Society and Environment

Bachelor of Science (BS)

Social and environmental problems are deeply intertwined. This major introduces students to the main approaches and theory for environmental social sciences including how social science tools can be applied to environmental problems and how social science theories contribute to understanding environmental problems. At the upper division level, there are three major areas of concentration. Students are exposed to all three areas and choose to focus on one: US Environmental Policy and Management, Global Environmental Politics, or Justice and Sustainability.

Society and Environment graduates are well-prepared for careers in fields such as environmental consulting, education, health, or law; community, urban, or regional planning; and other related areas of environmentalism in public agencies, nonprofit conservation organizations, and private companies. Graduates are well-qualified for a variety of graduate programs, including law school.

Admission to the Major

Advice on admission for freshmen and transfer students can be found on the CNR Admissions Guide (http://guide.berkeley.edu/undergraduate/colleges-schools/natural-resources/admissionstext) or on the CNR Prospective Student website (https://nature.berkeley.edu/prospective-students). Freshman students may apply directly to the major, or they may select the College of Natural Resource’s undeclared option and declare the major by the end of their fourth semester. Transfer students may apply directly to the major through the UC application.

Information for current Berkeley students who would like to declare the major after admission, including information on a change of major or change of college, please see chapter 6 of the College of Natural Resources Undergraduate Student Handbook (https://nature.berkeley.edu/handbook). (https://nature.berkeley.edu/handbook)

Honors Program

Students with a cumulative grade point average (GPA) of 3.6 or higher may enroll in the College of Natural Resources honors program (H196) once they have reached upper division standing. To fulfill the program requirements, students design, conduct, and report on an individual research project working with a faculty sponsor. For further information on the honors program, please see the College of Natural Resources website (http://nature.berkeley.edu/site/honors_program.php).

Minor Program

There is no minor program in Society and Environment.

Other Majors and Minors Offered by the Department of Environmental Science, Policy, and Management

Conservation and Resource Studies (http://guide.berkeley.edu/undergraduate/degree-programs/conservation-resource-studies) (Major and Minor)

Environmental Sciences (http://guide.berkeley.edu/undergraduate/degree-programs/environmental-sciences) (Major only)

Ecosystem Management & Forestry (http://guide.berkeley.edu/undergraduate/degree-programs/forestry-natural-resources) (Major and Minor)

Molecular Environmental Biology (http://guide.berkeley.edu/undergraduate/degree-programs/molecular-environmental-biology) (Major only)

Food Systems (http://guide.berkeley.edu/undergraduate/degree-programs/food-systems) (Minor only)

In addition to the University, campus, and college requirements listed on the College Requirements tab, students must fulfill the below requirements specific to their major program.

General Guidelines

1. All courses taken to fulfill the major requirements below must be taken for letter-graded credit, other than courses listed which are offered on a Pass/No Pass basis only. Other exceptions to this requirement are noted as applicable.

2. A minimum cumulative grade point average (GPA) of 2.0 is required.

3. A minimum GPA of 2.0 in upper-division major requirements is required.

4. At least 15 of the 36 required upper division units must be taken in the College of Natural Resources (EEP, ERG, ES, ESPM, NAT RES, NST, PMB).

5. A maximum of 16 units of independent study (courses numbered 97, 98, 99, 197, 198, and 199) may count toward graduation, with a maximum of 4 units of independent study per semester.

6. No more than 1/3 of the total units attempted at UC Berkeley may be taken Pass/No Pass. This includes units in the Education Abroad Program and UC Intercampus Visitor or Exchange Programs.

7. A maximum of 4 units of physical education courses will count toward graduation.

For information regarding residency requirements and unit requirements, please see the College Requirements tab.

Lower Division Requirements

ESPM Environmental Science Core (cannot overlap with breadth)

Select one of the following: 4

- ESPM 2 The Biosphere [3]
- ESPM 6 Environmental Biology [3]
- ESPM 15 Introduction to Environmental Sciences [3]

L & S/ESPM C46 Climate Change and the Future of California [4]

ESPM Social Science Core (cannot overlap with breadth)

Select one of the following: 4

- ESPM C12/ENGLISH C77 Introduction to Environmental Studies [4]
**Five-Course Breadth of Knowledge Requirement**

Select one course from each of the five breadth categories below. Click here (http://ls.advise.berkeley.edu/requirement/7breadth.html) for complete listings. The American Cultures requirement may overlap with any of the following courses. These courses cannot overlap with other requirements.

- Social & Behavioral Sciences (3-4 units)
- International Studies (3-4 units)
- Physical Sciences (3-4 units)
- Arts & Literature, Historical Studies, or Philosophy & Values (3-4 units)
- Biological Science (3-4 units)

**Upper Division Requirements**

**Area of Concentration**

Select seven courses from one Area of Concentration (see below)

**Environmental or Political Economics**

Select one of the following:

- CY PLAN 115 Urbanization in Developing Countries [4]
- DEV STD C100/ C112 Course Not Available [4]
- GEOG C112 Environmental Economics [4]
- ENVECON C101/ C102/ C103
- ENE,RES 180 Ecological Economics in Historical Context [3]
- ENVECON 100 Microeconomic Theory with Application to Natural Resources [4]

**Area of Concentration Requirement**

Students select a total of seven courses (including their core course) in the areas of concentration. In consultation with a faculty adviser, students choose their primary area of concentration and:

1. Select one of the ESPM courses in their primary area as their core course.
2. Select three additional courses from that area (ESPM or non-ESPM) to constitute the primary area of concentration.
3. Choose three additional courses (ESPM or non-ESPM), with at least one course from each of the other two concentrations.

At least three of the seven courses (12 units) in the areas of concentration must come from the approved ESPM courses.

**1. US Environmental Policy and Management**

**Approved ESPM courses**

- ESPM 160AC American Environmental and Cultural History [4]
- ESPM 161 Environmental Philosophy and Ethics [4]

**Approved non-ESPM courses**

- UGBA 107 The Social, Political, and Ethical Environment of Business [3]
- CY PLAN 110 Introduction to City Planning [4]
2. Global Environmental Politics

Approved ESPM courses

- ESPM 102D Climate and Energy Policy
- ESPM 151 Society, Environment, and Culture
- ESPM 162 Bioethics and Society
- ESPM 165 International Rural Development Policy
- ESPM 167 Environmental Health and Development
- ESPM 168 Political Ecology
- ESPM 169 International Environmental Politics

Approved non-ESPM Courses:

- AFRICAM 131 Caribbean Societies and Cultures
- ANTHRO 137 Energy, Culture and Social Organization
- ANTHRO 139 Controlling Processes
- CY PLAN C139 Urban and Sub-national Politics in Developing Countries
- EDUC 186AC The Southern Border
- ESPM 152 Global Change Biology
- ESPM 177A Sustainable Water and Food Security
- ETH STD 159AC The Southern Border
- GEOG 130 Food and the Environment
- GEOG 137 Top Ten Global Environmental Problems
- GEOG 138 Global Environmental Politics
- GEOG 159AC The Southern Border

GLOBAL 123L Perspectives For Sustainable Rural Development

IAS 102 Scope and Methods of Research in International and Area Studies

LEGALST 140 Property and Liberty

LEGALST 179 Comparative Constitutional Law

LEGALST 182 Law, Politics and Society

POL SCI 138E The Varieties of Capitalism: Political Economic Systems of the World

POL SCI C139 Urban and Sub-national Politics in Developing Countries (formerly 139D)

RHETOR 107 Rhetoric of Scientific Discourse (formerly 174)

SOCIO 102 Sociological Theory II (formerly 101B)

SOCIO 127 Development and Globalization (formerly 172)

3. Justice and Sustainability

Approved ESPM courses

- ESPM 117 Urban Garden Ecosystems
- ESPM 155AC Sociology and Political Ecology of Agro-Food Systems
- ESPM 161 Environmental Philosophy and Ethics
- ESPM 163AC Environmental Justice: Race, Class, Equity, and the Environment
- ESPM 166 Natural Resource Policy and Indigenous Peoples
- ESPM C167/ PB HLTH C160 Environmental Health and Development
- ESPM 168 Political Ecology

Approved non-ESPM Courses:

- ANTHRO 148 Anthropology of the Environment
- DEV STD C100/ GEOG C112 Course Not Available
- ECON 154 Economics of Discrimination
- ENV DES 107 Design and Difference
- ESPM 118 Agricultural Ecology
- ESPM 158 Biodiversity Conservation in Working Landscapes
- GWS 130AC Gender, Race, Nation, and Health
- GEOG C112/ DEV STD C100 Global Development: Theory, History, Geography
- HISTORY 135 Course Not Available
- LD ARCH 130 Sustainable Landscapes and Cities
- LEGALST 100 Foundations of Legal Studies
- LEGALST 103 Theories of Law and Society
- LEGALST 107 Theories of Justice
- LEGALST 187 Diversity, Law & Politics

2. Global Environmental Politics

Approved ESPM courses

- ESPM 102D Climate and Energy Policy
- ESPM 151 Society, Environment, and Culture
- ESPM 162 Bioethics and Society
- ESPM 165 International Rural Development Policy
- ESPM 167 Environmental Health and Development
- ESPM 168 Political Ecology
- ESPM 169 International Environmental Politics

Approved non-ESPM Courses:

- AFRICAM 131 Caribbean Societies and Cultures
- ANTHRO 137 Energy, Culture and Social Organization
- ANTHRO 139 Controlling Processes
- CY PLAN C139 Urban and Sub-national Politics in Developing Countries
- EDUC 186AC The Southern Border
- ESPM 152 Global Change Biology
- ESPM 177A Sustainable Water and Food Security
- ETH STD 159AC The Southern Border
- GEOG 130 Food and the Environment
- GEOG 137 Top Ten Global Environmental Problems
- GEOG 138 Global Environmental Politics
- GEOG 159AC The Southern Border
SOCIOL 145AC
SOCIO 182

Student Handbook (https://nature.berkeley.edu/handbook) for more information.

