Anthropology

Bachelor of Arts (BA)

The Anthropology major is designed to serve two purposes: to provide a general education in anthropology for students who are pursuing a liberal arts education and to provide preparation for graduate work for students who wish to become professional anthropologists. Students who do not intend to do graduate work in anthropology may plan their program with considerable freedom, so long as they fulfill the requirements of the major listed below. Students who plan to go on to graduate study, either at UC Berkeley or another institution, should select a combination of courses to form a unified plan of study that meets special intellectual interests.

Declaring the Major

Before you are eligible to declare the major, you must have completed or be in the progress of completing two of the three prerequisite courses and enrolled in the third, with a grade point average (GPA) of 2.0 or higher in all courses intended for the major. For more details regarding the prerequisites, please see the Major Requirements tab on this page.

To declare the major, you will need to complete these three steps:

1. Fill in completely the "Application and Petition to Declare Major."
2. Provide photocopies of transcripts showing courses satisfying the major prerequisites that you took anywhere other than Berkeley, with the grades you earned (continuing Berkeley students may request copies of their transfer transcripts from the Undergraduate Admissions Office in 110 Sproul Hall).
3. Meet with the Academic Undergraduate Advisor in 215 Kroeber Hall during office hours.

Declare the major as soon as you are eligible. You should declare the major no later than the beginning of your junior year; if you are a transfer student, you should declare the major during your first semester at UC Berkeley.

Honors Program

The honors program in Anthropology is an independently-pursued course of research undertaken by qualified students under the mentorship of a faculty thesis adviser. An overall GPA of 3.5 and a GPA of 3.65 in the major in courses completed at UC Berkeley is required to qualify for the program. The year-long senior program may begin in either the fall or spring semester. The program requires the sponsorship of an anthropology professor as an adviser and a second reader. The honors courses, ANTHRO H195A and ANTHRO H195B, may also count as elective requirements for the major. Applications and more information are available at 215 Kroeber Hall.

Minor Program

The Department of Anthropology offers an undergraduate minor in anthropology. In order to declare the minor, you will need to complete these three steps:

1. Complete the "Petition for Confirmation of Minor Program Completion" and the "Minor Application Form."
2. Provide photocopies of transcripts showing courses satisfying the minor that you took anywhere other than Berkeley, with the grades you earned (continuing Berkeley students may request copies of their transfer transcripts from the Undergraduate Admissions Office in 110 Sproul Hall).
3. Submit all documentation to the Undergraduate Advising Office in 215 Kroeber.

In addition to the University, campus, and college requirements, listed on the College Requirements tab, students must fulfill the below requirements specific to their major program.

General Guidelines

1. All courses taken to fulfill the major requirements below must be taken for graded credit, other than courses listed which are offered on a Pass/No Pass basis only. Other exceptions to this requirement are noted as applicable.
2. No more than one upper division course may be used to simultaneously fulfill requirements for a student's major and minor programs, with the exception of minors offered outside of the College of Letters & Science.
3. A minimum grade point average (GPA) of 2.0 must be maintained in both upper and lower division courses used to fulfill the major requirements.

For information regarding residence requirements and unit requirements, please see the College Requirements tab.

Lower Division Prerequisites

The three prerequisites below may be taken in any order. Students should begin with the course that seems the most interesting to them.

Students who have a strong interest in an area of study outside their major often decide to complete a minor program. These programs have set requirements and are noted officially on the transcript in the memoranda section, but are not noted on diplomas.

### General Guidelines

1. All courses taken to fulfill the minor requirements below must be taken for graded credit.
2. A minimum of three of the upper division courses taken to fulfill the minor requirements must be completed at UC Berkeley.
3. A minimum grade point average (GPA) of 2.0 is required for courses used to fulfill the minor requirements.
4. Courses used to fulfill the minor requirements may be applied toward the Seven-Course Breadth requirement, for Letters & Science students.
5. No more than one upper division course may be used to simultaneously fulfill requirements for a student’s major and minor programs.
6. All minor requirements must be completed prior to the last day of finals during the semester in which you plan to graduate. If you cannot finish all courses required for the minor by that time, please see a College of Letters & Science adviser.
7. All minor requirements must be completed within the unit ceiling. (For further information regarding the unit ceiling, please see the College Requirements tab.)

