Music

Overview

The Department of Music fosters the cultivation of music on campus through undergraduate and graduate programs of study; and also through public concerts and lectures in Hertz Hall, Morrison Hall, and elsewhere. For undergraduates, the department offers a major in music, as well as numerous nonmajor courses for students with little or no previous experience in music. A minor in music draws on courses for either majors or nonmajors, depending on student qualifications. For graduate students, the department offers programs leading to the MA/PhD or PhD degrees in musical composition, history and literature, or ethnomusicology.

The department's theory courses provide an introduction to the materials of musical composition through ear training, harmony, counterpoint, and analysis. The history and literature courses present a survey of Western music and a detailed study of the chief periods of its development. Courses in ethnomusicology provide the study of specific areas of world music, both in survey and in-depth, and an introduction to the principles and methods of research. Courses in performance (including orchestra, chorus, and various ensembles) offer the opportunity to perform a varied repertory and are open by audition to all students and to auditors.

Facilities and Library

The Center for New Music and Audio Technologies (http://cnmat.berkeley.edu/) is the site for interdisciplinary research and teaching on the application of computer and related technologies to music and for related concerts, lectures, workshops and seminars by internationally renowned performers, scholars, and researchers.

One of the finest music research collections in the world, the Jean Gray Hargrove Music Library (https://www.lib.berkeley.edu/visit/music/) provides strong support for instruction, research, and performance at Berkeley. The Hargrove Music Library currently holds some 180,000 volumes of books and printed music; 50,000 sound and video recordings; 30,000 microforms; and extensive manuscript and archival collections. Originally centered on the Western classical tradition, it has in recent years increasingly extended its collecting into non-Western, traditional, and popular music. While supporting advanced research in musicology and ethnomusicology, it also serves the needs of composers and performers. Its extraordinary collection of music manuscripts and early editions, which continues to grow thanks to generous endowments, offers students the opportunity to work directly with original sources.

Now in its 63rd year, the well-attended free noon concert series takes place in Hertz Hall (http://music.berkeley.edu/about-us/resources-and-facilities/), a 678-seat performance space. Also used for evening concerts, rehearsals, and lecture classes, it is home to many department ensembles including the symphony, choruses, and ensembles.

A campus icon located in the middle of campus, the Campanile houses the 61-bell carillon and features daily performances by carillonneurs, students, and guests.

Located on the ground floor of Morrison Hall, the music practice rooms (http://music.berkeley.edu/practice-rooms/) at Berkeley consist of 31 small rooms, most with a single piano, as well as five larger grand rooms which double as teaching studios and an organ/early music practice room.

The department maintains several instrument collections, including the Salz Collection of String Instruments, the Baroque Instrument Collection, the Edmond O'Neill Memorial Organs, and World Instruments. In addition, the department houses two special collections of musical resources, the Joan Lam Choral Library and the Chambers Campanology Collection. For further information on these collections, see the department's website (http://music.berkeley.edu/instrument-collections/).

Performance Opportunities

Unique to UC Berkeley's Department of Music, among the great music departments in the country, is the degree to which performance experience and study are integrated into every aspect of the academic program, whether honing musicianship skills; acquiring knowledge of the music of diverse cultures and traditions; or studying the history and literature of European music or contemporary music life in America and elsewhere. It shows up as a requirement only in one form: Music majors must enroll in at least three semesters of performance from the 140 or 150 series. However, undergraduates and graduate students avail themselves of rich performance opportunities by participating in one of the department’s ensembles that presents evening and weekend concerts; by presenting a noon concert; by auditioning for the opportunity to perform a concerto with the university orchestra; by performing in concerts of the Berkeley Undergraduate Composers Club; and in many other ways.

For further information on these opportunities, see the department's website (http://music.berkeley.edu/performance-opportunities/).

MUSIC 29 Music Now 4 Units
Terms offered: Summer 2024 First 6 Week Session, Spring 2024, Summer 2023 First 6 Week Session
This course explores the basic materials and models that set the boundaries for various present-day musical experiences. Students are exposed to terminology and modes of engagement with the aim of inspiring new paradigms of listening (e.g., listening to silence, noise, space, and timbre). Composers and musicians of today continue to explore new ways of defining and organizing sounds into music. The course focuses on the most adventurous music of our time, but the concepts learned can be applied to any style of music. The course is designed to enrich and deepen the students' musical abilities through direct involvement with musical materials. Direct engagement through listening and participatory learning is accomplished in part with software created at the Center for New Music and Audio Technologies. The course does not require students to be able to read music nor to own a personal computer.

MUSIC 31 Radical Listening 4 Units
Terms offered: Spring 2024, Fall 2022, Spring 2022
Radical Listening (MUS 31) considers music through the lenses of extra-musical epistemologies - aesthetics and philosophies related to culture, memory, identity, gender, etc. Listening to music with such considerations can foster and illuminate personal emotional stakes. Cultivating personal stakes in listening has the benefit of moving us towards a greater capacity for empathy - what we do in our most personal aesthetic spaces can project outwards into how we engage with others, publicly, as caring citizens. Tactically, we will rehearse applying "radical listening" concepts on some of the most ubiquitous and influential music in Western culture in tandem with important, though esoteric, exponents of experimental music (e.g. Vocaloids).

