Marine Science

Bachelor of Arts (BA)

The ocean plays a central role in physical, biological, chemical, and geological processes on Earth. The field of marine science thus requires an understanding of the interactions between the biosphere, hydrosphere, lithosphere, and atmosphere. Some examples of the current research directions of societal concern in the marine sciences include: the role of the ocean in climate change; the ocean’s role in climate phenomena such as El Niño and La Niña (and their effect on modern marine ecosystems); the history of El Niño and other climatic/oceanographic events recorded in marine sediments and corals; coastal pollution and its effect on coastal marine ecosystems; and coastal erosion (natural and human-caused).

Declaring the Major

The department strongly encourages students to see the student services adviser as early as possible. Students are accepted into the major with a C average or better. There are a number of scholarships and research opportunities as well as other benefits available to declared majors.

Honors Program

Students in the honors program must fulfill the following additional requirements: 1) maintain a grade point average (GPA) of at least 3.3 in all courses in the major and an overall GPA of at least 3.3 in the University; and 2) carry out an individual research or study project, involving at least three units of EPS H195. The project is chosen in consultation with a departmental adviser, and written report is judged by the student’s research supervisor and a departmental adviser. Application for the honors program should be made through the student’s adviser no later than the end of the student’s junior year.

Minor Program

For information regarding the requirements, please see the Minor Requirements tab. Program planning and confirmation should be done with the undergraduate major adviser and the Marine Science faculty adviser.

Other Majors and Minors Offered by the Department of Earth and Planetary Science

Atmospheric Science (http://guide.berkeley.edu/undergraduate/degree-programs/atmospheric-science) (Major and Minor)
Environmental Earth Science (http://guide.berkeley.edu/undergraduate/degree-programs/environmental-earth-science) (Major and Minor)
Geology (http://guide.berkeley.edu/undergraduate/degree-programs/geology) (Major and Minor)
Geophysics (http://guide.berkeley.edu/undergraduate/degree-programs/geophysics) (Major and Minor)
Planetary Science (http://guide.berkeley.edu/undergraduate/degree-programs/planetary-science) (Major and Minor)

In addition to the University, campus, and college requirements, listed on the College Requirements tab, students must fulfill the below requirements specific to their major program.

General Guidelines

1. All courses taken to fulfill the major requirements below must be taken for graded credit, other than courses listed which are offered on a Pass/No Pass basis only. Other exceptions to this requirement are noted as applicable.
2. No more than one upper division course may be used to simultaneously fulfill requirements for a student’s major and minor programs, with the exception of minors offered outside of the College of Letters & Science.
3. A minimum grade point average (GPA) of 2.0 must be maintained in both upper and lower division courses used to fulfill the major requirements.

For information regarding residence requirements and unit requirements, please see the College Requirements tab.

Lower Division Requirements

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>EPS 50</td>
<td>The Planet Earth</td>
<td>4</td>
</tr>
<tr>
<td>EPS C82</td>
<td>Oceans (Please note that EPS N82 will not count as a substitute for C82.)</td>
<td>3</td>
</tr>
</tbody>
</table>

Choose one of the following math sequences:

<table>
<thead>
<tr>
<th>Math Sequence</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1A &amp; MATH 1B</td>
<td>Calculus and Calculus</td>
</tr>
<tr>
<td>MATH 16A &amp; MATH 16B</td>
<td>Analytic Geometry and Calculus</td>
</tr>
</tbody>
</table>

For information regarding residence requirements and unit requirements, please see the College Requirements tab.

Upper Division Requirements

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>EPS 102</td>
<td>History and Evolution of Planet Earth</td>
<td>4</td>

</tbody>
</table>

1. This course can only be taken during the student's senior year.
2. All elective courses used to fulfill the major requirements must be approved by the faculty adviser. This list is intended as a guide; the suggested courses are not limited to only courses included in this list.

Students who have a strong interest in an area of study outside their major often decide to complete a minor program. These programs have set requirements and are noted officially on the transcript in the memoranda section, but they are not noted on diplomas.

