Terms offered: Fall 2016  
For over a hundred years, the political status of Tibet has commanded a level of attention on the international stage – and within China – seemingly disproportionate to the size of its population and economy, and in spite of its reputation as a remote periphery. This course will examine the historical, cultural, and economic assumptions underlying contemporary discourses of Tibetan politics, and relate them to discourses of global power and peripheries more generally. Grounding discussion in primary sources and critical works from across regions and disciplines, we will examine the roots of current conflict and the ways in which contending Buddhist, nationalist and internationalist projects have contributed to the making of modern Tibet.

Drawing from primary sources as well as cross-disciplinary scholarship, we will examine issues of translation in canonical medical literature; traditions of ritual and practice; how medicine is taught; relationships between medicine and Buddhism; ideas about human bodies, subtle anatomy, cosmology, and gender norms; and aspects of modernization and globalization.
