Bachelor of Arts (BA)

Students who major in Integrative Biology (IB) will gain a broad and deep knowledge in the biological sciences as well as an excellent foundation in the biology of organisms, populations, and communities. This program may be of particular interest to students who wish to pursue graduate studies in any of these subdisciplines or related emerging research areas. It also provides superb training for students interested in health-related professions (medicine, dentistry, veterinary medicine, physical therapy, nursing, pharmacy, optometry, etc.) or allied careers in biology (psychology, sociobiology, forestry, wildlife conservation, environmental and resource management, law, etc.).

The department's broad range of experts includes behaviorists, ecologists, evolutionary biologists, geneticists, morphologists, paleontologists, physiologists, and systematists.

Course of Study Overview

Students majoring in Integrative Biology choose one of two tracks: Ecology, Evolution and Organismal Biology (Track 1) or Human Biology and Health Sciences (Track 2). The lower division requirements are the same for all IB majors, regardless of the track. The upper division requirements differ for the two tracks. For detailed information, please see the Major Requirements tab (http://guide.berkeley.edu/undergraduate/degree-programs/integrative-biology/#majorrequirements).

Declaring the Major

In order to declare Integrative Biology as a major, students must have completed certain prerequisites. For information regarding these courses, please see the Major Requirements tab (http://guide.berkeley.edu/undergraduate/degree-programs/integrative-biology/#majorrequirements). The grade point averages (GPA) in (1.) courses for the major and (2.) any upper-division major requirements must each be at least 2.0. All declaring students must meet with a staff adviser and a faculty adviser as part of the declaration process.

At the time of declaration, students must have completed:

- One year of calculus, either MATH 1A and MATH 1B or MATH 10A and MATH 10B
- CHEM 1A and CHEM 1AL
- CHEM 3A
- Either BIOLOGY 1A and BIOLOGY 1AL or BIOLOGY 1B

AND be enrolled in or have completed:

- Either CHEM 3B or the second biology course (see above) and receive an average grade or better on the midterm exam
- Either INTEGBI 77A or INTEGBI 77B

For transfer students, it is recommended that lower division courses be completed before arriving at Berkeley. Before declaring, transfer students should have completed at least one semester at Berkeley, with a GPA of at least 2.0 in all courses taken for the major, and they should have completed all lower division courses except the Physics series.

For detailed instructions on the process for declaring the major, please see the department's website (http://ib.berkeley.edu/undergrad-major/declaring.php).

Honors Program

Students with minimum grade point averages (GPA) of 3.3 overall, in the major, and in all upper-division major requirements are encouraged to participate in the honors program. Interested students must identify an appropriate faculty sponsor who agrees to advise them on an original research project and enroll in two consecutive semesters of the honors thesis course (INTEGBI H196A and INTEGBI H196B). Honors students must present the results of their work in the form of a written honors thesis and a poster presentation at Cal Day. In order to graduate with honors, students must maintain the minimum required GPAs.

Minor Program

There is no minor program in Integrative Biology.

In addition to the university, campus, and college requirements, listed on the College Requirements tab (http://guide.berkeley.edu/undergraduate/degree-programs/integrative-biology/#collegerequirements), students must fulfill the below requirements specific to their major program.

General Guidelines

1. All courses taken to fulfill the major requirements below must be taken for letter-graded credit.
2. Standardized test credit (e.g., Advanced Placement) cannot be used to satisfy any major requirements.
3. No more than one upper division course may be used to simultaneously fulfill requirements for a student's major and minor programs, with the exception of minors offered outside of the College of Letters & Science. Double majors and simultaneous degrees are limited to a two course overlap.
4. Students must maintain a minimum grade point average (GPA) of at least a 2.0 GPA overall, a 2.0 GPA in the required major coursework (lower and upper division), and a 2.0 GPA in the upper division coursework for the major.
5. A maximum of two elective courses may be taken from outside of the Department of Integrative Biology. This includes study abroad courses, as well as non-IB courses, even if they are on the approved electives list.

For information regarding breadth, residence, requirements and unit requirements, please see the College Requirements tab (http://guide.berkeley.edu/undergraduate/degree-programs/integrative-biology/#collegerequirements).

Lower Division Requirements, Both Tracks

</tbody>
</table>
CHEM 3A & 3AL Chemical Structure and Reactivity and Organic Chemistry Laboratory 5
CHEM 3B & 3BL Chemical Structure and Reactivity and Organic Chemistry Laboratory 5
BIOLOGY 1A General Biology Lecture and General Biology Laboratory 5
BIOLOGY 1B General Biology Lecture and Laboratory 4
PHYSICS 8A Introductory Physics 2 4
PHYSICS 8B Introductory Physics 2 4
INTEGBI 77A Integrative Human Biology 3 1
or INTEGBI 77B Integrative Human Biology

1 CHEM 4A can be substituted for Chem 1A/1AL.
2 PHYSICS 7A & PHYSICS 7B can be substituted for these courses.
3 Students declaring IB in Fall 2017 or later must take either INTEGBI 77A or INTEGBI 77B; only one is required.

Upper Division Requirements, Track 1: Ecology, Evolution, and Organismal Biology (24 units minimum)

Group Requirements (see lists below)
One course from Group A: Evolution and Genetics
Two courses from Group B: Ecology, Behavior, and Diversity
One course from Group C: Structure, Function, and Human Health
Two upper division lab courses; one must be field-based (LF)
Electives
Select additional approved courses, as needed, from the group, lab, and elective lists to total at least 24 upper division units.
Optional: Research or Honors
Up to 3 units of research credit in INTEGBI 191, INTEGBI H196A, or INTEGBI H196B

Upper Division Requirements, Track 2: Human Biology and Health Sciences (24 units minimum)

Group Requirements (see lists below)
One course from Group A: Evolution and Genetics
One course from Group B: Ecology, Behavior, and Diversity
Two courses from Group C: Structure, Function, and Human Health.
One must be INTEGBI 131 or INTEGBI 132.
Two upper division lab courses
Electives
Select additional approved courses, as needed, from the group, lab, and elective lists to total at least 24 upper division units.
Optional: Research or Honors
Up to 3 units of research credit in INTEGBI 191, INTEGBI H196A, or INTEGBI H196B

Requirement Group A: Evolution and Genetics
INTEGBI 141 Human Genetics 3
INTEGBI 160 Evolution 4
INTEGBI 161 Population and Evolutionary Genetics 4
INTEGBI 162 Ecological Genetics 4
INTEGBI 163 Molecular and Genomic Evolution 3
INTEGBI 164 Human Genetics and Genomics 4
INTEGBI 167 Evolution and Earth History: From Genes to Fossils 4
INTEGBI 169 Evolutionary Medicine 4
INTEGBI 172 Coevolution: From Genes to Ecosystems 4

Requirement Group B: Ecology, Behavior, and Diversity
INTEGBI 102LF Introduction to California Plant Life with Laboratory 4
INTEGBI 103LF Invertebrate Zoology with Laboratory 5
INTEGBI 104LF Natural History of the Vertebrates with Laboratory 5
INTEGBI/ PLANTBI C107L Principles of Plant Morphology with Laboratory 4
INTEGBI/ PLANTBI C110L Biology of Fungi with Laboratory 4
INTEGBI 113L Paleobiological Perspectives on Ecology and Evolution 4
INTEGBI 114 Infectious Disease Dynamics 4
INTEGBI C144/ ESPM C126 Animal Behavior 4
INTEGBI 146LF Behavioral Ecology with Laboratory 5
INTEGBI 151 Plant Physiological Ecology 4
INTEGBI 152 Environmental Toxicology 4
INTEGBI 153 Ecology 3
INTEGBI 154 Plant Ecology 3
INTEGBI C155/ ANTHRO C129D Holocene Paleoecology: How Humans Changed the Earth 3
INTEGBI C156/ ESPM C103 Principles of Conservation Biology 4
INTEGBI 157LF Ecosystems of California 4
INTEGBI 158LF/ ESPM C107 Biology and Geomorphology of Tropical Islands 13
INTEGBI 159 The Living Planet: Impact of the Biosphere on the Earth System 3
INTEGBI 162 Ecological Genetics 4
INTEGBI 166 Course Not Available 4
INTEGBI 167 Evolution and Earth History: From Genes to Fossils 4
INTEGBI 168L Systematics of Vascular Plants with Laboratory 4
INTEGBI 170LF Methods in Population and Community Ecology 3
INTEGBI C171 Freshwater Ecology 3
INTEGBI 173LF Mammalogy with Laboratory 5
INTEGBI 174LF Ornithology with Laboratory 4
INTEGBI 175LF Herpetology with Laboratory 4
INTEGBI C176LF Fish Ecology 3
INTEGBI 181L Paleobotany - The 500-Million Year History of a Greening Planet 4
INTEGBI 183L Evolution of the Vertebrates with Laboratory 4
INTEGBI C185L/ ANTHRO C100 Human Paleontology 5
INTEGBI C187/ ANTHRO C124C
Human Biogeography of the Pacific
++ These courses can be used to fulfill one group AND one lab requirement.

