Environmental Science, Policy and Management

Overview

The Department of Environmental Science, Policy, and Management (ESPM) is a multidisciplinary program that recognizes the urgency and significance of our current environmental challenges, and the enormous opportunities that will lead to transformative change.

We have award-winning faculty in climate science, biodiversity, environmental policy, land use, and community outreach — all driven by a collective interest in our environmental future.

At Berkeley, ESPM is the campus portal to environmental research and issues. Berkeley is founded on the principle of knowledge for the public good. Our department builds on this promise.

Facilities

Students and faculty in the Department of Environmental Science, Policy, and Management have access to world-class academic and research facilities including libraries, field stations, natural history museums, and many specialized research facilities for work ranging from stable isotope chemistry and high-throughput DNA sequencing to geospatial information and data science. UC Berkeley’s Bay Area location encourages research collaborations, hands-on learning, and outreach opportunities with numerous public and private agencies, including the Lawrence Berkeley National Laboratory, California Academy of Sciences, US Forest Service, US Fish and Wildlife Service, US National Park Service, California Department of Forestry and Fire Protection, California Department of Fish and Game, and California Department of Food and Agriculture, and other major research universities.

Undergraduate Programs

We offer a portfolio of exciting undergraduate majors that lead to diverse career options for students interested in environmental science, ecosystem management, conservation biology, global change science, environmental policy, and/or preparation for the health professions.

Conservation and Resource Studies: BS and Minor
Environmental Sciences: BS
Ecosystem Management and Forestry (http://guide.berkeley.edu/undergraduate/degree-programs/forestry-natural-resources): BS and Minor
Molecular Environmental Biology: BS
Society and Environment: BS
Food Systems: Minor
Geospatial Information Science and Technology: Minor

Graduate Programs

Our top-ranked graduate program consistently serves as a gateway to exciting careers in research, teaching, and public outreach.

Environmental Science, Policy, and Management: PhD
Forestry: MF
Range Management: MS

ESPM 2 The Biosphere 3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
An introduction to the unifying principles and fundamental concepts underlying our scientific understanding of the biosphere. Topics covered include the physical life support system on earth; nutrient cycles and factors regulating the chemical composition of water, air, and soil; the architecture and physiology of life; population biology and community ecology; human dependence on the biosphere; and the magnitude and consequences of human interventions in the biosphere.
The Biosphere: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
The Biosphere: Read Less [-]

ESPM 5 FROM FARM TO TABLE: FOOD SYSTEMS IN A CHANGING WORLD 4 Units
Terms offered: Summer 2019 Second 6 Week Session, Summer 2018 Second 6 Week Session
This course explores the journey of the U.S. food supply from the farm to the family table. The ecology, management, and politics of farming under a global change scenario, the impact of our changing patterns of demand on food processing and retail, the opportunities and costs of exports, and the way different groups access, use, and consume food.
FROM FARM TO TABLE: FOOD SYSTEMS IN A CHANGING WORLD: Read More [+]

Hours & Format
Summer: 6 weeks - 7.5 hours of lecture and 2.5 hours of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Huntingter, Iles, DeMaster
FROM FARM TO TABLE: FOOD SYSTEMS IN A CHANGING WORLD: Read Less [-]
ESPM 6 Environmental Biology 3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Basic biological and ecological principles discussed in relation to environmental disruptions. Human interactions with the environment; their meaning for animals and plants. Discussion of basic ecological processes as a basis for understanding environmental problems and formulating strategies for their solution.

Environmental Biology: Read More [+]

Rules & Requirements
Prerequisites: One course in introductory college biology is recommended. Intended for nonscience majors

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Chapela

Environmental Biology: Read Less [-]

ESPM 9 Environmental Science Case Study Seminar 3 Units
Terms offered: Spring 2012, Spring 2011, Spring 2010
Utilizing a field intensive seminar format, the course will introduce lower division students to the process of addressing real environmental problems. Through a progression of case studies, students will explore a spectrum of research design and implementation approaches. By the end of the semester, they will be able to frame a researchable question, design a protocol for gathering relevant information, analyze the information, and derive an objective conclusion. Throughout the semester, students will present case study results in oral and written form.

Environmental Science Case Study Seminar: Read More [+]

Rules & Requirements
Credit Restrictions: Students will receive no credit for C10 after taking 10.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Welter
Also listed as: L & S C30V

Environmental Science Case Study Seminar: Read Less [-]

ESPM C10 Environmental Issues 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Relationship between human society and the natural environment; case studies of ecosystem maintenance and disruption. Issues of economic development, population, energy, resources, technology, and alternative systems.

Environmental Issues: Read More [+]

Rules & Requirements
Credit Restrictions: Students will receive no credit for C10 after taking 10.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Welter
Also listed as: L & S C30V

Environmental Issues: Read Less [-]

ESPM C11 Americans and the Global Forest 4 Units
Terms offered: Spring 2017, Spring 2015, Spring 2014
This course challenges students to think about how individual and American consumer decisions affect forest ecosystems around the world. A survey course that highlights the consequences of different ways of thinking about the forest as a global ecosystem and as a source of goods like trees, water, wildlife, food, jobs, and services. The scientific tools and concepts that have guided management of the forest for the last 100 years, and the laws, rules, and informal institutions that have shaped use of the forests, are analyzed.

Americans and the Global Forest: Read More [+]

Rules & Requirements
Credit Restrictions: Students will receive no credit for C10 after taking 10.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Welter
Also listed as: L & S C30U

Americans and the Global Forest: Read Less [-]
ESPM C12 Introduction to Environmental Studies 4 Units
Terms offered: Fall 2016, Fall 2015, Fall 2014
This integrative course, taught by a humanities professor and a science professor, surveys current global environmental issues; introduces the basic intellectual tools of environmental science; investigates ways the human relationship to nature has been imagined in literary and philosophical traditions; and examines how tools of scientific and literary analysis; scientific method, and imaginative thinking can clarify what is at stake in environmental issues and ecological citizenship.
Introduction to Environmental Studies: Read More [+]

Rules & Requirements
Credit Restrictions: Students will not receive credit for C12 after taking UGIS C12 or EnglWill count toward ESPM Social Science core requirement for the Conservish C77. ation and Resource studies major.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Also listed as: ENGLISH C77

ESPM C22AC Fire: Past, Present and Future Interactions with the People and Ecosystems of California 4 Units
Terms offered: Fall 2019, Fall 2018
The course presents a diachronic perspective on human-fire interactions with local ecosystems in California that spans over 10,000 years. The course will provide an historical perspective on human-fire interactions at the landscape scale using a diverse range of data sources drawn from the fields of fire ecology, biology, history, anthropology, and archaeology. An important component includes examining how diverse cultures and ethnicity influenced how people perceived and used fire at the landscape scale in ancient, historical and modern times. The implications of these diverse fire practices and policies will be analyzed and the consequences they have had for transforming habitats and propagating catastrophic fires will be explored.
Fire: Past, Present and Future Interactions with the People and Ecosystems of California: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Stephens, Lightfoot
Also listed as: ANTHRO C12AC

Fire: Past, Present and Future Interactions with the People and Ecosystems of California: Read Less [-]

ESPM 24 Freshman Seminar 1 Unit
Terms offered: Spring 2020, Fall 2019, Spring 2019
The Freshman Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Freshman Seminars are offered in all campus departments, and topics may vary from department to department and semester to semester. Enrollment limited to fifteen freshman.
Freshman Seminar: Read More [+]

Rules & Requirements
Repeat rules: Course may be repeated for credit when topic changes.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of seminar per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate
Grading/Final exam status: The grading option will be decided by the instructor when the class is offered. Final exam required.
Freshman Seminar: Read Less [-]
ESPM 39E Freshman/Sophomore Seminar 1 - 3 Units
Terms offered: Fall 2012
Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.
Freshman/Sophomore Seminar: Read More [+]
Rules & Requirements
Prerequisites: Priority given to freshmen and sophomores
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2-4 hours of seminar per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: The grading option will be decided by the instructor when the class is offered. Final exam required.
Freshman/Sophomore Seminar: Read Less [-]

ESPM 40 Insects and Human Society 3 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
An introduction to the diversity and natural history of insects in natural and human environments. The course examines the wonder of insects, their interactions with the living world, and their contributions to and impacts on human society.
Insects and Human Society: Read More [+]
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week
Summer: 8 weeks - 4 hours of lecture and 4 hours of discussion per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Will, Almeida
Insects and Human Society: Read Less [-]

ESPM 42 Natural History of Insects 3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
An outline of the main facts and principles of biology as illustrated by insects, with special emphasis on their relations to plants and animals, including humans.
Natural History of Insects: Read More [+]
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Will
Natural History of Insects: Read Less [-]

ESPM 44 Biological Control 2 Units
Terms offered: Fall 2014, Fall 2013, Fall 2012
Regulation of populations of organisms, especially insects, through interactions with parasites, predators, pathogens, competitors. Discussion of examples from agricultural, forest, urban, and recreational environments.
Biological Control: Read More [+]
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Mills
Biological Control: Read Less [-]
ESPM C46 Climate Change and the Future of California 4 Units
Terms offered: Spring 2018, Spring 2016
Introduction to California geography, environment, and society, past and future climates, and the potential impacts of 21st-century climate change on ecosystems and human well-being. Topics include fundamentals of climate science and the carbon cycle; relationships between human and natural systems, including water supplies, agriculture, public health, and biodiversity; and the science, law, and politics of possible solutions that can reduce the magnitude and impacts of climate change.
Climate Change and the Future of California: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Ackerly, Sedlak, Silver, Weissman
Also listed as: L & S C46
Climate Change and the Future of California: Read Less [-]

