Psychology

Bachelor of Arts (BA)

Psychology as a scientific discipline aims to describe, understand, and predict the behavior of living organisms. In doing so, psychology embraces the many factors that influence behavior — from sensory experience to complex cognition, from the role of genetics to that of social and cultural environments, from the processes that explain behavior in early childhood to those that operate in older ages, and from normal development to pathological conditions. The Psychology Department at UC Berkeley reflects the diversity of our discipline's mission covering six key areas of research: Behavioral and Systems Neuroscience; Clinical Science; Cognition; Cognitive Neuroscience; Developmental, and Social-Personality Psychology. Despite the existence of these specialization areas, the program learning goals focus on fostering methodological, statistical, and critical thinking skills that are not tied to any one particular content area in psychology but are relevant for all of them.

The major serves three purposes:

1. For the liberal arts student, the study of psychology provides an avenue for increased self-understanding and insight into the behavior of others. The objective study of behavior is one of the major themes of intellectual history in the last hundred-plus years.
2. For students preparing for training in such professions as medicine, law, education and business, psychology provides important basic knowledge and principles.
3. For students who plan on pursuing graduate work in psychology, the undergraduate major seeks to establish a sound foundation of research principles and knowledge of a variety of content areas.

Declaring the Major

Psychology is a capped (impacted) major at UC Berkeley. This means that due to high demand, the program unfortunately cannot accommodate every student who wishes to major in Psychology. As part of the terms of being a capped major, all students who apply to the major and meet the following criteria are guaranteed admission:

1. Have a 3.2 grade point average (GPA) in the seven/eight prerequisite courses. (Note: GPA is not rounded up.)
2. Students who entered UC Berkeley as a freshman must declare the major by their 5th semester OR prior to the accumulation of 80 semester units including work in progress (AP or college credit obtained in high school do not count towards the 80 units). Those who entered Berkeley as a junior level transfer must declare the major no later than their first semester at UC Berkeley.
3. Submit the application to the major by the posted deadline. Please refer to the department website (http://psychology.berkeley.edu/students/undergraduate-program/applying-major) for exact deadlines.

Honors Program

Students with a 3.5 GPA in their major and 3.3 GPA overall may apply for admission to the honors program. For students interested in the honors program, it is recommended to participate in the Undergraduate Research Apprentice Program (http://research.berkeley.edu/urap) (URAP) or departmental research during their junior year. This will prepare them for experimental research and design necessary for completing their own project.

Students are required to complete the following courses, none of which count toward major requirements:

- PSYCH 102 Statistics for Psychological Research is a 3 unit upper division course that is designed to introduce students to the data analysis techniques researchers using the field of psychology. This course is only offered in fall and may be taken as early as the junior year. This course must be taken for a letter grade (P/NP grading not accepted). Completion of PSYCH 10/PSYCH 101 is a required prerequisite to this course.
- UGIS 192B or PSYCH 199 Students applying to the honors program are required to be a research apprentice in the laboratory of their intended faculty sponsor. Students must begin their research project in the spring of their junior year. The URAP office will provide the students enrollment information for UGIS 192 (course control number and class entry code) to register via Tele-BEARS and the Psychology Student Services Office will provide enrollment information for Psych 199. A minimum of 2 units of UGIS 192 or Psych 199 is required.
- PSYCH H194A / PSYCH H194B Honors students are required to concurrently enroll in Psychology H194A-B (2 units per semester), the honors seminar, in their senior year. This course provides excellent supplemental background for preparing the thesis.
- PSYCH H195A / PSYCH H195B Psychology H195A-B is offered for 1-3 units per semester and is mandatory in order to receive honors in the major. The course is sequential with a grade of In Progress or “IP” for the “A” portion and the final grade assigned for both semesters at the end of the “B” portion.

Minor Program

There is no minor program in Psychology.

In addition to the University, campus, and college requirements, listed on the College Requirements tab, students must fulfill the below requirements specific to their major program.

General Guidelines

1. All courses taken to fulfill the major requirements below must be taken for graded credit, other than courses listed which are offered on a Pass/No Pass basis only. Other exceptions to this requirement are noted as applicable.
2. No more than one upper division course may be used to simultaneously fulfill requirements for a student's major and minor programs, with the exception of minors offered outside of the College of Letters & Science.
3. A minimum grade point average (GPA) of 2.0 must be maintained in both upper and lower division courses used to fulfill the major requirements.

For information regarding residence requirements and unit requirements, please see the College Requirements tab.
**Please contact the students services offices (http://psychology.berkeley.edu/students/undergraduate-program/academic-advising) or make an appointment with your student services adviser (http://psychology.berkeley.edu/students/undergraduate-program/major-advising) for any questions related to these requirements.**

**Lower Division Prerequisites: Plan I**  
Applicable to freshman admitted to UC Berkeley fall 2016 or later and transfers admitted spring 2017 or later.