Requirement Group C: Structure, Function, and Human Health

INTEGBI 114 Infectious Disease Dynamics 4
INTEGBI 115 Introduction to Systems in Biology and Medicine 4
INTEGBI 116L Medical Parasitology ++ 4
INTEGBI 117 Medical Ethnobotany 2
INTEGBI 118 Host-Pathogen Interactions: A Trans-Discipline Outlook 4
INTEGBI 123AL Exercise and Environmental Physiology with Laboratory ++ 5
INTEGBI C125/ PHYS ED C165 Human Movement ++ 4
INTEGBI 128 Sports Medicine 3
INTEGBI C129L/ PHYS ED C129 Human Physiological Assessment ++ 3
INTEGBI 131 General Human Anatomy 3
INTEGBI 132 Survey of Human Physiology 4
INTEGBI 135 The Mechanics of Organisms 4
INTEGBI 136 The Biology of Sex 4
INTEGBI 137 Human Endocrinology 4
INTEGBI 138 Comparative Endocrinology 4
INTEGBI 139 The Neurobiology of Stress 4
INTEGBI 140 Biology of Human Reproduction 4
INTEGBI C142L/ ANTHRO C103 Introduction to Human Osteology ++ 6
INTEGBI C143A/ PSYCH C113 Biological Clocks: Physiology and Behavior 3
INTEGBI C143B/ PSYCH C116 Hormones and Behavior 3
INTEGBI 148 Comparative Animal Physiology 3
INTEGBI 150 Evolutionary Environmental Physiology 3
INTEGBI 151 Plant Physiological Ecology 4
INTEGBI 184L Morphology of the Vertebrate Skeleton with Laboratory ++ 4
INTEGBI 116L Medical Parasitology ++ 4
INTEGBI 117LF Medical Ethnobotany Laboratory 2
INTEGBI 123AL Exercise and Environmental Physiology with Laboratory ++ 5
INTEGBI C125L/ PHYS ED C165 Human Movement ++ 4
INTEGBI C129L/ PHYS ED C129 Human Physiological Assessment ++ 3
INTEGBI 131L General Human Anatomy Laboratory 2
INTEGBI 132L Mammalian Physiology Laboratory 2
INTEGBI C135L/ EL ENG C145O/ BIO ENG C136L Laboratory in the Mechanics of Organisms 3
INTEGBI C142L/ ANTHRO C103 Introduction to Human Osteology ++ 6
INTEGBI 146LF Behavioral Ecology with Laboratory ++ 5
INTEGBI 151L Plant Physiological Ecology Laboratory 2
INTEGBI 154L Plant Ecology Laboratory 2
INTEGBI 157LF Ecosystems of California ++ 4
INTEGBI 158LF/ ESPM C107 Biology and Geomorphology of Tropical Islands ++ 13
INTEGBI 168L Systematics of Vascular Plants with Laboratory ++ 4
INTEGBI 170LF Methods in Population and Community Ecology ++ 3
INTEGBI 173L/ ESPM C107 Mammalogy with Laboratory ++ 5
INTEGBI 174LF Ornithology with Laboratory ++ 4
INTEGBI 175LF Herpetology with Laboratory ++ 4
INTEGBI C176L/ ESPM C115C Fish Ecology ++ 3
INTEGBI 181L Paleobotany - The 500-Million Year History of a Greening Planet ++ 4
INTEGBI 183L Evolution of the Vertebrates with Laboratory ++ 4
INTEGBI 184L Morphology of the Vertebrate Skeleton with Laboratory ++ 4
INTEGBI C185L/ ANTHRO C100 Human Paleontology ++ 5

++ These courses can be used to fulfill one group AND one lab requirement.

Approved Lab and Field-Lab (LF) Courses

INTEGBI 102LF Introduction to California Plant Life with Laboratory ++ 4
INTEGBI 103LF Invertebrate Zoology with Laboratory ++ 5
INTEGBI 104LF Natural History of the Vertebrates with Laboratory ++ 5
INTEGBI/ PLANTBI C107L Principles of Plant Morphology with Laboratory ++ 4
INTEGBI C110L Biology of Fungi with Laboratory ++ 4
INTEGBI 113L Paleobiological Perspectives on Ecology and Evolution ++ 4

++ These courses can be used to fulfill one group AND one lab requirement.

Undergraduate students in the College of Letters & Science must fulfill the following requirements in addition to those required by their major program.

For detailed lists of courses that fulfill college requirements, please review the College of Letters & Sciences (http://guide.berkeley.edu/undergraduate-colleges-schools/letters-science) page in this Guide.

Entry Level Writing (http://writing.berkeley.edu/node/78)

All students who will enter the University of California as freshmen must demonstrate their command of the English language by fulfilling the Entry Level Writing requirement. Fulfillment of this requirement is also a prerequisite to enrollment in all reading and composition courses at UC Berkeley.
American History and American Institutions
(http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/american-history-institutions-requirement)

The American History and Institutions requirements are based on the principle that a US resident graduated from an American university, should have an understanding of the history and governmental institutions of the United States.

American Cultures (http://americancultures.berkeley.edu/students/courses)

American Cultures is the one requirement that all undergraduate students at Cal need to take and pass in order to graduate. The requirement offers an exciting intellectual environment centered on the study of race, ethnicity and culture of the United States. AC courses offer students opportunities to be part of research-led, highly accomplished teaching environments, grappling with the complexity of American Culture.

Quantitative Reasoning

The Quantitative Reasoning requirement is designed to ensure that students graduate with basic understanding and competency in math, statistics, or computer science. The requirement may be satisfied by exam or by taking an approved course.

Foreign Language

The Foreign Language requirement may be satisfied by demonstrating proficiency in reading comprehension, writing, and conversation in a foreign language equivalent to the second semester college level, either by passing an exam or by completing approved course work.

Reading and Composition

In order to provide a solid foundation in reading, writing, and critical thinking the College requires two semesters of lower division work in composition in sequence. Students must complete a first-level reading and composition course by the end of their second semester and a second-level course by the end of their fourth semester.

Breadth Requirements

The undergraduate breadth requirements provide Berkeley students with a rich and varied educational experience outside of their major program. As the foundation of a liberal arts education, breadth courses give students a view into the intellectual life of the University while introducing them to a multitude of perspectives and approaches to research and scholarship. Engaging students in new disciplines and with peers from other majors, the breadth experience strengthens interdisciplinary connections and context that prepares Berkeley graduates to understand and solve the complex issues of their day.

Unit Requirements

• 120 total units, including at least 60 L&S units
• Of the 120 units, 36 must be upper division units
• Of the 36 upper division units, 6 must be taken in courses offered outside your major department

Residence Requirements

For units to be considered in “residence,” you must be registered in courses on the Berkeley campus as a student in the College of Letters & Science. Most students automatically fulfill the residence requirement by attending classes here for four years. In general, there is no need to be concerned about this requirement, unless you go abroad for a semester or year or want to take courses at another institution or through UC Extension during your senior year. In these cases, you should make an appointment to meet an adviser to determine how you can meet the Senior Residence Requirement.

Note: Courses taken through UC Extension do not count toward residence.

Senior Residence Requirement

After you become a senior (with 90 semester units earned toward your BA degree), you must complete at least 24 of the remaining 30 units in residence in at least two semesters. To count as residence, a semester must consist of at least 6 passed units. Intercampus Visitor, EAP, and UC Berkeley-Washington Program (UCDC) units are excluded.

You may use a Berkeley Summer Session to satisfy one semester of the Senior Residence requirement, provided that you successfully complete 6 units of course work in the Summer Session and that you have been enrolled previously in the college.

Modified Senior Residence Requirement

Participants in the UC Education Abroad Program (EAP) or the UC Berkeley Washington Program (UCDC) may meet a Modified Senior Residence requirement by completing 24 (excluding EAP) of their final 60 semester units in residence. At least 12 of these 24 units must be completed after you have completed 90 units.

Upper Division Residence Requirement

You must complete in residence a minimum of 18 units of upper division courses (excluding EAP units), 12 of which must satisfy the requirements for your major.

The sample plans below show a four-year plan for completing the major in Integrative Biology, taking classes only during fall and spring semesters. All of the lower division classes are offered during the summer as well. Please consult the sample plan appropriate to your track. Peer and academic advisers are available to help customize a plan to the student’s specific situation.

Please note that the sample plans below include only courses required for the major. For more detailed information regarding other requirements, including unit minimums per semester, Letters & Science Breadth requirements, Reading and Composition (R & C), and the American Cultures (AC) requirements, please see the College Requirements tab (http://guide.berkeley.edu/undergraduate/degree-programs/integrative-biology#collegerequirementstext).

Total Units: 65-76
Accelerated Program Plans

For students considering graduating in less than four years, it's important to acknowledge the reasons to undertake such a plan of study. While there are advantages to pursuing a three-year degree plan, such as reducing financial burdens, they can significantly restrict participation in co-curricular activities, depth of study, and research internships. Please consult with an academic adviser before pursuing an accelerated degree plan.

Learning Goals for the Major

1. Describe the principles of evolution and genetics that underlie all biology.
2. Demonstrate a broad and integrated understanding of species origins, biological and organismal diversity, how to characterize, understand and protect this diversity, and interactions with the environment.
3. Demonstrate a fundamental understanding of the relationships between structure and function in animal (human) health.
4. Describe the basic principles of scientific inquiry and the importance of scientific study in integrative biology.
5. Illustrate the process of data collection, statistical analysis, and graphing including basic principles of experimental and sampling design.
6. Critically evaluate data, develop hypotheses, and interpret biological experiments.
7. Communicate effectively in the written presentation of scientific results.

Staff Advisers

Staff academic advisers are trained to support students and assist them in successfully completing their IB major. They are excellent resources for questions concerning administration and academics or finding out about other available services. Students should see a staff advisor for the following:

- Questions about major requirements
- Declare the IB major
- Information about research opportunities, graduate and professional schools, career opportunities, scholarships, and internships
- Scheduling conflicts or registration holds
- Information and registration assistance for independent research credit
- General assistance, advice or information
- Information about upcoming events and programs

Staff advisers are primarily available for drop-in advising, though limited appointments are available for more complex issues such as probation, academic difficulty, and readmission. Students who would like to schedule an appointment should call 510-643-1667 during drop-in advising hours. Current hours can be found on the advising website: http://ib.berekeley.edu/undergrad.

The general email address is ibusso@berkeley.edu. This email is checked daily, Monday through Friday, so students will receive a timely answer to their questions.

Faculty Advisers

Faculty advisers are IB professors assigned to advise students about the IB department, courses, research, and other academic issues. Students meet with a faculty advisor when they declare the IB major. Students should see a faculty adviser for the following:

- Guidance toward achieving academic and career goals
- Questions about the content of IB courses
- Exceptions to IB major requirements and policies after having previously met with a staff adviser
- Questions about biological research and biology in general
- Recommendations on graduate training

For a list of faculty advisers and their office hours, please see speak with a staff advisor in 3060 VLSB. Faculty advisers are not available for office hours during instructional breaks, including summer break. Students may refer to staff drop-in advising hours during summer sessions and non-instructional periods.