ESPM 50AC Introduction to Culture and Natural Resource Management 4 Units
Terms offered: Spring 2020, Fall 2019, Summer 2019 First 6 Week Session
An introduction to how culture affects the way we use and manage fire, wildland and urban forests, rangelands, parks and preserves, and croplands in America. The basic concepts and tools for evaluating the role of culture in resource use and management are introduced and used to examine the experience of American cultural groups in the development and management of western natural resources.
Introduction to Culture and Natural Resource Management: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Summer: 6 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Gong
Introduction to Culture and Natural Resource Management: Read Less [-]

ESPM 60 Environmental Policy, Administration, and Law 4 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Introduction to U.S. environmental policy process focuses on history and evolution of political institutions, importance of property, federal and state roles in decision making, and challenges of environmental policy. Emphasis is on use of science in decision making, choices between regulations and incentives, and role of bureaucracy in resource policy. Case studies on natural resource management, risk management, environmental regulation, and environmental justice.
Environmental Policy, Administration, and Law: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Summer: 6 weeks - 8 hours of lecture and 3 hours of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

ESPM 72 Introduction to Geographic Information Systems 3 Units
Terms offered: Summer 2019 Second 6 Week Session, Spring 2019, Summer 2018 Second 6 Week Session
Introduction to computer systems, data processing software for natural resources studies. Components of geographic information systems; concepts of surveying, mapping, and remote sensing as data sources; various methods of data processing and analysis including classification, map overlay, buffer analysis, topographic modeling, spatial interpolation, and map design with a GIS. Intensive hands-on practices with relevant computer software packages.
Introduction to Geographic Information Systems: Read More [+]

Rules & Requirements
Prerequisites: Three years of high school math

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week
Summer: 6 weeks - 6.5 hours of lecture and 6 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Gong
Introduction to Geographic Information Systems: Read Less [-]
ESPM 78A Teaching and Learning Environmental Science 4 Units
Terms offered: Fall 2012, Fall 2011, Fall 2010
Introduces theories of cognitive development and the practices of curriculum design and lesson presentation for environmental education. Ecology and natural resource management provide the context of curriculum development. Students create lesson plans integrating core concepts and their knowledge of local environmental issues. Lessons are presented to Bay Area K-12 students in field and classroom settings.

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture, 1 hour of discussion, and 3 hours of fieldwork per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Instructor: Spencer

Teaching and Learning Environmental Science: Read Less [-]

ESPM 88A Exploring Geospatial Data 2 Units
Terms offered: Spring 2017, Spring 2016
From interactive web maps to spatial data analysis, digital geographic data and information are becoming an important part of the data science landscape. Almost everything happens somewhere that can be mapped on the surface of the earth. In many cases the where matters as much to an analysis as the what and the why. Geospatial data analysis allows a researcher to consider location explicitly. This course provides an introduction to working with digital geographic data, or geospatial data. We will explore concepts of geospatial data representation, methods for acquisition, processing and analysis, and techniques for creating compelling geovisualizations. No prior knowledge is assumed or expected.

Exploring Geospatial Data: Read More [+]
Rules & Requirements
Prerequisites: This course is meant to be taken concurrently with Computer Science C8/Statistics C8/Information C8: Foundations of Data Science. Students may take more than one 88 (data science connector) course if they wish, ideally concurrent with or after having taken the C8 course

Hours & Format
Fall and/or spring: 15 weeks - 0.5 hours of lecture, 0.5 hours of discussion, and 1 hour of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Kelly

Exploring Geospatial Data: Read Less [-]
ESPM 88B Data Sciences in Ecology and the Environment 2 Units
Terms offered: Spring 2016
Many of the greatest challenges we face today come from understanding and interacting with the natural world: from global climate change to the sudden collapse of fisheries and forests, from the spread of disease and invasive species to the unknown wealth of medical, cultural, and technological value we derive from nature. Advances in satellites and microsensors, computation, informatics and the Internet have made available unprecedented amounts of data about the natural world, and with it, new challenges of sifting, processing and synthesizing large and diverse sources of information. In this course, students will apply methods and understanding they gain in the Foundations course to real-world ecological and environmental data.

Rules & Requirements

Prerequisites: This course is meant to be taken concurrently with Computer Science C8/Statistics C8/Information C8: Foundations of Data Science. Students may take more than one 88 (data science connector) course if they wish, ideally concurrent with or after having taken the C8 course.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructor: Boettiger

Data Sciences in Ecology and the Environment: Read More [+]

ESPM 90 Introduction to Conservation and Resource Studies Major 2 Units
Terms offered: Spring 2020, Fall 2019, Spring 2019
Introduction to the major, emphasizing each student's educational goals. Overview of ecological problems and contrasting approaches to solutions through institutional and community-based efforts. Required of all CRS sophomore majors and all entering off-campus transfer students to CRS major. Restricted to CRS majors. One field trip is normally required. Additional Details

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate

Grading/Final exam status: Letter grade. Final exam not required.

Instructors: Ignacio Chapela, Gordon Frankie

Introduction to Conservation and Resource Studies Major: Read Less [-]

ESPM 98 Directed Group Study in ESPM 1 - 3 Units
Terms offered: Fall 2016, Spring 2016, Fall 2015
Study of special topics that are not covered in depth in regular courses in the department.

Rules & Requirements

Prerequisites: Lower division standing; consent of instructor, adviser, and department chair

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1-3 hours of directed group study per week
Summer:
6 weeks - 2.5-7.5 hours of directed group study per week
8 weeks - 1.5-5.5 hours of directed group study per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate

Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

Directed Group Study in ESPM: Read Less [-]

ESPM 98BC Berkeley Connect 1 Unit
Terms offered: Spring 2020, Fall 2019, Spring 2019
Berkeley Connect is a mentoring program, offered through various academic departments, that helps students build intellectual community. Over the course of a semester, enrolled students participate in regular small-group discussions facilitated by a graduate student mentor (following a faculty-directed curriculum), meet with their graduate student mentor for one-on-one academic advising, attend lectures and panel discussions featuring department faculty and alumni, and go on field trips to campus resources. Students are not required to be declared majors in order to participate.

Rules & Requirements

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate

Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

Berkeley Connect: Read Less [-]
ESPM 99 Supervised Independent Study and Research 1 - 3 Units
Terms offered: Fall 2016, Spring 2016, Fall 2015
Supervised independent study or research on topics relevant to department that are not covered in depth by other courses. Open to students in good standing who, in consultation with a faculty sponsor, present a proposal with clearly formulated objectives and means of implementation. Intended for exceptional students.
Supervised Independent Study and Research: Read More [+]

Rules & Requirements
Prerequisites: Lower division standing (3.4 GPA or better), consent of instructor, adviser, and department chair. Usually restricted to ESPM majors

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Summer:
6 weeks - 1-5 hours of independent study per week
8 weeks - 1-4 hours of independent study per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

Supervised Independent Study and Research: Read Less [-]

ESPM 100 Environmental Problem Solving 4 Units
Terms offered: Fall 2019, Fall 2018, Fall 2016
Analysis of contrasting approaches to understanding and solving environmental and resource management problems. Case studies and hands-on problem solving that integrate concepts, principles, and practices from physical, biological, social, and economic disciplines. Their use in environmental policies and resource and management plans. This course is the prerequisite to 196A.
Environmental Problem Solving: Read More [+]

Rules & Requirements
Prerequisites: One course in ecology; one course in mathematics or statistics; one course in a social science or economics

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture, 1 hour of discussion, and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Instructor: Battles

Introduction to the Methods of Environmental Science: Read Less [-]

ESPM 102B Natural Resource Sampling 2 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
This course is designed to introduce students to the major sampling systems used in natural resources and ecology. It also introduces students to important sampling and measurement concepts in grassland, forest, wildlife, insect, soil, and water resources. May be taken without laboratory course 102BL.
Natural Resource Sampling: Read More [+]

Rules & Requirements
Prerequisites: Statistics 2 or 20

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Instructor: Biging

Natural Resource Sampling: Read Less [-]
**ESPM 102BL Laboratory in Natural Resource Sampling 2 Units**

Terms offered: Fall 2019, Fall 2018, Fall 2017

This laboratory course is designed to introduce students to the major sampling systems used in natural resources and ecology. Field data is collected with various important sampling designs and analyzed. Mean values and confidence intervals are constructed from the data collected in this course. This course must be taken in conjunction with lecture course 102B.

Rules & Requirements

**Prerequisites:** Statistics 2 or 20

**Hours & Format**

Fall and/or spring: 15 weeks - 4 hours of laboratory per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Biging

Laboratory in Natural Resource Sampling: Read Less [-]

---

**ESPM 102C Resource Management 4 Units**

Terms offered: Spring 2020, Spring 2019, Spring 2017

Presents concept and practical approaches to public and private natural resource management decision making. The focus is on goals, criteria, data, models, and technology for quantifying and communicating the consequences of planning options. A range of contemporary air, soil, wetland, rangeland, forest, social, economic, and ecosystem management problems is addressed.

Rules & Requirements

**Prerequisites:** Precalculus. 156, 184, and 70 are recommended

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Summer: 6 weeks - 7.5 hours of lecture and 7.5 hours of laboratory per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Meckling

Resource Management: Read Less [-]

---

**ESPM 102D Climate and Energy Policy 4 Units**

Terms offered: Spring 2020, Spring 2019, Spring 2018

This intermediate level course engages with both the politics and the design of climate and clean energy policy, with a focus on the United States. Key themes include political strategies to climate change, the choice of policy instruments, the role of various state actors and interest groups in policy making, the interaction of policy and low-carbon technology markets, and the US and global politics. The course combines the study of analytical concepts with in-depth case studies.

