# Energy Engineering

## Bachelor of Science (BS)

The Energy Engineering major offered through the Engineering Science Program interweaves the fundamentals of classical and modern physics, chemistry, and mathematics with energy engineering applications. A great strength of the major is its flexibility. The firm base in physics and mathematics is augmented with a selection of engineering course options that prepare the student to tackle the complex energy-related problems faced by society. Because the program emphasizes science and mathematics, students are well-prepared to pursue graduate studies in physics or engineering. Energy engineering is a multidisciplinary field requiring an integration of physical principles with engineering analysis, augmented with the realities of policy and engineering economics. The program incorporates courses from many departments on campus to create a discipline that is rigorously based in science, mathematics, and engineering, while addressing a wide variety of environmental issues.

## Admission to the Major

Prospective undergraduates in the College of Engineering must apply for admission to one specific major/degree program. For further information, please see the College of Engineering’s website (http://coe.berkeley.edu/students/prospective-students/admissions.html).

Admission to engineering via a Change of College application for current UC Berkeley students is very competitive, as there are few open spaces in engineering for students admitted to other colleges at UC Berkeley. For further information regarding a Change of College to Engineering, please see the college’s website (http://coe.berkeley.edu/students/current-undergraduates/change-of-college).

## Minor Program

The Energy Engineering minor has arisen as a natural outgrowth of the large amount of energy-related research in the College of Engineering. For a number of years, courses have been developed across the College of Engineering, and the energy engineering minor is designed to coordinate these courses for students who have an interest in systems that are associated with all aspects of energy systems, such as generation, transmission, and consumption. The energy minor, offered through the College of Engineering, is an optional program that encourages coherence in the work students undertake around energy engineering.

For admission to the minor, students must have a minimum overall grade point average (GPA) of 2.0 and have also completed all of the prerequisite courses. For information regarding the prerequisites, please see the Minor Requirements tab on this page.

After completion of the prerequisite courses, students will need to complete and submit a Petition for Admission form (http://engineeringscience.berkeley.edu/wp-content/uploads/2013/09/Energy-Minor-Application-2103-141.pdf) to the undergraduate staff adviser. This must be completed no later than two weeks prior to the end of the semester.

## Other Majors offered by the Engineering Science Program

Engineering Physics (http://guide.berkeley.edu/undergraduate/degree-programs/engineering-physics)  
Environmental Engineering Science (http://guide.berkeley.edu/undergraduate/degree-programs/environmental-engineering-science)

In addition to the University, campus, and college requirements, students must fulfill the below requirements specific to their major program.

## General Guidelines

1. All technical courses taken in satisfaction of major requirements must be taken for a letter grade.
2. No more than one upper division course may be used to simultaneously fulfill requirements for a student’s major and minor programs.
3. A minimum overall grade point average (GPA) of 2.0 is required for all work undertaken at UC Berkeley.
4. A minimum GPA of 2.0 is required for all technical courses taken in satisfaction of major requirements.

For information regarding residence requirements and unit requirements, please see the College Requirements tab.

For a detailed plan of study by year and semester, please see the Plan of Study tab.

Upper Division Requirements

Due to the interdisciplinary nature of this major, electives may be approved throughout the year.

- **CIV ENG 100** Elementary Fluid Mechanics (3-4)
- **CIV ENG 106** Fluid Mechanics
- **CIV ENG 186** Design of Cyber-Physical Systems (3)
- **EL ENG 134** Fundamentals of Photovoltaic Devices (4)
- **EL ENG 137A** Introduction to Electric Power Systems (4)
- **EL ENG 137B** Introduction to Electric Power Systems (4)
- **ENE,RES C100** Energy and Society (4)
- **ENGIN 194** Undergraduate Research (3)
- **MEC ENG 109** Heat Transfer (3)

Sustainability Course, select one course from the following: (3)

- **CIV ENG 111** Environmental Engineering
- **CIV ENG 115** Water Chemistry
- **CY PLAN 119** Planning for Sustainability (3)
- **ENE,RES 101** Ecology and Society

Economics Course: Choose one from the following (3-4)

