Agricultural and Resource Economics

Overview

The Department of Agricultural & Resource Economics focuses on applied economic and policy questions in agriculture, biotechnology, environment, natural resources, international development, and trade. Graduate students, faculty, and other affiliates conduct research in the following fields: agricultural economics and agribusiness; agricultural resource policy and political economy; applied econometrics; development; energy, environmental, and resource economics; intellectual property rights/biotechnology; and international economics and trade policy.

Our faculty have received many awards for research and teaching, and serve on editorial boards of journals, foundations, and other research institutes. For further information, please see our faculty profiles (https://are.berkeley.edu/people/faculty/).

Seminars

The department hosts a weekly Departmental Seminar, as well as participating in other seminars on specialized topics. For information regarding these seminars, please click the links below:

- Departmental Seminar (https://are.berkeley.edu/events/)
- Seminar in International Trade and Finance (http://events.berkeley.edu/index.php/calendar/sn/econ.html?view=summary&/#38;timeframe=range&)
- Energy Institute at Haas (http://ei.haas.berkeley.edu/)

Giannini Foundation

The Giannini Foundation of Agricultural Economics was founded in 1930 from a grant made by the Bancitaly Corporation to the University of California in tribute to its organizer and past president, Amadeo Peter Giannini of San Francisco. Members of the Giannini Foundation are University of California faculty and Cooperative Extension specialists in agricultural and resource economics on the Berkeley, Davis, and Riverside campuses. The broad mission of the Foundation is to promote and support research and outreach activities in agricultural economics and rural development relevant to California. For further information on the Foundation, please visit the website (http://giannini.ucop.edu/).

Undergraduate Program

Environmental Economics and Policy (http://guide.berkeley.edu/undergraduate/degree-programs/environmental-economics-policy/): BA (College of Letters and Science), BS (College of Natural Resources)

Graduate Program

Agricultural and Resource Economics (http://guide.berkeley.edu/graduate/degree-programs/agricultural-resource-economics/): PhD

Agricultural and Resource Economics

A,RESEC 201 Production, Industrial Organization, and Regulation in Agriculture 4 Units

Terms offered: Fall 2020, Fall 2019, Fall 2015

Basic concepts of micro and welfare economics: partial and general equilibrium. Industrial organization: monopolistic competition, vertical integration, price discrimination, and economics of information with applications to food retailing, cooperatives, fishing, and energy. Production, Industrial Organization, and Regulation in Agriculture: Read More [+]

Rules & Requirements

Prerequisites: Economics 201A or equivalent or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Agricultural and Resource Economics/Graduate

Grading: Letter grade.

Production, Industrial Organization, and Regulation in Agriculture: Read Less [-]

A,RESEC 202 Issues and Concepts in Agricultural Economics 4 Units

Terms offered: Spring 2020, Spring 2019, Spring 2018

History, institutions, and policies affecting agriculture markets and environmental quality. Producer behavior over time and under uncertainty. Asset fixity and agricultural supply models. Issues and Concepts in Agricultural Economics: Read More [+]

Rules & Requirements

Prerequisites: Economics 201A-201B or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Agricultural and Resource Economics/Graduate

Grading: Letter grade.

Issues and Concepts in Agricultural Economics: Read Less [-]
A,RESEC 210 Probability and Statistics 4 Units
Terms offered: Fall 2020, Fall 2019, Fall 2018
This is an introduction to probability theory and statistical inference. It is primarily intended to prepare students for the graduate econometrics courses 212 and 213. The emphasis of the course is on the principles of statistical reasoning. Probability theory will be discussed mainly as a background for statistical theory and specific models will, for the most part, be considered only to illustrate the general statistical theory as it is developed.
Probability and Statistics: Read More [+]
Rules & Requirements
Prerequisites: Graduate standing or consent of instructor

A,RESEC 211 Mathematical Methods for Agricultural and Resource Economists 4 Units
Terms offered: Fall 2015, Fall 2014, Fall 2013
The goal of this course is to provide entering graduate students with the basic skills required to perform effectively in the graduate program and as professional economists. The lectures place heavy emphasis on intuition, graphical representations, and conceptual understanding. Weekly problem sets provide the opportunity to master mechanical skills and computational techniques. Topics covered include real analysis, linear algebra, multivariable calculus, theory of static constrained optimization, and comparative statics.
Mathematical Methods for Agricultural and Resource Economists: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor

A,RESEC 212 Econometrics: Multiple Equation Estimation 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Introduction to the estimation and testing of economic models. Includes analysis of the general linear model, asymptotic theory, instrumental variable, and the generalized method of moments. In addition, a survey of time series, analysis, limited dependent variables.
Econometrics: Multiple Equation Estimation: Read More [+]
Rules & Requirements
Prerequisites: 211 or consent of instructor

A,RESEC 213 Applied Econometrics 4 Units
Terms offered: Fall 2020, Fall 2019, Fall 2018
Standard and advanced econometric techniques are applied to topics in agriculture and resource economics. Techniques include limited dependent variables, time series analysis, and nonparametric analysis. Students will use computers to conduct statistical analyses.
Applied Econometrics: Read More [+]
Rules & Requirements
Prerequisites: 211 and 212 or equivalent or consent of instructor
A,RESEC 214 New Econometric and Statistical Techniques 4 Units  
Terms offered: Spring 2012, Spring 2011, Spring 2010
Theory and application of new and emerging approaches to estimation and inference. Bayesian, maximum entropy, and other new applications to economic problems will be emphasized. Students will use computers to conduct statistical analyses.

New Econometric and Statistical Techniques: Read More [+]
Rules & Requirements

Prerequisites: 211, 213 or equivalent or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.

New Econometric and Statistical Techniques: Read Less [-]

A,RESEC 219A Econometric Project Workshop 2 Units  
Terms offered: Fall 2020, Fall 2019, Fall 2018
Techniques for preparing econometric studies, including finding data sources, the reporting of results, and standards for placing research questions with existent literature. With faculty guidance, students prepare approved econometric projects, present projects to the class, provide comments on other student projects, and revise projects in response to faculty and student comments.

Econometric Project Workshop: Read More [+]
Rules & Requirements

Prerequisites: 210, 211, and 212 or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.
Instructors: Auffhammer, Sadoulet
Econometric Project Workshop: Read Less [-]

A,RESEC 219B Econometric Project Workshop 2 Units  
Terms offered: Spring 2020, Spring 2019, Spring 2018
Techniques for preparing econometric studies, including finding data sources, the reporting of results, and standards for placing research questions with existent literature. With faculty guidance, students prepare approved econometric projects, present projects to the class, provide comments on other student projects, and revise projects in response to faculty and student comments.

Econometric Project Workshop: Read More [+]
Rules & Requirements

Prerequisites: 210, 211, and 212 or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.
Instructors: Auffhammer, Sadoulet
Econometric Project Workshop: Read Less [-]

A,RESEC 232 Empirical International Trade and Investment 2 Units  
Terms offered: Spring 2010, Spring 2009, Spring 2007
Empirical aspects on international trade, foreign investment, and the environment. Issues related to testing various trade models. Topics include: testing trade models (HO, Ricardo, Specific Sector); gravity models; linkages between openness and growth; trade orientation and firm performance; pattern of trade; trade and the environment; labor markets and trade. New topics in international trade with empirical applications, such as trade models with heterogeneous firms, outsourcing and foreign investment.

Empirical International Trade and Investment: Read More [+]
Rules & Requirements

Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 8 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.

Empirical International Trade and Investment: Read Less [-]
A,RESEC 241 Economics and Policy of Production, Technology and Risk in Agricultural and Natural Resources 3 Units
Terms offered: Fall 2017, Fall 2016, Fall 2015
This course covers alternative models of production, resource and environmental risk management; family production function; adoption and diffusion; innovation and intellectual property rights; agricultural and environmental policies and their impact on production and the environment; water resources; pest control; biotechnology; and optimal control over space and time.
Economics and Policy of Production, Technology and Risk in Agricultural and Natural Resources: Read More [+]
Rules & Requirements
Prerequisites: 201 and 202, or Economics 201A-201B, or consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.
Economics and Policy of Production, Technology and Risk in Agricultural and Natural Resources: Read Less [-]

A,RESEC 242 Quantitative Policy Analysis 3 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
Production versus predatory government behavior, rent seeking, social waste, and their trade-offs with the provision of growth-promoting public goods. Three failure types are distinguished: market, government, and organizational. The roles of public versus special interests are modeled to determine degree and extent of organizational failures in collective group behavior. Alternative frameworks are used to evaluate various types of policy reform.
Quantitative Policy Analysis: Read More [+]
Rules & Requirements
Prerequisites: 211 or consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.
Quantitative Policy Analysis: Read Less [-]

