wildland and urban forests, rangelands, parks and preserves, and croplands in America. The basic concepts and tools for evaluating the role of culture in resource use and management are introduced and used to examine the experience of American cultural groups in the development and management of western natural resources.

ESPM 52 History of Native American Land, Colonialism, and Heritage Preservation 3 Units
Terms offered: Spring 2022
The purpose of this course is to examine Native American societies, political systems, and human-environment relationships within CA and the U.S. This survey of Native American history will provide context for modern issues in land and resource management and government-to-government relationships between tribes and local, state, and federal agencies. Special attention will be given to the CA region, as there are many aspects of CA that make it an exceptional or unique case within the larger US historical narrative. Recurring themes or core concepts discussed throughout the course will include climate change, cultural and environmental impacts from colonialism, Indigenous persistence, stewardship, cultural landscapes, and tribal sovereignty.
History of Native American Land, Colonialism, and Heritage Preservation: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Introduction to Geographic Information Systems: Read Less [-]

ESPM 88A Exploring Geospatial Data 2 Units
Terms offered: Spring 2017, Spring 2016
From interactive web maps to spatial data analysis, digital geographic data and information are becoming an important part of the data science landscape. Almost everything happens somewhere that can be mapped on the surface of the earth. In many cases the where matters as much to an analysis as the what and the why. Geospatial data analysis allows a researcher to consider location explicitly. This course provides an introduction to working with digital geographic data, or geospatial data. We will explore concepts of geospatial data representation, methods for acquisition, processing and analysis, and techniques for creating compelling geovisualizations. No prior knowledge is assumed or expected.
Exploring Geospatial Data: Read More [+]
Rules & Requirements
Prerequisites: This course is meant to be taken concurrently with Computer Science C8/Statistics C8/Information C8: Foundations of Data Science. Students may take more than one 88 (data science connector) course if they wish, ideally concurrent with or after having taken the C8 course
Hours & Format
Fall and/or spring: 15 weeks - 0.5 hours of lecture, 0.5 hours of discussion, and 1 hour of laboratory per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Kelly
Exploring Geospatial Data: Read Less [-]
ESPM 88B Data Sciences in Ecology and the Environment 2 Units
Terms offered: Spring 2016
Many of the greatest challenges we face today come from understanding and interacting with the natural world: from global climate change to the sudden collapse of fisheries and forests, from the spread of disease and invasive species to the unknown wealth of medical, cultural, and technological value we derive from nature. Advances in satellites and microsensors, computation, informatics and the Internet have made available unprecedented amounts of data about the natural world, and with it, new challenges of sifting, processing and synthesizing large and diverse sources of information. In this course, students will apply methods and understanding they gain in the Foundations course to real-world ecological and environmental data.

Data Sciences in Ecology and the Environment: Read More [+]

Rules & Requirements
Prerequisites: This course is meant to be taken concurrently with Computer Science C8/Statistics C8/Information C8: Foundations of Data Science. Students may take more than one 88 (data science connector) course if they wish, ideally concurrent with or after having taken the C8 course.

Hours & Format

ESPM 98 Directed Group Study in ESPM 1 - 3 Units
Terms offered: Fall 2016, Spring 2016, Fall 2015
Study of special topics that are not covered in depth in regular courses in the department.

Directed Group Study in ESPM: Read More [+]

Rules & Requirements
Prerequisites: Lower division standing; consent of instructor, adviser, and department chair
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1-3 hours of directed group study per week
Summer: 6 weeks - 2.5-7.5 hours of directed group study per week; 8 weeks - 1.5-5.5 hours of directed group study per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

Directed Group Study in ESPM: Read Less [-]

ESPM 98BC Berkeley Connect 1 Unit
Terms offered: Spring 2022, Fall 2021, Spring 2021
Berkeley Connect is a mentoring program, offered through various academic departments, that helps students build intellectual community. Over the course of a semester, enrolled students participate in regular small-group discussions facilitated by a graduate student mentor (following a faculty-directed curriculum), meet with their graduate student mentor for one-on-one academic advising, attend lectures and panel discussions featuring department faculty and alumni, and go on field trips to campus resources. Students are not required to be declared majors in order to participate.

Berkeley Connect: Read More [+]

Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

ESPM 99 Supervised Independent Study and Research 1 - 3 Units
Terms offered: Spring 2021, Fall 2016, Spring 2016
Supervised independent study or research on topics relevant to department that are not covered in depth by other courses. Open to students in good standing who, in consultation with a faculty sponsor, present a proposal with clearly formulated objectives and means of implementation. Intended for exceptional students.
Supervised Independent Study and Research: Read More [+]
Rules & Requirements
Prerequisites: Lower division standing (3.4 GPA or better), consent of instructor, adviser, and department chair. Usually restricted to ESPM majors
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Summer:
6 weeks - 1-5 hours of independent study per week
8 weeks - 1-4 hours of independent study per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
ESPM 100 Environmental Problem Solving 4 Units
Terms offered: Fall 2021, Fall 2020, Fall 2019
Analysis of contrasting approaches to understanding and solving environmental and resource management problems. Case studies and hands-on problem solving that integrate concepts, principles, and practices from physical, biological, social, and economic disciplines. Their use in environmental policies and resource and management plans. This course is the prerequisite to 196A.
Environmental Problem Solving: Read More [+]
Rules & Requirements
Prerequisites: One course in ecology; one course in mathematics or statistics; one course in a social science or economics
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture, 1 hour of discussion, and 3 hours of laboratory per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Battles
ESPM 102B Natural Resource Sampling 2 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
This course is designed to introduce students to the major sampling systems used in natural resources and ecology. It also introduces students to important sampling and measurement concepts in grassland, forest, wildlife, insect, soil, and water resources. May be taken without laboratory course 102BL.
Natural Resource Sampling: Read More [+]
Rules & Requirements
Prerequisites: Statistics 2 or 20
Hours & Format

**ESPM 102BL Laboratory in Natural Resource Sampling**

2 Units

Terms offered: Fall 2019, Fall 2018, Fall 2017

This laboratory course is designed to introduce students to the major sampling systems used in natural resources and ecology. Field data is collected with various important sampling designs and analyzed. Mean values and confidence intervals are constructed from the data collected in this course. This course must be taken in conjunction with lecture course 102B.

**Rules & Requirements**

*Prerequisites:* Statistics 2 or 20

**Hours & Format**

Fall and/or spring: 15 weeks - 4 hours of laboratory per week

**Additional Details**

*Subject/Course Level:* Environ Sci, Policy, and Management/Undergraduate

*Grading/Final exam status:* Letter grade. Final exam required.

*Instructor:* Biging

**Laboratory in Natural Resource Sampling: Read More [+]**

---

**ESPM 102C Resource Management**

4 Units

Terms offered: Spring 2022, Spring 2021, Summer 2020 Second 6 Week Session

Presents concept and practical approaches to public and private natural resource management decision making. The focus is on goals, criteria, data, models, and technology for quantifying and communicating the consequences of planning options. A range of contemporary air, soil, wetland, rangeland, forest, social, economic, and ecosystem management problems is addressed.

**Rules & Requirements**

*Prerequisites:* Precalculus. 156, 184, and 70 are recommended

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Summer: 6 weeks - 8 hours of lecture and 2 hours of discussion per week

**Additional Details**

*Subject/Course Level:* Environ Sci, Policy, and Management/Undergraduate

*Grading/Final exam status:* Letter grade. Final exam required.

*Instructor:* Meckling

**Resource Management: Read Less [-]**

---

**ESPM 102D Climate and Energy Policy**

4 Units

Terms offered: Spring 2022, Fall 2020, Spring 2020

This intermediate level course engages with both the politics and the design of climate and clean energy policy, with a focus on the United States. Key themes include political strategies to climate change, the choice of policy instruments, the role of various state actors and interest groups in policy making, the interaction of policy and low-carbon technology markets, and the US and global politics. The course combines the study of analytical concepts with in-depth case studies.

**Rules & Requirements**

*Prerequisites:* One of the following is required: - ESPM 60 Environmental Policy, Administration, and Law - ENVECON C1 Introduction to Environmental Economics and Policy - POL SCI 1 Introduction to American Politics, or - Consent of instructor

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Summer: 6 weeks - 8 hours of lecture and 2 hours of discussion per week

**Additional Details**

*Subject/Course Level:* Environ Sci, Policy, and Management/Undergraduate

*Grading/Final exam status:* Letter grade. Final exam required.

*Instructor:* Meckling

**Climate and Energy Policy: Read Less [-]**
ESPM C103 Principles of Conservation Biology 4 Units
Terms offered: Fall 2021, Summer 2021 Second 6 Week Session, Fall 2020
A survey of the principles and practices of conservation biology. Factors that affect the creation, destruction, and distribution of biological diversity at the level of the gene, species, and ecosystem are examined. Tools and management options derived from ecology and evolutionary biology that can recover or prevent the loss of biological diversity are explored.
Principles of Conservation Biology: Read More [+]
Rules & Requirements
Prerequisites: Biology 1A-1B or equivalent
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week
Summer: 6 weeks - 6.5 hours of lecture and 3 hours of discussion per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

ESPM 105A Sierra Nevada Ecology 4 Units
Terms offered: Summer 2021 8 Week Session, Summer 2019 10 Week Session, Summer 2018 8 Week Session
Introduction to silvicultural theory, forest operations, and utilization and manufacture of forest products. Evaluation of silviculture for managing forest stands for multiple objectives including regeneration, stand density control, forest growth, genetic improvement, and prescribed burning. Introduction to harvest and access systems, wood structure and quality, and manufacture of forest product. Field trips and lectures to local areas illustrating different approaches to forest problems.

Sierra Nevada Ecology: Read More [+]

Rules & Requirements
Prerequisites: Eight hours biology

Hours & Format
Summer: 8 weeks - 10 hours of lecture and 30 hours of fieldwork per week

Grading/Final exam status: Letter grade. Final exam required.

Instructor: McBride

ESPM 105B Forest Measurements 1 Unit
Terms offered: Summer 2021 8 Week Session, Summer 2019 10 Week Session, Summer 2018 8 Week Session
This course teaches students how to use common forestry tools, maps, and various sampling methods to collect information about the forest environment. Thirty percent of the time is spent in the classroom learning about the techniques and working up field data. The remaining time is spent in the field applying these techniques in real world settings. Skills taught will include tree and plot measurement procedures, map reading, and simple field orienteering principles.

Instructor: O'Hara

ESPM 105D Forest Management and Assessment 3 Units
Terms offered: Summer 2021 8 Week Session, Summer 2019 10 Week Session, Summer 2018 8 Week Session
Develop skills in evaluating forests and developing management strategies to meet ownership objectives. Develop integrated forest management plan for 160 acre parcel. During first week, inventory and assess ecological condition of the assigned parcel. During second week, develop comprehensive integrated forest resource plan, integrating water, wood, wildlife, range, fisheries, and recreation. Oral reports in both an office and field setting required and written management plan.