- **CIV ENG 156** Infrastructure Planning and Management
- **ENE,RES 180** Ecological Economics in Historical Context
- **ENGIN 120** Principles of Engineering Economics
- **ENVECON 147** Regulation of Energy and the Environment
- **ENVECON 153** Adaptive Economic Development
- **ENVECON 154** Economics of Poverty and Technology
- **ESPM 102D** Climate and Energy Policy
- **POLECON 101** Contemporary Theories of Political Economy

Math/Statistics/Analysis Course: Choose from list below or choose any listed course (3-4)

- **CIV ENG 191** or **EL ENG 127**
- **COMPSCI C8** Foundations of Data Science (must also take connector course: course number 88)
- **CIV ENG 11** Engineered Systems and Sustainability (3)
- **CIV ENG 70** Engineering Geology (3)
- **EL ENG 16A** Designing Information Devices and Systems I (4)
- **EL ENG 16B** Designing Information Devices and Systems II (4)
- **MAT SCI 45** Properties of Materials and Properties of Materials Laboratory
- **MEC ENG C85** Introduction to Solid Mechanics (3)
- **MEC ENG 104** Engineering Mechanics II (3)
- **PHYSICS 7C** Physics for Scientists and Engineers (4)

**Engineering Electives** (5)

1. **ENE,RES C100** satisfies both a major requirement and one of the upper division humanities/social sciences requirements. It must be taken for a letter grade.
2. **CIV ENG 111** cannot be used to fulfill more than one requirement.
3. This course satisfies both the sustainability requirement and one of the upper division humanities/social sciences requirements. It must be taken for a letter grade.
4. This course satisfies both the economics requirement and one of the upper division humanities/social sciences requirements. It must be taken for a letter grade.
5. Students interested in data are advised to take **CIV ENG 191**, **IND ENG 172** or **STAT 134** for the Math/Statistics/Analysis requirement.
6. Students are required to take four Engineering Electives of at least 3 units each. Engineering Electives are upper division courses in any engineering department and must be chosen in consultation with a faculty adviser. Engineering Electives cannot include any course taken on a P/NP basis; **BIO ENG 100**, **COMPSCI 195**, **COMPSCI H195**, **DES INV courses** (except DES INV 190E), **ENGIN 125**, **ENGIN 157AC**, **ENGIN 180**, **IND ENG 172**, **IND ENG 185**, **IND ENG 186**, **IND ENG 190** series, **IND ENG 191**, **IND ENG 192**, **IND ENG 195**, **MEC ENG 190K**, **MEC ENG 191AC**, **MEC ENG 191K**. **ENGIN 185** can be used to fulfill requirements, but **CIV ENG 185** and **ENGIN 187** cannot be used to fulfill engineering electives. Students interested in data, distribution, generation or materials are advised to choose from the following courses as their Engineering Electives:

   - **Data:** **COMPSCI C8** + connector (course number 88) and **COMPSCI 61B**
   - **Distribution:** **COMPSCI 180 series courses**, **STAT 133**, **STAT 135** (exception approved for these two Statistics courses)
   - **Generation:** **MEC ENG C85** and **MEC ENG 104**
   - **Materials:** **MAT SCI 45** + **MAT SCI 45L** and **PHYSICS 7C**

Minor programs are areas of concentration requiring fewer courses than an undergraduate major. These programs are optional, but can provide depth and breadth to a UC Berkeley education. The College of Engineering does not offer additional time to complete a minor, but it is usually possible to finish within the allotted time with careful course planning. Students are encouraged to meet with their ESS adviser to discuss the feasibility of completing a minor program.

All the engineering departments offer minors. Students may also consider pursuing a minor in another School or College.

**General Guidelines**

1. All courses taken to fulfill the minor requirements must be taken for graded credit.
2. A minimum overall grade point average (GPA) of 3.0 and a minimum GPA of 3.0 in the prerequisite courses is required for acceptance into the minor program.
3. A minimum grade point average (GPA) of 2.0 is required for courses used to fulfill the minor requirements.
4. No more than one upper division course may be used to simultaneously fulfill requirements for a student’s major and minor programs.