General Guidelines

1. All courses taken to fulfill the minor requirements below must be taken for graded credit.
2. A minimum of three of the upper division courses taken to fulfill the minor requirements must be completed at UC Berkeley.
3. A minimum grade point average (GPA) of 2.0 is required for courses used to fulfill the minor requirements.
4. Courses used to fulfill the minor requirements may be applied toward the Seven-Course Breadth requirement, for Letters & Science students.
5. No more than one upper division course may be used to simultaneously fulfill requirements for a student’s major and minor programs.
6. All minor requirements must be completed prior to the last day of finals during the semester in which the student plan to graduate. If students cannot finish all courses required for the minor by that time, they should see a College of Letters & Science adviser.
7. All minor requirements must be completed within the unit ceiling. (For further information regarding the unit ceiling, please see the College Requirements tab.)

Undergraduate students in the College of Letters & Science must fulfill the following requirements in addition to those required by their major program.

For detailed lists of courses that fulfill college requirements, please review the College of Letters & Sciences (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science) page in this Guide.

Entry Level Writing (http://writing.berkeley.edu/node/78)

All students who will enter the University of California as freshmen must demonstrate their command of the English language by fulfilling the Entry Level Writing requirement. Fulfillment of this requirement is also a prerequisite to enrollment in all reading and composition courses at UC Berkeley.

American History and American Institutions (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/american-history-institutions-requirement)

The American History and Institutions requirements are based on the principle that a US resident graduated from an American university, should have an understanding of the history and governmental institutions of the United States.
American Cultures (http://americancultures.berkeley.edu/students/courses)

American Cultures is the one requirement that all undergraduate students at Cal need to take and pass in order to graduate. The requirement offers an exciting intellectual environment centered on the study of race, ethnicity and culture of the United States. AC courses offer students opportunities to be part of research-led, highly accomplished teaching environments, grappling with the complexity of American Culture.

Quantitative Reasoning

The Quantitative Reasoning requirement is designed to ensure that students graduate with basic understanding and competency in math, statistics, or computer science. The requirement may be satisfied by exam or by taking an approved course.

Foreign Language

The Foreign Language requirement may be satisfied by demonstrating proficiency in reading comprehension, writing, and conversation in a foreign language equivalent to the second semester college level, either by passing an exam or by completing approved course work.

Reading and Composition

In order to provide a solid foundation in reading, writing, and critical thinking the College requires two semesters of lower division work in composition in sequence. Students must complete a first-level reading and composition course by the end of their second semester and a second-level course by the end of their fourth semester.

Breadth Requirements

The undergraduate breadth requirements provide Berkeley students with a rich and varied educational experience outside of their major program. As the foundation of a liberal arts education, breadth courses give students a view into the intellectual life of the University while introducing them to a multitude of perspectives and approaches to research and scholarship. Engaging students in new disciplines and with peers from other majors, the breadth experience strengthens interdisciplinary connections and context that prepares Berkeley graduates to understand and solve the complex issues of their day.

Unit Requirements

- 120 total units, including at least 60 L&S units
- Of the 120 units, 36 must be upper division units
- Of the 36 upper division units, 6 must be in courses offered outside your major department

Residence Requirements

For units to be considered in ”residence,” you must be registered in courses on the Berkeley campus as a student in the College of Letters & Science. Most students automatically fulfill the residence requirement by attending classes here for four years. In general, there is no need to be concerned about this requirement, unless you go abroad for a semester or year or want to take courses at another institution or through UC Extension during your senior year. In these cases, you should make an appointment to meet an adviser to determine how you can meet the Senior Residence Requirement.

Note: Courses taken through UC Extension do not count toward residence.

Senior Residence Requirement

After you become a senior (with 90 semester units earned toward your BA degree), you must complete at least 24 of the remaining 30 units in residence in at least two semesters. To count as residence, a semester must consist of at least 6 passed units. Intercampus Visitor, EAP, and UC Berkeley-Washington Program (UCDC) units are excluded.

You may use a Berkeley Summer Session to satisfy one semester of the Senior Residence requirement, provided that you successfully complete 6 units of course work in the Summer Session and that you have been enrolled previously in the college.

