Development Practice

Overview
The UC Berkeley Master of Development Practice (MDP) is an interdisciplinary professional degree program designed to prepare leaders to tackle the local, regional, and global challenges of the coming decades. Graduates aspire to careers “with meaning” in non-profit, business, and government organizations. Attracting experienced, engaged, and entrepreneurial students from around the world, its rigorous curriculum provides core scientific knowledge; skills in problem-solving, design, and management; analytical and decision-making tools; and integrative perspectives. The program’s foundational core curriculum is supplemented by each student’s customized specialization, drawing from the unparalleled breadth and depth of the world’s top public university. The Berkeley MDP’s focus is on practice with hands-on, experiential learning infused throughout the program. It emphasizes peer learning, enriched by a student cohort diverse in education, profession, and culture. Students have backgrounds across the sciences and humanities and are consistently 40-50% international with alumni representing 26 nations.

The Berkeley MDP is a member of the Global Association of MDP programs – thirty-two graduate programs in nineteen countries – sharing a common approach and designed around a set of core capabilities developed through a year-long consultative process supported by the John D. and Catherine T. MacArthur Foundation.

Undergraduate Program
There is no undergraduate program in Development Practice.

DEVP 200A The Capstone Experience 3 Units
Terms offered: Fall 2023
The MDP Capstone Experience aims to guide students to successfully complete their capstone (final project or master’s thesis) milestone from the Master of Development Practice (MDP) program. The course aims to help students create an outstanding final project or master’s thesis, and to provide an appropriate scaffolding. Students will reflect on their pedagogical and professional journey during the MDP program. One can expect to acquire research-related skills, such as writing a proposal, designing a research project, and writing a literature review, and gain proficiency in the use of Internet-based search engines, data collection, and electronic journals, etc as well as produce stellar presentations.

The Capstone Experience: Read More [+]

Rules & Requirements
Prerequisites: Only second year MDP students can register for the course

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Development Practice/Graduate

Grading: This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Instructor: Reddy

**DEVP 209 Introduction to Quantitative Methods for Development 3 Units**

Terms offered: Fall 2023

This course is designed for students who have had calculus but may not have used it in some time. This prepares them for the required Quantitative Methods and Impact Evaluation course, which presumes an understanding of all the concepts below, including regression analysis. Because 90% or more of empirical research and policy analyses involve some type of regression analysis, teaching the mechanics of ordinary least squares and how to understand and interpret regression analyses will be a component of learning objectives, and at the end of the course, students will understand regression analysis.

**DEVP 221 Climate, Energy and Development 3 Units**

Terms offered: Fall 2023, Fall 2022, Fall 2021

Graduate seminar examining the role of energy science, technology, and policy in international development. The course will look at how changes in the theory and practice of energy systems and of international development have co-evolved over the past half-century, and what opportunities exist going forward. A focus will be on rural and decentralized energy use, and the issues of technology, culture, and politics that are raised by both current trajectories, and potential alternative energy choices. We will explore the frequently divergent ideas about energy and development that have emerged from civil society, academia, multinational development agencies, and the private and industrial sector.

Climate, Energy and Development: Read More [+]

**Rules & Requirements**

**Prerequisites:** Graduate student standing or consent of instructor

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture per week

**Additional Details**

Foundations of Public Health 2 3 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
The seminar will introduce core disciplines and concepts in public health, using a case-based, integrated approach. Examples of cases discussed include: respiratory disease and air pollution; tobacco control and prevention of smoking-related conditions; disease elimination or eradication via childhood immunization; environmental control and prevention of schistosomiasis; behavior change and prevention of HIV/AIDS; and novel economic approaches to improving healthcare delivery to impoverished groups.

DEVP 229 Quantitative Methods and Impact Evaluation 3 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
This course is designed to introduce students to the basic concepts of estimation, prediction, and hypothesis testing. The course will focus on impact evaluation theory and methods and will explore the variety of tools available for rigorously measuring the impact of development programs on poverty.

DEVP 290 Special Topics 1 - 3 Units
Terms offered: Fall 2023, Spring 2023, Fall 2022
This course provides a hands-on introduction to entrepreneurship as it relates to sustainable development. Its focus is on exploring and developing the toolsets, skillsets and mindsets required to launch and sustain a successful venture, be it from the ground up or from inside an existing organization, for-profit or non-profit. Guided by visiting experts and guest lectures, students will learn how to focus on “customers” first and to understand “sustainability” not only in environmental and social terms but also how to ensure critically important financial sustainability.
Special Topics: Read More [+]

Rules & Requirements
Repeat rules: Course may be repeated for credit when topic changes.

Hours & Format
Fall and/or spring: 15 weeks - 1-3 hours of lecture per week

DEVP 295 Implementing and Assessing International Development Projects and Policies: From Theory to Practice 2 Units
Terms offered: Fall 2023, Fall 2022, Spring 2022
This course will bridge the gap between development theory and its application by sharing the challenges that arise from: i) the implementation of projects and programs supported by international financing institutions like IFAD; and ii) the assessment of their impact. Since the mandate of IFAD is to focus on fighting rural poverty, the seminar will cover a range of topics regarding: i) sectoral/sub-sectoral domains such as rural development, natural resource management, and micro-finance; ii) vulnerable social groups such as indigenous people, marginal farmers, women and youth; and iii) key development processes such as targeting, empowerment, participatory planning, and monitoring and evaluation.

Instructor: Galletti
DEVP 296 Innovative Finance for Development 3 Units
Terms offered: Fall 2023, Fall 2022, Spring 2022
This course will focus on the means and methods of finance applied to social, economic, and environmental challenges facing developing economies. It will survey the application of innovative financing emerging through new products and services, new processes and operations and organizational forms in addressing problems as diverse as entrepreneurial finance, renewable energy, environmental finance, global health, accelerating medical solutions, regional development, affordable housing, urban revitalization and infrastructure.
Innovative Finance for Development: Read More [+]

Objectives & Outcomes
Course Objectives: In addition to understanding the evolving field of development finance, students will discover why capital structure matters in aligning diverse interests into new business models for sustainable social and economic change and develop capacity in designing appropriate financial products/structure.

Student Learning Outcomes: Students will acquire and apply data gathering, economic, and financial analytical skills to identify specific market failures in developing economies enabling them to apply appropriate financial tools to bridge capital gaps for project and enterprise finance. They will:
• Design and construct an innovative finance application in a developing economy;
• Measure, analyze and report development impacts of an innovative finance project;
• Identify and develop how a development impact investment would benefit and expand capital access through the creative use of innovative financing tools;
• Assist a high-impact project to access flexible market and below-market financial tools;
• Identify how to structure the transaction and identify potential interested partners with aligned interests in the proposed project.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar per week

Additional Details
Subject/Course Level: Development Practice/Graduate
Grading: Letter grade.