Peer Advisers

Peer advisers are junior and senior IB students who volunteer their time to complement the advising services by sharing their knowledge of and experience with lower division requirements and upper division classes, experience with student groups on campus, preparation for life beyond Cal, and use of various campus resources. To see the schedule and more information about who the peer advisers are and which courses they have taken, click here (https://ib.berkeley.edu/undergrad/ibpeers).
Integrative Biology
INTEGBI C13 Origins: from the Big Bang to the Emergence of Humans 4 Units
Terms offered: Fall 2016, Fall 2014, Fall 2013
This course will cover our modern scientific understanding of origins, from the Big Bang to the formation of planets like Earth, evolution by natural selection, the genetic basis of evolution, and the emergence of humans. These ideas are of great intrinsic scientific importance and also have far reaching implications for other aspects of people's lives (e.g., philosophical, religious, and political). A major theme will be the scientific method and how we know what we know.
Origins: from the Big Bang to the Emergence of Humans: Read More [+]  
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of discussion per week
Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Marshall, Quataert
Also listed as: ASTRON C13
Origins: from the Big Bang to the Emergence of Humans: Read Less [-]

INTEGBI 24 Freshman Seminars 1 Unit
Terms offered: Spring 2018, Fall 2017, Spring 2016
The Berkeley Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Berkeley Seminars are offered in all campus departments, and topics vary from department to department and semester to semester.
Freshman Seminars: Read More [+]  
Rules & Requirements
Repeat rules: Course may be repeated for credit when topic changes. Course may be repeated for credit when topic changes.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of seminar per week
Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Freshman Seminars: Read Less [-]

INTEGBI 31 The Ecology and Evolution of Animal Behavior 3 Units
Terms offered: Summer 2018 8 Week Session, Spring 2017, Spring 2016
Principles of evolution biology as they relate to animal behavior and behavioral ecology with broad coverage of animal groups. Special attention will be paid to the emerging discipline of behavioral ecology.
The Ecology and Evolution of Animal Behavior: Read More [+]  
Rules & Requirements
Prerequisites: Open to all students; designed for those not specializing in biology
Credit Restrictions: Students will receive no credit for Integrative Biology 31 after taking Integrative Biology 144, C144 or Psychology C115B.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture, 1 hour of demonstration, and 1 hour of discussion per week
Summer:  
6 weeks - 5 hours of lecture, 5 hours of demonstration, and 5 hours of discussion per week
8 weeks - 4 hours of lecture, 2 hours of demonstration, and 2 hours of discussion per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
The Ecology and Evolution of Animal Behavior: Read Less [-]
INTEGBI C32 Bioinspired Design 3 Units
Terms offered: Spring 2018, Spring 2017
Bioinspired design views the process of how we learn from Nature as an innovation strategy translating principles of function, performance and aesthetics from biology to human technology. The creative design process is driven by interdisciplinary exchange among engineering, biology, art, architecture and business. Diverse teams of students will collaborate on, create, and present original bioinspired design projects. Lectures discuss biomimicry, challenges of extracting principles from Nature, scaling, robustness, and entrepreneurship through case studies highlighting robots that run, fly, and swim, materials like gecko-inspired adhesives, artificial muscles, medical prosthetic devices, and translation to start-ups.
Bioinspired Design: Read More [+]

Rules & Requirements
Prerequisites: Open to all students

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Full

Formerly known as: Integrative Biology 32
Also listed as: L & S C30Z

Bioinspired Design: Read Less [-]

INTEGBI 35AC Human Biological Variation 4 Units
Terms offered: Summer 2018 8 Week Session, Fall 2017, Summer 2017 8 Week Session
This course addresses modern human biological variation from historical, comparative, evolutionary, biomedical, and cultural perspectives. It is designed to introduce students to the fundamentals of comparative biology, evolutionary theory, and genetics.
Human Biological Variation: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Summer: 8 weeks - 6 hours of lecture and 2 hours of discussion per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Hlusko

Human Biological Variation: Read Less [-]

INTEGBI N33 Topics in Paleontology: The Age of Dinosaurs 2 Units
Terms offered: Summer 1996 10 Week Session
Open without prerequisite to all students and designed for those not specializing in paleontology. Survey the evolution, ecology, and history of the dinosaurs and their world, including the earliest mammals and birds.
Topics in Paleontology: The Age of Dinosaurs: Read More [+]

Rules & Requirements
Repeat rules: Course may be repeated for credit with instructor consent. Course may be repeated for credit when topic changes.

Hours & Format
Summer: 8 weeks - 4 hours of lecture per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Topics in Paleontology: The Age of Dinosaurs: Read Less [-]

INTEGBI 37 Topics in Paleontology: The Antecedents of Man 3 Units
Terms offered: Prior to 2007
Open without prerequisite to all students and designed for those not specializing in paleontology. Survey the evolution, ecology, and history of the primate order. Special emphasis will be given to primate origins, geographic distribution, and the evolution of the human lineage.
Topics in Paleontology: The Antecedents of Man: Read More [+]

Hours & Format
Summer: 8 weeks - 3 hours of lecture and 2 hours of laboratory per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.

Topics in Paleontology: The Antecedents of Man: Read Less [-]
INTEGBI 39C Topics in Integrative Biology 2 Units
Terms offered: Spring 2013, Spring 2012, Spring 2011
Reading and discussion of the literature on particular topics in the field of integrative biology. Term paper and oral presentation. Section topics will vary from semester to semester. Students should check with department secretary for each semester's offerings.

Rules & Requirements
Prerequisites: Preferentially open to freshmen; consent of instructor

INTEGBI 41 Marine Mammals 2 Units
Terms offered: Summer 2018 8 Week Session, Summer 2017 8 Week Session, Fall 2013
A survey of marine mammal evolution, biology, behavior, ecology, and politics with a concentration on those species found in the North Pacific. Coverage would include: origin and evolution of cetaceans, pinnipeds, sirenians, and sea otters; basic biology and anatomy of marine mammal groups, and North Pacific species in particular; ecological interactions and role in nearshore and pelagic marine communities; and interactions between humans and marine mammals.

Rules & Requirements
Prerequisites: Designed for those not specializing in Integrative Biology

INTEGBI 42 Primate Biology 3 Units
Terms offered: Summer 1996 10 Week Session
An introduction to the order of mammals of which we are members. The niches of primates in modern ecosystems, their anatomical and behavioral specialization, and their role as indicator species in conservation. The mechanisms and variety of primate social organization compared with that of other animals.

Rules & Requirements
Credit Restrictions: Open to all students but designed for those not specializing in biology.

INTEGBI 77A Integrative Human Biology 1 Unit
Terms offered: Fall 2017
Each week a different Integrative Biology faculty member will give a one hour lecture on how their research field contributes to our understanding of human biology. The integration of the disciplines of evolution, ecology, paleontology, comparative physiology, and comparative anatomy in the study of how humans function in ecosystems illuminates our understanding of human biology. During each presentation, the faculty member will also inform students about IB courses they teach, research in their lab, and which Berkeley Natural History Museum they may be affiliated with. This course gives undergraduates an opportunity to learn about the spectrum of research and courses offered by the different IB faculty.

Rules & Requirements
Credit Restrictions: 77A and 77B may each be taken once for credit. Majors are required to take at least one semester of 77A OR 77B.

INTEGBI 77B Integrative Human Biology 2 Unit
Terms offered: Fall 2017
Each week a different Integrative Biology faculty member will give a one hour lecture on how their research field contributes to our understanding of human biology. The integration of the disciplines of evolution, ecology, paleontology, comparative physiology, and comparative anatomy in the study of how humans function in ecosystems illuminates our understanding of human biology. During each presentation, the faculty member will also inform students about IB courses they teach, research in their lab, and which Berkeley Natural History Museum they may be affiliated with. This course gives undergraduates an opportunity to learn about the spectrum of research and courses offered by the different IB faculty.

Rules & Requirements
Credit Restrictions: 77A and 77B may each be taken once for credit. Majors are required to take at least one semester of 77A OR 77B.

Instructor: Carlson
INTEGBI 77B Integrative Human Biology 1
Unit

Terms offered: Spring 2018
Each week a different Integrative Biology faculty member will give a one hour lecture on how their research field contributes to our understanding of human biology. The integration of the disciplines of evolution, ecology, paleontology, comparative physiology, and comparative anatomy in the study of how humans function in ecosystems illuminates our understanding of human biology. During each presentation, the faculty member will also inform students about IB courses they teach, research in their lab, and which Berkeley Natural History Museum they may be affiliated with. This course gives undergraduates an opportunity to learn about the spectrum of research and courses offered by the different IB faculty.

INTEGBI C82 Oceans 3 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015
This course offers multidisciplinary approach to begin answering the question "Why are oceans important to us?" Upon a physical, chemical, and geologic base, we introduce the alien world of sea life, the importance of the ocean to the global carbon cycle, and the principles of ecology with a focus on the important concept of energy flow through food webs. Lectures expand beyond science to include current topics as diverse as music, movies, mythology, biomechanics, policy, and trade.

Rules & Requirements

Credit Restrictions: Students will receive no credit for Earth and Planetary Science C82/Integrative Biology C82 after completing Integrative Biology 82 or Earth and Planetary Science N82.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Summer:
6 weeks - 7.5 hours of lecture and 2.5 hours of discussion per week
8 weeks - 5.5 hours of lecture and 1.5 hours of discussion per week

Instructor: Carlson

INTEGBI 77B Integrative Human Biology: Read More [+]

Rules & Requirements

Credit Restrictions: 77A and 77B may each be taken once for credit. Majors are required to take at least one.

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of seminar per week

Additional Details

Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam required.

Instructor: Carlson

INTEGBI C82 Oceans: Read Less [-]
INTEGBI 84 Sophomore Seminar 1 or 2 Units
Terms offered: Spring 2018, Fall 2017, Fall 2014
Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.

Prerequisites: At discretion of instructor
Repeat rules: Course may be repeated for credit when topic changes.
Course may be repeated for credit when topic changes.

