Mathematics

Bachelor of Arts (BA)
The Department of Mathematics offers an undergraduate major program in mathematics, leading to the Bachelor of Arts (BA) degree. Major programs within the department provide excellent preparation for advanced degrees in math, physical sciences, economics, and industrial engineering as well as graduate study in business, education, law, and medicine. They also prepare students for post-baccalaureate positions in business, technology, industry, teaching, government, and finance.

Students majoring in Mathematics may choose to major with a teaching concentration. The teaching concentration is designed to increase the number and quality of math teachers.

Admission to the Major
Students should contact a mathematics undergraduate adviser. Contact information is available on the contact tab or (https://math.berkeley.edu/programs/undergraduate/advising) here. (https://math.berkeley.edu/programs/undergraduate/advising)

Honors Program
In addition to completing the requirements for the major in mathematics, students in the honors program must:

1. Earn a grade point average (GPA) of at least 3.5 in upper division and graduate courses in the major and at least 3.3 in all courses taken at the University.
2. Complete either MATH 196, in which they will write a senior honors thesis, or pass two graduate mathematics courses with a grade of at least A-.
3. Receive the recommendation of the head major adviser.

Students interested in the honors program should consult with an adviser early in their program, preferably by their junior year.

Minor Program
The department offers a minor in Mathematics.

Other Major Offered by the Department of Mathematics
Applied Mathematics (http://guide.berkeley.edu/undergraduate/degree-programs/applied-mathematics) (Major only)

In addition to the University, campus, and college requirements, listed on the College Requirements tab, students must fulfill the below requirements specific to their major program.

General Guidelines
1. All courses taken to fulfill the major requirements below must be taken for graded credit, other than courses listed which are offered on a Pass/No Pass basis only.
2. No more than one upper division course may be used to simultaneously fulfill requirements for a student's major and minor programs, with the exception of minors offered outside of the College of Letters & Science.

3. A minimum grade point average (GPA) of 2.0 must be maintained in both upper and lower division courses used to fulfill the major requirements.

For information regarding residence requirements and unit requirements, please see the College Requirements tab.

Major Requirements: Mathematics

Two semi-electives
Select one course from two of the following three areas:

- Computing
  - MATH 128A Numerical Analysis
- Geometry
  - MATH 130 The Classical Geometries
  - MATH 140 Metric Differential Geometry
  - MATH 141 Elementary Differential Topology
  - MATH 142 Elementary Algebraic Topology
  - MATH 143 Elementary Algebraic Geometry
- Logic and Foundations
  - MATH 125A Mathematical Logic
  - MATH 135 Introduction to the Theory of Sets
  - MATH 136 Incompleteness and Undecidability

Two electives, select at least two additional upper division or graduate mathematics courses must be taken

1. COMPSCI 70 can be substituted for MATH 55 for students with a double major in Computer Science or Electrical Engineering and Computer Science
2. These two electives must receive the Faculty Adviser's written approval on the Course Approval Form which is then returned to an Undergraduate Adviser in 964 or 965 Evans for the student's file. Courses in other departments may count toward this requirement provided they have substantial mathematical content and are offered for at least 3 units each.

MATH 110 Linear Algebra 4
MATH 113 Introduction to Abstract Algebra 4
Select two of the following:
  MATH 128A Numerical Analysis 4
  MATH 130 The Classical Geometries 4
  MATH 135 Introduction to the Theory of Sets 4
  MATH 151 Mathematics of the Secondary School Curriculum I 4
  MATH 152 Mathematics of the Secondary School Curriculum II 4
  MATH 153 Mathematics of the Secondary School Curriculum III 4
  MATH 160 History of Mathematics 4

Recommended courses:
Students are encouraged, though not required, to take, the following:
  MATH 104 Introduction to Analysis 4
  MATH 115 Introduction to Number Theory 4
  MATH 185 Introduction to Complex Analysis 4

1 COMPSCI 70 can be substituted for MATH 55 for students with a double major in Computer Science or Electrical Engineering and Computer Science.

Students who have a strong interest in an area of study outside their major often decide to complete a minor program. These programs have set requirements and are noted officially on the transcript in the memoranda section, but they are not noted on diplomas.

General Guidelines

1. All courses taken to fulfill the minor requirements below must be taken for graded credit.
2. A minimum of three of the upper division courses taken to fulfill the minor requirements must be completed at UC Berkeley.
3. A minimum grade point average of 2.0 is required for the lower division minor requirements as well as for the five upper division courses used for the minor.
4. Courses used to fulfill the minor requirements may be applied toward the Seven-Course Breadth requirement, for Letters & Science students.
5. No more than one upper division course may be used to simultaneously fulfill requirements for a student’s major and minor programs.
6. All minor requirements must be completed prior to the last day of finals during the semester in which the student plans to graduate.
7. All minor requirements must be completed within the unit ceiling. (For further information regarding the unit ceiling, please see the College Requirements tab.)

Requirements

Lower Division
MATH 1A Calculus 4
MATH 1B Calculus 4
MATH 53 Multivariable Calculus 4
MATH 54 Linear Algebra and Differential Equations 4

Upper Division
MATH 104 Introduction to Analysis 4
MATH 110 Linear Algebra 4

MATH 113 Introduction to Abstract Algebra 4
MATH 185 Introduction to Complex Analysis 4
One elective: select one additional upper division math course 4

Undergraduate students in the College of Letters & Science must fulfill the following requirements in addition to those required by their major program.

For detailed lists of courses that fulfill college requirements, please review the College of Letters & Sciences (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science) page in this Guide.

Entry Level Writing (http://writing.berkeley.edu/node/78)

All students who will enter the University of California as freshmen must demonstrate their command of the English language by fulfilling the Entry Level Writing requirement. Fulfillment of this requirement is also a prerequisite to enrollment in all reading and composition courses at UC Berkeley.

