Undergraduate Studies Division

The Division of Undergraduate Studies, serving approximately 19,000 students at UC Berkeley, provides great courses for undergraduates, helps students with advice, and lets students explore interdisciplinary questions with unique majors.

Undergraduate Studies has three components: Academic Enrichment, Undergraduate Advising, and Undergraduate & Interdisciplinary Studies.

Academic Engagement Programs

Big Ideas Courses (http://bigideascourses.berkeley.edu/), launched in 2012, bring together two or more faculty members from different disciplines to co-teach innovative breadth courses. Big Ideas Courses take up key intellectual and societal challenges that cannot be adequately addressed by the perspective or methodology of one discipline alone. For more information visit the website (http://bigideascourses.berkeley.edu/).

Freshman and Sophomore Seminars (http://fss.berkeley.edu/) arose from the conviction that early intellectual contact with faculty members would greatly enhance the undergraduate experience at Berkeley. Professors from nearly every campus department join together each semester to offer an impressive array of seminars. The courses numbered 24 bear one unit of credit; they are limited to 15 students and freshmen are given priority for enrollment. The courses numbered 84 bear one or two units of credit; they are limited to 15 sophomores. The courses numbered 39A-39Z are limited to 25 freshmen and sophomores.

Seminars, which emphasize interaction and discussion, provide a counterpoint to the learning experience in Berkeley’s large lecture halls. These seminars also offer lower-division students an unprecedented opportunity to explore a wide range of majors and even fields of study usually reserved for graduate students. As you browse through this Guide, you will find lower-division seminars sponsored by Letters and Science departments, as well as by the professional schools and colleges. Descriptions of all the seminars scheduled for the upcoming semester can be found on the program’s website, which also contains other useful information and features for undergraduates.

Letters and Science Discovery Courses (http://lsdiscovery.berkeley.edu/) are exemplary breadth courses, designed to engage and broaden the minds of non-experts. Taught by some of the most distinguished faculty members on campus, the L&S Discovery Courses are guaranteed to deliver a high-quality educational experience.

On the Same Page (http://onthesamepage.berkeley.edu/) is a campus-wide book-in-common program, designed to welcome new freshmen and transfer students into the intellectual dialogue that characterizes the Berkeley campus. Each year all of the faculty and all new students receive a book (or film or other study object) that provides the focus for discussions, courses, events, and activities in the fall term. For more information visit the website. (http://onthesamepage.berkeley.edu/) For the most up-to-date information, follow On the Same Page on facebook (https://www.facebook.com/On-the-Same-Page-12900743724/) or twitter (https://twitter.com/UConthesamepage?lang=en).

The Office of Undergraduate Research and Scholarships (OURS) works to connect students with faculty and mentors, help students obtain funding to support their research, and facilitate the integration of research with students’ other academic goals. Programs run directly by OURS include the following:

Undergraduate Research Apprentice Program (URAP) provides opportunities for students to receive course credit by working with faculty and staff researchers on cutting-edge research projects during the academic year. Approximately 1,700 students and 325+ faculty members and researchers participate each semester.

Summer Undergraduate Research Fellowships (SURF L&S, SURF Rose Hills, SURF-SMART) provide over 100 students each summer with $5000 stipends to carry out their proposed research projects.

Haas Scholars Program funds twenty students a year, with stipends up to $13,800 for independent research. These programs are primarily designed for juniors intending to do research over the summer to support work on their honors theses.

Stronach Baccalaureate Prize provides funding up to $25,000 to graduating seniors who will carry out social engagement projects of their own design in the year following graduation.

UC Washington Program (UCDC) sends juniors and seniors to Washington, D.C. to intern, research, and take classes during the fall or spring semester. Cal students from all majors can apply and remain eligible for financial aid. While interning three to four days a week, students live and take classes at the UC Washington Center, in the heart of DC. During their UCDC semester, students develop professional skills, clarify their future direction, and build professional networks.

Prestigious Scholarships Program administers the application process for several prestigious external scholarships (such as the Rhodes, Marshall, Truman, and Goldwater scholarships). Through the office's Scholarship Connection website (https://scholarships.berkeley.edu/), students can search a database of several hundred scholarship opportunities, sign up for email updates, and follow us on social media.