Hours & Format
Fall and/or spring:
5 weeks - 3-6 hours of seminar per week
10 weeks - 1.5-3 hours of seminar per week
15 weeks - 1-2 hours of seminar per week

Summer:
6 weeks - 2.5-5 hours of seminar per week
8 weeks - 1.5-3.5 hours of seminar and 2-4 hours of seminar per week

INTEGBI 87 Introduction to Research Methods in Biology 2 Units
Terms offered: Summer 2014 8 Week Session, Summer 2013 8 Week Session, Summer 2012 8 Week Session
This course provides a functional understanding of hypothesis/data driven research and exposure to current approaches and methods in biological science. The lectures address foundational concepts of the scientific method, research ethics, scientific communication, and how to understand scientific literature. The labs provide exposure to faculty research and experimental methods. The course is geared to incoming freshmen, sophomores, and transfer students interested in learning more about research.

Grading/Final exam status: Letter grade. Final exam not required.
Instructor: Matsui

INTEGBI 88 Leadership Communications for Biology Scholars 1 Unit
Terms offered: Fall 2009, Fall 2008, Fall 2007
Leadership skills and abilities such as communication, collaboration, critical thinking, and resourcefulness are critical to academic, professional, and personal success. The need for enlightened leaders is evident in every aspect of health and science such as designing innovative health programs, obtaining funding, conducting cutting-edge research, developing and gaining support to implement policy solutions. This course provides an understanding of the principles of leadership and communications for students in the Biology Scholars Program. Students will nurture those traits in themselves and apply those principles in situations specifically related to the health and science sectors.

Grading/Final exam status: Letter grade. Final exam required.
Instructors: Hayes, Kim, Myrick
INTEGBI 95 Special Research Project in Biology 1B 2 Units
Terms offered: Spring 2017, Fall 2016, Spring 2016
Students enrolled in Biology 1B can participate in special field research in addition to attending regular laboratory sections. Students work independently with minimal supervision. Students will learn how to develop a project, collect and record data, conduct and analyze experiments, write a report, and make an oral presentation. Project may require traveling to off-campus sites, and may include night or weekend work.
Special Research Project in Biology 1B: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor; selected by interview

Hours & Format
Fall and/or spring: 15 weeks - 4 hours of fieldwork and 2 hours of discussion per week

Additonal Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Special Research Project in Biology 1B: Read Less [-]

INTEGBI 95B Lawrence Hall of Science Teaching Assistant 1 - 2 Units
Terms offered: Prior to 2007
Enrollment into this course is for students interested in teaching science to children under the guidance of the Lawrence Hall of Science Instructors and Staff. As a LHS Teaching Assistant (TA), you will have the opportunity to assist with workshops serving grade school-aged children and to lead small discussion groups. The workshops consist of organismal biology related materials. You will undergo training in the Hall's Animal Discovery Room to ensure that you are prepared to support school and public programs scheduled in that space. There will also be opportunities to travel to nearby school districts to give presentations on the materials you work with.
Lawrence Hall of Science Teaching Assistant: Read More [+]
Rules & Requirements
Prerequisites: Students must be concurrently enrolled or have completed Biology 1B
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3-6 hours of fieldwork per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Lawrence Hall of Science Teaching Assistant: Read Less [-]

INTEGBI C96 Studying the Biological Sciences 1 Unit
Terms offered: Fall 2017, Fall 2016, Fall 2015
Freshmen will be introduced to the "culture" of the biological sciences, along with an in-depth orientation to the academic life and the culture of the university as they relate to majoring in biology. Students will learn concepts, skills, and information that they can use in their major course, and as future science professionals. Restricted to freshmen in the biology scholars program.
Studying the Biological Sciences: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate

INTEGBI 98 Directed Group Study 1 - 4 Units
Terms offered: Spring 2016, Fall 2015, Spring 2015
Lectures and small group discussions focusing on topics of interest, varying from semester to semester.
Directed Group Study: Read More [+]
Rules & Requirements
Prerequisites: Freshmen and sophomores only
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1-4 hours of directed group study per week
Summer:
6 weeks - 2.5-10 hours of directed group study per week
8 weeks - 1.5-7.5 hours of directed group study per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Directed Group Study: Read Less [-]
INTEGBI 99 Supervised Independent Study and Research 1 - 3 Units
Terms offered: Spring 2015, Spring 2014, Fall 2013
Lower division independent study and research intended for the academically superior student. Enrollment only with prior approval of faculty adviser directing the research.
Supervised Independent Study and Research: Read More [+]

Rules & Requirements

Prerequisites: GPA of 3.4 or greater
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 0 hours of independent study per week
Summer:
6 weeks - 1-3 hours of independent study per week
8 weeks - 1-3 hours of independent study per week

Additional Details

Subject/Course Level: Integrative Biology/Undergraduate

Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

Formerly known as: Botany 99, Physiology 99, Anatomy 99
Supervised Independent Study and Research: Read Less [-]

INTEGBI 100B Principles of Biodiversity 3 Units
Terms offered: Fall 2012, Spring 2002, Spring 2001
Biogeographic, temporal, and historical patterns of change in biological diversity; phylogenetics and systematics; processes involved in origin and extinction of taxa and floras/faunas; population structure and demography (including human populations); community processes and maintenance of diversity; ecosystem function; global change; human uses of and effects on biodiversity; conservation biology.
Principles of Biodiversity: Read More [+]

INTEGBI C100 Communicating Ocean Science 4 Units
Terms offered: Spring 2018, Spring 2016, Spring 2015
For undergraduates interested in improving their ability to communicate their scientific knowledge by teaching ocean science in elementary schools or science centers/aquariums. The course will combine instruction in inquiry-based teaching methods and learning pedagogy with six weeks of supervised teaching experience in a local school classroom or the Lawrence Hall of Science with a partner. Thus, students will practice communicating scientific knowledge and receive mentoring on how to improve their presentations.
Communicating Ocean Science: Read More [+]

Rules & Requirements

Prerequisites: One course in introductory biology, geology, chemistry, physics, or marine science required and interest in ocean science; junior, senior, or graduate standing; consent of instructor required for sophomores

Hours & Format

Fall and/or spring: 15 weeks - 2.5 hours of lecture, 1 hour of discussion, and 2 hours of fieldwork per week

Additional Details

Subject/Course Level: Integrative Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.
Instructor: Ingram
Also listed as: EPS C100/GEOG C146

INTEGBI 101 Introduction to Scientific Writing 4 Units
Terms offered: Spring 2018, Fall 1997
This course will introduce students to concepts and techniques for effective communication of scientific findings, both within the scientific community and to the general public. Students will be exposed to a variety of formats, including systematic observations in field journals, proposals, conference presentations, seminars, journal articles, popular science writing, and interviews. Students can expect to gain a sense of confidence in writing and public speaking about research. Direct language is valued in scientific writing, but creative approaches to style and structure will be emphasized.
Introduction to Scientific Writing: Read More [+]

Rules & Requirements

Prerequisites: Biology 1B

Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Fine

Introduction to Scientific Writing: Read Less [-]
INTEGBI 102LF Introduction to California Plant Life with Laboratory 4 Units
Terms offered: Spring 2018, Spring 2015, Spring 2013
The relationship of the main plant groups and the plant communities of California to climate, soils, vegetation, geological and recent history, and conservation. Laboratory will also include at least two Saturday field trips and focus on main plant groups and major plant families in California, and use of keys to identify introduced and especially native pteridophytes, conifers, and flowering plants of the state.
Introduction to California Plant Life with Laboratory: Read More [+]
Rules & Requirements
Prerequisites: Biology 1B or consent of instructor
Credit Restrictions: Student will receive partial credit for 102LF after taking 102.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 6 hours of laboratory per week
Summer: 8 weeks - 4 hours of lecture and 12 hours of laboratory per week
Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

INTEGBI 103LF Invertebrate Zoology with Laboratory 5 Units
Terms offered: Spring 2018, Spring 2016, Spring 2014
Invertebrate Zoology with Laboratory: Read More [+]
Rules & Requirements
Prerequisites: Biology 1A-1B
Credit Restrictions: Students will receive partial credit for 103LF after taking 103.
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 4 hours of fieldwork, and 3 hours of laboratory per week
Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: McGuire, Bowie, Shabel
Also listed as: ESPM C105

INTEGBI 104LF Natural History of the Vertebrates with Laboratory 5 Units
Biology of the vertebrates, exclusive of fish. Laboratory and field study of local vertebrates exclusive of fish.
Natural History of the Vertebrates with Laboratory: Read More [+]
Rules & Requirements
Prerequisites: Biology 1A-1B
Credit Restrictions: Students will receive partial credit for 104LF after taking 104.

INTEGBI C109 Evolution and Ecology of Development 3 Units
Terms offered: Fall 2016
From the seahorse’s body to the venus flytrap’s jaws to the human brain, nature abounds with amazing adaptations. This interdisciplinary course explores how and why such biodiversity evolves as well as what limits diversity. Lectures and case studies will focus on core concepts, recent advances, and integrative approaches, placing special emphasis on the interplay between gene regulatory networks, the environment, and population genetics.
Evolution and Ecology of Development: Read More [+]

Objectives Outcomes
Student Learning Outcomes:
• Explain how an interdisciplinary approach involving genetics, development, evolutionary biology, and ecology can be used to understand the processes that generate patterns of biodiversity.
• List and describe major questions, findings, and experimental approaches in the field of ecological and evolutionary developmental biology.
• Discuss biological research using specialized terminology and defend your opinions.
• Critically evaluate and interpret the primary scientific literature.
• Combine factual material with deductive reasoning to propose hypotheses and future research directions

Rules & Requirements
Prerequisites: BIOLOGY 1A and 1B

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Blackman
Also listed as: PLANTBI C109
Evolution and Ecology of Development: Read Less [-]
INTEGBI C110L Biology of Fungi with Laboratory 4 Units
Terms offered: Fall 2016, Fall 2014
Selected aspects of fungi: their structure, reproduction, physiology, ecology, genetics and evolution; their role in plant disease, human welfare, and industry. Offered even fall semesters.
Biology of Fungi with Laboratory: Read More [+]

Rules & Requirements
Prerequisites: Biology 1B

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 6 hours of laboratory per week

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Bruns, Taylor

Also listed as: PLANTBI C110L

Biology of Fungi with Laboratory: Read Less [-]