**Psychology**

<tr>
<td>PSYCH 134</td>
<td>Health Psychology</td>
</tr>
<tr>
<td>PSYCH 135</td>
<td>Treating Mental Illness: Development, Evaluation, and Dissemination</td>
</tr>
</tbody>
</table>

**Tier III Requirements:**

Select three additional upper division psychology courses, numbered between PSYCH 104-PSYCH 182, of at least 3 units each. Any excess survey courses will count toward Tier III. The course number 192 is used to designate a new class and may apply toward one of the electives.  

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT C8</td>
<td>Foundations of Data Science</td>
</tr>
</tbody>
</table>

1. AP Psychology with a score of 4 or 5 will satisfy this prerequisite.
2. AP Biology with a score of 4 or 5 will satisfy one biological science prerequisite from the first section only (PSYCH C61 or PSYCH C64 will not be satisfied).
Upper Division Requirements: Plan II
Applicable to freshman admitted fall 2014 or later and transfers admitted fall 2015 or later.

Tier II Requirements:
A minimum of five courses from the following, with at least one in each area:

**Biological**
- PSYCH 110 Introduction to Biological Psychology
- PSYCH 125 The Developing Brain
- PSYCH C127 Cognitive Neuroscience (cross-listed with COG SCI C127)

**Cognitive & Developmental**
- PSYCH C120 Basic Issues in Cognition (cross-listed with COG SCI C100)
- PSYCH C126 Perception (cross-listed with COG SCI C126)
- PSYCH 140 Developmental Psychology
- PSYCH C143 Language Acquisition (cross-listed with LINGUIS C146)

**Social/Personality**
- PSYCH 150 Psychology of Personality
- PSYCH 156 Human Emotion
- PSYCH 160 Social Psychology
- PSYCH 166AC Cultural Psychology
- PSYCH 180 Industrial-Organizational Psychology

**Clinical**
- PSYCH 130 Clinical Psychology
- PSYCH 131 Developmental Psychopathology
- PSYCH 134 Health Psychology
- PSYCH 135 Treating Mental illness: Development, Evaluation, and Dissemination

Tier III Requirements:
Select three additional upper division psychology courses, numbered between PSYCH 104-PSYCH 182, of at least 3 units each.1, 2

1 Only one of these courses may be a seminar (courses ending in "8").
2 PSYCH 102, PSYCH H194A / PSYCH H194B, PSYCH H195A / PSYCH H195B, PSYCH 197, PSYCH 198 & PSYCH 199 do not count toward coursework requirements.

Undergraduate students in the College of Letters & Science must fulfill the following requirements in addition to those required by their major program.

For detailed lists of courses that fulfill college requirements, please review the College of Letters & Sciences (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science) page in this Guide.

Entry Level Writing (http://writing.berkeley.edu/node/78)
All students who will enter the University of California as freshmen must demonstrate their command of the English language by fulfilling the Entry Level Writing requirement. Fulfillment of this requirement is also a prerequisite to enrollment in all reading and composition courses at UC Berkeley.

American History and American Institutions (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/american-history-institutions-requirement)
The American History and Institutions requirements are based on the principle that a US resident graduated from an American university should have an understanding of the history and governmental institutions of the United States.

American Cultures (http://americancultures.berkeley.edu/students/courses)
American Cultures is the one requirement that all undergraduate students at Cal need to take and pass in order to graduate. The requirement offers an exciting intellectual environment centered on the study of race, ethnicity and culture of the United States. AC courses offer students opportunities to be part of research-led, highly accomplished teaching environments, grappling with the complexity of American Culture.

Quantitative Reasoning
The Quantitative Reasoning requirement is designed to ensure that students graduate with basic understanding and competency in math, statistics, or computer science. The requirement may be satisfied by exam or by taking an approved course.

Foreign Language
The Foreign Language requirement may be satisfied by demonstrating proficiency in reading comprehension, writing, and conversation in a foreign language equivalent to the second semester college level, either by passing an exam or by completing approved course work.

Reading and Composition
In order to provide a solid foundation in reading, writing and critical thinking the College requires two semesters of lower division work in composition in sequence. Students must complete a first-level reading and composition course by the end of their second semester and a second-level course by the end of their fourth semester.

Breadth Requirements
The undergraduate breadth requirements provide Berkeley students with a rich and varied educational experience outside of their major program. As the foundation of a liberal arts education, breadth courses give students a view into the intellectual life of the University while introducing them to a multitude of perspectives and approaches to research and scholarship. Engaging students in new disciplines and with peers from other majors, the breadth experience strengthens interdisciplinary connections and context that prepares Berkeley graduates to understand and solve the complex issues of their day.

Unit Requirements
- 120 total units, including at least 60 L&S units
- Of the 120 units, 36 must be upper division units
- Of the 36 upper division units, 6 must be taken in courses offered outside your major department
Residence Requirements

For units to be considered in “residence,” you must be registered in courses on the Berkeley campus as a student in the College of Letters & Science. Most students automatically fulfill the residence requirement by attending classes here for four years. In general, there is no need to be concerned about this requirement, unless you go abroad for a semester or year or want to take courses at another institution or through UC Extension during your senior year. In these cases, you should make an appointment to meet an adviser to determine how you can meet the Senior Residence Requirement.

