School of Optometry

Overview

The School of Optometry provides professional training in the art and science of vision care. The four-year professional program leads to the degree of Doctor of Optometry, which qualifies graduates to take the national and state board examinations required for licensure.

Doctors of Optometry are health care professionals. Optometry is a primary health-care profession that encompasses the prevention and remediation of disorders of the vision system through examination, diagnosis, treatment, and/or management of visual efficiency, eye health, and related systemic manifestations. Optometry graduates are trained to diagnose eye diseases, including the ocular manifestations of systemic diseases. The scope of contemporary optometric practice provides practitioners with independent responsibility for nonsurgical pharmaceutical treatment of eye disorders and diseases.

Doctors of Optometry are educated in the sciences of anatomy, chemistry, physics, mathematics, neurology, bacteriology, microbiology, disease processes and detection, pharmacology, behavioral science, social science, public health, and many other related fields. The school provides four years of comprehensive training in vision care aimed at preparing primary eye care providers. The first and second years emphasize courses in the sciences that are foundational to optometry and pre-clinical training in the fundamentals of the optometric examination. Subjects taught include the anatomy and physiology of the eye and visual system, visual perception and sensitivity, optics, oculomotor functions and neurology, binocular vision and space perception, evidence-based optometry, systemic and ocular pharmacology, systemic disease and its ocular manifestations, infant vision, diagnosis and treatment of sensorimotor anomalies, contact lenses, and clinical examination of the visual system. Active responsibility for patient care begins in the spring of the second year. The third year is devoted to advanced training in management and rehabilitation of sensorimotor anomalies, diagnosis and treatment of anterior and posterior segment ocular disease, low vision, advanced procedures in disease diagnosis, and caring for patients in the school’s primary care clinics. The fourth year consists of advanced patient care experience acquired in internal rotations through the school’s specialty clinics in areas such as low vision, pathology, contact lenses, infant vision, community and geriatric health care, and external rotations through eye care centers located in leading hospitals, medical centers, and clinics across the country.

Optometry offers a wide variety of interesting, challenging, and rewarding careers in private practice, in hospitals and other health organizations, and in public service. The education and clinical experience gained at the School of Optometry equip its graduates with the knowledge base and skills necessary to provide the highest level of contemporary vision care and to engage in lifelong learning to ensure they remain at the forefront of their profession.

Optometric Residency Program

A one-year Optometric Residency program is available to Doctors of Optometry seeking advanced optometric training. Areas of clinical study include binocular vision, cornea and contact lens, low vision, ocular disease, pediatrics, community health, and primary care. Successful completion of the program leads to the awarding of the Optometric Residency Certificate.

For further information about the Optometric Residency Program, please contact the Director of Residency Programs, Dr. Kuniyoshi Kanai, at kunikanai@berkeley.edu.

Undergraduate Program

There is no undergraduate program offered by the School of Optometry.

Graduate Program

Optometry (http://guide.berkeley.edu/graduate/degree-programs/optometry): OD

- Vision Science

OPTOM 10 The Eye and Vision in a Changing Environment 2 Units

Terms offered: Spring 2019, Spring 2018, Spring 2017
Course covers introduction to the basis of common sight-reducing visual disorders with major public health implications for society--e.g., myopia, cataracts, diabetic hypertensive eye disorders, developmental disorders (e.g., lazy eye), and environmentally induced disease and disorders (solar eye burns, cataracts). Major approaches to the prevention, diagnosis, and treatment of common disorders will be addressed in terms of the biological and optical sciences underlying the treatment or prevention. Impact of eye care on society and health and care delivery will be reviewed.

