Military Affairs

Overview

The Military Affairs Program, within the Division of Undergraduate and Interdisciplinary Studies (UGIS), comprises the three distinct military officer commissioning programs: Air Force Reserve Officers Training Corps (ROTC), Army ROTC, and Naval ROTC. The purpose of the program is to integrate the educational offerings of the separate military services into the regular University curricula. In performing academic functions, the Military Affairs Program operates the same as any other program within UGIS. Its military faculty members, though nominated by the three military services, are subject to the same selection process as other UC Berkeley faculty members, and the Academic Senate’s Committee on Courses must approve its curriculum. Military Affairs courses are open to all Berkeley students, as well as to students from other East Bay colleges under cross-enrollment agreements or through UC Berkeley Extension.

No undergraduate majors or minors or graduate degrees are offered in any of the following programs; they are designed to supplement a student's degree program.

Aerospace Studies (Air Force ROTC)

The Department of Aerospace Studies offers students, in virtually all academic areas, the opportunity to qualify for a commission as a 2nd Lieutenant in the United States Air Force while simultaneously completing university degree requirements. Each eligible student must have at least three full academic years remaining in his/her bachelor's degree program; under certain circumstances, an Air Force Reserve Officers’ Training Corps (AFROTC) cadet may finish the AFROTC program while simultaneously completing one year of a graduate degree program.

Students interested in AFROTC are eligible to compete for scholarships which cover the costs of tuition, books, and most fees. In addition, a $300–$500 monthly living allowance is paid to each student on scholarship. Cadets competing for scholarships should contact the Recruiting Flight Commander at 510-642-3572 or visit the AFROTC Scholarships website (https://www.afrotc.com/scholarships/).

The AFROTC Detachment at Berkeley emphasizes student participation and involvement. Classes are conducted as seminars and call for active student discussion. In addition, there is a weekly two-hour leadership laboratory that is mandatory for all AFROTC cadets. In this laboratory, students become involved in the management of their own cadet organization. Cadets also participate in volunteer projects, visits to Air Force bases, and various community outreach programs.

Completion of the program to earn a commission as an Air Force 2nd Lieutenant requires enrollment during each semester in a specified course in Aerospace Studies or Military Affairs. The normal sequence for the four-year program is as follows: freshman (fall and spring); sophomores, AEROSPAC 2A (fall and spring); juniors (fall and spring); seniors (fall and spring). The freshman and sophomore courses are each one credit hour, and the junior and senior courses are both three credits each.

Aerospace Studies courses are open to all University students; students from other institutions may participate in the AFROTC program through cross-enrollment arrangements or through the University Extension.

For further information on enrollment requirements and procedures, contact the Recruiting Flight Commander at 510-642-3572, afrotc@military.berkeley.edu, and check out the AFROTC Detachment website (http://airforcerotc.berkeley.edu/).

Military Science (Army ROTC)

The Army Officer Education Program offers a variety of credit courses focused on the study of the military as an institution, adventure training opportunities, and a program of laboratory work in practical military skills. The program provides an opportunity to examine service in the Army while earning a baccalaureate degree. A student who completes the program may earn a commission in the Regular Army, Army Reserve, or National Guard.

Graduate or undergraduate students can complete the Military Science requirements through a four-year, three-year, or two-year program. The four-year and three-year programs involve the Basic and Advanced Courses; the two-year program involves only the Advanced Course. The Army Reserve Officers’ Training Course (ROTC) Basic Course consists of two distinct components: the classroom introduction to the Army profession and officership of the Military Science and Leadership (MSL) I year, and the experiential examination of leadership, decision-making, and group process of the MSL-II year. Both Basic Course years are designed to enhance student interest in ROTC and the Army.

MSL-I lessons provide an overview of the key subjects of pre-commissioning, which will be treated in much greater depth in the Advanced Course. The MSL-II year places cadets in a wide variety of group exercises designed to emphasize various professional leadership competencies and insights. These events are held both inside the classroom and in outdoor settings. The instructor, acting as facilitator, helps guide student processing, or after-action reviews, of the events to derive the leadership, group dynamics, and problem-solving lessons that the exercises offer. In addition to military skills, practical ‘life skills’ are emphasized throughout the two years.