ESPM 106 American Wildlife: Management and Policy in the 21st Century 3 Units
Terms offered: Spring 2021, Spring 2020, Spring 2019
This course will introduce the history of key wildlife management and policy paradigms, such as parks and protected areas, threatened and endangered species protections, and state wildlife management. We will then explore in depth a number of species case studies in the Greater Yellowstone Ecosystem, a major laboratory for wildlife science, management and policy. The course will draw on lectures, readings, discussions, and guest perspectives. The course will help students majoring in related fields to prepare for careers in wildlife science and related conservation, management, and policy efforts; but students of any major should come away with a better understanding of key issues facing iconic American wildlife species.

American Wildlife: Management and Policy in the 21st Century: Read More [+]

ESPM 108B Environmental Change Genetics

3 Units

Terms offered: Fall 2021, Fall 2020, Fall 2019

This course will examine the consequences of environmental change on the levels and distribution of genetic diversity within species. Students will be introduced to methods of analysis and their application to organisms from a range of ecosystems. The fate of populations under rapid environmental change will be assessed in the light of dispersal and adaptation (genetic and epigenetic) potential. Students will learn to use population genetics freeware to evaluate molecular data.

Rules & Requirements

Prerequisites: Biology 1A-1B or equivalents

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Dodd

Environmental Change Genetics: Read More [+]

ESPM 109A Island and Coral Reef Resilience and Ecosystem Services

3 Units

Terms offered: Prior to 2007

Students will learn the fundamentals of island and reef biology, geology, marine ecology and their inter-connectedness, as well as the physical and biological forces shaping and maintaining these ecosystems. The course will involve a significant amount of time in the field to expose students to the different island habitats and explore the ecosystem services provided by island habitats to local peoples and beyond. Students will interact directly with local people to learn about local perspectives on the value of these systems.

Objectives & Outcomes

Course Objectives: 1. To provide fundamentals of island and reef biology, geology, marine ecology and their inter-connectedness, as well as the physical and biological forces shaping and maintaining these ecosystems.

2. To experience in the field the different island habitats and explore the ecosystem services provided by island habitats to local peoples and beyond.

3. To interact directly with local people to learn about local perspectives on the value of these systems.

Student Learning Outcomes: 1. Students will be able to summarize the fundamentals of Sustainability Science in the context of oceanography, geoscience, genetics, ecology, anthropology, economics, statistics and data science.

2. Students will be able to demonstrate a quantitative and qualitative understanding of interactions among individual organisms and between species and their biotic and abiotic environment.

3. Students will be able to design experiments to understand the importance and inter-connectedness of biological and physical forces that shape and maintain island ecosystems.

4. Students will be able to interpret the value of ecosystem services that islands provide.

5. Students will be able to articulate the perspective of local people on the value of island ecosystems based on their first hand experiences.

6. Students will be able to investigate and communicate the connections between the biological and social sciences and humanities as they affect sustainable development.

Hours & Format

Fall and/or spring: 3 weeks - 15 hours of lecture and 15 hours of fieldwork per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Island and Coral Reef Resilience and Ecosystem Services: Read Less [-]
ESPM 109B Polynesian Culture and Society 3 Units
Terms offered: Prior to 2007
This course is based at the Atitia Community Center adjacent to the Gump Station and on Tetiaroa. Students will learn about the history of the peopling of Oceania, and the waves of exploration and interaction that have shaped the Pacific. Students will be immersed into the way in which the first peoples of these islands understand and interact with their island homes, from a traditional to modern perspective, and with insights on human-environment interactions. Students will be presented with necessary historical and cultural context including basic language training, archeological field trips and interactions with local youth and elders at the Atitia Center and beyond to learn about local customs, traditions and attitude.

Polynesian Culture and Society: Read More [+]

Objectives & Outcomes

Course Objectives: 1. To experience Polynesian atoll culture.
2. To provide in immersion in life of first peoples from a traditional to modern perspective, and with insights on human-environment interactions.
3. To present necessary historical and cultural context including basic language training, archeological field trips and interactions with local youth and elders at the Atitia Center and beyond to learn about local customs, traditions and attitude.

Student Learning Outcomes: 1. Students will gain an understanding of Oceania as a whole and Tahiti’s place within it.
2. Students will be able to interpret basic languages and legends of Polynesian culture.
3. Students will be able to compare atoll and island culture from both traditional and modern perspectives.
4. Students will be able to articulate challenges to sustainability for island cultures.
5. Students will gain an appreciation of traditional ecological knowledge and how it shapes Tahitian culture.

Hours & Format

Fall and/or spring: 3 weeks - 15 hours of lecture and 15 hours of fieldwork per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Polynesian Culture and Society: Read Less [-]

ESPM 109C Issues in Biodiversity 3 Units
Terms offered: Prior to 2007
An overview of the major issues facing biodiversity globally today including habitat destruction, pollution, invasive species and disease, and examine how these issues are affecting island nations with a focus on French Polynesia. This course will make extensive use of the Biocode Project database to examine biodiversity on Moorea, and discuss genetic resilience and conservation technologies. We will then explore local attitudes and perspectives about these issues and examine local biodiversity initiatives.

Issues in Biodiversity: Read More [+]

Objectives & Outcomes

Course Objectives: 1. To review of the major issues facing biodiversity globally today including habitat destruction, pollution, invasive species and disease.
2. To experience how these issues are affecting island nations with a focus on French Polynesia.
3. To use the Biocode Project database to examine biodiversity on Moorea, and discuss genetic resilience and conservation technologies.
4. To explore local attitudes and perspectives about these issues and examine local biodiversity initiatives.

Student Learning Outcomes: 1. Students will be able to recognize species within some particular group of organisms and interpret key aspects of their ecology, phylogeny, and conservation needs from both a modern scientific approach as well as that of traditional ecological knowledge.
2. Students will be able to articulate the goals and value of fundamental ecological and genetic observatories for sustainability science.
3. Students will obtain skills of database use and visualization.
4. Students will be able to design and evaluate initiatives with the goal to conserve biodiversity.

Hours & Format

Fall and/or spring: 3 weeks - 15 hours of lecture and 15 hours of fieldwork per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Issues in Biodiversity: Read Less [-]
ESPM 109D Environmental Planning, Management, and Policy 3 Units
Terms offered: Prior to 2007
Students will be given an overview of the state of the field, as well as an understanding of current theory and practice, including western approaches and indigenous environmental management of terrestrial and marine resources. Rahui, a traditional Polynesian marine conservation practice will be examined through interaction with local communities that use it. Students will also learn about EU, Pacific-wide and international funding and conservation management initiatives affecting the lives and environment of Polynesians and people worldwide.

Course Objectives: 1. To provide overview of the state of environment planning, management, and policy, as well as an understanding of current theory and practice, including western approaches and indigenous environmental management of terrestrial and marine resources.
2. To examine Rahui, a traditional Polynesian marine conservation practice, through interaction with local communities that use it, and the French Polynesian division of the Pew Charitable Trust.
3. To learn about EU, Pacific-wide and international funding and conservation management initiatives affecting the lives and environment of Polynesians.

Student Learning Outcomes: 1. Students will be able to identify, interpret, and communicate sustainability ideas, needs and programs to others in different cultural contexts and multilingual societies, demonstrating effective scientific communication skills through development and delivery of oral presentations and written reports and case studies.
2. Students will be able to articulate the state of environment planning, management, and policy, as well as an understanding of current theory and practice, including western approaches and indigenous environmental management of terrestrial and marine resources.
3. Students will be able to interpret elements of modern marine conservation practice and how different agencies are necessary for effective action.
4. Students will be able to evaluate effectiveness of EU, Pacific-wide and international funding and conservation management initiatives affecting the lives and environment of local peoples.

Hours & Format
Fall and/or spring: 3 weeks - 15 hours of lecture and 15 hours of fieldwork per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

ESPM 109E Data Science, Communication and Professionalism 3 Units
Terms offered: Prior to 2007
The course will provide the fundamentals of data science across all disciplines and put them into practice on a project relevant to Island Sustainability. Exercises and group projects will hone oral, written, physical, and multimedia communication skills, with an emphasis on communicating for collaboration and outreach. Professional and ethical behavior will be emphasized in the context of Island Sustainability. Instruction will be primarily related to lecture material but will also cover issues related to conducting fieldwork, interacting with local/host communities, etc.

Course Objectives: 1. To understand the fundamentals of data science across all disciplines and put them into practice on a project relevant to Island Sustainability.
2. To develop oral, written, physical, and multimedia communication skills, with an emphasis on communicating for collaboration and outreach.
3. To understand and practice professional and ethical behavior in the context of Island Sustainability.

Student Learning Outcomes: 1. Students will be able to identify, interpret, and communicate sustainability ideas, needs and programs to others in different cultural contexts and multilingual societies, demonstrating effective scientific communication skills through development and delivery of oral presentations and written reports and case studies.
2. Students will be able to articulate the state of environment planning, management, and policy, as well as an understanding of current theory and practice, including western approaches and indigenous environmental management of terrestrial and marine resources.
3. Students will be able to interpret elements of modern marine conservation practice and how different agencies are necessary for effective action.
4. Students will be able to evaluate effectiveness of EU, Pacific-wide and international funding and conservation management initiatives affecting the lives and environment of local peoples.

Hours & Format
Fall and/or spring: 3 weeks - 15 hours of lecture and 5 hours of fieldwork per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternate method of final assessment during regularly scheduled final exam group (e.g., presentation, final project, etc.).

Data Science, Communication and Professionalism: Read Less [-]
ESPM 110 Primate Ecology 4 Units
Terms offered: Spring 2011, Spring 2010, Spring 2008
This course examines the comparative ecology of sympatric primate species in forests of Central and South America, Africa, and Southeast Asia. In addition to primate ecology, students will master comparative information on the three main tropical forest regions of the world and examine the impact of selective logging on primate densities and diversities in each area.
Primate Ecology: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Grading/Final exam status: Letter grade. Final exam required.
Instructor: Milton

ESPM C110A Ecological Analysis 4 Units
Terms offered: Fall 2021
This course focuses on natural factors of the environment that are fundamental to ecosystem management, land use planning and landscape design and their relationships to one another in different terrestrial ecosystems, from predominantly natural to predominantly anthropogenic. Lectures explore the key concepts on ecosystem structure, function and dynamics and discuss different types of ecological data, their interpretation and visualization that can aid in landscape research, planning and design workflow. Laboratory sections advance lecture topics by providing hands-on training in common types of ecosystem analyses using quantitative methods and geospatial tools.
Ecological Analysis: Read More [+]

Objectives & Outcomes
Course Objectives: Develop an understanding of natural factors of the environment that are fundamental to ecosystem management, landscape design and land use planning and common approaches for their assessment and analysis of their relationships to one another.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Baldocchi, Silver

Formerly known as: C110, Integrative Biology C155

ESPM 111 Ecosystem Ecology 4 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
This course will develop principles of ecosystems ecology, emphasizing terrestrial ecosystems, and will consider how these principles apply to ecosystem recovery and to regional and global fluxes of carbon and nutrients.
Ecosystem Ecology: Read More [+]

Rules & Requirements
Prerequisites: Biology 1B

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Ecological Analysis: Read Less [-]
ESPM 112L Microbial Metagenomic Data Analysis Lab 1 Unit
Terms offered: Spring 2021, Spring 2020, Spring 2019
We will teach students how to perform genome-resolved metagenomics. We will start with raw data in the form of DNA sequencing reads, assemble the data, reconstruct genomes for coexisting organisms, evaluate overall community composition (which organisms are present and at what abundance levels), predict metabolic capacities, calculate growth rates, and investigate changes in the community over time. Working in pairs, the students will analyze real, unpublished data, identify an interesting question and investigate it. Evaluation is based on a final presentation of research findings.
Microbial Metagenomic Data Analysis Lab: Read More [+]

Rules & Requirements
Prerequisites: Concurrent enrollment in Environmental Science Policy and Management 112 will be required for enrollment in Environmental Science Policy and Management 112L. Biology 1A and Biology 1B; Molecular and Cell Biology 102 is recommended

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate

Grading/Final exam status: Letter grade. Alternate method of final assessment during regularly scheduled final exam group (e.g., presentation, final project, etc.).