Modified Senior Residence Requirement

Participants in the UC Education Abroad Program (EAP) or the UC Berkeley Washington Program (UCDC) may meet a Modified Senior Residence requirement by completing 24 (excluding EAP) of their final 60 semester units in residence. At least 12 of these 24 units must be completed after you have completed 90 units.

Upper Division Residence Requirement

You must complete in residence a minimum of 18 units of upper division courses (excluding EAP units), 12 of which must satisfy the requirements for your major.

Mission

The goal of the Marine Science BA degree is to provide students with a broad and sound education that provides general and specialized knowledge and is intellectually challenging and stimulating. Upon completion of the degree students are ready to enter graduate school at top-ranking institutions (about half of them choose this path), find employment in the profession (geological and environmental engineering and consulting are major opportunities), continue in public education as teachers, or use their background as a sound basis for a new career such as in public policy, law or medical sciences.

Learning Goals for the Major

Marine Science majors acquire knowledge through course work, laboratory training (expertise in experimental techniques), primary field research, library research, and computer applications, with oral presentations and written reports required in many of our classes.

The undergraduate program provides strong technical training for those who wish to pursue professional careers in the earth, environmental and planetary sciences as well as training in analytical, creative and critical thinking and communication for those who choose paths in new fields.

The Marine Science track is a good foundation for graduate study in the marine, geological or biological sciences or for technical positions in State and Federal agencies (such as NASA or NOAA) or private consulting firms.

Marine science is inherently interdisciplinary. Since the ocean plays a central role in physical, biological, chemical, and geological processes on Earth, an understanding of the interactions between the biosphere, hydrosphere, lithosphere, and atmosphere are crucial.

**Marine Science**

**EPS 3 The Water Planet 3 Units**
Terms offered: Spring 2018, Summer 2017 8 Week Session, Spring 2016
An overview of the processes that control water supply to natural ecosystems and human civilization. Hydrologic cycle, floods, droughts, groundwater. Patterns of water use, threats to water quality, effects of global climate change on future water supplies. Water issues facing California.
The Water Planet: Read More [+]

**Hours & Format**
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Summer: 8 weeks - 6 hours of lecture per week

**Additional Details**
Subject/Course Level: Earth and Planetary Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

**EPS 7 Introduction to Climate Change 3 Units**
Terms offered: Fall 2017
This course covers the physical processes that determine Earth's past, present, and future climate, with a particular focus on the essentially irreversible climate change (a.k.a., global warming) caused by the burning of coal, oil, and natural gas. Topics will also include the estimation of future warming and impacts, the Earth resources that can be used to combat climate change, and the policies being used to shift towards the use of those resources.
Introduction to Climate Change: Read More [+]

**Hours & Format**
Fall and/or spring: 15 weeks - 3 hours of lecture per week

**Additional Details**
Subject/Course Level: Earth and Planetary Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

**EPS W12 The Planets 3 Units**
Terms offered: Summer 2017 8 Week Session, Summer 2016 10 Week Session, Summer 2015 8 Week Session, Summer 2014 8 Week Session
A tour of the mysteries and inner workings of our solar system. What are planets made of? Why do they orbit the sun the way they do? How do planets form, and what are they made of? Why do some bizarre moons have oceans, volcanoes, and ice floes? What makes the Earth hospitable for life? Is the Earth a common type of planet or some cosmic quirk? This course will introduce basic physics, chemistry, and math to understand planets, moons, rings, comets, asteroids, atmospheres, and oceans. Understanding other worlds will help us save our own planet and help us understand our place in the universe. This course is web-based.
The Planets: Read More [+]

**Hours & Format**
Summer: 8 weeks - 6 hours of web-based lecture per week

**Online**: This is an online course.

**Additional Details**
Subject/Course Level: Earth and Planetary Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

EPS 24 Freshman Seminar in Earth and Planetary Sciences 1 Unit
Terms offered: Spring 2018, Fall 2017, Spring 2017
The freshman seminar in earth and planetary science is designed to provide new students with an opportunity to explore a topic in geology or earth sciences with a faculty member in a small seminar setting. Topics will vary from semester to semester but will include such possible topics as great voyages of geologic discovery and the role of atmospheric sciences in geologic study.
Freshman Seminar in Earth and Planetary Sciences: Read More [+]
Rules & Requirements
Repeat rules: Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes.
Hours & Format
Fall and/or spring: 15 weeks - 1 hour of seminar per week