The Eye and Vision in a Changing Environment: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details

Subject/Course Level: Optometry/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Adams

OPTOM 39B Freshman/Sophomore Seminar 2 - 4 Units
Terms offered: Fall 2010, Fall 2009, Fall 2008
Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester. No prerequisites. Enrollment limits are set by the faculty, but the suggested limit is 25.
Freshman/Sophomore Seminar: Read More [+]

Rules & Requirements
Prerequisites: Priority given to freshmen and sophomores
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2-4 hours of seminar per week
Additional Details
Subject/Course Level: Optometry/Undergraduate
Grading/Final exam status: The grading option will be decided by the instructor when the class is offered. Final exam required.
Freshman/Sophomore Seminar: Read Less [-]

OPTOM 84 Sophomore Seminar 1 or 2 Units
Terms offered: Spring 2011, Spring 2010, Spring 2009
Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.
Sophomore Seminar: Read More [+]

Rules & Requirements
Prerequisites: At discretion of instructor
Repeat rules: Course may be repeated for credit when topic changes.

Hours & Format
Fall and/or spring:
5 weeks - 3-6 hours of seminar per week
10 weeks - 1.5-3 hours of seminar per week
15 weeks - 1-2 hours of seminar per week
Summer:
6 weeks - 2.5-5 hours of seminar per week
8 weeks - 1.5-3.5 hours of seminar and 2-4 hours of seminar per week

Additional Details
Subject/Course Level: Optometry/Undergraduate
Grading/Final exam status: The grading option will be decided by the instructor when the class is offered. Final exam required.

OPTOM 198 Directed Group Studies 1 - 4 Units
Terms offered: Spring 2011, Spring 2010, Spring 2009
Directed group study for undergraduates interested in the field of Optometry.
Rules & Requirements
Credit Restrictions: Enrollment is restricted; requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

OPTOM 200A Clinical Examination of the Visual System 2 Units
Terms offered: Fall 2015, Fall 2014, Fall 2013
Fundamentals of the optometric examination. Case history, visual acuities, objective and subjective methods of determining refractive status. Basic examination of anterior ocular structures and the ocular fundus; perimetry.
Rules & Requirements
Prerequisites: 200A
Repeat rules: Course may be repeated for credit with advisor consent.

OPTOM 200AL Clinical Examination of the Visual System 3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Fundamentals of the optometric examination. Case history, visual acuities, objective and subjective methods of determining refractive status. Basic examination of anterior ocular structures and the ocular fundus; perimetry.
Rules & Requirements
Repeat rules: Course may be repeated for credit with advisor consent.

OPTOM 200B Clinical Examination of the Visual System 2 Units
Terms offered: Spring 2016, Spring 2015, Spring 2014
Classification and epidemiology of refractive errors, evaluation of accommodative and binocular status. Tonometry, advanced techniques of examining the posterior pole, evaluation of visual pathway function.
Rules & Requirements
Prerequisites: 200A
Repeat rules: Course may be repeated for credit with advisor consent.
OPTOM 200BL Clinical Examination of the Visual System 3 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015
Classification and epidemiology of refractive errors, evaluation of accommodative and binocular status. Tonometry, advanced techniques of examining the posterior pole, evaluation of visual pathway function.
Clinical Examination of the Visual System: Read More [+]
Rules & Requirements
Prerequisites: Opt 200A, Opt 200AL
Repeat rules: Course may be repeated for credit with advisor consent.
Hours & Format
Fall and/or spring: 15 weeks - 6 hours of laboratory per week
Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Letter grade.
Clinical Examination of the Visual System: Read Less [-]

OPTOM 200C Clinical Examination of the Visual System 2 Units
Terms offered: Fall 2015, Fall 2014, Fall 2013
Case analysis of refractive, accommodative, and binocular anomalies. Pediatric examination techniques. Advanced methods of examining the peripheral ocular fundus; anterior chamber angle evaluation.
Clinical Examination of the Visual System: Read More [+]
Rules & Requirements
Prerequisites: 200B
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Subject/Course Level: Optometry/Graduate
Grading: Letter grade.
Instructor: Liu
Evidence Based Optometry: Read Less [-]

