

Graduate School of Education

Overview

The Graduate School of Education is committed to high-quality scholarship and professionalism in order to prepare future leaders of education practice, policy, and research. Faculty research and teaching are grounded equally in theory and practice. Our research, teaching, and practice approaches support a vision of public education that has as its goal equity and inclusion at all levels — classroom, school, community, district, state, national, and global — and that positively impacts personal growth and social transformation. Our renowned faculty engage students in theoretical and practical studies, providing opportunities to develop interdisciplinary scholarship, as well as to participate in field studies, unpack the history and philosophy of education, and explore cutting-edge research.

The Graduate School of Education offers Doctor of Philosophy (PhD), Master's of Arts (MA), and credential degree programs. The PhD degree is designed for students interested in pursuing scholarly research and academic careers in education. The MA degree serves the interest of students who want to carve out a career in education, either as an education researcher or as an education practitioner. Credential programs, which all contain an MA component, are designed for students who plan to work in schools as teachers, principals, district and county administrators, and school psychologists.

The school also offers an undergraduate minor in Education.

MA/PhD Program

Students build their knowledge about education and its policies and practices in a dynamic learning environment facilitates the development of human, organizational, and systemic capacities. The breadth of our faculty's expertise allows students to conduct research in a number of areas, including:

- Critical Studies of Race, Class, and Gender (<https://gse.berkeley.edu/critical-studies-race-class-gender>)
- Culture, Development, and the Learning Sciences (<https://gse.berkeley.edu/culture-development-learning-sciences>)
- Policy, Politics, and Leadership (<https://gse.berkeley.edu/policy-politics-leadership>)
- Social Research Methodologies (<https://gse.berkeley.edu/social-research-methodologies>)

Preparing for K-12

Students learn how to develop professional leadership skills and elevate your understanding of the causes of educational inequality, and contribute to the development of pedagogical, curricular, and policy innovations that provide for greater educational opportunities. We prepare students for a career in one of these fields:

- Classroom teaching
- School site leadership (principals and other administrators)
- District-level/systems leadership; or
- Other education-related fields

Learn more about the GSE's Professional Programs (<https://gse.berkeley.edu/careers-k-12-education>).

Additional Programs

Graduate Group in Science and Mathematics Education (SESAME) (<http://gse.berkeley.edu/sesame>)

Informally known as SESAME, this interdisciplinary graduate program is for students who seek advanced expertise in a scientific discipline as well as in educational theory and research methodologies. The course of study leads to a doctoral degree in science, mathematics, or engineering education.

Intersection of Sport and Education (<https://gse.berkeley.edu/language-literacy-society-culture/csse>)

We investigate the ways in which institutionalized sport both conflicts with and complements the educational missions of American secondary and post-secondary schools.

School Psychology (<https://gse.berkeley.edu/school-psychology/school-psychology-program-philosophy>)

Our School Psychology program is based on the assumption that school psychologists, through the skilled application of their knowledge, can work together with teachers and other education professionals to clarify and resolve problems regarding the educational and mental health needs of children in classrooms.

Special Education (Joint Doctoral Program with SF State University) (<https://gse.berkeley.edu/cognition-development/joint-special-ed>)

This program prepares leaders in research, teaching, administration, and supervision for the variety of professional needs facing children, youth, and adults with disabilities. It integrates the resources of Berkeley and SFSU, allowing students to combine theoretical interests with applied practices in a broad spectrum of specializations within Special Education.

Undergraduate Program

Education

EDUC 24 Freshman Seminar 1 Unit

Terms offered: Fall 2017, Fall 2016, Fall 2015

The Freshman and Sophomore Seminar program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman Seminars are offered in all campus departments, and topics vary from department to department and semester to semester. Limited to 15 freshmen.

Freshman Seminar: [Read More](#) [+]

Rules & Requirements

Repeat rules: Course may be repeated for credit when topic changes. Course may be repeated for credit when topic changes.

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of seminar per week

Additional Details

Subject/Course Level: Education/Undergraduate

Grading/Final exam status: The grading option will be decided by the instructor when the class is offered. Final exam not required.

EDUC 39A Freshman/Sophomore Seminar: Applying the Universal Design Paradigm to Enhance Educational Access for All Students 3 Units

Terms offered: Summer 2016 10 Week Session, Summer 1998 10 Week Session, Fall 1997

What is access? In this course, students will refine their definition of educational access and learn about the paradigm of universal design, a set of principles originally developed to ensure that the built environment was accessible to all. Universal design has expanded to apply to learning contexts. Educators, in addition to applying universal design to tangible aspects of the learning environment, are also applying it to intangible elements (curriculum, teaching philosophy and practices, etc.) in order to create barrier-free learning environments that serve diverse student populations. Students will analyze the elements that allow for all students to have fair and equal participation in educational settings.