Agricultural Ecology: Read Less [-]

ESPM 119 Chemical Ecology 2 Units  
Terms offered: Fall 2015, Fall 2014, Fall 2013  
Plant toxins and their effects on animals, hormonal interactions between plants and animals, feeding preferences, animal pheromones, and defense substances, biochemical interactions between higher plants, and phytoalexins and phytotoxins.  
Chemical Ecology: Read More [+]

Rules & Requirements

Prerequisites: Introductory courses in organic chemistry and biology or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate  
Grading/Final exam status: Letter grade. Final exam required.

Instructor: Kubo

Chemical Ecology: Read Less [-]
ESPM 120 Science of Soils 3 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
This course will introduce students to the study and management of soils as natural bodies, as media for plant growth and as integral components of terrestrial ecosystems. It will present basic concepts of soil science including: soil formation and classification, the physical, chemical, and biological properties of soils, the role of soil in supplying water and nutrients to plants and soil organisms, as well as applications of soil concepts in farming or engineering. The course will also introduce the relationships of soils to environmental problems.
Science of Soils: Read More [+]

Rules & Requirements

Prerequisites: Chemistry 1A, 3A

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Ammundson, Pallud

Science of Soils: Read Less [-]

ESPM 121 Development and Classification of Soils 3 Units
Terms offered: Fall 2021, Fall 2019, Spring 2015
Development, morphology, and classification of soils as related to geology, environmental factors, and time. Soils as functioning parts of ecosystems; use of soils in archeological and paleoclimatic studies; anthropogenic effects on soil ecosystems.
Development and Classification of Soils: Read More [+]

Rules & Requirements

Prerequisites: Earth and Planetary Sciences 100A-100B, and Chemistry 1A, 3A recommended

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Amundson

Development and Classification of Soils: Read Less [-]

ESPM 122 Field Study of Soil Development 1 Unit
Terms offered: Spring 2015, Spring 2009, Spring 2006
Five-day-long Saturday field trips to locations in central California. The field study of soil development and morphology. Methods of soil morphological descriptions; study of factors controlling soil development; relationship of soil morphology to land use; quaternary geology of central California; use of soils in dating landscapes.
Field Study of Soil Development: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 0 hours of fieldwork per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam not required.

Instructor: Amundson

Field Study of Soil Development: Read Less [-]

ESPM C124 Gender and Environment 4 Units
Terms offered: Not yet offered
This course examines the centrality of gender and intersectionality in understanding nature-society relations across time and space. During the first half of the semester, students will become familiar with key feminist theoretical approaches to studying environmental problems, including ecofeminism, feminist environmentalism, feminist critiques of science, feminist political ecology, and queer and more-than-human ecologies. In the remainder of the semester, students will apply the theories learned to explore contemporary feminist environmental movements and analyze key topics, such as resource politics, pollution and toxins, environmental and reproductive justice, climate change, and the ethics of care.
Gender and Environment: Read More [+]

Objectives & Outcomes

Student Learning Outcomes: Upon taking this course, students will be able to: 1) explain different approaches to theorizing the gender-environment nexus; and 2) apply theoretical and conceptual tools to engage with, reflect on, and critique contemporary local and global environmental issues from an intersectional feminist perspective.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Alternate method of final assessment during regularly scheduled final exam group (e.g., presentation, final project, etc.).

Instructor: Chung

Also listed as: ENE, RES C124

Gender and Environment: Read Less [-]
ESPM C125 Biogeography 4 Units
Terms offered: Fall 2021, Fall 2020, Fall 2019
The course will provide a historical background for the field of biogeography and the ecological foundations needed to understand the distribution and abundance of species and their changes over time. It will also discuss developing technologies (including genomic tools and environmental models) together with the availability of big data and increasingly sophisticated analytical tools to examine the relevance of the field to global change biology, conservation, and invasion biology, as well as sustainable food systems and ecosystem services.

Biogeography: Read More [+]

Rules & Requirements

Prerequisites: BIO 1B

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Gillespie

Also listed as: GEOG C148/INTEGBI C166

ESPM C126 Animal Behavior 4 Units
Terms offered: Fall 2021, Fall 2020, Fall 2019
An introduction to comparative animal behavior and behavioral physiology in an evolutionary context, including but not limited to analysis of behavior, genetics and development, learning, aggression, reproduction, adaptiveness, and physiological substrates.

Animal Behavior: Read More [+]

Rules & Requirements

Prerequisites: Biology 1A, 1B, or Environmental Science, Policy, and Management 140. Molecular and Cell Biology 140 and C160 recommended

Credit Restrictions: Students will receive no credit for 144 after taking C144, 145, 146LF, or Psychology C115B.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Lacey, Caldwell, Bentley, Elias

Also listed as: INTEGBI C144

Animal Behavior: Read Less [-]

ESPM C128 Chemistry of Soils 3 Units
Terms offered: Fall 2021, Fall 2020, Spring 2018
Chemical mechanisms of reactions controlling the fate and mobility of nutrients and pollutants in soils. Role of soil minerals and humus in geochemical pathways of nutrient bioavailability and pollutant detoxification. Chemical modeling of nutrient and pollutant soil chemistry. Applications to soil acidity and salinity.

Chemistry of Soils: Read More [+]

Rules & Requirements

Prerequisites: CIV ENG 111

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Also listed as: CIV ENG C116

ESPM C129 Biometeorology 3 Units
Terms offered: Fall 2020, Fall 2018, Fall 2016
This course describes how the physical environment (light, wind, temperature, humidity) of plants and soil affects the physiological status of plants and how plants affect their physical environment. Using experimental data and theory, it examines physical, biological, and chemical processes affecting transfer of momentum, energy, and material (water, CO2, atmospheric trace gases) between vegetation and the atmosphere. Plant biometeorology instrumentation and measurements are also discussed.

Biometeorology: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Baldocchi

Also listed as: EPS C129

Biometeorology: Read Less [-]
ESPM 130A Forest Hydrology 4 Units
Terms offered: Spring 2019, Spring 2018
This course introduces the fundamental physical principles that are necessary to understand
the distribution and dynamics of water near the Earth's surface. A quantitative approach will provide
mathematical descriptions of hydrological phenomena that will be used for a variety of hydrological
applications to river flow hydraulics, flood frequency analysis, evapotranspiration from terrestrial ecosystems, groundwater flow, and ecohydrological dynamics. The course will provide an introduction to hydrological processes and data analysis. The purpose of the laboratory is to illustrate in an experimental setting the principles and applications introduced in lecture.

Rules & Requirements
Prerequisites: Chemistry 1A, Mathematics 1A-1B, Physics 7A, or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: D'Odorico

ESPM C130 Terrestrial Hydrology 4 Units
Terms offered: Spring 2021, Spring 2020, Spring 2019, Spring 2014
A quantitative introduction to the hydrology of the terrestrial environment including lower atmosphere, watersheds, lakes, and streams. All aspects of the hydrologic cycle, including precipitation, infiltration, evapotranspiration, overland flow, streamflow, and groundwater flow.
Chemistry and dating of groundwater and surface water. Development of quantitative insights through problem solving and use of simple models.
This course requires one field experiment and several group computer lab assignments.

Rules & Requirements
Prerequisites: CHEM 1A, MATH 1A, MATH 1B, and PHYSICS 7A; or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Larsen
Also listed as: CIV ENG C103N/GEOG C136

Terrestrial Hydrology: Read Less [-]
ESPM 131 Soil Microbiology and Biogeochemistry 4 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
Introduction to the organisms that live in the soil and their activities in the soil ecosystem. Lectures will cover the physical and chemical properties of soils and the soil as a habitat for microorganisms, the diversity and ecology of soil microorganisms, and their activity in the context of biogeochemical cycling, plant-microbe interactions, global environmental change and bioremediation. Goals: To gain fundamental knowledge of the occurrence and activities of soil microorganisms and their influence on soil productivity and environmental quality as well as potential applications of soil microbiology.

Objectives & Outcomes
Course Objectives: The overall objective of the class is to provide an overview of the soil as a habitat for microorganisms, and to introduce students to the diversity, ecology and activity of soil microorganisms in the context of biogeochemical cycling, plant-microbe interactions, global environmental change and bioremediation.

Rules & Requirements
Prerequisites: Biology 1A-1B

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Pallud, Brodie

ESPM 132 Spider Biology 4 Units
Terms offered: Fall 2021, Fall 2020, Fall 2019
Covers topics ranging from mythological ideas about spiders and their importance in traditional cultures and folklore, to diversity patterns, ecology, behavior, and general biology of spiders. In the laboratory section, students learn to identify local spiders and to prepare a collection.

Objectives & Outcomes
Course Objectives: The overall objective of the class is to provide an overview of the soil as a habitat for microorganisms, and to introduce students to the diversity, ecology and activity of soil microorganisms in the context of biogeochemical cycling, plant-microbe interactions, global environmental change and bioremediation.

Rules & Requirements
Prerequisites: Biology 1A-1B

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Gillespie

ESPM C133 Water Resources and the Environment 3 Units
Terms offered: Spring 2018, Spring 2016
Distribution, dynamics, and use of water resources in the global environment. Water scarcity, water rights, and water wars. The terrestrial hydrologic cycle. Contemporary environmental issues in water resource management, including droughts, floods, saltwater intrusion, water contamination and remediation, river restoration, hydraulic fracturing, dams, and engineering of waterways. The role of water in ecosystem processes and geomorphology. How water resources are measured and monitored. Basic water resource calculations. Effects of climate change on water quantity, quality, and timing.

Objectives & Outcomes
Course Objectives: The overall objective of the class is to provide an overview of the soil as a habitat for microorganisms, and to introduce students to the diversity, ecology and activity of soil microorganisms in the context of biogeochemical cycling, plant-microbe interactions, global environmental change and bioremediation.