OPTOM 222A Optics of Ophthalmic Lenses 4 Units
Terms offered: Spring 2016, Spring 2015, Fall 2014
Optical and physical characteristics of ophthalmic lenses, to include spherical and aspherical surface of single and multifocal lens designs, and ophthalmic prisms. Lens power measurement methods, lens thickness power relationships and considerations in designing prescription eyewear. Characteristics of absorptive lenses, ophthalmic coatings, lens materials, and their role in ocular protection.
Optics of Ophthalmic Lenses: Read More [+]
Rules & Requirements
Prerequisites: Vision Science 203A
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of laboratory per week
Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Letter grade.
Optics of Ophthalmic Lenses: Read Less [-]

OPTOM 222B Advanced Clinical Optics 2 Units
Terms offered: Fall 2015, Spring 2015, Fall 2014
Ophthalmic lens aberrations and minimization. Ophthalmic lens designs relating to anisometropia, aniseikonia, and high refractive errors. Optics of the eye, contact lens optics, and optical principles of low vision aids. Environmental vision and related ophthalmic standards.
Advanced Clinical Optics: Read More [+]
Rules & Requirements
Prerequisites: 222A

OPTOM 236A Systemic Disease and its Ocular Manifestations 3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
The pathophysiology, pharmacotherapy, and clinical management of systemic and ocular diseases will be discussed through a combination of lecture and problem-based learning approaches. Disease processes will be emphasized and include cellular injury and repair, inflammation, infection, degeneration, and neoplasia. Neurologic, cardiovascular, endocrine, pulmonary, and congenital disease and their relative ocular manifestations will be presented.
Systemic Disease and its Ocular Manifestations: Read More [+] Rules & Requirements
Prerequisites: 200D. 236A is a prerequisite for 236B

OPTOM 298B Independent or Group Studies 1
- 6 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
Directed studies on a selected topic(s) within optometry.
Independent or Group Studies: Read More [+]
Rules & Requirements
Prerequisites: O.D. degree
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Letter grade.
Independent or Group Studies: Read Less [-]
OPTOM 299A Graduate Optometry Research
2 - 4 Units
Terms offered: Fall 2015, Fall 2014, Fall 2013
Directed research on a selected topic within clinical optometry.
Graduate Optometry Research: Read More [+]

Rules & Requirements
Prerequisites: O.D. Degree
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week

Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Letter grade.

Graduate Optometry Research: Read Less [-]

OPTOM 299B Graduate Optometry Research
2 - 4 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015
Directed research on a selected topic within clinical optometry.
Graduate Optometry Research: Read More [+]

Rules & Requirements
Prerequisites: O.D. Degree
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week

Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Letter grade.

OPTOM 430A Optometry Clinics 4 Units
Terms offered: Summer 2017 First 6 Week Session, Summer 2017 Second 6 Week Session, Summer 2016 Second 6 Week Session
Clinical practice in examination techniques and interpretation of clinical data. Primary care optometric exams.
Optometry Clinics: Read More [+]

Rules & Requirements
Prerequisites: Opt 200D and Opt 200DL
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Summer: 6 weeks - 24 hours of clinic and 3 hours of seminar per week

Additional Details
Subject/Course Level: Optometry/Other professional
Grading: Letter grade.

Optometry Clinics: Read Less [-]

OPTOM 430B Optometry Clinics 9 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Examination of patients in a primary care setting, prescribing of optometric therapy, management of emergency procedures, and vision screenings of children and adults.
Optometry Clinics: Read More [+]

Rules & Requirements
Prerequisites: 430A

Hours & Format
Summer:
6 weeks - 37 hours of clinic, 1.5 hours of lecture, and 5 hours of seminar per week
8 weeks - 32 hours of clinic, 1 hour of lecture, and 4 hours of seminar per week

Additional Details
Subject/Course Level: Optometry/Other professional
Grading: Letter grade.
Instructor: Revelli

OPTOM 432 Introduction to Clinical Topics for the New Clinician 2 Units
Terms offered: Summer 2017 10 Week Session
This course emphasizes ocular conditions and diseases that are commonly encountered during patient care. The goal is to improve observational skills for new clinicians by presenting clinical information in a Grand Rounds format and to increase efficiency for comprehensive eye examinations by outlining alternative strategies for examining patients and analyzing clinical data.
Introduction to Clinical Topics for the New Clinician: Read More [+]

Rules & Requirements

Prerequisites: Optom 200D Clinical Examination of the Visual System
Repeat rules: Course may be repeated for credit with advisor consent.

