PLANTBI 10 Plants, Agriculture, and Society 2 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
Changing patterns of agriculture in relation to population growth, the biology and social impact of plant disease, genetic engineering of plants: a thousand years of crop improvement and modern biotechnology, interactions between plants and the environment, and effects of human industrial and agricultural activity on plant ecosystems. Knowledge of the physical sciences is neither required nor assumed.

PLANTBI 11 Fungi, History, and Society 3 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Fungi have interacted with humans in both positive and negative ways throughout history. These interactions have included production of foods, medicines, fuels, plant and animal diseases, decay, allergies, and mind-altering drugs.

PLANTBI 13 Genetics for Nonscientists 3 Units
Terms offered: Fall 2022, Spring 2014, Spring 2013
How can genetics help increase the food supply even as farmland conditions degrade? How genetically unique are humans? What do buzzwords like GWAS and epigenetics refer to, and how are they impacting medicine and public health? This introductory course for non-science majors will explore topics like these as students learn the foundations of scientific reasoning, genetics concepts and approaches, and their promise and limits in addressing societal challenges past and present. Objectives include learning fundamentals of biology and their applications; building students’ capacity to make informed interpretations of experimental data and policies involving “genetics” in a changing world; and to understand our place in nature.

PLANTBI 20 Introduction to the Plant Sciences at Berkeley 1 Unit
Terms offered: Fall 2022, Fall 2021, Fall 2020
This course will include discussions on the academic path (courses) needed for the Genetics and Plant Biology major; an introduction to resources and facilities for studies of the plant sciences at Berkeley, such as the University Herbarium and the Botanical Garden; an exploration of plant science related careers, including presentations from guest speakers who work in organic farming, government, and Cooperative Extension; talks by faculty about their current research, and information about how to do research in a lab.

PLANTBI 13 Genetics for Nonscientists 3 Units
Terms offered: Fall 2022, Spring 2014, Spring 2013
How can genetics help increase the food supply even as farmland conditions degrade? How genetically unique are humans? What do buzzwords like GWAS and epigenetics refer to, and how are they impacting medicine and public health? This introductory course for non-science majors will explore topics like these as students learn the foundations of scientific reasoning, genetics concepts and approaches, and their promise and limits in addressing societal challenges past and present. This course will include discussions on the academic path (courses) needed for the Genetics and Plant Biology major; an introduction to resources and facilities for studies of the plant sciences at Berkeley, such as the University Herbarium and the Botanical Garden; an exploration of plant science related careers, including presentations from guest speakers who work in organic farming, government, and Cooperative Extension; talks by faculty about their current research, and information about how to do research in a lab.

PLANTBI 10 Plants, Agriculture, and Society 2 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
Changing patterns of agriculture in relation to population growth, the biology and social impact of plant disease, genetic engineering of plants: a thousand years of crop improvement and modern biotechnology, interactions between plants and the environment, and effects of human industrial and agricultural activity on plant ecosystems. Knowledge of the physical sciences is neither required nor assumed.

PLANTBI 11 Fungi, History, and Society 3 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Fungi have interacted with humans in both positive and negative ways throughout history. These interactions have included production of foods, medicines, fuels, plant and animal diseases, decay, allergies, and mind-altering drugs.
PLANTBI 22 Microbial Friends and Foes 3 Units
Terms offered: Spring 2023, Spring 2022, Fall 2016
Although often unseen, microbes are everywhere! This course provides an overview of the beneficial and harmful roles played by microbes, including viruses, archaea, bacteria, protists and fungi. We will examine microbes in terrestrial, marine, and extreme environments and discuss their functions in ecosystem health and climate change. In addition, we will explore the profound effects of microbes on the course of history through their effects on agriculture and human health.

Microbial Friends and Foes: Read More [+]

Objectives & Outcomes
Course Objectives:
1. Understand similarities and differences between viruses, archaea, bacteria, protists, and fungi.
2. Understand both beneficial and harmful functions of microbes in daily life.
3. Evaluate data and claims relating to microbes in real-life situations such as disease risk, probiotic efficacy, and climate change.
4. Understand how molecular properties and behaviors of microbes determine how they interact with their environment and with other organisms.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week.
Summer:
- 6 weeks: 6 hours of lecture and 3 hours of discussion per week
- 8 weeks: 4 hours of lecture and 2 hours of discussion per week
- 10 weeks: 3 hours of lecture and 1.5 hours of discussion per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Glass Ryan Seed
Microbial Friends and Foes: Read Less [-]

PLANTBI 24 Freshman Seminar 1 Unit
Terms offered: Fall 2023, Fall 2022, Fall 2021
Reading and discussion with Plant and Microbial Biology faculty on current research and topics in plant and microbial biology. Topics which may be discussed include microbial biology, plant genetics, plant development, plant pathology, agricultural biotechnology, and genetic engineering. Ideal for students who are considering a major in the Department of Plant and Microbial Biology. Enrollment is limited to 20 freshmen.

Freshman Seminar: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week.

Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Glass Ryan Seed
Microbial Friends and Foes: Read Less [-]

PLANTBI 39E Freshman/Sophomore Seminar 2 - 4 Units
Terms offered: Spring 2012
Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester. Enrollment limits are set by the faculty, but the suggested limit is 25.

Freshman/Sophomore Seminar: Read More [+]

Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2-4 hours of seminar per week.

Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: The grading option will be decided by the instructor when the class is offered. Final exam required.
Instructor: Lindow
Freshman/Sophomore Seminar: Read Less [-]

PLANTBI 40 The (Secret) Life of Plants 3 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
Covers contemporary topics in plant biology. Examines how plants grow, reproduce, and respond to the environment (e.g., to light) in ways distinct from animals. Presents basic principles of genetics, cell, and molecular biology. Basics of genetic engineering and biotechnology reveal how they are used to modify plants, and these socially relevant issues are assessed. Includes visit to modern plant biology research laboratory, and aspects of plant disease and diversity. Knowledge of the physical sciences neither required nor assumed.

The (Secret) Life of Plants: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week.
Summer:
- 8 weeks - 4 hours of lecture and 2 hours of discussion per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final Exam To be decided by the instructor when the class is offered.
Instructor: Zambryski
The (Secret) Life of Plants: Read Less [-]
PLANTBI 84 Sophomore Seminar 1 or 2 Units
Terms offered: Spring 2011, Spring 2010, Spring 2009
Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.
Sophomore Seminar: Read More [+]

Rules & Requirements
Prerequisites: At discretion of instructor
Repeat rules: Course may be repeated for credit when topic changes.

Hours & Format
Fall and/or spring:
5 weeks - 3-6 hours of seminar per week
10 weeks - 1.5-3 hours of seminar per week
15 weeks - 1-2 hours of seminar per week
Summer:
6 weeks - 2.5-5 hours of seminar per week
8 weeks - 1.5-3.5 hours of seminar and 2-4 hours of seminar per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: The grading option will be decided by the instructor when the class is offered. Final exam required.

Sophomore Seminar: Read Less [-]

PLANTBI C96 Studying the Biological Sciences 1 Unit
Terms offered: Fall 2023, Fall 2022, Fall 2021
Students will be introduced to the "culture" of the biological sciences, along with an in-depth orientation to the academic life and the culture of the university as they relate to majoring in biology. Students will learn concepts, skills, and information that they can use in their major courses, and as future science professionals.

Studying the Biological Sciences: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam required.
Instructor: Matsui
Also listed as: INTEGBI C96/MCELLBI C96

Studying the Biological Sciences: Read Less [-]

PLANTBI 98 Directed Group Study 1 - 3 Units
Terms offered: Fall 2023, Fall 2015, Fall 2014
Lectures and small group discussions focusing on topics of interest, varying from semester to semester.

Directed Group Study: Read More [+]

Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1-3 hours of directed group study per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

Directed Group Study: Read Less [-]

PLANTBI 99 Supervised Independent Study and Research 1 - 4 Units
Terms offered: Spring 2016, Fall 2015, Spring 2015
Lower division independent study and research intended for the academically superior student. Enrollment only with prior approval of faculty advisor directing the research.

Supervised Independent Study and Research: Read More [+]

Rules & Requirements
Prerequisites: GPA of 3.4 or higher; lower division status
Credit Restrictions: Enrollment is restricted; see the section on Academic Policies-Course Number Guide in the Berkeley Guide.
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1-3 hours of independent study per week
Summer:
6 weeks - 2.5-8 hours of independent study per week
8 weeks - 1.5-6 hours of independent study per week
10 weeks - 1.5-4.5 hours of independent study per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

Supervised Independent Study and Research: Read Less [-]
PLANTBI 101L Experimental Plant Biology Laboratory 3 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
Students will perform state-of-the-art research to address an important question in modern plant biology. The experimental progression exposes students to a variety of modern molecular approaches and techniques. Experimental design, data acquisition, and analysis of the student's real experimental data is emphasized. Research results will be presented in written and oral formats similar to those used in research laboratories.

PLANTBI C103 Bacterial Pathogenesis 3 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
This course for upper division and graduate students will explore the molecular and cellular basis of microbial pathogenesis. The course will focus on model microbial systems which illustrate mechanisms of pathogenesis. Most of the emphasis will be on bacterial pathogens of mammals, but there will be some discussion of viral and protozoan pathogens. There will be an emphasis on experimental approaches. The course will also include some aspects of bacterial genetics and physiology, immune response to infection, and the cell biology of host-parasite interactions.

PLANTBI 104L Discovery-Based Research in Microbiology 2 Units
Terms offered: Summer 2019 First 6 Week Session, Summer 2018 First 6 Week Session, Summer 2010 10 Week Session
An introduction to microbiology research in which students generate gene knockouts in Caulobacter and analyze the mutant phenotypes. Each student will disrupt one gene of known function and one gene of unknown function. Students will attend lectures focusing on the techniques to be employed and perform experiments under supervision. This course may be taken by students with no prior laboratory experience to expose them to discovery-oriented research.

PLANTBI C107L Principles of Plant Morphology with Laboratory 4 Units
Terms offered: Spring 2019, Fall 2017, Fall 2016
An analysis of the structural diversity of land plants with emphasis on the developmental mechanisms responsible for this variation in morphology and the significance of this diversity in relation to adaptation and evolution.

PLANTBI 107C Principles of Plant Morphology with Laboratory 4 Units
Terms offered: Spring 2019, Fall 2017, Fall 2016
An analysis of the structural diversity of land plants with emphasis on the developmental mechanisms responsible for this variation in morphology and the significance of this diversity in relation to adaptation and evolution.

PLANTBI C107L Principles of Plant Morphology with Laboratory 4 Units
Terms offered: Spring 2019, Fall 2017, Fall 2016
An introduction to microbiology research in which students generate gene knockouts in Caulobacter and analyze the mutant phenotypes. Each student will disrupt one gene of known function and one gene of unknown function. Students will attend lectures focusing on the techniques to be employed and perform experiments under supervision. This course may be taken by students with no prior laboratory experience to expose them to discovery-oriented research.

