### Applied Mathematics

The Department of Mathematics offers both a PhD program in Mathematics and Applied Mathematics.

Students are admitted for specific degree programs: the PhD in Mathematics or PhD in Applied Mathematics. Requirements for the Mathematics and Applied Mathematics PhDs differ only in minor respects, and no distinction is made between the two in day-to-day matters. Graduate students typically take 5-6 years to complete the doctorate.

Continuing students wishing to transfer from one program to another should consult the graduate advisor in 910 Evans Hall. Transfers between the two PhD programs are fairly routine but must be done prior to taking the qualifying examination. It is a formal policy of the department that an applicant to the PhD program who has previous graduate work in mathematics must present very strong evidence of capability for mathematical research.

Students seeking to transfer to the department’s PhD programs from other campus programs, including the Group in Logic and the Methodology of Science, must formally apply and should consult the Vice Chair for Graduate Studies.

### Admission to the University

#### Applying for Graduate Admission

Thank you for considering UC Berkeley for graduate study! UC Berkeley offers more than 120 graduate programs representing the breadth and depth of interdisciplinary scholarship. A complete list of graduate academic departments, degrees offered, and application deadlines can be found on the Graduate Division website (http://grad.berkeley.edu/programs/list/).

Prospective students must submit an online application to be considered for admission, in addition to any supplemental materials specific to the program for which they are applying. The online application can be found on the Graduate Division website (http://grad.berkeley.edu/admissions/).

### Admission Requirements

The minimum graduate admission requirements are:

1. A bachelor’s degree or recognized equivalent from an accredited institution;
2. A satisfactory scholastic average, usually a minimum grade-point average (GPA) of 3.0 (B) on a 4.0 scale; and
3. Enough undergraduate training to do graduate work in your chosen field.

For a list of requirements to complete your graduate application, please see the Graduate Division’s Admissions Requirements page (https://grad.berkeley.edu/admissions/steps-to-apply/requirements/). It is also important to check with the program or department of interest, as they may have additional requirements specific to their program of study and degree. Department contact information can be found here (http://guide.berkeley.edu/graduate/degree-programs/).

### Where to apply?

Visit the Berkeley Graduate Division application page (http://grad.berkeley.edu/admissions/apply/).

### Admission to the Program

Undergraduate students also often take one or more of the following introductory mathematics graduate courses:

- **MATH 202A** Introduction to Topology and Analysis 4
- **MATH 202B** Introduction to Topology and Analysis 4
- **MATH 214** Differential Topology 4
- **MATH 225A** Metamathematics 4
- **MATH 225B** Metamathematics 4
- **MATH 228A** Numerical Solution of Differential Equations 4
- **MATH 228B** Numerical Solution of Differential Equations 4
- **MATH 250A** Groups, Rings, and Fields 4
- **MATH 250B** Commutative Algebra 4

The Math Department admits new graduate students to the fall semester only. The Graduate Division's Online Application will be available in early September at: http://grad.berkeley.edu/admissions/index.shtml (http://grad.berkeley.edu/admissions/index.shtml). Please read the information on Graduate Division requirements and information required to complete the application.

Copies of official or unofficial transcripts may be uploaded to your application. Please do not mail original transcripts for the review process.

We require three letters of recommendation, which should be submitted online. Please do not mail letters of recommendation for the review process.

For more information, please review the department’s graduate admissions webpage at: https://math.berkeley.edu/programs/graduate/admissions (https://math.berkeley.edu/programs/graduate/admissions/). We also recommend reviewing our admissions FAQs page at: https://math.berkeley.edu/programs/graduate/faqs (https://math.berkeley.edu/programs/graduate/faqs/).

### Curriculum

#### Prerequisites

The Department of Mathematics offers two PhD degrees, one in Mathematics and one in Applied Mathematics. Applicants for admission to either PhD program are expected to have preparation comparable to the undergraduate major at Berkeley in Mathematics or in Applied Mathematics. These majors consist of two full years of lower division work (covering calculus, linear algebra, differential equations, and multivariable calculus), followed by eight one-semester courses including real analysis, complex analysis, abstract algebra, and linear algebra. These eight courses may include some mathematically based courses in other departments, like physics, engineering, computer science, or economics.