Rules & Requirements

**Prerequisites:** One of the following is required: - ESPM 60 Environmental Policy, Administration, and Law - ENVECON C1 Introduction to Environmental Economics and Policy, - POL SCI 1 Introduction to American Politics, or - Consent of instructor

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Summer: 6 weeks - 8 hours of lecture and 2 hours of discussion per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Meckling

Climate and Energy Policy: Read Less [-]
ESPM C103 Principles of Conservation Biology 4 Units
Terms offered: Fall 2019, Summer 2019 Second 6 Week Session, Fall 2018
A survey of the principles and practices of conservation biology. Factors that affect the creation, destruction, and distribution of biological diversity at the level of the gene, species, and ecosystem are examined. Tools and management options derived from ecology and evolutionary biology that can recover or prevent the loss of biological diversity are explored. Principles of Conservation Biology: Read More [+]

Rules & Requirements

Prerequisites: Biology 1A-1B or equivalent

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week

Summer: 6 weeks - 6.5 hours of lecture and 3 hours of discussion per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Beissinger

Formerly known as: Integrative Biology C156, Environ Sci, Policy, and Management C103

ESPM 105A Sierra Nevada Ecology 4 Units
Terms offered: Summer 2019 10 Week Session, Summer 2018 8 Week Session, Summer 2017 8 Week Session
Introduction to silvicultural theory, forest operations, and utilization and manufacture of forest products. Evaluation of silviculture for managing forest stands for multiple objectives including regeneration, stand density control, forest growth, genetic improvement, and prescribed burning. Introduction to harvest and access systems, wood structure and quality, and manufacture of forest product. Field trips and lectures to local areas illustrating different approaches to forest problems.

Sierra Nevada Ecology: Read More [+]

Rules & Requirements
Prerequisites: Eight hours biology

Hours & Format
Summer: 8 weeks - 10 hours of lecture and 30 hours of fieldwork per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: McBride

ESPM 105B Forest Measurements 1 Unit
Terms offered: Summer 2019 10 Week Session, Summer 2018 8 Week Session, Summer 2017 8 Week Session
This course teaches students how to use common forestry tools, maps, and various sampling methods to collect information about the forest environment. Thirty percent of the time is spent in the classroom learning about the techniques and working up field data. The remaining time is spent in the field applying these techniques in real world settings. Skills taught will include tree and plot measurement procedures, map reading, and simple field orienteering principles.

Instructor: O'Hara

ESPM 105D Forest Management and Assessment 3 Units
Terms offered: Summer 2019 10 Week Session, Summer 2018 8 Week Session, Summer 2017 8 Week Session
Develop skills in evaluating forests and developing management strategies to meet ownership objectives. Develop integrated forest management plan for 160 acre parcel. During first week, inventory and assess ecological condition of the assigned parcel. During second week, develop comprehensive integrated forest resource plan, integrating water, wood, wildlife, range, fisheries, and recreation. Oral reports in both an office and field setting required and written management plan.

ESPM C107 Biology and Geomorphology of Tropical Islands 13 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Natural history and evolutionary biology of island terrestrial and freshwater organisms, and of marine organisms in the coral reef and lagoon systems will be studied, and the geomorphology of volcanic islands, coral reefs, and reef islands will be discussed. Features of island biogeography will be illustrated with topics linked to subsequent field studies on the island of Moorea (French Polynesia).

Biology and Geomorphology of Tropical Islands: Read More [+]

Hours & Format

ESPM 106 American Wildlife: Management and Policy in the 21st Century 3 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
This course will introduce the history of key wildlife management and policy paradigms, such as parks and protected areas, threatened and endangered species protections, and state wildlife management. We will then explore in depth a number of species case studies in the Greater Yellowstone Ecosystem, a major laboratory for wildlife science, management and policy. The course will draw on lectures, readings, discussions, and guest perspectives. The course will help students majoring in related fields to prepare for careers in wildlife science and related conservation, management, and policy efforts; but students of any major should come away with a better understanding of key issues facing iconic American wildlife species.

American Wildlife: Management and Policy in the 21st Century: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

ESPM 108B Environmental Change Genetics
3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2016
This course will examine the consequences of environmental change on
the levels and distribution of genetic diversity within species. Students will
be introduced to methods of analysis and their application to organisms
from a range of ecosystems. The fate of populations under rapid
environmental change will be assessed in the light of dispersal and
adaptation (genetic and epigenetic) potential. Students will learn to use
population genetics freeware to evaluate molecular data.

Rules & Requirements
Prerequisites: Biology 1A-1B or equivalents

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of
laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/
Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Dodd

ESPM 109A Island and Coral Reef Resilience
and Ecosystem Services 3 Units
Terms offered: Not yet offered
Students will learn the fundamentals of island and reef biology, geology,
marine ecology and their inter-connectedness, as well as the physical
and biological forces shaping and maintaining these ecosystems. The
course will involve a significant amount of time in the field to expose
students to the different island habitats and explore the ecosystem
services provided by island habitats to local peoples and beyond.
Students will interact directly with local people to learn about local
perspectives on the value of these systems.

Objectives & Outcomes
Course Objectives: 1. To provide fundamentals of island and reef
biology, geology, marine ecology and their inter-connectedness, as well
as the physical and biological forces shaping and maintaining these
ecosystems.
2. To experience in the field the different island habitats and explore
the ecosystem services provided by island habitats to local peoples and
beyond.
3. To interact directly with local people to learn about local perspectives
on the value of these systems.

Student Learning Outcomes: 1. Students will be able to summarize the
fundamentals of Sustainability Science in the context of oceanography,
geoscience, genetics, ecology, anthropology, economics, statistics and
data science.
2. Students will be able to demonstrate a quantitative and qualitative
understanding of interactions among individual organisms and between
species and their biotic and abiotic environment.
3. Students will be able to design experiments to understand the
importance and inter-connectedness of biological and physical forces that
shape and maintain island ecosystems.
4. Students will be able to interpret the value of ecosystem services that
islands provide.
5. Students will be able to articulate the perspective of local people on the
value of island ecosystems based on their first hand experiences.
6. Students will be able to investigate and communicate the connections
between the biological and social sciences and humanities as they affect
sustainable development.

Hours & Format
Fall and/or spring: 3 weeks - 15 hours of lecture and 15 hours of
fieldwork per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/
Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
ESPM 109B Polynesian Culture and Society 3 Units
Terms offered: Not yet offered
This course is based at the Atitia Community Center adjacent to the Gump Station and on Tetiaroa. Students will learn about the history of the peopling of Oceania, and the waves of exploration and interaction that have shaped the Pacific. Students will be immersed into the way in which the first peoples of these islands understand and interact with their island homes, from a traditional to modern perspective, and with insights on human-environment interactions. Students will be presented with necessary historical and cultural context including basic language training, archeological field trips and interactions with local youth and elders at the Atitia Center and beyond to learn about local customs, traditions and attitude.

Objectives & Outcomes
Course Objectives: 1. To experience Polynesian atoll culture. 2. To provide an immersion in life of first peoples from a traditional to modern perspective, and with insights on human-environment interactions. 3. To present necessary historical and cultural context including basic language training, archeological field trips and interactions with local youth and elders at the Atitia Center and beyond to learn about local customs, traditions and attitude.
Student Learning Outcomes: 1. Students will gain an understanding of Oceania as a whole and Tahiti’s place within it. 2. Students will be able to interpret basic languages and legends of Polynesian culture. 3. Students will be able to compare atoll and island culture from both traditional and modern perspectives. 4. Students will be able to articulate challenges to sustainability for island cultures. 5. Students will gain an appreciation of traditional ecological knowledge and how it shapes Tahitian culture.

Hours & Format
Fall and/or spring: 3 weeks - 15 hours of lecture and 15 hours of fieldwork per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
ESPM 109D Environmental Planning, Management, and Policy 3 Units

Terms offered: Not yet offered

Students will be given an overview of the state of the field, as well as an understanding of current theory and practice; including western approaches and indigenous environmental management of terrestrial and marine resources. Rahui, a traditional Polynesian marine conservation practice will be examined through interaction with local communities that use it. Students will also learn about EU, Pacific-wide and international funding and conservation management initiatives affecting the lives and environment of Polynesians and people worldwide.

Environmental Planning, Management, and Policy: Read More [+]

Objectives & Outcomes

Course Objectives: 1. To provide overview of the state of environment planning, management, and policy, as well as an understanding of current theory and practice; including western approaches and indigenous environmental management of terrestrial and marine resources.
2. To examine, Rahui, a traditional Polynesian marine conservation practice, through interaction with local communities that use it, and the French Polynesian division of the Pew Charitable Trust.
3. To learn about EU, Pacific-wide and international funding and conservation management initiatives affecting the lives and environment of Polynesians.

Student Learning Outcomes: 1. Students will be able to identify, interpret, and communicate sustainability ideas, needs and programs to others in different cultural contexts and multilingual societies, demonstrating effective scientific communication skills through development and delivery of oral presentations and written reports and case studies.
2. Students will be able to articulate the state of environment planning, management, and policy, as well as an understanding of current theory and practice; including western approaches and indigenous environmental management of terrestrial and marine resources.
3. Students will be able to interpret elements of modern marine conservation practice and how different agencies are necessary for effective action.
4. Students will be able to evaluate effectiveness of EU, Pacific-wide and international funding and conservation management initiatives affecting the lives and environment of local peoples.

Hours & Format

Fall and/or spring: 3 weeks - 15 hours of lecture and 15 hours of fieldwork per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

ESPM 109E Data Science, Communication and Professionalism 3 Units

Terms offered: Not yet offered

The course will provide the fundamentals of data science across all disciplines and put them into practice on a project relevant to Island Sustainability. Exercises and group projects will hone oral, written, physical, and multimedia communication skills, with an emphasis on communicating for collaboration and outreach. Professional and ethical behavior will be emphasized in the context of Island Sustainability.

Instruction will be primarily related to lecture material but will also cover issues related to conducting fieldwork, interacting with local/host communities, etc.