Note: Courses taken through UC Extension do not count toward residence.

Senior Residence Requirement

After you become a senior (with 90 semester units earned toward your BA degree), you must complete at least 24 of the remaining 30 units in residence in at least two semesters. To count as residence, a semester must consist of at least 6 passed units. Intercampus Visitor, EAP, and UC Berkeley-Washington Program (UCDC) units are excluded.

You may use a Berkeley Summer Session to satisfy one semester of the Senior Residence requirement, provided that you successfully complete 6 units of course work in the Summer Session and that you have been enrolled previously in the college.

Modified Senior Residence Requirement

Participants in the UC Education Abroad Program (EAP) or the UC Berkeley Washington Program (UCDC) may meet a Modified Senior Residence requirement by completing 24 (excluding EAP) of their final 60 semester units in residence. At least 12 of these 24 units must be completed after you have completed 90 units.

Upper Division Residence Requirement

You must complete in residence a minimum of 18 units of upper division courses (excluding EAP units), 12 of which must satisfy the requirements for your major.

Students are encouraged to familiarize themselves with the Psychology major requirements before making a program plan. For more detailed information regarding the courses listed below (e.g., elective information, GPA requirements, etc.), see the College Requirements and Major Requirements tabs.

Total Units: 121

1. This is a sample program plan. This plan assumes that the student has completed the Entry Level Writing and American History and Institutions requirements prior to admission requirements prior to admission.
2. Students are strongly advised to work with an academic adviser to determine a personal program plan. Your program plan will differ depending on previous credit received, your course schedule, and available offerings.
3. Declare major the spring term of second year.
4. Students should also understand that while L&S Breadth requirements can be shuffled around within the plan, that is not the case for the lower-division prerequisites for the major. For majors with additional requirements for declaration, there is a limited window of eligibility for guaranteed admission.
5. All courses are subject to change every semester. Students must check the Online Schedule of Classes (http://schedule.berkeley.edu) for the most up-to-date course offerings.

Accelerated Program Plans

For students considering graduating in less than four years, it’s important to acknowledge the reasons to undertake such a plan of study. While there are advantages to pursuing a three-year degree plan such as reducing financial burdens, they are not for everyone and do involve sacrifices; especially with respect to participating in co-curricular activities, depth of study, and summer internships, which typically lead to jobs upon graduation. All things considered, please see the tables for three and three and a half year degree options.
Mission

The Psychology Department at Berkeley reflects the diversity of the discipline's mission covering six key areas of research: Behavioral and Systems Neuroscience; Clinical Science; Cognition; Cognitive Neuroscience; Developmental, and Social-Personality Psychology. Despite the existence of these specialization areas, the program learning goals focus on fostering methodological, statistical, and critical thinking skills that are not tied to any one particular content area in psychology but are relevant for all of them.

Most of the program level goals are introduced in PSYCH 1 General Psychology These goals are extended and reinforced in a majority of the core courses. These include PSYCH 101 Research and Data Analysis in Psychology, required of all majors, and the upper division Tier II courses that survey the major fields of psychology. There are several options to fulfill core coursework in each area and the following is a sampling of courses that fulfill the Tier II requirements: PSYCH 110 Introduction to Biological Psychology, PSYCH 120 Basic Issues in Cognition, PSYCH 130 Clinical Psychology, PSYCH 140 Developmental Psychology PSYCH 150 Psychology of Personality PSYCH 160 Social Psychology. The program is designed to ensure that all students gain broad exposure to the field of psychology. In addition, students are encouraged to develop a deeper understanding of at least one major content area in psychology.

Learning Goals for the Major

1. Understand basic concepts that characterize psychology as a field of scientific inquiry, and appreciate the various subfields that form the discipline as well as things that differentiate it from other related disciplines
2. Develop an understanding of the central questions/issues in contemporary psychology as well as a historical perspective of psychological theories and key empirical data
3. Develop a thorough understanding of one of the major content areas of psychology (i.e., Social/Personality, Developmental, Clinical, Cognitive, Biological)
4. Develop skills to critically evaluate the presentation of scientific ideas and research in original scientific papers as well as in the popular media.
5. Become familiar with research methods used in psychological research, and become proficient in basic concepts of statistical analyses and familiar with more advanced methods in data analyses and modeling
6. Learn to develop, articulate, and communicate, both orally and in written form, a testable hypothesis, or an argument drawing from an existing body of literature.
7. Apply a psychological principle to an everyday problem, or take an everyday problem and identify the relevant psychological mechanisms/ issues
PSYCH W1 General Psychology 3 Units
Terms offered: Fall 2017, Summer 2017 8 Week Session, Spring 2017 8 Week Session
Introduction to the principal areas, problems, and concepts of psychology.
General Psychology: Read More [+]

Rules & Requirements
Credit Restrictions: Students will receive no credit for Psychology W1 after completing Psychology 1 or N1. A deficient grade in Psychology 1 or N1 maybe removed by taking Psychology W1.