Cadets may also be required to attend Basic Camp, a four-week summer ROTC training experience at Fort Knox, Kentucky. By the end of the Basic Course, cadets should possess a basic understanding of the unique aspects of the officer corps, individual fitness, and healthy lifestyle. The lessons are designed to maximize cadet participation, inspire intellectual curiosity, and stimulate self-study. Upon completion of the course, cadets are eligible to enter the Advanced Course.

The Army ROTC Advanced Course is composed of four courses, MIL SCI 131, MIL SCI 132, MIL SCI 141, and MIL SCI 142, and Advanced Camp, which is a mandatory four-week leader development training course conducted during the summer at Fort Knox, Kentucky.

The Advanced Course is designed to teach all knowledge, skills, and attitudes for commissioning as a new second lieutenant, and to establish a sound foundation for a career as a commissioned Army officer. This approach is taken because the Advanced Course comprises the minimum curriculum that an individual must complete in order to be commissioned. Advanced Course lessons are carefully sequenced and linked and are progressive in their treatment of key officer knowledge and competencies. Students are encouraged to synthesize lessons to form broader perspectives, deeper insights, and more robust problem-solving abilities by the use of earlier lessons. Topics are designed to facilitate entry into military service at the completion of the MIL SCI 142 term.

The two-year program begins with direct placement in the Advanced Course. It is available to undergraduate or graduate students, who have
completed any of the following: enlisted military service, completion of ROTC Basic Camp, or three years of Junior ROTC. Students must have at least two academic years left until completion of their degree when they enter the Advanced Course.

**Naval Science (Naval ROTC)**

The Department of Naval Science offers a program of instruction for men and women leading to commissions in either the US Navy or US Marine Corps. Naval Science courses are open to all university students or, subject to approval, may be taken through UC Berkeley Extension.

Students enrolled in the Naval ROTC program will normally complete the following courses during their first two years as part of their overall academic load: NAV SCI 1, NAV SCI 2, NAV SCI 3, and NAV SCI 10. Navy Option students will then complete the following courses during their junior and senior years: NAV SCI 12A, NAV SCI 12B, NAV SCI 401, and NAV SCI 412. Marine Option students will participate in a Marine seminar and complete the Fundamentals of Maneuver Warfare (NAV SCI 154) and Evolution of Warfare (NAV SCI 20). All Navy Option scholarship students must complete one year of calculus and one year of calculus-based physics by the end of their sophomore and junior years respectively.

Students are also required to attend weekly professional development laboratories each Thursday. These three-hour sessions offer the student midshipman an active role in the management and direction of the midshipman battalion and provide time for the midshipmen to explore professional topics. Student midshipmen also participate in four-to-six week summer training cruises throughout the world. While at sea and serving alongside Sailors and Officers, they apply theoretical aspects of their education and training to the real-world environment of the U.S. Navy. Marine Option midshipmen attend Marine Corps Officer Candidates School in the summer between their junior and senior year.

To learn more about various NROTC scholarship opportunities, selection criteria, and the application process, please visit [http://www.nrotc.navy.mil/scholarships.html](http://www.nrotc.navy.mil/scholarships.html).

AEROSPC 2A The Evolution of Air and Space Power 1 Unit
Terms offered: Fall 2020, Fall 2019, Fall 2018
This course examines the general aspects of air/space power through historical study and analysis, providing students with knowledge of the capabilities, functions, and doctrinal employment of air/space forces. It covers the period from the first balloons and dirigibles to the employment of air/space power during the Cold War, utilizing historical/operational examples to highlight the development of USAF core competencies, capabilities, and missions that underpin the evolution of today’s USAF. This course emphasizes oral/written communication skills development. AFROTC cadets must also attend Leadership Lab, a weekly lab providing practical experience in areas like customs and courtesies, health/physical fitness, and drill and ceremonies.