Data Science, Communication and Professionalism: Read More [+]

Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Almeida, Banfield

ESPM 112L Microbial Metagenomic Data Analysis Lab 1 Unit
Terms offered: Spring 2020, Spring 2019, Spring 2018
We will teach students how to perform genome-resolved metagenomics. We will start with raw data in the form of DNA sequencing reads, assemble the data, reconstruct genomes for coexisting organisms, evaluate overall community composition (which organisms are present and at what abundance levels), predict metabolic capacities, calculate growth rates, and investigate changes in the community over time. Working in pairs, the students will analyze real, unpublished data, identify an interesting question and investigate it. Evaluation is based on a final presentation of research findings.
Microbial Metagenomic Data Analysis Lab: Read More [+]

Rules & Requirements
Prerequisites: Concurrent enrollment in Environmental Science Policy and Management 112 will be required for enrollment in Environmental Science Policy and Management 112L. Biology 1A and Biology 1B; Molecular and Cell Biology 102 is recommended

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate

ESPM 130A Forest Hydrology 4 Units
Terms offered: Spring 2019, Spring 2018
This course introduces the fundamental physical principles that are necessary to understand the distribution and dynamics of water near the Earth's surface. A quantitative approach will provide mathematical descriptions of hydrological phenomena that will be used for a variety of hydrological applications to river flow hydraulics, flood frequency analysis, evapotranspiration from terrestrial ecosystems, groundwater flow, and ecohydrological dynamics. The course will provide an introduction to hydrological processes and data analysis. The purpose of the laboratory is to illustrate in an experimental setting the principles and applications introduced in lecture.

Forest Hydrology: Read More

Rules & Requirements

Prerequisites: Chemistry 1A, Mathematics 1A-1B, Physics 7A, or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of laboratory per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructor: D'Odorico

Forest Hydrology: Read Less

ESPM C129 Biometeorology 3 Units
Terms offered: Fall 2018, Fall 2016
This course describes how the physical environment (light, wind, temperature, humidity) of plants and soil affects the physiological status of plants and how plants affect their physical environment. Using experimental data and theory, it examines physical, biological, and chemical processes affecting transfer of momentum, energy, and material (water, CO2, atmospheric trace gases) between vegetation and the atmosphere. Plant biometeorology instrumentation and measurements are also discussed.

Biometeorology: Read More

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

ESPM C130 Terrestrial Hydrology 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2017, Spring 2014
A quantitative introduction to the hydrology of the terrestrial environment including lower atmosphere, watersheds, lakes, and streams. All aspects of the hydrologic cycle, including precipitation, infiltration, evapotranspiration, overland flow, streamflow, and groundwater flow. Chemistry and dating of groundwater and surface water. Development of quantitative insights through problem solving and use of simple models. This course requires one field experiment and several group computer lab assignments.

Terrestrial Hydrology: Read More [+]

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Larsen

Also Listed as: CIV ENG C103N/GEOG C136

ESPM 131 Soil Microbial Ecology 3 Units
Terms offered: Spring 2018, Spring 2016
Introduction to the organisms that live in the soil and their activities in the soil ecosystem. Lectures will cover the physical and chemical properties of soils and the soil as a habitat for microorganisms, the diversity and ecology of soil microorganisms, and their activity in the context of biogeochemical cycling, plant-microbe interactions, global environmental change and bioremediation. Goals: To gain fundamental knowledge of the occurrence and activities of soil microorganisms and their influence on soil productivity and environmental quality as well as potential applications of soil microbiology.

Soil Microbial Ecology: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A-1B

Grading/Final exam status: Letter grade. Final exam required.
Instructors: Pallud, Firestone

Also Listed as: GEOG C135

ESPM C133 Water Resources and the Environment 3 Units
Terms offered: Spring 2018, Spring 2016
Distribution, dynamics, and use of water resources in the global environment. Water scarcity, water rights, and water wars. The terrestrial hydrologic cycle. Contemporary environmental issues in water resource management, including droughts, floods, saltwater intrusion, water contamination and remediation, river restoration, hydraulic fracturing, dams, and engineering of waterways. The role of water in ecosystem processes and geomorphology. How water resources are measured and monitored. Basic water resource calculations. Effects of climate change on water quantity, quality, and timing.

Instructor: Larsen

Also Listed as: GEOG C135
ESPM 134 Fire, Insects, and Diseases in Forest Ecosystems 3 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Study of the influence of fire, insects, and diseases on species diversity, succession, and the survival of North American forests including the evolution of these interactions due to modern human policies of preservation and management and exploitation.

ESPM C135A Migration in the Contemporary World: California and Beyond 4 Units
Terms offered: Fall 2019
This course is designed to allow students to delve into the topic of migration in the contemporary world. Readings, discussions, and assignments will focus on 1) past and present immigration to California and beyond 2) the impact of immigration in relation to labor, health and the environment and 3) contemporary immigrant activism and organizing. A primary goal of the course is to utilize sociocultural theories to describe the experiences of immigrants in the U.S. Students will communicate what they are learning through discussions, weekly reading reflection, academic papers, and an Op-Ed. A variety of teaching methods will be employed including lectures, discussions and guest presentations (authors and individuals featured in books).

ESPM 137 Landscape Ecology 3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
This course will cover broad topics in landscape ecology with the goal of answering the core questions of how patterns develop on landscapes, how these patterns relate to biotic and abiotic processes, and how these patterns and processes change through time. Lab exercises will focus on practical aspects of landscape ecological analysis using modern tools like remote sensing, GIS, population modeling, and landscape genetics.

ESPM C138 Introduction to Comparative Virology 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
This course will provide a comparative overview of virus life cycles and strategies viruses use to infect and replicate in hosts. We will discuss virus structure and classification and the molecular basis of viral reproduction, evolution, assembly, and virus-host interactions. Common features used during virus replication and host cellular responses to infection will be covered. Topics also included are common and emerging virus diseases, their control, and factors affecting their spread.

ESPM 139 Climate Change 3 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
This course will provide an introduction to the scientific evidence of recent changes in the world’s climate, the potential causes and impacts of these changes, and our ability to mitigate and adapt to these changes. We will consider contemporary debates about the causes of climate change, and examine the potential effects of climate change on California and the West Coast.

ESPM 140 Introduction to Environmental Science and Policy 3 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
This course will provide an introduction to the field of environmental science and policy. We will examine the scientific and policy frameworks that underlie environmental decision-making, and will consider the role of science and policy in addressing environmental challenges.

ESPM 141 Introduction to Ecological and Environmental Economics 3 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
This course will provide an introduction to the field of ecological and environmental economics. We will examine the economic and policy frameworks that underlie environmental decision-making, and will consider the role of economics and policy in addressing environmental challenges.
ESPM 139 THE ENVIRONMENT AND THE SELF: AN ECO PRACTICUM 2 Units
Terms offered: Fall 2019, Fall 2017
This course will provide a practical exploration of how to engage effectively with contemporary environmental issues using discussion of scientific and philosophical texts, activities, and group work. We will evaluate how different worldviews influence how humans relate to the natural world and how our own worldview shapes our way of engaging in environmental problem solving.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Rosenblum

ESPM 140 General Entomology 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Biology of insects, including classification of orders and common families, morphology, physiology, behavior, and ecology.

Rules & Requirements
Prerequisites: Introductory course in a biological science
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 6 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Roderick

ESPM 141 Development of Taxonomic Identification Keys and Natural Language Descriptions 2 Units
Terms offered: Prior to 2007
Tools for identification of organisms to species or higher-level taxonomic groups are critically needed. This course will allow students to learn both the theoretical basis of and practical skills for building traditional dichotomous keys and various types of interactive keys. Emphasis will be on learning to build a web-based interactive key and developing natural language descriptions through students' individual projects. Students can train on the Microptics Digital XLT imaging system and learn to use Lucid and Lucid Phoenix software. Other Internet identification tools will also be surveyed and discussed. Each student will produce an online key as a project.

Rules & Requirements
Prerequisites: Prior knowledge of focus group for project
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Instructor: Will

General Entomology: Read Less [-]
ESPM 142 Insect Behavior 3 Units
Terms offered: Fall 2019, Fall 2017, Fall 2016
Insects display an incredibly rich array of behaviors, including extravagant displays, rituals, deception, sociality, and slavery. In some cases, these behaviors are innate, but in other cases individual insects can actively learn and modify their future behaviors based on real-life experiences. This course will focus on the development, structure, and function of insect behaviors, using examples from classic and recent publications. We will examine the evolution of insect behavior, how these behaviors play a role in the ecology of the organisms that express them, and explore various modes of communication that allow insects to judge their environment and respond appropriately.
Insect Behavior: Read More [+]

ESPM 151 Society, Environment, and Culture
4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Society and the natural environment are vitally linked in a number of ways. Environmental problems such as pollution and natural resource depletion are not only problems for society, affecting the way we live our lives; they are also problems of society—the result of patterns of social organization and social practices. In this course we will explore some various issues, concepts, and processes pertaining to the diverse approaches to understanding the relationship between human society, culture, and the environment.
Society, Environment, and Culture: Read More [+]

ESPM 157 Data Science in Global Change Ecology 4 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Many of the greatest challenges we face today come from understanding and interacting with the natural world: from global climate change to the sudden collapse of fisheries and forests, from the spread of disease and invasive species to the unknown wealth of medical, cultural, and technological value we derive from nature. Advances in satellites and micro-sensors, computation, informatics and the Internet have made available unprecedented amounts of data about the natural world, and with it, new challenges of sifting, processing and synthesizing large and diverse sources of information. In this course, students will learn and apply fundamental computing, statistics and modeling concepts to a series of real-world ecological and environment
Data Science in Global Change Ecology: Read More [+]

Rules & Requirements
Prerequisites: No prior knowledge is assumed or expected, though prior exposure to programming, particularly from the Foundations of Data Science (COMPSCI C8 / INFO C8 / STAT C8), will be helpful

Hours & Format
Fall and/or spring: 15 weeks - 4 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Boettiger