American History and American Institutions (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/american-history-institutions-requirement)
The American History and Institutions requirements are based on the principle that a US resident graduated from an American university, should have an understanding of the history and governmental institutions of the United States.

American Cultures (http://americancultures.berkeley.edu/students/courses)
American Cultures is the one requirement that all undergraduate students at Cal need to take and pass in order to graduate. The requirement offers an exciting intellectual environment centered on the study of race, ethnicity and culture of the United States. AC courses offer students opportunities to be part of research-led, highly accomplished teaching environments, grappling with the complexity of American Culture.

Quantitative Reasoning
The Quantitative Reasoning requirement is designed to ensure that students graduate with basic understanding and competency in math, statistics, or computer science. The requirement may be satisfied by exam or by taking an approved course work.

Foreign Language
The Foreign Language requirement may be satisfied by demonstrating proficiency in reading comprehension, writing, and conversation in a foreign language equivalent to the second semester college level, either by passing an exam or by completing approved course work.

Reading and Composition
In order to provide a solid foundation in reading, writing, and critical thinking the College requires two semesters of lower division work in composition in sequence. Students must complete a first-level reading and composition course by the end of their second semester and a second-level course by the end of their fourth semester.
Breadth Requirements
The undergraduate breadth requirements provide Berkeley students with a rich and varied educational experience outside of their major program. As the foundation of a liberal arts education, breadth courses give students a view into the intellectual life of the University while introducing them to a multitude of perspectives and approaches to research and scholarship. Engaging students in new disciplines and with peers from other majors, the breadth experience strengthens interdisciplinary connections and context that prepares Berkeley graduates to understand and solve the complex issues of their day.

Unit Requirements
- 120 total units, including at least 60 L&S units
- Of the 120 units, 36 must be upper division units
- Of the 36 upper division units, 6 must be taken in courses offered outside your major department

Residence Requirements
For units to be considered in "residence," you must be registered in courses on the Berkeley campus as a student in the College of Letters & Science. Most students automatically fulfill the residence requirement by attending classes here for four years. In general, there is no need to be concerned about this requirement, unless you go abroad for a semester or year or want to take courses at another institution or through UC Extension during your senior year. In these cases, you should make an appointment to meet an adviser to determine how you can meet the Senior Residence Requirement.

Note: Courses taken through UC Extension do not count toward residence.

Senior Residence Requirement
After you become a senior (with 90 semester units earned toward your BA degree), you must complete at least 24 of the remaining 30 units in residence in at least two semesters. To count as residence, a semester must consist of at least 6 passed units. Intercampus Visitor, EAP, and UC Berkeley-Washington Program (UCDC) units are excluded.

You may use a Berkeley Summer Session to satisfy one semester of the Senior Residence requirement, provided that you successfully complete 6 units of course work in the Summer Session and that you have been enrolled previously in the college.

Modified Senior Residence Requirement
Participants in the UC Education Abroad Program (EAP) or the UC Berkeley Washington Program (UCDC) may meet a Modified Senior Residence requirement by completing 24 (excluding EAP) of their final 60 semester units in residence. At least 12 of these 24 units must be completed after you have completed 90 units.

Upper Division Residence Requirement
You must complete in residence a minimum of 18 units of upper division courses (excluding EAP units), 12 of which must satisfy the requirements for your major.

Learning Goals for the Major
Mathematics is the language of science. In Galileo’s words:

Philosophy is written in this grand book, the universe, which stands continually open to our gaze. But the book cannot be understood unless one first learns to comprehend the language and read the characters in which it is written. It is written in the language of mathematics, and its characters are triangles, circles, and other geometric figures, without which it is impossible to understand a single word of it. Without those, one is wandering in a dark labyrinth.

Mathematics majors learn the internal workings of this language, its central concepts and their interconnections. These involve structures going far beyond the geometric figures to which Galileo refers. Majors also learn to use mathematical concepts to formulate, analyze, and solve real-world problems. Their training in rigorous thought and creative problem-solving is valuable not just in science, but in all walks of life.

Skills
By the time of graduation, majors should have acquired the following knowledge and skills:

1. Analytical skills
   • An understanding of the basic rules of logic.
   • The ability to distinguish a coherent argument from a fallacious one, both in mathematical reasoning and in everyday life.
   • An understanding of the role of axioms or assumptions.
   • The ability to abstract general principles from examples.

2. Problem-solving and modeling skills (important for all, but especially for majors in Applied Mathematics)
   • The ability to recognize which real-world problems are subject to mathematical reasoning.
   • The ability to make vague ideas precise by representing them in mathematical notation, when appropriate.
   • Techniques for solving problems expressed in mathematical notation.

3. Communication skills
   • The ability to formulate a mathematical statement precisely.
   • The ability to write a coherent proof.
   • The ability to present a mathematical argument verbally.
   • Majors in Mathematics with a Teaching Concentration should acquire familiarity with techniques for explaining K-12 mathematics in an accessible and mathematically correct manner.

4. Reading and research skills
   • Sufficient experience in mathematical language and foundational material to be well-prepared to extend one’s mathematical knowledge further through independent reading.
   • Exposure to and successful experience in solving mathematical problems presenting substantial intellectual challenge.

The Math Department has a small team of undergraduate advisers that information on requirements, policies, procedures, resources, opportunities, untangling bureaucratic knots, developing study plans, attending commencement, certifying degrees and minors. Students are strongly encouraged to see an undergraduate adviser at least twice a year.

The individually assigned faculty adviser counsels students on the academic content of their mathematics major. The faculty adviser’s signature is required on program forms (a) when a student first declares the major; and (b) confirming approval of courses that are not already preapproved to be used for the major electives. Appropriate questions
for the faculty adviser include selection of electives and preparation for
graduate-level courses in a specific mathematical area to be used for
honors in the major. Be sure and let him/her know if you are considering
graduate work in or related to mathematics, and solicit help in how best to
prepare.