Underrepresented Researchers of Color (UROC) serves as a pipeline to increase representation of marginalized students in research programs at Cal. Through its community-building initiatives, UROC seeks to increase the visibility, participation, engagement, and presence of students of color in research programs across campus and in research-focused graduate programs. UROC provides important tools and resources to students, including workshops, panels, peer-to-peer and faculty mentoring, as well as less formal opportunities to network with fellow student researchers.

Additionally, the Office of Undergraduate Research promotes undergraduate research by providing the following:

- A campus-wide research database: OURS maintains a database of research programs (http://research.berkeley.edu/opportunities/) within and beyond UC Berkeley. The database is frequently updated with application deadlines and eligibility requirements.
- Workshops and Peer Advising: OURS regularly offers workshops and peer-advising services, not only to orient students to the research landscape at UC Berkeley, but also to help students acquire the skills needed to undertake research. Past workshops have been devoted
to topics such as "Getting Started," "Professional Communication," "Finding a Faculty Mentor," and "Writing a Research Proposal." Upcoming workshops are listed on our events calendar (http://events.berkeley.edu/index.php/calendar/sn/ugr.html). Visit our main website to find out about OURS Peer-Adviser drop-in office hours; speaking with a Peer Adviser is a great way to explore your options.

- **OURS Listserv and Social Media:** Sign up for OURS' popular announcement listserv on our homepage (http://research.berkeley.edu/) and be sure to follow OURS on Facebook (https://www.facebook.com/OURSUCBerkeley/) and Twitter (https://twitter.com/BerkeleyOURS/).

For information on the great variety of undergraduate research opportunities at Berkeley, visit research.berkeley.edu. (http://research.berkeley.edu/)

### Undergraduate Advising

Major requirements vary among major programs (https://lsadvising.berkeley.edu/majors-minors/). Meet with an L&S undergraduate major adviser (UMA) to help you understand major admission, declaration, and academic planning for a major or minor.

College Advisers are “generalist” advisers in the Office of Undergraduate Advising (https://lsadvising.berkeley.edu/). They can help you understand campus-wide requirements, such as general education, academic progress, and time to degree. They can also help you identify possible majors.

### Undergraduate and Interdisciplinary Studies

Undergraduate and Interdisciplinary Studies (https://ls.berkeley.edu/academic-programs/undergraduate-studies/interdisciplinary-studies/) (UGIS) in the Undergraduate Division of the College of Letters and Science serves as a center for innovations in undergraduate education that extend beyond traditional departmental boundaries. Our major and minor programs attract undergraduates who wish to explore intellectually engaging and promising interdisciplinary fields under the direction of scholars who are pioneers in charting these new areas and methods of inquiry. UGIS has been and continues to be an incubator for new ideas, combining experimental programs and courses with a curriculum designed to promote the ideals of a liberal arts education.

### Interdisciplinary Major and Minor Programs

The major and minor programs in Undergraduate Studies cluster under the Undergraduate and Interdisciplinary Studies umbrella.

- American Studies (http://bulletin.berkeley.edu/undergraduate/degree-programs/american-studies/): BA and Minor
- Interdisciplinary Studies (http://guide.berkeley.edu/undergraduate/degree-programs/interdisciplinary-studies/): BA
- Media Studies (http://guide.berkeley.edu/undergraduate/degree-programs/media-studies/): BA
- Applied Language Studies (http://guide.berkeley.edu/undergraduate/degree-programs/applied-language-studies/): Minor
- Creative Writing (http://guide.berkeley.edu/undergraduate/degree-programs/creative-writing/): Minor
- Disability Studies (http://guide.berkeley.edu/undergraduate/degree-programs/disability-studies/): Minor

Politics, Philosophy, and Law (http://guide.berkeley.edu/undergraduate/degree-programs/politics-philosophy-law/): Minor

We also offer interdisciplinary courses under the Undergraduate and Interdisciplinary Studies (UGIS) and Letters & Science rubrics; you can find the former under the Related Courses tab above right, and the latter on the L&S course page (http://guide.berkeley.edu/courses/ls/).

**UGIS 5A Doing Research: Critical Inquiry at Berkeley 1 Unit**

Terms offered: Prior to 2007

Introduces the nature of research and the research university's role in the production of knowledge. Explores differences and similarities among modes of inquiry in sciences, social sciences, and humanities by looking at UCB faculty and their various approaches to current problems. Examines challenges and rewards of doing research. Profiles undergraduate researchers. Online course for new freshmen culminates in (optional) welcome week activities.