Hours & Format
Summer: 10 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Optometry/Other professional
Grading: Letter grade.
Instructor: Ozawa
Introduction to Clinical Topics for the New Clinician: Read Less [-]

OPTOM 435 Advanced Procedures in Ocular Disease Diagnosis 2 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Instrumentation, techniques, and principles for examination, diagnosis, and treatment of ocular disease. Introduction to optometric informatics related to ocular disease.
Advanced Procedures in Ocular Disease Diagnosis: Read More [+]

Rules & Requirements

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture and 2 hours of laboratory per week

Additional Details
Subject/Course Level: Optometry/Other professional
Grading: Letter grade.
Advanced Procedures in Ocular Disease Diagnosis: Read Less [-]

OPTOM 440A Advanced Optometry Clinic 2.5 Units
Terms offered: Summer 2017 First 6 Week Session, Summer 2017 Second 6 Week Session, Summer 2016 Second 6 Week Session
Optometric examination of patients in the primary care clinic performed independently by student clinicians under supervision of the clinical staff.
Advanced Optometry Clinic: Read More [+]

Rules & Requirements

Prerequisites: 430C
Repeat rules: Course may be repeated for credit up to a total of 3 times.

Hours & Format
Summer: 6 weeks - 2 hours of seminar and 16 hours of clinic per week

Additional Details
Subject/Course Level: Optometry/Other professional
Grading: Letter grade.
Advanced Optometry Clinic: Read Less [-]
OPTOM 440B Advanced Optometry Clinic 9 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Examination of patients in a primary care setting. Diagnosis, prognosis, treatment, patient management and follow-up.
Advanced Optometry Clinic: Read More [+]
Rules & Requirements
Prerequisites: 440A and 441A
Additional Details
Subject/Course Level: Optometry/Other professional
Grading: Letter grade.
Instructor: Revelli
Advanced Optometry Clinic: Read Less [-]

OPTOM 440C Advanced Optometry Clinic 9 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
Examination of patients in a primary care setting. Diagnosis, prognosis, treatment, patient management and follow-up.
Advanced Optometry Clinic: Read More [+]
Rules & Requirements
Prerequisites: 440A and 441A (offered Summer Session only)
Additional Details
Subject/Course Level: Optometry/Other professional
Grading: Letter grade.
Instructor: Revelli
Advanced Optometry Clinic: Read Less [-]

OPTOM 441A Specialty Clinics 2.5 Units
Terms offered: Summer 2017 First 6 Week Session, Summer 2017 Second 6 Week Session, Summer 2016 Second 6 Week Session
Examination, diagnosis, prognosis, treatment, and management of patients in the specialty clinics.
Specialty Clinics: Read More [+]
Rules & Requirements
Prerequisites: 430C
Repeat rules: Course may be repeated for credit up to a total of 3 times.
Hours & Format
Summer: 6 weeks - 2 hours of seminar and 16 hours of clinic per week
Additional Details
Subject/Course Level: Optometry/Other professional
Grading: Letter grade.
Specialty Clinics: Read Less [-]

OPTOM 441B Specialty Clinics 7 Units
Terms offered: Fall 2015, Fall 2014, Fall 2013
Examination, diagnosis, prognosis, treatment, and/or management of patients in specialty clinics; ocular disease, contact lenses, binocular vision, ophthalmic optics, and environmental and occupational vision.
Specialty Clinics: Read More [+]
Rules & Requirements
Prerequisites: 440A and 441A (offered Summer Session only)
Hours & Format
Summer: 6 weeks - 2.5 hours of seminar and 18 hours of clinic per week
8 weeks - 2 hours of seminar and 16 hours of clinic per week
Additional Details
Subject/Course Level: Optometry/Other professional
Grading: Letter grade.
Specialty Clinics: Read Less [-]