Repeat rules: When receiving a failing grade in this course or a course equivalent (i.e. Psych 1 or N1).

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of web-based lecture per week
Summer: 8 weeks - 6 hours of web-based lecture per week

Online: This is an online course.

Additional Details
Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Kihlstrom

General Psychology: Read Less [-]

PSYCH 2 Principles of Psychology 3 Units
Terms offered: Fall 2017, Spring 2017, Fall 2016
An overview of psychology for students who will not major in the field. This course satisfies the prerequisite for upper division decade courses.
Principles of Psychology: Read More [+]

Rules & Requirements
Credit Restrictions: Students will not receive credit for 2 after taking 1.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Principles of Psychology: Read Less [-]

PSYCH 3 Introduction to How the Brain Works 1 Unit
Terms offered: Summer 2017 Second 6 Week Session, Summer 2016 10 Week Session, Summer 2016 Second 6 Week Session
This course will give a rigorous yet accessible overview of our current understanding of how the brain works and how it is altered by experience. Specifically, the class provides: an introduction to the structure and function of the sensory and motor systems; discussions of disorders and phenomena such as blindsight, synaesthesia, color blindness, and phantom limbs; and a lecture with presentation of classical experiments on the capacity of the young and adult brain for plasticity and learning.
Introduction to How the Brain Works: Read More [+]

Rules & Requirements
Prerequisites: A year of college-level general biology for majors

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture per week
Summer: 6 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Elias Aboujaoude

Introduction to How the Brain Works: Read Less [-]

PSYCH 5 Technology vs. Psychology: The Internet Revolution and the Rise of the Virtual Self 2 Units
Terms offered: Summer 2017 Second 6 Week Session, Fall 1995
Most people have an online alter ego that is stronger and sexier but also angrier, more impulsive, and less ethical. These traits can become incorporated into offline personality, turning us into our avatar. Other psychological damage comes from the lack of online privacy and our new relationship with information. But the “Net” effect is not all bad; technology can also contribute to psychological wellbeing and make possible new treatments, including computerized therapy and virtual reality exposure therapy.
Technology vs. Psychology: The Internet Revolution and the Rise of the Virtual Self: Read More [+]

Hours & Format
Summer: 6 weeks - 5 hours of lecture per week

Additional Details
Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Elias Aboujaoude

Technology vs. Psychology: The Internet Revolution and the Rise of the Virtual Self: Read Less [-]
PSYCH 6 Stress and Coping 2 Units
Terms offered: Summer 2017 Second 6 Week Session, Summer 2016 10 Week Session, Summer 2016 Second 6 Week Session
This course is designed to provide students with an in-depth analysis of the various areas within the field of psychology that address topics related to stress and coping. In particular, we will cover the biological, social, personality, cognitive, and clinical factors that play a role in the development of stress and subsequent coping techniques that can be used to deal with stress. The class will have a strong focus on the empirical findings relating to the subject.
Rules & Requirements
Prerequisites: Psychology 1, N1, W1, 2, or equivalent
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week
Summer: 6 weeks - 5 hours of lecture per week
Additional Details
Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

PSYCH 7 The Person in Big Data 2 Units
Terms offered: Summer 2017 Second 6 Week Session, Summer 2016 10 Week Session, Summer 2016 Second 6 Week Session
This course will introduce students to the basic principles and methods of personality and social psychology as applied to a rapidly growing topic of modern society—the collection and analysis of online social “big data.” Students will learn about the ways in which big data has historically been defined, collected, and utilized, as well as fundamental concepts in person perception and social behavior that are relevant to topics of big data collection, analysis, and interpretation.
The Person in Big Data: Read More [+]
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week
Summer: 6 weeks - 5 hours of lecture per week
Additional Details
Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

PSYCH 8 Music and the Brain 2 Units
Terms offered: Summer 2015 10 Week Session, Summer 2015 Second 6 Week Session
This course will explore mental processes that allow listeners to perceive music and performers to produce it. We will compare music from various traditions to examine shared cognitive principles and emotional responses; comparisons to language will highlight neural specializations for music. Developmental psychology will inform discussion of learned vs. innate components of musical behavior. Students will design experiments to test hypotheses relating to music cognition.
Rules & Requirements
Prerequisites: Psychology 1, N1, W1, 2, or equivalent
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week
Summer: 6 weeks - 5 hours of lecture per week
Additional Details
Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

PSYCH 9 Changing Behavior: Lessons from a Dog Trainer 1 Unit
Terms offered: Summer 2017 Second 6 Week Session
In this course, we will examine behavior change—in you, and in those others you wish you could change—by looking at basic principles that apply across species: operant conditioning, classical conditioning, motivation, stress and development. Animal trainers rely on very specific principles when modifying behavior, and those principles apply to every animal, human and non-human animals alike. Come learn what training animals can tell you about your own life, learning, motivation and habits!
Changing Behavior: Lessons from a Dog Trainer: Read More [+]
Hours & Format
Summer: 6 weeks - 2.5 hours of lecture per week
Additional Details
Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Cook