PLANTBI 104L Discovery-Based Research in Microbiology 2 Units
Terms offered: Summer 2019 First 6 Week Session, Summer 2018 First 6 Week Session, Summer 2010 10 Week Session
An introduction to microbiology research in which students generate gene knockouts in Caulobacter and analyze the mutant phenotypes. Each student will disrupt one gene of known function and one gene of unknown function. Students will attend lectures focusing on the techniques to be employed and perform experiments under supervision. This course may be taken by students with no prior laboratory experience to expose them to discovery-oriented research.

PLANTBI C103 Bacterial Pathogenesis 3 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
This course for upper division and graduate students will explore the molecular and cellular basis of microbial pathogenesis. The course will focus on model microbial systems which illustrate mechanisms of pathogenesis. Most of the emphasis will be on bacterial pathogens of mammals, but there will be some discussion of viral and protozoan pathogens. There will be an emphasis on experimental approaches. PLANTBI C109 Evolution and Ecology of Development 3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2016
From the seahorse’s body to the venus flytrap’s jaws to the human brain, nature abounds with amazing adaptations. This interdisciplinary course explores how and why such biodiversity evolves as well as what limits diversity. Lectures and case studies will focus on core concepts, recent advances, and integrative approaches, placing special emphasis on the interplay between gene regulatory networks, the environment, and population genetics.
Evolution and Ecology of Development: Read More [+]

Objectives & Outcomes

Student Learning Outcomes:
• Explain how an interdisciplinary approach involving genetics, development, evolutionary biology, and ecology can be used to understand the processes that generate patterns of biodiversity.
• List and describe major questions, findings, and experimental approaches in the field of ecological and evolutionary developmental biology.
• Discuss biological research using specialized terminology and defend your opinions.
• Critically evaluate and interpret the primary scientific literature.
• Combine factual material with deductive reasoning to propose hypotheses and future research directions.

Rules & Requirements

Prerequisites: BIOLOGY 1A and 1B

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Plant and Microbial Biology/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructor: Blackman

Also listed as: INTEGBI C109

Evolution and Ecology of Development: Read Less [-]

PLANTBI C110L Biology of Fungi with Laboratory 4 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
Selected aspects of fungi: their structure, reproduction, physiology, ecology, genetics and evolution; their role in plant disease, human welfare, and industry. Offered even fall semesters.
Biology of Fungi with Laboratory: Read More [+]

Rules & Requirements

Prerequisites: Biology 1B

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 6 hours of laboratory per week

Additional Details

Subject/Course Level: Plant and Microbial Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Bruns, Taylor

Also listed as: INTEGBI C110L

Biology of Fungi with Laboratory: Read Less [-]

PLANTBI C112 General Microbiology 4 Units
Terms offered: Fall 2023, Summer 2023 10 Week Session, Fall 2022
This course will explore the molecular bases for physiological and biochemical diversity among members of the two major domains, Bacteria and Archaea. The ecological significance and evolutionary origins of this diversity will be discussed. Molecular, genetic, and structure-function analyses of microbial cell cycles, adaptive responses, metabolic capability, and macromolecular syntheses will be emphasized.
General Microbiology: Read More [+]

Rules & Requirements

Prerequisites: Biology 1A and 1B

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Summer: 10 weeks - 5 hours of lecture and 1.5 hours of discussion per week

Additional Details

Subject/Course Level: Plant and Microbial Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Ryan

Also listed as: MCELLBI C112

General Microbiology: Read Less [-]
PLANTBI C112L General Microbiology Laboratory 2 Units
Terms offered: Fall 2023, Spring 2023, Fall 2022, Summer 2022 10 Week Session
Experimental techniques of microbiology designed to accompany the lecture in C112 and C148. The primary emphasis in the laboratory will be on the cultivation and physiological and genetic characterization of bacteria. Laboratory exercises will include the observation, enrichment, and isolation of bacteria from selected environments.
General Microbiology Laboratory: Read More [+]
Rules & Requirements
Prerequisites: C112 (may be taken concurrently)
Hours & Format
Fall and/or spring: 15 weeks - 4 hours of laboratory and 1 hour of discussion per week
Summer: 10 weeks - 6 hours of laboratory and 1.5 hours of discussion per week
Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Instructors: Komeili, Traxler
Also listed as: MCELLBI C112L
General Microbiology Laboratory: Read Less [-]

PLANTBI C114 Introduction to Comparative Virology 4 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
This course will provide a comparative overview of virus life cycles and strategies viruses use to infect and replicate in hosts. We will discuss virus structure and classification and the molecular basis of viral reproduction, evolution, assembly, and virus-host interactions. Common features used during virus replication and host cellular responses to infection will be covered. Topics also included are common and emerging virus diseases, their control, and factors affecting their spread.
Introduction to Comparative Virology: Read More [+]
Rules & Requirements
Prerequisites: Introductory chemistry (Chemistry 1A or 3A-3B or equivalent) and introductory biology (Biology 1A, 1AL, and 1B or equivalent) and general biochemistry (Molecular and Cell Biology C100A or equivalent--preferably completed but may be taken concurrently)
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week
Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Glaunsinger
Also listed as: ESPM C138/MCELLBI C114
Introduction to Comparative Virology: Read Less [-]

