Anthropology

Overview

The Department of Anthropology offers students the opportunity to study humankind from the broadest historical and geographical perspective. Courses in the department offer knowledge of social and cultural aspects of behavior, as well as the physical nature of humans. Lower division courses are intended to give a general understanding of human evolution, prehistory, and the nature of human cultures, while upper division courses elaborate particular themes.

The collections and research facilities of the Phoebe A. Hearst Museum of Anthropology are available for study in archaeology, ethnography, physical anthropology, and related subjects by graduate and undergraduate students, and visiting scholars. The museum's exhibition hall is used for instructional and educational purposes, particularly in connection with classwork. Those interested may address the Director at 103 Kroeber Hall.

Students seeking information on the Undergraduate Program may inquire at 215 Kroeber Hall. Students seeking information on the Graduate Program may inquire at 205 Kroeber Hall.

Library

The George & Mary Foster Anthropology Library contains a deep and rich collection of books and journals in all areas of anthropological research, including especially strong historical collections related to California Native American culture and California archaeology. The Anthropology Library is part of the larger UC Berkeley Library — an internationally renowned research and teaching facility with a collection of over 11 million volumes. In addition to extensive collections, the library offers robust services to connect users with information in all formats and to build their related research skills.

ANTHRO C12AC Fire: Past, Present and Future Interactions with the People and Ecosystems of California 4 Units
Terms offered: Fall 2019, Fall 2018
The course presents a diachronic perspective on human-fire interactions with local ecosystems in California that spans over 10,000 years. The course will provide an historical perspective on human-fire interactions at the landscape scale using a diverse range of data sources drawn from the fields of fire ecology, biology, history, anthropology, and archaeology. An important component includes examining how diverse cultures and ethnicity influenced how people perceived and used fire at the landscape scale in ancient, historical and modern times. The implications of these diverse fire practices and policies will be analyzed and the consequences they have had for transforming habitats and propagating catastrophic fires will be explored.

ANTHRO 122G Archaeology of the Americas: Archaeology of the American Southwest 4 Units
Terms offered: Spring 2008, Spring 2006
This course will outline the development of native cultures in the American Southwest from Paleo-Indian times (ca. 11,500 BC) through early European contact (ca. A.D. 1600). Topics to be covered include the greater environment, early foraging culture, the development of agriculture and village life, the emergence and decline of regional alliances, abandonment, and reorganization, and changes in social organization, external relations and trade. The course is designed as an advanced upper division seminar for students majoring in anthropology with an emphasis in archaeology. Can be taught as a distance learning course with another university.

ANTHRO 123A Old World Prehistory 4 Units
Terms offered: Spring 2018, Fall 2014, Fall 2009
This course explores the dramatic developments in human evolution, behavior and culture that accompany the emergence of prehistoric human society, from our earliest Palaeolithic ancestors who first ventured out of Africa over a million years ago to the origins of settled farming economies and the first urban environments. Focusing on the Old World, we trace these interconnected transitions in Africa, Europe, the Middle East and Asia. The archaeological record forms our dataset, providing a rich record of economic and technological developments, settlement, architecture, burial practices, art, ideology, and social organization.

ANTHRO C124C Human Biogeography of the Pacific 3 Units
Terms offered: Spring 2015, Spring 2013
This course examines the history of human dispersal across Oceania from the perspectives of biogeography and evolutionary ecology. H. sapiens faced problems of dispersal, colonization, and extinction, and adapted in a variety of ways to the diversity of insular ecosystems. A dual evolutionary model takes into account cultural evolution and transmission, as well as biological evolution of human populations. This course also explores the impacts of human populations on isolated and fragile insular ecosystems, and the reciprocal effects of anthropogenic change on human cultures. ANTHRO 127A Bioarchaeology: Introduction to Skeletal Biology and Bioarchaeology 4 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
An introduction to skeletal biology and anatomy to understand how skeletal remains can be used in reconstructing patterns of adaptation and biocultural evolution in past populations, emphasizing a problem-based approach to bioarchaeological questions.

ANTHRO 126M Geoarchaeology 4 Units
Terms offered: Fall 2019, Fall 2017, Spring 2016
Humans have always been affected by changes in their landscape and, in turn, had an influence on their physical surroundings. The contexts that archaeological material and features are found within yield invaluable clues as to how sites form, what types of activities people performed in them, and what kinds of natural and cultural processes altered the archaeological record from deposition to excavation. This course introduces the methods of studying archaeological remains from an environmental context in order to reconstruct the relationships between people and the environment, drawing on case studies from different areas of the world.

ANTHRO 127B Bioarchaeology: Reconstruction of Life in Bioarchaeology 4 Units
Terms offered: Spring 2017, Spring 2013, Summer 2010 First 6 Week Session
This course deals with the skeletal biology of past populations, covering both the theoretical approaches and critical analysis of methods used in the study of skeletal and dental remains, and is considered the continuing course for those that have already taken introduction to skeletal biology, 127A.

ANTHRO 127C Bioarchaeology Research: Data Collection and Analysis 5 Units
Terms offered: Spring 2019
Bioarchaeology is the study of archaeological human skeletal remains together with contextual information (archival, historical, material culture) to provide insight on the life of people and communities in the past. In this course you will delve into the formative contemporary literature and get to work with actual archaeological skeletal remains in order to learn bioarchaeological methods, develop your own research questions, and conduct and complete a hands-on research project. You will work with skeletal remains from the stage of identification, inventory, illustration/photography, to the collection of data such as sex, age, stature, and health/growth, pathology, and statistical analysis.