EDUC 39B Freshman/Sophomore Seminar: Reading the Research University 3 Units

Terms offered: Summer 2014 10 Week Session

How do undergraduates thrive in a research university? This course provides a multi-disciplinary framework for students to interrogate and analyze their educational experiences, including the structures, paradigms, and schooling practices that help shape those experiences. Students will also "read the research university" in order to understand the historical, social, cultural, and economic factors that have created and shaped UC Berkeley. Through this course, students will develop academic frameworks that will inform their learning processes and hone strategies to navigate and thrive in the university.

EDUC 40AC Experiencing Education: Political Economy, White Supremacy, and Educational Desire 4 Units

Terms offered: Spring 2018, Spring 2017, Spring 2015

Explores the complex relationship among diversity, equality, inequality, and educational systems by focusing on the conceptual categories of race, class, and gender in the organization of educational opportunity. Explores the ways in which these categories intersect in people's lives. Incorporates a semester-long project that enables students to develop research skills as they apply their new understandings to the educational challenges facing local districts and communities.

EDUC 52 Understanding Language in Society 3 Units

Terms offered: Fall 2014, Fall 2013, Fall 2012

This course explores how language is influenced by social factors. The topics include dialects and standard English, slang, and the influence of gender, identity, and bilingualism on language use, highlighting the diverse ways in which people use language to communicate with one another. A secondary objective is to teach strategies that are proven effective for successful and efficient reading, writing, learning, and studying. These strategies will be applied to the content of this class and be useful in students' other classes.

EDUC 52AC Understanding Language in Society 3 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

This course will explore how speaking, reading and writing are influenced by social and cultural factors. The topics include dialects, Standard English, and slang; the influence of identity on language use; and the dynamic and diverse ways in which people use language to communicate with one another and in their communities. The course will begin by exploring how people communicate within the university, or academic discourse, and how this impacts academic achievement. Thus, a secondary objective is to examine literate strategies and practices of being a student that lead to higher academic achievement.

EDUC 75AC American Sports, Culture, and Education 3 Units

Terms offered: Spring 2013, Fall 2010, Fall 2009

American sports and athletes have come to signify a complex of variegated meanings that include desire, but also disdain. Through the work of a variety of scholars, researchers, and journalists, this course explores the nature and motives of societal structures and practices (embodied in both institutions and individuals) to illuminate the intersections and reciprocal influences of society and sports. The central framework of this course draws on the notion that the space of sports is defined by highly structured societal practices and consumptions. By critically analyzing a variety of these practices, this course attempts to ground a partial reading of other societal forces in American culture. In particular, the course examines the nuanced intersections of sport, race, ethnicity, social class and gender, highlighting the ways in which American sports provide a potential vehicle for social mobility and integration while simultaneously reproducing existing cultural stereotypes and structures of inequality.

EDUC 112 Reforms in Elementary Education: Psychological and Sociocultural Foundations 3 Units

Terms offered: Spring 2011, Spring 2009, Spring 2008

The course introduces students to relationships between research on cognitive development and reforms in elementary teaching. The syllabus is organized in modules that link research and classroom practice. For example, in a module on children's mathematics, we analyze research on children's strategies for solving math problems and consider how this research has reformed teaching practices. Students complete a project for each module that links research and observations in elementary classrooms through concurrent enrollment in one unit of 197.

EDUC 114D Practicum in Early Development and Education, Children Birth to Age 5 4 Units

Terms offered: Spring 2009, Spring 2008

This course will provide students with an understanding of theories and practices in early care and education, specifically focused on children from infancy to age 5. It will also provide an opportunity for students to apply knowledge and reflect upon experiences teaching in a high-quality environment for young children. Course topics will span infant, toddler, and preschool early care and education programs and the age groups for whom such programs are designed. Special attention will be given to 1) curriculum approaches and theories in early care and education programs, 2) educational practices related to culturally, linguistically, and economically diverse student populations, and 3) child observation and classroom organization and practices. In addition, the course will cover changing expectations for children and their teachers, programming for children with special needs, teacher relations with children, parents and other staff, peer relationships, managing challenging child behaviors and identifying quality. Field experience will include working with young children in an infant, toddler or preschool quality program on the UC Berkeley campus or in the surrounding area.

EDUC 130 Knowing and Learning in Mathematics and Science 3 Units

Terms offered: Summer 2018 8 Week Session, Spring 2018, Fall 2017
This course offers a sequence of collaborative problem-solving and reflection activities through which students will be able to appreciate and develop a coherent, effective approach to the teaching and learning of any mathematical or scientific conceptual domain. Issues of cognition, culture, and pedagogy will emerge from participants' struggles to explain their own reasoning. In-class problem solving experiences will provide grist for reflection. Extensive readings are discussed in a bSpace forum. Students are placed in, and do course projects in, local classrooms. Knowing and Learning in Mathematics and Science: Read More [+]

EDUC N140 Literacy: Individual and Societal Development 4 Units

Terms offered: Summer 2015 10 Week Session, Summer 2015 Second 6 Week Session, Summer 2014 Second 6 Week Session

This course combines theory and practice in the study of literacy and development, while simultaneously introducing students to socio-cultural educational theory and research. This research perspicaciously and critically analyzes extant literature on literacy teaching and learning. This literature will be examined in practice through participation in tutoring and technology-oriented summer programs. In addition, this course satisfies the American Cultures requirement and will contribute to understanding of race, cultures, and ethnicity in the United States. We will develop a view of literacy, not as a neutral skill, but as embedded within culture and as depending for its meaning and its practice upon social institutions and conditions. In addition to lecture, students are to participate in field work hours.