5. Completion of the minor program cannot delay a student’s graduation.

- IND ENG 172 Probability and Risk Analysis for Engineers [3]
- or STAT 134 Concepts of Probability [3]

**Students in the College of Engineering must complete no fewer than 120 semester units with the following provisions:**

1. Completion of the requirements of one engineering major program (http://engineering.berkeley.edu/academics/undergraduate-programs) study.
2. A minimum overall grade point average of 2.00 (C average) and a minimum 2.00 grade point average in upper division technical coursework required of the major.
3. The final 30 units and two semesters must be completed in residence in the College of Engineering on the Berkeley campus.
4. All technical courses (math, science and engineering) that can fulfill requirements for the student's major must be taken on a letter graded basis (unless they are only offered P/NP).
5. Entering freshmen are allowed a maximum of eight semesters to complete their degree requirements. Entering junior transfers are allowed a maximum of four semesters to complete their degree requirements. (Note: junior transfers admitted missing three or more courses from the lower division curriculum are allowed five semesters.) Summer terms are optional and do not count toward the maximum. Students are responsible for planning and satisfactorily completing all graduation requirements within the maximum allowable semesters.
6. Adhere to all college policies and procedures (http://engineering.berkeley.edu/academics/undergraduate-guide) as they complete degree requirements.
7. Complete the lower division program before enrolling in upper division engineering courses.

**Humanities and Social Sciences (H/SS) Requirement**

To promote a rich and varied educational experience outside of the technical requirements for each major, the College of Engineering has a six-course Humanities and Social Sciences breadth requirement (http://engineering.berkeley.edu/student-services/degree-requirements/humanities-and-social-sciences), which must be completed to graduate. This requirement, built into all the engineering programs of study, includes two reading and composition courses (R&C), and four additional courses within which a number of specific conditions must be satisfied. Follow these guidelines to fulfill this requirement:

1. Complete a minimum of six courses from the approved Humanities/ Social Sciences (H/SS) list (http://engineering.berkeley.edu/hssreq).
2. Courses must be a minimum of 3 semester units (or 4 quarter units).
3. Two of the six courses must fulfill the college’s Reading and Composition (R&C) requirement. These courses must be taken for a letter grade (C- or better required) and must be completed by no later than the end of the sophomore year (fourth semester of enrollment). The first half of R&C, the “A” course, must be completed by the end of the freshman year; the second half of R&C, the “B” course, must be completed by no later than the end of the sophomore year. Use the Class Schedule (http://classes.berkeley.edu) to view R&C courses offered in a given semester. View the list of
exams (http://engineering.berkeley.edu/academics/undergraduate-guide/exams) that can be applied toward the first half of the R&C requirement. Note: Only the first half of R&C can be fulfilled with an AP or IB exam score. Test scores do not fulfill the second half of the R&C requirement for College of Engineering students.

4. The four additional courses must be chosen within College of Engineering guidelines from the H/SS lists (see below). These courses may be taken on a Pass/Not Passed basis (P/NP).

5. Two of the six courses must be upper division (courses numbered 100-196).

6. One of the six courses must satisfy the campus American Cultures requirement. For detailed lists of courses that fulfill American Cultures requirements, visit the American Cultures (http://guide.berkeley.edu/undergraduate/colleges-schools/engineering/american-cultures-requirement) site.

7. A maximum of two exams (Advanced Placement, International Baccalaureate, or A-Level) may be used toward completion of the H/SS requirement. View the list of exams (http://engineering.berkeley.edu/academics/undergraduate-guide/exams) that can be applied toward H/SS requirements.

8. Courses may fulfill multiple categories. For example, CY PLAN 118AC (http://guide.berkeley.edu/search/?P=CY%20PLAN%20118AC) satisfies both the American Cultures requirement and one upper division H/SS requirement.

9. No courses offered by any engineering department other than BIO ENG 100 (http://guide.berkeley.edu/search/?P=BIO%20ENG%20100), COMPSCI C79 (http://guide.berkeley.edu/search/?P=COMPSCI%20C79), ENGIN 125 (http://guide.berkeley.edu/search/?P=ENGIN%20125), ENGIN 157AC (http://guide.berkeley.edu/search/?P=ENGIN%20157AC), and MEC ENG 191K (http://guide.berkeley.edu/search/?P=MEC%20ENG%20191K) may be used to complete H/SS requirements.

10. Foreign language courses may be used to complete H/SS requirements. View the list of language options (http://guide.berkeley.edu/undergraduate/colleges-schools/engineering/approved-foreign-language-courses).