Units Requirements

Students must complete at least 120 semester units of courses subject to certain guidelines:

- At least 36 units must be upper division courses, including a minimum of 15 units of upper division courses in the College of Natural Resources.
- A maximum of 16 units of Special Studies coursework (courses numbered 97, 98, 99, 197, 198, or 199) is allowed towards the 120 units; a maximum of four is allowed in a given semester.
- A maximum of 4 units of Physical Education from any school attended will count towards the 120 units.
- Students may receive unit credit for courses graded P (including P/NP units taken through EAP) up to a limit of one-third of the total units taken and passed on the Berkeley campus at the time of graduation.

Semester Unit Minimum

All CNR students must enroll in at least 13 units each fall and spring semester.

Semester Unit Maximum

To request permission to take more than 19.5 units in a semester, please see the major adviser.

Semester Limit

Students admitted as freshmen must graduate within 8 fall/spring semesters at UC Berkeley. Students admitted as transfer students must graduate within 4 fall/spring semesters at UC Berkeley. Students who go on EAP and UCDC can petition for additional semesters. Summer session, UC Extension and non-UC study abroad programs do not count towards this semester limit. Students approved for double majors or simultaneous degrees in two colleges may be granted an additional semester. CNR does not limit the number of total units a student can accrue.

Senior Residence Requirement

After the term in which you achieve and exceed 90 units (senior status), you must complete at least 24 of the remaining 30 units in residence at the College of Natural Resources over at least 2 semesters. To count as residence, a semester must consist of at least 6 passed units taken while the student is a member of CNR. At least one of the two terms must be a fall or spring semester. Senior residence terms do not need to be completed consecutively. All courses offered on campus for the fall, spring, and summer terms by Berkeley departments and programs and all Berkeley online ('W') courses count. Inter-campus Visitor, Education Abroad Program, UC Berkeley Washington Program, and UC Berkeley Extension units do not count toward this requirement.

Students may use Summer Session to satisfy one semester of the Senior Residence Requirement, provided that four units of coursework are completed.

Modified Senior Residence Requirement

Participants in a fall, spring or summer UC Education Abroad Program (UCEAP), Berkeley Summer Abroad, or the UC Berkeley Washington Program may meet a modified Senior Residence Requirement by completing 24 of their final 60 semester units in residence (excluding
UCEAP). At least 12 of these 24 units must be completed after senior status is reached. International travel study programs sponsored by Summer Sessions and education abroad programs offered outside of the UC system do not qualify for modified senior residence.

Most students automatically satisfy the residence requirement by attending classes here for four years. In general, there is no need to be concerned about this requirement, unless students go abroad for a semester or year or want to take courses at another institution or through University Extension during their senior year. In these cases, students should make an appointment to see an adviser to determine how they can meet the Senior Residence Requirement.

**Grade Requirements**

- A 2.0 UC GPA is required for graduation.
- A 2.0 average in all upper division courses required of the major program is required for graduation.
- A grade of at least C- is required in all courses for the major.

**Learning Goals for the Major**

The Society and Environment major develops students’ capacities to theorize, analyze, interpret and influence social causes and consequences of environmental problems.

Society and Environment graduates gain an understanding of the complex interactions between social, technological, and natural systems—conceptually, analytically, operationally, and articulately—for their individually chosen environmental problems and solutions. Graduates do the following:

- Learn about social processes that affect environmental equity, productivity, and stability for diverse peoples and generations
- Form and link institutions of science, industry, technology, resource use, and societal governance

---

1. **Breadth Courses (select one 3-4 unit course from each of the five breadth categories below):**
   - Biological Sciences
   - Humanities: Arts & Literature, Historical Studies, or Philosophy & Values
   - International Studies
   - Physical Sciences
   - Social & Behavioral Sciences

2. **Remaining Requirements for Junior & Senior Years:**
   - Seven courses from the Area of Concentration Requirement
   - One course in Environmental or Political Economics
   - Senior Capstone Presentation ESPM 194B (spring senior year)

3. **Freshman/Sophomore Seminars:** see FSS website (http://fss.berkeley.edu) for details

4. Berkeley Connect: see Berkeley Connect website (http://www.berkeleyconnect.berkeley.edu) for details

5. DeCal Courses: see DeCal website (https://decal.berkeley.edu) for details
• Work across the operational scales of environmental management and policy from the local to global
• Shape operational responses, in policy and practice, to problems of environmental injustice, sustainability, and productivity

Graduates are expected to play effective and credible roles in the public, professional, and scientific arenas in which they choose to work. These arenas include, for example, the politics, policy, and management of urban, agricultural, forest, land, and water systems and the particular sets of socioeconomic, scientific, industrial, and governmental institutions these engage.

In the College of Natural Resources, we provide holistic, individual advising services to prospective and current students who are pursuing major and minors in our college. We assist with a range of topics including course selection, academic decision-making, achieving personal and academic goals, and maximizing the Berkeley experience.

If you are looking to explore your options, or you are ready to declare a major, double major, or minor, contact the undergraduate adviser for your intended major. Visit our website (https://nature.berkeley.edu/advising/meet-cnr-advisors) to explore all of our advising services.

Society and Environment
Expand all course descriptions [+]Collapse all course descriptions [-]

ESPM 2 The Biosphere 3 Units
Terms offered: Fall 2018, Fall 2017, Fall 2016
An introduction to the unifying principles and fundamental concepts underlying our scientific understanding of the biosphere. Topics covered include the physical life support system on earth; nutrient cycles and factors regulating the chemical composition of water, air, and soil; the architecture and physiology of life; population biology and community ecology; human dependence on the biosphere; and the magnitude and consequences of human interventions in the biosphere.

The Biosphere: Read More [+] 

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

The Biosphere: Read Less [-]

ESPM 3 The Political Ecologies of Spain and California in Comparative Perspective 3 Units
Terms offered: Prior to 2007
This course introduces a political dimension to the study of ecology by exploring questions such as the political causes and effects of environmental policymaking and the unequal impact of environmental issues on different social, economic, cultural, or political groups among others.

The Political Ecologies of Spain and California in Comparative Perspective: Read More [+] 

Objectives Outcomes

Course Objectives: Students will learn to apply the basic concepts developed by common-pool resources, coupled human and natural systems and landscape ecology theories to the study of water and land use.

Students will study the environmental political process with regards to water and land use in California and Spain.

Students will apply a comparative perspective to the political and economic management of water and land use related issues in particular locations of Spain and California.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Instructor: Firestone

The Political Ecologies of Spain and California in Comparative Perspective: Read Less [-]
ESPM 5 FROM FARM TO TABLE: FOOD SYSTEMS IN A CHANGING WORLD 4 Units
Terms offered: Summer 2018 Second 6 Week Session
This course explores the journey of the U.S. food supply from the farm to the family table. The ecology, management, and politics of farming under a global change scenario, the impact of our changing patterns of demand on food processing and retail, the opportunities and costs of exports, and the way different groups access, use, and consume food.

FROM FARM TO TABLE: FOOD SYSTEMS IN A CHANGING WORLD: Read More [+]

Hours & Format
Summer: 6 weeks - 7.5 hours of lecture and 2.5 hours of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Hunting, Iles, DeMaster

FROM FARM TO TABLE: FOOD SYSTEMS IN A CHANGING WORLD: Read Less [-]

ESPM 6 Environmental Biology 3 Units
Terms offered: Fall 2018, Fall 2017, Fall 2016
Basic biological and ecological principles discussed in relation to environmental disruptions. Human interactions with the environment; their meaning for animals and plants. Discussion of basic ecological processes as a basis for understanding environmental problems and formulating strategies for their solution.

Environmental Biology: Read More [+]

Rules & Requirements
Prerequisites: One course in introductory college biology is recommended. Intended for nonscience majors

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Chapela

Environmental Biology: Read Less [-]

ESPM 9 Environmental Science Case Study Seminar 3 Units
Terms offered: Spring 2012, Spring 2011, Spring 2010
Utilizing a field intensive seminar format, the course will introduce lower division students to the process of addressing real environmental problems. Through a progression of case studies, students will explore a spectrum of research design and implementation approaches. By the end of the semester, they will be able to frame a researchable question, design a protocol for gathering relevant information, analyze the information, and derive an objective conclusion. Throughout the semester, students will present case study results in oral and written form.