PSYCH 10 Research and Data Analysis in Psychology 4 Units
Terms offered: Fall 2017, Summer 2017 8 Week Session, Spring 2017
The class covers research design, statistical reasoning, and statistical methods appropriate for psychological research. Topics covered in research design include the scientific method, experimental versus correlational designs, controls and placebos, within and between subject designs and temporal or sequence effects. Topics covered in statistics include descriptive versus inferential statistics, linear regression and correlation and univariate statistical tests: t-test, one way and two-way ANOVA, chi-square test. The class also introduces non-parametric tests and modeling. Prospective Psychology majors need to take this course to be admitted to the major.
Research and Data Analysis in Psychology: Read More [+]

Rules & Requirements
Prerequisites: Completion of the general psychology prerequisite (1, N1, or W1) and one of the following quantitative prerequisites: Math 10A-B, Statistics 2, or consent of instructor
Credit Restrictions: Students will not receive credit for Psych 10 after having completed Psych 101.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of discussion per week
Summer: 8 weeks - 6 hours of lecture and 4 hours of discussion per week

Additional Details
Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

PSYCH 48 Brain Development and Aging 1 Unit
Terms offered: Summer 2013 10 Week Session, Summer 2013 First 6 Week Session
This is an introductory survey course on brain and cognitive development. It gives an overview of brain structure and function and how it changes throughout life. Topics include: effect of pre-natal maternal and paternal behavior in brain development; critical periods; experience-dependent changes in the brain; the adolescent brain; and the aging brain. We will also discuss developmental disorders such as Down syndrome and the putative benefits of exercise and diet to brain health.

Rules & Requirements
Prerequisites: One year of college level biology
Credit Restrictions: Students will receive no credit for Psychology 48 after taking Psychology 125.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture per week
Summer: 6 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Psychology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Brain Development and Aging: Read Less [-]
**PSYCH C61 Brain, Mind, and Behavior 3 Units**
Terms offered: Spring 2017, Spring 2016, Spring 2015
Introduction to human brain mechanisms of sensation, movement, perception, thinking, learning, memory, and emotion in terms of anatomy, physiology, and chemistry of the nervous system in health and disease. Intended for students in the humanities and social sciences and others not majoring in the biological sciences.

**Rules & Requirements**
Credit Restrictions: Students will receive no credit for Molecular and Cell Biology/Psychology C61 after taking Molecular and Cell Biology 61, N61, W61, Molecular and Cell Biology 104, C100A/Chemistry C130, Molecular and Cell Biology 110, 130A, 136, 160, C160/Neuroscience C160 or Integrative Biology 132. A deficient grade in Molecular and Cell Biology 61, N61, or W61 can be removed with Molecular and Cell Biology C61. Students cannot credit for both MCELLBI/PSYCH C61 AND Psych 110.

**Hours & Format**
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Additional Details**
Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

**PSYCH C64 Exploring the Brain: Introduction to Neuroscience 3 Units**
Terms offered: Summer 2017 8 Week Session, Summer 2016 10 Week Session, Summer 2016 8 Week Session, Fall 2015
This course will introduce lower division undergraduates to the fundamentals of neuroscience. The first part of the course covers basic membrane properties, synapses, action potentials, chemical and electrical synaptic interactions, receptor potentials, and receptor proteins. The second part of the course covers networks in invertebrates, memory and learning behavior, modulation, vertebrate brain and spinal cord, retina, visual cortex architecture, hierarchy, development, and higher cortical centers.

**Rules & Requirements**
Prerequisites: High school chemistry or Chemistry 1A; high school biology or Biology 1A. Biology 1AL is not required
Credit Restrictions: Students will receive no credit for Molecular and Cell Biology/Psychology C64 after taking Molecular and Cell Biology C61/Letters and Science C30W, Molecular and Cell Biology C104, 100A/Chemistry C130, Molecular and Cell Biology 110, 130A, 136, 160, C160/Neuroscience C160, or Integrative Biology 132. Students may remove a deficient grade in Molecular and Cell Biology C64/Psychology C64 after Molecular and Cell Biology 64.

**Hours & Format**
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week
Summer: 8 weeks - 4 hours of lecture and 2 hours of discussion per week

**Additional Details**
Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Caporale

PSYCH C116 Hormones and Behavior 3 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015
This course provides a comprehensive overview of behavioral endocrinology beginning with hormone production and actions on target issues and continuing with an exploration of a variety of behaviors and their hormonal regulation/consequences. The course uses a comparative approach to examine the reciprocal interactions between the neuroendocrine system and behavior, considering the effects of hormone on development and adult behavior in addition to how behavior regulates endocrine physiology. While much of the course focuses on non-human vertebrate species, the relevance to humans is explored where appropriate. Topics include sexual differentiation and sex differences in behavior, reproductive, parental, and aggressive behaviors, and hormonal and behavioral homeostatic regulation.
Hormones and Behavior: Read More [+]
Rules & Requirements
Prerequisites: Completion of biological prerequisites for the major and consent of instructor; a course in mammalian physiology recommended
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week
Additional Details
Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