Doing Research: Critical Inquiry at Berkeley: Read More [+]

**Hours & Format**

**Summer:** 6 weeks - 2.5 hours of lecture per week

**Additional Details**

**Subject/Course Level:** Undergrad Interdisciplinary Studies/Undergraduate

**Grading/Final exam status:** Offered for pass/not pass grade only. Final exam required.

UGIS C10 The Eye and Vision in a Changing Environment 2 Units
Terms offered: Spring 2010, Spring 2009, Spring 2008
Course covers introduction to the basis of common sight reducing visual disorders with major public health implications for society—e.g., myopia, cataracts, diabetic hypertensive eye disorders, developmental disorders (e.g., lazy eye), and environmentally induced disease and disorders (solar eye burns, cataracts). Major approaches to the prevention, diagnosis, and treatment of common disorders will be addressed in terms of the biological and optical sciences underlying the treatment or prevention. Impact of eye care on society and health and care delivery will be reviewed.

UGIS 58 Global Citizenship 3 Units
Terms offered: Prior to 2007
With this course, you will be able to add a new dimension to your internship experience: a reflection on global citizenship. You will be challenged to use your internship experience as an opportunity to critically explore cultural differences, modes of conduct and values. A series of audio-visual lectures, practical exercises, writing assignments, projects, and online group discussions will stimulate you to leave the comfort zone of what you are familiar with and to explore alternative views on right and wrong, good and bad and the beautiful and the ugly. The course will also encourage you to interact with locals and to engage with the city/region/country where you live during your internship.
Global Citizenship: Read More [+]

UGIS 80A It's Elementary! Exploring Science with Young Students 2 Units
Terms offered: Spring 2015, Fall 2014, Spring 2014
This course introduces the fundamentals of K-5 science education through demonstrations, skill modeling, and discussion. Topics include inquiry-based and cooperative learning strategies; team building and management tools; and assessment techniques. Students are placed in an elementary school and are provided the support needed to successfully participate in the classroom. This seminar offers an opportunity to explore teaching, foster children's natural curiosity, and inspire local students.

UGIS 82T K-12 Tutoring in Science and Mathematics 2 Units
Terms offered: Fall 2020
This course surveys basic approaches to K-12 science, computer science, engineering, and mathematics (STEM) tutoring through modeling inquiry-based teaching approaches. Topics include effective STEM pedagogy, assessment, lesson plan design and revision, attention to equity in underserved schools, and child development. Students are placed with K-12 students for STEM enrichment and tutoring experiences. This seminar offers an opportunity to explore K-12 teaching, foster children's natural curiosity, and inspire local students to engage in STEM learning.

K-12 Tutoring in Science and Mathematics: Read More [+]

Objectives & Outcomes

Student Learning Outcomes: Students will be able to build relationships with K-12 students to establish safe learning environments. Students will be able to demonstrate science or mathematics content knowledge in the design and teaching of K-12 tutoring sessions. Students will be able to design and teach inquiry-based tutoring lessons using the 5E instructional model. Students will be able to identify and use exemplary sources of inquiry-based science and mathematics lessons for tutoring. Students will be able to identify unique attributes of elementary and adolescent students and plan age-appropriate tutoring strategies targeted to learning needs of individual K-12 students. Students will be able to productively discuss and use strategies for achieving instructional equity in tutoring and classroom settings. Students will be able to provide constructive and compassionate feedback to peers on their teaching. Students will be able to reflect on their personal interest in tutoring, and STEM education as a career path. Students will be able to reflect on tutoring experiences to improve teaching and learning. Students will be able to use educational technology intentionally and creatively for supporting STEM learning. Students will be able to use formative and summative assessments aligned to learning objectives in order to evaluate students' prior knowledge and student learning, provide instructive feedback to K-12 students, and revise tutoring lesson plans. Students will be able to use probing questions to elicit feedback to determine students' acquisition of knowledge.

Rules & Requirements

UGIS 110 Introduction to Disability Studies 3 Units
Terms offered: Fall 2021, Fall 2020, Fall 2019
This course focuses on the social and personal meaning of disability and chronic illness. We will explore definitions and conceptual models for the study of disability, the history of disabled people, bio-ethical perspectives, the depiction of disability in literature and the arts, public attitudes, and legal and social policies. The course will investigate the interaction of disability with social factors such as gender, sexual orientation, race, ethnicity, and class. The course is for students with and without disabilities, and may be of special interest to students preparing for careers in the health professions, education, law, architecture, social work, or gerontology.