EDUC 146 Language, Culture, and Migration Practices in the Maya Diaspora 3 Units

Terms offered: Prior to 2007

This course engages a selection of themes examining the language, culture, and migration practices of indigenous immigrant youth from Yucatan (Mexico) to San Francisco and the U.S. more broadly. This course aims to raise awareness of the complex background and present-day issues that multilingual and multicultural indigenous students experience in migration and in our schools and society. While the course is aimed at undergraduate students, graduate students are welcome.

EDUC 146A Education and Migration: Indigeneity in Yucatan and Its Diaspora 6 Units

Terms offered: Summer 2017 10 Week Session

Course addresses complex issues influencing the social experiences of indigenous immigrant youth and their families in the Maya Diaspora (Yucatan-SF). The course introduces contextual background (historical, political, economic, social) to the creation of Maya indigeneity and representation in Yucatan and in the US. It will also address pan-maya social movements that have tried to redefine cultural and linguistic identities.

EDUC C148 Education and International Development 4 Units

Terms offered: Spring 2018, Fall 2016, Fall 2015, Fall 2014

This course is designed to provide a comprehensive overview of international development education. Through the use of lectures, discussions, and multimedia presentations, students will examine three core themes: 1) the purpose of education; 2) how contemporary development policy conceptualizes education; 3) education as a tool for social transformation. To the extent possible, the course draws connections between theory and practical case studies of international education programs, policy statements, and initiatives.

EDUC 151 Education, the Student Body, and Disability 3 Units

Terms offered: Prior to 2007

The course will trace the genealogy of educational curriculum reform movements and draw parallels to how students with disabilities have been excluded from physical, social, and sports opportunities within educational spaces historically. Particular focus will be placed on the student body at the intersection of sport and school, analyzing the historical and controversial relationship between athletics and American educational institutions. A critical component of the course requires students to participate in an engaged scholarship experience with our local non-profit partners. Students will have the opportunity to reflect on readings and engaged scholarship experiences through regular course assignments.

EDUC 163 Contemporary Issues in U.S. Education 3 Units

Terms offered: Spring 2016

This course surveys the major events, as well as broader social, political, and economic forces, that have coalesced to shape U.S. public schools today and the contemporary reforms that policy makers have designed to improve them. We accomplish this by exploring the scholarship on the roots of educational inequality, the history of school reform, and the most prominent reforms that are present in American schools today. We engage with primary research, historical artifacts, advocacy documents, and guest speakers who represent a range of ideological and political perspectives.

EDUC C181 Race, Identity, and Culture in Urban Schools 3 Units

Terms offered: Fall 2015, Fall 2014, Fall 2013

This course will focus on understanding urban schools as a part of a broader system of social stratification and the process by which students in urban schools come to a sense of themselves as students, as members of cultural and racial groups, and as young people in America. Topics include racial identity; race/ethnicity in schools; urban neighborhood contexts; and schooling in the juvenile justice system. Students will also integrate course readings with their own first-hand experience working in one of several off-campus sites. This course has a mandatory community engagement component for which students will earn 1 unit of field study (197) credit.

EDUC 183 High School, The Movie 3 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

High school plays a pivotal role in American life. It both serves as a gatekeeper of educational and economic success and embodies hopes of transcending social divisions. Like high school itself, movies about it have fostered youth culture and helped Americans make sense of the intersection of democratic aspirations and social divisions. This course examines how the reality and representation of high schools combine to reflect and define American society and the lives of American youth.

EDUC 200D Psychosocial Development: Identity, Culture, and Education 3 Units

Terms offered: Fall 2017, Fall 2016, Fall 2014

This course is a doctoral seminar in developmental psychology, with a broad focus on psychosocial development and its impact on children in educational contexts. The course begins with a discussion of Erikson's psychosocial theory and the sociocultural perspectives of Vygotsky and other theorists. We then review some of the major psychosocial variables related to educational achievement, including competence, motivation, self-concept, self-efficacy, self-regulation, and volition. We touch briefly on moral development and values as psychosocial factors affecting correlates. We examine (a) how social and personal identity factors are used to explain underachievement (e.g., cultural ecological theory and stereotype threat), (b) the role of identity in different cultural groups, (c) the impact of these factors on teacher and student behavior, and (d) the role that identity plays in helping students develop a sense of future. Psychosocial Development: Identity, Culture, and Education: Read More [+]

EDUC 200G Socialization Processes within the Family 3 Units

Terms offered: Prior to 2007

This course provides an overview of theoretical perspectives on family socialization. We review the empirical literature on child-rearing practices and their relationship to children's socioemotional development. We also examine family beliefs and routines in the context of culture and social class. Students in the course write a literature review on a family socialization topic of their choice.