INTEGBI 112 Horticultural Methods in the Botanical Garden 1 Unit
Terms offered: Fall 2017, Fall 2016, Spring 2015
An introduction to horticultural techniques utilizing the diverse collections of the University Botanical Garden.
Horticultural Methods in the Botanical Garden: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of fieldwork per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Instructor: Licht

Formerly known as: 112L

Horticultural Methods in the Botanical Garden: Read Less [-]

INTEGBI 113L Paleobiological Perspectives on Ecology and Evolution 4 Units
This course will center around answering the following questions: What do the fossil and geologic records have to tell us about the nature of ecological and evolutionary processes? What do they teach us that cannot be learned from the living world alone? In answering these questions, the course will provide an introduction to the analysis of key problems in paleobiology, with an emphasis on how evolutionary and ecological processes operate on geologic timescales.
Paleobiological Perspectives on Ecology and Evolution: Read More [+]

Rules & Requirements
Prerequisites: Prior biology experience, or consent of instructor. No paleontological or geological background required

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Instructor: Marshall

Formerly known as: 108

Paleobiological Perspectives on Ecology and Evolution: Read Less [-]
INTEGBI 114 Infectious Disease Dynamics 4 Units
Terms offered: Spring 2017
Many of the challenges of managing infectious disease are essentially ecological and evolutionary problems. Disease follows the rules of species interactions as it spreads through host populations while resistance to antibiotics occurs through the rules of evolutionary biology. The key aim of the module is to teach ecological and evolutionary principles in the light of infectious diseases affecting human populations and societies as well as agriculture and wildlife. This is applied ecology and applied evolution writ large.

Objectives Outcomes
Student Learning Outcomes:
- Understanding the role of infectious disease in natural populations and communities
- Understand the role of disease in shaping human agriculture and societies
- Describe how infectious disease may be important in conservation
- Discuss when parasite virulence makes sense in the light of evolution
- Explain how to apply ecological and evolutionary principles to the treatment and control of infectious
- Present a scientific poster on the evidence for coevolution between a pair of species.

Rules & Requirements
Prerequisites: Bio 1A and Bio 1B or equivalent required, Ecology or Evolution course suggested

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Boots

INTEGBI 115 Introduction to Systems in Biology and Medicine 4 Units
Terms offered: Spring 2015, Spring 2014, Fall 2013
This course is aimed at students wishing to understand the general principles of how biological systems operate. Topics include feedback regulation; competition and cooperation; genetic switches and circuits; random processes; chaos; mechanisms for error correction; and the properties of networks. Examples are selected from many fields including medicine, physiology, ecology, biochemistry, cell biology, and genetics. Students will learn to conceptualize and quantify interactions within biological systems using simple mathematical models and computer programs. No previous experience in programming is required.

Rules & Requirements
Prerequisites: Biology 1A, Mathematics 1A or 16B

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 2 hours of laboratory per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Lim

INTEGBI 116L Medical Parasitology 4 Units
Terms offered: Summer 2018 First 6 Week Session, Summer 2017 First 6 Week Session, Summer 2016 First 6 Week Session
This course includes the biology, epidemiology, pathogenesis, treatment, and prevention of various medically important parasitic infections. Life cycles of parasitic helminths and protozoa, the biological aspects of the host-parasite relationship, the epidemiology of the infection, and the interplay of social, economical, and ecological factors which contribute to the disease will be covered in both lectures and videos.

Rules & Requirements
Prerequisites: 1A, 1B, or equivalent

Hours & Format
Summer: 6 weeks - 6 hours of lecture and 6 hours of laboratory per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Sakanari
Formerly known as: 116
Medical Parasitology: Read Less [-]
INTEGBI 117 Medical Ethnobotany 2 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
Biological diversity and ethno-linguistic diversity sustain traditional botanical medicine systems of the world. Major topics covered in this course include cultural origins of medicinal plant knowledge on plant-derived pharmaceuticals and phytomedicines; field research methods in ethnobotany and ethnopharmacology; examples of how traditional botanical medicines provide safe, effective, affordable, and sustainable primary health care to tropical countries; human physiology, human diseases, and mechanisms of action of plant-derived drugs.

Rules & Requirements
Prerequisites: Bio 1A

INTEGBI 117LF Medical Ethnobotany Laboratory 2 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
Laboratory will focus on studying medicinal plants from the major ecosystems and geographical regions of the world. Students will learn common names, scientific names, plant families, field identification, habitats, and ethnomedical uses of medicinal plants. How the medicinal plant is prepared, administered, and used as a phytomedicine will also be discussed. There will be reference to the phylogenetic relationships between the plant families and genera represented by the medicinal plants.

Rules & Requirements
Prerequisites: Bio 1B

INTEGBI 118 Host-Pathogen Interactions: A Trans-Discipline Outlook 4 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
The second half of the 20th century is marked by great strides in the battle against infectious diseases. However, the forces that drive pathogen evolution continue to pose new challenges for science and medicine. In this course we will cover various aspects relating to host-pathogen interactions, focusing on animals and their bacterial pathogens. We will address the ecology of host-pathogen interactions, their shaping by co-evolution, examine prominent molecular mechanisms taking part in this warfare and learn how ancient mechanisms are used and reused through millions of years of evolution. The course will examine how better understanding of host-pathogen interactions can suggest new strategies for fighting infectious diseases.

Rules & Requirements
Prerequisites: Biology 1A-1B

INTEGBI 119 Evaluating Scientific Evidence in Medicine 3 Units
Terms offered: Spring 2015, Fall 2014, Spring 2013
A course in critical analysis of medical reports and studies using recent controversial topics in medicine. Course will focus on information gathering, hypothesis testing, evaluating study design, methodological problems, mechanisms of bias, interpretation of results, statistics, and attribution of causation. Students participate in a mock trial as a way to demonstrate their abilities to gather, critically analyze, and present scientific and medical evidence.

Rules & Requirements
Prerequisites: Biology 1A-1B
INTEGBI 123AL Exercise and Environmental Physiology with Laboratory 5 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
Discussion of how chemical energy is captured within cells and how potential chemical energy is converted to muscular work. Energetics, direct and indirect calorimetry, pathways of carbon flow in exercise, ventilation, circulation, skeletal muscle fiber types. Laboratory component of the course is to obtain practical experience in the measurement of physiological parameters and to be able to compile, compare, contrast, and interpret physiological data. Laboratory demonstrations and exercises will explain lecture content.

Exercise and Environmental Physiology with Laboratory: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A, Chemistry 3B and Integrative Biology 132 or Molecular and Cell Biology 136
Credit Restrictions: Student will receive partial credit for 123AL after taking 123A.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Brooks

Exercise and Environmental Physiology with Laboratory: Read Less [-]

INTEGBI C125L Introduction to the Biomechanical Analysis of Human Movement 4 Units
Terms offered: Fall 2016, Fall 2015, Fall 2014, Fall 2013
Basic biomechanical and anatomical concepts of human movement and their application to fundamental movement patterns, exercise, and sport skills.

Introduction to the Biomechanical Analysis of Human Movement: Read More [+]

Rules & Requirements
Prerequisites: Physical Education 9 and Integrative Biology 131 and 131L

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Introduction to the Biomechanical Analysis of Human Movement: Read Less [-]

INTEGBI 127L Motor Control with Laboratory 3 Units
Terms offered: Fall 2014, Fall 2013, Fall 2012
Neural control of movement in humans and other animals. Lectures introduce basic theories of information and control, analyze motor control at the spinal level, survey anatomy and physiology of motor systems of the brain, and synthesize theory and physiology to understand control systems that regulate posture, locomotion, and voluntary movements. In laboratories, students learn theory and motor physiology hands-on, and design and perform independent investigations.

Motor Control with Laboratory: Read More [+]

Rules & Requirements
Prerequisites: 132 or Molecular and Cell Biology 136
Credit Restrictions: Students will receive partial credit for 127L after taking 127.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 2 hours of laboratory per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Lehman

Motor Control with Laboratory: Read Less [-]
INTEGBI 128 Sports Medicine 3 Units
Terms offered: Summer 2018 First 6 Week Session, Summer 2017 First 6 Week Session, Summer 2016 First 6 Week Session
Survey course of sports medicine including topics of athletic injury (cause, evaluation, and treatment options), exercise physiology, exercise and health, fitness testing, issues specific to female athletes, drug abuse in sports, environmental issues (heat, altitude, sun exposure), nutrition, careers in sports medicine, introduction to clinical research.
Sports Medicine: Read More [+]

Rules & Requirements
Prerequisites: Background in anatomy, physiology, or exercise physiology recommended

Hours & Format
Summer:
6 weeks - 5 hours of lecture and 2 hours of discussion per week
8 weeks - 5 hours of lecture and 2 hours of discussion per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: McLaughlin

Sports Medicine: Read Less [-]

INTEGBI C129L Human Physiological Assessment 3 Units
Principles and theories of human physiological assessment in relation to physical activity and conditioning. Performance of laboratory procedures in the measurement and interpretation of physiological fitness (cardiorespiratory endurance, body composition, musculoskeletal fitness).
Human Physiological Assessment: Read More [+]

Objectives Outcomes
Student Learning Outcomes:
1. A comparative approach will allow students to gain experience in observing similarities and differences among taxa and identifying trends in vertebrate form and function. This will allow them to further their understanding of how both evolutionary and environmental contexts influence morphology and function.
2. Students will improve their understanding of the scientific method, particularly through the independent research experience provided during the term paper and project.
3. Students will gain factual knowledge of terms and concepts regarding vertebrate anatomy and functional morphology.