Occasionally, the student’s adviser goes on sabbatical or is taken off
the major advising list and a new official adviser will be appointed by the
head major adviser. Requests to change advisers will be accommodated
to the extent possible on an individual basis. Please make requests well
in advance of the Tele-BEARS period in which the change is to become
effective.

Mathematics

MATH 1A Calculus 4 Units
Terms offered: Spring 2018, Fall 2017, Summer 2017 8 Week Session
This sequence is intended for majors in engineering and the physical
sciences. An introduction to differential and integral calculus of functions
of one variable, with applications and an introduction to transcendental
functions.
Calculus: Read More [+] Rules & Requirements
Prerequisites: Three and one-half years of high school math, including
trigonometry and analytic geometry, plus a satisfactory grade in one of
the following: CEEB MAT test, an AP test, the UC/CSU math diagnostic
test, or 32. Consult the mathematics department for details. Students with
AP credit should consider choosing a course more advanced than 1A
Credit Restrictions: Students will receive no credit for 1A after taking
16B and 2 units after taking 16A.
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of
discussion per week
Summer: 8 weeks - 5 hours of lecture and 5 hours of discussion per
week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Calculus: Read Less [-]

MATH 1B Calculus 4 Units
Terms offered: Spring 2018, Fall 2017, Summer 2017 8 Week Session
Continuation of 1A. Techniques of integration; applications of integration.
Infinite sequences and series. First-order ordinary differential equations.
Second-order ordinary differential equations; oscillation and damping;
series solutions of ordinary differential equations.
Calculus: Read More [+] Rules & Requirements
Prerequisites: 1A
Credit Restrictions: Students will receive 2 units of credit for 1B after
taking 16B.
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of
discussion per week
Summer: 8 weeks - 5 hours of lecture and 5 hours of discussion per
week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Calculus: Read Less [-]

MATH H1B Honors Calculus 4 Units
Terms offered: Fall 2015, Fall 2014, Fall 2013
Honors version of 1B. Continuation of 1A. Techniques of integration;
applications of integration. Infinite sequences and series. First-order
ordinary differential equations. Second-order ordinary differential
equations; oscillation and damping; series solutions of ordinary
differential equations.
Honors Calculus: Read More [+] Rules & Requirements
Prerequisites: 1A
Credit Restrictions: Students will receive 2 units of credit for H1B after
taking 16B.
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of
discussion per week
Summer: 8 weeks - 5 hours of lecture and 5 hours of discussion per
week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Honors Calculus: Read Less [-]
MATH 10A Methods of Mathematics: Calculus, Statistics, and Combinatorics 4 Units
Terms offered: Fall 2017, Summer 2017 8 Week Session, Fall 2016
This sequence is intended for majors in the life sciences. Introduction to differential and integral calculus of functions of one variable. Representation of data, elementary probability theory, statistical models, and testing.

Methods of Mathematics: Calculus, Statistics, and Combinatorics: Read More [+]

Rules & Requirements

Prerequisites: Three and one-half years of high school math, including trigonometry and analytic geometry

Credit Restrictions: Students will receive 2 units for Mathematics 10A after completing Mathematics 1A.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of discussion per week

Summer: 8 weeks - 5 hours of lecture and 5 hours of discussion per week

Additional Details

Subject/Course Level: Mathematics/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Methods of Mathematics: Calculus, Statistics, and Combinatorics: Read Less [-]

MATH 10B Methods of Mathematics: Calculus, Statistics, and Combinatorics 4 Units
Terms offered: Spring 2018, Summer 2017 8 Week Session, Spring 2017
Elementary combinatorics and discrete probability theory. Introduction to graphs, matrix algebra, linear equations, difference equations, and differential equations.

Methods of Mathematics: Calculus, Statistics, and Combinatorics: Read More [+]

Rules & Requirements

Prerequisites: Continuation of 10A

Credit Restrictions: Students will receive 2 units of credit for Mathematics 10B after completing Mathematics 55.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of discussion per week

Summer: 8 weeks - 5 hours of lecture and 5 hours of discussion per week

Additional Details

Subject/Course Level: Mathematics/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Methods of Mathematics: Calculus, Statistics, and Combinatorics: Read Less [-]
MATH 16A Analytic Geometry and Calculus 3 Units
Terms offered: Spring 2018, Fall 2017, Summer 2017 8 Week Session
This sequence is intended for majors in the life and social sciences. Calculus of one variable; derivatives, definite integrals and applications, maxima and minima, and applications of the exponential and logarithmic functions.
Analytic Geometry and Calculus: Read More [+]
Rules & Requirements
Prerequisites: Three years of high school math, including trigonometry, plus a satisfactory grade in one of the following: CEEB MAT test, an AP test, the UC/CSU math diagnostic exam, or 32. Consult the mathematics department for details.
Credit Restrictions: Students will receive no credit for 16A after taking 1A. Two units of 16A may be used to remove a deficient grade in 1A.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week
Summer: 8 weeks - 4 hours of lecture and 4 hours of discussion per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
MATH 16B Analytic Geometry and Calculus 3 Units
Terms offered: Spring 2018, Fall 2017, Summer 2017 8 Week Session
Analytic Geometry and Calculus: Read More [+]
Rules & Requirements
Prerequisites: 16A
Credit Restrictions: Students will receive no credit for 16B after 1B, 2 units after 1A. Two units of 16B may be used to remove a deficient grade in 1A.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week
Summer: 8 weeks - 4 hours of lecture and 4 hours of discussion per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
MATH 24 Freshman Seminars 1 Unit
Terms offered: Spring 2018, Fall 2017, Spring 2017
The Berkeley Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Berkeley Seminars are offered in all campus departments, and topics vary from department to department and semester to semester.
Freshman Seminars: Read More [+]
Rules & Requirements
Repeat rules: Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes.
Hours & Format
Fall and/or spring: 15 weeks - 1 hour of seminar per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: The grading option will be decided by the instructor when the class is offered. Final exam required.
MATH 32 Precalculus 4 Units
Terms offered: Spring 2018, Fall 2017, Summer 2017 8 Week Session
Polynomial and rational functions, exponential and logarithmic functions, trigonometry and trigonometric functions. Complex numbers, fundamental theorem of algebra, mathematical induction, binomial theorem, series, and sequences.
Precalculus: Read More [+]
Rules & Requirements
Prerequisites: Three years of high school mathematics, plus satisfactory score on one of the following: CEEB MAT test, math SAT, or UC/CSU diagnostic examination
Credit Restrictions: Students will receive no credit for 32 after taking 1A-1B or 16A-16B and will receive 3 units after taking 96.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 2 hours of discussion per week
Summer: 6 weeks - 5 hours of lecture and 5 hours of discussion per week
8 weeks - 5 hours of lecture and 5 hours of discussion per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Precalculus: Read Less [-]
MATH N32 Precalculus 4 Units
Terms offered: Prior to 2007
Polynomial and rational functions, exponential and logarithmic functions, trigonometry and trigonometric functions. Complex numbers, fundamental theorem of algebra, mathematical induction, binomial theorem, series, and sequences.
Precalculus: Read More [+]