EPS 80 Environmental Earth Sciences 3 Units
Terms offered: Fall 2017, Summer 2017 Second 6 Week Session, Fall 2016
This course focuses on the processes on and in the earth that shape the environment. Humanity's use of land and oceans is examined based on an understanding of these processes.
Environmental Earth Sciences: Read More [+]

Rules & Requirements
Credit Restrictions: Students will receive no credit for 80 after taking Integrative Biology 80 or Paleontology 15.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Summer: 6 weeks - 7.5 hours of lecture per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Environmental Earth Sciences: Read Less [-]

EPS C82 Oceans 3 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
This course offers multidisciplinary approach to begin answering the question "Why are oceans important to us?" Upon a physical, chemical, and geologic base, we introduce the alien world of sea life, the importance of the ocean to the global carbon cycle, and the principles of ecology with a focus on the important concept of energy flow through food webs. Lectures expand beyond science to include current topics as diverse as music, movies, mythology, biomechanics, policy, and trade.
Oceans: Read More [+]

Rules & Requirements
Credit Restrictions: Students will receive no credit for Earth and Planetary Science C82/Geography C82/Integrative Biology C82 after completing Integrative Biology 82 or Earth and Planetary Science N82.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Summer:
6 weeks - 7.5 hours of lecture and 2.5 hours of discussion per week
8 weeks - 5.5 hours of lecture and 1.5 hours of discussion per week

**EPS C100 Communicating Ocean Science 4 Units**

Terms offered: Spring 2018, Spring 2016, Spring 2015

For undergraduates interested in improving their ability to communicate their scientific knowledge by teaching ocean science in elementary schools or science centers/aquariums. The course will combine instruction in inquiry-based teaching methods and learning pedagogy with six weeks of supervised teaching experience in a local school classroom or the Lawrence Hall of Science with a partner. Thus, students will practice communicating scientific knowledge and receive mentoring on how to improve their presentations.

*Communicating Ocean Science: Read More [+]*

**Rules & Requirements**

**Prerequisites:** One course in introductory biology, geology, chemistry, physics, or marine science required and interest in ocean science; junior, senior, or graduate standing; consent of instructor required for sophomores.

**Hours & Format**

Fall and/or spring: 15 weeks - 2.5 hours of lecture, 1 hour of discussion, and 2 hours of fieldwork per week.

*Additional Details*

**Subject/Course Level:** Earth and Planetary Science/Undergraduate.

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Ingram

Also listed as: GEOG C146/INTEGBI C100

*Communicating Ocean Science: Read Less [-]*

**EPS 101 Field Geology and Digital Mapping 4 Units**

Terms offered: Fall 2017, Fall 2016, Fall 2015

Geological mapping, field observation, and problem-solving in the Berkeley hills and environs leading to original interpretation of geological processes and history from stratigraphic, structural, and lithological investigations. Integration of the Berkeley hills geology into the Coast Ranges and California as a whole through field trips to key localities. Training in digital field mapping, global positioning systems, and laser surveying. Interdisciplinary focus encourages participation by nonmajors.

*Field Geology and Digital Mapping: Read More [+]*

**Rules & Requirements**

**Prerequisites:** 50 or equivalent introductory course in Earth and Planetary Science.

**Hours & Format**

Fall and/or spring: 15 weeks - 7 hours of fieldwork and 2 hours of lecture per week.

*Additional Details*

**Subject/Course Level:** Earth and Planetary Science/Undergraduate.

**Grading/Final exam status:** Letter grade. Final exam not required.

Formerly known as: Geology 101

Field Geology and Digital Mapping: Read Less [-]

**EPS 102 History and Evolution of Planet Earth 4 Units**

Formation and evolution of the earth. Nucleosynthesis; formation of the solar system; planetary accretion; dating the earth and solar system; formation of the core, mantle, oceans, and atmosphere; plate tectonics; heat transfer and internal dynamics; stratigraphic record of environment, and evolution; climate history and climate change.