Rules & Requirements
Prerequisites: Biology 1B

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week
Summer: 6 weeks - 5 hours of lecture and 7.5 hours of laboratory per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Johannessen
Also listed as: PHYS ED C129

INTEGBI 130L Comparative Vertebrate Anatomy & Functional Morphology 5 Units
Terms offered: Summer 2018 8 Week Session, Spring 2000, Spring 1998
This course is an in-depth look at the biology of form and function. We will examine anatomy and compare features among fish, amphibians, reptiles, birds, and mammals (including humans) to understand how structures develop, how they have evolved, and how they interact with one another to allow animals to live in a variety of environments. We will study the integration of the skeletal, muscular, nervous, vascular, respiratory, digestive, endocrine, and urogenital systems to explore the historical and present diversity of vertebrate animals.
Comparative Vertebrate Anatomy & Functional Morphology: Read More [+]

Rules & Requirements
Prerequisites: Biology 1B

Hours & Format
Summer: 8 weeks - 6 hours of lecture, 2 hours of discussion, and 12 hours of laboratory per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Comparative Vertebrate Anatomy & Functional Morphology: Read Less [-]
INTEGBI 131 General Human Anatomy 3 Units
Terms offered: Summer 2018 First 6 Week Session, Fall 2017, Summer 2017 First 6 Week Session
The functional anatomy of the human body as revealed by gross and microscopic examination. Designed to be taken concurrently with 131L.
General Human Anatomy: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A-1B or Chemistry 1A

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Summer:
6 weeks - 8 hours of lecture per week
8 weeks - 6 hours of lecture per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Carlson

General Human Anatomy: Read Less [-]

INTEGBI 131L General Human Anatomy Laboratory 2 Units
Terms offered: Summer 2018 First 6 Week Session, Spring 2018, Fall 2017
Prepared human dissections, models, and microscopic slides.
General Human Anatomy Laboratory: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A-1B or Chemistry 1A. 131 (may be taken concurrently)

Hours & Format
Fall and/or spring: 15 weeks - 4 hours of laboratory per week
Summer:
6 weeks - 10 hours of laboratory per week
8 weeks - 8 hours of laboratory per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Carlson

General Human Anatomy Laboratory: Read Less [-]

INTEGBI 131A Applied Anatomy 1 Unit
Terms offered: Fall 2014, Fall 2013, Fall 2012
A series of 15 lectures by former students of 131 who have become successful physicians and surgeons. The purpose is to provide the practical applications of anatomy, e.g., plastic surgeons, neurosurgeons, vascular surgeons, pathologists, etc.
Applied Anatomy: Read More [+]

Rules & Requirements
Repeat rules: Course may be repeated for credit up to a total of 2 units. Course may be repeated for a maximum of 2 units.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam required.

Applied Anatomy: Read Less [-]
INTEGBI 132 Survey of Human Physiology 4 Units
Terms offered: Spring 2018, Summer 2017 8 Week Session, Spring 2017
Mechanisms by which key physiological priorities are maintained in healthy humans. From a basis in elementary theories of information and control, we develop an understanding of homeostasis of cellular composition, structure, and energy metabolism. We then study neural and endocrine signaling in humans, and develop the key concepts of control and homeostasis in all the major organ and multi-organ systems, including cardiovascular, respiratory, renal, metabolic, reproductive, and immune systems, growth and development, and sensory and motor systems.

Survey of Human Physiology: Read More [+]

Rules & Requirements

Prerequisites: Integrative Biology 131, Biology 1A
Credit Restrictions: Students will receive no credit for Integrative Biology 132 after completing Molecular and Cell Biology 136.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Summer: 8 weeks - 6 hours of lecture and 2 hours of discussion per week

Additional Details

Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Brooks, Kaufer, Lehman
Survey of Human Physiology: Read Less [-]

INTEGBI 132L Mammalian Physiology Laboratory 2 Units
Terms offered: Spring 2018, Spring 2017, Summer 2016 8 Week Session
In the laboratory component of Integrative Biology 132, students gain hands-on experience measuring physiological parameters, interpreting physiological data, designing experiments, and communicating ideas in writing and orally. Guided investigations include measurements of membrane potentials, responses of skeletal muscle to electrical stimulation, electromyography, pulmonary and cardiovascular measurements in humans, contractility and regulation of the frog heart, human electrocardiography, and renal control of body fluids. In two independent investigations, students identify their own questions, develop hypotheses, design and perform experiments, and present their studies in symposia. Background in elementary statistics, data analysis and oral presentation are also provided.

Mammalian Physiology Laboratory: Read More [+]

Rules & Requirements

Prerequisites: Previous or concurrent enrollment in 132 or equivalent, or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of laboratory per week
Summer: 8 weeks - 6 hours of laboratory per week

Additional Details

Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Brooks, Kaufer, Lehman
Mammalian Physiology Laboratory: Read Less [-]

INTEGBI 133 Anatomy Enrichment Program 2 Units
Terms offered: Spring 2011, Spring 2010, Spring 2009
The purpose of the course is for University students to teach human anatomy to grades K-7 in the public schools. The UCB students work in groups of 2-3 to plan their presentations of the systems of the body and then enter the school rooms to teach what they have learned in 131.

Anatomy Enrichment Program: Read More [+]

Rules & Requirements

Prerequisites: 131 with a grade of A or B
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 4 hours of fieldwork per week

Additional Details

Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam required.
Anatomy Enrichment Program: Read Less [-]
INTEGBI 135 The Mechanics of Organisms 4 Units
Terms offered: Spring 2016, Fall 2013, Fall 2011
Organism design in terms of mechanical principles; basics of fluid and solid mechanics with examples of their biological implications, stressing the dependence of mechanical behavior and locomotion on the structure of molecules, tissues, structural elements, whole organisms, and habitats.

Prerequisites: Introductory physics and biology recommended

INTEGBI C135L Laboratory in the Mechanics of Organisms 3 Units
Introduction to laboratory and field study of the biomechanics of animals and plants using fundamental biomechanical techniques and equipment. Course has a series of rotations involving students in experiments demonstrating how solid and fluid mechanics can be used to discover the way in which diverse organisms move and interact with their physical environment. The laboratories emphasize sampling methodology, experimental design, and statistical interpretation of results. Latter third of course devoted to independent research projects. Written reports and class presentation of project results are required.

Prerequisites: Integrative Biology 135 or consent of instructor; for Electrical Engineering and Computer Science students, Electrical Engineering 105, 120 or Computer Science 184

Credit Restrictions: Students will receive no credit for C135L after taking 135L.

INTEGBI 136 The Biology of Sex 4 Units
Terms offered: Fall 2014, Summer 1991 10 Week Session
The ability to reproduce is a defining characteristic of life, and of great interest to biologists as well as humanity in general. What is sex, and why did it develop? Why do we have sexual reproduction, whereas some animals do not? This course will provide a comprehensive overview on the biology of sex from an evolutionary perspective with an emphasis on humans in comparison to other species. The course will consist of two lectures each week, and a lab where we discuss a paper, watch videos, or have discussion sections on specific topics that were covered in class.

Prerequisites: Biology 1B, introductory genetics (Mendelian genetics, recombination, chromosomes)

INTEGBI 137 Human Endocrinology 4 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
Course will address the role of hormones in physiology with a focus on humans. Regulation of hormone secretion and mechanisms of hormone action will be discussed. Physiological processes to be addressed include reproduction, metabolism, water balance, growth, fetal development. Experimental and clinical aspects will be addressed.

Prerequisites: Biology 1A-1B; human physiology (132) strongly recommended
INTEGBI 138 Comparative Endocrinology 4 Units
The primary goal of this course is to provide students with a broad understanding of the evolution of hormonal systems. A comparative approach allows us to envisage how the complex mammalian endocrine system presumably evolved from that of more primitive vertebrates. Students will learn about endocrine pathways and endocrine-based behaviors of jawless fishes, fishes, amphibia, reptiles, birds, and mammals. In addition, students will gain an understanding of the experimental methods used in endocrine research. The class teaches students how to read and interpret the primary scientific literature; thus it encourages the critical thinking that is a fundamental skill for any scientist.

INTEGBI 139 The Neurobiology of Stress 4 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
This course is designed to be an interdisciplinary course. It will adopt a broad-based approach to explore the concepts of stress, health, and disease, with a particular focus on current primary literature. The course will cover multiple dimensions in the study of stress, which employ genetic, epigenetic, molecular, cellular, physiological, and cognitive approaches, especially in the context of endocrine and neuroscience research. We will analyze the individual response to stress, how genetic and environmental factors play a role in it, how it translates to physiological and mental health and well-being vs. pathological conditions, and put that in a public health perspective.

Objectives Outcomes

Course Objectives: This course will emphasize the interconnected and multidirectional relationships between biology, behavior and the social environment. The study of stress is necessarily an interdisciplinary endeavor. This course is designed to explore the role of genes, hormones and experiences as they affect the stress-response and subsequently brain and behavior.

Rules & Requirements

Prerequisites: Biology 1A or Psychology 110. You will need a good understanding of the fundamentals of biology to do well in this class

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Kaufer

Comparative Endocrinology: Read More [+]
Rules & Requirements

Prerequisites: Biology 1A-1B. Organic Chemistry recommended

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Bentley

Comparative Endocrinology: Read Less [-]
INTEGBI 140 Biology of Human Reproduction
4 Units
Course focuses on biological and cultural aspects of human reproduction
including conception, embryology, pregnancy, labor, delivery, lactation,
infant/child development, puberty, and reproductive aging. This
includes study of factors that diminish and factors that enhance fertility,
reproduction, and maternal-child health. We explore evolutionary,
ecological, environmental, cultural, ethnobiological, and nutritional
determinants of fertility, reproductive rate, infant survival, and population
growth.
Biology of Human Reproduction: Read More [+]
Rules & Requirements
Prerequisites: Biology 1A or equivalent
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of
discussion per week
Summer: 6 weeks - 8 hours of lecture and 2 hours of discussion per week
Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Carlson
Biology of Human Reproduction: Read Less [-]

INTEGBI 141 Human Genetics 3 Units
Terms offered: Summer 2018 8 Week Session, Summer 2017 8 Week Session,
Summer 2016 8 Week Session
Principles of inheritance, especially as applied to human traits, including
molecular aspects of genetics, the genetic constitutions of populations,
and questions of heredity/environment.
Human Genetics: Read More [+]
Rules & Requirements
Prerequisites: One course in biological science
Credit Restrictions: Students will receive no credit for 141 after taking
Molecular and Cell Biology 142 or C142 and Integrative Biology C163.
Hours & Format
Summer: 8 weeks - 6 hours of lecture per week
Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Human Genetics: Read Less [-]