PLANTBI 113 California Mushrooms 3 Units
Terms offered: Fall 2019, Fall 2017, Fall 2015
This is a hands-on class in identification of macro fungi. Emphasis will be on laboratory work with fresh and dried fungi. Short lectures at the beginning of labs focus on mushroom systematic, collection techniques, and identification. Three weekend field trips are required in addition to the weekly laboratory. Previous course experience with fungi is recommended, but not required. Grades are based on tests and a collection.
California Mushrooms: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of laboratory and 1 hour of discussion per week
Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Bruns
California Mushrooms: Read Less [-]
PLANTBI C116 Microbial Diversity 3 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
This course for upper-division and graduate students will broadly survey myriad types of microbial organisms, both procaryote and eucaryote, using a phylogenetic framework to organize the concept of "biodiversity." Emphasis will be on the evolutionary development of the many biochemical themes, how they mold our biosphere, and the organisms that affect the global biochemistry. Molecular mechanisms that occur in different lineages will be compared and contrasted to illustrate fundamental biological strategies. Graduate students additionally should enroll in C216, Microbial Diversity Workshop.
Microbial Diversity: Read More [+]

Rules & Requirements
Prerequisites: Upper-division standing. C112 or consent of instructor and organic chemistry (may be taken concurrently)

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Coates

PLANTBI 120L Laboratory for Biology of Algae 2 Units
Terms offered: Spring 2022, Spring 2020, Spring 2018
Laboratories include study of representative types, identification of specimens collected during several field trips, and experiments on development, physiology, and molecular genetics.
Laboratory for Biology of Algae: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A-1B. Must be taken concurrently with 120

Hours & Format
Fall and/or spring: 15 weeks - 4 hours of laboratory per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Instructor: Niyogi

Laboratory for Biology of Algae: Read Less [-]

PLANTBI 120 Biology of Algae 2 Units
Terms offered: Spring 2022, Spring 2020, Spring 2018
General biology of freshwater and marine algae, highlighting current research and integrating phylogeny, ecology, physiology, genetics, and molecular biology.
Biology of Algae: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A-1B. Concurrent registration in 120L recommended

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Niyogi

Biology of Algae: Read Less [-]

PLANTBI 122 Bioenergy 2 Units
Terms offered: Spring 2023, Spring 2021, Spring 2020
Offers an assessment of global energy supply and demand, addresses the chemistry of climate change, examines the response of plants and microbes to changes in the environment, and emphasizes the role of biology and photosynthesis in offering solutions to related energy and societal problems. Bioenergy is examined from the point-of-view of potential biofuels, including aspects of the biological generation of hydrogen, hydrocarbons, fatty acids, lipids, and bio-oil, polymers and related materials.
Bioenergy: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A and 1B; Chemistry 3B

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Melis

Bioenergy: Read Less [-]
### PLANTBI C124 The Berkeley Lectures on Energy: Energy from Biomass 3 Units

**Terms offered:** Fall 2015, Fall 2014, Fall 2013

After an introduction to the different aspects of our global energy consumption, the course will focus on the role of biomass. The course will illustrate how the global scale of energy guides the biomass research. Emphasis will be placed on the integration of the biological aspects (crop selection, harvesting, storage and distribution, and chemical composition of biomass) with the chemical aspects to convert biomass to energy. The course aims to engage students in state-of-the-art research.

The Berkeley Lectures on Energy: Energy from Biomass: Read More [+]

#### Rules & Requirements

**Prerequisites:** Chemistry 1B or Chemistry 4B, Mathematics 1B, Biology 1A

**Repeat rules:** Course may be repeated for credit under special circumstances: Repeatable when topic changes with consent of instructor.

#### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture per week

#### Additional Details

**Subject/Course Level:** Plant and Microbial Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** Bell, Blanch, Clark, Smit, C. Somerville

The Berkeley Lectures on Energy: Energy from Biomass: Read Less [-]

### PLANTBI C134 Chromosome Biology/ Cytogenetics 3 Units

**Terms offered:** Fall 2022, Spring 2022, Spring 2021

Survey of behavior, structure, and function of chromosomes with emphasis on behavior in model organisms. Topics include mitosis, meiosis, chromosome aberrations, genome function, dosage compensation, transposons, repetitive DNA, and modern cytological imaging.

Chromosome Biology/Cytogenetics: Read More [+]

#### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture and 1 hour of discussion per week

#### Additional Details

**Subject/Course Level:** Plant and Microbial Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** Dernburg, Karpen

**Also listed as:** MCELLBI C134

Chromosome Biology/Cytogenetics: Read Less [-]

### PLANTBI 135 Physiology and Biochemistry of Plants 3 Units

**Terms offered:** Fall 2023, Fall 2022, Fall 2021

A study of physiological and biochemical processes in higher plants, including water relations, ion transport, and hormone physiology; photosynthesis (light utilization and carbon assimilation), nitrogen and sulfur metabolism, and plant-specific biosynthetic pathways.

Physiology and Biochemistry of Plants: Read More [+]

#### Rules & Requirements

**Prerequisites:** Biology 1A-1B

**Hours & Format**

**Fall and/or spring:** 15 weeks - 3 hours of lecture per week

#### Additional Details

**Subject/Course Level:** Plant and Microbial Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** Melis, Terry

Physiology and Biochemistry of Plants: Read Less [-]

### PLANTBI C136 Advanced Plant Biochemistry 4 Units

**Terms offered:** Spring 2023

Students will build on the central metabolic pathways to learn about plant-specific metabolism from a more mechanistic perspective, including photosynthesis, regulation of sugar and starch metabolism, chloroplast-based pathways of inorganic nutrient (nitrogen, sulfur) processing, N2 fixing in free-living and symbiotic bacteria, polyunsaturated fatty acid and oil biosynthesis and accumulation, secondary metabolism, cell-wall structure and biosynthesis. Instruction will focus on a research-based approach, including retrieving and researching the primary literature, and understanding experimental design in modern plant biochemistry.