Data Science in Global Change Ecology: Read Less [-]

ESPM 158 Biodiversity Conservation in Working Landscapes 4 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015
Most of the world's lands and seas occur outside of protected areas, so this course examines biodiversity conservation in "working landscapes" like farms, ranches, and urban areas. Students will study fundamental concepts in ecology and conservation biology, and evaluate case studies to assess how conservation approaches have evolved and which are working. Students will gain skills in evaluating and summarizing scientific literature, and in-depth knowledge of conservation in practice.
Biodiversity Conservation in Working Landscapes: Read More [+]

Rules & Requirements
Prerequisites: Biology IB is required; Environmental Science Policy and Management C103/Integrative Biology C156 or other ecology course desired

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Kremen

Biodiversity Conservation in Working Landscapes: Read Less [-]

ESPM C159 Human Diet 4 Units
Terms offered: Spring 2016, Spring 2015, Spring 2013
Since we eat every day, wouldn't it be useful to learn more about human dietary practices? A broad overview of the complex interrelationship between humans and their foods. Topics include the human dietary niche, biological variation related to diet, diet and disease, domestication of staple crops, food processing techniques and development of regional cuisines, modern diets and their problems, food taboos, human attitudes toward foods, and dietary politics.
Human Diet: Read More [+]

Hours & Format

Human Diet: Read Less [-]
ESPM 160AC American Environmental and Cultural History 4 Units

Terms offered: Summer 2019 Second 6 Week Session, Summer 2018 Second 6 Week Session, Fall 2015

History of the American environment and the ways in which different cultural groups have perceived, used, managed, and conserved it from colonial times to the present. Cultures include American Indians and European and African Americans. Natural resources development includes gathering-hunting-fishing; farming, mining, ranching, forestry, and urbanization. Changes in attitudes and behaviors toward nature and past and present conservation and environmental movements are also examined. Readings are from primary source documents supplemented by recent essays.

ESPM 161 Environmental Philosophy and Ethics 4 Units

Terms offered: Fall 2019, Fall 2018, Summer 2018 First 6 Week Session

A cross-cultural comparison of human environments as physical, socio-economic, and technocultural ecosystems with special emphasis on the role of beliefs, attitudes, ideologies, and behavior. An examination of contemporary environmental literature and the philosophies embodied therein.

ESPM 162 Bioethics and Society 4 Units

Terms offered: Spring 2019, Fall 2017, Fall 2016

Exploration of the ethical dilemmas arising from recent advances in the biological sciences: genetic engineering, sociobiology, health care delivery, behavior modification, patients’ rights, social or private control of research.

Rules & Requirements

Credit Restrictions: Students will receive no credit for Environ Sci, Policy, and Management ESPM 160AC after taking Environ Sci, Policy and Management ESPM 160AC.

Requirements this course satisfies: Satisfies the American Cultures requirement.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week

Summer: 6 weeks - 7.5 hours of lecture and 3 hours of discussion per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

ESPM 162A Health, Medicine, Society and Environment 4 Units
Terms offered: Fall 2019, Fall 2018
Introduces students to intersections between health, medicine, society, and environment through medical and environmental anthropology, political ecology, medical geography, and the social studies of science, technology and the natural environment. Readings, discussions, and assignments will explore the sociocultural, political economic, and environmental aspects of illness, care, disease, biomedicine, and health (in)equity.

Objectives & Outcomes

Course Objectives: This course will provide an overview of key theoretical and methodological approaches as well as central arguments to understand the relationships between health, medicine, society and environment. The course will lend context and highlight concepts that are important to understandings of and movements toward social and health equity.

Student Learning Outcomes: Critically assess social and health issues appearing in scholarly publications and the popular press; Practice communicating ideas and analyses in language that can be generally understood; Work with classmates from multiple disciplines and backgrounds in order to realize the importance of multidisciplinary approaches for solving social and health inequities; Apply sociocultural, political economic, and critical theory frameworks for understanding conflicts in the realms of public health, global health, medicine, and public policy.; Demonstrate knowledge in major areas of health and society in relation to current debates in medical anthropology and cognate social sciences.; Engage with increasingly popular subfields of the medical social sciences including those on issues of health inequities, care, medical science, sickness, anguish, and resistance.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Alternative method of final assessment during regularly scheduled final exam group (e.g., presentation, final project, etc.).

Health, Medicine, Society and Environment: Read Less [-]

ESPM 163AC Environmental Justice: Race, Class, Equity, and the Environment 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Overview of the field of environmental justice, analyzing the implications of race, class, labor, and equity on environmental degradation and regulation. Environmental justice movements and struggles within poor and people of color communities in the U.S., including: African Americans, Latino Americans, and Native American Indians. Frameworks and methods for analyzing race, class, and labor. Cases of environmental injustice, community and government responses, and future strategies for achieving environmental and labor justice.

Objectives & Outcomes

Course Objectives: This course will provide an overview of key theoretical and methodological approaches as well as central arguments to understand the relationships between health, medicine, society and environment. The course will lend context and highlight concepts that are important to understandings of and movements toward social and health equity.

Student Learning Outcomes: Critically assess social and health issues appearing in scholarly publications and the popular press; Practice communicating ideas and analyses in language that can be generally understood; Work with classmates from multiple disciplines and backgrounds in order to realize the importance of multidisciplinary approaches for solving social and health inequities; Apply sociocultural, political economic, and critical theory frameworks for understanding conflicts in the realms of public health, global health, medicine, and public policy.; Demonstrate knowledge in major areas of health and society in relation to current debates in medical anthropology and cognate social sciences.; Engage with increasingly popular subfields of the medical social sciences including those on issues of health inequities, care, medical science, sickness, anguish, and resistance.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: O'Rourke

ESPM C170 Carbon Cycle Dynamics 3 Units
Terms offered: Spring 2019, Spring 2016, Spring 2015, Spring 2014
The focus is the (unsolved) puzzle of the contemporary carbon cycle. Why is the concentration of atmospheric CO2 changing at the rate observed? What are the terrestrial and oceanic processes that add and remove carbon from the atmosphere? What are the carbon management strategies under discussion? How can emission protocols be verified? Students are encouraged to gain hands-on experience with the available data, and learn modeling skills to evaluate hypotheses of carbon sources and sinks.
Carbon Cycle Dynamics: Read More [+]

ESPM C177 GIS and Environmental Spatial Data Analysis 4 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015
This course offers an introduction to spatial data analysis. It integrates ArcGIS analysis with spatial statistical analysis for the study of pattern and process applicable to a wide variety of fields. Major topics covered include: spatial sampling, processing data with ARC Info, exploratory GIS analysis, spatial decomposition, spatial point patterns and Ripley’s K function, spatial autocorrelation, geostatistics, spatially weighted regression, spatial autoregression, generalized linear models and generalized linear mixed models.

GIS and Environmental Spatial Data Analysis: Read More [+]

Rules & Requirements
Prerequisites: Requirements are course in GIS and a course in probability and statistics. We invite participation of undergraduates and graduate students from: ESPM, Landscape Architecture & Environmental Planning, City and Regional Planning, IB, Civil Engineering, Energy and Resources Group, Public Health, Earth and Planetary Science, and other campus departments or units with students interested in learning and using spatial analysis for the environment- both natural and built

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Additional Details

ESPM C179A GC-Maker Lab I: Skills and Theory 2 Units
Terms offered: Fall 2016
In the environmental and biological sciences, one of the biggest challenges in transitioning from student to researcher is learning how to measure something without an off-the-shelf device. This course will provide the theoretical background and the practice of building a Gas Chromatograph (GC) system for environmental research. The first semester is for students who seek to develop fundamental skills in instrumental development and design. The second semester (c179b) is only open to those who have taken this first semester course and will entail the construction of a working gas chromatograph system. This class will be especially useful for students who wish to pursue research following graduation.

GC-Maker Lab I: Skills and Theory: Read More [+]

Rules & Requirements
Prerequisites: Chem 3AL, or instructor permission

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Rhew
Also listed as: GEOG C179A

GC-Maker Lab I: Skills and Theory: Read Less [-]
ESPM C179B GC-Maker Lab II: Instrument development 4 Units
Terms offered: Spring 2017
In the environmental and biological sciences, one of the biggest challenges in transitioning from student to researcher is learning how to measure something without an off-the-shelf device. This course will involve the actual building a gas chromatograph (GC) system for environmental research. In addition, we will provide the option of building a mini datalogging sensor for measuring basic environmental parameters using the Arduino platform. This course offered in the spring semester is only open to those who have taken this first semester course (c179A), which covers the fundamental skills required to undertake this project. This class is designed for upper division undergraduates to early graduate students.

Rules & Requirements
Prerequisites: Chem 3AL, GC-Maker Lab I (fall semester)

Hours & Format
Fall and/or spring: 15 weeks - 6 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Rhew
Also listed as: GEOG C179B

ESPM C180 Air Pollution 3 Units
Terms offered: Spring 2020, Spring 2018, Spring 2017
This course is an introduction to air pollution and the chemistry of earth's atmosphere. We will focus on the fundamental natural processes controlling trace gas and aerosol concentrations in the atmosphere, and how anthropogenic activity has affected those processes at the local, regional, and global scales. Specific topics include stratospheric ozone depletion, increasing concentrations of greenhouse gases, smog, and changes in the oxidation capacity of the troposphere.

Rules & Requirements
Prerequisites: Chemistry 1A-1B, Physics 8A or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Goldstein
Also listed as: CIV ENG C106/EPS C180

ESPM 181A Fire Ecology 3 Units
Terms offered: Spring 2019, Spring 2018, Spring 2017
Fundamentals of wildland fire including fire behavior modeling, fire history methods, prescribed fire techniques, fire ecology, fire management, fire in the urban-wildland intermix, wildland fire, and ecosystem sustainability. Laboratories on inventory methods, fire history, modeling of fire behavior and risk, and prescribed burning.