EDUC 200H Cognitive Development: Neo Vygotskian Approaches 3 Units

Terms offered: Prior to 2007

This seminar explores interpretations, extensions, and reformulations of Vygotsky's writings on cognitive development. The seminar will consider Vygotsky's books, *Thought and Language* and *Mind in Society*, and also read scholars who build on Vygotsky's seminal ideas--these including his students, like Luria and Leontiev, as well as contemporary writers. A focus throughout the seminar will be on activity-oriented treatments of cognition that incorporate social and historical processes.

EDUC 212 Adolescent Development and the Teaching of Secondary English 3 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

This graduate seminar relates the goals of secondary English teaching to three major themes in the study of adolescent development: rationality, morality, and identity. These themes are then explored with reference to urban youth, along with other themes emerging from research in urban settings. The theme of identity is pursued further through a consideration of adolescents' "self-theories" and their motivational consequences. Students write papers on related topics for a class anthology.

EDUC 221A Towards Ambitious Instruction in Mathematics: Research Into Practice 3 Units

Terms offered: Fall 2012, Fall 2011, Fall 2010

In this course, students learn to turn mathematics education research into practice through the vehicle of lesson design. Students work in collaborative teams consisting of one beginning mathematics teacher in a teaching credential program and one or more doctoral student researchers. Together each team is responsible for designing, justifying, implementing, researching, and re-designing a lesson that seeks to embody one key aspect of the teacher's vision of effective mathematics instruction.

EDUC 224A Mathematical Thinking and Problem Solving 3 Units

Terms offered: Fall 2017, Fall 2015, Fall 2013

This course explores contemporary research on mathematical cognition, with a particular emphasis on "higher order thinking skills" and mathematical problem solving. We discuss various frameworks for characterizing mathematical behavior and various methodologies for examining it. As an "action oriented" course in the EMST curricular sequence, this course includes a major course project. In their project, students engage in research incorporating the main ideas studied in the course.

EDUC 226 Constructive Epistemology 3 Units

Terms offered: Fall 2012, Fall 2010, Fall 2008

Many approaches to education take the knowledge to be taught as fixed, and the manipulable objects to be things like methods. By focusing on knowledge per se: what is it; how is it organized and encoded in humans, we are led to questions about what should be taught, based on principles of learnability, etc., rather than just "effective methods." This tactic is valuable in view of the radical changes information technology may have on what we need to teach and what general areas are teachable.

Constructive Epistemology: Read More [+]

EDUC 229F Conceptual Change 3 Units

Terms offered: Fall 2014, Fall 2013, Fall 2011

"Conceptual change" concerns broad and deep changes in a person's knowledge about a domain. This opposes it, for example, to the learning of facts and skill acquisition. The course emphasizes recent cognitive science-oriented approaches to: defining "broad and deep" learning; understanding its properties. It draws on diverse other approaches including developmental psychology; analogies to the history of science; "misconceptions;" computational and epistemological approaches.

Conceptual Change: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

EDUC C229A Proseminar: Problem Solving and Understanding 3 Units

Terms offered: Spring 2018, Spring 2016, Spring 2015, Fall 2013, Spring 2011

Students will examine problem solving in children and adults, from a predominantly cognitive science perspective, beginning with an examination of thinking involved in diverse problem types. Students will then analyze the literature concerning cognitive issues that transcend problem types, including representation, "understanding," access and availability of knowledge, access to one's own cognitive processing, categorization, the architecture of knowledge, and the control of cognition.

EDUC 231 MACSME Methods in Curriculum and Instruction 4 Units

Terms offered: Spring 2018, Fall 2017, Spring 2017

MACSME Methods in Curriculum and Instruction is a core course in the two-year MACSME program. MACSME students take the class in both their first and second years, creating opportunities to consider issues related to curriculum and instruction that are central to the development their own teaching practice in a structured and supported environment over time. The teaching methods course will use the Teaching for Robust Understanding framework (TRU) to explore issues of teaching and learning through five dimensions: core math and science content; cognitive demand; access and equity; student identity and agency; and formative assessment.

MACSME Methods in Curriculum and Instruction: Read More [+]

Rules & Requirements

Prerequisites: Admission to a credential program

EDUC 241B Language Socialization 3 Units

Terms offered: Fall 2014, Fall 2013, Fall 2012

Throughout the lifespan we are socialized through language to become competent participants and members of various groups and communities, including schooling institutions. For the past 20 years, this theory and method for analyzing human development has made important contribution to our understanding of how we learn to become competent members of community, how we learn through language, and how we are socialized into language. This course will provide opportunities to overview the theoretical cornerstones of language socialization as a field of study, as well as review current studies and chart future research trajectories. Course participants are expected to collect and analyze audio/video data from any educational and other learning context where language socialization might be taking place.