Advanced Plant Biochemistry: Read More [+]

#### Rules & Requirements

**Prerequisites:** A minimum grade of C- in MCELLBI C100A/CHEM C130, MCELLBI 102, MCELLBI 104, MCELLBI 140, PLANTBI 135, or equivalent

**Hours & Format**

**Fall and/or spring:** 15 weeks - 3 hours of lecture, 1 hour of discussion, and 1 hour of tutorial per week

#### Additional Details

**Subject/Course Level:** Plant and Microbial Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Merchant

**Also listed as:** MCELLBI C117

Advanced Plant Biochemistry: Read Less [-]
**PLANTBI C146 Data Science for Biology 3 Units**

Terms offered: Fall 2022, Spring 2007, Spring 2005

Biology has become a data science! This lab course aims for student curiosity to drive hands-on case studies and coding projects about biological applications of data science. The course design supports students’ development of fundamental and transferable computational and statistical skills for critically thinking about and using data in biology. Ethical considerations are interwoven throughout. This course offers projects with multiple levels of sophistication and complexity, enabling participation for students with varying levels of experience.

**Objectives & Outcomes**

**Course Objectives:** Students will become empowered to use basic coding approaches to access, work with, and analyze biological data

- Students will learn how to appropriately apply statistical tests to biological data
- Students will learn how to select and evaluate methods and tools for data analysis
- Students will understand how to grapple with the ethical considerations of biological data

**Rules & Requirements**

**Prerequisites:** Biology 1A; Biology 1B (can be taken concurrently); Data C8 or equivalent statistics and programming experience

**Hours & Format**

Fall and/or spring: 15 weeks - 4 hours of laboratory per week

**Additional Details**

Subject/Course Level: Plant and Microbial Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Brenner, Eisen

Also listed as: BIO ENG C146/MCELLBI C146

Data Science for Biology: Read Less [-]

---

**PLANTBI C148 Microbial Genomics and Genetics 4 Units**

Terms offered: Spring 2023, Spring 2022, Spring 2021

Course emphasizes bacterial and archaeal genetics and comparative genomics. Genetics and genomic methods used to dissect metabolic and development processes in bacteria, archaea, and selected microbial eukaryotes. Genetic mechanisms integrated with genomic information to address integration and diversity of microbial processes. Introduction to the use of computational tools for a comparative analysis of microbial genomes and determining relationships among bacteria, archaea, and microbial eukaryotes.

**Objectives & Outcomes**

**Course Objectives:** Students will become empowered to use basic coding approaches to access, work with, and analyze biological data

- Students will learn how to appropriately apply statistical tests to biological data
- Students will learn how to select and evaluate methods and tools for data analysis
- Students will understand how to grapple with the ethical considerations of biological data

**Rules & Requirements**

**Prerequisites:** Molecular and Cell Biology C100A/Chemistry C130 or Molecular and Cell Biology 102

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Summer:

- 8 weeks - 6 hours of lecture and 2 hours of discussion per week
- 10 weeks - 5 hours of lecture and 1.5 hours of discussion per week

**Additional Details**

Subject/Course Level: Plant and Microbial Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Brenner, Taga

Also listed as: MCELLBI C148

Microbial Genomics and Genetics: Read Less [-]

---

**PLANTBI 150 Plant Cell Biology 3 Units**

Terms offered: Spring 2023, Fall 2021, Fall 2020

An introduction to the structure, dynamics, and function of plant cells: organelle structure and development; intracellular trafficking of small and macromolecules; cellular signaling; cell division and specialization.

**Objectives & Outcomes**

**Course Objectives:** Students will become empowered to use basic coding approaches to access, work with, and analyze biological data

- Students will learn how to appropriately apply statistical tests to biological data
- Students will learn how to select and evaluate methods and tools for data analysis
- Students will understand how to grapple with the ethical considerations of biological data

**Rules & Requirements**

**Prerequisites:** Biology 1A-1B

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Additional Details**

Subject/Course Level: Plant and Microbial Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Luan, Quail

Also listed as: BIO ENG C146/MCELLBI C146

Plant Cell Biology: Read Less [-]
PLANTBI 160 Plant Molecular Genetics 3 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
A consideration of plant genetics and molecular biology. Topics include principles of genomics and gene functional analysis; regulation of gene expression in response to environmental and developmental stimuli; intercellular and intracellular signaling pathways; and the molecular and genetic basis for the exceptional cellular and developmental strategies adopted by plants.
Plant Molecular Genetics: Read More [+]
Rules & Requirements
Prerequisites: Biology 1A-1B
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Fletcher, Daniel Zilberman

PLANTBI 165 Plant-Microbe Interactions 3 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
This course will cover topics in molecular plant-microbe interactions ranging from how microbes cause disease to how plants defend themselves. A second goal of the course is to engage students in state-of-the-art research in the area of plant-microbe interactions.
Plant-Microbe Interactions: Read More [+]
Rules & Requirements
Prerequisites: Biology 1A-1B, Statistics 2 or 20 or 131A or Public Health 142. Completion of an upper division plant biology and an upper division microbiology course is recommended
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructors: Somerville, Baker, Lewis