Environmental Science Case Study Seminar: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar per week

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Welter

Also listed as: L & S C30V

Environmental Issues: Read Less [-]
ESPM C11 Americans and the Global Forest 4 Units
Terms offered: Spring 2017, Spring 2015, Spring 2014
This course challenges students to think about how individual and American consumer decisions affect forest ecosystems around the world. A survey course that highlights the consequences of different ways of thinking about the forest as a global ecosystem and as a source of goods like trees, water, wildlife, food, jobs, and services. The scientific tools and concepts that have guided management of the forest for the last 100 years, and the laws, rules, and informal institutions that have shaped use of the forests, are analyzed.

ESPM C12 Introduction to Environmental Studies 4 Units
Terms offered: Fall 2016, Fall 2015, Fall 2014
This integrative course, taught by a humanities professor and a science professor, surveys current global environmental issues; introduces the basic intellectual tools of environmental science; investigates ways the human relationship to nature has been imagined in literary and philosophical traditions; and examines how tools of scientific and literary analysis; scientific method, and imaginative thinking can clarify what is at stake in environmental issues and ecological citizenship.

ESPM 15 Introduction to Environmental Sciences 3 Units
Terms offered: Spring 2019, Fall 2018, Summer 2018 Second 6 Week Session
Introduction to the science underlying biological and physical environmental problems, including water and air quality, global change, energy, ecosystem services, introduced and endangered species, water supply, solid waste, human population, and interaction of technical, social, and political approaches to environmental management.

ESPM C22AC Fire: Past, Present and Future Interactions with the People and Ecosystems of California 4 Units
Terms offered: Fall 2018
The course presents a diachronic perspective on human-fire interactions with local ecosystems in California that spans over 10,000 years. The course will provide an historical perspective on human-fire interactions at the landscape scale using a diverse range of data sources drawn from the fields of fire ecology, biology, history, anthropology, and archaeology. An important component includes examining how diverse cultures and ethnicity influenced how people perceived and used fire at the landscape scale in ancient, historical and modern times. The implications of these diverse fire practices and policies will be analyzed and the consequences they have had for transforming habitats and propagating catastrophic fires will be explored.

ESPM 15 Introduction to Environmental Sciences 3 Units
Terms offered: Spring 2019, Fall 2018, Summer 2018 Second 6 Week Session
Introduction to the science underlying biological and physical environmental problems, including water and air quality, global change, energy, ecosystem services, introduced and endangered species, water supply, solid waste, human population, and interaction of technical, social, and political approaches to environmental management.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Will, Almeida

Insects and Human Society: Read Less [-]

**ESPM 42 Natural History of Insects 3 Units**
Terms offered: Fall 2018, Fall 2017, Spring 2015
An outline of the main facts and principles of biology as illustrated by insects, with special emphasis on their relations to plants and animals, including humans.
Natural History of Insects: Read More [+]

**Hours & Format**
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

**Additional Details**
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructors: Gillespie, Roderick, Will

Natural History of Insects: Read Less [-]
ESPM 44 Biological Control 2 Units  
Terms offered: Fall 2014, Fall 2013, Fall 2012  
Regulation of populations of organisms, especially insects, through interactions with parasites, predators, pathogens, competitors. Discussion of examples from agricultural, forest, urban, and recreational environments.  
Biological Control: Read More [+]  

Hours & Format  
Fall and/or spring: 15 weeks - 2 hours of lecture per week  
Additional Details  
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate  
Grading/Final exam status: Letter grade. Final exam required.  
Instructor: Mills  

ESPM C46 Climate Change and the Future of California 4 Units  
Terms offered: Spring 2018, Spring 2016  
Introduction to California geography, environment, and society, past and future climates, and the potential impacts of 21st-century climate change on ecosystems and human well-being. Topics include fundamentals of climate science and the carbon cycle; relationships between human and natural systems, including water supplies, agriculture, public health, and biodiversity; and the science, law, and politics of possible solutions that can reduce the magnitude and impacts of climate change.  
Climate Change and the Future of California: Read More [+]  

Hours & Format  
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week  
Additional Details  
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate  
Grading/Final exam status: Letter grade. Final exam required.  
Instructors: Ackerly, Sedlak, Silver, Weissman  
Also listed as: L & S C46  

ESPM 60 Environmental Policy, Administration, and Law 4 Units  
Terms offered: Fall 2018, Fall 2017, Fall 2016  
Introduction to U.S. environmental policy process focuses on history and evolution of political institutions, importance of property, federal and state roles in decision making, and challenges of environmental policy. Emphasis is on use of science in decision making, choices between regulations and incentives, and role of bureaucracy in resource policy. Case studies on natural resource management, risk management, environmental regulation, and environmental justice.  
Environmental Policy, Administration, and Law: Read More [+]  

Hours & Format  
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

ESPM 50AC Introduction to Culture and Natural Resource Management 4 Units  
Terms offered: Spring 2019, Fall 2018, Summer 2018 First 6 Week Session  
An introduction to how culture affects the way we use and manage fire, wildland and urban forests, rangelands, parks and preserves, and croplands in America. The basic concepts and tools for evaluating the role of culture in resource use and management are introduced and used to examine the experience of American cultural groups in the development and management of western natural resources.  
Introduction to Culture and Natural Resource Management: Read More [+]  

Hours & Format  
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week  
Summer: 6 weeks - 7.5 hours of lecture and 2.5 hours of discussion per week  
8 weeks - 6 hours of lecture and 2 hours of discussion per week  
Additional Details  
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate  
Grading/Final exam status: Letter grade. Final exam required.  
Buyer known as: 50  

Introduction to Culture and Natural Resource Management: Read Less [-]
ESPM 72 Introduction to Geographic Information Systems 3 Units
Terms offered: Spring 2019, Summer 2018 Second 6 Week Session, Summer 2017 Second 6 Week Session
Introduction to computer systems, data processing software for natural resources studies. Components of geographic information systems: concepts of surveying, mapping, and remote sensing as data sources; various methods of data processing and analysis including classification, map overlay, buffer analysis, topographic modeling, spatial interpolation, and map design with a GIS. Intensive hands-on practices with relevant computer software packages.

Rules & Requirements
Prerequisites: Three years of high school math

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week
Summer: 6 weeks - 6.5 hours of lecture and 6 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Gong

Introduction to Geographic Information Systems: Read More [+]

ESPM 78A Teaching and Learning Environmental Science 4 Units
Terms offered: Fall 2012, Fall 2011, Fall 2010
Introduces theories of cognitive development and the practices of curriculum design and lesson presentation for environmental education. Ecology and natural resource management provide the context of curriculum development. Students create lesson plans integrating core concepts and their knowledge of local environmental issues. Lessons are presented to Bay Area K-12 students in field and classroom settings.

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture, 1 hour of discussion, and 3 hours of fieldwork per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Instructor: Kelly

Teaching and Learning Environmental Science: Read Less [-]

ESPM 88A Exploring Geospatial Data 2 Units
Terms offered: Spring 2017, Spring 2016
From interactive web maps to spatial data analysis, digital geographic data and information are becoming an important part of the data science landscape. Almost everything happens somewhere that can be mapped on the surface of the earth. In many cases the where matters as much to an analysis as the what and the why. Geospatial data analysis allows a researcher to consider location explicitly. This course provides an introduction to working with digital geographic data, or geospatial data. We will explore concepts of geospatial data representation, methods for acquisition, processing and analysis, and techniques for creating compelling geovisualizations. No prior knowledge is assumed or expected.

Rules & Requirements
Prerequisites: This course is meant to be taken concurrently with Computer Science C8/Statistics C8/Information C8: Foundations of Data Science. Students may take more than one 88 (data science connector) course if they wish, ideally concurrent with or after having taken the C8 course

Hours & Format
Fall and/or spring: 15 weeks - 0.5 hours of lecture, 0.5 hours of discussion, and 1 hour of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Kelly

Exploring Geospatial Data: Read Less [-]
ESPM 88B Data Sciences in Ecology and the Environment 2 Units
Terms offered: Spring 2016
Many of the greatest challenges we face today come from understanding and interacting with the natural world: from global climate change to the sudden collapse of fisheries and forests, from the spread of disease and invasive species to the unknown wealth of medical, cultural, and technological value we derive from nature. Advances in satellites and microsensors, computation, informatics and the Internet have made available unprecedented amounts of data about the natural world, and with it, new challenges of sifting, processing and synthesizing large and diverse sources of information. In this course, students will apply methods and understanding they gain in the Foundations course to realworld ecological and environmental data
Data Sciences in Ecology and the Environment: Read More [+]

ESPM 98BC Berkeley Connect 1 Unit
Terms offered: Spring 2019, Fall 2018, Spring 2018
Berkeley Connect is a mentoring program, offered through various academic departments, that helps students build intellectual community. Over the course of a semester, enrolled students participate in regular small-group discussions facilitated by a graduate student mentor (following a faculty-directed curriculum), meet with their graduate student mentor for one-on-one academic advising, attend lectures and panel discussions featuring department faculty and alumni, and go on field trips to campus resources. Students are not required to be declared majors in order to participate.