*History and Evolution of Planet Earth: Read More [+]*

**Rules & Requirements**

**Prerequisites:** 50.

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week.

*Additional Details*

**Subject/Course Level:** Earth and Planetary Science/Undergraduate.

**Grading/Final exam status:** Letter grade. Final exam required.

History and Evolution of Planet Earth: Read Less [-]
**EPS 103 Introduction to Aquatic and Marine Geochemistry 4 Units**

Terms offered: Spring 2018, Spring 2017, Spring 2015

Introduction to marine geochemistry: the global water cycle; processes governing the distribution of chemical species within the hydrosphere; ocean circulation; chemical mass balances, fluxes, and reactions in the marine environment from global to submicron scales; carbon system equilibrium chemistry and biogeochemistry of fresh and salt water; applications of natural and anthropogenic stable and radioactive tracers; internal ocean processes.

Introduction to Aquatic and Marine Geochemistry: Read More [+]

**Rules & Requirements**

**Prerequisites:** Chemistry 1A, Mathematics 1A or 16A. C82 recommended

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Bishop

---

**EPS 104 Mathematical Methods in Geophysics 4 Units**

Terms offered: Spring 2017, Spring 2015, Spring 2013

Linear systems, linear inverse problems, least squares; generalized inverse, resolution; Fourier series, integral transforms; time series analysis, spherical harmonics; partial differential equations of geophysics; functions of a complex variable; probability and significance tests, maximum likelihood methods. Intended for students in geophysics and other physical sciences.

Mathematical Methods in Geophysics: Read More [+]

**Rules & Requirements**

**Prerequisites:** Mathematics 53-54

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of laboratory per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Bishop

Mathematical Methods in Geophysics: Read Less [-]

---

**EPS 108 Geodynamics 4 Units**

Terms offered: Fall 2016, Fall 2015, Spring 2015

Basic principles in studying the physical properties of earth materials and the dynamic processes of the earth. Examples are drawn from tectonics, mechanics of earthquakes, etc., to augment course material.

Geodynamics: Read More [+]

**Rules & Requirements**

**Prerequisites:** 60, Physics 7A, or Mathematics 53, 54

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Formerly known as:** Geophysics 108

Geodynamics: Read Less [-]

---

**EPS 109 Computer Simulations in Earth and Planetary Sciences 4 Units**

Terms offered: Fall 2016, Fall 2015, Fall 2014

Introduction to modern computer simulation methods and their application to selected Earth and Planetary Science problems. In hands-on computer labs, students will learn about numerical algorithms, learn to program and modify provided programs, and display the solution graphically. This is an introductory course and no programming experience is required. Examples include fractals in geophysics, properties of materials at high pressure, celestial mechanics, and diffusion processes in the Earth. Topics range from ordinary and partial differential equations to molecular dynamics and Monte Carlo simulations.

Computer Simulations in Earth and Planetary Sciences: Read More [+]

**Rules & Requirements**

**Prerequisites:** Math 1A or equivalent

**Hours & Format**

Fall and/or spring: 15 weeks - 2 hours of lecture and 2 hours of laboratory per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Formerly known as:** Geophysics 104

Computer Simulations in Earth and Planetary Sciences: Read Less [-]
**EPS 111 Petroleum Geology 3 Units**  
Terms offered: Fall 2016, Fall 2014, Fall 2012  
Basin development related to plate tectonics. Origin of petroleum: quality,  
quantity, thermal maturation of organic matter in source rock. Primary and  
secondary migration. Petroleum composition. Reservoir rock: stratigraphy  
and geometry. Traps: structural, stratigraphic or combination. Reservoir  
fluids and energy. Oil provinces, individual fields.  
Petroleum Geology: Read More [+]

**Rules & Requirements**

**Prerequisites:** Introductory course in geology

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

Formerly known as: Geology 111

Petroleum Geology: Read Less [-]

