Integrative Biology

Biological phenomena occur at various levels of structural organization, ranging from molecules to organisms, and from populations to the global ecosystem. Integrative Biology takes a whole-organism approach, extending from the genome and proteome through organismal traits (phenotypes), to communities and ecosystems. Through the coordinated study of multiple levels of biological organization over a broad range of spatial and temporal scales, Integrative Biology offers a unique approach to understanding fundamental questions concerning the evolution and maintenance of biological diversity, including organismal form and function, and ecological and ecosystem processes. This multidimensional approach underpins our graduate program, where students combine observational, experimental, and comparative approaches with the development of theory; and apply concepts and techniques from the biological sciences and other disciplines.

Integrative Biology admits students to the PhD program only.

The Department of Integrative Biology at Berkeley explores life at all levels and our scientific community pursues research across three main areas:

• Tree of Life: Biodiversity and Global Change
• The Tangled Bank: Species Interactions & Biological Communities
• Human Connections: Origins, Health and Quality of Life

View a video that highlights the strengths in our department (https://youtu.be/peOUVPo4C6w/).

DIRECT ADMIT PROGRAM
IB is a direct admit program. There are no lab rotations, and students admitted into the program enter directly into a particular IB faculty member’s lab. Students interested in applying to the IB graduate program are strongly advised to contact potential faculty mentors (https://ib.berkeley.edu/people/faculty/) before applying since not all faculty members will recruit students each year.

Admission to the University
Applying for Graduate Admission
Thank you for considering UC Berkeley for graduate study! UC Berkeley offers more than 120 graduate programs representing the breadth and depth of interdisciplinary scholarship. A complete list of graduate academic departments, degrees offered, and application deadlines can be found on the Graduate Division website (http://grad.berkeley.edu/programs/list/).

Prospective students must submit an online application to be considered for admission, in addition to any supplemental materials specific to the program for which they are applying. The online application can be found on the Graduate Division website (http://grad.berkeley.edu/admissions/).

Admission Requirements
The minimum graduate admission requirements are:

1. A bachelor’s degree or recognized equivalent from an accredited institution;

2. A satisfactory scholastic average, usually a minimum grade-point average (GPA) of 3.0 (B) on a 4.0 scale; and

3. Enough undergraduate training to do graduate work in your chosen field.

For a list of requirements to complete your graduate application, please see the Graduate Division’s Admissions Requirements page (https://grad.berkeley.edu/admissions/steps-to-apply/requirements/). It is also important to check with the program or department of interest, as they may have additional requirements specific to their program of study and degree. Department contact information can be found here (http://guide.berkeley.edu/graduate/degree-programs/).

Where to apply?
Visit the Berkeley Graduate Division application page (http://grad.berkeley.edu/admissions/apply/).

Admission to the Program

The online Graduate Application for Admission, Fellowship, and Financial Aid will be available in early September on the Graduate Division’s website (http://www.grad.berkeley.edu/admissions/grad_app.shtml/) and will include the current deadline to apply to the program. The completed application must be submitted online (http://grad.berkeley.edu/admissions/grad_app.shtml/) and the fee paid by the deadline. Be sure to allow sufficient time for your letters of recommendation and test scores to arrive by the deadline. The department reviews applications for admission to our graduate program once a year. We accept applications for fall only.

Admissions Criteria
Initiating contact with faculty members; coursework; letters of recommendation; degree of preparedness for graduate school; and your statement of purpose are all important factors in our review of your application.

Contact IB Faculty
It is required that you list on your application at least one faculty member in our department whose research is of interest to you. It is highly recommended that you contact them to discuss your interest in working with them. This contact is the first step in broadly defining areas of potential research focus and should be elaborated on in your statement of purpose.

Bachelor’s Degree
Students admitted to the program typically have a bachelor’s degree in one of the life sciences or physical sciences. However, promising students with other academic backgrounds are encouraged to apply if they have an undergraduate grounding in biology.

Grade Point Average (GPA)
Upper division or graduate GPA of 3.4 or higher is preferred. A minimum GPA of 3.0 (courses taken after the first two years) is required by the Graduate Division.