OPTOM 441C Specialty Clinics 7 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
Examination, diagnosis, prognosis, treatment, and/or management of patients in specialty clinics; ocular disease, contact lenses, binocular vision, ophthalmic optics, and environmental and occupational vision.
Specialty Clinics: Read More [+]
Rules & Requirements
Prerequisites: 440A and 441A (offered Summer Session only)

Subject/Course Level: Optometry/Other professional
Grading: Letter grade.
Instructor: Revelli

Current Concepts in Ocular Disease: Read Less [-]

OPTOM 490A Optometric Spanish - Beginner Level I 1 Unit
Terms offered: Prior to 2007
This course provides an introduction to Spanish in its uses in a clinical optometry setting with the Spanish-speaking patient. Basic vocabulary and grammar acquisition and skill building exercises will help the practitioner perform conversations and procedures in simple but accurate and clear communications. The sounds and structures of Spanish, including the present tense and some other verbs will be covered. All materials will be taught and practiced in relation to their practical application in a clinical setting.
Optometric Spanish - Beginner Level I: Read More [+]
Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture per week
Summer: 8 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Optometry/Other professional
Grading: Offered for satisfactory/unsatisfactory grade only.
Optometric Spanish - Beginner Level I: Read Less [-]
OPTOM 490B Optometric Spanish - Intermediate Level II 1 Unit
Terms offered: Summer 2008 10 Week Session
This course provides vocabulary and grammar acquisition and skill building for the intermediate to advanced Spanish student who works with Spanish-speaking patients in the field of optometry. Emphasis is on practical, hands-on application of the materials: patient interviewing, doing various aspects of the eye exam, taking a history, and giving diagnostic, treatment, and follow-through information to the patient, with appropriate cultural sensitivity, taking into consideration the sociocultural background of the patient. The goal is accurate and sophisticated communication.

OPTOM 499 Supervised Independent Study 1 - 12 Units
Terms offered: Fall 2019, Spring 2019, Fall 2018
Independent study under control of Associate Dean for Student Affairs.

VIS SCI 24 Freshman Seminars 1 Unit
Offered through: Optometry
Terms offered: Fall 2019, Spring 2019, Fall 2018
The Freshman Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Freshman seminars are offered in all campus departments, and topics vary from department to department and semester to semester. Enrollment limited to 15 freshmen.

VIS SCI 39 Freshman and Sophomore Seminar 1.5 - 3 Units
Offered through: Optometry
Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester. Enrollment limits are set by the faculty but the suggested limit is 25.

Vision Science
Expand all course descriptions [+]Collapse all course descriptions [-]
VIS SCI 84 Sophomore Seminar 1 or 2 Units
Offered through: Optometry
Terms offered: Fall 2019, Spring 2019, Fall 2018
Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.
Sophomore Seminar: Read More [+]

Rules & Requirements

Prerequisites: At discretion of instructor
Repeat rules: Course may be repeated for credit when topic changes.

Hours & Format

Fall and/or spring:
5 weeks - 3-6 hours of seminar per week
10 weeks - 1.5-3 hours of seminar per week
15 weeks - 1-2 hours of seminar per week

Summer:
6 weeks - 2.5-5 hours of seminar per week
8 weeks - 1.5-3.5 hours of seminar and 2-4 hours of seminar per week

Additional Details
Subject/Course Level: Vision Science/Undergraduate
Grading/Final exam status: The grading option will be decided by the instructor when the class is offered. Final exam required.