PSYCH 125 The Developing Brain 3 Units
Terms offered: Spring 2016, Fall 2014, Fall 2012
What are the changes in brain structure and function that underlie improvements in cognitive abilities over childhood and adolescence? Or, coming from a different perspective, what insights can we gain regarding the neural basis of cognition by examining how the brain develops? And how are such findings relevant for medicine, education, and the law? The cutting-edge new field of developmental cognitive neuroscience is beginning to address these and other questions. This course will constitute an overview of current research and methods in this field, focusing on both typically and atypically developing children and adolescents. There is no textbook for this course; all readings will be primary sources (e.g., journal articles).
Rules & Requirements
Prerequisites: Recommend prior coursework in neuroscience, such as Psych/MCB c61, Psych 110, Psych 117, or Psych/COGSCI C127
Credit Restrictions: Students will receive no credit for 125 after taking 192 Fall 2007. Students will not receive credit for Psychology 125 after taking Psychology N125. A failing grade in Psychology N125 may be removed by taking Psychology 125.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week
Additional Details
Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Bunge
The Developing Brain: Read More [+]

PSYCH C126 Perception 3 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015
An introduction to principal theoretical constructs and experimental procedures in visual and auditory perception. Topics will include psychophysics; perception of color, space, shape, and motion; pattern recognition and perceptual attention.
Rules & Requirements
Prerequisites: Consent of instructor. 101 recommended
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week
Additional Details
Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Also listed as: COG SCI C126
Perception: Read More [+]

Perception: Read Less [-]
PSYCH C127 Cognitive Neuroscience 3 Units
Terms offered: Fall 2017, Spring 2017, Fall 2016
This course will examine research investigating the neurological basis of cognition. Material covered will include the study of brain-injured patients, neurophysiological research in animals, and the study of normal cognitive processes in humans with non-invasive behavioral and physiological techniques such as functional Magnetic Resonance Imaging (fMRI), electroencephalography (EEG), and transcranial magnetic stimulation (TMS). Topics to be covered include perception, attention, memory, language, motor control, executive control, and emotion.
Cognitive Neuroscience: Read More [+]

Rules & Requirements
Prerequisites: Psych/MCB C61 OR Psych 110, or Psych C120/Cog Sci C100, and relevant prerequisites. Courses may be taken simultaneously with Psych C127. Enrollment limited to students who are declared Psych, CogSci, MCB, or IB majors, or by permission of the instructor if the student has declared another major

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

PSYCH 135 Treating Mental Illness: Development, Evaluation, and Dissemination
3 Units
Terms offered: Fall 2016, Spring 2016
Although progress has been made in developing and disseminating evidence-based treatments for most forms of mental illness, there are still huge gaps in our knowledge base. Coverage of serious mental illness with adequate and disseminable intervention strategies is all too limited. Hence, there is a great need for the next generation of clinical scientists to contribute to the mission of treatment development for mental illness. In this course we will learn about, and critique, treatment development models. We will review the steps in treatment development spanning from the study of mechanisms on to proof of concept and to establishing the feasibility of novel treatment ideas.

Rules & Requirements
Credit Restrictions: Students will receive no credit for Psychology 135 after taking Psychology N135. A failing grade in Psychology N135 can be removed by taking Psychology 135.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details

PSYCH 145 Relationships: Development and
Clinical Implications of Intimate Ties 3 Units
Terms offered: Summer 2002 10 Week Session, Summer 2001 10 Week Session, Summer 2000 10 Week Session
This lecture course focuses on the close relationships that most
individuals -- usually, beginning in infancy -- will have formed during
their lifetime, as well as the way such relationships can favorably or
unfavorably influence an individual's emotions and affect those of others.
From infancy through young adulthood and old age, secure vs. insecure
(e.g., ambivalent, avoidant, or unpredictable/frightening) relationships
affect not only an individual's happiness and general well-being, but also
the eventual presence or absence of clinical symptomatology. Favorable
vs. unfavorable relationships with parents, peers, close friends and
romantic partners will be discussed, together with their consequences for
psychological health and overall

Relationships: Development and Clinical Implications of Intimate Ties: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of
discussion per week

Additional Details

Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

PSYCH 146 Developmental and Biological
Processes in Attachment 3 Units
Terms offered: Spring 2017, Spring 2016, Fall 2014
This course on attachment theory provides an integrative (evolutionary/
genetic/experiential) approach to studying secure vs. insecure parent-
child relationships; their precursors in parental rearing patterns; and
favorable vs. unfavorable sequelae. Adult life-history narratives indicative
of secure vs. insecure adult attachment have been found associated with
care-giving of offspring.