TOEFL AND GRADUATE RECORD EXAMINATION (GRE)
For international students from countries in which the official language is not English, results of the TOEFL (Test of English as Foreign Language) are required. TOEFL exams must be recent (see info about this on the Grad Div website (https://grad.berkeley.edu/admissions/requirements/)).
Normative Time Requirements

Total normative time is five years.

- A course in evolutionary biology is the only specific course required of all graduate students. It must be taken for a letter grade during the graduate program if it was not completed during the student’s undergraduate education. A student’s supervisory committee may suggest courses as well.
- Four semesters of residency as required by the Graduate Division. This means you must be registered for a minimum of four semesters. There are no departmental unit requirements for the Ph.D. program.
- Students are required to be a graduate student instructor (GSI) (http://lib.berkeley.edu/grad/teaching.php) for at least two semesters and must complete INTEGBI 375.
- A student in the Ph.D. program must take a three-hour oral qualifying examination (QE) (http://ib.berkeley.edu/grad/dissertation.php) on fields specified by their QE committee (one of those fields must be evolution).
- Ph.D. candidates are required to write a dissertation (http://ib.berkeley.edu/grad/dissertation.php) based on original and independent research carried out by the student.
- Students are encouraged (but not required) to enroll in seminars in their field of specialization and present topics. Effective participation in seminars is a useful introduction to your field of specialization and may provide valuable direction for advanced study, particularly if you have not begun research activities.

INTEGBI C200 Principles of Phylogenetics 4 Units

The core theory and methodology for comparative biology, beginning with issues in building phylogenetic trees, with emphases on both morphology and molecules, and both living and fossil organisms. Also covers the many applications of phylogenetic trees to systematics, biogeography, speciation, conservation, population genetics, ecology, behavior, development, functional morphology, and macroevolution that have revolutionized those fields. Labs are closely integrated with lectures and cover the major algorithms and computer software used to implement these approaches. Requirements include participation in discussions, two exams, and a term project.

Principles of Phylogenetics: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Additional Details

Subject/Course Level: Integrative Biology/Graduate

Grading: Letter grade.

Instructors: Ackerly, Mishler, Will

Also listed as: ESPM C200

Principles of Phylogenetics: Read Less [-]
INTEGBI C201 Introduction to Quantitative Methods In Biology 4 Units

Terms offered: Spring 2024, Spring 2023, Spring 2022
This course provides a fast-paced introduction to a variety of quantitative methods used in biology and their mathematical underpinnings. While no topic will be covered in depth, the course will provide an overview of several different topics commonly encountered in modern biological research including differential equations and systems of differential equations, a review of basic concepts in linear algebra, an introduction to probability theory, Markov chains, maximum likelihood and Bayesian estimation, measures of statistical confidence, hypothesis testing and model choice, permutation and simulation, and several topics in statistics and machine learning including regression analyses, clustering, and principal component analyses.

Introduction to Quantitative Methods In Biology: Read More [+]

Objectives & Outcomes

Student Learning Outcomes: Ability to calculate means and variances for a sample and relate it to expectations and variances of a random variable.
Ability to calculate probabilities of discrete events using simple counting techniques, addition of probabilities of mutually exclusive events, multiplication of probabilities of independent events, the definition of conditional probability, the law of total probability, and Bayes’ formula, and familiarity with the use of such calculations to understand biological relationships.
Ability to carry out various procedures for data visualization in R.
Ability to classify states in discrete time Markov chains, and to calculate transition probabilities and stationary distributions for simple discrete time, finite state-space Markov chains, and an understanding of the modeling of evolutionary processes as Markov chains.
Ability to define likelihood functions for simple examples based on standard random variables.
Ability to implement simple statistical models in R and to use simple permutation procedures to quantify uncertainty.
Ability to implement standard and logistic regression models with multiple covariates in R.
Ability to manipulate matrices using multiplication and addition.
Ability to model simple relationships between biological variables using differential equations.
Ability to work in a Unix environment and manipulating files in Unix.
An understanding of basic probability theory including some of the standard univariate random variables, such as the binomial, geometric, exponential, and normal distribution, and how these variables can be used to model biological systems.
An understanding of powers of matrices and the inverse of a matrix.
An understanding of sampling and sampling variance.
An understanding of the principles used for point estimation, hypothesis testing, and the formation of confidence intervals and credible intervals.
Familiarity with ANOVA and ability to implementation it in R.
Familiarity with PCA, other methods of clustering, and their implementation in R.
Familiarity with basic differential equations and their solutions.
Familiarity with covariance, correlation, ordinary least squares, and interpretations of slopes and intercepts of a regression line.
Familiarity with functional programming in R and/or Python and ability to define new functions.
Familiarity with one or more methods used in machine learning/statistics such as hidden Markov models, CART, neural networks, and/or graphical models.
Familiarity with python allowing students to understand simple python scripts.
Familiarity with random effects models and ability to implement them in R.
Familiarity with the assumptions of regression and methods for investigating the assumptions using R.