EDUC 241C Narrative across Learning Contexts 3 Units

Terms offered: Fall 2016, Fall 2012, Fall 2011

The study of narrative has solidified into an important body of literature that is of particular relevance to educators. Across learning contexts, narrative is a ubiquitous literacy tool, and as such, it underlies many learning activities. We tell narratives for their potency to explain, rationalize, and delineate past, present, and possible experience. This narrative act is a collaborative undertaking, co-told and designed with the audience's input, addressing an audience's present and future concerns. Narrative can thus potentially create shared understandings and community among those participating in narrative activity, yet narratives can become sites for rejection and contestation. Narrative is also a socializing tool. The course will also address methodological approaches to the study of narrative that are relevant to the field of education. Students enrolled in this course are expected to collect narrative samples from naturally occurring interactions (video and audio-taped conversation, classroom interaction), written narrative texts, or other.

Narrative across Learning Contexts: Read More [+]

EDUC 244C Methods for Teaching English in the Secondary Schools 3 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

The second semester of the methods course is designed to continue introducing the teaching of English, with a focus on strategies grounded in an understanding of theories of teaching and learning. Besides considering the English curriculum in general, the course focuses special attention on several topics, such as second language learners and the uses of technology in the English classroom. It also explores the uses of portfolios for tracking student learning and for assessing teachers' growth. By the end of the term, students will have a repertoire of theoretically grounded strategies to use to meet the learning needs of diverse student populations.

EDUC 250B Second Language Acquisition: Concepts and Theories 3 Units

Terms offered: Fall 2011, Fall 2010, Spring 2009

Psycholinguistic theory and research on the acquisition of second languages by learners at secondary and post-secondary institutions. How do adults learn languages other than their own in instructional settings? What skills can they transfer from their native languages, and literacy in L1 transfer to the way the L2 is used in its spoken and written forms? Exploration of various hypotheses and theories that consider language learning from a linguistic, cognitive and discourse perspective. Topics include: interlanguage hypothesis, input, transfer and variation in second language acquisition, interlanguage strategies, affective and cultural variable, schema theory, speech act and discourse theory, and cross-cultural pragmatics.

EDUC 252B The Ethnography of Literacy 3 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

This course approaches literacy as a socio-cultural activity and considers recent ethnographic work on reading practices in different educational settings, communities, and historical epochs. By considering how reading is differently conceived and realized in a wide range of contexts, this course will shed light on reading as a historically contingent, ideologically shaped, and socio-culturally organized practice. More specifically, this course has a twofold aim: 1) to introduce students to recent ethnographic research on reading practices; 2) to familiarize them with ethnographic methodology. To this scope, in addition to reading exemplary studies of reading practices, students will also conduct a small-scale ethnographic research project

EDUC 257 Theoretical Foundations for the Cultural Study of Sport in Education 3 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

The cultural study of sport examines the ways in which institutionalized physical activity embodies and reflects social meanings and identities. The social practice of sport provides a space in which dominant discourses of race, gender, and social class are reproduced and resisted. As these physical activities become institutionalized, commercialized, and embedded within educational institutions themselves, individuals must navigate a nuanced and often conflicted terrain in their respective participation and performance. This course, then, examines the role of sport in society broadly and the relationship of sport and education more specifically. The curriculum reviews the writing and research on sport and education from a sociological, psychological, and philosophical perspective, with a particular focus on the constructed divide of mind and body, as manifested in the institutional conflicts between school and sport.

EDUC 262A Urban School Leadership and Management 1 3 Units

Terms offered: Summer 2006 10 Week Session, Summer 2005 10 Week Session, Summer 2004 10 Week Session

The purpose of this course is to ground aspiring urban leaders in the essential ideas and values that guide their work in schools and their studies in the Principal Leadership Institute. It provides opportunities for future school leaders to deepen their notions of what socially just schools look like, and why; to analyze the challenges to creating socially just schools in urban centers; and to imagine the possible actions that leaders can take to promote such schools.

EDUC 262D Research Group on the Working Lives of Teachers 3 Units

Terms offered: Spring 2014, Spring 2011, Fall 2010

Research group for graduate students specializing in research on teachers' work and organizational and policy contexts of teaching. Complements but does not substitute for foundational course work in research methods or substantive areas of specialization. Strengthens preparation for research through (a) consultation and feedback on research design, data collection, analysis, and writing; and (b) reading and discussion on selected topics related to teachers' work.

EDUC 262F Organizational Policy and Teachers' Work 3 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

Students will examine the ways in which state, district, and workplace policy bears upon various aspects of teachers' work. Special emphasis is given to the way in which policy choices--at whatever level--shape the experience of teaching and the organization of schooling. Among the policy areas considered are those governing membership in the teaching occupation, teaching assignments, classroom autonomy regarding curriculum and instruction, performance evaluation, and opportunities for professional development. This course is a requirement for students in educational administration and those students completing the Professional Administration Services Credential. It is open to all other interested students.

