Demography

The Department of Demography offers an interdisciplinary training program leading to the MA and PhD in Demography. Demography is the systematic study of human populations, a topic central to many pressing policy issues such as the economic development of Third World countries; population aging; the environment; health and mortality; family and household change; immigration; and ethnicity. Demography also has strong intellectual and institutional ties to other fields such as sociology, economics, social history, anthropology, biology, public health, and statistics. The program at UC Berkeley is one of the few in the United States granting graduate degrees in demography, rather than offering demography only as a field of specialization within some other department. This training strategy permits greater concentration and depth in demography, as well as program flexibility and breadth in related subjects. The program stresses both quantitative aspects of demography and demography in the context of social science theory.

The master’s degree in demography is designed both as a final degree for those who wish to pursue a professional career at that level of training and as a second degree for students earning a doctorate in demography or a related discipline. The basic coursework for the master’s program is required for the doctoral degree as well.

Admission to the University

Applying for Graduate Admission

Thank you for considering UC Berkeley for graduate study! UC Berkeley offers more than 120 graduate programs representing the breadth and depth of interdisciplinary scholarship. A complete list of graduate academic departments, degrees offered, and application deadlines can be found on the Graduate Division website (http://grad.berkeley.edu/programs/list/).

Prospective students must submit an online application to be considered for admission, in addition to any supplemental materials specific to the program for which they are applying. The online application can be found on the Graduate Division website (http://grad.berkeley.edu/admissions/).

Admission Requirements

The minimum graduate admission requirements are:

1. A bachelor’s degree or recognized equivalent from an accredited institution;
2. A satisfactory scholastic average, usually a minimum grade-point average (GPA) of 3.0 (B) on a 4.0 scale; and
3. Enough undergraduate training to do graduate work in your chosen field.

For a list of requirements to complete your graduate application, please see the Graduate Division’s Admissions Requirements page (https://grad.berkeley.edu/admissions/steps-to-apply/requirements/). It is also important to check with the program or department of interest, as they may have additional requirements specific to their program of study and degree. Department contact information can be found here (http://guide.berkeley.edu/graduate/degree-programs/).

Where to apply?

Visit the Berkeley Graduate Division application page (http://grad.berkeley.edu/admissions/apply/).

Admission to the Program

The Department of Demography requires all applicants to take the general portion of the Graduate Record Examination. Applicants may apply for the Master’s in Demography, PhD in Demography or the PhD in Sociology and Demography.

Graduate Record Examinations (GRE): is required for our Ph.D program. GRE scores are only valid for 5 years. There are no minimum required scores.

Normative Time Requirements

Normative Time to Advancement

Normative time to advancement to doctoral candidacy for the Demography PhD is six semesters from the time the student entered the program.

Demography students are to complete all required coursework for the Demography master’s degree, whether or not they choose to earn the MA degree. Required courses (i.e., 110, C126 or 200, C175, 210) must be taken on a letter-grade basis. Demography courses 110, 210 and C175 must be passed at a B or above. At the end of the first year, all students must pass a comprehensive final examination on demographic methods and substance. MA candidates receive their degree upon successful completion of this examination and all necessary coursework. PhD students advance to the second and third years of study, which consists of additional course work, writing a dissertation prospectus, taking required CITI training courses and passing the oral qualifying exam.

Normative Time in Candidacy

Normative time in doctoral candidacy for the Demography PhD degree is four semesters.

Total Normative Time

Total normative time is ten semesters.

Electives (graduate-level courses selected from any subject, with advisor approval) | 7 |
Coursework and Preliminary Examination

During the first year of study students in all demography and sociology degree programs complete the required coursework (24 units) and then take the preliminary examination at the end of the spring semester.

Additional Course Work

Those working for a doctoral degree are expected to complete coursework in a different but related subject (e.g., sociology [http://sociology.berkeley.edu/], economics [http://emlab.berkeley.edu/econ/], anthropology [http://anthropology.berkeley.edu/], statistics [http://statistics.berkeley.edu/], public policy [http://gspp.berkeley.edu/], public health [http://sph.berkeley.edu/], biostatistics [http://www.stat.berkeley.edu/biostat/], regional planning [http://dcrp.ced.berkeley.edu/], geography [http://geography.berkeley.edu/]). This additional coursework must be completed before the dissertation stage. Each student will consult with the advisor to create a second-year coursework plan that best compliments their academic goals, research and interests and will be determined on an individual basis. PhD students may choose to pursue an ancillary MA degree during this time. Students apply to the ancillary degree department directly.