INTEGBI C204 Research Reviews in Animal Behavior: Behavior Review 1 Unit

Terms offered: Fall 2024, Spring 2024, Fall 2023, Spring 2023
This course will provide a rigorous, critical review of current research in animal behavior. Emphases will include hypothesis testing and experimental design, as well as methods of data collection and analysis. Each week, a student in the course will present original research in the form of a seminar presentation, grant proposal, or manuscript. Through discussion with seminar participants, presenters will gain critical feedback regarding their research.

Research Reviews in Animal Behavior: Behavior Review: Read More [+]

Rules & Requirements

Prerequisites: Graduate standing, basic course in animal behavior. Instructor approval required

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 1.5 hours of seminar per week

Additional Details

Subject/Course Level: Integrative Biology/Graduate
Grading: Letter grade.

INTEGBI C205 Quantitative Methods for Ecological and Environmental Modeling 3 Units
Terms offered: Fall 2015, Fall 2013, Fall 2012, Fall 2011, Fall 2009
This course will review the background mathematical and statistical tools necessary for students interested in pursuing ecological and environmental modeling. Topics include linear algebra; difference equation, ordinary differential equation, and partial differential equation models; stochastic processes; parameter estimation; and a number of statistical techniques. This course will be recommended as a prerequisite for advanced modeling courses in Integrative Biology, Energy and Resources Group, and Environmental Science, Policy, and Management. Quantitative Methods for Ecological and Environmental Modeling: Read More [+]

Rules & Requirements

Prerequisites: Consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Grading: Letter grade.

Also listed as: ENE, RES C205/ESPM C205

Quantitative Methods for Ecological and Environmental Modeling: Read Less [-]

INTEGBI C206 Statistical Phylogenetics 3 Units
Terms offered: Fall 2024, Fall 2022, Fall 2020
This course is aimed at students who wish to understand the evolutionary models and methods for estimating phylogenies (which are trees representing how organisms are related to one another). Topics include continuous-time Markov chains as applied in phylogenetics; maximum likelihood estimation; Bayesian estimation; the combinatorics of evolutionary trees; Markov chain Monte Carlo; distance and parsimony methods for estimating trees; optimization strategies for finding best trees. Students will learn to write computer programs that implement many of the methods discussed in class, and apply their knowledge in a research project.
Statistical Phylogenetics: Read More [+]

Rules & Requirements

Prerequisites: College level course in calculus

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Integrative Biology/Graduate

Grading: Letter grade.

Instructor: Huelsenbeck

INTEGBI 216 Freshwater Ecology 3 Units
This graduate course will combine formal lectures and discussion, with the overall goal of exposing students to general concepts in freshwater ecology. We will discuss a broad range of topics including freshwater environments and biota, natural selection and adaptive evolution, food webs and trophic cascades, cross-ecosystem linkages, and social-ecological resilience of freshwater ecosystems under global change. Upper division undergraduates are welcome, with permission of the instructors.
Freshwater Ecology:

INTEGBI 217 Biomimetic Engineering -- Engineering from Biology 3 Units
Terms offered: Fall 2017, Spring 2014, Fall 2010
Study of nature's solutions to specific problems with the aim of determining appropriate engineering analogs. Morphology, scaling, and design in organisms applied to engineering structures. Mechanical principles in nature and their application to engineering devices. Mechanical behavior of biological materials as governed by underlying microstructure, with the potential for synthesis into engineered materials. Trade-offs between redundancy and efficiency. Students will work in teams on projects where they will take examples of designs, concepts, and models from biology and determine their potential in specific engineering applications.
Biomimetic Engineering -- Engineering from Biology:

INTEGBI 222 Seminar in Physiological Energetics and Biomechanics 2 Units
Terms offered: Fall 2022, Spring 2022, Fall 2021
Discussion and critique of scientific literature and current topics in physiological energetics and biomechanics. Emphasis is on metabolic energetics. Topics include efficiency, energy-saving mechanisms, muscle function, oxidative stress, development in metabolic physiology and biochemistry and comparative aspects.
Seminar in Physiological Energetics and Biomechanics:

INTEGBI 223 Seminar on Bioenergetics and Metabolism 2 Units
Terms offered: Fall 2023, Fall 2021, Fall 2020
Immediate and long-range adaptations of the body to exercise. Physiological limits and work capacities in relation to age, sex, diet, environmental factors, and nature of activity.
Seminar on Bioenergetics and Metabolism:

INTEGBI 224 Seminar on Human Physiology and Behavior 2 Units
Terms offered: Fall 2022, Spring 2022, Fall 2021
An in-depth examination of the interactions among the brain, nervous system, endocrine system, and the autonomic nervous system. The course will also explore the implications of these interactions on human behavior and performance. Emphasis will be placed on the integration of knowledge from a variety of biological disciplines and social sciences.

INTEGBI 225 Seminar in Integrative Physiology 2 Units
Terms offered: Fall 2019, Spring 2019
An advanced seminar course that will provide a broad perspective on integrative physiology, covering topics such as neurophysiology, endocrinology, immunology, and infectious disease. The course will emphasize the integration of knowledge from multiple disciplines and the application of integrative physiology to understanding the function and dysregulation of complex systems.

INTEGBI 226 Seminar in Integrative Behavior 2 Units
Terms offered: Fall 2018, Spring 2018
This seminar will focus on the interdisciplinary study of behavior, with an emphasis on the integration of knowledge from psychology, biology, and neuroscience to understand the mechanisms underlying behavior. The course will cover topics such as decision-making, learning, and memory, as well as the role of hormones and neurotransmitters in behavior.

INTEGBI 227 Seminar in Integrative Neuroscience 2 Units
Terms offered: Fall 2020, Spring 2020
This seminar will provide an overview of the field of integrative neuroscience, which seeks to understand the nervous system and its functions in the context of the whole organism. The course will cover topics such as the anatomy and physiology of the nervous system, neuronal communication, and the integration of sensory inputs into behavior.

INTEGBI 228 Seminar in Integrative Immunology 2 Units
Terms offered: Fall 2017, Spring 2017
This seminar will focus on the study of the immune system, with an emphasis on the integration of knowledge from biology, medicine, and the social sciences. The course will cover topics such as the immune response to infection, immunology of chronic diseases, and the role of the immune system in health and disease.

INTEGBI 229 Seminar in Integrative Endocrinology 2 Units
Terms offered: Fall 2016, Spring 2016
This seminar will provide an overview of the field of integrative endocrinology, which seeks to understand the functions of the endocrine system in the context of the whole organism. The course will cover topics such as the regulation of hormone production, the role of hormones in metabolism and development, and the integration of endocrine and nervous system function.

INTEGBI 230 Seminar in Integrative Metabolism 2 Units
Terms offered: Fall 2015, Spring 2015
This seminar will focus on the study of metabolism, with an emphasis on the integration of knowledge from biology, medicine, and the social sciences. The course will cover topics such as the regulation of energy homeostasis, the role of metabolism in disease, and the integration of metabolic and endocrine system function.
INTEGBI C226 Isotopics 2 Units
Terms offered: Fall 2024, Fall 2023, Fall 2022
This seminar will explore current topics that employ the use of stable isotopes. Discussion topics include the areas of biology, paleontology, biogeochemistry, soil science, and atmospheric science. Students will be required to lead at least one discussion of relevant literature in the topic area.
Isotopics: Read More [+]
Hours & Format
Fall and/or spring: 10 weeks - 3 hours of seminar per week
Additional Details
Subject/Course Level: Integrative Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructors: Amundson, Dawson, Mambelli
Also listed as: ESPM C225
Isotopics: Read Less [-]