EDUC 262G Research on the Education of Teachers 3 Units

Terms offered: Spring 2016, Spring 2015, Spring 2013

The course focuses on research on the education of prospective and practicing teachers, and on the institutional, organizational and policy contexts in which that research has been pursued. It is designed for students who are interested in doing research in this field or in becoming teacher educators, and is built on several organizing questions. What is the work (and workplace) for which teachers are being prepared? What is the occupational conception of teaching that underpins practice, policy, and research? What is the significance of teacher education's fluctuating fortunes and shifting institutional forms? What is the field's capacity for research on teacher education? By comparison with research on teaching and learning, research on the education of teachers has been under-developed both conceptually and methodologically. Throughout the course, we will be judging the accomplishments and limitations of this field of practice and study, and locating opportunities for future research and development.

EDUC 270B BEAR Center Seminar 2 or 3 Units

Terms offered: Spring 2018, Fall 2017, Spring 2017

This seminar constitutes one of the ways in which the Berkeley Evaluation and Assessment Research (BEAR) Center fulfills its role of supporting student research. The topic of the seminar will change from semester to semester, following themes chosen by the instructor and the participants. The seminar is an opportunity for students and faculty to present their recent and ongoing work for in-depth review and commentary. In addition, visitors to the campus with expertise relevant to the topic(s) under examination will be invited to present at the seminar and join in the discussion. Students taking this course for two units will make a presentation of a current research interest to the seminar. Students taking this course for three units will also be required to attend a one-hour discussion following each presentation and will write a critique of one other student's presentation.

BEAR Center Seminar: Read More [+]

EDUC 271G Research Methods in Educational Leadership: Qualitative Methods 3 Units

Terms offered: Fall 2015, Fall 2013, Fall 2011

This course introduces future educational leaders to the world of qualitative research so that they will be able to read qualitative studies intelligently, and learn to design and conduct qualitatively oriented studies themselves. Beginning with an overview of the epistemological assumptions behind different kinds of research, the course will explore various types of qualitative research approaches and the kinds of topics and queries they support. Students will read and critique examples of published research of various kinds, partially chosen for the interests and inputs of course participants. Next, students will investigate topic development, the various methods of collecting and analyzing qualitative data, and writing the report. The class is designed so that students simultaneously read about and discuss qualitative research, and conduct research themselves.

EDUC 273B Research Group on Policy Implementation 3 Units

Terms offered: Spring 2016, Fall 2015, Spring 2015

This year-long research and writing group is intended for graduate students who plan to specialize in studying educational policy implementation. In the course, we will investigate what happens from the time a policy is enacted until the policy is actually implemented in classrooms, schools, and districts. The centerpiece of the research group is reviewing and providing feedback to members on their works-in-progress related to policy implementation. The goal is to strengthen participants' preparation for research in this area through a combination of consultation and feedback on specific problems related to conceptualizing and enacting high quality research, including but not limited to the formulation of research questions, theory development, research design, data collection, analysis, writing, and publication. We will supplement this activity by reading research together to help build a shared understanding of the different theoretical perspectives that can potentially inform the study of policy implementation, including institutional theory, social movements analysis, conflict perspectives, and organizational learning theory.

Research Group on Policy Implementation: [Read More](#) [+]

EDUC 276A Introduction to Program Evaluation 3 Units

Terms offered: Fall 2017, Fall 2016, Spring 2016

This course provides an introduction to the field of program evaluation ("programs" might be curriculum innovations, school reorganizations, teacher training reforms, instructional methods innovations, funding programs, or programs in the health or welfare areas). It will give an overview of issues of concern to practicing evaluators, researchers, program managers, and academics interested in field-based research. Those taking the course will be introduced to the history of the field, the basic concepts and intellectual disputes, the major methodological issues, and to some common "models" of how an evaluation ought to be conducted. Based on the understandings of the topics and issues discussed in this course, participants will be asked to conceptualize and design an evaluation in their area of personal and/or professional interests. The purpose of this exercise is for participants to develop skills for framing evaluation questions, designing, and describing an evaluation plan.

EDUC 276C Practicum in Evaluation 2 - 4 Units

Terms offered: Spring 2015, Fall 2013, Spring 2013

For students involved in an evaluation or assessment project as graduate student researchers or part of a practicum or apprenticeship experience.

The purpose of this course is to integrate practical experiences with evaluation theory and research literatures relevant to specific evaluation questions or methods. Also provides additional instructional support to students using project data in courses, position papers, dissertations. Readings relate to evaluation topics (e.g., evaluation of professional development programs, use of student data to evaluate teaching) and discussions focus on design, methodology, and research questions of specific projects being conducted by the students.

Practicum in Evaluation: [Read More](#) [+]

Rules & Requirements

Prerequisites: 293A, 293L

Repeat rules: Course may be repeated for credit without restriction.

Theoretical Issues in Evaluation: [Read Less](#) [-]

EDUC 276E Research Design and Methods for Program and Policy Evaluation 3 Units

Terms offered: Spring 2011, Spring 2009, Spring 2005

This course, designed to graduate students with some prior training to quantitative research methods, will introduce students to a toolkit of methods to enable them to address issues related to "what works" in program and policy evaluation. In addition, the course intends to help students understand the assumptions implicit in each of these approaches. Topics include (1) validity, threats to validity, and causal inference framework; (2) randomized experiments and quasi-experiment designs (regression discontinuity and propensity score matching); (3) multilevel modeling technique used in multi-site evaluation and longitudinal intervention studies; (4) mixed-methods approach; (5) meta-analysis for synthesizing evaluation/empirical studies; and (6) power and sample size in designing new evaluation studies.