Rules & Requirements
Prerequisites: Three years of high school mathematics, plus satisfactory score on one of the following: CEEB MAT test, math SAT, or UC/CSU diagnostic examination
Credit Restrictions: Students will receive no credit for N32 after taking 1A-1B or 16A-16B and will receive 3 units after taking 96.

Hours & Format
Summer: 8 weeks - 12.5 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Gibson
Precalculus: Read Less [-]

MATH 39A Freshman/Sophomore Seminar 2 - 4 Units
Terms offered: Spring 2018, Spring 2010, Spring 2009
Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.
Freshman/Sophomore Seminar: Read More [+]

Rules & Requirements
Prerequisites: Priority given to freshmen and sophomores

Hours & Format
Fall and/or spring: 15 weeks - 2-4 hours of seminar per week

Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Freshman/Sophomore Seminar: Read Less [-]

MATH 49 Supplementary Work in Lower Division Mathematics 1 - 3 Units
Terms offered: Spring 2017, Spring 2016, Fall 2015
Students with partial credit in lower division mathematics courses may, with consent of instructor, complete the credit under this heading.
Supplementary Work in Lower Division Mathematics: Read More [+]

Rules & Requirements
Prerequisites: Some units in a lower division Mathematics class
Repeat rules: Course may be repeated for credit.

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Summer: 6 weeks - 1-5 hours of independent study per week
8 weeks - 1-4 hours of independent study per week

Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Supplementary Work in Lower Division Mathematics: Read Less [-]

MATH 53 Multivariable Calculus 4 Units
Terms offered: Spring 2018, Fall 2017, Summer 2017 8 Week Session
Multivariable Calculus: Read More [+]

Rules & Requirements
Prerequisites: Mathematics 1B
Credit Restrictions: Students will receive no credit for Mathematics 53 after completing Mathematics W53, 53M; 3 units for Mathematics 50A and 1 unit for Mathematics 50B. A deficient grade in 53 may be removed by completing Mathematics W53.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of discussion per week
Summer: 8 weeks - 5 hours of lecture and 5 hours of discussion per week

Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Multivariable Calculus: Read Less [-]
MATH H53 Honors Multivariable Calculus 4 Units
Terms offered: Spring 2018, Spring 2017, Fall 2015
Honors Multivariable Calculus: Read More [+]
Rules & Requirements
Prerequisites: 1B
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of discussion per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Honors Multivariable Calculus: Read Less [-]

MATH W53 Multivariable Calculus 4 Units
Terms offered: Summer 2017 8 Week Session, Summer 2016 10 Week Session, Summer 2016 8 Week Session
Multivariable Calculus: Read More [+]
Rules & Requirements
Prerequisites: Mathematics 1B or equivalent
Credit Restrictions: Students will receive no credit for Mathematics W53 after completing Mathematics 53. A deficient grade in Mathematics W53 may be removed by completing Mathematics 53. <br/>
Hours & Format
Summer: 8 weeks - 5 hours of web-based lecture and 5 hours of web-based discussion per week
Online: This is an online course.
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Hutchings
Multivariable Calculus: Read Less [-]

MATH 54 Linear Algebra and Differential Equations 4 Units
Terms offered: Spring 2018, Fall 2017, Summer 2017 8 Week Session
Linear Algebra and Differential Equations: Read More [+]
Rules & Requirements
Prerequisites: 1B
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of discussion per week
Summer: 8 weeks - 5 hours of lecture and 5 hours of discussion per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

MATH H54 Honors Linear Algebra and Differential Equations 4 Units
Terms offered: Fall 2017, Fall 2016, Spring 2016
Honors Linear Algebra and Differential Equations: Read More [+]
Rules & Requirements
Prerequisites: 1B
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of discussion per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Honors Linear Algebra and Differential Equations: Read Less [-]
MATH 55 Discrete Mathematics 4 Units
Terms offered: Spring 2018, Fall 2017, Summer 2017 8 Week Session
Logic, mathematical induction sets, relations, and functions. Introduction to graphs, elementary number theory, combinatorics, algebraic structures, and discrete probability theory.
Discrete Mathematics: Read More [+]

Rules & Requirements

Prerequisites: Mathematical maturity appropriate to a sophomore math class. 1A-1B recommended

Credit Restrictions: Students will receive no credit for 55 after taking Computer Science 70.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of discussion per week
Summer: 8 weeks - 5 hours of lecture and 5 hours of discussion per week

Additional Details

Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

MATH 74 Transition to Upper Division Mathematics 3 Units
Terms offered: Spring 2009, Fall 2008, Summer 2008 8 Week Session
The course will focus on reading and understanding mathematical proofs. It will emphasize precise thinking and the presentation of mathematical results, both orally and in written form. The course is intended for students who are considering majoring in mathematics but wish additional training.
Transition to Upper Division Mathematics: Read More [+]