Rules & Requirements
Prerequisites: Biology 1A-1B

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Larsen

Also listed as: GEOG C135
ESPM 134 Fire, Insects, and Diseases in Forest Ecosystems 3 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
Study of the influence of fire, insects, and diseases on species diversity, succession, and the survival of North American forests including the evolution of these interactions due to modern human policies of preservation and management and exploitation.

ESPM 135A Migration in the Contemporary World: California and Beyond 4 Units
Terms offered: Fall 2019
This course is designed to allow students to delve into the topic of migration in the contemporary world. Readings, discussions, and assignments will focus on 1) past and present immigration to California and beyond 2) the impact of immigration in relation to labor, health and the environment and 3) contemporary immigrant activism and organizing. A primary goal of the course is to utilize sociocultural theories to describe the experiences of immigrants in the U.S. Students will communicate what they are learning through discussions, weekly reading reflection, academic papers, and an Op-Ed. A variety of teaching methods will be employed including lectures, discussions and guest presentations (authors and individuals featured in books).

ESPM 136 Sustainable Industry 3 Units
Terms offered: Fall 2021, Spring 2003, Spring 2001
Academics, policy-makers, workers, communities, consumers, and business leaders are increasingly concerned about the environmental and social impacts of industry. A range of fields have emerged to respond to these concerns, seeking to redesign and re-align industrial systems and activities to be more ecologically and socially sound. This course explores internal firm capabilities (core functions, practices, technologies) and external pressures (governments, NGOs) to advance more sustainable industry. The course examines emerging production and consumption systems, introduces several methods for mapping and measuring the environmental and social impacts of industry, and evaluates recent strategies to advance more sustainable production.

ESPM 137 Landscape Ecology 3 Units
Terms offered: Fall 2021, Fall 2020, Fall 2019
This course will cover broad topics in landscape ecology with the goal of answering the core questions of how patterns develop on landscapes, how these patterns relate to biotic and abiotic processes, and how these patterns and processes change through time. Lab exercises will focus on practical aspects of landscape ecological analysis using modern tools like remote sensing, GIS, population modeling, and landscape genetics.
ESPM C138 Introduction to Comparative Virology 4 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
This course will provide a comparative overview of virus life cycles and strategies viruses use to infect and replicate in hosts. We will discuss virus structure and classification and the molecular basis of viral reproduction, evolution, assembly, and virus-host interactions. Common features used during virus replication and host cellular responses to infection will be covered. Topics also included are common and emerging virus diseases, their control, and factors affecting their spread.
Introduction to Comparative Virology: Read More [+]

Rules & Requirements

Prerequisites: Introductory chemistry (Chemistry 1A or 3A-3B or equivalent) and introductory biology (Biology 1A, 1AL, and 1B or equivalent) and general biochemistry (Molecular and Cell Biology C100A or equivalent--preferably completed but may be taken concurrently)

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Glaunsinger

Also listed as: MCELLBI C114/PLANTBI C114

Introduction to Comparative Virology: Read Less [-]

ESPM 140 General Entomology 4 Units
Terms offered: Spring 2022, Spring 2020, Spring 2019
A comprehensive course on the biology of terrestrial and aquatic insects, their morphology, physiology, behavior, taxonomy, and ecology. The lab covers the identification and classification of insect orders and common families, insect collecting and sampling methods, and includes a required insect collection project. Course includes an overnight field trip to a research property.

General Entomology: Read More [+]

Rules & Requirements

Prerequisites: Introductory course in a biological science

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 6 hours of laboratory per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Will

General Entomology: Read Less [-]

ESPM 139 THE ENVIRONMENT AND THE SELF: AN ECO PRACTICUM 2 Units
Terms offered: Fall 2021, Fall 2019, Fall 2017
This course will provide a practical exploration of how to engage effectively with contemporary environmental issues using discussion of scientific and philosophical texts, activities, and group work. We will evaluate how different worldviews influence how humans relate to the natural world and how our own worldview shapes our way of engaging in environmental problem solving.

THE ENVIRONMENT AND THE SELF: AN ECO PRACTICUM: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture per week

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Rosenblum

THE ENVIRONMENT AND THE SELF: AN ECO PRACTICUM: Read Less [-]
**ESPM 141 Development of Taxonomic Identification Keys and Natural Language Descriptions 2 Units**

Terms offered: Prior to 2007  
Tools for identification of organisms to species or higher-level taxonomic groups are critically needed. This course will allow students to learn both the theoretical basis of and practical skills for building traditional dichotomous keys and various types of interactive keys. Emphasis will be on learning to build a web-based interactive key and developing natural language descriptions through students’ individual projects. Students can train on the Microptics Digital XLT imaging system and learn to use Lucid and Lucid Phoenix software. Other Internet identification tools will also be surveyed and discussed. Each student will produce an online key as a project.  
Development of Taxonomic Identification Keys and Natural Language Descriptions: Read More [+]

**Rules & Requirements**

**Prerequisites:** Prior knowledge of focus group for project  
**Repeat rules:** Course may be repeated for credit without restriction.

**Hours & Format**

**Fall and/or spring:** 15 weeks - 2 hours of lecture per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Undergraduate  
**Grading/Final exam status:** Letter grade. Final exam not required.  
**Instructor:** Will  

Development of Taxonomic Identification Keys and Natural Language Descriptions: Read Less [-]

**ESPM 142 Insect Behavior 3 Units**

Terms offered: Fall 2020, Fall 2019, Fall 2017  
Insects display an incredibly rich array of behaviors, including extravagant displays, rituals, deception, sociality, and slavery. In some cases, these behaviors are innate, but in other cases individual insects can actively learn and modify their future behaviors based on real-life experiences. This course will focus on the development, structure, and function of insect behaviors, using examples from classic and recent publications. We will examine the evolution of insect behavior, how these behaviors play a role in the ecology of the organisms that express them, and explore various modes of communication that allow insects to judge their environment and respond appropriately.  
Insect Behavior: Read More [+]

**Rules & Requirements**

**Prerequisites:** High school biology course or Bio1B, Biology 1A and 1B

**Hours & Format**

**Fall and/or spring:** 15 weeks - 3 hours of lecture per week, 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Undergraduate  
**Grading/Final exam status:** Letter grade. Final exam required.  
**Instructor:** Tsutsui

Insect Behavior: Read Less [-]

**ESPM 141A Climate Change Solutions 4 Units**

Terms offered: Summer 2020 Second 6 Week Session  
Climate Change Solutions course consists of 18 original video lectures from 23 UC researchers and academics. Students watch assigned lectures in advance, then come to class for rich discussions facilitated by the instructor. Content emphasizes both climate knowledge and solutions across a wide range of academic disciplines, and enables students to use showcase their learning in a capstone project.  
Climate Change Solutions: Read More [+]

**Rules & Requirements**

**Prerequisites:** High school biology course or Bio1B, Biology 1A and 1B

**Hours & Format**

**Fall and/or spring:** 15 weeks - 4 hours of discussion per week  
**Summer:** 6 weeks - 9 hours of discussion per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Undergraduate

**Grading/Final exam status:** Letter grade. Alternative to final exam.  
**Instructors:** Silver, Potts

Climate Change Solutions: Read Less [-]
ESPM 144 Insect Physiology 3 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
A survey of the unique physiological mechanisms of insects, including the analysis of physiological systems at the cellular-molecular level. The roles of the nervous and endocrine systems in coordinating physiological processes are emphasized.
Insect Physiology: Read More [+]

Rules & Requirements
Prerequisites: General biology, zoology, or entomology

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

**Hours & Format**  
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

**Additional Details**  
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

Instructor: Rosenblum

Global Change Biology: Read Less [-]
ESPM C153 Ecology 3 Units
Terms offered: Spring 2022
Ecology is a scientific discipline that focuses on the interactions between organisms and their environment. This class will provide an overview of core concepts and applications, and will also provide practice with writing, small-group work, critical thinking, and data analysis.
The class will specifically cover principles of population ecology, illustrated with examples from marine, freshwater, and terrestrial habitats. It will consider the roles of physical and biological processes in structuring natural communities. Observational, experimental, and theoretical approaches will be discussed. Topics will include quantitative approaches relying on algebra, visual analysis of graphs, and elementary calculus.
Ecology:

Rules & Requirements
Prerequisites: Biology 1B or consent of instructor
Credit Restrictions: Students will receive no credit for INTEGBI C153 after completing ESPM 153, or INTEGBI C153. A deficient grade in INTEGBI C153 may be removed by taking ESPM 153, or INTEGBI C153.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.

Animal Communication: Read Less [-]
ESP 157 Data Science in Global Change Ecology 4 Units
Terms offered: Fall 2021, Fall 2020, Fall 2019
Many of the greatest challenges we face today come from understanding and interacting with the natural world: from global climate change to the sudden collapse of fisheries and forests, from the spread of disease and invasive species to the unknown wealth of medical, cultural, and technological value we derive from nature. Advances in satellites and micro-sensors, computation, informatics and the Internet have made available unprecedented amounts of data about the natural world, and with it, new challenges of sifting, processing and synthesizing large and diverse sources of information. In this course, students will learn and apply fundamental computing, statistics and modeling concepts to a series of real-world ecological and environment

ESP 158 Biodiversity Conservation in Working Landscapes 4 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015
Most of the world's lands and seas occur outside of protected areas, so this course examines biodiversity conservation in "working landscapes" like farms, ranches, and urban areas. Students will study fundamental concepts in ecology and conservation biology, and evaluate case studies to assess how conservation approaches have evolved and which are working. Students will gain skills in evaluating and summarizing scientific literature, and in-depth knowledge of conservation in practice.

Rules & Requirements

Prerequisites: No prior knowledge is assumed or expected, though prior exposure to programming, particularly from the Foundations of Data Science (COMPSCI C8 / INFO C8 / STAT C8), will be helpful

Hours & Format
Fall and/or spring: 15 weeks - 4 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Boettiger
**ESPM 160AC American Environmental and Cultural History 4 Units**
Terms offered: Spring 2021, Summer 2019 Second 6 Week Session, Summer 2018 Second 6 Week Session
History of the American environment and the ways in which different cultural groups have perceived, used, managed, and conserved it from colonial times to the present. Cultures include American Indians and European and African Americans. Natural resources development includes gathering-hunting-fishing; farming, mining, ranching, forestry, and urbanization. Changes in attitudes and behaviors toward nature and past and present conservation and environmental movements are also examined. Readings are from primary source documents supplemented by recent essays.

**Rules & Requirements**

**Credit Restrictions:** Students will receive no credit for Environ Sci, Policy, and Management ESPM 160AC/HIST120AC after taking Environ Sci, Policy and Management ESPM 160AC

**Requirements this course satisfies:** Satisfies the American Cultures requirement

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week
Summer: 6 weeks - 7.5 hours of lecture and 3 hours of discussion per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Worthy

**Formerly known as:** 160AC

**Also listed as:** HISTORY 120AC

American Environmental and Cultural History: Read More [+]

**ESPM 161 Environmental Philosophy and Ethics 4 Units**
Terms offered: Summer 2021 Second 6 Week Session, Summer 2020 Second 6 Week Session, Fall 2019
A cross-cultural comparison of human environments as physical, socio-economic, and technocultural ecosystems with special emphasis on the role of beliefs, attitudes, ideologies, and behavior. An examination of contemporary environmental literature and the philosophies embodied therein.