ESPM 99 Supervised Independent Study and Research 1 - 3 Units
Terms offered: Fall 2016, Spring 2016, Fall 2015
Supervised independent study or research on topics relevant to department that are not covered in depth by other courses. Open to students in good standing who, in consultation with a faculty sponsor, present a proposal with clearly formulated objectives and means of implementation. Intended for exceptional students.
Supervised Independent Study and Research: Read More [+]
Rules & Requirements
Prerequisites: Lower division standing (3.4 GPA or better), consent of instructor, adviser, and department chair. Usually restricted to ESPM majors
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Summer: 6 weeks - 1-5 hours of independent study per week
8 weeks - 1-4 hours of independent study per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Supervised Independent Study and Research: Read Less [-]

ESPM 100 Environmental Problem Solving 4 Units
Terms offered: Fall 2018, Fall 2016, Fall 2015
Analysis of contrasting approaches to understanding and solving environmental and resource management problems. Case studies and hands-on problem solving that integrate concepts, principles, and practices from physical, biological, social, and economic disciplines. Their use in environmental policies and resource and management plans.
Environmental Problem Solving: Read More [+]
Rules & Requirements
Prerequisites: Completion of upper division statistics requirement. Open only to declared Environmental Sciences majors
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture, 1 hour of discussion, and 3 hours of laboratory per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Instructor: Battles
Introduction to the Methods of Environmental Science: Read Less [-]

ESPM 100ES Introduction to the Methods of Environmental Science 4 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
Introduction to basic methods used in environmental research by biological, physical, and social scientists; designed to teach skills necessary to conduct independent thesis research in the required senior seminar, 196A-196B/196L. Topics include development of research questions, sampling methods, experimental design, statistical analysis, scientific writing and graphics, and introductions to special techniques for characterizing environmental conditions and features. This course is the prerequisite to 196A.
Introduction to the Methods of Environmental Science: Read More [+]
Rules & Requirements
Prerequisites: Completion of upper division statistics requirement. Open only to declared Environmental Sciences majors
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture, 1 hour of discussion, and 3 hours of laboratory per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.

Introduction to the Methods of Environmental Science: Read Less [-]

ESPM 102A Terrestrial Resource Ecology 4 Units
Terms offered: Fall 2013, Fall 2012, Fall 2011
Provides a foundation in terrestrial ecology. Organized around five topics: environmental biophysics, ecosystem carbon balance, ecophysiology, population ecology, community ecology. Examines how each contributes to understanding of distribution and abundance of organisms in biosphere. Laboratory exercises, a mandatory weekend field trip, and a group research project provide opportunities to explore questions in depth. Emphasis on building quantitative understanding of ecological phenomena.
Terrestrial Resource Ecology: Read More [+]
Rules & Requirements
Prerequisites: Biology 1A-1B or equivalent
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 4 hours of laboratory per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: McBride
Terrestrial Resource Ecology: Read Less [-]
ESPM 102B Natural Resource Sampling 2 Units
Terms offered: Fall 2018, Fall 2017, Fall 2016
This course is designed to introduce students to the major sampling systems used in natural resources and ecology. It also introduces students to important sampling and measurement concepts in grassland, forest, wildlife, insect, soil, and water resources. May be taken without laboratory course 102BL.
Natural Resource Sampling: Read More [+]
Rules & Requirements
Prerequisites: Statistics 2 or 20
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Biging

ESPM 102BL Laboratory in Natural Resource Sampling 2 Units
Terms offered: Fall 2018, Fall 2017, Fall 2016
This laboratory course is designed to introduce students to the major sampling systems used in natural resources and ecology. Field data is collected with various important sampling designs and analyzed. Mean values and confidence intervals are constructed from the data collected in this course. This course must be taken in conjunction with lecture course 102B.
Laboratory in Natural Resource Sampling: Read More [+]
Rules & Requirements
Prerequisites: Statistics 2 or 20
Hours & Format
Fall and/or spring: 15 weeks - 4 hours of laboratory per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Biging

ESPM 102C Resource Management 4 Units
Terms offered: Spring 2019, Spring 2017, Spring 2016
Presents concept and practical approaches to public and private natural resource management decision making. The focus is on goals, criteria, data, models, and technology for quantifying and communicating the consequences of planning options. A range of contemporary air, soil, wetland, rangeland, forest, social, economic, and ecosystem management problems is addressed.
Resource Management: Read More [+]
Rules & Requirements
Prerequisites: Precalculus. 156, 184, and 70 are recommended
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Meckling

ESPM 102D Climate and Energy Policy 4 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
This intermediate level course engages with both the politics and the design of climate and clean energy policy, with a focus on the United States. Key themes include political strategies to climate change, the choice of policy instruments, the role of various state actors and interest groups in policy making, the interaction of policy and low-carbon technology markets, and the US and global politics. The course combines the study of analytical concepts with in-depth case studies.
Climate and Energy Policy: Read More [+]
Rules & Requirements
Prerequisites: One of the following is required: <BR/>- ESPM 60 Environmental Policy, Administration, and Law<BR/>- ENVECON C1 Introduction to Environmental Economics and Policy<BR/>- POL SCI 1 Introduction to American Politics, or<br/>- Consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: McBride
Sierra Nevada Ecology: Read Less [-]

ESPM 105B Forest Measurements 1 Unit
Terms offered: Summer 2018 8 Week Session, Summer 2017 8 Week Session, Summer 2016 8 Week Session
This course teaches students how to use common forestry tools, maps, and various sampling methods to collect information about the forest environment. Thirty percent of the time is spent in the classroom learning about the techniques and working up field data. The remaining time is spent in the field applying these techniques in real world settings. Skills taught will include tree and plot measurement procedures, map reading, and simple field orienteering principles.
Forest Measurements: Read More [+]
Rules & Requirements
Prerequisites: 105A
Hours & Format

ESPM 106 American Wildlife: Management and Policy in the 21st Century 3 Units
Terms offered: Spring 2019, Spring 2018, Fall 2013
This course will introduce the history of key wildlife management and policy paradigms, such as parks and protected areas, threatened and endangered species protections, and state wildlife management. We will then explore in depth a number of species case studies in the Greater Yellowstone Ecosystem, a major laboratory for wildlife science, management and policy. The course will draw on lectures, readings, discussions, and guest perspectives. The course will help students majoring in related fields to prepare for careers in wildlife science and related conservation, management, and policy efforts; but students of any major should come away with a better understanding of key issues facing iconic American wildlife species.
American Wildlife: Management and Policy in the 21st Century: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

ESPM 108B Environmental Change Genetics 3 Units
Terms offered: Fall 2018, Fall 2016, Fall 2015
This course will examine the consequences of environmental change on
the levels and distribution of genetic diversity within species. Students will
be introduced to methods of analysis and their application to organisms
from a range of ecosystems. The fate of populations under rapid
environmental change will be assessed in the light of dispersal and
adaptation (genetic and epigenetic) potential. Students will learn to use
population genetics freeware to evaluate molecular data.
Environmental Change Genetics: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A-1B or equivalents

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of
laboratory per week

Laboratory introduction to the ecology of microorganisms. Topics include the ecology and evolution of microbes and their relationship with each other and the environment. The role and function of microbes in several ecosystems is also discussed.
Microbial Ecology Lab: Read More [+]

Rules & Requirements
Prerequisites: Concurrent enrollment in Environmental Science Policy and Management 112 will be required for enrollment in Environmental Science Policy and Management 112L. Biology 1A and Biology 1B; Molecular and Cell Biology 102 is recommended

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Almeida, Banfield
Microbial Ecology Lab: Read Less [-]

ESPM 113 Insect Ecology 3 Units
Terms offered: Spring 2019, Spring 2017, Spring 2016
Ecology of insects: interactions with the physical environment; structure and functioning of insect populations and communities; behavioral ecology of predator-prey interactions; plant-insect interactions; social insects; pollination biology; applied insect ecology.
Insect Ecology: Read More [+]

Rules & Requirements
Prerequisites: Biology 1B or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Mills
Insect Ecology: Read Less [-]

ESPM 114 Wildlife Ecology 3 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
Introduction to wildlife ecology and its relationship to management programs. Includes population, community, and ecosystem levels of organization, followed by selected case studies.
Wildlife Ecology: Read More [+]

Rules & Requirements
Prerequisites: Upper division or graduate standing

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week
Summer: 6 weeks - 6.5 hours of lecture and 2 hours of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Brashares
Wildlife Ecology: Read Less [-]

ESPM 115B Biology of Aquatic Insects 2 Units
Terms offered: Fall 2011, Fall 2009, Spring 2009
Identification and ecology of aquatic insects, including their role as indicators of environmental quality.
Biology of Aquatic Insects: Read More [+]

Rules & Requirements
Prerequisites: Introductory course in a biological science

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Resh
Biology of Aquatic Insects: Read Less [-]
ESPM 115C Fish Ecology 3 Units
Terms offered: Fall 2011, Fall 2010, Fall 2009
Introduction to fish ecology, with particular emphasis on the identification and ecology of California's inland fishes. This course will expose students to the diversity of fishes found in California, emphasizing the physical (e.g., temperature, flow), biotic (e.g., predation, competition), and human-related (e.g., dams, fisheries) factors that affect the distribution, diversity, and abundance of these fishes.
Fish Ecology: Read More [+]