**EPS 115 Stratigraphy and Earth History 4 Units**

Terms offered: Spring 2018, Spring 2016, Spring 2015  
Collecting, analyzing, and presenting stratigraphic data; dating and  
correlating sedimentary rocks; recognizing ancient environments and  
reconstructing Earth history; seismic and sequence stratigraphy; event  
stratigraphy and neocatastrophism; applications of stratigraphy to climate  
change, petroleum geology, and archaeology.  
Stratigraphy and Earth History: Read More [+]

**Rules & Requirements**

**Prerequisites:** 50, 100A, 100B, or consent of instructor

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Alvarez

Formerly known as: Geology 115  
Stratigraphy and Earth History: Read Less [-]

**EPS 116 Structural Geology and Tectonics 3 Units**

Introduction to the geometry and mechanics of brittle and ductile geologic  
structures; their origins and genetic relation to stress fields and their use  
as kinematic indicators; case histories of selected regions to elucidate  
tectonic evolution in different plate tectonic settings. Laboratory exercises  
will focus on analysis of hand specimens and structural relations  
portrayed on geologic maps. Several trips to observe geologic structures  
in the field to supplement laboratory exercises.  
Structural Geology and Tectonics: Read More [+]

**Rules & Requirements**

**Prerequisites:** 50

**Hours & Format**

Fall and/or spring: 15 weeks - 2 hours of lecture and 2 hours of  
laboratory per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Alternative to final exam.

**Instructor:** Burgmann

Structural Geology and Tectonics: Read Less [-]

**EPS 117 Geomorphology 4 Units**

Terms offered: Fall 2017, Fall 2016, Fall 2015  
Quantitative examination of landforms, runoff generation, weathering,  
mechanics of soil erosion by water and wind, mass wasting, glacial and  
periglacial processes and hillslope evolution.  
Geomorphology: Read More [+]

**Rules & Requirements**

**Prerequisites:** Consent of instructor

Geologic Field Studies: Read Less [-]

EPS 122 Physics of the Earth and Planetary Interiors 3 Units
Gravity field, density distribution, and internal seismic structure of the Earth and planets. Constitution, composition, temperature distribution, and energetics of the Earth's interior. The geomagnetic field and the geodynamo, and concepts in seismic imaging and geophysical fluid dynamics. This course welcomes physics, computer science, engineering and applied maths majors.
Physics of the Earth and Planetary Interiors: Read More [+]

Rules & Requirements
Prerequisites: Physics 7A-B, Mathematics 53-54, or equivalent

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
 Physics of the Earth and Planetary Interiors: Read Less [-]

EPS 124 Isotopic Geochemistry 4 Units
Terms offered: Spring 2017, Spring 2015, Fall 2013
An overview of the use of natural isotopic variations to study earth, planetary, and environmental problems. Topics include geochronology, cosmogenic isotope studies of surficial processes, radiocarbon and the carbon cycle, water isotopes in the water cycle, and radiogenic and stable isotope studies of planetary evolution, mantle dynamics, volcanoes, groundwater, and geothermal systems. The course begins with a short introduction to nuclear processes and includes simple mathematical models used in isotope geochemistry.
Isotopic Geochemistry: Read More [+]

Rules & Requirements
Prerequisites: Chemistry 1A-1B, Mathematics 1A-1B

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: David Shuster
Isotopic Geochemistry: Read Less [-]
**EPS 125 Stable Isotope Geochemistry 4 Units**
Terms offered: Spring 2018
This course provides an introduction to the principles of stable isotope geochemistry and the application of these principles to problems in Earth and planetary science. This course provides a foundation for the physical, chemical, and biological processes that cause isotopes to fractionate in nature including the kinetic theory of gases, equilibrium thermodynamics, and the kinetics of chemical reactions. These principles will be applied to the study of problems related to the water cycle, paleoclimate, igneous petrology, biogeochemical cycles in the past and present, and planetary science.