Rules & Requirements

Prerequisites: 53 and 54

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of discussion per week
Summer: 8 weeks - 6 hours of lecture and 0-2 hours of discussion per week

Additional Details

Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

MATH 91 Special Topics in Mathematics 4 Units
Terms offered: Spring 2016, Fall 2012, Spring 2012
Topics to be covered and the method of instruction to be used will be announced at the beginning of each semester that such courses are offered. See department bulletins.
Special Topics in Mathematics: Read More [+]

Rules & Requirements

Repeat rules: Course may be repeated for credit.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week
Summer: 8 weeks - 6 hours of lecture per week

Additional Details

Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

MATH 96 College Algebra 2 Units
Terms offered: Summer 2017 8 Week Session, Summer 2015 10 Week Session, Summer 2014 10 Week Session
Elements of college algebra. Designed for students who do not meet the prerequisites for 32. Offered through the Student Learning Center.
College Algebra: Read More [+]

Rules & Requirements

Repeat rules: Students will receive no credit for 96 after taking P, PS, or 32.

Hours & Format

Fall and/or spring: 15 weeks - 4 hours of workshop per week
Summer:
6 weeks - 10 hours of workshop per week
8 weeks - 10 hours of workshop per week

Additional Details

Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
College Algebra: Read Less [-]
MATH 98 Supervised Group Study 1 - 4 Units
Terms offered: Fall 2017, Spring 2017, Fall 2016
Directed Group Study, topics vary with instructor.
Supervised Group Study: Read More [+]
Rules & Requirements
Repeat rules: Course may be repeated for a maximum of 4 units.
Hours & Format
Fall and/or spring: 15 weeks - 1-4 hours of directed group study per week
Summer: 8 weeks - 1.5-7.5 hours of directed group study per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Supervised Group Study: Read Less [-]

MATH 98BC Berkeley Connect 1 Unit
Terms offered: Spring 2018, Fall 2017, Spring 2017
Berkeley Connect is a mentoring program, offered through various academic departments, that helps students build intellectual community. Over the course of a semester, enrolled students participate in regular small-group discussions facilitated by a graduate student mentor (following a faculty-directed curriculum), meet with their graduate student mentor for one-on-one academic advising, attend lectures and panel discussions featuring department faculty and alumni, and go on field trips to campus resources. Students are not required to be declared majors in order to participate.
Berkeley Connect: Read More [+]
Hours & Format
Fall and/or spring: 15 weeks - 1 hour of discussion per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Berkeley Connect: Read Less [-]

MATH 99 Supervised Independent Study 1 - 4 Units
Terms offered: Spring 2017, Spring 2016, Fall 2015
Supervised independent study by academically superior, lower division students. 3.3 GPA required and prior consent of instructor who is to supervise the study. A written proposal must be submitted to the department chair for pre-approval.
Supervised Independent Study: Read More [+]
Rules & Requirements
Prerequisites: Restricted to freshmen and sophomores only. Consent of instructor
Credit Restrictions: Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog.
Repeat rules: Course may be repeated for credit.
Hours & Format
Fall and/or spring: 15 weeks - 1-4 hours of independent study per week
Summer: 8 weeks - 1-4 hours of independent study per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Supervised Independent Study: Read Less [-]

MATH C103 Introduction to Mathematical Economics 4 Units
Terms offered: Spring 2018, Spring 2017, Fall 2016
Selected topics illustrating the application of mathematics to economic theory. This course is intended for upper-division students in Mathematics, Statistics, the Physical Sciences, and Engineering, and for economics majors with adequate mathematical preparation. No economic background is required.
Introduction to Mathematical Economics: Read More [+]
Rules & Requirements
Prerequisites: Math 53 and 54
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Formerly known as: 103
Also listed as: ECON C103
Introduction to Mathematical Economics: Read Less [-]
MATH 104 Introduction to Analysis 4 Units
Terms offered: Spring 2018, Fall 2017, Summer 2017 8 Week Session
The real number system. Sequences, limits, and continuous functions in R and R. The concept of a metric space. Uniform convergence, interchange of limit operations. Infinite series. Mean value theorem and applications. The Riemann integral.
Introduction to Analysis: Read More [+] 
Rules & Requirements
Prerequisites: 53 and 54
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Summer: 8 weeks - 8 hours of lecture per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Introduction to Analysis: Read Less [-]

MATH H104 Honors Introduction to Analysis 4 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
Honors section corresponding to 104. Recommended for students who enjoy mathematics and are good at it. Greater emphasis on theory and challenging problems.
Honors Introduction to Analysis: Read More [+] 
Rules & Requirements
Prerequisites: 53 and 54
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Honors Introduction to Analysis: Read Less [-]

MATH 105 Second Course in Analysis 4 Units
Differential calculus in Rn: the derivative as a linear map; the chain rule; inverse and implicit function theorems. Lebesgue integration on the line; comparison of Lebesgue and Riemann integrals. Convergence theorems. Fourier series, L2 theory. Fubini's theorem, change of variable.
Second Course in Analysis: Read More [+] 
Rules & Requirements
Prerequisites: 104
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Second Course in Analysis: Read Less [-]

MATH 110 Linear Algebra 4 Units
Terms offered: Spring 2018, Fall 2017, Summer 2017 8 Week Session
Linear Algebra: Read More [+] 
Rules & Requirements
Prerequisites: 54 or a course with equivalent linear algebra content
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of discussion per week
Summer: 8 weeks - 6 hours of lecture and 2 hours of discussion per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Linear Algebra: Read Less [-]
MATH H110 Honors Linear Algebra 4 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
Honors section corresponding to course 110 for exceptional students with strong mathematical inclination and motivation. Emphasis is on rigor, depth, and hard problems. Honors Linear Algebra: Read More [+]