Rules & Requirements

Prerequisites: Introductory course in biological science; upper division or graduate standing

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture, 1 hour of fieldwork, and 3 hours of laboratory per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Carlson

Fish Ecology: Read Less [-]

ESPM C115A Freshwater Ecology 3 Units
Terms offered: Spring 2019, Spring 2018
Lakes, rivers, wetlands, and estuaries are biologically rich, dynamic, and among the most vital and the most vulnerable of Earth's ecosystems. Lectures will introduce general topics including the natural history of freshwater biota and habitats, ecological interactions, and ecosystem linkages and dynamics. Broad principles will be illustrated with results from selected recent research publications. Factors affecting resilience or vulnerability of freshwater ecosystems to change will be examined. Course requirements: two exams and a short synthesis paper projecting the future states of a freshwater or estuarine ecosystem of the student's choice under plausible scenarios of local, regional, or global change.
Freshwater Ecology: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Power, Carlson, Ruhi

Formerly known as: Integrative Biology 171

Also listed as: INTEGBI C176L

Freshwater Ecology: Read Less [-]

ESPM C115C Fish Ecology 3 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
Introduction to fish ecology, with particular emphasis on the identification and ecology of California's inland fishes. This course will expose students to the diversity of fishes found in California, emphasizing the physical (e.g., temperature, flow), biotic (e.g., predation, competition), and human-related (e.g., dams, fisheries) factors that affect the distribution, diversity, and abundance of these fishes.

Fish Ecology: Read Less [-]

ESPM 116B Rangeland Ecology 4 Units
Terms offered: Fall 2018, Fall 2017, Spring 2010
An introduction to the ecology of selected grasslands, woodlands, and shrublands in the western U.S. through a biogeographical survey of rangeland ecosystems. Selected plant communities and their response to management, climate, and environmental factors, and the effects of fire, grazing, and direct manipulation on ecological structure and function. Includes an introduction to rangeland plants.
Rangeland Ecology: Read More [+]

Rules & Requirements

Prerequisites: Lower division biology or ecology

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of laboratory per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Huntsinger

Rangeland Ecology: Read Less [-]
ESPM 116C Tropical Forest Ecology 3 Units
Terms offered: Spring 2011, Spring 2009, Spring 2008
Introduction to the ecology of terrestrial tropical ecosystems, with particular emphasis on neotropical forests. Explores unique aspects of tropical ecosystems, especially nutrient cycles, net primary productivity, biological diversity, forest structure and dynamics, disturbance ecology, and the natural history of key forest organisms. Basic ecology is integrated with discussion of human disturbances, restoration of tropical ecosystems, and the global importance of tropical forests.

Rules & Requirements
Prerequisites: One course in ecology and one course in chemistry or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Silver

ESPM 117 Urban Garden Ecosystems 4 Units
Terms offered: Fall 2018, Summer 2018 First 6 Week Session, Fall 2017
An ecosystem approach to the study of urban gardens with an organic perspective. Topics include fundamentals of horticulture, soil properties and fertility, pest and disease management, and food preservation. Laboratories include methods in garden design, plant propagation, compost technique, soil preparation, irrigation systems, pest management, individual or group projects, demonstrations, and discussions. Enrollment may be limited.

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternate method of final assessment during regularly scheduled final exam group (e.g., presentation, final project, etc.).
Instructor: Altieri

ESPM 118 Agricultural Ecology 4 Units
Terms offered: Fall 2018, Fall 2017, Fall 2016
Examines in a holistic framework fundamental biological, technical, socio-economic, and political processes that govern agroecosystem productivity and stability. Management techniques and farming systems' designs that sustain longterm production are emphasized. One Saturday field trip and one optional field trip.

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Altieri

ESPM 119 Chemical Ecology 2 Units
Terms offered: Fall 2015, Fall 2014, Fall 2013
Plant toxins and their effects on animals, hormonal interactions between plants and animals, feeding preferences, animal pheromones, and defense substances, biochemical interactions between higher plants, and phytoalexins and phytotoxins.

Rules & Requirements
Prerequisites: Introductory courses in organic chemistry and biology or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Kubo

ESPM 120 Soil Characteristics 3 Units
Terms offered: Fall 2018, Fall 2016, Fall 2015
Introduction to physical, engineering, chemical, and biological properties of soil; methods of soil description, identification, geographic distribution and uses; the role of soil in supplying water and nutrients to plants; and soil organisms. Soil management for agriculture, forestry, and urban uses will also be discussed. Includes a Saturday field trip.
Soil Characteristics: Read More [+]

Rules & Requirements

Prerequisites: Chemistry 1A, 3A

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Amundson

Soil Characteristics: Read Less [-]

ESPM 121 Development and Classification of Soils 3 Units
Terms offered: Spring 2015, Spring 2009, Spring 2006
Development, morphology, and classification of soils as related to geology, environmental factors, and time. Soils as functioning parts of ecosystems; use of soils in archeological and paleoclimatic studies; anthropogenic effects on soil ecosystems.
Development and Classification of Soils: Read More [+]

Rules & Requirements

Prerequisites: Earth and Planetary Sciences 100A-100B, and Chemistry 1A, 3A recommended

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Amundson

Development and Classification of Soils: Read Less [-]

ESPM 122 Field Study of Soil Development 1 Unit
Terms offered: Spring 2015, Spring 2009, Spring 2006
Five day-long Saturday field trips to locations in central California. The field study of soil development and morphology. Methods of soil morphological descriptions; study of factors controlling soil development; relationship of soil morphology to land use; quaternary geology of central California; use of soils in dating landscapes.
Field Study of Soil Development: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 0 hours of fieldwork per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam not required.

Instructor: Amundson

Field Study of Soil Development: Read Less [-]

ESPM C125 Biogeography 4 Units
Terms offered: Fall 2018
The course will provide a historical background for the field of biogeography and the ecological foundations needed to understand the distribution and abundance of species and their changes over time. It will also discuss developing technologies (including genomic tools and environmental models) together with the availability of big data and increasingly sophisticated analytical tools to examine the relevance of the field to global change biology, conservation, and invasion biology, as well as sustainable food systems and ecosystem services.
Biogeography: Read More [+]

Rules & Requirements

Prerequisites: BIO 1B

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Gillespie

Also listed as: GEOG C148/INTEGBI C166

Biogeography: Read Less [-]
ESPM C126 Animal Behavior 4 Units
Terms offered: Fall 2018, Fall 2017, Fall 2016
An introduction to comparative animal behavior and behavioral physiology in an evolutionary context, including but not limited to analysis of behavior, genetics and development, learning, aggression, reproduction, adaptiveness, and physiological substrates.
Animal Behavior: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A, 1B, or Environmental Science, Policy, and Management 140. Molecular and Cell Biology 140 and C160 recommended

Credit Restrictions: Students will receive no credit for 144 after taking C144, 145, 146LF, or Psychology C115B.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Lacey, Caldwell, Bentley, Elias
Also listed as: INTEGBI C144

Also listed as: CIV ENG C116
Chemistry of Soils: Read Less [-]

ESPM C129 Biometeorology 3 Units
Terms offered: Fall 2018, Fall 2016, Fall 2014
This course describes how the physical environment (light, wind, temperature, humidity) of plants and soil affects the physiological status of plants and how plants affect their physical environment. Using experimental data and theory, it examines physical, biological, and chemical processes affecting transfer of momentum, energy, and material (water, CO2, atmospheric trace gases) between vegetation and the atmosphere. Plant biometeorology instrumentation and measurements are also discussed.
Biometeorology: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Instructor: Baldocchi
Also listed as: EPS C129
Biometeorology: Read Less [-]

ESPM 130A Forest Hydrology 4 Units
Terms offered: Spring 2019, Spring 2018
This course introduces the fundamental physical principles that are necessary to understand the distribution and dynamics of water near the Earth's surface. A quantitative approach will provide mathematical descriptions of hydrological phenomena that will be used for a variety of hydrological applications to river flow hydraulics, flood frequency analysis, evapotranspiration from terrestrial ecosystems, groundwater flow, and ecohydrological dynamics. The course will provide an introduction to hydrological processes and data analysis. The purpose of the laboratory is to illustrate in an experimental setting the principles and applications introduced in lecture.
Forest Hydrology: Read More [+]

Rules & Requirements
Prerequisites: Chemistry 1A, Mathematics 1A-1B, Physics 7A, or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: D'Odorico
Forest Hydrology: Read Less [-]
ESPM C130 Terrestrial Hydrology 4 Units
Terms offered: Spring 2019, Spring 2017, Spring 2015, Spring 2014, Fall 2005
A quantitative introduction to the hydrology of the terrestrial environment including lower atmosphere, watersheds, lakes, and streams. All aspects of the hydrologic cycle, including precipitation, infiltration, evapotranspiration, overland flow, streamflow, and groundwater flow. Chemistry and dating of groundwater and surface water. Development of quantitative insights through problem solving and use of simple models. This course requires one field experiment and several group computer lab assignments.