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Stephens

Fire Ecology: Read Less [-]
ESPM 182 Forest Operations Management 3 Units
Terms offered: Fall 2018, Fall 2016, Fall 2014
Examination of "on the ground" activities necessary to manage forests. Planning, design, and implementation of activities such as road building, forest harvesting, erosion control, and fire suppression are the central focus of the course. Aspects of timber harvest planning, archaeological surveys related to forest management, road closure, stream bank stabilization, and legislative control of forest operations will also be explored.

Forest Operations Management: Read More [+]

Rules & Requirements
Prerequisites: 101A, 101B, 101C and 101D

Hours & Format
Fall and/or spring: 15 weeks - 1.5 hours of lecture and 4 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: York

Forest Operations Management: Read Less [-]

ESPM 183 Forest Ecosystem Management and Planning 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Introduces students to concepts and quantitative tools needed for the sustainable management and planning of multi-use forest ecosystems. Topics covered include: estimation of ecological, economic, and social values; construction of dynamic forest models; methods for optimal decision-making; development of forest management plans; and ethics of natural resource management. Application to current issues in temperate and tropical forest management are discussed. Quantitative, analytical, and communication skills are emphasized. Oral presentation required.

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Altieri

Agroforestry Systems: Read Less [-]
ESPM 185 Applied Forest Ecology 4 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Concepts and applications of silviculture for the establishment, growth, composition, and quality of forest trees and stands. Silviculture is presented as a tool to meet multiple resource and ecosystem management objectives related to wildlife habitat, watershed resources, forest health, or timber production. Two weekend field trips will be scheduled in lieu of several laboratories.

Rules & Requirements
Prerequisites: IB 153, ESPM 102A or course in community ecology

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 4 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: O'Hara

ESPM 186 Management and Conservation of Rangeland Ecosystems 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Begins with the evolution and domestication of grazing animals, continues through ranching and rangeland stewardship practices, and explores new institutional arrangements for conservation and restoration. Woodlands, grasslands, and shrublands provide biodiversity, wildlife habitat, watershed, recreation, open space, and forage. Human practices and ecosystem dynamics meet in rangeland management. Methods for changing, predicting, or assessing the results.

Rules & Requirements
Prerequisites: One course in ecology; upper division or graduate standing

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture, 1 hour of fieldwork, and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Bartolome, Huntsinger

ESPM 187 Restoration Ecology 4 Units
Terms offered: Spring 2014, Spring 2013, Spring 2012
This course covers ecological theories that inform the practice of ecological restoration, with particular focus on local (Bay Area) restoration and linkages with social, political, and economic factors. Laboratories focus on assessment techniques and cumulative with formulation of a restoration management plan. Laboratories will be based at the Richmond Field Station, served by campus shuttle.

Rules & Requirements
Prerequisites: One course in ecology; upper division or graduate standing

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture, 1 hour of fieldwork, and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Suding

ESPM 188 Case Histories in Wildlife Management 2 Units
Terms offered: Spring 2014, Spring 2013, Spring 2012
Seminar format with presentation and discussion by each student, with long term paper requirement. Examination in depth of current issues in wildlife management.

Rules & Requirements
Prerequisites: 114

Hours & Format
Fall and/or spring: 15 weeks - 4 hours of seminar per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Instructor: Barrett
ESPM 190 Seminar in Environmental Issues 3 Units  
Terms offered: Spring 2017, Fall 2010, Fall 2009  
Interdisciplinary study of issues for advanced students. Designed to  
develop skills in critical analysis of specific issues. Different topics will  
be available each semester reflecting faculty and student interest. Major  
research project required.  
Seminar in Environmental Issues: Read More [+]

ESPM C191 The American Forest: Its Ecology, History, and Representation 4 Units  
Terms offered: Spring 2012, Spring 2011, Spring 2007, Fall 2004  
The American forest will be examined in terms of its ecology, history,  
and representations in paintings, photographs, and literary essays. This  
examination seeks to understand the American forest in its scientific  
and economic parameters, as well as the historic, social, and ideological  
dimensions which have contributed to the evolution of our present  
attitudes toward the forest.  
The American Forest: Its Ecology, History, and Representation: Read

ESPM C192 Molecular Approaches to Environmental Problem Solving 2 Units  
Terms offered: Spring 2019, Fall 2018, Spring 2018  
Seminar in which students consider how modern biotechnological  
approaches, including recombinant DNA methods, can be used to  
recognize and solve problems in the area of conservation, habitat  
and endangered species preservation, agriculture and environmental  
pollution. Students will also develop and present case studies of  
environmental problems solving using modern molecular methods.  
Molecular Approaches to Environmental Problem Solving: Read More [+]  
Rules & Requirements  
Prerequisites: Junior or senior standing in the Genetics and Plant  
Biology or Microbial Biology major, or consent of instructor  
Hours & Format  
Fall and/or spring: 15 weeks - 2 hours of lecture per week  
Additional Details  
Subject/Course Level: Environ Sci, Policy, and Management/  
Undergraduate  
Grading/Final exam status: Letter grade. Final exam required.

ESPM 198BC Berkeley Connect 1 Unit
Terms offered: Spring 2020, Fall 2019, Spring 2019
Berkeley Connect is a mentoring program, offered through various academic departments, that helps students build intellectual community. Over the course of a semester, enrolled students participate in regular small-group discussions facilitated by a graduate student mentor (following a faculty-directed curriculum), meet with their graduate student mentor for one-on-one academic advising, attend lectures and panel discussions featuring department faculty and alumni, and go on field trips to campus resources. Students are not required to be declared majors in order to participate.
Berkeley Connect: Read More [+]
Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

ESPM C200 Principles of Phylogenetics 4 Units
The core theory and methodology for comparative biology, beginning with issues in building phylogenetic trees, with emphases on both morphology and molecules, and both living and fossil organisms. Also covers the many applications of phylogenetic trees to systematics, biogeography, speciation, conservation, population genetics, ecology, behavior, development, functional morphology, and macroevolution that have revolutionized those fields. Labs are closely integrated with lectures and cover the major algorithms and computer software used to implement these approaches. Requirements include participation in discussions, two exams, and a term project.
Principles of Phylogenetics: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructors: Ackerly, Mishler, Will
Also listed as: INTEGBI C200
Principles of Phylogenetics: Read Less [-]

ESPM 201A Research Approaches in Environmental Science, Policy, and Management 3 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Research projects and approaches in environmental science, policy, and management. An introduction to the diverse ways environmental problems are researched, comparing the approaches and methods of various disciplines represented among faculty and students. This course is the first of the core course sequence required for all ESPM graduate students.
Research Approaches in Environmental Science, Policy, and Management: Read More [+]
Rules & Requirements
Prerequisites: Graduate standing in ESPM
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Grading: Offered for satisfactory/unsatisfactory grade only.
Formerly known as: 200C
Environmental Forum: Read Less [-]
ESPM 201S Environmental Science, Policy, and Management Colloquium 1 Unit
Terms offered: Spring 2020, Fall 2019, Spring 2019
Seminars for the presentation and discussion of original work by faculty, visiting scholars, and graduate students. Core course for the ESPM graduate program.

ESPM C204 Research Reviews in Animal Behavior: Behavior Review 1 Unit
Terms offered: Spring 2020, Fall 2019, Spring 2019
This course will provide a rigorous, critical review of current research in animal behavior. Emphases will include hypothesis testing and experimental design, as well as methods of data collection and analysis. Each week, a student in the course will present original research in the form of a seminar presentation, grant proposal, or manuscript. Through discussion with seminar participants, presenters will gain critical feedback regarding their research.

ESPM 205 Quantitative Methods for Ecological and Environmental Modeling 3 Units
Terms offered: Prior to 2007
This course will review the background mathematical and statistical tools necessary for students interested in pursuing ecological and environmental modeling. Topics include linear algebra; difference equation, ordinary differential equation, and partial differential equation models; stochastic processes; parameter estimation; and a number of statistical techniques. This course will be recommended as a prerequisite for advanced modeling courses in Integrative Biology, Energy and Resources Group, and Environmental Science, Policy, and Management.
ESPM C205 Quantitative Methods for Ecological and Environmental Modeling 3 Units
Terms offered: Fall 2015, Fall 2013, Fall 2012, Fall 2011, Fall 2009
This course will review the background mathematical and statistical tools necessary for students interested in pursuing ecological and environmental modeling. Topics include linear algebra; difference equation, ordinary differential equation, and partial differential equation models; stochastic processes; parameter estimation; and a number of statistical techniques. This course will be recommended as a prerequisite for advanced modeling courses in Integrative Biology, Energy and Resources Group, and Environmental Science, Policy, and Management.
Quantitative Methods for Ecological and Environmental Modeling: Read More [+]

Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Harte

Also listed as: ENE,RES C202
Modeling Ecological and Meteorological Phenomena: Read Less [-]

ESPM 206 Animal Communication 2 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015
The objective of the course is to explore major topics in animal communication. Topics each year will focus on a different sensory modality and range from visual, acoustic, and chemical senses. Due to the interdisciplinary nature of the study of communication, over the course of the semester, we will draw on a variety of disciplines (including cell biology, ecology, evolution, genetics, neurophysiology, and physics) to understand the mechanisms, function, and evolution of communication.
Animal Communication: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Elias

ESPM 215 Hierarchical Statistical Modeling in Environmental Science 2 Units
Terms offered: Spring 2020, Fall 2017, Spring 2016
Hierarchical statistical models include generalized linear mixed models, generalized additive mixed models, state-space models for time-series data, and random field models for spatial data. Introduction to formulation and analysis of such models with frequentist methods, including maximum likelihood via numerical integration and restricted maximum likelihood, and Bayesian methods, including Markov chain Monte Carlo. Background in relevant probability theory.
Hierarchical Statistical Modeling in Environmental Science: Read More [+]