INTEGBI C142L Introduction to Human Osteology 6 Units
Terms offered: Spring 2018, Spring 2016, Spring 2014
An intensive study of the human skeleton, reconstruction of individual
and population characteristics, emphasizing methodology and analysis
of human populations from archaeological and paleontological contexts,
taphonomy, and paleopathology.
Introduction to Human Osteology: Read More [+]
Rules & Requirements
Prerequisites: Anthropology 1, Biology 1B
Hours & Format
Fall and/or spring: 15 weeks - 6 hours of lecture and 14 hours of
laboratory per week
Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: White
Also listed as: ANTHRO C103
Introduction to Human Osteology: Read Less [-]

INTEGBI C143A Biological Clocks: Physiology and Behavior 3 Units
Terms offered: Fall 2016, Fall 2012, Fall 2010
A consideration of the biological clocks that generate daily, lunar,
seasonal and annual rhythms in various animals including people.
Emphasis on neuroendocrine substrates, development and adaptive
significance of estrous cycles, feeding rhythms, sleep-wakefulness
cycles, reproductive and hibernation cycles, body weight and migratory
cycles.
Biological Clocks: Physiology and Behavior: Read More [+]
Rules & Requirements
Prerequisites: Completion of biological prerequisites for the major and
one of the following: 110 or a course in animal organismal physiology
(Integrative Biology 132, 138, 140, 148, or Molecular and Cell Biology
160)
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of
discussion per week
Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Kriegsfeld
Also listed as: PSYCH C113
Biological Clocks: Physiology and Behavior: Read Less [-]
INTEGBI C143B Hormones and Behavior 3 Units
This course provides a comprehensive overview of behavioral endocrinology beginning with hormone production and actions on target issues and continuing with an exploration of a variety of behaviors and their hormonal regulation/consequences. The course uses a comparative approach to examine the reciprocal interactions between the neuroendocrine system and behavior, considering the effects of hormone on development and adult behavior in addition to how behavior regulates endocrine physiology. While much of the course focuses on non-human vertebrate species, the relevance to humans is explored where appropriate. Topics include sexual differentiation and sex differences in behavior, reproductive, parental, and aggressive behaviors, and hormonal and behavioral homeostatic regulation.

Rules & Requirements
Prerequisites: Completion of biological prerequisites for the major and consent of instructor; a course in mammalian physiology recommended

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Kriegsfeld
Also listed as: PSYCH C116
Hormones and Behavior: Read Less [-]

INTEGBI C144 Animal Behavior 4 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
An introduction to comparative animal behavior and behavioral physiology in an evolutionary context, including but not limited to analysis of behavior, genetics and development, learning, aggression, reproduction, adaptiveness, and physiological substrates.

Rules & Requirements
Prerequisites: Biology 1A, 1B, or Environmental Science, Policy, and Management 140. Molecular and Cell Biology 140 and C160 recommended
Credit Restrictions: Students will receive no credit for 144 after taking C144, 145, 146LF, or Psychology C115B.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Lacey, Caldwell, Bentley, Elias
Also listed as: ESPM C126
Animal Behavior: Read Less [-]
INTEGBI C145 Animal Communication 3 Units
Terms offered: Spring 2018
Communication is central to the lives of most, if not all animals. How and why animals communicate is thus central to understanding the ecology, behavior, neurobiology, and evolution of animal systems. This course will focus on understanding the basic principles driving the communication system of a species, drawing together topics ranging from the physical properties of the environment, physiology of sensory systems, animal behavior and ecology, using examples from classic and recent publications.

Rules & Requirements
Prerequisites: Biology 1B. Animal Behavior (ESPM C126/IB C144) recommended
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Elias
Formerly known as: Environ Sci, Policy, and Management 156
Also listed as: ESPM C156
Animal Communication: Read More [+]

INTEGBI 146LF Behavioral Ecology with Laboratory 5 Units
Terms offered: Spring 2017, Spring 2015, Spring 2013
An in-depth examination of the ecological and evolutionary bases for behavioral diversity. Topics covered include behavior as an adaptive response, sexual selection, animal mating systems, group living, and cooperative and competitive interactions. Current conceptual approaches to these topics are explored, with an emphasis upon rigorous testing of hypotheses drawn from primary literature. Hands-on laboratory training in the methods of experimental design, data collection, and data analysis.

Rules & Requirements
Prerequisites: Integrative Biology 144 or Integrative Biology C144/ Environmental Science, Policy and Management C126 or consent of instructor
Credit Restrictions: Students will receive partial credit for Integrative Biology 146LF after taking Integrative Biology 146.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture, 1 hour of discussion, and 3 hours of laboratory per week
Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Lacey
Formerly known as: 146L
Behavioral Ecology with Laboratory: Read Less [-]
INTEGBI 147 Biology of Aging 3 Units
Terms offered: Prior to 2007
This course will focus on studying the molecular mechanisms of aging and the age-related changes that take place in cells and tissues. It introduces animal models used for the study of the genetics and biochemistry of aging as well as discusses the similarities and differences in aging mechanisms across species. Students will learn the age-related changes taking place in the major physiological systems in humans. Special attention will be given to differentiating normal aging processes from diseases that normally affect the elderly.

Biology of Aging: Read More [+]

Rules & Requirements
Prerequisites: BIOLOGY 1A

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Shapira, Caporale

INTEGBI 148 Comparative Animal Physiology 3 Units
Terms offered: Fall 2016, Fall 2014, Fall 2012
Comparative study of physiological systems among animal phyla. General physiological principles will be illustrated by examining variation in neural, muscular, endocrine, cardiovascular, respiratory, digestive, and osmoregulatory systems. Students will read original literature and give a group presentation in a symposium.

Comparative Animal Physiology: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A-1B

Credit Restrictions: Students will receive no credit for 148 after taking 100A.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Full, Dudley

INTEGBI C149 Molecular Ecology 4 Units
Terms offered: Spring 2010, Spring 2008, Spring 2005
This course focuses on the use of molecular genetic information in ecology. Applications and techniques covered range from analysis of parentage and relatedness (DNA fingerprinting and multilocus genetic analysis) through gene flow, biogeographic history and community composition (comparative DNA sequencing) to analysis of diet and trophic interactions (biological isotopes). Grades are based on one final exam, problem sheets, and a critique of a recent research paper.

Molecular Ecology: Read More [+]

Rules & Requirements
Prerequisites: C163, 161, or Molecular and Cell Biology C142 (may be taken concurrently), or consent of instructor

Credit Restrictions: Students will receive no credit for C149 if they took 149 prior to spring 2003.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Formerly known as: 149

Molecular Ecology: Read Less [-]
INTEGBI 150 Evolutionary Environmental Physiology 3 Units
Evolutionary physiology studies how physiological traits arise and are modified during adaptation to the environment. An integrative understanding of the origin and maintenance of physiological traits, encompassing levels of biological hierarchy from molecular to ecological and biogeographic, is essential for improving human health and stewarding the natural world through the current era of rapid environmental change. This course consists of three parts: 1) big questions in evolutionary physiology and how they are addressed; 2) a student-led exploration of how environmental factors have shaped physiological evolution; and 3) predicting responses to global change using evolutionary physiology.

Evolutionary Environmental Physiology: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A-1B or equivalent

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

INTEGBI C155 Holocene Paleoecology: How Humans Changed the Earth 3 Units
Terms offered: Spring 2014, Spring 2011, Spring 1998
Since the end of the Pleistocene and especially with the development of agriculturally based societies humans have had cumulative and often irreversible impacts on natural landscapes and biotic resources worldwide. Thus "global change" and the biodiversity crisis are not exclusively developments of the industrial and post-industrial world. This course uses a multi-disciplinary approach, drawing upon methods and data from archaeology, palynology, geomorphology, paleontology, and historical ecology to unravel the broad trends of human ecodynamics over the past 10,000 years.

INTEGBI C156 Principles of Conservation Biology 4 Units
Terms offered: Summer 2018 Second 6 Week Session, Fall 2017, Summer 2017 Second 6 Week Session
A survey of the principles and practices of conservation biology. Factors that affect the creation, destruction, and distribution of biological diversity at the level of the gene, species, and ecosystem are examined. Tools and management options derived from ecology and evolutionary biology that can recover or prevent the loss of biological diversity are explored.
Principles of Conservation Biology: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A-1B or equivalent

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week
Summer: 6 weeks - 6.5 hours of lecture and 3 hours of discussion per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Beissinger
Also listed as: ESPM C103

INTEGBI 157LF Ecosystems of California 4 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
The ecosystems of California are studied from both an ecological and historical biogeographical perspective with a focus on terrestrial plant communities. Students learn how to identify about 150 species of native plants (mostly trees, but also other dominant plants from the non-forest biomes). Field trips occur each Friday and over several weekends. Students conduct group projects that involve plant inventories and data collection as well as how to collect plant specimens and use the Herbarium.
Ecosystems of California: Read More [+]

Rules & Requirements
Prerequisites: Biology 1B or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 6 hours of fieldwork and 2 hours of discussion per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Fine

INTEGBI 158LF Biology and Geomorphology of Tropical Islands 13 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
Natural history and evolutionary biology of island terrestrial and freshwater organisms, and of marine organisms in the coral reef and lagoon systems will be studied, and the geomorphology of volcanic islands, coral reefs, and reef islands will be discussed. Features of island biogeography will be illustrated with topics linked to subsequent field studies on the island of Moorea (French Polynesia).
Biology and Geomorphology of Tropical Islands: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 12 hours of lecture and 6 hours of fieldwork per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Also listed as: ESPM C107

INTEGBI 159 The Living Planet: Impact of the Biosphere on the Earth System 3 Units
Terms offered: Fall 2015, Fall 2013, Fall 2011
Earth is a complex dynamic system. Interplay between its components (solid earth, oceans, and atmosphere) governs conditions on the planet's outside that we and other biota inhabit. In turn, life asserts a vast influence on the abiotic components; in fact, the biosphere itself is a crucial system component. We will explore the effect that 3.5 billion years of evolving biosphere had on System Earth and vice versa (e.g., in terms of climate), including the recent human impact on the system.
The Living Planet: Impact of the Biosphere on the Earth System: Read More [+]