Terrestrial Hydrology: Read More [+]

Rules & Requirements
Prerequisites: Chemistry 1A, Mathematics 1A-1B, Physics 7A, or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Gillespie

Spider Biology: Read Less [-]

ESPM C133 Water Resources and the Environment 3 Units
Terms offered: Spring 2018, Spring 2016
Distribution, dynamics, and use of water resources in the global environment. Water scarcity, water rights, and water wars. The terrestrial hydrologic cycle. Contemporary environmental issues in water resource management, including droughts, floods, saltwater intrusion, water contamination and remediation, river restoration, hydraulic fracturing, dams, and engineering of waterways. The role of water in ecosystem processes and geomorphology. How water resources are measured and monitored. Basic water resource calculations. Effects of climate change on water quantity, quality, and timing.

Water Resources and the Environment: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Instructor: Larsen
Also listed as: GEOG C135

Water Resources and the Environment: Read Less [-]
ESPM 134 Fire, Insects, and Diseases in Forest Ecosystems 3 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
Study of the influence of fire, insects, and diseases on species diversity, succession, and the survival of North American forests including the evolution of these interactions due to modern human policies of preservation and management and exploitation.

Fire, Insects, and Diseases in Forest Ecosystems: Read More [+]

Rules & Requirements

Prerequisites: One course in biology

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Bruns

Fire, Insects, and Diseases in Forest Ecosystems: Read Less [-]

ESPM 137 Landscape Ecology 3 Units
Terms offered: Fall 2018, Fall 2017, Fall 2016
This course will cover broad topics in landscape ecology with the goal of answering the core questions of how patterns develop on landscapes, how these patterns relate to biotic and abiotic processes, and how these patterns and processes change through time. Lab exercises will focus on practical aspects of landscape ecological analysis using modern tools like remote sensing, GIS, population modeling, and landscape genetics.

Landscape Ecology: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Wang

Landscape Ecology: Read Less [-]

ESPM C138 Introduction to Comparative Virology 4 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
This course will provide a comparative overview of virus life cycles and strategies viruses use to infect and replicate in hosts. We will discuss virus structure and classification and the molecular basis of viral reproduction, evolution, assembly, and virus-host interactions. Common features used during virus replication and host cellular responses to infection will be covered. Topics also included are common and emerging virus diseases, their control, and factors affecting their spread.

Introduction to Comparative Virology: Read More [+]

Rules & Requirements

Prerequisites: Introductory chemistry (Chemistry 1A or 3A-3B or equivalent) and introductory biology (Biology 1A, 1AL, and 1B or equivalent) and general biochemistry (Molecular and Cell Biology C100A or equivalent--preferably completed but may be taken concurrently)

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Glaunsinger

Also listed as: MCELLBI C114/PLANTBI C114

Introduction to Comparative Virology: Read Less [-]

ESPM 139 THE ENVIRONMENT AND THE SELF: AN ECO PRACTICUM 2 Units
Terms offered: Fall 2017
This course will provide a practical exploration of how to engage effectively with contemporary environmental issues using discussion of scientific and philosophical texts, activities, and group work. We will evaluate how different worldviews influence how humans relate to the natural world and how our own worldview shapes our way of engaging in environmental problem solving.

THE ENVIRONMENT AND THE SELF: AN ECO PRACTICUM: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture per week

General Entomology: Read Less [-]

ESPM 141 Development of Taxonomic Identification Keys and Natural Language Descriptions 2 Units
Terms offered: Prior to 2007
Tools for identification of organisms to species or higher-level taxonomic groups are critically needed. This course will allow students to learn both the theoretical basis of and practical skills for building traditional dichotomous keys and various types of interactive keys. Emphasis will be on learning to build a web-based interactive key and developing natural language descriptions through students' individual projects. Students can train on the Microptics Digital XLT imaging system and learn to use Lucid and Lucid Phoenix software. Other Internet identification tools will also be surveyed and discussed. Each student will produce an online key as a project.
Development of Taxonomic Identification Keys and Natural Language Descriptions: Read More [+]
Rules & Requirements
Prerequisites: Prior knowledge of focus group for project
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Tsutsui
Development of Taxonomic Identification Keys and Natural Language Descriptions: Read Less [-]

ESPM 142 Insect Behavior 3 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
Insects display an incredibly rich array of behaviors, including extravagant displays, rituals, deception, sociality, and slavery. In some cases, these behaviors are innate, but in other cases individual insects can actively learn and modify their future behaviors based on real-life experiences. This course will focus on the development, structure, and function of insect behaviors, using examples from classic and recent publications. We will examine the evolution of insect behavior, how these behaviors play a role in the ecology of the organisms that express them, and explore various modes of communication that allow insects to judge their environment and respond appropriately.
Insect Behavior: Read More [+]
Rules & Requirements
Prerequisites: Biology 1A and 1B
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**ESPM 152 Global Change Biology 3 Units**

Terms offered: Spring 2019, Spring 2018, Spring 2017  
The course will focus on understanding how anthropogenic changes to the global environment (e.g., climate change, habitat destruction, global trade) impact organisms. We will evaluate responses to global change in a wide diversity of organisms (from microbes to mammals) and ecosystems (from arctic to temperate to tropical). We will also explore conservation and mitigation strategies in the face of global change. Discussions will draw on recent primary research and case studies.  
Global Change Biology: Read More [+]

**Rules & Requirements**

**Prerequisites:** An introductory course in biological science; upper division or graduate standing

**Hours & Format**

Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

Instructor: Rosenblum  
Global Change Biology: Read Less [-]

**ESPM 155AC Sociology and Political Ecology of Agro-Food Systems 4 Units**

Terms offered: Fall 2018, Spring 2018, Fall 2016  
Sociology and political ecology of agro-food systems; explores the nexus of agriculture, society, the environment; analysis of agro-food systems and social and environmental movements; examination of alternative agricultural initiatives—(i.e. fair trade, food justice/food sovereignty, organic farming, urban agriculture).  
Sociology and Political Ecology of Agro-Food Systems: Read More [+]

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

Instructor: De Master

Sociology and Political Ecology of Agro-Food Systems: Read Less [-]
ESPM C156 Animal Communication 3 Units
Terms offered: Spring 2018

Communication is central to the lives of most, if not all animals. How and why animals communicate is thus central to understanding the ecology, behavior, neurobiology, and evolution of animal systems. This course will focus on understanding the basic principles driving the communication system of a species, drawing together topics ranging from the physical properties of the environment, physiology of sensory systems, animal behavior and ecology, using examples from classic and recent publications.

Rules & Requirements

Prerequisites: Biology 1B. Animal Behavior (ESPM C126/IB C144) recommended

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Elias

Formerly known as: Environ Sci, Policy, and Management 156

Also listed as: INTEGBI C145

ESPM 157 Data Science in Global Change Ecology 4 Units
Terms offered: Fall 2018, Fall 2017

Many of the greatest challenges we face today come from understanding and interacting with the natural world: from global climate change to the sudden collapse of fisheries and forests, from the spread of disease and invasive species to the unknown wealth of medical, cultural, and technological value we derive from nature. Advances in satellites and micro-sensors, computation, informatics and the Internet have made available unprecedented amounts of data about the natural world, and with it, new challenges of sifting, processing and synthesizing large and diverse sources of information. In this course, students will learn and apply fundamental computing, statistics and modeling concepts to a series of real-world ecological and environment

Rules & Requirements

Prerequisites: No prior knowledge is assumed or expected, though prior exposure to programming, particularly from the Foundations of Data Science (COMPSCI C8 / INFO C8 / STAT C8), will be helpful

Hours & Format

Fall and/or spring: 15 weeks - 4 hours of laboratory per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructor: Boettiger

Data Science in Global Change Ecology: Read Less [-]
ESPM 158 Biodiversity Conservation in Working Landscapes 4 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015
Most of the world's lands and seas occur outside of protected areas, so this course examines biodiversity conservation in “working landscapes” like farms, ranches, and urban areas. Students will study fundamental concepts in ecology and conservation biology, and evaluate case studies to assess how conservation approaches have evolved and which are working. Students will gain skills in evaluating and summarizing scientific literature, and in-depth knowledge of conservation in practice.

Biodiversity Conservation in Working Landscapes: Read More [+]

Rules & Requirements
Prerequisites: Biology IB is required; Environmental Science Policy and Management C103/Integrative Biology C156 or other ecology course desired

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Kremen

ESPM C159 Human Diet 4 Units
Terms offered: Spring 2016, Spring 2015, Spring 2013
Since we eat every day, wouldn't it be useful to learn more about human dietary practices? A broad overview of the complex interrelationship between humans and their foods. Topics include the human dietary niche, biological variation related to diet, diet and disease, domestication of staple crops, food processing techniques and development of regional cuisines, modern diets and their problems, food taboos, human attitudes toward foods, and dietary politics.