PLANTBI 170 Modern Applications of Plant Biotechnology 2 Units
Terms offered: Spring 2013, Spring 2012, Spring 2010
This course is designed to introduce students to the principles and applications of modern plant biotechnology. Basic concepts of modern agriculture will be reviewed in light of emerging biotechnology applications. Emphasis will be placed on understanding the tools and strategies involved in optimizing plant productivity.
Modern Applications of Plant Biotechnology: Read More [+]
Rules & Requirements
Prerequisites: Biology 1A-1B
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week
Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Baker, Somerville

PLANTBI 177 Communicating Quantitative Information 2 Units
Terms offered: Prior to 2007
This course will cover several aspects of communicating quantitative information, with a primary focus on visualizations for publications, presentations, and posters. Other topics include sharing of data and analyses, such as new publication models and interactive notebooks, as well as lifecycle data management and publication. Primary discussion will be on conceptual issues, and students will be expected to use various systems and resources as self-directed homestudy.
Communicating Quantitative Information: Read More [+]
Rules & Requirements
Prerequisites: Instructor Approval
Hours & Format
Fall and/or spring: 15 weeks - 1.5 hours of seminar and 1.5 hours of discussion per week
Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Brenner
Communicating Quantitative Information: Read Less [-]
PLANTBI 180 Environmental Plant Biology 2
Units
Terms offered: Fall 2019, Fall 2017, Fall 2015
An integrated and multidisciplinary approach to the study of interactions between plants and the environment. Introduces physical parameters in the global and micro-environment that affect plant function; and molecular, cellular, and developmental aspects of plant response to suboptimal/adverse conditions. Underlying biochemistry, physiology, and molecular biology of plant adaptation and acclimation mechanisms. Examines consequences of industrial activity on plant growth and productivity.
Environmental Plant Biology: Read More [+]
Rules & Requirements
Prerequisites: Biology 1A-1B

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Terry

Environmental Plant Biology: Read Less [-]

PLANTBI 185 Techniques in Light Microscopy 3 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
The course will be a detailed overview of the practice of light microscopy as applied to scientific investigation. The emphasis of the course will be on the correct and appropriate use of the light microscope for biological scientists; however students of other disciplines are welcome. The course will cover optical microscope theory, microscope components and mechanics, and optical techniques including detailed descriptions, demonstrations, and use of all the modern light microscope contrast methods. Students will receive hands-on experience in all microscope and digital imaging techniques via direct instruction and use of instrumentation in the College of Natural Resources Biological Imaging Facility.
Techniques in Light Microscopy: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Ruzin

Techniques in Light Microscopy: Read Less [-]

PLANTBI 190 Special Topics in Plant and Microbial Biology 1 - 4 Units
Terms offered: Summer 2014 Second 6 Week Session, Spring 2012, Spring 2011
This class is designed to develop skills in critical analysis of specific plant and/or microbial biology issues. Topics may vary from semester to semester.
Special Topics in Plant and Microbial Biology: Read More [+]
Rules & Requirements
Prerequisites: Upper division standing or consent of instructor
Repeat rules: Course may be repeated for credit when topic changes.

Hours & Format
Fall and/or spring: 15 weeks - 1-4 hours of lecture per week
Summer:
6 weeks - 3-10 hours of lecture per week
8 weeks - 2-8 hours of lecture per week
10 weeks - 1.5-6 hours of lecture per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Special Topics in Plant and Microbial Biology: Read Less [-]

PLANTBI C192 Molecular Approaches to Environmental Problem Solving 2 Units
Terms offered: Fall 2020, Spring 2019, Fall 2018
Seminar in which students consider how modern biotechnological approaches, including recombinant DNA methods, can be used to recognize and solve problems in the area of conservation, habitat and endangered species preservation, agriculture and environmental pollution. Students will also develop and present case studies of environmental problems solving using modern molecular methods.
Molecular Approaches to Environmental Problem Solving: Read More [+]
Rules & Requirements
Prerequisites: Junior or senior standing in the Genetics and Plant Biology or Microbial Biology major, or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Lindow
Formerly known as: Environ Sci, Policy, and Management 192
Also listed as: ESPM C192
Molecular Approaches to Environmental Problem Solving: Read Less [-]
PLANTBI H196 Honors Research - Plant and Microbial Biology 4 Units
Terms offered: Fall 2016, Spring 2016, Fall 2015
Supervised independent honors research specific to aspects of the plant and microbial biology major, followed by an oral presentation and a written report. Honors students must complete two semesters of research.
Honors Research - Plant and Microbial Biology: Read More [+]
Rules & Requirements
Prerequisites: Upper division standing and minimum GPA. See College of Natural Resources Honors website for current minimum GPA. http://nature.berkeley.edu/site/honors_program.php
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 1-4 hours of independent study per week
Summer: 8 weeks - 1.5-7.5 hours of independent study per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Honors Research - Plant and Microbial Biology: Read Less [-]

PLANTBI 198 Directed Group Studies in Plant Biology 1 - 3 Units
Terms offered: Fall 2023, Fall 2015, Fall 2014
Group studies of selected topics.
Directed Group Studies in Plant Biology: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 1-3 hours of directed group study per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Directed Group Studies in Plant Biology: Read Less [-]

PLANTBI 199 Supervised Independent Study and Research 1 - 4 Units
Terms offered: Spring 2023, Fall 2021, Fall 2020
Enrollment restrictions apply; see the Introduction to Courses and Curricula section of this catalog.
Supervised Independent Study and Research: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor; overall GPA of 3.0
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Summer:
6 weeks - 1-3 hours of independent study per week
8 weeks - 1-3 hours of independent study per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

Grading: Letter grade.
Instructor: Scheller
Plant Biochemistry: Read Less [-]
**PLANTBI 200F Plant-Environment Interactions 1.5 Unit**
Terms offered: Spring 2023, Spring 2022, Spring 2021
Students will be provided with both the historical framework and current topics in the molecular mechanisms underlying plant dynamic responses to external signals and stresses.