**Rules & Requirements**

**Credit Restrictions:** Students will receive no credit for Environ Sci, Policy, and Management ESPM 161 after taking Environ Sci, Policy and Management 161, summer session.

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week
Summer: 6 weeks - 7.5 hours of lecture and 3 hours of discussion per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Undergraduate

**Grading/Final exam status:** Letter grade. Alternative to final exam.

Environmental Science, Policy and Management

ESPM 161A Thinking With Animals 4 Units
Terms offered: Not yet offered
Animals have long been the subject of human inquiry. As historian Harriet Ritvo writes, “Learned attention to the animal is far from new.” However, in recent decades social movements, artists, and scholars have focused more frequently, and perhaps more urgently, on what Derrida called “the question of the animal.” In this course we will look to how centering the animal challenges human exceptionalism, anthropocentrism, and traditional critical discourse. Tracing the ways work in animal studies denaturalizes hierarchical taxonomies, defines key concepts such as human and animal, and articulates boundaries between species, this course will follow the various political, relational, ethical and imaginative implications of thinking with animals.

Objectives & Outcomes

Course Objectives:  To be able to interrogate the taxonomies and hierarchical systems that have traditionally served to divide human from animal
To develop an understanding of the key concepts emerging from the field of animal studies
To develop questions of and from course texts;
To discuss the methods that have been used to critique, resist, and challenge traditional Western understandings of species hierarchy
To identify the ways in which cultural beliefs about “animals” are shaped by categories of human difference
To read critically, carefully, generously, creatively, and playfully;

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Taylor

ESPM 162 Bioethics and Society 4 Units
Terms offered: Spring 2019, Fall 2017, Fall 2016
Exploration of the ethical dilemmas arising from recent advances in the biological sciences: genetic engineering, sociobiology, health care delivery, behavior modification, patients’ rights, social or private control of research.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Summer: 6 weeks - 7.5 hours of lecture and 3 hours of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Worthy
ESPM 162A Health, Medicine, Society and Environment 4 Units
Terms offered: Fall 2020, Fall 2019, Fall 2018
Introduces students to intersections between health, medicine, society, and environment through medical and environmental anthropology, political ecology, medical geography, and the social studies of science, technology and the natural environment. Readings, discussions, and assignments will explore the sociocultural, political economic, and environmental aspects of illness, care, disease, biomedicine, and health (in)equity.

Objectives & Outcomes

Course Objectives: This course will provide an overview of key theoretical and methodological approaches as well as central arguments to understand the relationships between health, medicine, society and environment. The course will lend context and highlight concepts that are important to understandings of and movements toward social and health equity.

Student Learning Outcomes: Critically assess social and health issues appearing in scholarly publications and the popular press.; Practice communicating ideas and analyses in language that can be generally understood.; Work with classmates from multiple disciplines and backgrounds in order to realize the importance of multidisciplinary approaches for solving social and health inequities.; Apply sociocultural, political economic, and critical theory frameworks for understanding conflicts in the realms of public health, global health, medicine, and public policy.; Demonstrate knowledge in major areas of health and society in relation to current debates in medical anthropology and cognate social sciences.; Engage with increasingly popular subfields of the medical social sciences including those on issues of health inequities, care, medical science, sickness, anguish, and resistance.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

ESPM 163AC Environmental Justice: Race, Class, Equity, and the Environment 4 Units
Terms offered: Fall 2021, Fall 2020, Spring 2020
Overview of the field of environmental justice, analyzing the implications of race, class, labor, and equity on environmental degradation and regulation. Environmental justice movements and struggles within poor and people of color communities in the U.S., including: African Americans, Latino Americans, and Native American Indians. Frameworks and methods for analyzing race, class, and labor. Cases of environmental injustice, community and government responses, and future strategies for achieving environmental and labor justice.

Objectives & Outcomes

Course Objectives: This course will provide an overview of key theoretical and methodological approaches as well as central arguments to understand the relationships between health, medicine, society and environment. The course will lend context and highlight concepts that are important to understandings of and movements toward social and health equity.

Student Learning Outcomes: Critically assess social and health issues appearing in scholarly publications and the popular press.; Practice communicating ideas and analyses in language that can be generally understood.; Work with classmates from multiple disciplines and backgrounds in order to realize the importance of multidisciplinary approaches for solving social and health inequities.; Apply sociocultural, political economic, and critical theory frameworks for understanding conflicts in the realms of public health, global health, medicine, and public policy.; Demonstrate knowledge in major areas of health and society in relation to current debates in medical anthropology and cognate social sciences.; Engage with increasingly popular subfields of the medical social sciences including those on issues of health inequities, care, medical science, sickness, anguish, and resistance.

ESPM C170 Carbon Cycle Dynamics 3 Units
Terms offered: Fall 2021, Spring 2019, Spring 2016
The focus is the (unsolved) puzzle of the contemporary carbon cycle. Why is the concentration of atmospheric CO2 changing at the rate observed? What are the terrestrial and oceanic processes that add and remove carbon from the atmosphere? What are the carbon management strategies under discussion? How can emission protocols be verified? Students are encouraged to gain hands-on experience with the available data, and learn modeling skills to evaluate hypotheses of carbon sources and sinks.

Sustainable Water and Food Security: Read Less [-]
ESPM C177 GIS and Environmental Spatial Data Analysis 4 Units

Terms offered: Spring 2017, Spring 2016, Spring 2015

This course offers an introduction to spatial data analysis. It integrates ArcGIS analysis with spatial statistical analysis for the study of pattern and process applicable to a wide variety of fields. Major topics covered include: spatial sampling, processing data with ARQ Info, exploratory GIS analysis, spatial decomposition, spatial point patterns and Ripley's K function, spatial autocorrelation, geostatistics, spatially weighted regression, spatial autoregression, generalized linear models and generalized linear mixed models.

Rules & Requirements

Prerequisites: Requirements are course in GIS and a course in probability and statistics. We invite participation of undergraduates and graduate students from: ESPM, Landscape Architecture & Environmental Planning, City and Regional Planning, IB, Civil Engineering, Energy and Resources Group, Public Health, Earth and Planetary Science, and other campus departments or units with students interested in learning and using spatial analysis for the environment- both natural and built

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

ESPM 178B Environmental Science Education Practicum 4 Units

Terms offered: Fall 2015, Spring 2010, Spring 2009

Framed around the topic of sustainability, the course engages students from different science majors to apply the content knowledge from their discipline to build curriculum pieces for presentation in high school classrooms. Students develop pedagogical content knowledge and relate teaching theory to practice. Additional topics covered include classroom management and leadership, lesson planning, presentation skills, and readings in science education.

Rules & Requirements

Prerequisites: Consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture, 1 hour of discussion, and 3 hours of fieldwork per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Environmental Science Education Practicum: Read Less [-]
ESPM C179A GC-Maker Lab I: Skills and Theory 2 Units
Terms offered: Fall 2016
In the environmental and biological sciences, one of the biggest challenges in transitioning from student to researcher is learning how to measure something without an off-the-shelf device. This course will provide the theoretical background and the practice of building a Gas Chromatograph (GC) system for environmental research. The first semester is for students who seek to develop fundamental skills in instrumental development and design. The second semester (c179b) is only open to those who have taken this first semester course and will entail the construction of a working gas chromatograph system. This class will be especially useful for students who wish to pursue research following graduation.

GC-Maker Lab I: Skills and Theory: Read More [+]

Rules & Requirements

Prerequisites: Chem 3AL, or instructor permission

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of laboratory per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructor: Rhew

Also listed as: GEOG C179A

GC-Maker Lab I: Skills and Theory: Read Less [-]

ESPM C179B GC-Maker Lab II: Instrument development 4 Units
Terms offered: Spring 2017
In the environmental and biological sciences, one of the biggest challenges in transitioning from student to researcher is learning how to measure something without an off-the-shelf device. This course will involve the actual building a gas chromatograph (GC) system for environmental research. In addition, we will provide the option of building a mini datalogging sensor for measuring basic environmental parameters using the Arduino platform. This course offered in the spring semester is only open to those who have taken this first semester course (c179A), which covers the fundamental skills required to undertake this project. This class is designed for upper division undergraduates to early graduate students.

GC-Maker Lab II: Instrument development: Read More [+]

Rules & Requirements

Prerequisites: Chem 3AL, GC-Maker Lab I (fall semester)

Hours & Format

Fall and/or spring: 15 weeks - 6 hours of laboratory per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructor: Rhew

Also listed as: GEOG C179B

GC-Maker Lab II: Instrument development: Read Less [-]
ESPM C180 Air Pollution 3 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
This course is an introduction to air pollution and the chemistry of earth's atmosphere. We will focus on the fundamental natural processes controlling trace gas and aerosol concentrations in the atmosphere, and how anthropogenic activity has affected those processes at the local, regional, and global scales. Specific topics include stratospheric ozone depletion, increasing concentrations of greenhouse gases, smog, and changes in the oxidation capacity of the troposphere.

Air Pollution: Read More [+]

Rules & Requirements

Prerequisites: CHEM 1A, CHEM 1B, and PHYSICS 8A or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Goldstein

Also listed as: CIV ENG C106/EPS C180

Air Pollution: Read Less [-]

ESPM 181A Fire Ecology 3 Units
Terms offered: Spring 2021, Spring 2019, Spring 2018
Fundamentals of wildland fire including fire behavior modeling, fire history methods, prescribed fire techniques, fire ecology, fire management, fire in the urban-wildland intermix, wildland fire, and ecosystem sustainability. Laboratories on inventory methods, fire history, modeling of fire behavior and risk, and prescribed burning.

Fire Ecology: Read More [+]

Rules & Requirements

Prerequisites: Consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Stephens

Fire Ecology: Read Less [-]

ESPM 182 Forest Operations Management 3 Units
Terms offered: Fall 2020, Fall 2018, Fall 2016
Examination of "on the ground" activities necessary to manage forests. Planning, design, and implementation of activities such as road building, forest harvesting, erosion control, and fire suppression are the central focus of the course. Aspects of timber harvest planning, archaeological surveys related to forest management, road closure, stream bank stabilization, and legislative control of forest operations will also be explored.