Human Diet: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

ESPM 160AC American Environmental and Cultural History 4 Units
Terms offered: Summer 2018 Second 6 Week Session, Fall 2015, Spring 2015, Fall 2014
History of the American environment and the ways in which different cultural groups have perceived, used, managed, and conserved it from colonial times to the present. Cultures include American Indians and European and African Americans. Natural resources development includes gathering-hunting-fishing; farming, mining, ranching, forestry, and urbanization. Changes in attitudes and behaviors toward nature and past and present conservation and environmental movements are also examined. Readings are from primary source documents supplemented by recent essays.

American Environmental and Cultural History: Read More [+]

Rules & Requirements
Credit Restrictions: Students will receive no credit for Environ Sci, Policy, and Management ESPM 160AC/HIST120AC after taking Environ Sci, Policy and Management ESPM 160AC

Requirements this course satisfies: Satisfies the American Cultures requirement

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week
Summer: 6 weeks - 7.5 hours of lecture and 3 hours of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Bioethics and Society: Read Less [-]

ESPM 162A Health, Medicine, Society and Environment 4 Units
Terms offered: Fall 2018
Introduces students to intersections between health, medicine, society, and environment through medical and environmental anthropology, political ecology, medical geography, and the social studies of science, technology and the natural environment. Readings, discussions, and assignments will explore the sociocultural, political economic, and environmental aspects of illness, care, disease, biomedicine, and health (in)equity.
Health, Medicine, Society and Environment: Read More [+]

Objectives Outcomes
Course Objectives: This course will provide an overview of key theoretical and methodological approaches as well as central arguments to understand the relationships between health, medicine, society and environment. The course will lend context and highlight concepts that are important to understandings of and movements toward social and health equity.
Student Learning Outcomes: Critically assess social and health issues appearing in scholarly publications and the popular press.; Practice communicating ideas and analyses in language that can be generally understood.; Work with classmates from multiple disciplines and backgrounds in order to realize the importance of multidisciplinary approaches for solving social and health inequities.; Apply sociocultural, political economic, and critical theory frameworks for understanding conflicts in the realms of public health, global health, medicine, and public policy.; Demonstrate knowledge in major areas of health and society in relation to current debates in medical anthropology and cognate social sciences.; Engage with increasingly popular subfields of the medical social sciences including those on issues of health inequities, care, medical science, sickness, anguish, and resistance.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of discussion and 3 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternate method of final assessment during regularly scheduled final exam group (e.g., presentation, final project, etc.).
Instructor: Holmes
Health, Medicine, Society and Environment: Read Less [-]
ESPM 163AC Environmental Justice: Race, Class, Equity, and the Environment 4 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
Overview of the field of environmental justice, analyzing the implications of race, class, labor, and equity on environmental degradation and regulation. Environmental justice movements and struggles within poor and people of color communities in the U.S., including: African Americans, Latino Americans, and Native American Indians. Frameworks and methods for analyzing race, class, and labor. Cases of environmental injustice, community and government responses, and future strategies for achieving environmental and labor justice.

Environmental Justice: Race, Class, Equity, and the Environment: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

ESPM C170 Carbon Cycle Dynamics 3 Units
Terms offered: Spring 2019, Spring 2016, Spring 2015, Spring 2014
The focus is the (unsolved) puzzle of the contemporary carbon cycle. Why is the concentration of atmospheric CO2 changing at the rate observed? What are the terrestrial and oceanic processes that add and remove carbon from the atmosphere? What are the carbon management strategies under discussion? How can emission protocols be verified? Students are encouraged to gain hands-on experience with the available data, and learn modeling skills to evaluate hypotheses of carbon sources and sinks.  
Carbon Cycle Dynamics: Read More [+]  

Hours & Format  
Fall and/or spring: 15 weeks - 3 hours of lecture per week

ESPM C177 GIS and Environmental Spatial Data Analysis 4 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015
This course offers an introduction to spatial data analysis. It integrates ArcGIS analysis with spatial statistical analysis for the study of pattern and process applicable to a wide variety of fields. Major topics covered include: spatial sampling, processing data with ARC Info, exploratory GIS analysis, spatial decomposition, spatial point patterns and Ripley's K function, spatial autocorrelation, geostatistics, spatially weighted regression, spatial autoregression, generalized linear models and generalized linear mixed models.

GIS and Environmental Spatial Data Analysis: Read More [+]

Rules & Requirements
Prerequisites: Requirements are course in GIS and a course in probability and statistics. We invite participation of undergraduates and graduate students from: ESPM, Landscape Architecture & Environmental Planning, City and Regional Planning, IE, Civil Engineering, Energy and Resources Group, Public Health, Earth and Planetary Science, and other campus departments or units with students interested in learning and using spatial analysis for the environment- both natural and built

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

ESPM C179A GC-Maker Lab I: Skills and Theory 2 Units
Terms offered: Fall 2016
In the environmental and biological sciences, one of the biggest challenges in transitioning from student to researcher is learning how to measure something without an off-the-shelf device. This course will provide the theoretical background and the practice of building a Gas Chromatograph (GC) system for environmental research. The first semester is for students who seek to develop fundamental skills in instrumental development and design. The second semester (c179b) is only open to those who have taken this first semester course and will entail the construction of a working gas chromatograph system. This class will be especially useful for students who wish to pursue research following graduation.
GC-Maker Lab I: Skills and Theory: Read More [+]

Rules & Requirements

ESPM C179B GC-Maker Lab II: Instrument development 4 Units
Terms offered: Spring 2017
In the environmental and biological sciences, one of the biggest challenges in transitioning from student to researcher is learning how to measure something without an off-the-shelf device. This course will involve the actual building a gas chromatograph (GC) system for environmental research. In addition, we will provide the option of building a mini datalogging sensor for measuring basic environmental parameters using the Arduino platform. This course offered in the spring semester is only open to those who have taken this first semester course (c179A), which covers the fundamental skills required to undertake this project. This class is designed for upper division undergraduates to early graduate students.
GC-Maker Lab II: Instrument development: Read More [+]

Rules & Requirements
Prerequisites: Chem 3AL, GC-Maker Lab I (fall semester)

Hours & Format
Fall and/or spring: 15 weeks - 6 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructor: Rhew

Also listed as: GEOG C179B

GC-Maker Lab II: Instrument development: Read Less [-]
ESPM C180 Air Pollution 3 Units
This course is an introduction to air pollution and the chemistry of earth's atmosphere. We will focus on the fundamental natural processes controlling trace gas and aerosol concentrations in the atmosphere, and how anthropogenic activity has affected those processes at the local, regional, and global scales. Specific topics include stratospheric ozone depletion, increasing concentrations of greenhouse gases, smog, and changes in the oxidation capacity of the troposphere.

Rules & Requirements
Prerequisites: Chemistry 1A-1B, Physics 8A or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Goldstein
Also listed as: CIV ENG C106/EPS C180

Air Pollution: Read Less [-]

ESPM 181A Fire Ecology 3 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
Fundamentals of wildland fire including fire behavior modeling, fire history methods, prescribed fire techniques, fire ecology, fire management, fire in the urban-wildland interface, wildland fire, and ecosystem sustainability. Laboratories on inventory methods, fire history, modeling of fire behavior and risk, and prescribed burning.

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Stephens
Fire Ecology: Read Less [-]

ESPM 182 Forest Operations Management 3 Units
Terms offered: Fall 2018, Fall 2016, Fall 2014
Examination of "on the ground" activities necessary to manage forests. Planning, design, and implementation of activities such as road building, forest harvesting, erosion control, and fire suppression are the central focus of the course. Aspects of timber harvest planning, archaeological surveys related to forest management, road closure, stream bank stabilization, and legislative control of forest operations will also be explored.

Rules & Requirements
Prerequisites: 101A, 101B, 101C and 101D

Hours & Format
Fall and/or spring: 15 weeks - 1.5 hours of lecture and 4 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: York
Forest Operations Management: Read Less [-]

ESPM 183 Forest Ecosystem Management and Planning 4 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
Introduces students to the concepts and quantitative tools needed for the sustainable management and planning of multi-use forest ecosystems. Topics covered include: forest regulation; estimation of ecological, economic, and social values; construction of dynamic forest models; methods for optimal decision-making; development of forest management plans; and ethics of natural resource management. Application to current issues in temperate and tropical forest management are discussed. Quantitative, analytical, and communication skills are emphasized. Oral presentation required.