Rules & Requirements
Prerequisites: 54 or a course with equivalent linear algebra content

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Honors Linear Algebra: Read Less [-]

MATH 113 Introduction to Abstract Algebra 4 Units
Terms offered: Spring 2018, Fall 2017, Summer 2017 8 Week Session
Introduction to Abstract Algebra: Read More [+]

Rules & Requirements
Prerequisites: 54 or a course with equivalent linear algebra content

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Summer: 8 weeks - 8 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Honors Introduction to Abstract Algebra: Read Less [-]

MATH H113 Honors Introduction to Abstract Algebra 4 Units
Honors section corresponding to 113. Recommended for students who enjoy mathematics and are willing to work hard in order to understand the beauty of mathematics and its hidden patterns and structures. Greater emphasis on theory and challenging problems. Honors Introduction to Abstract Algebra: Read More [+]

Rules & Requirements
Prerequisites: 54 or a course with equivalent linear algebra content

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Honors Introduction to Abstract Algebra: Read Less [-]

MATH 114 Second Course in Abstract Algebra 4 Units
Terms offered: Spring 2018, Spring 2017, Fall 2015
Further topics on groups, rings, and fields not covered in Math 113. Possible topics include the Sylow Theorems and their applications to group theory; classical groups; abelian groups and modules over a principal ideal domain; algebraic field extensions; splitting fields and Galois theory; construction and classification of finite fields.
Second Course in Abstract Algebra: Read More [+]

Rules & Requirements
Prerequisites: 110 and 113, or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Second Course in Abstract Algebra: Read Less [-]
MATH 115 Introduction to Number Theory 4 Units
Terms offered: Spring 2018, Summer 2017 8 Week Session, Spring 2017
Divisibility, congruences, numerical functions, theory of primes. Topics selected: Diophantine analysis, continued fractions, partitions, quadratic fields, asymptotic distributions, additive problems.
Introduction to Number Theory: Read More [+]
Rules & Requirements
Prerequisites: 53 and 54
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 0-2 hours of discussion per week
Summer: 8 weeks - 6 hours of lecture and 0-4 hours of discussion per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Introduction to Number Theory: Read Less [-]

MATH 116 Cryptography 4 Units
Terms offered: Fall 2015, Fall 2014, Fall 2013
Construction and analysis of simple cryptosystems, public key cryptography, RSA, signature schemes, key distribution, hash functions, elliptic curves, and applications.
Cryptography: Read More [+]
Rules & Requirements
Prerequisites: 55
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Cryptography: Read Less [-]

MATH 118 Fourier Analysis, Wavelets, and Signal Processing 4 Units
Terms offered: Fall 2017, Spring 2017, Spring 2016
Introduction to signal processing including Fourier analysis and wavelets. Theory, algorithms, and applications to one-dimensional signals and multidimensional images.
Fourier Analysis, Wavelets, and Signal Processing: Read More [+]
Rules & Requirements
Prerequisites: 53 and 54
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Fourier Analysis, Wavelets, and Signal Processing: Read Less [-]

MATH 121A Mathematical Tools for the Physical Sciences 4 Units
Terms offered: Fall 2017, Fall 2016, Spring 2016
Intended for students in the physical sciences who are not planning to take more advanced mathematics courses. Rapid review of series and partial differentiation, complex variables and analytic functions, integral transforms, calculus of variations.
Mathematical Tools for the Physical Sciences: Read More [+]
Rules & Requirements
Prerequisites: 53 and 54
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Mathematical Tools for the Physical Sciences: Read Less [-]
MATH 121B Mathematical Tools for the Physical Sciences 4 Units
Intended for students in the physical sciences who are not planning to take more advanced mathematics courses. Special functions, series solutions of ordinary differential equations, partial differential equations arising in mathematical physics, probability theory.
Mathematical Tools for the Physical Sciences: Read More [+]
Rules & Requirements
Prerequisites: 53 and 54

MATH 123 Ordinary Differential Equations 4 Units
Terms offered: Fall 2017, Fall 2016, Spring 2016
Existence and uniqueness of solutions, linear systems, regular singular points. Other topics selected from analytic systems, autonomous systems, Sturm-Liouville Theory.
Ordinary Differential Equations: Read More [+]
Rules & Requirements
Prerequisites: 104

MATH 125A Mathematical Logic 4 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
Sentential and quantificational logic. Formal grammar, semantical interpretation, formal deduction, and their interrelation. Applications to formalized mathematical theories. Selected topics from model theory or proof theory.
Mathematical Logic: Read More [+]
Rules & Requirements
Prerequisites: Math 113 or consent of instructor

MATH 126 Introduction to Partial Differential Equations 4 Units
Terms offered: Spring 2018, Fall 2017, Summer 2017 8 Week Session
Waves and diffusion, initial value problems for hyperbolic and parabolic equations, boundary value problems for elliptic equations, Green's functions, maximum principles, a priori bounds, Fourier transform.
Introduction to Partial Differential Equations: Read More [+]
Rules & Requirements
Prerequisites: 53 and 54
MATH 127 Mathematical and Computational Methods in Molecular Biology 4 Units
Terms offered: Fall 2017, Fall 2016, Spring 2016
Introduction to mathematical and computational problems arising in the context of molecular biology. Theory and applications of combinatorics, probability, statistics, geometry, and topology to problems ranging from sequence determination to structure analysis.
Mathematical and Computational Methods in Molecular Biology: Read More [+]
Rules & Requirements
Prerequisites: 53, 54, and 55; Statistics 20 recommended
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Mathematical and Computational Methods in Molecular Biology: Read Less [-]