Dissertation Prospectus

The dissertation prospectus is developed in the context of a research seminar, Demography 296. Doctoral students are expected to enroll in 296 every semester until the prospectus is complete, which should occur within three years after matriculation.

Oral Qualifying Examination

The oral qualifying examination for admission to doctoral candidacy should be taken during the second or third year (depending on the time needed for the completion of the student's ancillary master's program).

CITI Human Subjects Training.

Students are required to take CITI Human Subjects training as specified by the Office for the Protection of Human Subjects before advancing to doctoral candidacy. For more information please see the OPHS website (http://cphs.berkeley.edu/)

Time in Candidacy

Dissertation

Upon successful completion of the foreign language requirement, the oral qualifying exam, and the prospectus, students enter into the final phase of the program, doctoral candidacy. During this period, students are expected to take another research seminar, DEMOG 296, every semester until the completion of the dissertation. The department does not require a formal defense of the completed dissertation.

Required Professional Development

The department does not formally require professional development but all students are encouraged to attend the weekly Demography Brown Bag Presentation Series. Students are also encouraged to attend and present papers at the annual Population Association of America meeting or other demographic conferences.

Unit Requirements

Plan II requires at least 24 semester units of upper division and graduate courses, followed by a comprehensive examination. At least 12 units must in the 200 series demography courses. Courses in the 300 series do not count in the unit requirements. A maximum of 6 units of 298/299 course work can be used toward the degree. The same course work cannot be used toward two different master’s degrees unless it is part of an approved concurrent master’s program. Two-thirds of all course work (not only those courses required for the master’s program) must be letter-graded and only courses graded C- or better, or Satisfactory may be counted towards degree requirements. Demography courses 110, 210 and C175 must be passed at a B or above.

Advancement to Candidacy

Students making adequate progress in the MA coursework are advanced to MA candidacy during the second semester.

Preliminary/Comprehensive Exam

Students take a comprehensive exam at the end of the second semester. No master’s thesis is required.

Demography

Expand all course descriptions [+ ]Collapse all course descriptions [- ]
DEMOG 5 Fundamentals of Population Science 3 Units
Terms offered: Summer 2019 Second 6 Week Session, Summer 2018 Second 6 Week Session, Fall 2011
This course provides an accessible introduction to the social science of demography. The course is organized around cases in which population issues raise policy or ethical dilemmas (example: China's one child policy). Through these cases, students will learn how demographers use models and data to acquire knowledge about population. Throughout the course, students will also learn to read, interpret, evaluate, and produce tabular and graphical representations of population data.

Fundamentals of Population Science: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 3-3 hours of lecture and 0-1 hours of discussion per week
Summer:
6 weeks - 7.5-7.5 hours of lecture and 0-2.5 hours of discussion per week
8 weeks - 6-6 hours of lecture and 0-2 hours of discussion per week
10 weeks - 4.5-4.5 hours of lecture and 0-1.5 hours of discussion per week

Additional Details

Subject/Course Level: Demography/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Johnson-Hanks

DEMOG 88 Immigration: What do the data tell us? 2 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
This course will cover the small but important part of the rich history of human migration that deals with the population of the United States--focusing on the 20th and 21st Centuries. We will use the tools of DS8 to answer specific questions that relate to the themes of this course:
(1) Why do people migrate?
(2) Is immigration good or bad for receiving (and sending) countries?
(3) How do immigrants adapt and how do societies change in response?
In addition to scientific questions, this course will also address the demographic and political history of immigration in the US -- an understanding of which is crucial for understanding both the broad contours of US history and the particular situation in which we find ourselves today.

Immigration: What do the data tell us?: Read More [+]

Objectives & Outcomes

Student Learning Outcomes: This course will enhance the experience of DS8 by challenging students to use the tools of DS8 to address current questions with real data. By accessing and using much larger and messier datasets than are used in the main course, students will gain technical skills as well as confidence in their ability to use data to answer questions.