Sophomore Seminar: Read Less [-]

VIS SCI 199 Supervised Independent Study and Research 1 - 4 Units
Offered through: Optometry
Terms offered: Fall 2019, Spring 2019, Fall 2018
Supervised independent study and research. Enrollment restrictions apply; see the Introduction to Courses and Curricula section of this catalog.
Supervised Independent Study and Research: Read More [+]

Rules & Requirements

Prerequisites: Upper division status and consent of instructor, the student's major adviser and the departmental chair
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 0 hours of independent study per week
Summer: 8 weeks - 1.5-7.5 hours of independent study per week

Additional Details
Subject/Course Level: Vision Science/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam required.
Supervised Independent Study and Research: Read Less [-]

VIS SCI 203A Geometric Optics 4 Units
Offered through: Optometry
Terms offered: Fall 2016, Fall 2015, Fall 2014
Geometrical methods applied to the optics of lenses, mirrors, and prisms. Thin lens eye models, magnification, astigmatism, prism properties of lenses, thick lenses.

VIS SCI 203B Optical System and Physical Optics 4 Units
Offered through: Optometry
Terms offered: Spring 2016, Spring 2015, Spring 2014
Principles of optical systems, principles and clinical applications of apertures and stops, aberrations and optical instruments. Optics of the eye. Selected topics in physical optics, diffraction, interference, polarization.

VIS SCI 205 Visual Perception Sensitivity 4.5 Units
Offered through: Optometry
Terms offered: Fall 2016, Fall 2015, Fall 2014

VIS SCI 206A Anatomy and Physiology of the Eye 2 Units
Offered through: Optometry
Terms offered: Fall 2015, Fall 2014, Fall 2013
This course focuses on the anatomy and physiology of the eyeball. Overview of the gross anatomy of the eye followed by eye-relevant cellular and molecular biology. Cellular and molecular details of structure and function of each of the various non-neural components.
VIS SCI 206B Anatomy and Physiology of the Eye and Visual System 3 Units
Offered through: Optometry
Terms offered: Spring 2019, Spring 2018, Spring 2017
Structure and function of the tissues of the eye, ocular appendages, and the central visual pathways. Basic concepts of physiological, neurological, embryological, and immunological processes as they relate to the eye and vision. Foster an appreciation of the pathophysiology of various disease processes. Convey the importance of anatomy and physiology in the medical approach to ocular disease processes.

Anatomy and Physiology of the Eye and Visual System: Read More [+]

Rules & Requirements
Prerequisites: ViS Sci 206A
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Subject/Course Level: Vision Science/Graduate
Grading: Letter grade.

Formerly known as: half of 206A

Anatomy and Physiology of the Eye and Visual System: Read Less [-]

VIS SCI 206D Neuroanatomy and Neurophysiology of the Eye and Visual System 2 Units
Offered through: Optometry
Terms offered: Fall 2015, Fall 2014, Fall 2013
Structure and function of the neurosensory retina, photoreceptors, RPE including blood supply. Current concepts of etiology and management of major retinal conditions. Overview of diagnostic techniques in retinal imaging, electrophysiologic testing and new genetic approaches. Structure and function of the early visual pathway including retinal ganglion cells, optic nerves, lateral geniculate nucleus and visual cortex. Pupillary responses. Specialization in the visual cortex.

Neuroanatomy and Neurophysiology of the Eye and Visual System: Read More [+]

Rules & Requirements
Prerequisites: 206A (must be taken concurrently)

Hours & Format
Fall and/or spring: 7.5 weeks - 4 hours of lecture per week

VIS SCI 230 Ethics in Scientific Research 2 Units
Offered through: Optometry
Terms offered: Spring 2018, Spring 2016, Spring 2015
This seminar will examine a range of ethical issues that arise in the process of doing science. Beginning with the philosophical and social foundations, we will consider the pathogenesis of fraud, statistics and deception, the ethics of authorship and publication, research with human subjects, the use of animals, the definition(s) of misconduct and the difference between misconduct and questionable research practices, the relationship between industry and science, and finally, the responsibilities and obligations of the scientist in society.
Ethics in Scientific Research: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 30 hours of seminar per week