Rules & Requirements
Prerequisites: Biology 1B or consent of instructor
Credit Restrictions: Students will receive two units of credit after taking Earth and Planetary Science 8, Earth and Planetary Science C141/Geography C141, or Geography 40.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 2 hours of discussion per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Looy, Duijnstee
The Living Planet: Impact of the Biosphere on the Earth System: Read Less [-]
INTEGBI 160 Evolution 4 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
An analysis of the patterns and processes of organic evolution. History
and philosophy of evolutionary thought; the different lines of evidence
and fields of inquiry that bear on the understanding of evolution. The
major features and processes of evolution through geologic times;
the generation of new forms and new lineages; extinction; population
processes of selection, adaptation, and other forces; genetics, genomics,
and the molecular basis of evolution; evolutionary developmental biology;
sexual selection; behavioral evolution; applications of evolutionary
biology to medical, agricultural, conservational, and anthropological
research.
Evolution: Read More [+]

Rules & Requirements

Prerequisites: Biology 1B

INTEGBI 161 Population and Evolutionary Genetics 4 Units
Terms offered: Spring 2017, Spring 2015, Spring 2013
Population genetics provides the theoretical foundation for modern
evolutionary thinking. It also provides a basis for understanding genetic
variation within populations. We will study population genetic theory and
use it to illuminate a number of different topics, including the existence of
sex, altruism and cooperation, genome evolution speciation, and human
genetic variation and evolution.
Population and Evolutionary Genetics: Read More [+]

Rules & Requirements

Prerequisites: Biology 1A/1B, Mathematics 16A or 10A

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of
discussion per week

Additional Details

Subject/Course Level: Integrative Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Padian, Specht

INTEGBI 162 Ecological Genetics 4 Units
Terms offered: Fall 2016, Fall 2014, Fall 2010
This course integrates ecology, genetics, and evolutionary biology. It
presents contemporary approaches to studying evolution in natural
populations, including analyzing heritability of ecologically important
traits, using molecular techniques to decompose genotypes, documenting
and measuring the magnitude of selection in natural systems, and
using models to predict evolution in natural populations. Case studies
are used to examine evolutionary effects of ecological interactions
among organisms, the importance of population size and structure, and
interactions among populations through migration and dispersal.
Ecological Genetics: Read More [+]

Instructors: Bachtrog, Slatkin

Molecular and Genomic Evolution: Read Less [-]
INTEGBI 164 Human Genetics and Genomics
4 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
This course will introduce students to basic principles of genetics, including transmissions genetics, gene regulation, pedigree analysis, genetic mapping, population genetics, and the principles of molecular evolution. The course will also introduce students to recent developments in genomics as applied to problems in human genetic diseases, human history, and the relationship between humans and their closest relatives.

Rules & Requirements
Prerequisites: Biology 1A, 1B, and Math 16A, or equivalent

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of laboratory per week
Summer: 8 weeks - 6 hours of lecture and 4 hours of laboratory per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Bachtrog, Nielsen, Slatkin

Human Genetics and Genomics: Read More [+]

INTEGBI C166 Biogeography 4 Units
Terms offered: Not yet offered
The course will provide a historical background for the field of biogeography and the ecological foundations needed to understand the distribution and abundance of species and their changes over time. It will also discuss developing technologies (including genomic tools and environmental models) together with the availability of big data and increasingly sophisticated analytical tools to examine the relevance of the field to global change biology, conservation, and invasion biology, as well as sustainable food systems and ecosystem services.

Rules & Requirements
Prerequisites: Biology 1A-1B. Must be taken concurrently with 168L

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

INTEGBI 169 Evolutionary Medicine 4 Units
This course explores the ways that evolutionary theory, natural selection, drift, genetics, and epigenetics can illuminate our understanding of human health and disease. The course begins with an overview of primate and hominid evolution and human genetic variation. We then evaluate reproductive biology and maternal/child health through an evolutionary lens. We explore how human ecosystem interactions influence diet, metabolic adaptations, hematological adaptions, human microbiome, and human pathogens. We examine evolutionary concepts related to aging, senescence and development of cancer. Finally we study psychology, behavior, and social/cultural organization through an evolutionary perspective.

INTEGBI 170LF Methods in Population and Community Ecology 3 Units
Terms offered: Spring 2017, Spring 2015
This course is a hands-on introduction to common research methods in population and community ecology. Each method and its application are first presented in a lecture session, illustrated with published examples. The method is then practiced in a subsequent group field exercise, conducted in a local terrestrial, aquatic, or marine habitat. The course focuses on sampling methods, experimental designs, and statistical analyses used to investigate patterns of species distribution and abundance, interspecific associations, and local species diversity. Graded assignments include write-ups of field exercise results, and an in-depth review paper and oral in-class presentation on an ecological method of particular interest to the student.

Methods in Population and Community Ecology: Read More [+]

Objectives Outcomes
Course Objectives: This course is designed as a hands-on introduction to common research methods in population and community ecology. Students will learn how to quantitatively describe and statistically analyze patterns in (1) the distribution, abundance, and size/age distributions of populations, (2) the diversity and similarity of multi-species assemblages, (3) interspecific association, and (4) habitat preference and selectivity. They will also be taught the fundamentals of experimental design and apply them in a field predator-prey manipulation.

Rules & Requirements
Prerequisites: Integrative Biology 153 or comparable upper-division course in ecology from Integrative Biology or Environmental Science Policy and Management course lists (or by consent of instructor); introductory course in statistics strongly recommended
Credit Restrictions: Students will receive no credit for Integrative Biology 170LF after completing Integrative Biology 153L.

Hours & Format
Fall and/or spring: 15 weeks - 8 hours of laboratory per week
Additional Details
Subject/Course Level: Integrative Biology/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Sousa
Formerly known as: Integrative Biology 153LF

INTEGBI C171 Freshwater Ecology 3 Units
Terms offered: Spring 2018
Lakes, rivers, wetlands, and estuaries are biologically rich, dynamic, and among the most vital and the most vulnerable of Earth’s ecosystems. Lectures will introduce general topics including the natural history of freshwater biota and habitats, ecological interactions, and ecosystem linkages and dynamics. Broad principles will be illustrated with results from selected recent research publications. Factors affecting resilience or vulnerability of freshwater ecosystems to change will be examined. Course requirements: two exams and a short synthesis paper projecting the future states of a freshwater or estuarine ecosystem of the student’s choice under plausible scenarios of local, regional, or global change.

Freshwater Ecology: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

INTEGBI 172 Coevolution: From Genes to Ecosystems 4 Units
Terms offered: Spring 2017
The biological world is shaped by interactions among species. These inter-specific interactions, such as between predators and prey, plants and pollinators, or hosts and pathogens, have led to an impressive array of adaptations, helping to explain the incredible organismal and genetic diversity on Earth. Our understanding of coevolution (the responses to reciprocal selection acting on two interacting populations) has been greatly facilitated in the last few years by conceptual advancements, new methods allowing direct tests of theory, next generation sequencing technology, and the advance of ‘omics’ approaches.

Coevolution: From Genes to Ecosystems: Read More [+]

Rules & Requirements

INTEGBI 173LF Mammalogy with Laboratory
5 Units
Terms offered: Fall 2016, Fall 2014, Spring 2014
An advanced course in the biology of mammals. Topics covered include elements of modern mammalian biology such as morphology, physiology, ecology, and behavior. For all topics, the traits that define mammals are emphasized, as is the variation on these themes evident within modern mammalian lineages. Laboratory and field explore the biology of modern mammals. Laboratories use the extensive collections of the Museum of Vertebrate Zoology to introduce students to mammalian diversity in a phylogenetic context.
Mammalogy with Laboratory: Read More [+]

Rules & Requirements
Prerequisites: 104LF
Credit Restrictions: Students will receive partial credit for 173LF after taking 173.

INTEGBI 181L Paleobotany - The 500-Million Year History of a Greening Planet 4 Units
Terms offered: Spring 2018, Spring 2016, Fall 2014
Introduction to the evolution of plants and terrestrial ecosystems through time. From the invasion of land to the present, we will follow the evolution of major plant groups through important moments of the Phanerozoic eon (the past 540 million years). By studying fossilized plant assemblages, we will interpret how major environmental changes unfolded across landscapes in the past and how plants have influenced the shaping of our planet. Lectures will be complemented by an interactive laboratory covering paleobotanical research techniques, study of fossil and living plant form and function in the lab and field, and analysis of peer-reviewed literature.

Rules & Requirements

Prerequisites: Courses in botany and geology are recommended

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Additional Details

Subject/Course Level: Integrative Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

INTEGBI C187 Human Biogeography of the Pacific 3 Units
Terms offered: Spring 2015, Spring 2013
This course examines the history of human dispersal across Oceania from the perspectives of biogeography and evolutionary ecology. H. sapiens faced problems of dispersal, colonization, and extinction, and adapted in a variety of ways to the diversity of insular ecosystems. A dual evolutionary model takes into account cultural evolution and transmission, as well as biological evolution of human populations. This course also explores the impacts of human populations on isolated and fragile insular ecosystems, and the reciprocal effects of anthropogenic change on human cultures.

INTEGBI 190 Seminar for Integrative Biology Majors 1 - 3 Units
Terms offered: Spring 2016, Spring 2015, Spring 2014
This upper-division undergraduate course will allow students to pursue specialized topics in biology in a seminar format. The specific content of the course will vary based on the topic and the instructor. In general, weekly meetings will provide a forum for extended discussion of selected aspects of evolutionary biology. Supplementary readings and assignments will provide critical background information and keep students engaged in relevant topics between weekly meetings.

INTEGBI 191 Directed Undergraduate Research 3 Units
Terms offered: Spring 2017, Fall 2016, Summer 2015 10 Week Session
This course is intended for advanced undergraduates wishing to pursue independent research projects under the mentorship of an IB faculty member. Research projects will be rigorous and will provide significant training in the methods of evolutionary research. A project proposal is required to enroll and students are expected to produce a substantial written summary of their work.

Rules & Requirements: Consent of instructor and departmental adviser