MATH 128A Numerical Analysis 4 Units
Terms offered: Spring 2018, Fall 2017, Summer 2017 8 Week Session
Programming for numerical calculations, round-off error, approximation and interpolation, numerical quadrature, and solution of ordinary differential equations. Practice on the computer.
Numerical Analysis: Read More [+]
Rules & Requirements
Prerequisites: 53 and 54
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Summer: 8 weeks - 4 hours of lecture and 4 hours of discussion per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Numerical Analysis: Read Less [-]

MATH 128B Numerical Analysis 4 Units
Iterative solution of systems of nonlinear equations, evaluation of eigenvalues and eigenvectors of matrices, applications to simple partial differential equations. Practice on the computer.
Numerical Analysis: Read More [+]
Rules & Requirements
Prerequisites: 110 and 128A
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Summer: 8 weeks - 6 hours of lecture and 1.5 hours of discussion per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Numerical Analysis: Read Less [-]

MATH 130 The Classical Geometries 4 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
A critical examination of Euclid's Elements; ruler and compass constructions; connections with Galois theory; Hilbert's axioms for geometry, theory of areas, introduction of coordinates, non-Euclidean geometry, regular solids, projective geometry.
The Classical Geometries: Read More [+]
Rules & Requirements
Prerequisites: 110 and 113
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
The Classical Geometries: Read Less [-]
MATH 135 Introduction to the Theory of Sets
4 Units
Terms offered: Fall 2017, Spring 2017, Spring 2016
Set-theoretical paradoxes and means of avoiding them. Sets, relations,
functions, order and well-order. Proof by transfinite induction and
definitions by transfinite recursion. Cardinal and ordinal numbers and
their arithmetic. Construction of the real numbers. Axiom of choice and its
consequences.
Introduction to the Theory of Sets: Read More [+]
Rules & Requirements
Prerequisites: 113 and 104

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Introduction to the Theory of Sets: Read Less [-]

MATH 136 Incompleteness and
Undecidability 4 Units
Terms offered: Spring 2018, Spring 2017, Fall 2015
Functions computable by algorithm, Turing machines, Church's thesis.
Unsolvability of the halting problem, Rice's theorem. Recursively
enumerable sets, creative sets, many-one reductions. Self-referential
programs. Godel's incompleteness theorems, undecidability of validity,
decidable and undecidable theories.
Incompleteness and Undecidability: Read More [+]
Rules & Requirements
Prerequisites: 53, 54, and 55

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Incompleteness and Undecidability: Read Less [-]

MATH 140 Metric Differential Geometry 4
Units
Terms offered: Fall 2017, Spring 2017, Fall 2015
Frenet formulas, isoperimetric inequality, local theory of surfaces in
Euclidean space, first and second fundamental forms. Gaussian and
mean curvature, isometries, geodesics, parallelism, the Gauss-Bonnet-
Von Dyck Theorem.
Metric Differential Geometry: Read More [+]
Rules & Requirements
Prerequisites: 104

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Metric Differential Geometry: Read Less [-]

MATH 141 Elementary Differential Topology 4
Units
Terms offered: Fall 2017, Fall 2016, Spring 2016
Manifolds in n-dimensional Euclidean space and smooth maps, Sard's
Theorem, classification of compact one-manifolds, transversality and
intersection modulo 2.
Elementary Differential Topology: Read More [+]
Rules & Requirements
Prerequisites: 104 or equivalent and linear algebra

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Elementary Differential Topology: Read Less [-]
MATH 142 Elementary Algebraic Topology 4 Units
Terms offered: Spring 2018, Spring 2017, Fall 2015
The topology of one and two dimensional spaces: manifolds and triangulation, classification of surfaces, Euler characteristic, fundamental groups, plus further topics at the discretion of the instructor.
Elementary Algebraic Topology: Read More [+]
Rules & Requirements
Prerequisites: 104 and 113
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Elementary Algebraic Topology: Read Less [-]

MATH 143 Elementary Algebraic Geometry 4 Units
Terms offered: Spring 2018, Fall 2016, Fall 2015
Introduction to basic commutative algebra, algebraic geometry, and computational techniques. Main focus on curves, surfaces and Grassmannian varieties.
Elementary Algebraic Geometry: Read More [+]
Rules & Requirements
Prerequisites: 113
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Elementary Algebraic Geometry: Read Less [-]

MATH 151 Mathematics of the Secondary School Curriculum I 4 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015
Theory of rational numbers based on the number line, the Euclidean algorithm and fractions in lowest terms. The concepts of congruence and similarity, equation of a line, functions, and quadratic functions.
Mathematics of the Secondary School Curriculum I: Read More [+]
Rules & Requirements
Prerequisites: 1A-1B, 53, or equivalent
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 0-1 hours of discussion per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Mathematics of the Secondary School Curriculum I: Read Less [-]

MATH 152 Mathematics of the Secondary School Curriculum II 4 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
Complex numbers and Fundamental Theorem of Algebra, roots and factorizations of polynomials, Euclidean geometry and axiomatic systems, basic trigonometry.
Mathematics of the Secondary School Curriculum II: Read More [+]
Rules & Requirements
Prerequisites: 151; 54, 113, or equivalent
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 0-1 hours of discussion per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Mathematics of the Secondary School Curriculum II: Read Less [-]
MATH 153 Mathematics of the Secondary School Curriculum III 4 Units
The real line and least upper bound, limit and decimal expansion of a number, differentiation and integration, Fundamental Theorem of Calculus, characterizations of sine, cosine, exp, and log.
Mathematics of the Secondary School Curriculum III: Read More [+]

Rules & Requirements
Prerequisites: 151, 152

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 0-1 hours of discussion per week

Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

MATH 160 History of Mathematics 4 Units
History of algebra, geometry, analytic geometry, and calculus from ancient times through the seventeenth century and selected topics from more recent mathematical history.
History of Mathematics: Read More [+]

Rules & Requirements
Prerequisites: 53, 54, and 113

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

MATH 170 Mathematical Methods for Optimization 4 Units
Terms offered: Spring 2018, Spring 2017, Fall 2015
Linear programming and a selection of topics from among the following: matrix games, integer programming, semidefinite programming, nonlinear programming, convex analysis and geometry, polyhedral geometry, the calculus of variations, and control theory.
Mathematical Methods for Optimization: Read More [+]