Applicants for admission are considered by the department's Graduate Admissions and M.O.C. Committees. The number of students that can be admitted each year is determined by the Graduate Division and by departmental resources. In making admissions decisions, the committee conducts a comprehensive review of applicants considering broader community impacts, academic performance in mathematics courses,
level of mathematical preparation, letters of recommendation, and GRE scores.

**Degree Requirements**

In outline, to qualify for the PhD in either Mathematics or Applied Mathematics, the candidate must meet the following requirements.

1. During the first year in the PhD program:
   a. take at least four courses, two or more of which are graduate courses in mathematics;
   b. and pass the six-hour written preliminary examination covering primarily undergraduate material. (The exam is given just before the beginning of each semester, and the student must pass it within their first three semesters.)

2. Pass a three-hour, oral qualifying examination emphasizing, but not exclusively restricted to, the area of specialization. The qualifying examination must be attempted within two years of entering the program.

3. Complete a seminar offered by the Math department, giving a talk of at least one hour duration. Research presentations held at Mathematical Sciences Research Institute (MSRI), or Lawrence Berkeley National Lab (LBNL) are also acceptable. A Math Department faculty member must be present at the talk and sign the seminar form confirming.

4. Write a dissertation embodying the results of original research and acceptable to a properly constituted dissertation committee.

5. Meet the University residence requirement of two years or four semesters.

The detailed regulations of the PhD program are as follows:

**Course Requirements**

Students must take and pass at least four 4-unit courses during the first year of the Ph.D. program; at least two courses per semester. At minimum, two of these courses must be graduate courses (200-level) offered by the Department of Mathematics. Two upper division (100-level) undergraduate courses offered by the Department of Mathematics may also be used toward this requirement. Exceptions may also be considered and must be reviewed by the Head Graduate Advisor for approval.

**Preliminary Examination**

The preliminary examination consists of six hours of written work given over a two-day period. Most of the examination covers material, mainly in analysis and algebra, and helps to identify gaps in preparation. The preliminary examination is offered twice a year—during the week before classes start in both the fall and spring semesters. A student may repeat the examination twice. A student who does not pass the preliminary examination within 13 months of the date of entry into the PhD program. If a student does not pass on the first attempt, then, on the recommendation of the student's examining committee, and subject to the approval of the Graduate Division, the student may repeat the examination once. The examining committee must be the same, and the re-examination must be held within thirty months of the student's entrance into the PhD program.

For a student to pass the qualifying examination, at least one identified member of the subject area group must be willing to accept the candidate as a dissertation student, if asked. The student must obtain an official dissertation supervisor within one semester after passing the qualifying examination or leave the PhD program. For more detailed rules and advice concerning the qualifying examination, consult the graduate advisor in 910 Evans Hall.

**MATH 202A Introduction to Topology and Analysis 4 Units**

Terms offered: Fall 2023, Fall 2022, Fall 2021

**Rules & Requirements**

**Prerequisites:** 104

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture per week

**Additional Details**

**Subject/Course Level:** Mathematics/Graduate

**Grading:** Letter grade.

Introduction to Topology and Analysis: Read Less [-]
MATH 202B Introduction to Topology and Analysis 4 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022

Introduction to Topology and Analysis: Read More [+]

Rules & Requirements
Prerequisites: 202A and 110

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.

Introduction to Topology and Analysis: Read Less [-]

MATH 204 Ordinary Differential Equations 4 Units
Terms offered: Fall 2022, Fall 2016, Spring 2016

Ordinary Differential Equations: Read More [+]

Rules & Requirements
Prerequisites: 104

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.

Ordinary Differential Equations: Read Less [-]

MATH 205 Theory of Functions of a Complex Variable 4 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
Normal families. Riemann Mapping Theorem. Picard's theorem and related theorems. Multiple-valued analytic functions and Riemann surfaces. Further topics selected by the instructor may include: harmonic functions, elliptic and algebraic functions, boundary behavior of analytic functions and HP spaces, the Riemann zeta functions, prime number theorem.

Theory of Functions of a Complex Variable: Read More [+]

Rules & Requirements
Prerequisites: 185

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.

Theory of Functions of a Complex Variable: Read Less [-]

MATH 206 Functional Analysis 4 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021

Functional Analysis: Read More [+]

Rules & Requirements
Prerequisites: 202A-202B

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.