Stable Isotope Geochemistry: Read More [+]

**EPS C129 Biometeorology 3 Units**
Terms offered: Fall 2016, Fall 2014, Fall 2012
This course describes how the physical environment (light, wind, temperature, humidity) of plants and soil affects the physiological status of plants and how plants affect their physical environment. Using experimental data and theory, it examines physical, biological, and chemical processes affecting transfer of momentum, energy, and material (water, CO2, atmospheric trace gases) between vegetation and the atmosphere. Plant biometeorology instrumentation and measurements are also discussed.

Biometeorology: Read More [+]

**EPS C146 Geological Oceanography: Read Less [-]**

**EPS C162 Planetary Astrophysics 4 Units**
Terms offered: Fall 2017, Fall 2016, Fall 2015
Physics of planetary systems, both solar and extra-solar. Star and planet formation, radioactive dating, small-body dynamics and interaction of radiation with matter, tides, planetary interiors, atmospheres, and magnetospheres. High-quality oral presentations may be required in addition to problem sets and a final exam.
Planetary Astrophysics: Read More [+]

**Rules & Requirements**

**Prerequisites:** Mathematics 53, 54; Physics 7A-7B-7C

**Hours & Format**
Fall and/or spring: 15 weeks - 3 hours of lecture per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Alternative to final exam.

**Instructors:** Chiang, de Pater, Marcy

**Also listed as:** ASTRON C162

**Planetary Astrophysics: Read Less [-]**

**EPS C150 Case Studies in Earth Systems 2 Units**
Terms offered: Spring 2018, Fall 2017, Spring 2017
Analysis and discussion of three research problems on the interactions of solid earth, hydrologic, chemical, and atmospheric processes. Emphasis is on the synthesis and application of the student's disciplinary knowledge to a new integrative problem in the earth sciences.
Case Studies in Earth Systems: Read More [+]

**Rules & Requirements**

**Prerequisites:** 50, senior standing or consent of instructor

**Hours & Format**
Fall and/or spring: 15 weeks - 2 hours of lecture per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam not required.

Case Studies in Earth Systems: Read Less [-]

**EPS C178 Applied Geophysics 3 Units**
Terms offered: Fall 2017, Fall 2016, Fall 2015
The theory and practice of geophysical methods for determining the subsurface distribution of physical rock and soil properties. Measurements of gravity and magnetic fields, electrical and electromagnetic fields, and seismic velocity are interpreted to map the subsurface distribution of density, magnetic susceptibility, electrical conductivity, and mechanical properties.
Applied Geophysics: Read More [+]

**Hours & Format**
Fall and/or spring: 15 weeks - 2 hours of lecture per week

**Instructor:** Rector

**Also listed as:** CIV ENG C178

Applied Geophysics: Read Less [-]
**EPS C180 Air Pollution 3 Units**
This course is an introduction to air pollution and the chemistry of earth's atmosphere. We will focus on the fundamental natural processes controlling trace gas and aerosol concentrations in the atmosphere, and how anthropogenic activity has affected those processes at the local, regional, and global scales. Specific topics include stratospheric ozone depletion, increasing concentrations of greenhouse gases, smog, and changes in the oxidation capacity of the troposphere. 

**Rules & Requirements**

**Prerequisites:** Chemistry 1A-1B, Physics 8A or consent of instructor

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Goldstein

**Also listed as:** CIV ENG C106/ESPM C180

**Air Pollution:** Read Less [-]

**EPS C181 Atmospheric Physics and Dynamics 3 Units**
Terms offered: Fall 2017, Fall 2016, Fall 2015
This course examines the processes that determine the structure and circulation of the Earth's atmosphere. The approach is deductive rather than descriptive: to figure out the properties and behavior of the Earth's atmosphere based on the laws of physics and fluid dynamics. Topics will include interaction between radiation and atmospheric composition; the role of water in the energy and radiation balance; governing equations for atmospheric motion, mass conservation, and thermodynamic energy balance; geostrophic flow, quasigeostrophic motion, baroclinic instability and dynamics of extratropical cyclones.