AEROSPC 2B The Evolution of Air and Space Power 1 Unit
Terms offered: Spring 2020, Spring 2019, Spring 2018
This course examines the general aspects of air/space power through a historical perspective, as well as fundamental truths associated with war (e.g., principles of war and tenets of air/space power). As a whole, this course provides students with a knowledge level understanding for the element and employment of air/space power, from an institutional, doctrinal, and historical perspective. Students will also conduct writing and briefing assignments to meet Air Force communication skills requirements. Additionally, AFROTC cadets must attend Leadership Lab, a weekly lab that provides practical experience in key areas to include Air Force customs and courtesies, health/physical fitness, and drill and ceremonies.

AEROSPC 100 Leadership Laboratory 0.0 Units
Terms offered: Fall 2020, Spring 2020, Fall 2019
Leadership Lab (LLAB) represents the hands-on portion of the Aerospace Studies courses. It presents a dynamic and integrated grouping of leadership developmental activities. LLAB is a student planned, organized, and executed practicum intended to maximize cadet leadership experience and preparation for easy transition to their active duty assignments. It is conducted under the supervision of AFROTC cadre. The course focuses on the leadership experiences of senior and junior cadets and provides training in basic military knowledge and skills to underclass cadets. Cadets are trained on proper uniform wear, grooming and appearance requirements, physical fitness, knowledge of military customs and courtesies, and military drill and ceremony.

MIL AFF 1 Military Physical Fitness 1 Unit
Terms offered: Fall 2020, Spring 2020, Fall 2019
This course teaches the fundamentals of physical fitness employed by the U.S. military to condition ROTC cadets for the physical demands they will face as military officers. The course consists of rigorous physical training under the supervision of military officers and noncommissioned officers. The goal of this course is to not only enhance one’s level of physical fitness, but also to develop leadership qualities in the conduct and planning of physical fitness training. Physical training will include, but is not limited to: running up to five miles, team sports, aerobics, and other activities.

Military Physical Fitness: Read More [+] Rules & Requirements

MIL AFF 180 Philosophy of Leadership 3 Units
Terms offered: Fall 2020, Spring 2020
What is leadership? Does leadership remain fundamentally the same when you change scale or purpose, or does it in some way become fundamentally different? What is good leadership? Are the virtues of leadership universal and unchanging, or are they relative to your historical circumstances? Who can be a leader? Can leadership be taught, or is it something you are born with? How do we gain knowledge about leadership? Can we learn leadership through logic, reasoning from fundamental ideas, or do we require experimentation and empirical evidence? These are some of the questions we will be investigating through the close reading of classic texts on the philosophy of leadership, such as Plato’s Statesman and Machiavelli’s The Prince.

MIL SCI 1 Leadership Laboratory 0.0 Units
Terms offered: Fall 2020, Spring 2020, Fall 2019
The instruction includes organization and management of military units, physical training, drill and ceremonies, land navigation techniques, survival skills, and extensive first aid training.

MIL AFF 199 Supervised Independent Study and Research 1 - 4 Units
Terms offered: Fall 2020, Spring 2020, Fall 2019
Supervised independent study and research for undergraduate students who desire to pursue topics of their own selection.

MIL SCI 2 Introduction to the Army and Critical Thinking 1 Unit
Terms offered: Fall 2020, Fall 2019, Fall 2018
The purpose of this one credit hour seminar style course is to introduce the student to issues and competencies that are central to a commissioned officer's responsibilities. These initial lessons establish a framework for understanding officership, leadership, and the Army values. Additionally, the semester addresses 'life skills' including comprehensive fitness, goal setting, cultural understanding, and time management. This course is designed to give accurate insight into the Army profession and the officer's role within the Army and to lay the foundation for further leadership development.
**MIL SCI 3 Introduction to the Profession of Arms 1 Unit**
Terms offered: Spring 2020, Spring 2019, Spring 2018
This course overviews leadership fundamentals such as setting direction, problem-solving, listening, presenting briefings, providing feedback, and using effective writing skills. Students will explore dimensions of leadership attributes and core leader competencies in the context of practical, hands-on, and interactive exercises.