Developmental and Biological Processes in Attachment: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of
discussion per week

PSYCH 149A Early Learning: Engaging Interactions and Environments 3 Units
Terms offered: Prior to 2007
A new lecture and practice course designed to increase participants' knowledge and skills in providing preschool children with high quality early learning experiences. Using the research-based CLASS© tool as a framework, students learn how to engage in more effective teacher-child interactions and create environments that promote young children's social-emotional and cognitive development. Observation and analysis of classroom practices, through video recording, enable each student to receive individualized feedback from the instructor, as well as from peers. The focus is on professional growth, including developing abilities to support children's cultural and linguistic diversity.
Early Learning: Engaging Interactions and Environments: Read More [+]

Objectives Outcomes

Course Objectives: Participants will (further) develop their skills in facilitating Social and Emotional Support, Well-Organized Classrooms, Instructional Interactions. The course is grouped into five modules using these three areas as focal points. Each class meeting will give students the opportunity to know, see, do, and reflect, as the core components of effective and intentional interactions with young children.

Rules & Requirements

Prerequisites: No previous coursework needed, but students must be currently working in an early education classroom to provide regular access to interacting with young children.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Summer: 6 weeks - 7.5 hours of lecture per week

Additional Details
Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Early Learning: Engaging Interactions and Environments: Read Less [-]
**PSYCH 150 Psychology of Personality 3 Units**

PSYCH 162 Human Happiness 3 Units
Terms offered: Summer 2011 10 Week Session, Summer 2011 Second 6 Week Session, Summer 2009 Second 6 Week Session
This course will take an interdisciplinary approach to an understanding of happiness. The first part of the course will be devoted to the different treatments of happiness in the world's philosophical traditions, focusing up close on conceptions or the good life in classical Greek and Judeo-Christian thought, the great traditions in East Asian thought (Taoism, Buddhism, Confucianism), and ideas about happiness that emerged more recently in the age of Enlightenment. With these different perspectives as a framework, the course will then turn to treatments of happiness in the behavioral sciences, evolutionary scholarship, and neuroscience. Special emphasis will be given to understanding how happiness arises in experiences of the moral emotions, including gratitude, compassion, reverence and awe, as well as aesthetic emotions like humor and beauty.
Human Happiness: Read More [+]

**PSYCH N162 Human Happiness 3 Units**
Terms offered: Summer 2014 10 Week Session, Summer 2014 First 6 Week Session
This course will take an interdisciplinary approach to an understanding of happiness. We will first review the different treatments of happiness in the world's philosophical traditions: conceptions of the good life in classical Greek and Judeo-Christian thought, the great East Asian philosophies, and ideas about happiness that emerged in the age of Enlightenment. With these different perspectives as a framework, the course will turn to treatments of happiness in the behavioral sciences, evolutionary scholarship, and neuroscience. Special Emphasis will be given to understanding how happiness arises in experiences of the moral emotions, including gratitude, compassion, reverence and awe, and aesthetic emotions like humor and beauty.

Human Happiness: Read More [+]

**Rules & Requirements**

**Prerequisites:** Psychology 160 or consent of instructor

**Credit Restrictions:** Students will receive no credit for Psychology N162 after taking Psychology 162, or Psychology C162/Letters and Science C160V. A deficient grade in Psychology 162 may be removed by taking Psychology N162.

**Hours & Format**

*Summer:* 6 weeks - 7.5 hours of lecture per week

**Additional Details**

**Subject/Course Level:** Psychology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**PSYCH 165 Psychology of Creativity 3 Units**
Terms offered: Fall 2012, Fall 2010
This is a course on creativity, both at the individual and the group level. We will consider traits of highly creative individuals (vs. less creative individuals) and the ways in which they think. We will also investigate the ways in which influence processes affect individual creativity and will then focus on group creativity, including techniques by which creativity is hindered or stimulated. Finally, we will consider applications from organizations as we consider cultures in which creativity thrives. Throughout the course, discussion will be encouraged and we will also do some experiential exercises. The course will be a combination of lecture, discussion, and experiential learning.

Psychology of Creativity: Read More [+]

**Rules & Requirements**

PSYCH 166AC Cultural Psychology 3 Units  
Terms offered: Summer 2017 Second 6 Week Session, Spring 2017, Spring 2015  
The course will review research on culture, race, and ethnicity and will consider the implications of these findings for our understanding of race, culture, and ethnicity in American society. Mounting evidence suggests that psychological processes are culture-specific, theory-driven, and context-dependent. This course will focus on the effects that theories of mind, person, self, and social institutions have on human cognition, motivation, emotion, and social interactions in American society. Students will gain a better appreciation of the ways that cultural traditions and social practices regulate and transform psychological functioning. Simply, the course is about how culture affects psyche and how psyche affects culture.  

Cultural Psychology: Read More [+]

Rules & Requirements  
Prerequisites: 1; 160 is recommended  
Requirements this course satisfies: Satisfies the American Cultures requirement  

Hours & Format  
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week  
Summer: 6 weeks - 7.5 hours of lecture and 0 hours of discussion per week

PSYCH 167AC Stigma and Prejudice 3 Units  
Terms offered: Fall 2017, Fall 2015, Fall 2014  
Traditionally, research on prejudice and stereotyping has focused on the psychological mechanisms that lead people to be biased against others. Recent research has begun to shed light on the psychological legacy of prejudice and stereotyping for their targets. This course will review the major contributions of each of these literatures, providing students with a broad understanding of both classic and current issues in the field. The course will be divided into three sections: bias (i.e., the perpetrator's perspective), stigma (i.e., the target's perspective), and intergroup relations.

