The Undergraduate Certificate in New Media program emphasizes the critical understanding and practice of new media through interdisciplinary perspectives. The certificate introduces students to the changing new media landscape that is transforming the way we think in the fields of art, technology, the humanities, and social sciences. Our students learn to innovate as they question the impact of new media on the human experience. The certificate program will serve as a pilot and a portal for undergraduate engagement in new media. The certificate is not an official program offered by Undergraduate Education and will not be noted on a student's transcript.

Core Class

Students should take a project-based undergraduate seminar at NWMEDIA with learning goals that will include new media theory, new media tools, prototyping, evaluation methods, and collaboration methods. This course will be listed as a course for EECS Design Minors, among others. Any NWMEDIA undergraduate course will count towards the core class. Students can also petition the academic committee to have a course that substantially deals with new media that they have taken in another department count towards fulfilling this requirement.

New Media Leadership

Help organize and manage a BCNM conference, lecture, hackathon, or workshop. Students will have the opportunity to interact extensively with new media faculty, and will be immersed in the subject. Students can also propose a new media event to the BCNM. These applications will be considered by the executive committee.

Choose Option 1 or 2

Option 1: Enroll in a New Media Graduate-Level Course

Students will be challenged to think critically about new media in the graduate-level courses the BCNM offers. They will produce either a design project or a substantial paper depending on the class, showing their thorough appreciation for transformations in new media. Since these courses are intended for graduates, students will need to seek instructor approval to enroll in the class. Currently, the BCNM offers the following graduate courses:

- NWMEDIA 200 History and Theory of New Media 4
- NWMEDIA 201 Questioning New Media 3
- NWMEDIA 202 New Media Methods 3
- NWMEDIA 203 Course Not Available 4
- NWMEDIA C262 Theory and Practice of Tangible User Interfaces 4
- NWMEDIA C263 Technologies for Creativity and Learning 3
- NWMEDIA C265 Interface Aesthetics 3
- NWMEDIA 290 Special Topics in New Media 1-4

The paper should exhibit the student's thorough command of new media concepts.

NWMEDIA R1B New Media Reading and Composition 4 Units

Terms offered: Summer 2017 First 6 Week Session, Summer 2016 Second 6 Week Session, Summer 2015 First 6 Week Session

How do media shape our perception of our environment? What is at stake when we adopt or create new media? This seminar provides continued training in expository and argumentative writing, with an emphasis on new media. Satisfies the second half of the Reading and Composition requirement.

NWMEDIA 202 New Media Methods 3 Units
Terms offered: Fall 2014
In this methods course we will study key languages of new media innovation, ranging from flow charts to scripting languages and circuit diagrams. Our study method involves the creation and application of sensing devices in an urban context, and engages students in establishing chains of references which connect ground truth to data, data to information, information to people, people to actions, and actions to policies. Taking into account technical, political, cultural and literacy questions we seek to connect our data production work with information needs of underserved communities in the Bay Area region.

NWMEDIA C203 Critical Making 4 Units
Terms offered: Spring 2017, Spring 2016
Critical Making will operationalize and critique the practice of “making” through both foundational literature and hands on studio culture. As hybrid practitioners, students will develop fluency in readily collaging and incorporating a variety of physical materials and protocols into their practice. Students will envision and create future computational experiences that critically explore social and culturally relevant technological themes. No previous technical knowledge is required to take this course. Class projects involve basic programming, electronic circuitry, and digital fabrication design. Tutorials and instruction will be provided, but students will be expected to develop basic skills in these areas to complete course projects.

NWMEDIA C262 Theory and Practice of Tangible User Interfaces 4 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
This course explores the theory and practice of Tangible User Interfaces, a new approach to Human Computer Interaction that focuses on the physical interaction with computational media. The topics covered in the course include theoretical framework, design examples, enabling technologies, and evaluation of Tangible User Interfaces. Students will design and develop experimental Tangible User Interfaces using physical computing prototyping tools and write a final project report.

NWMEDIA C263 Technologies for Creativity and Learning 3 Units
Terms offered: Spring 2015, Spring 2014
How does the design of new educational technology change the way people learn and think? How do we design systems that reflect our understanding of how we learn? This course explores issues on designing and evaluating technologies that support creativity and learning. The class will cover theories of creativity and learning, implications for design, as well as a survey of new educational technologies such as works in computer supported collaborative learning, digital manipulatives, and immersive learning environments.
