New Media

Overview

The Berkeley Center for New Media (BCNM) is a UC Berkeley initiative that supports research and teaching collaborations to better understand innovations in media. Our mission is to critically analyze and help shape innovations in new media from cross-disciplinary and global perspectives that emphasize the humanities and public interests. Since such innovations have technical, social, political, and aesthetic qualities, a full understanding of their transformative powers requires collaborative analyses.

Led by a highly interdisciplinary community of 120 affiliated faculty, advisors, and scholars from 35 UC Berkeley departments, BCNM offers courses, degrees, certificates, research, and public programs about media that bring together inquiries based in Architecture, Philosophy, Film Studies, Art History, Art Practice, Performance Studies, Music, Engineering, Information, Journalism, and Law. A collaboration hub for both textual and material discourse, BCNM connects students and faculty with projects at the Berkeley Art Museum, the University Library, and many off-campus venues. BCNM is based in the College of Engineering.

All media (Latin for middle) facilitate transformation: by definition, media are transformative. From the stone tablet to the printing press to the Internet, media have become increasingly reconfigurable. The value of a medium is often related to its capacity for reconfiguration. To claim a medium as 'new' is to posit a meaningful improvement over prior media. Thus, new media are highly reconfigurable and doubly transformative: they achieve a transformation of prior modes of transformation.

New media often produce new experiences, new behaviors, and new insights; yet new media remain deeply rooted in powerful aesthetic, cultural, and political forces. As media transform, they often distort. Sophocles observed, 'Nothing vast enters the life of mortals without a curse.' BCNM actively engages scholars who critically examine the opportunities and risks associated with new media and who consider how new media can constructively benefit education, political engagement, privacy, and aesthetic experience.

BCNM catalyzes research, educates future leaders, and facilitates public discourse through courses, lectures, symposia, and special events. BCNM has established cross-disciplinary faculty positions and a special program for PhD students. BCNM expands traditional academic modes of scholarship with support for unorthodox artworks, analysis, designs, and experiments.

Undergraduate Program

The Berkeley Center for New Media offers a certificate program for undergraduate students at UC Berkeley. The certificate does not appear on a student's transcript but reflects the expertise in new media innovation that a student acquires in addition to their core major. The program includes courses on innovation, a service-learning program, and a research program, in which students work together with graduate students and faculty on joint inquiries ranging from hardware design to human impact.

**NWMEDIA 104 Critical Practices: People, Places, Participation 4 Units**

Terms offered: Prior to 2007

Critical Practices is a hands-on studio design course where students work at the intersection of technological innovation and socially engaged art. Students will integrate a suite of digital fabrication tools with social design methods to create work that engages in cultural critique. Working with innovative technologies and radical, new art practices, this course will explore: hybrid art forms, critical design for community engagement, interventions in public spaces, tactical media, and disobedient objects. These new making strategies will reframe our notions of people, places and participation.

NWMEDIA 151AC Transforming Tech: Issues and Interventions in STEM and Silicon Valley  
4 Units
Terms offered: Fall 2020
In this course, we will study major tech industry controversies and heavily criticized tech products, policies, and effects, including technologies used at the U.S.-Mexico border, social media platforms’ spread of disinformation and fake news, racial bias in algorithms, and internet trolling and harassment. We will also examine tech companies’ long-running tendency to exclude women and non-Asian minorities, and how tech workers have occasionally come under fire for the industry’s harms. Students will be required to brainstorm and design their own interventions into the workings of the tech sector to make it more inclusive, equitable, and diverse.

NWMEDIA 202 New Media Methods 3 Units
Terms offered: Fall 2014
In this methods course we will study key languages of new media innovation, ranging from flow charts to scripting languages and circuit diagrams. Our study method involves the creation and application of sensing devices in an urban context, and engages students in establishing chains of references which connect ground truth to data, data to information, information to people, people to actions, and actions to policies. Taking into account technical, political, cultural and literacy questions we seek to connect our data production work with information needs of underserved communities in the Bay Area region.

NWMEDIA C203 Critical Making 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Critical Making will operationalize and critique the practice of “making” through both foundational literature and hands on studio culture. As hybrid practitioners, students will develop fluency in readily collaging and incorporating a variety of physical materials and protocols into their practice. Students will envision and create future computational experiences that critically explore social and culturally relevant technological themes. No previous technical knowledge is required to take this course. Class projects involve basic programming, electronic circuitry, and digital fabrication design. Tutorials and instruction will be provided, but students will be expected to develop basic skills in these areas to complete course projects.