Functional Analysis: Read Less [-]
MATH 208 C*-algebras 4 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
Basic theory of C*-algebras. Positivity, spectrum, GNS construction.
Group C*-algebras and connection with group representations. Additional
topics, for example, C*-dynamical systems, K-theory.
C*-algebras: Read More [+]  
Rules & Requirements
Prerequisites: 206

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.
C*-algebras: Read Less [-]

MATH 209 Von Neumann Algebras 4 Units
Terms offered: Spring 2024, Spring 2017, Spring 2014
Basic theory of von Neumann algebras. Density theorems, topologies
and normal maps, traces, comparison of projections, type classification,
examples of factors. Additional topics, for example, Tomita Takasaki
theory, subfactors, group actions, and noncommutative probability.
Von Neumann Algebras: Read More [+]  
Rules & Requirements
Prerequisites: 206

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.
Von Neumann Algebras: Read Less [-]

MATH 212 Several Complex Variables 4 Units
Terms offered: Fall 2023, Fall 2021, Fall 2019
Power series developments, domains of holomorphy, Hartogs' phenomenon, pseudo convexity and plurisubharmonicity. The remainder
of the course may treat either sheaf cohomology and Stein manifolds, or
the theory of analytic subvarieties and spaces.
Several Complex Variables: Read More [+]  
Rules & Requirements
Prerequisites: 185 and 202A-202B or their equivalents

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.
Several Complex Variables: Read Less [-]

MATH 214 Differential Topology 4 Units
Terms offered: Spring 2024, Fall 2022, Spring 2022
This is an introduction to abstract differential topology based on rigorous
mathematical proofs. The topics include smooth manifolds and maps,
tangent and normal bundles. Sard's theorem and transversality, Whitney
embedding theorem. Differential forms, Stokes' theorem, Frobenius
theorem. Basic degree theory. Flows, Lie derivative, Lie groups and
algebras. Additional topics selected by instructor.
Differential Topology: Read More [+]  
Rules & Requirements
Prerequisites: 202A

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.
Differential Topology: Read Less [-]
MATH 215A Algebraic Topology 4 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
Fundamental group and covering spaces, simplicial and singular
homology theory with applications, cohomology theory, duality theorem.
Homotopy theory, fibrations, relations between homotopy and homology,
obstruction theory, and topics from spectral sequences, cohomology
operations, and characteristic classes. Sequence begins fall.
Algebraic Topology: Read More [+]

Rules & Requirements

Prerequisites: 113 and point-set topology (e.g. 202A)

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Mathematics/Graduate

Grading: Letter grade.

Instructors: 113C, 202A, and 214

Algebraic Topology: Read Less [-]

MATH 215B Algebraic Topology 4 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
Fundamental group and covering spaces, simplicial and singular
homology theory with applications, cohomology theory, duality theorem.
Homotopy theory, fibrations, relations between homotopy and homology,
obstruction theory, and topics from spectral sequences, cohomology
operations, and characteristic classes. Sequence begins fall.
Algebraic Topology: Read More [+]

Rules & Requirements

Prerequisites: 215A, 214 recommended (can be taken concurrently)

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Mathematics/Graduate

Grading: Letter grade.

Instructors: 113C, 202A, and 214

Algebraic Topology: Read Less [-]

MATH C218A Probability Theory 4 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021, Fall 2019
The course is designed as a sequence with Statistics C205B/
Mathematics C218B with the following combined syllabus. Measure
theory concepts needed for probability. Expection, distributions. Laws
of large numbers and central limit theorems for independent random
variables. Characteristic function methods. Conditional expectations,
martingales and martingale convergence theorems. Markov chains.
Stationary processes. Brownian motion.
Probability Theory: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Probability Theory: Read Less [-]
MATH 219 Dynamical Systems 4 Units
Terms offered: Fall 2023, Spring 2022, Spring 2021
Diffeomorphisms and flows on manifolds. Ergodic theory. Stable
manifolds, generic properties, structural stability. Additional topics
selected by the instructor.
Dynamical Systems: Read More [+]
Rules & Requirements
Prerequisites: 214

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.

MATH 221 Advanced Matrix Computations 4 Units
Terms offered: Fall 2023, Spring 2022, Fall 2020
Direct solution of linear systems, including large sparse systems: error
bounds, iteration methods, least square approximation, eigenvalues
and eigenvectors of matrices, nonlinear equations, and minimization of
functions.
Advanced Matrix Computations: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Summer: 8 weeks - 6 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.