Music 105 Introduction to Music Production using Ableton Live 3 Units
Terms offered: Fall 2024, Summer 2024 Second 6 Week Session, Spring 2024
This course will cover the fundamentals of music production, including (but not limited to): the science of sound, signal flow and recording chain, intro to various Digital Audio Workstations (Logic, Reaper, Pro Tools, Garage Band and the differences between them), with a focus on music production using Ableton Live, effects processing, and mixing and mastering. If time and interest allow, basics of Max for Live. This course is best suited for those with little to no experience with DAWs or Ableton.
Introduction to Music Production using Ableton Live: Read More [+]
Objectives & Outcomes
Course Objectives: Provide a strong conceptual foundation and technical skill set when using Ableton Live and comfort using common Digital Audio Workstation interfaces, with emphasis on producing original music using a variety of setups, troubleshooting, and listening to/discussing other students' tracks using musical vocabulary.
Student Learning Outcomes: Create at least 4 dynamic and thoughtful tracks in Ableton from start to finish using any combination of recorded audio and MIDI clips. These tracks will demonstrate progressively advanced production techniques within the style(s) of music that students are interested in.
Demonstrate an increased awareness and use of musical terminology when discussing their own and other students' tracks, based on an overview of relevant music theory concepts (writing chord progressions, rhythm and syncopation exercises).
Select a microphone (from a given list) to use in various recording contexts (which are based on the student setups in the class). If no fellow student setups allow, common recording studio contexts (i.e. 5 piece band, acoustic duo).
Set up and check from start to finish an Ableton Live session using their personal setup (could include analog/MIDI devices, microphones, acoustic instruments) or if none of the above, a setup with built in microphone and laptop MIDI keyboard. This includes recording and editing MIDI and Audio clips in both Session and Arrangement view while understanding the differences between them.
Understand and apply basic mixing and mastering techniques and plugins available in Ableton, including but not limited to: compression, EQ, delay, and reverb and the use of return tracks.

MUSIC 109 Music Cognition: The Mind Behind the Musical Ear 3 Units
Terms offered: Fall 2020, Fall 2019, Fall 2018
The goal of this class is to interrogate and make explicit the powerful musical intuitions that are at work as you make sense of the music all around you. What is the nature of the knowledge that is guiding these intuitions? How does this knowledge develop in ordinary and extraordinary ways? To approach these questions, small composition-like projects aided by a specially designed computer music environment will function as a workplace. You will explore, experiment, question, and reflect on how and what you know how to do as you generate the musical coherence that you seem simply to find.

MUSIC 128V Songs and Song-writing 4 Units
Terms offered: Spring 2017
Songs can mark occasions, convey emotions, and create communities. We'll explore the ways songs produce the different effects and impact that they do. We'll analyze the qualities and moods created by melody and rhythm, the singing voice, phrasing and form. The aim is to develop a critical understanding and vocabulary about song—an awareness that will be applicable to the papers you write and the music you create. By the end of the term students will have written and recorded original songs and learned how to listen closely to and write about music. Assignments and discussion will emphasize keen listening, the challenge of describing musical experiences in writing, and developing creativity through engagement with song-writing.

MUSIC 128X Topics in the History of European and American Music 4 Units
Terms offered: Fall 2019
This course is intended, above all else, to create the circumstances in which we will each independently develop as intimate a relationship as we can with Beethoven’s music. With an open mind and a bit of application, we ought to become well-acquainted with several of his compositions, extremely friendly with others, and perhaps even head over heals in love with a couple of them.

We’ll be seeking to understand this music through attentive listening and close technical description, but also by looking at the historical environments in which it was composed, performed, and heard.

For that reason, we’re going to take a roughly chronological route through Beethoven’s life and works.

The Shape of Jazz to Come: Innovations in Jazz from 1959-1969 3 Units
Terms offered: Spring 2016
The decade from 1959-1969 was tremendously exciting in the evolution of Jazz. The experimentation with freedom principles and hybrid forms, the influences of African and Indian musical traditions, the larger socio-cultural revolution, and the rise of the Black Nationalist Movement all contributed to the making of a very potent and creative body of work which continues to influence many contemporary music and art scenes throughout the world today. Through lecture, guided listening, discussion, short papers and research projects, we'll examine the acknowledged conventions in jazz pre-1960, how those conventions were transformed in various ways throughout the 60s, and how the new practices continue to influence artists today.