Rules & Requirements

Prerequisites: Prerequisites and Restrictions (if any): Corequisite or Prerequisite: Foundations of Data Science (COMPSCI C8 / INFO C8 / STAT C8). This course is a Data Science connector course and is meant to be taken concurrent with or after COMPSCI C8/ INFO C8 / STAT C8. Students may take more than one Data Science connector course if they wish, concurrent with or after having taken the C8 course

Hours & Format

Fall and/or spring: 15 weeks - 1-2 hours of lecture, 0-1 hours of discussion, and 0-1 hours of laboratory per week

Additional Details

Subject/Course Level: Demography/Undergraduate
Grading/Final exam status: Letter grade. Alternate method of final assessment during regularly scheduled final exam group (e.g., presentation, final project, etc.).
Instructor: Carl Mason

DEMOG 130 Demography of Deaths, Diseases, and Disasters 4 Units
Terms offered: Prior to 2007
Fundamentals of demographic analysis of health and mortality with a special focus on global public health challenges including those induced by climate change. Class will focus on essential concepts from demography and public health, global and historical shifts in mortality and morbidity patterns, and the determinants of health and mortality over the life course, including environmental determinants. Students’ will develop their own research project related to health and mortality using real-world demographic data. Students will learn to interpret, construct, and calculate common demographic and public health indicators, and will develop a basic toolkit for analyzing health and mortality data.

DEMOG 145AC The American Immigrant Experience 4 Units
Terms offered: Spring 2015, Spring 2014, Spring 2013
The history of the United States is the history of migration. The course covers the evolution of the American population from about 20,000 BC with the goal of understanding the interdependent roles of history and demography. As an American cultures class, special attention is given to the experiences of 18th- and 19th-century African and European immigrants and 20th- and 21st-century Asian and Latin American immigrants. Two substantial laboratory assignments; facility with a spreadsheet program is assumed.

DEMOG 161 Population Apocalypse in Film and Science 3 Units
Terms offered: Fall 2015, Spring 2015
Despite our astonishing demographic success as a species, humans are haunted by the idea of apocalyptic demise. This course explores scientific and cultural narratives of population catastrophe particularly as presented in film. Noah’s flood; nuclear annihilation; overpopulation; and climate change all raise the question: Does human nature carry within it the seeds of our inevitable destruction? In this course, we will grapple with both the science and the art in which this question is embedded.

DEMOG 180 Social Networks 4 Units
Terms offered: Fall 2023, Summer 2023 Second 6 Week Session, Fall 2022

The science of social networks focuses on measuring, modeling, and understanding the different ways that people are connected to one another. We will use a broad toolkit of theories and methods drawn from the social, natural, and mathematical sciences to learn what a social network is, to understand how to work with social network data, and to illustrate some of the ways that social networks can be useful in theory and in practice. We will see that network ideas are powerful enough to be used everywhere from UNAIDS, where network models help epidemiologists prevent the spread of HIV, to Silicon Valley, where data scientists use network ideas to build products that enable people all across the globe to connect with one another.

Rules & Requirements
Prerequisites: Suggested: Introduction to Statistics (Computer Science/Information/Statistics C8 or "Data 8"), Pre-calculus (Mathematics 32), Python, or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3-3 hours of lecture and 0-1 hours of discussion per week
Summer:
6 weeks - 7.5-7.5 hours of lecture and 0-2.5 hours of discussion per week
8 weeks - 6-6 hours of lecture and 0-2 hours of discussion per week
10 weeks - 4.5-4.5 hours of lecture and 0-1.5 hours of discussion per week

**DEMOG 215 Current Research Topics in Demography 2 Units**

Terms offered: Fall 2010, Spring 2009, Spring 2008

The goals of this course are 1) to familiarize graduate students with active research projects in Demography and 2) to improve skills in R and Stata. Topics covered include demographic micro-simulation with SOCSIM, the Human Mortality Database, stochastic simulation/forecasting, GIS for Demographers, and mortality forecasting. Two-thirds of class time will be spent in the computer laboratory. Students will present results.

DEMOG C280 Social Networks 4 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
This course provides a broad introduction to the empirical and theoretical study of social networks. We will cover classic and contemporary studies, beginning with fundamental definitions and models, and then moving through a range of topics, including models of network formation and structure (homophily, foci, communities); dynamic processes on networks (contagion, influence, and disease models); collaborative networks; personal networks; online networks; and network sampling and data collection. The course material is intended to be of interest to students from a wide range of disciplinary backgrounds, including demography, sociology, statistics, computer science, and related fields.
Social Networks: Read More [+]