Requirements

Lower Division

Select two of the following:

- ANTHRO 1 Introduction to Biological Anthropology [4]
- ANTHRO 2 Introduction to Archaeology [4]
- or ANTHRO 2A Introduction to Archaeology
- ANTHRO 3 Introduction to Social and Cultural Anthropology [4]
- or ANTHRO 3A Introduction to Social/Cultural Anthropology (American Cultures)

Upper Division

Select any five anthropology courses

Undergraduate students must fulfill the following requirements in addition to those required by their major program.

For detailed lists of courses that fulfill college requirements, please review the College of Letters & Sciences (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science) page in this Guide. For College advising appointments, please visit the L&S Advising (https://ls.berkeley.edu/advising/about-undergraduate-advising-services) Pages.

University of California Requirements

Entry Level Writing (http://writing.berkeley.edu/node/78)

All students who will enter the University of California as freshmen must demonstrate their command of the English language by fulfilling the Entry Level Writing requirement. Fulfillment of this requirement is also a prerequisite to enrollment in all reading and composition courses at UC Berkeley.

American History and American Institutions (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science-american-history-institutions-requirement)

The American History and Institutions requirements are based on the principle that a US resident graduated from an American university, should have an understanding of the history and governmental institutions of the United States.

Berkeley Campus Requirement

American Cultures (http://americancultures.berkeley.edu/students/courses)

All undergraduate students at Cal need to take and pass this course in order to graduate. The requirement offers an exciting intellectual environment centered on the study of race, ethnicity and culture of the United States. AC courses offer students opportunities to be part of research-led, highly accomplished teaching environments, grappling with the complexity of American Culture.

College of Letters & Science Essential Skills Requirements

Quantitative Reasoning (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/quantitative-reasoning-requirement)

The Quantitative Reasoning requirement is designed to ensure that students graduate with basic understanding and competency in math, statistics, or computer science. The requirement may be satisfied by exam or by taking an approved course.

Foreign Language (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/foreign-language-requirement)

The Foreign Language requirement may be satisfied by demonstrating proficiency in reading comprehension, writing, and conversation in a foreign language equivalent to the second semester college level, either by passing an exam or by completing approved course work.

Reading and Composition (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/reading-composition-requirement)

In order to provide a solid foundation in reading, writing, and critical thinking the College requires two semesters of lower division work in composition in sequence. Students must complete parts A & B reading and composition courses by the end of their second semester and a second-level course by the end of their fourth semester.

College of Letters & Science 7 Course Breadth Requirements

Breadth Requirements (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/#breadthrequirementstext)

The undergraduate breadth requirements provide Berkeley students with a rich and varied educational experience outside of their major program. As the foundation of a liberal arts education, breadth courses give students a view into the intellectual life of the University while introducing them to a multitude of perspectives and approaches to research and scholarship. Engaging students in new disciplines and with peers from other majors, the breadth experience strengthens interdisciplinary connections and context that prepares Berkeley graduates to understand and solve the complex issues of their day.

Unit Requirements

- 120 total units
- Of the 120 units, 36 must be upper division units
- Of the 36 upper division units, 6 must be taken in courses offered outside your major department
Residence Requirements
For units to be considered in "residence," you must be registered in courses on the Berkeley campus as a student in the College of Letters & Science. Most students automatically fulfill the residence requirement by attending classes here for four years. In general, there is no need to be concerned about this requirement, unless you go abroad for a semester or year or want to take courses at another institution or through UC Extension during your senior year. In these cases, you should make an appointment to meet an adviser to determine how you can meet the Senior Residence Requirement.

Note: Courses taken through UC Extension do not count toward residence.

Senior Residence Requirement
After you become a senior (with 90 semester units earned toward your BA degree), you must complete at least 24 of the remaining 30 units in residence in at least two semesters. To count as residence, a semester must consist of at least 6 passed units. Intercampus Visitor, EAP, and UC Berkeley-Washington Program (UCDC) units are excluded.

You may use a Berkeley Summer Session to satisfy one semester of the Senior Residence requirement, provided that you successfully complete 6 units of course work in the Summer Session and that you have been enrolled previously in the college.

Modified Senior Residence Requirement
Participants in the UC Education Abroad Program (EAP), Berkeley Summer Abroad, or the UC Berkeley Washington Program (UCDC) may meet a Modified Senior Residence requirement by completing 24 (excluding EAP) of their final 60 semester units in residence. At least 12 of these 24 units must be completed after you have completed 90 units.