Introduction to Disability Studies: Read More [+]

Introduction to Disability Studies: Read Less [-]
UGIS 112 Women and Disability 3 Units
Terms offered: Spring 2022, Spring 2021, Spring 2019
This course will explore the intersection of women's experience and disability issues, emphasizing the social and personal impact of disability and chronic illness on relationships, identity, employment, health, body image, sexuality, reproduction, motherhood, and aging. Through real stories of women's lives which reached the media in the last decade and before, students will move toward a dynamic understanding of the impact of a range of physical, emotional, and mental disabilities in the context of current social forces and public policy. We will explore historic perspectives as well as current trends in medicine, independent living, care-giving, insurance, public benefits, law, and community activism as they affect and are affected by disabled women and girls and their families. We will discuss controversial ethical issues such as prenatal screening, wrongful birth law suits, and physician-assisted suicide. Course readings will draw on the rich literature of disabled women's anthologies, biography and autobiography, scholarly and popular literature of disability, feminist analyses, creative writing, women's art, film, and theatre.

UGIS 113 Disability Studies in Practice 3 Units
Terms offered: Fall 2009
A graded service-learning internship course in disability studies. Students will draw lessons from working in collaboration with major disability rights and independent living organizations. Each student will do an internship at one of these organizations for six hours a week. In an additional one-hour a week seminar together, students will first prepare for the internships, setting objectives for skills to be learned and planning effective projects, and then analyze and reflect on the work done, both in order to create greater understanding of each intern's individual experiences and in order to think critically about how "service" and "organizing" can address the needs and goals of the disability community. Students must apply in advance for admission into this course.

UGIS C133 Death, Dying, and Modern Medicine: Historical and Contemporary Perspectives 4 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015, Fall 2013, Fall 2005, Fall 2002
This course will study the end of life—dying and death—from the perspective of medicine and history. It seeks to confront the humanist with the quotidian dilemmas of modern clinical practice and medicine's deep engagement with death more generally. It invites pre-med, pre-law, and public policy students to understand these matters in light of the historical and, more broadly, literary and artistic perspectives of the humanities.

UGIS 140 The Hand-Printed Book in Its Historical Context 2 Units
Terms offered: Spring 2022, Spring 2020, Fall 2019
The "Hand-Printed Book" is a studio course taught in the Bancroft press room. Using antique presses and 19th century type, each class produces by hand a rare first edition of a work from the Bancroft collections that has never been published before. As students learn how hand-produced books have been made in the west for the last 500 years, they are also taught about the history of the book, using examples from Bancroft's rare books and manuscripts collection.

UGIS C155 Jewish Civilization: Modern Period 4 Units
Terms offered: Fall 2016, Spring 2015, Fall 2013, Fall 2012, Fall 2011
This is the fourth course in a four-course sequence in the history of Jewish culture and civilization. It explores the major themes in Jewish history from 1750 to the present, with special attention paid to the transformation of Jewish communal and individual identity in the modern world. Topics to be treated include the breakdown of traditional society, enlightenment and emancipation, assimilation, Hasidism, racial anti-Semitism, colonialism, Zionism, and contemporary Jewish life in Europe, North America, and Israel. The multicultural nature of Jewish history will be highlighted throughout the course through the treatment of non-European Jewish narratives alongside the more familiar Ashkenazi perspective.

UGIS 162D Activism, Protest, and the Politics of Change 4 Units
Terms offered: Spring 2021, Fall 2019
How does social and political change happen in Washington? This class will explore the history of grassroots mobilization and advocacy on the national stage. By observing advocacy events and interacting with guest speakers, students will learn about the successes and failures of social groups’ efforts to make lasting change in American politics and society. The class will cover agenda setting and messaging, as well as techniques used to influence public debate such as protests, advocacy campaigns, petitions, and electoral lobbying. Students will learn about and discuss which types of groups and leaders engage in which strategies, and at what stage of the policy process they are most likely to be effective.

Activism, Protest, and the Politics of Change: Read More [+]

Objectives & Outcomes

Course Objectives: Students will be able to communicate persuasively in writing and orally. Students will be able to critically examine competing arguments, and use empirical evidence to research and apply theory to practice. Students will discuss as part of their class participation how the weekly substance or skills learned applied to the work of their internship or their internship organization’s goals or mission. Students will experience a cultural, historical, policy or other event in the District of Columbia that relates to their course.