Rules & Requirements
Prerequisites: 53 and 54

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

MATH 172 Combinatorics 4 Units
Basic combinatorial principles, graphs, partially ordered sets, generating functions, asymptotic methods, combinatorics of permutations and partitions, designs and codes. Additional topics at the discretion of the instructor.
Combinatorics: Read More [+]

Rules & Requirements
Prerequisites: 55

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
MATH 185 Introduction to Complex Analysis 4 Units
Terms offered: Spring 2018, Fall 2017, Summer 2017 8 Week Session
Analytic functions of a complex variable. Cauchy’s integral theorem, power series, Laurent series, singularities of analytic functions, the residue theorem with application to definite integrals. Some additional topics such as conformal mapping.
Introduction to Complex Analysis: Read More [+]
Rules & Requirements
Prerequisites: 104

MATH 189 Mathematical Methods in Classical and Quantum Mechanics 4 Units
Terms offered: Fall 2015, Fall 2014, Fall 2013
Topics in mechanics presented from a mathematical viewpoint: e.g., hamiltonian mechanics and symplectic geometry, differential equations for fluids, spectral theory in quantum mechanics, probability theory and statistical mechanics. See department bulletins for specific topics each semester course is offered.
Mathematical Methods in Classical and Quantum Mechanics: Read More [+]
Rules & Requirements
Prerequisites: 104, 110, 2 semesters lower division Physics
Repeat rules: Course may be repeated for credit.

MATH H185 Honors Introduction to Complex Analysis 4 Units
Terms offered: Spring 2018, Spring 2016, Spring 2015
Honors section corresponding to Math 185 for exceptional students with strong mathematical inclination and motivation. Emphasis is on rigor, depth, and hard problems.
Honors Introduction to Complex Analysis: Read More [+]
Rules & Requirements
Prerequisites: 104

MATH 191 Experimental Courses in Mathematics 1 - 4 Units
Terms offered: Spring 2018, Fall 2017, Spring 2017
The topics to be covered and the method of instruction to be used will be announced at the beginning of each semester that such courses are offered. See departmental bulletins.
Experimental Courses in Mathematics: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit.

MATH 190 Experimental Courses in Mathematics 1 - 2 Units
Terms offered: Spring 2018, Fall 2017
The topics to be covered and the method of instruction to be used will be announced at the beginning of each semester that such courses are offered. See departmental bulletins.
Experimental Courses in Mathematics: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit.
MATH 195 Special Topics in Mathematics 4 Units
Terms offered: Spring 2011, Spring 2004, Spring 2003
Lectures on special topics, which will be announced at the beginning of each semester that the course is offered.
Special Topics in Mathematics: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit.
Hours & Format
Fall and/or spring: 15 weeks - 0 hours of lecture per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Special Topics in Mathematics: Read Less [-]

MATH 196 Honors Thesis 4 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015
Independent study of an advanced topic leading to an honors thesis.
Honors Thesis: Read More [+]
Rules & Requirements
Prerequisites: Admission to the Honors Program; an overall GPA of 3.3 and a GPA of 3.5 in the major
Repeat rules: Course may be repeated for credit.
Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Summer: 6 weeks - 1-5 hours of independent study per week
8 weeks - 1-4 hours of independent study per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Honors Thesis: Read Less [-]

MATH 197 Field Study 1 - 4 Units
Terms offered: Spring 2016, Spring 2015, Spring 2014
For Math/Applied math majors. Supervised experience relevant to specific aspects of their mathematical emphasis of study in off-campus organizations. Regular individual meetings with faculty sponsor and written reports required. Units will be awarded on the basis of three hours/week/unit.
Field Study: Read More [+]
Rules & Requirements
Prerequisites: Upper division standing. Written proposal signed by faculty sponsor and approved by department chair
Credit Restrictions: Enrollment is restricted; see the Course Number Guide in the Bulletin.
Repeat rules: Course may be repeated for credit.
Hours & Format
Fall and/or spring: 15 weeks - 3-3 hours of fieldwork per week
Summer: 8 weeks - 3-3 hours of fieldwork per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Field Study: Read Less [-]

MATH 198 Directed Group Study 1 - 4 Units
Terms offered: Spring 2017, Fall 2016, Spring 2016
Topics will vary with instructor.
Directed Group Study: Read More [+]
Rules & Requirements
Prerequisites: Must have completed 60 units and be in good standing
Hours & Format
Fall and/or spring: 15 weeks - 1-4 hours of directed group study per week
Summer: 8 weeks - 1-4 hours of directed group study per week
Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Directed Group Study: Read Less [-]
MATH 198BC Berkeley Connect 1 Unit
Terms offered: Spring 2018, Fall 2017, Spring 2017
Berkeley Connect is a mentoring program, offered through various academic departments, that helps students build intellectual community. Over the course of a semester, enrolled students participate in regular small-group discussions facilitated by a graduate student mentor (following a faculty-directed curriculum), meet with their graduate student mentor for one-on-one academic advising, attend lectures and panel discussions featuring department faculty and alumni, and go on field trips to campus resources. Students are not required to be declared majors in order to participate.

Berkeley Connect: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of discussion per week

Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

Berkeley Connect: Read Less [-]

MATH 199 Supervised Independent Study and Research 1 - 4 Units
Terms offered: Fall 2017, Spring 2017, Fall 2016
Supervised Independent Study and Research: Read More [+]

Rules & Requirements
Prerequisites: The standard college regulations for all 199 courses

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Summer:
6 weeks - 1-5 hours of independent study per week
8 weeks - 1-4 hours of independent study per week

Additional Details
Subject/Course Level: Mathematics/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

Supervised Independent Study and Research: Read Less [-]