**Rules & Requirements**

**Prerequisites:** Mathematics 53, 54; Physics 7A-7B-7C

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** Chiang, Fung

**Also listed as:** GEOG C139

**Atmospheric Physics and Dynamics:** Read Less [-]

**EPS C182 Atmospheric Chemistry and Physics Laboratory 3 Units**
Fluid dynamics, radiative transfer, and the kinetics, spectroscopy, and measurement of atmospherically relevant species are explored through laboratory experiments, numerical simulations, and field observations.

**Rules & Requirements**

**Prerequisites:** Earth and Planetary Science 50 and 102 with grades of C- or higher (one of which may be taken concurrently) or two of the following: Chemistry 120A, 120B, C130, or 130B with grades of C- or higher (one of which may be taken concurrently)

**Credit Restrictions:** Deficiency in C182 may be removed by successfully completing 125. Consent of instructor is required to enroll in C182 after completing 125.

**Hours & Format**

Fall and/or spring: 15 weeks - 1.5 hours of lecture and 5 hours of laboratory per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** Chiang, Fung

**Also listed as:** CHEM C182

**Atmospheric Chemistry and Physics Laboratory:** Read Less [-]

**EPS C183 Carbon Cycle Dynamics 3 Units**
Terms offered: Spring 2016, Spring 2015, Spring 2014, Spring 2013
The focus is the (unsolved) puzzle of the contemporary carbon cycle. Why is the concentration of atmospheric CO2 changing at the rate observed? What are the terrestrial and oceanic processes that add and remove carbon from the atmosphere? What are the carbon management strategies under discussion? How can emission protocols be verified? Students are encouraged to gain hands-on experience with the available data, and learn modeling skills to evaluate hypotheses of carbon sources and sinks.

**Rules & Requirements**

**Prerequisites:** Earth and Planetary Science 50 and 102 with grades of C- or higher (one of which may be taken concurrently) or two of the following: Chemistry 120A, 120B, C130, or 130B with grades of C- or higher (one of which may be taken concurrently)

**Credit Restrictions:** Deficiency in C183 may be removed by successfully completing 125. Consent of instructor is required to enroll in C183 after completing 125.

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam not required.

**Instructor:** Fung

**Also listed as:** ESPM C170

**Carbon Cycle Dynamics:** Read Less [-]
**EPS H195 Senior Honors Course 3 Units**
Terms offered: Spring 2016, Fall 2015, Spring 2015
Original research and preparation of an acceptable thesis. May be taken during two consecutive semesters of senior year and may be substituted for six units of the upper division requirement with consent of major adviser.
Senior Honors Course: Read More [+]

**Rules & Requirements**
- **Prerequisites:** Limited to honors candidates
- **Repeat rules:** Course may be repeated for a maximum of 6 units.

**Hours & Format**
- **Fall and/or spring:** 15 weeks - 0-0 hours of independent study per week
- **Summer:**
  - 6 weeks - 0-0 hours of independent study per week
  - 8 weeks - 0-0 hours of independent study per week

**Additional Details**
- **Subject/Course Level:** Earth and Planetary Science/Undergraduate
- **Grading/Final exam status:** Letter grade. Final exam not required.

**EPS 197 Field Study 1 - 4 Units**
Terms offered: Fall 2010
Written proposal signed by faculty sponsor and approved by major faculty advisor. Supervised experience relevant to specific aspects of students’ EPS specialization in off-campus organization. Regular meetings with faculty sponsor and written report required.
Field Study: Read More [+]

**Rules & Requirements**
- **Prerequisites:** Upper division standing and declared major in Earth and Planetary Science
- **Credit Restrictions:** Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog.

**Hours & Format**
- **Fall and/or spring:** 15 weeks - 3-12 hours of fieldwork per week
- **Summer:**
  - 6 weeks - 7.5-30 hours of fieldwork per week
  - 8 weeks - 6-24 hours of fieldwork per week
  - 10 weeks - 4.5-18 hours of fieldwork per week

**Additional Details**
- **Subject/Course Level:** Earth and Planetary Science/Undergraduate
- **Grading/Final exam status:** Offered for pass/not pass grade only. Final exam not required.

**EPS 198Directed Group Study 1 - 4 Units**
Terms offered: Spring 2015, Spring 2014, Spring 2010
Group studies of selected topics which vary from semester to semester.