Rules & Requirements

Credit Restrictions: Students will receive no credit for UGIS 162D after completing UGIS 162D. A deficient grade in UGIS 162D may be removed by taking UGIS 162D.

UGIS 162E Political Science: Environmental Policymaking and the Politics of Climate Change 4 Units
Terms offered: Spring 2011
World leaders at the United Nations Framework Convention on Climate Change (UNFCCC) held in Copenhagen this past December announced that they reached “a meaningful agreement” that will lead to a global treaty to address climate change. Many observers see the politics of the Copenhagen Accord as a glimpse into the new world order in which international diplomatic power will increasingly be shared by the United States (U.S.) and emerging powers, such as China. Climate change policy also offers a lens through which the U.S. domestic environmental policymaking process can be viewed and its evolution better understood. This course will examine the dynamics of global environmental treaty-making after first studying the development of U.S. environmental protection efforts. Students will then analyze the international and domestic efforts that led up to the Copenhagen Accord and assess what is needed and likely to result from the next UNFCCC meeting to be held in Mexico City in 2010.
Political Science: Environmental Policymaking and the Politics of Climate Change: Read More [+]

UGIS 162F Current Issues in US Immigration Policy 4 Units
Terms offered: Spring 2020, Spring 2011, Fall 2010
This course examines contemporary issues in U.S. immigration policy, one of the highest profile policy issues in recent years. The course will introduce students to the structure of the US legal immigration and immigration enforcement policies, and will ground current policy debates in historical context. It will also provide an overview of current immigration trends and how they are shaped by policy and how they fit into the demographics of the contemporary United States.

UGIS 162G Nations and Nationalism 4 Units
Terms offered: Fall 2019
This course explores the history, politics, and recent literature on the formation of nations and the development of nationalism. Theories of the nation have moved from ideas of their essential, primordial quality through a moment of social construction featuring the processes of modernization to a more cultural, discursive approach emphasizing the role of imagination and invention. We will both develop a narrative of the emergence of nations and explore some of the ways in which social science has employed and developed the body of theory on nationalism, looking at paradigms taken from international relations, identity theory, anthropology, and various psychological theories.
Nations and Nationalism: Read More [+]

UGIS 162M U.S. Foreign Policy in the Middle East 4 Units
Terms offered: Fall 2021, Fall 2019, Fall 2018
What are the United States’ interests in the Middle East? Who and what determine those interests? And how are those interests pursued? This course addresses these questions in two parts. Students should leave this class with a strong understanding of the challenges that the U.S. faces in the Middle East, as well as an informed viewpoint regarding how well America is meeting those challenges.

UGIS 162N American Political Journalism 4 Units
Terms offered: Fall 2019, Spring 2019, Fall 2018
This class will explore the relationships among politics, news media, and government. It will do so by focusing on particular news events in which the role of the media becomes an integral part of the story.

UGIS 162O The Science of Politics: Campaigns and Elections 4 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
This class will teach you how to better understand the fundamental factors that drive elections in America and to learn some of the skills employed by political professionals. Many of your assignments will require you to apply the lessons of this class to real time events. Our goal in this class is to go beyond the spin and hyperbole of many election commentators and understand how voters decide and how strategists persuade.

UGIS 162Q Youth, Social Media and Development 4 Units
Digital technologies and online social networks play an increasingly important role in the political, social and economic development of all societies. In the Global North and South, it is largely the young generation of men and women (24 years old and under) who experiment with and embrace these technologies in creative, innovative and unanticipated ways. This course focuses on the creative energies of youth and the enabling powers of digital/ networked technologies to solve some of the enduring development challenges.
UGIS 162R Looking at the World: U.S. Foreign Policy and National Security 4 Units
Terms offered: Prior to 2007
This course combines two areas of continual fascination in Washington and beyond - US foreign policy and policies regarding national security. The course provides students with a framework to understand policy analysis, development, and implementation while introducing them to a range of the most pressing substantive policy issues the US is currently facing. The course will alternate between foreign policy issues and functional organizational tools used to address these issues. Looking at the World: U.S. Foreign Policy and National Security: Read More [+]