MATH 222A Partial Differential Equations 4 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
The theory of boundary value and initial value problems for partial
differential equations, with emphasis on nonlinear equations. Laplace's
equation, heat equation, wave equation, nonlinear first-order equations,
conservation laws, Hamilton-Jacobi equations, Fourier transform,
Sobolev spaces.
Partial Differential Equations: Read More [+]
Rules & Requirements
Prerequisites: 105 or 202A

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.

Introduction to Probabilistic Methods in Mathematics and the Sciences 4 Units
Terms offered: Spring 2012, Spring 2011, Spring 2010
Brownian motion, Langevin and Fokker-Planck equations, path integrals
and Feynman diagrams, time series, an introduction to statistical
mechanics, Monte Carlo methods, selected applications.
Introduction to Probabilistic Methods in Mathematics and the Sciences: Read More [+]
Rules & Requirements
Prerequisites: Some familiarity with differential equations and their
applications

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.

Introduction to Probabilistic Methods in Mathematics and the Sciences: Read Less [-]

MATH 220 Introduction to Probabilistic Methods in Mathematics and the Sciences 4 Units
Terms offered: Spring 2012, Spring 2011, Spring 2010
Brownian motion, Langevin and Fokker-Planck equations, path integrals
and Feynman diagrams, time series, an introduction to statistical
mechanics, Monte Carlo methods, selected applications.
Introduction to Probabilistic Methods in Mathematics and the Sciences: Read More [+]
Rules & Requirements
Prerequisites: Some familiarity with differential equations and their

Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.
Symplectic Geometry: Read Less [-]

MATH C243 Seq: Methods and Applications 3 Units
Terms offered: Spring 2015, Spring 2014
A graduate seminar class in which a group of students will closely examine recent computational methods in high-throughput sequencing followed by directly examining interesting biological applications thereof.
Seq: Methods and Applications: Read More [+]
Rules & Requirements
Prerequisites: Graduate standing in Math, MCB, and Computational Biology; or consent of the instructor
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.
Instructor: Pachter
Also listed as: MCELLBI C243
Seq: Methods and Applications: Read Less [-]

MATH 245A General Theory of Algebraic Structures 4 Units
Terms offered: Fall 2017, Fall 2015, Spring 2014
Structures defined by operations and/or relations, and their homomorphisms. Classes of structures determined by identities. Constructions such as free objects, objects presented by generators and relations, ultraproducts, direct limits. Applications of general results to groups, rings, lattices, etc. Course may emphasize study of congruence- and subalgebra-lattices, or category-theory and adjoint functors, or other aspects.
General Theory of Algebraic Structures: Read More [+]
Rules & Requirements
Prerequisites: Math 113
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.
General Theory of Algebraic Structures: Read Less [-]
MATH 249 Algebraic Combinatorics 4 Units
Terms offered: Spring 2024, Spring 2023, Spring 2021
(I) Enumeration, generating functions and exponential structures, (II) Posets and lattices, (III) Geometric combinatorics, (IV) Symmetric functions, Young tableaux, and connections with representation theory. Further study of applications of the core material and/or additional topics, chosen by instructor.

Prerequisites: 250A or consent of instructor

Rules & Requirements

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Mathematics/Graduate

Grading: Letter grade.

MATH 250B Commutative Algebra 4 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
Development of the main tools of commutative and homological algebra applicable to algebraic geometry, number theory and combinatorics.

Prerequisites: 250A

Rules & Requirements

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Mathematics/Graduate

Grading: Letter grade.

MATH 250A Groups, Rings, and Fields 4 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021

Prerequisites: 114 or consent of instructor

Rules & Requirements

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Mathematics/Graduate

Grading: Letter grade.

MATH 251 Ring Theory 4 Units
Terms offered: Fall 2021, Fall 2016, Spring 2013
Topics such as: Noetherian rings, rings with descending chain condition, theory of the radical, homological methods.

Prerequisites: 250A

Rules & Requirements

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Mathematics/Graduate

Grading: Letter grade.

MATH 252 Representation Theory 4 Units
Terms offered: Fall 2021, Fall 2020, Fall 2015
Structure of finite dimensional algebras, applications to representations of finite groups, the classical linear groups.