EDUC 277A Systemic Educational Reform I 3 Units

Terms offered: Summer 2013 10 Week Session, Summer 2013 8 Week Session, Summer 2011 8 Week Session

At the conclusion of this course you should be able to understand the history of and core concepts associated with accountability and systemic reform, especially those associated with No Child Left Behind and California accountability policy; analyze the strengths and weaknesses of various accountability schemes, particularly in terms of their likely effect on student academic achievement, teacher effectiveness, and organizational flexibility and responsiveness; forge closer connections among your personal experiences as a successful professional educator, your practice-derived theories of education reform, and your readings, presentations, and other activities related to this course to create your own formal, evidence-based theory of systemic educational change; think strategically and systemically about how districts can support schools in increasing student learning and achievement; develop an understanding of initial processes that are essential for undertaking systemic reform at the district level; and frame questions for further inquiry on key topics in the course based on a review of existing literature.

EDUC 277B Systemic Educational Reform II 3 Units

Terms offered: Summer 2014 10 Week Session, Summer 2013 10 Week Session, Summer 2013 8 Week Session

This is the second of three courses connected to the thematic area Systemic Educational Reform: theory, policy, and practice, and is intended for second-year students in the UC Berkeley/CSU Joint Doctoral Program on Leadership for Educational Equity (JDP). The purpose of this course is to examine the theoretical assumptions and empirical evidence related to the capacity of school districts to promote educational effectiveness across geographically distributed educational settings, including schools, after-school educational interventions, professional development programs, and the like.

EDUC 278A Excellence and Equity in Education I: Inequality and Equity 3 Units

Terms offered: Summer 2011 8 Week Session, Summer 2009 10 Week Session, Summer 2006 10 Week Session

The issues of inequality, of various kinds, and of equity, again with many different conceptions, have been central to debates over American schooling, particularly in urban areas. This course provides a conceptual framework to begin understanding the different dimensions of inequality and equity. As part of the theme in the Joint Doctoral Program of "Achieving Excellence and Equity in Practice," it will be followed by additional courses that examine certain topics in greater depth.

EDUC 278B Excellence and Equity 2: The Dynamics of Improving Schools and Districts 3 Units

Terms offered: Fall 2014, Spring 2014, Spring 2013

The design of this course starts from the assumption that the question of "what works" in schools is not easily answered. Much of it depends on what sorts of outcomes educators value and hinges on specific conditions schools and districts face. The course aims at developing and refining judgment by looking in-depth at improvement strategies, interventions, or levers for change employed by urban school districts. Given that the theme of the course is school improvement and, given LEEP students' administrative and leadership expertise, the course is envisioned as an opportunity for deep reflection and exchange among knowledgeable actors.

EDUC 278C Milestone 2: Mapping the Professional Knowledge Base 3 Units

Terms offered: Fall 2015, Spring 2015, Fall 2014

This second milestone course continues students' development of their knowledge base in relation to their established problem of practice.

The purpose of the course is to ensure that this process is focused and fruitful, as students take the first steps in applying their new knowledge to a design development study. At the end of the course, students' first milestone paper should be ready for approval.

Milestone 2: Mapping the Professional Knowledge Base: Read More [+]

Rules & Requirements

Milestone 2: Mapping the Professional Knowledge Base: Read Less [-]

EDUC 278D Milestone 4: Research Design and Methodology 3 Units

Terms offered: Spring 2016, Spring 2015, Fall 2014

The fourth course in the LEEP milestone sequence moves students from the exploration of the professional knowledge base to the design of their dissertation study. The main course objective is the completion of milestone 2: the writing of a paper on the design and methodology of the dissertation study. Together with the first milestone paper (Exploring the Knowledge Base) and the third milestone paper (Dissertation Prospectus), this paper should qualify students to participate in the qualifying exam, the prerequisite for dissertation research.

EDUC 279A Resource Management 1 3 Units

Terms offered: Fall 2011, Fall 2009, Fall 2006

This course examines management tools and financial methods of effective leadership of school districts in California. The course will present strategies from both business and educational perspectives and will challenge conventional financial management practices in California school systems. Specific areas of emphasis will be on maximizing the effective use of educational resources (e.g., financial analyses, budget techniques, cost analyses, management information systems), understanding the constraints that influence public school expenditures (e.g., state and federal legislation), and accomplishing the educational objectives of the school system through financial application (cost analysis and project management techniques). The underlying assumption of the course is that informed financial leadership can improve the opportunity to achieve educational achievement and equity in public school organizations.

EDUC 280A Proseminar: Sociocultural Critique of Education 3 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

These interdisciplinary seminars address a series of questions. In what ways can philosophical, sociological, anthropological, historical, and psychological forms of inquiry be brought together to bear on the analysis of learning, on schooling, and on education more generally? What do we mean by critical and interpretive theories, and what are their relations with social practice? How can education come to constitute itself otherwise than in its current form?