**Rules & Requirements**
**Prerequisites:** Consent of instructor

**Hours & Format**
Fall and/or spring: 5 weeks - 4 hours of lecture and 2 hours of discussion per week

**Additional Details**
**Subject/Course Level:** Plant and Microbial Biology/Graduate
**Grading:** Letter grade.
**Instructor:** Harmon

**PLANTBI 201 Faculty Research Review 2 Units**
Terms offered: Fall 2023, Fall 2022, Fall 2021
Presentation and discussion of faculty research in the areas of plant and microbial biology. Faculty speakers review recent advances in their area of expertise and present an outlook of current research activities in their laboratories. The format of the class is designed to stimulate a dialogue between instructor and students in the course of each presentation.

**Rules & Requirements**
**Prerequisites:** Consent of instructor

**Hours & Format**
Fall and/or spring: 15 weeks - 3 hours of lecture per week

**Additional Details**
**Subject/Course Level:** Plant and Microbial Biology/Graduate
**Grading:** Offered for satisfactory/unsatisfactory grade only.
**Instructor:** Harmon

**PLANTBI 202 Faculty Research Review 2 Units**
Terms offered: Fall 2023, Fall 2022, Fall 2021
Presentation and discussion of faculty research in the area of microbial biology. Faculty speakers review recent advances in their area of expertise and present an outlook of current research activities in their laboratories. The format of the class is designed to stimulate a dialogue between instructor and students in the course of each presentation.

**Rules & Requirements**
**Prerequisites:** Consent of instructor

**Hours & Format**
Fall and/or spring: 15 weeks - 3 hours of lecture per week

**Additional Details**
**Subject/Course Level:** Plant and Microbial Biology/Graduate
**Grading:** Offered for satisfactory/unsatisfactory grade only.
**Instructor:** Harmon

**PLANTBI 205A Introduction to Research 2 - 12 Units**
Terms offered: Fall 2023, Fall 2022, Fall 2020
Closely supervised experimental work under the direction of an individual faculty member; an introduction to experimental methods and research approaches in particular areas of plant and microbial biology.

**Rules & Requirements**
**Prerequisites:** Consent of instructor

**Hours & Format**
Fall and/or spring: 15 weeks - 2-12 hours of independent study per week

**Additional Details**
**Subject/Course Level:** Plant and Microbial Biology/Graduate
**Grading:** Letter grade. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.
**Instructor:** Harmon
PLANTBI 205B Introduction to Research 2 - 12 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
Closely supervised experimental work under the direction of an individual faculty member; an introduction to experimental methods and research approaches in particular areas of plant and microbial biology.
Introduction to Research: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 2-12 hours of independent study per week

Instructor: Taga
Microbial Genetics: Read Less [-]
PLANTBI 220B Genomics and Computational Biology 1.5 Unit
Terms offered: Fall 2023, Fall 2022, Spring 2022
Principles of computational and genomic biology. Covers evolutionary, algorithmic, and statistical foundations of sequence analysis, allowing students to understand concepts underlying modern computational methods. Practical applications will be pursued in student-coordinated sessions. Combined lecture with 200B.

PLANTBI 220C Microbial Diversity and Evolution 1.5 Unit
Terms offered: Fall 2023, Fall 2022, Fall 2021
The students will be provided with both the basic framework and current topics of microbial diversity and evolution.

PLANTBI 220D Cell Structure and Function 1.5 Unit
Terms offered: Spring 2023, Fall 2022, Fall 2021
The students will be provided with both the basic framework and current topics of cell structure and function.

PLANTBI 220E Microbial Physiology 1.5 Unit
Terms offered: Spring 2023, Spring 2022, Spring 2021
The students will be provided with both the basic framework and current topics of microbial physiology.
PLANTBI 220F Microbial Ecology 1.5 Unit
Terms offered: Spring 2023, Spring 2022, Spring 2021
The students will be provided with both the basic framework and current topics of microbial ecology.
Microbial Ecology: Read More [+]

Rules & Requirements

Instructor: Lindow

PLANTBI 222 Biochemistry of Biofuels: Concepts and Foundations 1 Unit
Terms offered: Spring 2015, Spring 2014, Spring 2013
This course offers a consideration of genes, enzymes, metabolic pathways and biochemical processes leading to the generation of hydrogen, bio-oils, ethanol, and other biofuels. Discussion of biochemistry is extended to cover product yields and techno-economic analyses of commercial viability of the various biofuel products. Lectures are based on historical and contemporary papers in plant and microbial biochemistry, integrating structure, function and evolution of the molecular, cellular, and organismal levels, and discussing how this knowledge can be applied in the generation of renewable biofuels.
Biochemistry of Biofuels: Concepts and Foundations: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate

Grading: Letter grade.