Prerequisites: 250A

Rules & Requirements

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Mathematics/Graduate

Grading: Letter grade.
MATH 253 Homological Algebra 4 Units
Terms offered: Spring 2023, Fall 2016, Fall 2014
Modules over a ring, homomorphisms and tensor products of modules, functors and derived functors, homological dimension of rings and modules.
Homological Algebra: Read More [+]

Rules & Requirements
Prerequisites: 250A

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.

MATH 254A Number Theory 4 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
Valuations, units, and ideals in number fields, ramification theory, quadratic and cyclotomic fields, topics from class field theory, zeta-functions and L-series, distribution of primes, modular forms, quadratic forms, diophantine equations, P-adic analysis, and transcendental numbers. Sequence begins fall.
Number Theory: Read More [+]

Rules & Requirements
Prerequisites: 250A for 254A; 254A for 254B
Repeat rules: Course may be repeated for credit with instructor consent.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.
Instructor: 250A.

MATH 255 Algebraic Curves 4 Units
Terms offered: Fall 2022, Spring 2019, Fall 2014
Elliptic curves. Algebraic curves, Riemann surfaces, and function fields. Singularities. Riemann-Roch theorem, Hurwitz's theorem, projective embeddings and the canonical curve. Zeta functions of curves over finite fields. Additional topics such as Jacobians or the Riemann hypothesis.
Algebraic Curves: Read More [+]

Rules & Requirements
Prerequisites: 250A-250B or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.
Instructor: 250A.
MATH 256A Algebraic Geometry 4 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
Algebraic Geometry: Read More [+]

Rules & Requirements
Prerequisites: 250A-250B for 256A; 256A for 256B

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.
Instructor: 250A.
Algebraic Geometry: Read Less [-]

MATH 256B Algebraic Geometry 4 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
Algebraic Geometry: Read More [+]

Rules & Requirements
Prerequisites: 256A

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.
Instructor: 250A.
Algebraic Geometry: Read Less [-]

MATH 257 Group Theory 4 Units
Terms offered: Spring 2021, Spring 2018, Spring 2014
Topics such as: generators and relations, infinite discrete groups, groups of Lie type, permutation groups, character theory, solvable groups, simple groups, transfer and cohomological methods.
Group Theory: Read More [+]

Rules & Requirements
Prerequisites: 250A

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.
Group Theory: Read Less [-]

MATH 258 Harmonic Analysis 4 Units
Terms offered: Fall 2023, Fall 2021, Fall 2020
Basic properties of Fourier series, convergence and summability, conjugate functions, Hardy spaces, boundary behavior of analytic and harmonic functions. Additional topics at the discretion of the instructor.
Harmonic Analysis: Read More [+]

Rules & Requirements
Prerequisites: 206 or a basic knowledge of real, complex, and linear analysis

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.
Harmonic Analysis: Read Less [-]
MATH 261A Lie Groups 4 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
Lie groups and Lie algebras, fundamental theorems of Lie, general
structure theory; compact, nilpotent, solvable, semi-simple Lie groups;
classification theory and representation theory of semi-simple Lie
algebras and Lie groups, further topics such as symmetric spaces, Lie
transformation groups, etc., if time permits. In view of its simplicity and its
wide range of applications, it is preferable to cover compact Lie groups
and their representations in 261A. Sequence begins Fall.
Lie Groups: Read More [+]
Rules & Requirements
Prerequisites: 214

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.
Instructor: 214.

Lie Groups: Read Less [-]

MATH 261B Lie Groups 4 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
Lie groups and Lie algebras, fundamental theorems of Lie, general
structure theory; compact, nilpotent, solvable, semi-simple Lie groups;
classification theory and representation theory of semi-simple Lie
algebras and Lie groups, further topics such as symmetric spaces, Lie
transformation groups, etc., if time permits. In view of its simplicity and its
wide range of applications, it is preferable to cover compact Lie groups
and their representations in 261A. Sequence begins Fall.
Lie Groups: Read More [+]
Rules & Requirements
Prerequisites: 214

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.
Instructor: 214.

Lie Groups: Read Less [-]

MATH 270 Advanced Topics Course in
Mathematics 2 Units
Terms offered: Fall 2023, Spring 2023, Spring 2022
This course will give introductions to research-related topics in
mathematics. The topics will vary from semester to semester.
Advanced Topics Course in Mathematics: Read More [+]
Rules & Requirements
Repeat rules: Course may be repeated for credit when topic changes.