Upper Division Residence Requirement
You must complete in residence a minimum of 18 units of upper division courses (excluding UCEAP units), 12 of which must satisfy the requirements for your major.

Learning Goals for the Major
1. Learning About Anthropology
   • Understand core concepts in contemporary biological anthropology.
   • Understand core concepts in contemporary anthropological archaeology.
   • Understand core concepts in contemporary sociocultural anthropology, including medical anthropology.
   • Develop understanding of the history of anthropological thought.
   • Gain experience in fieldwork and the application of theory and methodology.
   • Develop understanding of the anthropological analysis of visual media and language.

2. Critical Thinking, Communication, and Analytical Goals
   • Encourage critical abilities in the analysis of evolutionary, historical, and contemporary situations.
   • Develop the ability to analyze comprehensively and critically scholarly articles and monographs.
   • Develop facility in conveying anthropological concepts and debates to public audiences.
   • Formulate well-organized written and oral arguments supported by evidence.

3. Learning About the World
   • Understand the structure and transformation of society and culture past and present.
   • Analyze regional and cultural diversity in the organization of human societies and the impact of cultural contacts and globalization.
   • Integrate biological and cultural perspectives on human behavior, social organization, and the environment.
   • Utilize anthropological concepts and methods to understand the history and forms of diversity in US society.

ANTHRO 122E Archaeology of the Americas: Andean Archaeology: People of the Andes 4 Units
Terms offered: Spring 2019, Spring 2017, Fall 2014
This course covers the archaeology and history of the indigenous societies of the Andean region of South America. The lectures and readings emphasize major political, economic, social, and symbolic processes in the development of the Andean civilizations. Particular attention is paid to the development of the early states along the coast of Peru. The development of major centers in the highlands, and the relationship between the political, economic, and religious systems of the later empires and earlier political structures and social processes, are also emphasized.

ANTHRO 123A Old World Prehistory 4 Units
Terms offered: Spring 2018, Fall 2014, Fall 2009
This course explores the dramatic developments in human evolution, behavior and culture that accompany the emergence of prehistoric human society, from our earliest Palaeolithic ancestors who first ventured out of Africa over a million years ago to the origins of settled farming economies and the first urban environments. Focusing on the Old World, we trace these interconnected transitions in Africa, Europe, the Middle East and Asia. The archaeological record forms our dataset, providing a rich record of economic and technological developments, settlement, architecture, burial practices, art, ideology, and social organization.

ANTHRO C124C Human Biogeography of the Pacific 3 Units
Terms offered: Spring 2015, Spring 2013
This course examines the history of human dispersal across Oceania from the perspectives of biogeography and evolutionary ecology. H. sapiens faced problems of dispersal, colonization, and extinction, and adapted in a variety of ways to the diversity of insular ecosystems. A dual evolutionary model takes into account cultural evolution and transmission, as well as biological evolution of human populations. This course also explores the impacts of human populations on isolated and fragile insular ecosystems, and the reciprocal effects of anthropogenic change on human cultures.

ANTHRO 126M Geoarchaeology 4 Units
Terms offered: Fall 2017, Spring 2016
Humans have always been affected by changes in their landscape and, in turn, had an influence on their physical surroundings. The contexts that archaeological material and features are found within yield invaluable clues as to how sites form, what types of activities people performed in them, and what kinds of natural and cultural processes altered the archaeological record from deposition to excavation. This course introduces the methods of studying archaeological remains from an environmental context in order to reconstruct the relationships between people and the environment, drawing on case studies from different areas of the world.

ANTHRO 127C Bioarchaeology Research: Data Collection and Analysis 5 Units
Terms offered: Spring 2019
Bioarchaeology is the study of archaeological human skeletal remains together with contextual information (archival, historical, material culture) to provide insight on the life of people and communities in the past. In this course you will delve into the formative contemporary literature and get to work with actual archaeological skeletal remains in order to learn bioarchaeological methods, develop your own research questions, and conduct and complete a hands-on research project. You will work with skeletal remains from the stage of identification, inventory, illustration/photography, to the collection of data such as sex, age, stature, and health/growth, pathology, and statistical analysis.