INTEGBI C227 Stable Isotope Ecology 5 Units
Course focuses on principles and applications of stable isotope chemistry as applied to the broad science of ecology. Lecture topics include principles of isotope behavior and chemistry, and isotope measurements in the context of terrestrial, aquatic, and marine ecological processes and problems. Students participate in a set of laboratory exercises involving preparation of samples of choice for isotopic analyses, the use of the mass spectrometer and optical analysis systems, and the analysis of data.
Stable Isotope Ecology: Read More [+]
Rules & Requirements
Prerequisites: Graduate standing
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Also listed as: EPS C241/ESPM C220
Stable Isotope Ecology: Read Less [-]

INTEGBI 230 Marine Ecosystems and Global Change 1 Unit
Terms offered: Spring 2022, Fall 2018, Spring 2018
The purpose of this course is to discuss recent advances in the effects of global change (inclusive of climate change, pollution, overfishing, introduced species, etc.) on any aspect of coastal marine or estuarine ecosystems. This class is aimed at graduate students or advanced undergraduate students ready to read the primary literature and engage in active discussions of the findings and implications. Students interested in learning about cutting edge research on the effects of climate change and other anthropogenic stressors on coastal marine and estuarine ecosystems will find this class to be worthwhile.
Marine Ecosystems and Global Change: Read More [+]
Rules & Requirements
Prerequisites: Graduate student status or permission of instructor for undergraduate students
Hours & Format
Fall and/or spring: 15 weeks - 1 hour of seminar per week
Additional Details
Subject/Course Level: Integrative Biology/Graduate

Instructors: Sudmant, Moorjani
Also listed as: MCELLBI C242

INTEGBI C242 CTEG Evolution, Genetics, and Genomics Seminar 1 Unit
Terms offered: Fall 2024, Spring 2024, Fall 2023
This graduate seminar consists of weekly presentations from Berkeley graduate students as well as outside speakers on topics surrounding evolution, genetics, and genomics. Many labs spread across different departments have research programs focused on evolution, genetics, and genomics. However, it can be challenging to keep abreast of this research and to identify potential collaborations due to the dispersion of labs across different departments and specialties. The Center for Theoretical and Evolutionary Genetics (CTEG) is an informal group of labs that collectively work on genetics and genomics. The seminar seeks to provide a common space for graduate students to present their research and learn about the research of their colleagues. CTEG Evolution, Genetics, and Genomics Seminar: Read More [+]

INTEGBI 263 Genetics and the Evolution of the Skeleton 2 Units
Terms offered: Spring 2016, Spring 2015, Spring 2012
In this seminar, we will explore the genetic underpinnings of vertebrate
skeletal variation and review how such information is being incorporated
into evolutionary and paleontological studies. Topics include quantitative
genic analyses of cranial variation and developmental genetics of the
limb and dentition. This course will be tailored each semester to cover
new research; therefore, students may enroll in this course multiple
semesters.

Seminar in Evolution: Read Less [-]
INTEGBI 283 Seminar in Vertebrate Evolution and Paleontology 1 Unit
Terms offered: Fall 2017, Fall 2016, Spring 2016
Presentations and discussions of original research and new literature in vertebrate evolution and paleontology. Syllabus and reading list will vary as topics change from semester to semester. Open to Undergraduate students with permission. Enrollment limit: 20.
Seminar in Vertebrate Evolution and Paleontology: Read More [+]
Rules & Requirements
Prerequisites: 183, 183L or consent of instructor
Credit Restrictions: Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog.
Hours & Format
Fall and/or spring: 15 weeks - 1 hour of seminar per week
Additional Details
Subject/Course Level: Integrative Biology/Graduate
Grading: Letter grade.
Instructor: Padian
Seminar in Vertebrate Evolution and Paleontology: Read Less [-]

INTEGBI 286 Seminars in Paleontology 2 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
Advanced study and current literature in various fields of paleontology. Topics vary from year to year.
Seminars in Paleontology: Read More [+]
Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Integrative Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Seminars in Paleontology: Read Less [-]

INTEGBI 287 Paleontology Seminar Series 1 Unit
Terms offered: Fall 2024, Spring 2024, Fall 2023
Seminar series based on recently published and in-progress research relevant to the mission of the University of California Museum of Paleontology.
Paleontology Seminar Series: Read More [+]
Rules & Requirements
Prerequisites: Graduate standing or consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 1 hour of seminar per week
Additional Details
Subject/Course Level: Integrative Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Paleontology Seminar Series: Read Less [-]