Hours & Format
Fall and/or spring: 15 weeks - 1.5 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Advanced Topics Course in Mathematics: Read Less [-]

MATH 272 Interdisciplinary Topics in
Mathematics 1 - 4 Units
Terms offered: Fall 2023, Spring 2019
Advanced topics chosen by the instructor. The content of this course
changes, as in the case of seminars.
Interdisciplinary Topics in Mathematics: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3-3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.
Interdisciplinary Topics in Mathematics: Read Less [-]
MATH 273 Topics in Numerical Analysis 4 Units
Terms offered: Spring 2022, Spring 2016, Spring 2014
Advanced topics chosen by the instructor. The content of this course changes, as in the case of seminars.
Topics in Numerical Analysis: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.

Topics in Numerical Analysis: Read Less [-]

MATH 274 Topics in Algebra 4 Units
Terms offered: Fall 2023, Spring 2023, Fall 2022
Advanced topics chosen by the instructor. The content of this course changes, as in the case of seminars.
Topics in Algebra: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.

Topics in Algebra: Read Less [-]

MATH 275 Topics in Applied Mathematics 4 Units
Terms offered: Spring 2024, Spring 2023, Fall 2021
Advanced topics chosen by the instructor. The content of this course changes, as in the case of seminars.
Topics in Applied Mathematics: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.

Topics in Applied Mathematics: Read Less [-]

MATH 276 Topics in Topology 4 Units
Terms offered: Spring 2021, Fall 2017, Spring 2016
Advanced topics chosen by the instructor. The content of this course changes, as in the case of seminars.
Topics in Topology: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.

Topics in Topology: Read Less [-]
MATH 277 Topics in Differential Geometry 4 Units
Terms offered: Spring 2023, Fall 2022, Fall 2021
Advanced topics chosen by the instructor. The content of this course changes, as in the case of seminars.
Topics in Differential Geometry: Read More [+]

Rules & Requirements

Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.
Topics in Differential Geometry: Read Less [-]

MATH 278 Topics in Analysis 4 Units
Terms offered: Spring 2024, Fall 2021, Spring 2021
Advanced topics chosen by the instructor. The content of this course changes, as in the case of seminars.
Topics in Analysis: Read More [+]

Rules & Requirements

Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.
Topics in Analysis: Read Less [-]

MATH 279 Topics in Partial Differential Equations 4 Units
Terms offered: Fall 2023, Spring 2023, Fall 2022
Advanced topics chosen by the instructor. The content of this course changes, as in the case of seminars.
Topics in Partial Differential Equations: Read More [+]

Rules & Requirements

Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.
Topics in Partial Differential Equations: Read Less [-]

MATH 290 Seminars 1 - 6 Units
Terms offered: Spring 2017, Spring 2015, Fall 2014
Topics in foundations of mathematics, theory of numbers, numerical calculations, analysis, geometry, topology, algebra, and their applications, by means of lectures and informal conferences; work based largely on original memoirs.
Seminars: Read More [+]

Rules & Requirements

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of seminar per week

Additional Details

Subject/Course Level: Mathematics/Graduate
Grading: Letter grade.
Seminars: Read Less [-]
MATH 295 Individual Research 1 - 12 Units
Terms offered: Summer 2016 10 Week Session, Spring 2016, Fall 2015
Intended for candidates for the Ph.D. degree.
Individual Research: Read More [+]
Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 1-12 hours of independent study per week
Summer:
3 weeks - 5 hours of independent study per week
6 weeks - 2.5-30 hours of independent study per week
8 weeks - 1.5-60 hours of independent study per week
Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: The grading option will be decided by the instructor when the class is offered.
Individual Research: Read Less [-]

MATH N295 Individual Research 0.5 - 5 Units
Terms offered: Summer 2022 8 Week Session, Summer 2021 8 Week Session, Summer 2006 10 Week Session
Intended for candidates for the Ph.D. degree.
Individual Research: Read More [+]
Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Summer:
8 weeks - 1-5 hours of independent study per week
Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: The grading option will be decided by the instructor when the class is offered.
Individual Research: Read Less [-]

