Electronic Intelligent Systems

The Electronic Intelligent Systems minor offers the opportunity to gain breadth as well as depth in the area of electronic intelligent systems that connect to the physical and social world. The minor includes sub-areas such as robotics, machine learning, and artificial intelligence as well as electronic/electrical engineering. Students learn computer programming as well as computer engineering. EIS minors achieve an understanding of conceptual foundations and emerging applications over a broad range of electrical engineering, computer engineering, and computer science subjects.

General Guidelines

1. All minors must be declared no later than one semester before a student’s Expected Graduation Term (EGT). If the semester before EGT is fall or spring, the deadline is the last day of RRR week. If the semester before EGT is summer, the deadline is the final Friday of Summer Sessions. To declare a minor, contact the department advisor for information on requirements, and the declaration process.

2. All courses taken to fulfill the minor requirements must be taken for graded credit.

3. All upper division courses taken to fulfill the minor must be completed with an overall GPA of 2.0 or above.

4. No more than one upper division course may be used to simultaneously fulfill requirements for a student’s major and minor programs.

5. Completion of the minor program cannot delay a student’s graduation. Students must declare the minor one semester before their final term.

6. EECS and L&S CS majors should not be pursuing an EIS minor.

7. All students must complete the EIS Minor Completion Form at least one semester before their final semester.

Requirements

Lower Division Requirements

EECS 16A  Designing Information Devices and Systems I  4
EECS 16B  Designing Information Devices and Systems II  4

Select from one of the following:
COMPSCI 61A  The Structure and Interpretation of Computer Programs  4
COMPSCI C8  Foundations of Data Science and Computational Structures in Data Science  6

Upper Division Requirements

Select two from the following:
EL ENG 105  Microelectronic Devices and Circuits  4
EECS C106A  Introduction to Robotics  4
EL ENG 117  Electromagnetic Fields and Waves  4
EL ENG 118  Introduction to Optical Engineering  3
EL ENG 120  Signals and Systems  4
EECS 126  Probability and Random Processes  4
EECS 127  Optimization Models in Engineering  4
EECS 130  Integrated-Circuit Devices  4
EL ENG 134  Fundamentals of Photovoltaic Devices  4

EL ENG 137A  Introduction to Electric Power Systems  4
EL ENG 143  Microfabrication Technology  4
EL ENG 147  Introduction to Microelectromechanical Systems (MEMS)  3
EECS 149  Introduction to Embedded Systems  4
EECS 151  Introduction to Digital Design and Integrated Circuits  3
COMPSCI 152  Computer Architecture and Engineering  4
COMPSCI 170  Efficient Algorithms and Intractable Problems  4
COMPSCI 188  Introduction to Artificial Intelligence  4
COMPSCI 189  Introduction to Machine Learning  4

Select one from the following:
COMPSCI 61C  Great Ideas of Computer Architecture (Machine Structures)  4
COMPSCI 70  Discrete Mathematics and Probability Theory  4
OR any upper division EE or EECS course

1  All courses used for the minor must be at least 3 units.