INTEGBI 290 Research Seminar 1 - 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Advanced study in various fields of Integrative Biology. Topics will be announced in advance of each semester. Enrollment in more than one section permitted.
Research Seminar: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 1-2 hours of seminar per week
Additional Details
Subject/Course Level: Integrative Biology/Graduate
Grading: Letter grade.
Research Seminar: Read Less [-]
INTEGBI 291 Research Seminar 1 Unit
Terms offered: Fall 2018, Fall 2017, Fall 2016
Review and discussion of topics of current interest. Topics to vary.
Research Seminar: Read More [+]
Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 7.5 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Integrative Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Research Seminar: Read Less [-]

INTEGBI 292 Integrative Biology Colloquium 0.0 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
Meetings for the presentation of original work by faculty, visiting lecturers, and graduate students.
Integrative Biology Colloquium: Read More [+]
Hours & Format
Fall and/or spring: 15 weeks - 1.5 hours of colloquium per week
Additional Details
Subject/Course Level: Integrative Biology/Graduate
Grading: Letter grade.
Integrative Biology Colloquium: Read Less [-]

INTEGBI 296 Special Study for Graduate Students 1 - 4 Units
Terms offered: Spring 2016, Fall 2015, Spring 2015
Reading or other advanced study by arrangement with a staff member.
Special Study for Graduate Students: Read More [+]
Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Summer:
6 weeks - 1-4 hours of independent study per week
8 weeks - 1-4 hours of independent study per week
Additional Details
Subject/Course Level: Integrative Biology/Graduate
Grading: Letter grade.
Formerly known as: Zoology 296
Special Study for Graduate Students: Read Less [-]

INTEGBI 297 Directed Field Studies 1 - 8 Units
Terms offered: Spring 2017, Fall 2016, Spring 2016
Open to qualified students directly engaged in field studies.
Directed Field Studies: Read More [+]
Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 0 hours of fieldwork per week
Additional Details
Subject/Course Level: Integrative Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Directed Field Studies: Read Less [-]

INTEGBI 298 Special Study in Integrative Biology 1 - 12 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Graduate research by small groups.
Special Study in Integrative Biology: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Additional Details
Subject/Course Level: Integrative Biology/Graduate
Grading: Letter grade.
Special Study in Integrative Biology: Read Less [-]

INTEGBI 299 Graduate Research 1 - 12 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Credit awarded according to work planned and accomplished.
Graduate Research: Read More [+]
Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Summer:
6 weeks - 1-4 hours of independent study per week
8 weeks - 1-4 hours of independent study per week
Additional Details
Subject/Course Level: Integrative Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Graduate Research: Read Less [-]
INTEGBI N299 Graduate Research 1 - 6 Units
Terms offered: Summer 2015 Second 6 Week Session, Summer 2010 10 Week Session, Summer 2007 10 Week Session
Graduate student research.
Graduate Research: Read More [+]
Rules & Requirements
Prerequisites: Graduate standing
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Summer:
6 weeks - 2.5-15 hours of independent study per week
8 weeks - 1-6 hours of independent study per week
Additional Details
Subject/Course Level: Integrative Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
INTEGBI 304 Dissemination of Research: Your Interface with the Public 2 Units
Terms offered: Spring 2018, Spring 2017, Fall 2012
This course will consist of lectures and class discussions about mechanisms of communicating about science to the public. We will consider how to convey the issues, process, and findings of scientific research to a variety of audiences using different media (e.g., posters, web pages, newsletters, newspaper and magazine articles, books, television). Projects conducted by teams of students under the direct supervision of the instructors will include preparation of outreach materials (e.g., posters, newsletters, web pages).
Dissemination of Research: Your Interface with the Public: Read More [+]
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week
Additional Details
Subject/Course Level: Integrative Biology/Professional course for teachers or prospective teachers
Grading: Letter grade.
INTEGBI 305 Thriving in Academia 2 Units
Terms offered: Fall 2024, Fall 2023, Fall 2022
Series of lectures and workshops to prepare graduate students for many aspects of academic careers, including grant proposal writing, giving talks at meetings or to academic departments, preparing job applications and having job interviews, advising graduate students and postdocs, reviewing manuscripts and grant proposals, service activities and time management, working at teaching college vs. research universities, alternative careers, etc.
Thriving in Academia: Read More [+]
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Integrative Biology/Professional course for teachers or prospective teachers
Grading: Offered for satisfactory/unsatisfactory grade only.
Thriving in Academia: Read Less [-]
INTEGBI 375 Teaching Colloquium: Graduate Student Instructor Training 2 Units
Terms offered: Fall 2024, Fall 2023, Fall 2022
Series of workshops and seminars involving graduate students and faculty participation. The main objectives of this course are to train graduate students to become effective instructors and to discuss important issues that graduate students face when teaching undergraduate classes.
Teaching Colloquium: Graduate Student Instructor Training: Read More [+]
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Integrative Biology/Professional course for teachers or prospective teachers
Grading: Offered for satisfactory/unsatisfactory grade only.
Formerly known as: Integrative Biology 303
Teaching Colloquium: Graduate Student Instructor Training: Read Less [-]
INTEGBI 400 Training in Stable Isotope Methods and Mass Spectrometry 1 Unit
Terms offered: Fall 2024, Fall 2023, Fall 2022
An intensive lecture and laboratory training course on the fundamental principles and practical applications of stable isotope methods in biogeochemistry, ecology, physiology, and environmental science. Topics covered are sample preparation, operating of an isotope ratio mass spectrometer, and analysis of stable isotope data. This course is required for all students interested in using the facilities housed in the Center for Stable Isotope Biogeochemistry for their research.
Training in Stable Isotope Methods and Mass Spectrometry: Read More