Instructors: Bell, Blanch, Clark, Smit, C. Somerville

Also listed as: BIO ENG C281/CHEM C238/CHM ENG C295A

The Berkeley Lectures on Energy: Energy from Biomass: Read Less [-]

PLANTBI C224 The Berkeley Lectures on Energy: Energy from Biomass 3 Units
Terms offered: Fall 2015, Fall 2014, Fall 2013
After an introduction to the different aspects of our global energy consumption, the course will focus on the role of biomass. The course will illustrate how the global scale of energy guides the biomass research. Emphasis will be places on the integration of the biological aspects (crop selection, harvesting, storage, and distribution, and chemical composition of biomass) with the chemical aspects to convert biomass to energy. The course aims to engage students in state-of-art research.
The Berkeley Lectures on Energy: Energy from Biomass: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A; Chemistry 1B or 4B, Mathematics 1B

Repeat rules: Course may be repeated for credit under special circumstances: Repeatable when topic changes with consent of instructor.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate

Grading: Letter grade.

Instructors: Bell, Blanch, Clark, Smit, C. Somerville

Also listed as: BIO ENG C281/CHEM C238/CHM ENG C295A

PLANTBI 238 Readings in Environmental Microbiology 1 Unit
Terms offered: Fall 2014, Spring 2014, Fall 2013
Special Topics and Advanced Seminars in Plant Pathology. Seminar/discussion by graduate students of current research in the field of plant pathogenic bacteria.
Readings in Environmental Microbiology: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of discussion per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Lindow

Formerly known as: Environmental Science, Policy, and Management 238A

Readings in Environmental Microbiology: Read Less [-]
PLANTBI C277 Communicating Quantitative Information 2 Units
Terms offered: Fall 2021, Spring 2020, Spring 2019
This course will cover several aspects of communicating quantitative information, with a primary focus on visualizations for publications, presentations, and posters. Other topics include sharing of data and analyses, such as new publication models and interactive notebooks, as well as lifecycle data management and publication. Primary discussion will be on conceptual issues, and students will be expected to use various systems and resources as self-directed homestudy.
Communicating Quantitative Information: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 1.5 hours of seminar and 1.5 hours of discussion per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Letter grade.
Instructor: Brenner
Also listed as: MCELLBI C277

Communicating Quantitative Information: Read Less [-]

PLANTBI 290 Seminar 1 - 2 Units
Terms offered: Fall 2023, Spring 2023, Fall 2022
Advanced study in various fields of plant biology and microbial biology. Topics will be announced in advance of each semester. Enrollment in more than one section permitted.
Seminar: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 8 weeks - 2-4 hours of seminar per week
15 weeks - 1-2 hours of seminar per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Letter grade.
Seminar: Read Less [-]

PLANTBI 292 Research Review in Plant and Microbial Biology 1 Unit
Terms offered: Fall 2023, Spring 2023, Fall 2022
Lectures, reports, and discussions on current research in plant and microbial biology. Sections are operated independently and directed toward different topics.
Research Review in Plant and Microbial Biology: Read More [+]

Rules & Requirements
Prerequisites: Open to properly qualified graduate students with consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Research Review in Plant and Microbial Biology: Read Less [-]

PLANTBI 296 Graduate Supervised Independent Study 1 - 12 Units
Terms offered: Fall 2023, Spring 2023, Fall 2022
Graduate student independent study under the supervision of a faculty member. Sections are operated independently and directed toward different topics.
Graduate Supervised Independent Study: Read More [+]

Rules & Requirements
Prerequisites: Graduate standing
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1-12 hours of independent study per week
Summer:
6 weeks - 2.5-30 hours of independent study per week
8 weeks - 1.5-22.5 hours of independent study per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Letter grade.
Graduate Supervised Independent Study: Read Less [-]
PLANTBI 297 Grant Writing and Research Presentations 2 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
Each student will write a grant proposal in three steps: a one page outline, a three-page pre-proposal, and a complete 10-page grant proposal. There will be feedback at each step in the process -- each participant will review the other grant proposals. Some of the scheduled classes will include discussion of the outlines and pre-proposals, and the last class will be organized as a grant panel, with students assigned as primary and secondary reviewers.

PLANTBI 298 Plant Biology Group Studies 1 - 6 Units
Terms offered: Fall 2023, Spring 2023, Fall 2022
Advanced study of research topics which will vary semester to semester. Enrollment in more than one section permitted.

PLANTBI 299 Graduate Research 1 - 12 Units
Terms offered: Fall 2023, Summer 2023 8 Week Session, Spring 2023
Graduate student research.

PLANTBI 375 Workshop on Teaching 2 Units
Terms offered: Fall 2020, Fall 2019, Fall 2018
Designed for all graduate students. This course has two goals: discussion of questions and problems relating to the GSI's teaching, and learning how to design and execute a whole course. Effective teaching methods will be introduced by experienced GSIs and faculty. Students will participate in reciprocal classroom visits, visitation and critique of faculty lectures, course design, lecture preparation, sample lecture presentation, and discussion of current literature on teaching.
PLANTBI 602 Individual Study for Graduate Students 1 - 2 Units
Terms offered: Fall 2023, Spring 2023, Fall 2022
Individual study in consultation with the major field advisor, intended to provide an opportunity for qualified students to prepare for examinations required of Ph.D. candidates
Individual Study for Graduate Students: Read More [+]

Rules & Requirements

Prerequisites: Graduate standing and instructor consent

Credit Restrictions: Course does not satisfy unit or residence requirements for doctoral degree.

Repeat rules: Course may be repeated for credit with instructor consent.

Hours & Format

Fall and/or spring: 15 weeks - 1-2 hours of independent study per week

Summer:
6 weeks - 1-2 hours of independent study per week
8 weeks - 1-2 hours of independent study per week

Additional Details

Subject/Course Level: Plant and Microbial Biology/Graduate examination preparation

Grading: Offered for satisfactory/unsatisfactory grade only.