ANTHRO C129D Holocene Paleoecology: How Humans Changed the Earth 3 Units
Terms offered: Spring 2014, Spring 2011, Spring 1998
Since the end of the Pleistocene and especially with the development of agriculturally based societies humans have had cumulative and often irreversible impacts on natural landscapes and biotic resources worldwide. Thus "global change" and the biodiversity crisis are not exclusively developments of the industrial and post-industrial world. This course uses a multi-disciplinary approach, drawing upon methods and data from archaeology, palynology, geomorphology, paleontology, and historical ecology to unravel the broad trends of human ecodynamics over the past 10,000 years.

Terms offered: Spring 2011, Fall 2009, Spring 2009
This is a practical laboratory analysis course that offers a team of students the opportunity to work closely with faculty on an aspect of their laboratory research in archaeological physical or natural sciences, or archaeological material analysis. May be taken concurrently with other laboratory courses or as the logical follow-up to a field school. Projects will vary by course.
ANTHRO 135 Paleoethnobotany: Archaeological Methods and Laboratory Techniques 4 Units
Terms offered: Fall 2018, Fall 2016, Spring 2014
An introduction to the basic approaches and techniques in archaeobotanical analysis. A series of different data types and their unique approaches will be discussed, including phytoliths, pollen, and DNA, with an emphasis on macrofloral remains. Laboratory study will include the major classes of plant remains likely to be encountered in archaeological sites. Discussion will emphasize the use of plant remains to answer archaeological questions, rather than study the plant remains for their own sake. Microscope work and computing will be included.

ANTHRO 136B Public Anthropology: Museum Methods 4 Units
Terms offered: Summer 2009 First 6 Week Session, Summer 2008 Second 6 Week Session, Summer 2007 First 6 Week Session
This course will introduce participants to the fundamentals of contemporary museum practices. It is intended for two groups of students: individuals who may be thinking of conducting research in museums, and may benefit from an understanding of the way these institutions work; and individuals who may be thinking of museum work as a post-graduate career. The course will include both discussion of museum concepts and practical application of these concepts through real-world exercises. While the course fulfills the method requirement, it covers practices of art, natural history, and science museums as well.

ANTHRO 136C Multimedia Authoring Part 1 4 Units
Terms offered: Fall 2010, Fall 2006
This course is the first part in a two-part series of courses that coach students in research and presentation of archaeological information through nonlinear multimedia authoring. The content of the course varies and may focus on an area or a topic depending on instructor. Students experience the first stage of multimedia authoring process: research, planning, and design. The focus is on content development and evaluation of digital research sources, with an introduction to software skills and practice.

ANTHRO 150 Utopia: Art and Power in Modern Times 4 Units
Terms offered: Spring 2019, Fall 2016, Fall 2015
Modern times have been dominated by utopian visions of how to achieve a happy future society. Artists in competing social systems played a central role in the development of these visions. But artistic experiments were filled with paradoxes, contributing to the creation not only of the most liberating and progressive ideals and values but also to the most oppressive regimes and ideologies. The course questions: what is art, what can it achieve and destroy, what is beauty, artistic freedom, and the relationship between esthetics, ethics, and power?

ANTHRO 149 Psychological Anthropology 4 Units
Terms offered: Fall 2017, Spring 2016, Spring 2015
In the contemporary world, different systems of knowledge, philosophies, and techniques of the self, understandings of normality and pathology, illness and healing, are increasingly engaged in a dialogue with each other in the lives, on the bodies, and in the imagination of people. The terms of this dialogue are often unequal and painful, yet they are also productive of new subjectivities and new voices. It is the task of a renewed psychological anthropology to study and reflect on these processes. Topics to be covered in this class include new forms of the subject and ethics at the intersection of psychical/psychiatric, political, and religious processes and discourses; ethno-psychiatry, psychoanalysis, the psychology of colonization and racism; anthropological approaches to possession and altered states, emotion, culture, and the imagination, madness and mental illness. The specific stress will be on the stakes of anthropology of the psyche today, for an understanding of power and subjugation, delusion and the imagination, violence, and the possibility of new forms of life.

ANTHRO 151 Disability and Culture 4 Units  
Terms offered: Fall 2005, Fall 2002, Spring 2001  
Disability is a cultural construct. This does not mean that physical and mental impairments are not real, but that our conceptions of the body and its possibilities and impossibilities are constantly mediated through social norms and mores. The built environments and social institutions we navigate are based around these concepts of the “normal.” Using ethnographic examples drawn from various countries around the world, and various disability categories, we examine the contingency of the categories of disability and normality from social, legal, and personal perspectives.