Course will provide an overview of hunter-gatherer archaeology, focusing on the history of hunter-gatherer archaeology in North America and Britain; long-term changes in hunter-gatherer subsistence, settlement, mortuary/ceremonial practices and crafts/trade; social archaeology of hunter-gatherers including studies of gender, cognition, and cultural landscapes; and discussions of the relevance of hunter-gatherer studies in the context of world archaeology.

ANTHRO 129E Topical Areas in Archaeology: Household Archeology 4 Units
Terms offered: Summer 2015 10 Week Session, Summer 2015 Second 6 Week Session, Fall 2012
This class explores the questions: why study the archaeology of households? How do we define households and how can we identify and study them archaeologically? What research questions, strategies, and methodologies does the archaeological investigation of households entail? How does the study of households contribute to multiscalar approaches for understanding social organization? Why is this important? What are the causes and effects of changing scales of analysis?

ANTHRO C129D Holocene Paleoecology: How Humans Changed the Earth 3 Units
Terms offered: Spring 2014, Spring 2011, Spring 1998
Since the end of the Pleistocene and especially with the development of agriculturally based societies humans have had cumulative and often irreversible impacts on natural landscapes and biotic resources worldwide. Thus "global change" and the biodiversity crisis are not exclusively developments of the industrial and post-industrial world. This course uses a multi-disciplinary approach, drawing upon methods and data from archaeology, palynology, geomorphology, paleontology, and historical ecology to unravel the broad trends of human ecodynamics over the past 10,000 years.

The major issues, research objectives, databases, and techniques involved in the study of past society's relationship and interaction with the natural environment. Particularly methods that use "noncultural" information in archaeological research, but with a cultural orientation. Major subjects addressed will be paleoenvironmental reconstruction; human-environment interaction, impact, and environmental degradation; paleodiet and domestication; land-use and social environments; with an emphasis on ecofactual analysis.

ANTHRO 136B Public Anthropology: Museum Methods 4 Units
Terms offered: Summer 2009 First 6 Week Session, Summer 2008 Second 6 Week Session, Summer 2007 First 6 Week Session
This course will introduce participants to the fundamentals of contemporary museum practices. It is intended for two groups of students: individuals who may be thinking of conducting research in museums, and may benefit from an understanding of the way these institutions work; and individuals who may be thinking of museum work as a post-graduate career. The course will include both discussion of museum concepts and practical application of these concepts through real-world exercises. While the course fulfills the method requirement, it covers practices of art, natural history, and science museums as well.

ANTHRO 136A Museum Exhibit Curation and Design 4 Units
Terms offered: Fall 2017, Fall 2011, Fall 2009
A practical introduction to contemporary museum approaches to exhibition design, with particular application to the design of exhibits that present cultural heritage in anthropology, art, and natural history museums. Both the theory of museum exhibit design and practice will be covered, including critiques of representation; issues of cultural heritage; conversation, education, and installation standards; and incorporation of interactivity, including through digital media.

PUBLIC ANTHRO 136C Multimedia Authoring Part 1 4 Units
Terms offered: Fall 2010, Fall 2006
This course is the first part in a two-part series of courses that coach students in research and presentation of archaeological information through nonlinear multimedia authoring. The content of the course varies and may focus on an area or a topic depending on instructor. Students experience the first stage of multimedia authoring process: research, planning, and design. The focus is on content development and evaluation of digital research sources, with an introduction to software skills and practice.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
ANTHRO 149 Psychological Anthropology 4 Units
Terms offered: Fall 2017, Spring 2016, Spring 2015
In the contemporary world, different systems of knowledge, philosophies, and techniques of the self, understandings of normality and pathology, illness and healing, are increasingly engaged in a dialogue with each other in the lives, on the bodies, and in the imagination of people. The terms of this dialogue are often unequal and painful, yet they are also productive of new subjectivities and new voices. It is the task of a renewed psychological anthropology to study and reflect on these processes. Topics to be covered in this class include new forms of the subject and ethics at the intersection of psychical/psychiatric, political, and religious processes and discourses; ethnopsychoanalysis, the psychology of colonization and racism; anthropological approaches to possession and altered states, emotion, culture, and the imagination, madness and mental illness. The specific stress will be on the stakes of anthropology of the psyche today, for an understanding of power and subjugation, delusion and the imagination, violence, and the possibility of new forms of life.

ANTHRO 150 Utopia: Art and Power in Modern Times 4 Units
Terms offered: Spring 2019, Fall 2016, Fall 2015
Modern times have been dominated by utopian visions of how to achieve a happy future society. Artists in competing social systems played a central role in the development of these visions. But artistic experiments were filled with paradoxes, contributing to the creation not only of the most liberating and progressive ideals and values but also to the most oppressive regimes and ideologies. The course questions: what is art, what can it achieve and destroy, what is beauty, artistic freedom, and the relationship between esthetics, ethics, and power?

ANTHRO 151 Disability and Culture 4 Units
Terms offered: Fall 2005, Fall 2002, Spring 2001
Disability is a cultural construct. This does not mean that physical and mental impairments are not real, but that our conceptions of the body and its possibilities and impossibilities are constantly mediated through social norms and mores. The built environments and social institutions we navigate are based around these concepts of the "normal." Using ethnographic examples drawn from various countries around the world, and various disability categories, we examine the contingency of the categories of disability and normality from social, legal, and personal perspectives.

ANTHRO 152 Art and Culture 4 Units