EDUC 280C Research Apprenticeship and Qualitative Methodology Seminar I 3 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

The emphasis in this course is on the practice of research. Each student, ordinarily in the second year of graduate study, develops a research project with a faculty mentor and carries it out under direction. At the same time, students work together in this seminar. Short written assignments during the first eight weeks result in a research proposal to be carried out by the end of the semester. Students spend about 50 hours on the field research.

EDUC 282 Introduction to Research Inquiry: Power, Epistemology, and Method 3 Units

Terms offered: Not yet offered

This course is meant to introduce students to the process of conducting research. It approaches this goal by asking students to learn about and critically engage the ontological and epistemological assumptions underlying the varied methodologies used in education research. This class aims to get students to think critically about research design, implementation, and interpretation, with a particular focus on how epistemological and ethical issues can play themselves out in research projects and the roles that power plays in the research process.

EDUC 283B Historical Perspectives on American Education 3 Units

Terms offered: Spring 2017, Spring 2016, Fall 2012

Public schooling today reflects a long evolution, producing an institution that embodies social inequalities as well as democratic aspirations. Politicians, teachers, school reformers, and others interested in education invoke elements of this history to justify their efforts. This course examines the relationship of the changing goals, organization, and practices of American schools to broader social, economic, political, and intellectual developments.

EDUC 285 Globalization and International Education 3 Units

Terms offered: Spring 2015, Fall 2012, Spring 2009

What is globalization? What are the implications of living in a "global world" for educational systems? In this course, we explore these questions by first examining various theoretical perspectives on globalization. We will then discuss several major developments associated with globalization that are affecting different levels of education (from primary to university) including the rise in accountability and testing, skills for the "knowledge" economy, and immigration. We will consider the role of international organizations such as the World Bank and the United Nations in shaping international policy and programs. We will also examine the role that the state, local communities, and non-governmental agencies play in providing and improving the quality of education. In the final part of the course, we examine topics including language policy, technology, and strategies to combat educational inequality. To explore these topics, we will read and discuss case studies from Asia, Africa, Latin America, and the United States to provide concrete examples of how global forces are changing the context and content of education internationally.

EDUC C286 The Education of African-American Students 3 Units

Terms offered: Spring 2012, Fall 2010, Spring 2010

This seminar will examine a wide range of perspectives on the education of African American children and adolescents in the United States. Readings will support students in understanding some of the key issues and tensions in African American education and school achievement, including the roles that culture, identity, parents, families, and communities play in the education and schooling of African American students; systemic issues in educational improvement and the perpetuation of "achievement gaps"; and language and power.

EDUC 288 Intersectionality in Education Research 3 Units

Terms offered: Fall 2013, Fall 2012, Fall 2011

This course is designed to explore the theoretical and methodological questions raised by the concept of intersectionality - the idea that human beings possess multiple identities simultaneously. Most of the work in this area has been theoretical. This course acquaints students with that theoretical literature and helps them apply these theories in their empirical work. The goal is to provide students with the background necessary to incorporate intersectionality into their future research.

EDUC 291 Purposes and Values in Urban Educational Leadership 3 Units

Terms offered: Summer 2003 10 Week Session

This course examines the relationships among multiple and often competing purposes of public education, dilemmas rooted in a history of persistent race- and class-linked inequities in American schools, and the possibilities and challenges of educational leadership. It highlights the pursuit of educational quality and equity in urban school systems as the organizing problem for educational leadership. Students will use research to analyze leadership practices to strengthen urban education.

EDUC 460C Research Practicum in Administration 1 - 3 Units

Terms offered: Spring 2018, Summer 2017 8 Week Session, Spring 2017
During the fall semester, students complete 294A in which the preliminary Leadership Action Research Project is designed - a summative assessment for the Principal Leadership Institute and the MA program at Berkeley. Through the LARP process, students engage in a cycle of inquiry about a problem or concern that matters to their overall leadership agenda and creates more equitable spaces in urban schools. In this course, students solidify the design of their LARP, take leadership action to implement their action plan, reflect on the action plan, revise the action plan - and make changes as appropriate - thus, engaging actively in the cycle of inquiry.

Research Practicum in Administration: Read More [+]

EDUC 470B Residency: Excellence and Equity and Systemic Reform 3 Units

Terms offered: Summer 2011 10 Week Session, Summer 2009 10 Week Session, Spring 2009

Students will meet weekly for one hour with a residency adviser at one of the following campuses: San Francisco State University; California State University, East Bay; or San Jose State University. The residency will require six hours weekly at a school district site to conduct research on curriculum, instruction, assessment, and professional development topics selected by students in conjunction with their faculty counselors and residency advisers in collaboration with the district consultant. An additional two hours weekly will be dedicated to preparation of case study materials from the residency assignment. Students will be expected to present the results of their residency research to the faculty and students of the Joint Doctoral Program.