11. Courses numbered 97, 98, 99, or above 196 may not be used to complete any H/SS requirement.

12. The College of Engineering uses modified versions of five of the College of Letters and Science (L&S) breadth requirements lists to provide options to our students for completing the H/SS requirement. The five areas are:

   • Arts and Literature
   • Historical Studies
   • International Studies
   • Philosophy and Values
   • Social and Behavioral Sciences

Within the guidelines above, choose courses from any of the Breadth areas listed above. (Please note that you cannot use courses on the Biological Science or Physical Science Breadth list to complete the H/SS requirement.) To find course options, go to the Class Schedule (http://classes.berkeley.edu), (http://classes.berkeley.edu/search/class) select the term of interest, and use the Breadth Requirements (https://ls.berkeley.edu/sites/default/files/breadth_search_annotation_in_guide.png) filter.

Class Schedule Requirements

- Minimum units per semester: 12.0
- Maximum units per semester: 20.5
- Minimum technical courses: College of Engineering undergraduates must enroll each semester in no fewer than two technical courses (of a minimum of 3 units each) required of the major program of study in which the student is officially declared. (Note: For most majors, normal progress will require enrolling in 3-4 technical courses each semester).
- All technical courses (math, science, engineering) that satisfy requirements for the major must be taken on a letter-graded basis (unless only offered as P/NP).

Minimum Academic (Grade) Requirements

- A minimum overall and semester grade point average of 2.00 (C average) is required of engineering undergraduates. Students will be subject to dismissal from the University if during any fall or spring semester their overall UC GPA falls below a 2.00, or their semester GPA is less than 2.00.
- Students must achieve a minimum grade point average of 2.00 (C average) in upper division technical courses required for the major curriculum each semester.
- A minimum overall grade point average of 2.00, and a minimum 2.00 grade point average in upper division technical course work required for the major is needed to earn a Bachelor of Science in Engineering.

Unit Requirements

To earn a Bachelor of Science in Engineering, students must complete at least 120 semester units of courses subject to certain guidelines:

- Completion of the requirements of one engineering major program (https://engineering.berkeley.edu/academics/undergraduate-guide/degree-requirements/major-programs) of study.
- A maximum of 16 units of special studies coursework (courses numbered 97, 98, 99, 197, 198, or 199) is allowed towards the 120 units.
- A maximum of 4 units of physical education from any school attended will count towards the 120 units.
- Students may receive unit credit for courses graded P (including P/NP units taken through EAP) up to a limit of one-third of the total units taken and passed on the Berkeley campus at the time of graduation.

Normal Progress

Students in the College of Engineering must enroll in a full-time program and make normal progress each semester toward the bachelor's degree. The continued enrollment of students who fail to achieve minimum academic progress shall be subject to the approval of the dean. (Note: Students with official accommodations established by the Disabled Students' Program, with health or family issues, or with other reasons deemed appropriate by the dean may petition for an exception to normal progress rules.)

University of California Requirements

Entry Level Writing (http://guide.berkeley.edu/undergraduate/colleges-schools/natural-resources/entry-level-writing-requirement)

All students who will enter the University of California as freshmen must demonstrate their command of the English language by fulfilling the Entry Level Writing Requirement. Satisfaction of this requirement is also a
prerequisite to enrollment in all reading and composition courses at UC Berkeley.

American History and American Institutions (http://guide.berkeley.edu/undergraduate/colleges-schools/natural-resources/american-history-institutions-requirement)

The American History and Institutions requirements are based on the principle that a U.S. resident graduated from an American university should have an understanding of the history and governmental institutions of the United States.

**Campus Requirement**

American Cultures (http://guide.berkeley.edu/undergraduate/colleges-schools/natural-resources/american-cultures-requirement)

American Cultures (AC) is the one requirement that all undergraduate students at UC Berkeley need to take and pass in order to graduate. The requirement offers an exciting intellectual environment centered on the study of race, ethnicity, and culture in the United States. AC courses offer students opportunities to be part of research-led, highly accomplished teaching environments, grappling with the complexity of American Culture.

For more detailed information regarding the courses listed below (e.g., elective information, GPA requirements, etc.), please see the College Requirements and Major Requirements tabs.

1 CHEM 4A is intended for students majoring in chemistry or a closely-related field.

2 See Major Requirements tab for approved courses.

3 ENE,RES C100 satisfies both a major requirement and one of the upper division humanities/social sciences requirements. It must be taken for a letter grade.

Total Units: 120-135