Forest Operations Management: Read More [+]

Rules & Requirements

Prerequisites: 101A, 101B, 101C and 101D

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of lecture, 1 hour of discussion, and 4 hours of laboratory per week

Summer: 6 weeks - 3 hours of lecture, 3 hours of discussion, and 6 hours of laboratory per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: York

Forest Operations Management: Read Less [-]
ESPM 183 Forest Ecosystem Management and Planning 4 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
Introduces students to concepts and quantitative tools needed for the sustainable management and planning of multi-use forest ecosystems. Topics covered include: forest regulation; estimation of ecological, economic, and social values; construction of dynamic forest models; methods for optimal decision-making; development of forest management plans; and ethics of natural resource management. Application to current issues in temperate and tropical forest management are discussed. Quantitative, analytical, and communication skills are emphasized. Oral presentation required.
Forest Ecosystem Management and Planning: Read More [+]
Rules & Requirements
Prerequisites: ESPM 102C or instructor permission

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Instructor: O'Hara
Also listed as: ENVECON C183
Forest Ecosystem Management: Read Less [-]

ESPM 184 Agroforestry Systems 3 Units
Terms offered: Fall 2010, Fall 2009, Fall 2008
Agroforestry principles and systems in use worldwide are examined, with emphasis on contemporary temperate agroforestry system design and management. Economic, biologic, social, and political conditions for successful agroforestry systems are analyzed. Some laboratory sessions will be field trips that will extend beyond the scheduled lab time.
Agroforestry Systems: Read More [+]
Rules & Requirements
Prerequisites: Upper division standing

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Altieri

ESPM 185 Applied Forest Ecology 4 Units
Terms offered: Fall 2021, Fall 2020, Fall 2019
Concepts and applications of silviculture for the establishment, growth, composition, and quality of forest trees and stands. Silviculture is presented as a tool to meet multiple resource and ecosystem management objectives related to wildlife habitat, watershed resources, forest health, or timber production. Two weekend field trips will be scheduled in lieu of several laboratories.
Applied Forest Ecology: Read More [+]
Rules & Requirements
Prerequisites: IB 153, ESPM 102A or course in community ecology

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 4 hours of laboratory per week

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: O'Hara
Also listed as: ENVECON C183
Applied Forest Ecology: Read Less [-]
ESPM 186 Management and Conservation of Rangeland Ecosystems 4 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
Begin with the evolution and domestication of grazing animals, continues through ranching and rangeland stewardship practices, and explores new institutional arrangements for conservation and restoration. Woodlands, grasslands, and shrublands provide biodiversity, wildlife habitat, watershed, recreation, open space, and forage. Human practices and ecosystem dynamics meet in rangeland management. Methods for changing, predicting, or assessing the results.

Management and Conservation of Rangeland Ecosystems: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Bartolome, Huntsinger

ESPM 187 Restoration Ecology 4 Units
Terms offered: Spring 2014, Spring 2013, Spring 2012
This course covers ecological theories that inform the practice of ecological restoration, with particular focus on local (Bay Area) restoration and linkages with social, political, and economic factors. Laboratories focus on assessment techniques and cumulate with formulation of a restoration management plan. Laboratories will be based at the Richmond Field Station, served by campus shuttle.

Restoration Ecology: Read More [+]

Rules & Requirements
Prerequisites: One course in ecology; upper division or graduate standing

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture, 1 hour of fieldwork, and 3 hours of laboratory per week

ESPM 194B Capstone Course in Society and Environment 1 Unit
Terms offered: Spring 2020, Fall 2019, Spring 2019
Senior capstone project in the student's primary area of concentration and presentation to the ESPM Society and Environment faculty and majors. Required of all graduating seniors in the ESPM and Society and Environment major. Students who have completed ESPM 195, H196, or 197 may substitute that course for ESPM 194B.

ESPM 195 Senior Thesis 3 - 4 Units
Terms offered: Spring 2021, Fall 2020, Fall 2019
Supervised independent research specific to aspects of ESPM, followed by a written report. It is recommended that students conduct 3-4 units of research for at least one semester prior to enrolling in ESPM 195 in their senior year.

ESPM H196 Honors Research 4 Units
Terms offered: Spring 2020, Spring 2019, Fall 2016
Supervised independent honors research specific to aspects of environmental science, policy, and management, followed by a written report to department. Submission of no more than 300 words required for approval.

Rules & Requirements

Prerequisites: Senior standing in ESPM Society and Environment major

Hours & Format

Fall and/or spring: 8 weeks - 1.5 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam not required.

Senior Thesis: Read More [+]

Rules & Requirements

Prerequisites: Senior standing in ESPM major; 3.0 GPA

Hours & Format

Fall and/or spring: 15 weeks - 3-4 hours of independent study per week

Summer:
6 weeks - 30 hours of independent study per week
8 weeks - 22.5 hours of independent study per week
10 weeks - 18 hours of independent study per week

ESPM 198BC Berkeley Connect 1 Unit
Terms offered: Spring 2022, Fall 2021, Spring 2021
Berkeley Connect is a mentoring program, offered through various academic departments, that helps students build intellectual community. Over the course of a semester, enrolled students participate in regular small-group discussions facilitated by a graduate student mentor (following a faculty-directed curriculum), meet with their graduate student mentor for one-on-one academic advising, attend lectures and panel discussions featuring department faculty and alumni, and go on field trips to campus resources. Students are not required to be declared majors in order to participate.
Berkeley Connect: Read More [+]

Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

ESPM C200 Principles of Phylogenetics 4 Units
The core theory and methodology for comparative biology, beginning with issues in building phylogenetic trees, with emphases on both morphology and molecules, and both living and fossil organisms. Also covers the many applications of phylogenetic trees to systematics, biogeography, speciation, conservation, population genetics, ecology, behavior, development, functional morphology, and macroevolution that have revolutionized those fields. Labs are closely integrated with lectures and cover the major algorithms and computer software used to implement these approaches. Requirements include participation in discussions, two exams, and a term project.
Principles of Phylogenetics: Read More [+]
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

ESPM 201S Environmental Science, Policy, and Management Colloquium 1 Unit
Terms offered: Fall 2019, Spring 2019, Fall 2018
Seminars for the presentation and discussion of original work by faculty, visiting scholars, and graduate students. Core course for the ESPM graduate program.

ESPM C204 Research Reviews in Animal Behavior: Behavior Review 1 Unit
Terms offered: Spring 2022, Fall 2021, Spring 2021
This course will provide a rigorous, critical review of current research in animal behavior. Emphases will include hypothesis testing and experimental design, as well as methods of data collection and analysis. Each week, a student in the course will present original research in the form of a seminar presentation, grant proposal, or manuscript. Through discussion with seminar participants, presenters will gain critical feedback regarding their research.

ESPM 205 Quantitative Methods for Ecological and Environmental Modeling 3 Units
Terms offered: Prior to 2007
This course will review the background mathematical and statistical tools necessary for students interested in pursuing ecological and environmental modeling. Topics include linear algebra; difference equation, ordinary differential equation, and partial differential equation models; stochastic processes; parameter estimation; and a number of statistical techniques. This course will be recommended as a prerequisite for advanced modeling courses in Integrative Biology, Energy and Resources Group, and Environmental Science, Policy, and Management.
ESPM C205 Quantitative Methods for Ecological and Environmental Modeling 3 Units
Terms offered: Fall 2015, Fall 2013, Fall 2012, Fall 2011, Fall 2009
This course will review the background mathematical and statistical tools necessary for students interested in pursuing ecological and environmental modeling. Topics include linear algebra; difference equation, ordinary differential equation, and partial differential equation models; stochastic processes; parameter estimation; and a number of statistical techniques. This course will be recommended as a prerequisite for advanced modeling courses in Integrative Biology, Energy and Resources Group, and Environmental Science, Policy, and Management. Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: de Valpine
Hierarchical Statistical Modeling in Environmental Science: Read Less [-]
ESPM C216 Freshwater Ecology 3 Units
This graduate course will combine formal lectures and discussion, with the overall goal of exposing students to general concepts in freshwater ecology. We will discuss a broad range of topics including freshwater environments and biota, natural selection and adaptive evolution, food webs and trophic cascades, cross-ecosystem linkages, and social-ecological resilience of freshwater ecosystems under global change. Upper division undergraduates are welcome, with permission of the instructors.

Freshwater Ecology: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructors: Carlson, Power
Also listed as: INTEGBI C216

Freshwater Ecology: Read Less [-]

ESPM 217 Political Economy of Climate Change 3 Units
Terms offered: Fall 2020, Fall 2018, Fall 2017
This course examines the comparative and global political economy of climate change, with a focus on the politics of climate change mitigation in the energy sector. Key themes are the choice of policy strategies and policy instruments, industry and climate policy, global institutions and collective action, markets and technological change, and economic and geo-political transformations in response to climate change. The courses combines theoretical readings with in-depth case studies.

Political Economy of Climate Change: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

ESPM C220 Stable Isotope Ecology 5 Units
Course focuses on principles and applications of stable isotope chemistry as applied to the broad science of ecology. Lecture topics include principles of isotope behavior and chemistry, and isotope measurements in the context of terrestrial, aquatic, and marine ecological processes and problems. Students participate in a set of laboratory exercises involving preparation of samples of choice for isotopic analyses, the use of the mass spectrometer and optical analysis systems, and the anlaysis of data.

Stable Isotope Ecology: Read More [+]

Rules & Requirements
Prerequisites: Graduate standing

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructors: Amundson, Dawson, Mambelli
Also listed as: EPS C241/INTEGBI C227

Stable Isotope Ecology: Read Less [-]

ESPM 222 Surface and Colloid Chemistry of Natural Particles 3 Units
Terms offered: Spring 2022, Fall 2017, Fall 2015
Structure and coordination chemistry of natural adsorbent particles in aqueous systems; solute adsorption mechanisms and theoretical models; interparticle forces and colloidal phenomena; applications to biogeochemistry and contaminant hydrology.