UGIS 162X Race and Ethnic Politics 4 Units
Terms offered: Fall 2021, Spring 2021, Fall 2019
This course will examine the fundamental theories of race and representation as it applies to the lived experiences and quest for freedom, justice, and equality on part of African Americans, Latinos, Asian Americans, Native Americans and other groups. Given the racial and ethnic demographic shifts over the past two decades, particular attention will focus on race, representation, and racial discrimination from President Obama to President Trump. Moreover, the election of the first black president has transformed the political landscape in ways that have challenged traditional notions of descriptive and substantive representation.
Race and Ethnic Politics: Read More [+]

UGIS 162Z "All I Need is One Mic!": Political Advocacy and Public Opinion in a Digital Age
4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
This course is for the bold and the brave, for the student who wants to examine effective communication methods that influence public opinion and public policy in today's political environment and experientially test those methods. Students will leave this class smarter on how Congress works in a digital age and on theories of political representation, advocacy, legislative behavior, and the American voter. Additionally, students will learn strategies and tips from guest speakers and experts on Capitol Hill as well as those attempting to influence Capitol Hill; the applied component of the course will inevitably build public speaking and leadership skills aimed at influencing public policy.

"All I Need is One Mic!": Political Advocacy and Public Opinion in a Digital Age: Read More [+] 
Objectives & Outcomes

Course Objectives: To broaden and deepen students understanding of public policy and political representation vis-a-vis the political environment and the ways advances in technology and social media have transformed the political landscape.
To develop the theoretical, analytical, and methodological skills to help students think critically and strategically about communications, media framing, technology and its influence on public opinion and political advocacy from both elected officials and the citizenry.
To engage and apply the theories and analytical skills to real world policy problems and solutions through experiential learning. In addition to perfecting the art of analytical writing and translating research and data into compelling policy recommendations, students will also be trained on public speaking and leadership skills, and be exposed to public speaking opportunities throughout the semester. Furthermore, students will be provided with opportunities to engage with guest speakers on Capitol Hill and in the advocacy and lobbying world to maximize their internships and educational experience. Finally, the publication opportunity with the Congressional Black Caucus Foundation will offer the opportunity to analyze or collect quantitative or qualitative data to be shared and disseminated to the broader communities of interest across the country.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

UGIS 165 A Window Into How Washington Works 4 Units
Terms offered: Fall 2010, Spring 2009, Fall 2008
The federal government effects policy (e.g., enhancing public safety, protecting the environment, promoting a viable and growing economy, etc.) primarily in three ways: taxing, spending, and regulating. This course will explore how regulations -- an important instrument of government and one of the easiest ways for a President to make his/her mark -- are developed, amended, or repealed, with an emphasis on how the various institutions of the federal government are involved in the process and how they interact with the other interested entities.

Politics and Poems: Writing Verse in D.C.: Read Less [-]
UGIS 173 Museums and Society: The Power of Display in Washington DC 3 Units
Terms offered: Spring 2010, Spring 2009
This course explores museums as dynamic sites of intellectual and cultural debate, and as institutions vested with the authority to define aesthetics, history, heritage, and even citizenship. Now more than ever, as the process of globalization raises questions about the fluidity, preservation, and "authenticity" of culture, museums of all kinds are attracting great interest both as places to visit and as a subject of critical analysis in their own right. As places defined by the collection, display, and interpretation of objects, museums are bound up in questions of permanence and transience, difference and identity, equity and privilege—issues that lie at the heart of what is termed the “new museology.” But as institutional repositories of community memory or indigenous knowledge, they are also bound up in questions of representation, access and ownership—issues that move the debate over museum collections squarely into the politics of local, state, and national control over heritage. If ownership and control are the new realities of international heritage policy (and law), museums have quickly emerged as important sites on which and through which these claims are being made.

UGIS 303 Apprentice Teaching in Science and Mathematics 2 - 3 Units
Terms offered: Fall 2020, Spring 2020, Fall 2019
The course is designed to support new science and mathematics teachers in earning a credential for teaching in California secondary schools. Students demonstrate that they have developed the skills to meet the state credentialing requirements by undertaking an inquiry project on their own teaching practice. Effective teaching methods for the science and mathematics classrooms are emphasized, including strategies for lesson planning, assessment, and English language learner support.
Apprentice Teaching in Science and Mathematics: Read More [+]

Rules & Requirements
Prerequisites: Undergraduates may take the course with consent of instructor
Credit Restrictions: Students must hold an approved teaching placement concurrently.
Repeat rules: Course may be repeated for credit with instructor consent.

Hours & Format