Rules & Requirements
Prerequisites: Calculus and experience with common statistical methods such as linear regression, or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: de Valpine

Hierarchical Statistical Modeling in Environmental Science: Read Less [-]
ESPM C216 Freshwater Ecology 3 Units
This graduate course will combine formal lectures and discussion, with the overall goal of exposing students to general concepts in freshwater ecology. We will discuss a broad range of topics including freshwater environments and biota, natural selection and adaptive evolution, food webs and trophic cascades, cross-ecosystem linkages, and social-ecological resilience of freshwater ecosystems under global change. Upper division undergraduates are welcome, with permission of the instructors.
Freshwater Ecology: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructors: Carlson, Power
Also listed as: INTEGBI C216
Freshwater Ecology: Read Less [-]

ESPM 217 Political Economy of Climate Change 3 Units
Terms offered: Fall 2018, Fall 2017, Fall 2016
This course examines the comparative and global political economy of climate change, with a focus on the politics of climate change mitigation in the energy sector. Key themes are the choice of policy strategies and policy instruments, industry and climate policy, global institutions and collective action, markets and technological change, and economic and geo-political transformations in response to climate change. The courses combines theoretical readings with in-depth case studies.
Political Economy of Climate Change: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Meckling
Political Economy of Climate Change: Read Less [-]

ESPM C220 Stable Isotope Ecology 5 Units
Terms offered: Spring 2020, Spring 2019, Spring 2016
Course focuses on principles and applications of stable isotope chemistry as applied to the broad science of ecology. Lecture topics include principles of isotope behavior and chemistry, and isotope measurements in the context of terrestrial, aquatic, and marine ecological processes and problems. Students participate in a set of laboratory exercises involving preparation of samples of choice for isotopic analyses, the use of the mass spectrometer and optical analysis systems, and the analysis of data.
Stable Isotope Ecology: Read More [+]

Rules & Requirements
Prerequisites: Graduate standing

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructors: Amundson, Dawson, Mambelli
Also listed as: EPS C241/INTEGBI C227
Stable Isotope Ecology: Read Less [-]

ESPM 222 Surface and Colloid Chemistry of Natural Particles 3 Units
Terms offered: Fall 2017, Fall 2015, Spring 2011
Structure and coordination chemistry of natural adsorbent particles in aqueous systems; solute adsorption mechanisms and theoretical models; interparticle forces and colloidal phenomena; applications to biogeochemistry and contaminant hydrology.
Surface and Colloid Chemistry of Natural Particles: Read More [+]

Rules & Requirements
Prerequisites: 126 or consent of instructor

ESPM 227 Science Communication 2 Units  
Terms offered: Prior to 2007  
Effective communication is an important skill that all scientists should master. There are many different forms of communication, and these require different approaches and techniques. The goal of this course is to provide students with the skills to communicate scientific findings to a wide range of audiences. We will discuss approaches to communicating our findings and those of others to other scientists, the public, and the media. We will then prepare and practice communicating through papers, proposals, presentations, sound bites, and podcasts. Exercises and assignments are designed to give students hands on experience developing their own stories and packaging them to selected audiences.

Science Communication: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

ESPM 228 Advanced Topics in Biometeorology and Micrometeorology 2 Units  
Terms offered: Spring 2020, Spring 2019, Spring 2016  
Measurement and modeling of trace gases and energy between the terrestrial biosphere and atmosphere. Micrometeorological flux measurement methods, including eddy covariance, profile, and eddy accumulation methods. A hierarchy of biophysical models are discussed for interpreting flux measurements. Information and theory on big-leaf, two-layer, and multi-layer models that couple energy, water, and carbon to predict trace gas fluxes are presented. How models integrate information from leaf to canopy to landscape scales is discussed.

Advanced Topics in Biometeorology and Micrometeorology: Read More [+]

Rules & Requirements

Prerequisites: C129 or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture per week

Subject/Course Level: Environ Sci, Policy, and Management/Graduate

Grading: Letter grade.

Instructor: Baldocchi

Advanced Topics in Biometeorology and Micrometeorology: Read Less [-]
**ESPM 230 Sociology of Agriculture 4 Units**

Terms offered: Spring 2020, Spring 2019, Fall 2015

This graduate seminar explores the sociology of agriculture and food systems, addressing key theories and topics in the field. We begin with the antecedents of the sociology of agriculture, including foundation classical agrarian theories and an overview of the field, followed by topics ranging from pesticide drift to agricultural labor injustice to food sovereignty movements and more. This course is most appropriate for students with some background in agri-food and social systems.

Sociology of Agriculture: Read More [+]

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Graduate

**Grading:** Letter grade.

**Instructor:** De Master

Sociology of Agriculture: Read Less [-]

**ESPM C234 Green Chemistry: An Interdisciplinary Approach to Sustainability 3 Units**

Terms offered: Spring 2016, Spring 2015, Spring 2014, Spring 2013

Meeting the challenge of global sustainability will require interdisciplinary approaches to research and education, as well as the integration of this new knowledge into society, policymaking, and business. Green Chemistry is an intellectual framework created to meet these challenges and guide technological development. It encourages the design and production of safer and more sustainable chemicals and products.

Green Chemistry: An Interdisciplinary Approach to Sustainability: Read More [+]

**Rules & Requirements**

**Prerequisites:** One year of chemistry, including a semester of organic chemistry, or consent of instructors based on previous experience

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Summer: 6 weeks - 20 hours of lecture per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Graduate

**Grading:** Letter grade.

**Instructors:** Arnold, Bergman, Guth, Iles, Kokai, Mulvihill, Schwarzman, Wilson

Also listed as: CHEM C234/PB HLTH C234

Green Chemistry: An Interdisciplinary Approach to Sustainability: Read Less [-]

**ESPM 244 Spatial Ecology 3 Units**

Terms offered: Fall 2018, Fall 2017, Spring 2016

Spatial heterogeneity is a key feature of many ecological patterns and processes. This course will explore how spatial data and analysis can answer fundamental questions in ecology, evolution, and conservation through discussions of recent research and workshops on performing spatial analysis in R. Topics to be covered include spatial autocorrelation, habitat fragmentation, population dynamics, conservation and landscape genetics, simulation methods, niche modeling, and spatial statistics.

Spatial Ecology: Read More [+]

ESPM 249 Bioethics, Law, and the Life Sciences 3 Units
Terms offered: Spring 2013
Developments in biotechnology and the life sciences are unsettling legal and policy approaches to intellectual property, reproduction, health care, medical research, and the criminal justice system. Through reading primary materials and relevant secondary sources, this course investigates ethical, legal, and policy problems associated with these developments, and explores possible solutions.
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Winickoff
Bioethics, Law, and the Life Sciences: Read More [+]
ESPM 250 Environmental History 4 Units
Terms offered: Fall 2003, Fall 2001, Fall 1999
A critical survey of classical and recent literature in the field of environmental history, philosophy, and ethics, with special emphasis on the American environment. Topics will include environmental historiography, theories of environmental history, and the relationships between environmental history, philosophy, ethics, ecology, and policy.
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Merchant
Environmental History: Read Less [-]
ESPM 251 International Conservation and Development Policy 3 Units
Terms offered: Spring 2020, Spring 2019, Spring 2013
Changes in Third World rural economy, ecology, and environment and ways in which these are affected by development policies. Historical dimensions of Third World environmental problems. Changing patterns of rural production (especially food) and resource use; alternative theories of natural resource and socioeconomic development; linkages between socioeconomic environment in agrarian change and development policy; technology and resource control; conservation and development problems.
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate

ESPM 253 Advanced Readings in Political Ecology 4 Units
Terms offered: Fall 2018, Spring 2017, Fall 2015
Critique and comparison of literature in political ecology—an approach to sociological analysis of environmental change focusing on environmental conflict. Initial sessions address the definition of political ecology, its origins, and the politics and discourses of natural resource management. Literature includes domestic and international research involving the combination of social and environmental history, local perspectives, and political economy to discuss accounts of social and environmental change.

Rules & Requirements
Prerequisites: Consent of instructor; significant background in social theory

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Peluso

ESPM C255 Seminar in Sociology of Forest and Wildland Resources 3 Units
Terms offered: Spring 2020, Fall 2014, Spring 2014, Fall 2013
Individual projects and group discussions concerning social constraints to, and effects of, natural resource planning and management. Application of sociological theories to problems of managing wildland ecosystems. Students will examine topics of individual interest related to the management of wildland uses. Enrollment limited.