Additional Details

VIS SCI 260A Optical and Neural Limits to Vision 3 Units
Offered through: Optometry
Terms offered: Fall 2019, Fall 2018, Fall 2017
The course will provide an overview of the early stage limits to human vision, from the eye’s optics to sampling and processing in the retina. Students will learn basic optical properties of the eye as well as objective and subjective techniques on how to measure limits of human vision. The class will comprise a combination of lectures and active learning by the students in the form of a project, to be presented at the end of the semester. This is one of the four courses that form the Vision Science core curriculum.
Optical and Neural Limits to Vision: Read More [+]

Rules & Requirements
Repeat rules: Course may be repeated for credit with instructor consent.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

**VIS SCI 265 Neural Computation 3 Units**
Offered through: Optometry  
Terms offered: Fall 2019, Fall 2018, Fall 2016  
This course provides an introduction to the theory of neural computation. The goal is to familiarize students with the major theoretical frameworks and models used in neuroscience and psychology, and to provide hands-on experience in using these models. Topics include neural network models, supervised and unsupervised learning rules, associative memory models, probabilistic/graphical models, and models of neural coding in the brain.  
Neural Computation: Read More [+]  
**Rules & Requirements**  
**Prerequisites:** Calculus, differential equations, basic probability and statistics, linear algebra, and familiarity with high level programming languages such as Matlab  
**Hours & Format**  
Fall and/or spring: 15 weeks - 3 hours of lecture per week  
**Additional Details**  
**Subject/Course Level:** Vision Science/Graduate  
**Grading:** Letter grade.

Robert E. Dister, Clinical Professor.
Bernard J. Dolan, Clinical Professor.
Patsy L. Harvey, Clinical Professor.
Craig K. Hisaka, Clinical Professor.
Pia Hoenig, Clinical Professor.
Carl H. Jacobsen, Clinical Professor.
Donald R. Korb, Clinical Professor.
Anne Mika Moy, Clinical Professor.
Edward J. Revelli, Clinical Professor.
A. Lee Scaief, Clinical Professor.
Christina S. Wilmer, Clinical Professor.
David N. Yang, Clinical Professor.

Associate Clinical Professors  
Charles Bailey, Associate Clinical Professor.
Frank G. Balestery, Associate Clinical Professor.
Darlene T. Fong, Associate Clinical Professor.
Jeffrey Ko, Associate Clinical Professor.
George K. Lee, Associate Clinical Professor.
Andrew B. Mick, Associate Clinical Professor.
Glen Ozawa, Associate Clinical Professor.
Meredith Whiteside, Associate Clinical Professor.
Diane H. Williams, Associate Clinical Professor.
As a helpful note, the text contains the names of many individuals, some of whom are identified as "Assistant Clinical Professors" and others as "Clinical Instructors." Each name is followed by their respective titles, indicating their roles within an academic or professional setting. The list appears to be formatted in a way that highlights the different positions held by these individuals, suggesting a structured organization or hierarchy within the context they belong to. The text is presented in a clear, readable format, making it easy to identify and understand the different roles and contributions of each individual listed.
Marisa A. Perez, Clinical Instructor.
Marla F. Plecha, Clinical Instructor.
Aaron Severson, Clinical Instructor.
Mark Sherstinsky, Clinical Instructor.
Leslie Small, Clinical Instructor.
Susanna M. Tamkins, Clinical Instructor.
Anne Yun Keu Tasaki, Clinical Instructor.
Jacqueline Marie Theis, Clinical Instructor.
Jonathan C. Thomas, Clinical Instructor.
Kevin Tomita, Clinical Instructor.
Melissa A. Valdellon, Clinical Instructor.
Yen-Linh Thi Vu, Clinical Instructor.
Jeremy Walz, Clinical Instructor.
Rob Widerspan, Clinical Instructor.