Surface and Colloid Chemistry of Natural Particles: Read More [+]

Rules & Requirements
Prerequisites: 126 or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Sposito

Surface and Colloid Chemistry of Natural Particles: Read Less [-]
ESPM C225 Isotopics 2 Units
Terms offered: Fall 2020, Fall 2019, Fall 2018
This seminar will explore current topics that employ the use of stable isotopes. Discussion topics include the areas of biology, paleontology, biogeochemistry, soil science, and atmospheric science. Students will be required to lead at least one discussion of relevant literature in the topic area.
Isotopics: Read More [+]

Hours & Format
Fall and/or spring: 10 weeks - 3 hours of seminar per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructors: Amundson, Dawson, Mambelli
Also listed as: INTEGBI C226
Isotopics: Read Less [-]

ESPM 226 Interdisciplinary Food and Agriculture Studies 3 Units
Terms offered: Spring 2018, Fall 2015, Spring 2014
A graduate seminar exploring the ecological, social, and economic risks inherent in different forms of agriculture, from highly diversified, agroecological farming systems to industrialized agriculture. We will examine how different farm management techniques, government policies, supply chains, R&D, technology, and science may influence various risks and uncertainties, including climate change, agrobiodiversity, farmer livelihoods, food safety, public health, and nutrition.
Interdisciplinary Food and Agriculture Studies: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructors: Iles, Kremen
Interdisciplinary Food and Agriculture Studies: Read Less [-]

ESPM 227 Science Communication 2 Units
Terms offered: Fall 2020
Effective communication is an important skill that all scientists should master. There are many different forms of communication, and these require different approaches and techniques. The goal of this course is to provide students with the skills to communicate scientific findings to a wide range of audiences. We will discuss approaches to communicating our findings and those of others to other scientists, the public, and the media. We will then prepare and practice communicating through papers, proposals, presentations, sound bites, and podcasts. Exercises and assignments are designed to give students hands on experience developing their own stories and packaging them to selected audiences.
Science Communication: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Silver
Science Communication: Read Less [-]

ESPM 228 Advanced Topics in Biometeorology and Micrometeorology 2 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
Measurement and modeling of trace gases and energy between the terrestrial biosphere and atmosphere. Micrometeorological flux measurement methods, including eddy covariance, profile, and eddy accumulation methods. A hierarchy of biophysical models are discussed for interpreting flux measurements. Information and theory on big-leaf, two-layer, and multi-layer models that couple energy, water, and carbon to predict trace gas fluxes are presented. How models integrate information from leaf to canopy to landscape scales is discussed.
Advanced Topics in Biometeorology and Micrometeorology: Read More [+]

Rules & Requirements
Prerequisites: C129 or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Baldocchi
Advanced Topics in Biometeorology and Micrometeorology: Read Less [-]
ESPM 230 Sociology of Agriculture 4 Units
Terms offered: Spring 2022, Spring 2021, Fall 2020
This graduate seminar explores the sociology of agriculture and food systems, addressing key theories and topics in the field. We begin with the antecedents of the sociology of agriculture, including foundation classical agrarian theories and an overview of the field, followed by topics ranging from pesticide drift to agricultural labor injustice to food sovereignty movements and more. This course is most appropriate for students with some background in agri-food and social systems.

Sociology of Agriculture: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: De Master

Sociology of Agriculture: Read Less [-]

ESPM 232 Indigenizing Cultural Heritage Management and Land Stewardship 4 Units
Terms offered: Spring 2022
The purpose of this course is to examine heritage management and the stewardship of cultural and ecological resources. We will discuss cultural and environmental laws, Indigenous knowledge, epistemologies, and frameworks for approaching research and compliance with tribes, agencies, and organizations. Themes include culture-nature interrelationships, intersections between Indigenous and non-Indigenous ways of knowing, and building toward futures that are more inclusive of these Indigenous perspectives and practices. How can we decolonize and Indigenize our respective disciplines? At the core of successful research and resource management with Indigenous peoples is the ability to work collaboratively, reflexively, and responsively.

Indigenizing Cultural Heritage Management and Land Stewardship: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Nelson

Indigenizing Cultural Heritage Management and Land Stewardship: Read Less [-]

ESPM C234 Green Chemistry: An Interdisciplinary Approach to Sustainability 3 Units
Terms offered: Spring 2016, Spring 2015, Spring 2014, Spring 2013
Meeting the challenge of global sustainability will require interdisciplinary approaches to research and education, as well as the integration of this new knowledge into society, policymaking, and business. Green Chemistry is an intellectual framework created to meet these challenges and guide technological development. It encourages the design and production of safer and more sustainable chemicals and products.

Green Chemistry: An Interdisciplinary Approach to Sustainability: Read More [+]

Rules & Requirements
Prerequisites: One year of chemistry, including a semester of organic chemistry, or consent of instructors based on previous experience

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Summer: 6 weeks - 20 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructors: Arnold, Bergman, Guth, Iles, Kokai, Mulvihill, Schwarzman, Wilson

Also listed as: CHEM C234/PB HLTH C234

Green Chemistry: An Interdisciplinary Approach to Sustainability: Read Less [-]
ESPM 235 Indigenous Environmental Studies
4 Units
Terms offered: Spring 2022, Spring 2021
This seminar examines the relationship between Indigenous societies and the environments that shape, and are shaped by them. We will discuss defining and supporting sustainability; what environmental governance has looked like as tribal nations and settler governments have grappled for control over natural resources; issues around developing and utilizing “natural resources” on tribal land; how traditional environmental knowledge (TEK) and Indigenous science can be applied in environmental co-management; the struggle to achieve environmental justice and how Indigenous communities fit into the broader EJ movement; and the broader struggle to protect the waters so vital to the perpetuation of healthy communities.

ESPM 244 Spatial Ecology 3 Units
Terms offered: Fall 2021, Fall 2018, Fall 2017
Spatial heterogeneity is a key feature of many ecological patterns and processes. This course will explore how spatial data and analysis can answer fundamental questions in ecology, evolution, and conservation through discussions of recent research and workshops on performing spatial analysis in R. Topics to be covered include spatial autocorrelation, habitat fragmentation, population dynamics, conservation and landscape genetics, simulation methods, niche modeling, and spatial statistics.

ESPM 248 Special Topics and Advanced Seminars in Entomology 0.0 Units
Terms offered: Prior to 2007
Special Topics and Advanced Seminars in Entomology: Read More [+]

ESPM 249 Bioethics, Law, and the Life Sciences 3 Units
Terms offered: Spring 2013
Developments in biotechnology and the life sciences are unsettling legal and policy approaches to intellectual property, reproduction, health care, medical research, and the criminal justice system. Through reading primary materials and relevant secondary sources, this course investigates ethical, legal, and policy problems associated with these developments, and explores possible solutions.

ESPM 235 Indigenous Environmental Studies: Read More [+]

Hours & Format

ESPM 253 Advanced Readings in Political Ecology 4 Units
Terms offered: Spring 2022, Spring 2021, Fall 2018
Critique and comparison of literature in political ecology—an approach to sociological analysis of environmental change focusing on environmental conflict. Initial sessions address the definition of political ecology, its origins, and the politics and discourses of natural resource management. Literature includes domestic and international research involving the combination of social and environmental history, local perspectives, and political economy to discuss accounts of social and environmental change. Advanced Readings in Political Ecology: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor; significant background in social theory

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Peluso

ESPM C254 Ethnic and Cultural Diversity in Health Status 4 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2016, Spring 2015, Spring 2013
Focus on ethnic and cultural diversity in health behavior as a basis for public health programs. Consideration of U.S. ethnic minority groups and cultural groups in non-Western societies. Health status and behavior examined in context of relevant social and anthropological theory (social class, acculturation, political economy). Influence of socio-cultural background on concepts of health, illness, and health-seeking behavior. Implications for planning public health programs and policies.
Ethnic and Cultural Diversity in Health Status: Read More [+]

Hours & Format

Instructor: Fortmann
Also listed as: GEOG C250

ESPM 256 Science, Technology, and the Politics of Nature 3 Units
Terms offered: Fall 2011, Spring 2011, Spring 2009
This course will introduce the methods and theories of Science and Technology Studies (STS) in order to explore the relationships among science, technology, law, and politics in the domains of environment and health. The course will focus some attention on the tension between technocracy and democracy in science policy, and on the role of biotechnology in reshaping the natural and political order. The course will equip graduate students in the social sciences, law, life sciences, and public policy with theoretical and practical tools for analyzing complex problems at the science, technology, and society interface.
Science, Technology, and the Politics of Nature: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate

ESPM 259 Transnational Environmental Politics and Movements 3 Units
Terms offered: Spring 2022, Spring 2021, Spring 2018
Contemporary issues in international environmental politics; impacts of globalization on the environment; comparative transnational environmental movements. Study of current and historical texts. Case studies drawn from around the world with a focus on methods and research techniques.

Rules & Requirements
Prerequisites: Upper division course in environmental policy or social science

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: O'Neill

ESPM 260 Governance of Global Production 3 Units
Terms offered: Fall 2021, Spring 2020, Spring 2019
This course explores critical policy and theoretical questions in the governance of global production. Current trends in the restructuring of industrial production; distributions of environmental, labor, and social impacts from this production; and new strategies for democratic governance are analyzed, including corporate self-regulation, monitoring, certification and labeling, fair trade programs, legal strategies, and international accords and agreements.

Governance of Global Production: Read More [+]

Rules & Requirements
Prerequisites: Graduate standing or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Grading: Letter grade.
Instructor: O'Rourke

ESPM 261 Sustainability and Society 3 Units
Terms offered: Fall 2020, Fall 2018, Fall 2017
Science-based technologies that are central to the search for sustainability in contemporary societies and their environmental impacts. Theoretical approaches to investigating how science, technology, and environment intersect. How societies move closer to sustainable technological systems. Redesign of existing technologies and the introduction of new technologies. How adverse impacts can be prevented through policy. Case studies of contemporary developments.

Rules & Requirements
Prerequisites: Graduate standing or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Iles

ESPM 262 Race, Identity, and the Environment 3 Units
Terms offered: Spring 2022, Spring 2021, Spring 2019
Advanced readings on environment and race. Shifting meanings of "race" and its application and usefulness in theorizing human-environment relationships. Foundations of environmental ideas and attitudes towards the natural environment and their connections to contemporary environmental practices. Construction of environmental narratives and images in defining ideas of racial and place identity. How representations of the natural environment are structurally and culturally racialized within environmental institutions and the media. Post-race possibilities.

Rules & Requirements
Prerequisites: Graduate standing or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Finney

Race, Identity, and the Environment: Read Less [-]
ESPM 263 Indigenous, Feminist, and Postcolonial Approaches to Science, Technology, and Environment 4 Units
Terms offered: Spring 2013, Spring 2012, Spring 2011
This seminar presents material from indigenous studies; feminist and postcolonial science and technology studies (STS), including animal studies; political ecology; and other fields. It engages non-dominant knowledges while interrogating the role of key technoscientific concepts (modernity, objectivity, universality) in colonizations of both humans and nonhumans. This course highlights the role of critical methods in shifting power relations in research, including students' own research.

ESPM 271 Advanced Remote Sensing of Natural Resources 3 Units

Terms offered: Fall 2019, Fall 2018, Fall 2014

The course provides a discussion of the advanced topics in remote sensing and image analysis for environmental applications. Topics include airborne and satellite remote sensing data acquisition; spatial, spectral, radiometric, and temporal resolutions; image display systems, classification algorithms; accuracy assessment; and integration in a geospatial context. Students will select either a lab assignment or conduct a project using multispectral, Hyperspectral, RADAR, SAR, LiDAR, etc. data, write a report and make a presentation to the class. If project option is selected, a working knowledge of ERDAS Imagine or another image processing system is required. The Geospatial Innovation Facility (GIF) will be available to all students.

Rules & Requirements

Prerequisites: 172, Statistics 20, or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Graduate

Grading: Letter grade.

ESPM 277 Advanced Topics in Conservation Biology 3 Units

Terms offered: Fall 2018, Fall 2017, Fall 2016

A graduate level seminar covering advanced topics in conservation of biodiversity, focused on designing protected area networks. We will first lay the groundwork for the course by exploring the fundamental papers in ecology and conservation biology that led to systematic conservation planning. Then, we will study various issues at the current frontiers of the discipline, such as incorporating threats, costs, evolutionary processes, and ecosystem services into reserve network design. The class will encourage student engagement through discussions, group projects, peer instruction and peer review of essays.