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Fortmann
Also listed as: GEOG C250

ESPM C254 Ethnic and Cultural Diversity in Health Status 4 Units
Focus on ethnic and cultural diversity in health behavior as a basis for public health programs. Consideration of U.S. ethnic minority groups and cultural groups in non-Western societies. Health status and behavior examined in context of relevant social and anthropological theory (social class, acculturation, political economy). Influence of socio-cultural background on concepts of health, illness, and health-seeking behavior. Implications for planning public health programs and policies. Ethnic and Cultural Diversity in Health Status: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Morello-Frosch
Also listed as: PB HLTH C202B

ESPM 256 Science, Technology, and the Politics of Nature 3 Units
Terms offered: Fall 2011, Spring 2011, Spring 2009
This course will introduce the methods and theories of Science and Technology Studies (STS) in order to explore the relationships among science, technology, law, and politics in the domains of environment and health. The course will focus some attention on the tension between technocracy and democracy in science policy, and on the role of biotechnology in reshaping the natural and political order. The course will equip graduate students in the social sciences, law, life sciences, and public policy with theoretical and practical tools for analyzing complex problems at the science, technology, and society interface.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Winickoff

Ethnic and Cultural Diversity in Health Status: Read Less [-]
ESPM 258 Race, Science, and Resource Policy 3 Units
Terms offered: Fall 2017, Fall 2015, Fall 2014
This course addresses explanation and strategy in natural resource policy with an emphasis on whether, why, and how (a) ‘race’ distributes access to and control of environmental resources, (b) ‘science’ creates and arrays perceptions, organization and control of these resources, and (c) public policy shapes racial disparities in natural resource opportunities. Topics are drawn primarily from issues in metropolitan, agricultural, and public resource systems.
Race, Science, and Resource Policy: Read More [+]
Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Romm
Formerly known as: 214
Race, Science, and Resource Policy: Read Less [-]

ESPM 259 Transnational Environmental Politics and Movements 3 Units
Terms offered: Spring 2018, Spring 2017, Spring 2014
Contemporary issues in international environmental politics; impacts of globalization on the environment; comparative transnational environmental movements. Study of current and historical texts. Case studies drawn from around the world with a focus on methods and research techniques.
Transnational Environmental Politics and Movements: Read More [+]
Rules & Requirements
Prerequisites: Upper division course in environmental policy or social science
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: O'Neill
Transnational Environmental Politics and Movements: Read Less [-]

ESPM 260 Governance of Global Production 3 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
This course explores critical policy and theoretical questions in the governance of global production. Current trends in the restructuring of industrial production; distributions of environmental, labor, and social impacts from this production; and new strategies for democratic governance are analyzed, including corporate self-regulation, monitoring, certification and labeling, fair trade programs, legal strategies, and international accords and agreements.
Governance of Global Production: Read More [+]
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar per week
Additional Details

Governance of Global Production: Read Less [-]

ESPM 261 Sustainability and Society 3 Units
Terms offered: Fall 2018, Fall 2017, Fall 2016
Science-based technologies that are central to the search for sustainability in contemporary societies and their environmental impacts. Theoretical approaches to investigating how science, technology, and environment intersect. How societies move closer to sustainable technological systems. Redesign of existing technologies and the introduction of new technologies. How adverse impacts can be prevented through policy. Case studies of contemporary developments.
Sustainability and Society: Read More [+]
Rules & Requirements
Prerequisites: Graduate standing or consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Iles
Sustainability and Society: Read Less [-]
ESPM 262 Race, Identity, and the Environment 3 Units
Terms offered: Spring 2019, Spring 2018, Spring 2016
Advanced readings on environment and race. Shifting meanings of “race” and its application and usefulness in theorizing human-environment relationships. Foundations of environmental ideas and attitudes towards the natural environment and their connections to contemporary environmental practices. Construction of environmental narratives and images in defining ideas of racial and place identity. How representations of the natural environment are structurally and culturally racialized within environmental institutions and the media. Post-race possibilities. Race, Identity, and the Environment: Read More [+]
Rules & Requirements
Prerequisites: Graduate standing or consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week
Additional Details

Grading: Letter grade.
Instructor: Finney
Race, Identity, and the Environment: Read Less [-]

ESPM 263 Indigenous, Feminist, and Postcolonial Approaches to Science, Technology, and Environment 4 Units
Terms offered: Spring 2013, Spring 2012, Spring 2011
This seminar presents material from indigenous studies; feminist and postcolonial science and technology studies (STS), including animal studies; political ecology; and other fields. It engages non-dominant knowledges while interrogating the role of key technoscientific concepts (modernity, objectivity, universality) in colonizations of both humans and nonhumans. This course highlights the role of critical methods in shifting power relations in research, including students’ own research. Indigenous, Feminist, and Postcolonial Approaches to Science, Technology, and Environment: Read More [+]
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate

ESPM 271 Advanced Remote Sensing of Natural Resources 3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2014
The course provides a discussion of the advanced topics in remote sensing and image analysis for environmental applications. Topics include airborne and satellite remote sensing data acquisition; spatial, spectral, radiometric, and temporal resolutions; image display systems, classification algorithms; accuracy assessment; and integration in a geospatial context. Students will select either a lab assignment or conduct a project using multispectral, Hyperspectral, RADAR, SAR, LiDAR, etc. data, will write a report and make a presentation to the class; If project option is selected, a working knowledge of ERDAS Imagine or another image processing system is required. The Geospatial Innovation Facility (GIF) will be available to all students.

Grading: Letter grade.

Instructor: O'Hara

Advanced Silviculture: Read Less [-]
ESPM 277 Advanced Topics in Conservation Biology 3 Units
Terms offered: Fall 2018, Fall 2017, Fall 2016
A graduate level seminar covering advanced topics in conservation of biodiversity, focused on designing protected area networks. We will first lay the groundwork for the course by exploring the fundamental papers in ecology and conservation biology that led to systematic conservation planning. Then, we will study various issues at the current frontiers of the discipline, such as incorporating threats, costs, evolutionary processes, and ecosystem services into reserve network design. The class will encourage student engagement through discussions, group projects, peer instruction and peer review of essays.
Advanced Topics in Conservation Biology: Read More [+]
Rules & Requirements
Prerequisites: Undergraduate courses in ecology, population biology, or conservation biology
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate
Grading: Letter grade.
Instructor: Kremen
Advanced Topics in Conservation Biology: Read Less [-]

ESPM 278 Range Assessment 3 Units
Rangeland vegetation sampling techniques with emphasis on comparing the relative efficiency of different techniques of vegetation measurement. Includes weekly lab exercises on artificial sampling boards and/or in the field. Juniors and seniors are encouraged.
Range Assessment: Read More [+]
Rules & Requirements
Prerequisites: 186 and one semester of statistics
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

ESPM C282 Health Implications of Climate Change 3 Units  
The course will provide a basic foundation in the physical mechanisms of, responses to, and health implications of climate change. We will explore the variety of epidemiologic, risk assessment, and statistical methods used to understand the impacts of climate change on health across diverse demographic groups. The public health implications, positive and negative, of efforts to mitigate and adapt to climate change will be elaborated, including discussions of ethical, political, and economic aspects of these efforts. Students will be responsible for leading class discussions and presenting a poster on their choice of a topic related to climate change and health.  
Health Implications of Climate Change: Read More [+]  
Rules & Requirements  
Prerequisites: The material will be presented with minimal expectation of a background in physical science, although some additional reading may be needed for students with no university science courses. A background in epidemiology is also helpful, but not necessary  
Hours & Format  
Fall and/or spring: 15 weeks - 3 hours of lecture per week  
Additional Details  
Subject/Course Level: Environ Sci, Policy, and Management/Graduate  
Grading: Letter grade.  
Instructor: Jerrett, Morello-Frosch  
Demographic Methods for Population Viability Analysis: Read Less [-]  

ESPM 284 Demographic Methods for Population Viability Analysis 3 Units  
Terms offered: Fall 2009, Fall 2007, Fall 2002  
Application of demographic methods to the management of plant and animal populations. Conservation problems faced by small populations of threatened or exploited species will be emphasized. Implications for life-history theory will also be discussed. Demographic analyses include (1) an understanding of life cycle diagrams, projection matrices, and age- and stage-based approaches; (2) calculation of population growth rate and sensitivity of demographic parameters to perturbation; and (3) advanced techniques of stochastic simulation modeling, spatial analyses, and population viability analyses will be learned.  
Demographic Methods for Population Viability Analysis: Read More [+]  
Rules & Requirements  
Prerequisites: Graduate standing or consent of instructor  
Hours & Format  
Fall and/or spring: 15 weeks - 3 hours of lecture per week  
Additional Details

Grading: Letter grade.
Instructors: Resh, Rhew
Also listed as: GEOG C302
Effective Scientific Communication: Read Less [-]

Effective Scientific Communication 3 Units
Terms offered: Fall 2009, Fall 2007
This course will introduce methods of organizing and delivering oral presentations, initiating and organizing manuscripts, and utilizing digital communication methods, such as web-based media. Students will develop effective communication techniques through in-class experience. This class will have an emphasis on the sciences but will be useful and open to graduate students of all disciplines.
Effective Scientific Communication: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Professional course for teachers or prospective teachers
Grading: Offered for satisfactory/unsatisfactory grade only.

ESPM 375 Professional Preparation: Teaching in Environmental Science, Policy, and Management 2 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
This course is designed to better prepare graduate students for their GSI appointments, and to foster graduate student professional development in academia. The disciplinary theme for the course is on interdisciplinary teaching and multiple ways of teaching in the environmental fields. GSIs are introduced to their roles and responsibilities as instructors in these various learning environments, and to resources to enhance teaching. The course facilitates experimentation with different teaching methods, serves as a forum for sharing information on pedagogical practices, and provides feedback on teaching. As requested by students, the course is front-loaded with practical tools for classroom teaching.
Professional Preparation: Teaching in Environmental Science, Policy, and Management: Read More [+]

ESPM 400 Professional Training in Research
1 - 6 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Training for students in planning and performing research under the supervision of a faculty member. This course is intended to provide credit for experience obtained.

Rules & Requirements
Prerequisites: Consent of instructor and appointment as graduate student researcher
Credit Restrictions: Course does not satisfy unit or residence requirements.
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Other professional
Grading: Offered for satisfactory/unsatisfactory grade only.

ESPM 602 Individual Study for Doctoral Students
1 - 8 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Individual study in consultation with the major field adviser, intended to provide an opportunity for qualified students to prepare themselves for the various examinations required of candidates for the Ph.D.

Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Summer: 6 weeks - 1-5 hours of independent study per week 8 weeks - 1-4 hours of independent study per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Graduate examination preparation
Grading: Offered for satisfactory/unsatisfactory grade only.

ESPM 601 Individual Study for Master’s Students
1 - 8 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Individual study for the comprehensive examination in consultation with the field adviser.

Rules & Requirements
Prerequisites: Consent of instructor
Credit Restrictions: Course does not satisfy unit or residence requirements for master's degree.
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Summer: 6 weeks - 1-5 hours of independent study per week 8 weeks - 1-4 hours of independent study per week