PSYCH 169 Love & Close Relationships 3 Units
Terms offered: Fall 2017, Spring 2017
This course will explore the social, biological and neurological attributes of love and close relationships. As this is an experiential course, students are expected to apply their learning through active engagement in the course material.

Course Objectives: This course will afford UC Berkeley undergraduate students opportunities to acquire a scientific understanding of love and to engage in experiential exercises of healthy interpersonal relating.

Student Learning Outcomes: Apply course material through introspection, self-exploration, and intentional goal setting. Be able to identify key components of love and human attraction. Develop an in-depth knowledge of several theories of love and human attachment.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

PSYCH 180 Industrial-Organizational Psychology 3 Units
Terms offered: Summer 2013 10 Week Session, Summer 2013 First 6 Week Session, Fall 2005
Primarily for majors. Introduction to the field of industrial psychology, covering fundamental theory and concepts in personnel and social aspects in the field. Concerned with the processes involved in developing and maintaining organizations.

Course Objectives: This course will afford UC Berkeley undergraduate students opportunities to acquire a scientific understanding of love and to engage in experiential exercises of healthy interpersonal relating.

Student Learning Outcomes: Apply course material through introspection, self-exploration, and intentional goal setting. Be able to identify key components of love and human attraction. Develop an in-depth knowledge of several theories of love and human attachment.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week
Summer: 6 weeks - 5 hours of lecture per week

Additional Details
Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
PSYCH 190A Early Learning: Engaging Interactions and Environments 3 Units
Terms offered: Fall 2015
A new lecture and practice course designed to increase participants’ knowledge and skills in providing preschool children with high quality early learning experiences. Using the research-based CLASS® tool as a framework, students learn how to engage in more effective teacher-child interactions and create environments that promote young children’s social-emotional and cognitive development. Observation and analysis of classroom practices, through video recording, enable each student to receive individualized feedback from the instructor, as well as from peers. The focus is on professional growth, including developing abilities to support children’s cultural and linguistic diversity.

Early Learning: Engaging Interactions and Environments: Read More [+]

Objectives
Course Objectives: Participants will (further) develop their skills in facilitating Social and Emotional Support, Well-Organized Classrooms, Instructional Interactions. The course is grouped into five modules using these three areas as focal points. Each class meeting will give students the opportunity to know, see, do, and reflect, as the core components of effective and intentional interactions with young children.

Rules & Requirements
Prerequisites: No previous coursework needed, but students must be currently working in an early education classroom to provide regular access to interacting with young children.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Hinshaw

PSYCH 192 Special Topics in Psychology 3 Units
Terms offered: Fall 2017, Fall 2016, Spring 2016
Course examines current problems and issues in psychology.

Special Topics in Psychology: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes.

PSYCH 192P Psychology Post Baccalaureate Capstone 3 Units
Terms offered: Fall 2017, Spring 2017, Fall 2016
The Psychology Post Baccalaureate Program at UC Berkeley is intended to serve as a training program for students who have interest in pursuing graduate degrees in Psychology but who are lacking necessary academic training and research experience. In addition to the required course and lab work, Post Baccalaureate students are required to complete a two-part research learning project, called The Capstone Experience. The Capstone Experience consists of two components: an applied written submission and a formal research presentation.

Objectives
Course Objectives: Students will receive training in APA style writing and presentation skills.
Student Learning Outcomes: Students will learn APA writing and presentation styles.

Rules & Requirements
Prerequisites: Consent of instructor
Credit Restrictions: Course may not be repeated for credit.

Hours & Format
Fall and/or spring: 15 weeks - 9 hours of independent study per week
Summer: 10 weeks - 13.5 hours of independent study per week

Additional Details
Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Alternative to final exam.

PSYCH H194A Honors Seminar 2 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
In the fall semester the seminar will concentrate on issues of research design, ethics, and data analysis using statistical packages. The spring semester will focus on oral and written presentations of the thesis projects and feedback on thesis drafts.

Objectives
Course Objectives: Students will receive training in APA style writing and presentation skills.
Student Learning Outcomes: Students will learn APA writing and presentation styles.

Rules & Requirements
Prerequisites: Consent of instructor
Credit Restrictions: Course may not be repeated for credit.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Psychology/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
PSYCH H195B Special Study for Honors Candidates 1 - 3 Units
Terms offered: Fall 2017, Fall 2016, Spring 2015
Independent study and preparation of an honors thesis under the supervision of a faculty member.
Special Study for Honors Candidates: Read More [+]
Rules & Requirements
Prerequisites: Open only to senior psychology majors in the Honors Program
Repeat rules: Course may be repeated for a maximum of 6 units. Course may be repeated for a maximum of 6 units.