Rules & Requirements

Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Integrative Biology/Other professional
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Dawson
Training in Stable Isotope Methods and Mass Spectrometry: Read Less

INTEGBI C407 Introduction to Scientific Diving 3 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015
Diving physics, physiology, medicine, rescue, decompression, theory, navigation, environment, marine life, research methods, equipment, and University regulations. Course leads to University certification to use underwater life support apparatus for study or research under University auspices.
Introduction to Scientific Diving: Read More

Rules & Requirements

Prerequisites: Advanced scuba certification, swim test, medical exam, and consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Additional Details

Subject/Course Level: Integrative Biology/Other professional
Grading: Letter grade.
Instructors: Hayward, Scott
Formerly known as: Integrative Biology C407/Physical Education C407
Also listed as: PHYS ED C407
Introduction to Scientific Diving: Read Less

INTEGBI 601 Individual Study for Master's Students 1 - 8 Units
Terms offered: Spring 2016, Fall 2015, Spring 2015
Individual study for the comprehensive requirements in consultation with the major adviser. Units may not be used to meet either unit or residence requirements for a master's degree.

Individual Study for Master's Students: Read More

Rules & Requirements

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week

Additional Details

Subject/Course Level: Integrative Biology/Graduate examination preparation
Grading: Offered for satisfactory/unsatisfactory grade only.
Individual Study for Master's Students: Read Less

INTEGBI 602 Individual Study for Doctoral Students 1 - 8 Units
Terms offered: Spring 2016, Fall 2015, Spring 2015
Individual study in consultation with the major adviser. Intended to provide an opportunity for qualified students to prepare themselves for the various examinations required for candidates for the Ph.D.

Individual Study for Doctoral Students: Read More

Rules & Requirements

Credit Restrictions: Course does not satisfy unit or residence requirements for doctoral degree.
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week

Additional Details

Subject/Course Level: Integrative Biology/Graduate examination preparation
Grading: Offered for satisfactory/unsatisfactory grade only.
Individual Study for Doctoral Students: Read Less
INTEGBI N602 Individual Study for Doctoral Students 1 - 6 Units
Terms offered: Prior to 2007
Formerly < Paleon 602, Zoology 602, Botany 602, Physiol 602, Anatomy 602> Individual study in consultation with the major field adviser.
Intended to provide an opportunity for qualified students to prepare themselves for the various examinations required for candidates for the Ph.D.

Individual Study for Doctoral Students: Read More [+]

Rules & Requirements

Credit Restrictions: Course does not satisfy unit or residence requirements for doctoral degree.

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Summer: 8 weeks - 1-6 hours of independent study per week