Rules & Requirements
Prerequisites: ESPM 102C or instructor permission

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: O'Hara
Forest Ecosystem Management and Planning: Read Less [-]
ESPM C183 Forest Ecosystem Management 4 Units
Terms offered: Spring 2016, Spring 2015, Spring 2014
Introduces students to concepts and quantitative tools needed for the sustainable management of multi-use forest ecosystems. Topics covered include: estimation of ecological, economic, and social values; construction of dynamic forest models, methods for optimal decision-making, and development of forest management plans. Application to current issues in temperate and tropical forest management are discussed. Quantitative, analytical, and communication skills are emphasized. Oral presentation required.
Forest Ecosystem Management: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Potts
Also listed as: ENVECON C183
Forest Ecosystem Management: Read Less [-]

ESPM 184 Agroforestry Systems 3 Units
Terms offered: Fall 2010, Fall 2009, Fall 2008
Agroforestry principles and systems in use worldwide are examined, with emphasis on contemporary temperate agroforestry system design and management. Economic, biologic, social, and political conditions for successful agroforestry systems are analyzed. Some laboratory sessions will be field trips that will extend beyond the scheduled lab time.
Agroforestry Systems: Read More [+]

Rules & Requirements
Prerequisites: Upper division standing

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Altieri
Agroforestry Systems: Read Less [-]

ESPM 185 Applied Forest Ecology 4 Units
Terms offered: Fall 2018, Fall 2017, Fall 2016
Concepts and applications of silviculture for the establishment, growth, composition, and quality of forest trees and stands. Silviculture is presented as a tool to meet multiple resource and ecosystem management objectives related to wildlife habitat, watershed resources, forest health, or timber production. Two weekend field trips will be scheduled in lieu of several laboratories.
Applied Forest Ecology: Read More [+]

Rules & Requirements
Prerequisites: IB 153, ESPM 102A or course in community ecology

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 4 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: O'Hara
Applied Forest Ecology: Read Less [-]

ESPM 186 Management and Conservation of Rangeland Ecosystems 4 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
Begins with the evolution and domestication of grazing animals, continues through ranching and rangeland stewardship practices, and explores new institutional arrangements for conservation and restoration. Woodlands, grasslands, and shrublands provide biodiversity, wildlife habitat, watershed, recreation, open space, and forage. Human practices and ecosystem dynamics meet in rangeland management. Methods for changing, predicting, or assessing the results.
Management and Conservation of Rangeland Ecosystems: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Bartolome, Huntsinger
Management and Conservation of Rangeland Ecosystems: Read Less [-]
ESPM 187 Restoration Ecology 4 Units
Terms offered: Spring 2014, Spring 2013, Spring 2012
This course covers ecological theories that inform the practice of ecological restoration, with particular focus on local (Bay Area) restoration and linkages with social, political, and economic factors. Laboratories focus on assessment techniques and cumulate with formulation of a restoration management plan. Laboratories will be based at the Richmond Field Station, served by campus shuttle.
Restoration Ecology: Read More [+]

Rules & Requirements
Prerequisites: One course in ecology; upper division or graduate standing

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture, 1 hour of fieldwork, and 3 hours of laboratory per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Suding

Restoration Ecology: Read Less [-]

ESPM 188 Case Histories in Wildlife Management 2 Units
Terms offered: Spring 2014, Spring 2013, Spring 2012
Seminar format with presentation and discussion by each student, with long term paper requirement. Examination in depth of current issues in wildlife management.
Case Histories in Wildlife Management: Read More [+]

Rules & Requirements
Prerequisites: 114

Hours & Format
Fall and/or spring: 15 weeks - 4 hours of seminar per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam not required.

Instructor: Barrett

Case Histories in Wildlife Management: Read Less [-]

ESPM 190 Seminar in Environmental Issues 3 Units
Terms offered: Spring 2017, Fall 2010, Fall 2009
Interdisciplinary study of issues for advanced students. Designed to develop skills in critical analysis of specific issues. Different topics will be available each semester reflecting faculty and student interest. Major research project required.
Seminar in Environmental Issues: Read More [+]

Rules & Requirements
Prerequisites: Upper division standing and consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam not required.

Instructor: Suding

Seminar in Environmental Issues: Read Less [-]

ESPM C191 The American Forest: Its Ecology, History, and Representation 4 Units
Terms offered: Spring 2012, Spring 2011, Spring 2007, Fall 2004
The American forest will be examined in terms of its ecology, history, and representations in paintings, photographs, and literary essays. This examination seeks to understand the American forest in its scientific and economic parameters, as well as the historic, social, and ideological dimensions which have contributed to the evolution of our present attitudes toward the forest.
The American Forest: Its Ecology, History, and Representation: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Lovell, McBride

Also listed as: AMERSTD C112F/HISTART C189/UGIS C136

The American Forest: Its Ecology, History, and Representation: Read Less [-]
ESPM C192 Molecular Approaches to Environmental Problem Solving 2 Units
Terms offered: Spring 2019, Fall 2018, Spring 2018
Seminar in which students consider how modern biotechnological approaches, including recombinant DNA methods, can be used to recognize and solve problems in the area of conservation, habitat and endangered species preservation, agriculture and environmental pollution. Students will also develop and present case studies of environmental problems solving using modern molecular methods.

Molecular Approaches to Environmental Problem Solving: Read More [+]

Rules & Requirements
Prerequisites: Junior or senior standing in the Genetics and Plant Biology or Microbial Biology major, or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Lindow
Formerly known as: Environ Sci, Policy, and Management 192
Also listed as: PLANTBI C192

Molecular Approaches to Environmental Problem Solving: Read Less [-]

ESPM C193A Environmental Education 3 Units
Terms offered: Fall 2012, Fall 2011, Fall 2010
Theory and practice of translating ecological knowledge, environmental issues, and values into educational forms for all age levels and all facets of society, including schools. Concentrated experience in participatory education.

Environmental Education: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 5.5 hours of lecture and 6 hours of fieldwork per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Hurst
Also listed as: EDUC C193A

ESPM 194 Senior Seminar in Conservation and Resource Studies 2 Units
Terms offered: Spring 2012, Fall 2011, Spring 2011
Seminar in which students synthesize their knowledge, skills, and interests into a holistic perspective. A one-hour oral presentation in the area of interest and a senior thesis synthesizing the area of interest are required. Required final semester for all CRS majors.

Senior Seminar in Conservation and Resource Studies: Read More [+]

Rules & Requirements
Prerequisites: Senior standing in CRS major

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.

Senior Seminar in Conservation and Resource Studies: Read Less [-]

ESPM 194A Senior Seminar in Conservation and Resource Studies 2 Units
Terms offered: Spring 2019, Fall 2018, Spring 2018
Seminar in which students synthesize their knowledge, skills, and interests into a holistic perspective. A one-hour oral presentation in the area of interest and a senior thesis synthesizing the area of interest are required. Required final semester for all CRS majors.

Senior Seminar in Conservation and Resource Studies: Read More [+]

Rules & Requirements
Prerequisites: Senior standing in CRS major

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.

Senior Seminar in Conservation and Resource Studies: Read Less [-]
ESPM 194B Capstone Course in Society and Environment 1 Unit
Terms offered: Spring 2019, Fall 2018, Spring 2018
Senior capstone project in the student's primary area of concentration and presentation to the ESPM Society and Environment faculty and majors. Required of all graduating seniors in the ESPM and Society and Environment major. Students who have completed ESPM 195, H196, or 197 may substitute that course for ESPM 194B.

ESPM 195 Senior Thesis 3 - 4 Units
Terms offered: Summer 2018 8 Week Session, Spring 2017, Fall 2016
Subject must be approved by faculty sponsor during final semester of the junior year and course initiated in the first semester of the senior year. Credit option: Conservation Resource Studies majors who have successfully completed 195 may petition for exemption from 194.

ESPM H196 Honors Research 4 Units
Terms offered: Fall 2016, Spring 2016, Fall 2015
Supervised independent honors research specific to aspects of environmental science, policy, and management, followed by a written report to department. Submission of no more than 300 words required for approval.
ESPM 197 Field Study in Environmental Science, Policy, and Management 1 - 3 Units
Terms offered: Summer 2017 8 Week Session, Spring 2017, Fall 2016
Supervised experience in off-campus organizations relevant to specific aspects of environmental science, policy, and management. Regular individual meetings with faculty sponsor and written reports required.
Field Study in Environmental Science, Policy, and Management: Read More [+]

Rules & Requirements
Prerequisites: Upper division standing. Campus and departmental restrictions apply
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1-3 hours of fieldwork per week
Summer:
6 weeks - 1-5 hours of fieldwork per week
8 weeks - 1-5 hours of fieldwork per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Field Study in Environmental Science, Policy, and Management: Read Less [-]

ESPM 198 Directed Group Studies for Advanced Undergraduates 1 - 3 Units
Terms offered: Fall 2018, Spring 2017, Fall 2016
Group study of special topics in environmental science, policy, and management that are not covered in depth in regular courses in the department.
Directed Group Studies for Advanced Undergraduates: Read More [+]

Rules & Requirements
Prerequisites: Upper division standing; consent of instructor; campus and departmental restrictions apply
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1-3 hours of directed group study per week
Summer:
6 weeks - 2.5-7.5 hours of directed group study per week
8 weeks - 1.5-5.5 hours of directed group study per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Directed Group Studies for Advanced Undergraduates: Read Less [-]

ESPM 198BC Berkeley Connect 1 Unit
Terms offered: Spring 2019, Fall 2018, Spring 2018
Berkeley Connect is a mentoring program, offered through various academic departments, that helps students build intellectual community. Over the course of a semester, enrolled students participate in regular small-group discussions facilitated by a graduate student mentor (following a faculty-directed curriculum), meet with their graduate student mentor for one-on-one academic advising, attend lectures and panel discussions featuring department faculty and alumni, and go on field trips to campus resources. Students are not required to be declared majors in order to participate.
Berkeley Connect: Read More [+]

Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