A,RESEC 249 Agricultural, Food, and Resource Policy Workshop 1 Unit
Terms offered: Fall 2020, Spring 2020, Fall 2019
Presentation and criticism of ongoing research by faculty, staff and students. Not necessarily offered every semester.
Agricultural, Food, and Resource Policy Workshop: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Agricultural, Food, and Resource Policy Workshop: Read Less [-]

A,RESEC C251 Microeconomics of Development 3 Units
Terms offered: Fall 2020, Fall 2019, Fall 2018
Theoretical and empirical analyses of poverty and inequality, household and community behavior, and contract and institutions in the context of developing countries.
Microeconomics of Development: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 4 hours of lecture per week
Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.
Also listed as: ECON C270A
Microeconomics of Development: Read Less [-]
International Economic Development Policy: 3 Units
Terms offered: Fall 2020, Fall 2019, Fall 2018
This course emphasizes the development and application of policy solutions to developing-world problems related to poverty, macroeconomic policy, and environmental sustainability. Methods of statistical, economic, and policy analysis are applied to a series of case studies. The course is designed to develop practical professional skills for application in the international arena.

Rural Economic Development Workshop: 1 Unit
Terms offered: Fall 2020, Spring 2020, Fall 2019
Presentation and criticism of ongoing research by faculty, staff and students. Not necessarily offered every semester.

Environmental and Resource Economics: 3 Units
Terms offered: Fall 2020, Fall 2019, Fall 2018
Theory of renewable and nonrenewable natural resource use, with applications to forests, fisheries, energy, and climate change. Resources, growth, and sustainability. Economic theory of environmental policy,Externality; the Coasian critique; tax incidence and anomalies; indirect taxes; the double dividend; environmental standards; environmental regulation; impact of uncertainty on taxes and standards; mechanism design; monitoring, penalties, and regulatory strategy; emissions markets.

Non-market Valuation: 3 Units
Terms offered: Spring 2014, Spring 2012, Spring 2011
The economic concept of value; historical evolution of market and non-market valuation; revealed preference methods: single site demand, multi-site demand, corner solution models, and valuation of quality changes; averting behavior; the hedonic method; contingent valuation; other stated preference methods: ranking, choice, conjoint analysis; the value of life and safety; sampling and questionnaire design for valuation surveys.
A,RESEC 263 Dynamic Methods in Environmental and Resource Economics 3 Units
Terms offered: Spring 2018, Spring 2016, Fall 2013
This course studies methods of analysis and optimal control of dynamic systems, emphasizing applications in environmental and natural resource economics. Continuous-time deterministic models are studied using phase plane analysis, the calculus of variations, the Maximum Principle, and dynamic programming. Numerical methods are applied to discrete time stochastic and deterministic dynamic models.
Dynamic Methods in Environmental and Resource Economics: Read More [+]

Rules & Requirements
Prerequisites: Ph.D.-level economic theory or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.

Dynamic Methods in Environmental and Resource Economics: Read Less [-]

A,RESEC 264 Empirical Energy and Environmental Economics 3 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
This course is designed to help prepare graduate students to conduct empirical research in energy and environmental economics. The course has two broad objectives. The first is to develop an in-depth understanding of specific empirical methods and research designs that are routinely used in the field of energy and environmental economics. The second is to familiarize students with some of the economic theories and institutions that are most relevant to empirical work in this area.
Empirical Energy and Environmental Economics: Read More [+]

Rules & Requirements
Prerequisites: 212 and 213; or equivalent

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.
Instructor: Fowlie

Empirical Energy and Environmental Economics: Read Less [-]

A,RESEC 265 Advanced Topics in Environmental and Resource Economics 3 Units
Terms offered: Fall 2015
Advanced topics in environmental and resource economics. Topics vary and include the economics of land, water, fisheries, forestry, pesticides, endangered species, policy instruments for environmental policy, and empirical evaluations of environmental and resource policy.
Advanced Topics in Environmental and Resource Economics: Read More [+]

Rules & Requirements
Prerequisites: Ph.D.-level economic theory and econometrics or consent of instructor
Repeat rules: Course may be repeated for credit when topic changes.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Agricultural and Resource Economics/Graduate
Grading: Letter grade.
Instructors: Berck, Sunding

Advanced Topics in Environmental and Resource Economics: Read Less [-]

A,RESEC 269 Natural Resource Economics Workshop 1 Unit
Terms offered: Fall 2020, Spring 2020, Fall 2019
Presentation and criticism of ongoing research by faculty, staff, and students. Not necessarily offered every semester.
Natural Resource Economics Workshop: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