Advanced Topics in Conservation Biology: Read More [+]

Rules & Requirements

Prerequisites: Undergraduate courses in ecology, population biology, or conservation biology

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Advanced Topics in Conservation Biology: Read Less [-]
ESPM 278 Range Assessment 3 Units
Rangeland vegetation sampling techniques with emphasis on comparing
the relative efficiency of different techniques of vegetation measurement.
Includes weekly lab exercises on artificial sampling boards and/or in the
field. Juniors and seniors are encouraged.
Range Assessment: Read More [+]

Rules & Requirements
Prerequisites: 186 and one semester of statistics

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of
laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Allen-Diaz

Range Assessment: Read Less [-]

ESPM 279 Seminar on Pastoralism 3 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
A survey of pastoral animal management and production systems,
as they influence and are influenced by the rangeland environment.
Review of the evolution of animal management practices; contemporary
management systems in California, the West, and worldwide; and
production systems with both traditional and nontraditional goals.
Examination of agroforestry and nomadic and transhumant grazing
systems, sheep and cattle production, game ranching, and organic meat
production will be included.
Seminar on Pastoralism: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Huntsinger

ESPM 280 Seminar in Range Ecosystem Planning and Policy 3 Units
Terms offered: Spring 2022, Fall 2018, Fall 2016
A seminar course dealing with selected current topics in range ecosystem
planning and policy.
Seminar in Range Ecosystem Planning and Policy: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Grading: Letter grade.
Instructor: Huntsinger

ESPM 281 Seminar in Wildlife Biology and Management: Read Less [-]
ESPM C282 Health Implications of Climate Change 3 Units
The course will provide a basic foundation in the physical mechanisms of responses to, and health implications of climate change. We will explore the variety of epidemiologic, risk assessment, and statistical methods used to understand the impacts of climate change on health across diverse demographic groups. The public health implications, positive and negative, of efforts to mitigate and adapt to climate change will be elaborated, including discussions of ethical, political, and economic aspects of these efforts. Students will be responsible for leading class discussions and presenting a poster on their choice of a topic related to climate change and health.

Health Implications of Climate Change: Read More [+]

Rules & Requirements

Prerequisites: The material will be presented with minimal expectation of a background in physical science, although some additional reading may be needed for students with no university science courses. A background in epidemiology is also helpful, but not necessary.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructors: Jerrett, Morello-Frosch
Also listed as: PB HLTH C271G

Health Implications of Climate Change: Read Less [-]

ESPM 284 Demographic Methods for Population Viability Analysis 3 Units
Terms offered: Fall 2009, Fall 2007, Fall 2002
Application of demographic methods to the management of plant and animal populations. Conservation problems faced by small populations of threatened or exploited species will be emphasized. Implications for life-history theory will also be discussed. Demographic analyses include (1) an understanding of life cycle diagrams, projection matrices, and age- and stage-based approaches; (2) calculation of population growth rate and sensitivity of demographic parameters to perturbation; and (3) advanced techniques of stochastic simulation modeling, spatial analyses, and population viability analyses will be learned.

Demographic Methods for Population Viability Analysis: Read More [+]

Rules & Requirements

Prerequisites: Graduate standing or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Beissinger

Demographic Methods for Population Viability Analysis: Read Less [-]

ESPM 288 Reproducible and Collaborative Data Science 3 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
Introduction to principles and tools for reproducible and collaborative data science, including data curation and cleaning, version control, virtual machines, scripted work flow, hypothesis-driven exploratory data analysis, data visualization, and communication. Students will be introduced to git, Python,R, and LaTeX. The class will navigate a series of problem-driven analyses, focused on case studies and independent projects, leading to reproducible products that allow updated analyses as new data become available. Projects by first year trainees will be presented at the Annual Symposium.

Reproducible and Collaborative Data Science: Read More [+]

Rules & Requirements

Prerequisites: Previous experience in R programming or equivalent background expected

Hours & Format

Fall and/or spring: 15 weeks - 4 hours of laboratory per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Boettiger

Reproducible and Collaborative Data Science: Read Less [-]
ESPM C289 Applied Remote Sensing 3 Units
Terms offered: Spring 2022
This course consists of one lecture and one computer lab per week introducing fundamental principles and methods of environmental remote sensing and their practical applications. We will explore strategies for working with different types of remote sensing data and extracting image-based landscape information for various environmental research and planning objectives. This course focuses largely on local to regional scale applications of remote sensing in ecology, environmental planning and design, civil & environmental engineering and natural resource management.

Applied Remote Sensing: Read More [+]

Objectives & Outcomes

Course Objectives:
Learn practical skills and techniques to extracting landscape information from remote sensing data as image interpretation, classification, accuracy assessment, mapping and change analysis.

Become familiar with different types of data and instruments in remote sensing and learn how to choose the optimal remote sensing data and procedure for various landscape and environmental analysis applications.

Explore traditional and novel remote sensing techniques and their use in landscape planning, environmental studies and natural resource management.

Develop the capacity to work with the remote sensing literature and synthesize the relevant knowledge across different studies.

Rules & Requirements

Prerequisites: An introductory GIS course such as LA C188/Geography C188 or equivalent

Credit Restrictions: Students will receive no credit for LD ARCH C289 after completing LD ARCH 289. A deficient grade in LD ARCH C289 may be removed by taking LD ARCH 289.

Hours & Format

Fall and/or spring: 15 weeks - 1.5 hours of lecture and 1.5 hours of laboratory per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Graduate

Grading: Letter grade.

Instructor: Dronova

Also listed as: LD ARCH C289

ESPM 290 Special Topics in Environmental Science, Policy, and Management 1 - 4 Units
Terms offered: Spring 2022, Fall 2021, Spring 2021
Study and critical analysis of topics, research, and texts pertinent to environmental science, policy, and management. Different topics will be available each semester reflecting faculty and student interest.

Special Topics in Environmental Science, Policy, and Management: Read More [+]

Rules & Requirements

Prerequisites: Graduate standing or consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of seminar per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Graduate

Grading: Letter grade.

Special Topics in Environmental Science, Policy, and Management: Read Less [-]

ESPM 296 Individual Study 1 - 7 Units
Terms offered: Spring 2022, Spring 2021, Fall 2020
Individual study in consultation with a member of the faculty directed to analysis and synthesis of the literature of a specialized subject area in forestry and resource management.

Individual Study: Read More [+]

Rules & Requirements

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 1-7 hours of independent study per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Individual Study: Read Less [-]
ESPM 298 Directed Group Study 1 - 6 Units
Terms offered: Spring 2022, Fall 2021, Spring 2021
Advanced study of research topics which vary each semester.
Directed Group Study: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 3-18 hours of directed group study per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: The grading option will be decided by the instructor when the class is offered.
Directed Group Study: Read Less [-]

ESPM 299 Individual Research 1 - 12 Units
Terms offered: Spring 2022, Fall 2021, Spring 2021
Individual research under the supervision of a faculty member.
Individual Research: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Individual Research: Read Less [-]

ESPM N299 Individual Research 1 - 8 Units
Terms offered: Summer 2021 Second 6 Week Session, Summer 2020 Second 6 Week Session, Summer 2016 8 Week Session
Individual research under the supervision of a faculty member.
Individual Research: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Summer:
6 weeks - 2.5-20 hours of independent study per week
8 weeks - 1.5-15 hours of independent study per week
10 weeks - 1.5-12 hours of independent study per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Formerly known as: Entomological Sciences 299, Forestry and Resource Management 299, Plant Pathology 299, and Soil Science 299
Individual Research: Read Less [-]

ESPM 300 Supervised Teaching in Environmental Science, Policy, and Management 1 - 6 Units
Terms offered: Spring 2022, Fall 2021, Spring 2021
Teaching methods at the University level; course content; problem set review and development; guidance of laboratory experiments; course development and evaluation; supervised practice teaching.
Supervised Teaching in Environmental Science, Policy, and Management: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor and appointment as graduate student instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/
Professional course for teachers or prospective teachers
Grading: Offered for satisfactory/unsatisfactory grade only.
Supervised Teaching in Environmental Science, Policy, and Management: Read Less [-]
ESPM C302 Effective Scientific Communication 3 Units
Terms offered: Fall 2009, Fall 2007
This course will introduce methods of organizing and delivering oral presentations, initiating and organizing manuscripts, and utilizing digital communication methods, such as web-based media. Students will develop effective communication techniques through in-class experience. This class will have an emphasis on the sciences but will be useful and open to graduate students of all disciplines.

Effective Scientific Communication: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Professional course for teachers or prospective teachers
Grading: Letter grade.
Instructors: Resh, Rhew
Also listed as: GEOG C302
Effective Scientific Communication: Read Less [-]

ESPM 375 Professional Preparation: Teaching in Environmental Science, Policy, and Management 2 Units
Terms offered: Fall 2021, Fall 2020, Fall 2019
This course is designed to better prepare graduate students for their GSI appointments, and to foster graduate student professional development in academia. The disciplinary theme for the course is on interdisciplinary teaching and multiple ways of teaching in the environmental fields. GSIs are introduced to their roles and responsibilities as instructors in these various learning environments, and to resources to enhance teaching. The course facilitates experimentation with different teaching methods, serves as a forum for sharing information on pedagogical practices, and provides feedback on teaching. As requested by students, the course is front-loaded with practical tools for classroom teaching.

Professional Preparation: Teaching in Environmental Science, Policy, and Management: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Professional course for teachers or prospective teachers
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructors: Cons of instructor and appointment as graduate student researcher

ESPM 400 Professional Training in Research 1 - 6 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
Training for students in planning and performing research under the supervision of a faculty member. This course is intended to provide credit for experience obtained.

Professional Training in Research: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor and appointment as graduate student researcher
Credit Restrictions: Course does not satisfy unit or residence requirements.
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Other professional
Grading: Offered for satisfactory/unsatisfactory grade only.
Professional Training in Research: Read Less [-]

ESPM 601 Individual Study for Master's Students 1 - 8 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
Individual study for the comprehensive examination in consultation with the field adviser.

Individual Study for Master's Students: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor
Credit Restrictions: Course does not satisfy unit or residence requirements for master's degree.
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Summer:
6 weeks - 1-5 hours of independent study per week
8 weeks - 1-4 hours of independent study per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate examination preparation
Grading: Offered for satisfactory/unsatisfactory grade only.
Individual Study for Master's Students: Read Less [-]
ESPM 602 Individual Study for Doctoral Students 1 - 8 Units

Terms offered: Spring 2020, Spring 2019, Spring 2018

Individual study in consultation with the major field adviser, intended to provide an opportunity for qualified students to prepare themselves for the various examinations required of candidates for the Ph.D.

Individual Study for Doctoral Students: Read More [+]

Rules & Requirements

Prerequisites: Consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 0 hours of independent study per week

Summer:
6 weeks - 1-5 hours of independent study per week
8 weeks - 1-4 hours of independent study per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Graduate examination preparation

Grading: Offered for satisfactory/unsatisfactory grade only.