MATH N297 General Academic Internship 0.5 Units
Terms offered: Prior to 2007
This is an independent study course designed to provide structure for graduate students engaging in summer internship opportunities. Requires a paper exploring how the theoretical constructs learned in academic courses were applied during the internship.
General Academic Internship: Read More [+]
Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Summer:
8 weeks - 2.5 hours of independent study per week
Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
General Academic Internship: Read Less [-]

MATH 299 Reading Course for Graduate Students 1 - 6 Units
Terms offered: Fall 2018, Fall 2017, Fall 2016
Investigation of special problems under the direction of members of the department.
Reading Course for Graduate Students: Read More [+]
Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Summer:
6 weeks - 1-5 hours of independent study per week
8 weeks - 1-4 hours of independent study per week
Additional Details
Subject/Course Level: Mathematics/Graduate
Grading: The grading option will be decided by the instructor when the class is offered.
Reading Course for Graduate Students: Read Less [-]
MATH 301 Undergraduate Mathematics Instruction 1 - 2 Units
Terms offered: Fall 2018, Spring 2018, Fall 2017
May be taken for one unit by special permission of instructor. Tutoring at the Student Learning Center or for the Professional Development Program.
Undergraduate Mathematics Instruction: Read More [+]
Rules & Requirements
Prerequisites: Permission of SLC instructor, as well as sophomore standing and at least a B average in two semesters of calculus. Apply at Student Learning Center
Repeat rules: Course may be repeated for credit up to a total of 4 units.
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar and 4 hours of tutorial per week
Additional Details
Subject/Course Level: Mathematics/Professional course for teachers or prospective teachers
Grading: Offered for pass/not pass grade only.
Undergraduate Mathematics Instruction: Read Less [-]

MATH 302 Teaching Workshop 1 Unit
Terms offered: Summer 2002 10 Week Session, Summer 2001 10 Week Session
Mandatory for all graduate student instructors teaching summer course for the first time in the Department. The course consists of practice teaching, alternatives to standard classroom methods, guided group and self-analysis, classroom visitations by senior faculty member.
Teaching Workshop: Read More [+]
Hours & Format
Summer: 8 weeks - 1 hour of lecture per week
Additional Details
Subject/Course Level: Mathematics/Professional course for teachers or prospective teachers
Grading: Offered for satisfactory/unsatisfactory grade only.
Teaching Workshop: Read Less [-]

MATH 303 Professional Preparation: Supervised Teaching of Mathematics 2 - 4 Units
Terms offered: Spring 2017, Spring 2016, Fall 2015
Meeting with supervising faculty and with discussion sections. Experience in teaching under the supervision of Mathematics faculty.
Professional Preparation: Supervised Teaching of Mathematics: Read More [+]
Rules & Requirements
Prerequisites: 300, graduate standing and appointment as a Graduate Student Instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2-4 hours of independent study per week
Additional Details
Subject/Course Level: Mathematics/Professional course for teachers or prospective teachers
Grading: Offered for satisfactory/unsatisfactory grade only.
Professional Preparation: Supervised Teaching of Mathematics: Read Less [-]

MATH 600 Individual Study for Master's Students 1 - 6 Units
Terms offered: Summer 2006 10 Week Session, Fall 2005, Spring 2005
Individual study for the comprehensive or language requirements in consultation with the field adviser.
Individual Study for Master's Students: Read More [+]
Rules & Requirements
Prerequisites: For candidates for master's degree
Credit Restrictions: Course does not satisfy unit or residence requirements for master's degree.
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 1-6 hours of independent study per week
Summer: 8 weeks - 1.5-10 hours of independent study per week
Additional Details
Subject/Course Level: Mathematics/Graduate examination preparation
Grading: Offered for satisfactory/unsatisfactory grade only.
Individual Study for Master's Students: Read Less [-]
MATH 602 Individual Study for Doctoral Students 1 - 8 Units

Terms offered: Fall 2019, Fall 2018, Fall 2016

Individual study in consultation with the major field adviser intended to provide an opportunity for qualified students to prepare themselves for the various examinations required for candidates for the Ph.D. Course does not satisfy unit or residence requirements for doctoral degree.

Individual Study for Doctoral Students: Read More [+]

Rules & Requirements

Prerequisites: For qualified graduate students

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 1-8 hours of independent study per week

Additional Details

Subject/Course Level: Mathematics/Graduate examination preparation

Grading: Offered for satisfactory/unsatisfactory grade only.

Individual Study for Doctoral Students: Read Less [-]