MUSIC 131 Musics of Latin America 4 Units
Terms offered: Not yet offered
This course considers select musical practices stemming from Latin America and its diasporic communities. Focusing on the 20th and 21st centuries, but tracing longer historical threads, we will study musics that go from the “folkloric” to the “popular,” the local to the transnational, and from south to north of the American continent. We will address these practices at the intersection of the “musical” and “cultural.” We will delve into historical and site-specific issues of race, gender, ethnicity, nationality, migration, media capitalism, and power. We will query the role music has played in processes of identity formation and un/belonging in the context of Latin America and the communities this loaded signifier includes/excludes.

MUSIC 131B Cumbia: Music, Difference, and Circulation in the Americas 4 Units
Terms offered: Not yet offered
Cumbia is a music found throughout the American continent. Though particular types of cumbia are found in most countries, they differ musically and contextually. This class focuses on local cumbia practices in and outside the Americas. Tracing its musical similarities and differences, as well as the circulation networks through which it has spread, the class disentangles cumbia’s convoluted genealogy and considers its many manifestations within their geopolitical backdrop. Along the way, it also offers an overview of relevant sociopolitical issues in 20th and 21st century Latin America.

MUSIC 134C Popular Musics in Transnational Asia 4 Units
Terms offered: Spring 1997
This course explores the complex webs and flows of historical and contemporary transnational musical exchanges of Asian/Asian American popular music in the 20th and 21st centuries. For each musical practice, we will give attention to the histories of violence, im/migration, contested claims about national identity, and technological development that have produced the conditions in which the particular music was created. Resisting a monolithic imagination or understanding of “Asia,” this course will show how popular musical practices enable us to “hear” a dynamic production of Asia through hidden histories, memories, distant places, social differences, struggles, and innovations that go far beyond geographic national borders.

MUSIC 134D Music and Social Protest 4 Units
Terms offered: Not yet offered
The course explores the intersection of music, politics, and social transformation through a survey of ethnographic accounts of musical protest from the US to Egypt, South Africa, Chile, Japan, and beyond. Examples will include songs that critique gender, class, and racial inequalities, violence, environmental damage, greed, complacency, and the notion of “protest music” itself. Students will examine what the function, potential, and limits of musical protest have been in transforming civic life; the role of musical sounds in mediating and contesting oppressive regimes, structural inequalities, and social injustice; and how music might offer creative rethinking of the relationship between critical attention, compassion, and commitment.

MUSIC 135 Listening to Musics of the World 4 Units
Terms offered: Fall 2001, Fall 1999, Spring 1996
This course offers an introductory survey of musical practices in four selected regions of the world. Students will cultivate critical listening skills and open-minded/ereared sensibilities to appreciate diverse approaches to music making. Performing artists will be invited to give an interactive, hands-on workshop on music/dance for each area, providing an opportunity for students to gain embodied insights into the musical practice under discussion. Students will also be introduced to basic musical concepts and terminologies, and acquire listening skills that will enable them to better encounter and understand music in this course and beyond. Final project will take the form of a mini local ethnography or a research paper.

MUSIC 135A Musics of the Caribbean 4 Units

MUSIC 138 Sound, Music, and Ecology 4 Units
Terms offered: Not yet offered
How might critical attention to sound and music yield a new insight into the interactions among societies and their environment? This course will examine how the ecological relationships between humans and their surroundings are expressed, sustained, and sometimes challenged through musical sounds. From bird songs in the rain forest to songs of the indigenous land rights movement in Australia, students will investigate how sonic/musical creativities have intersected with the production, preservation, or destruction of ecologies—natural, social, cultural, or otherwise. We will focus on the social and political issues around environmental resources, and the role of the arts (especially music) in relation to conflicts and power relations.

MUSIC C138 Art and Activism 4 Units
Terms offered: Fall 2021, Spring 2020, Spring 2019
This course explores the intersections between aesthetic practice and social change. Students will investigate—in both theory and practice—the capacity of art making to cultivate transformation of themselves, their relationships, their practices, their institutions, and the larger economic and socio-political structures in which they function, locally and globally. Focusing on historical and contemporary artists and political issues, we ask: 1) How is art impacted by social change? 2) How has art been used toward social change? and 3) How can we, as course participants, use art to bring about social change?

MUSIC 188 Inside Music Therapy 3 Units
Terms offered: Spring 2024
For those students who have completed Music 48 (Introduction to Music Therapy), a more in-depth study of the music therapy profession. From analysis of case studies and research studies to clinical improvisation techniques and a closer look at music therapy interventions, this course will dive deeper into the profession. This course will also begin an exploration into the psychology of music, the neurological responses to music and the innate human propensity for musical response and musical communication from a Music Therapist's perspective.

Objectives & Outcomes

Course Objectives: Students will be able to engage in an informed discussion about what it means to be musical, the definition of music, the role of music within society, and different perspectives that seek to explain why music can be effective in communication.

Students will be able to identify, define and demonstrate at least 5 different clinical Music Therapy interventions.

Students will begin to understand through experiential music projects the efficacy of music therapy interventions as well as how they serve different populations.

Students will gain a perspective of why music therapy is effective by engaging in individual and collaborative music-making opportunities.

MUSIC 231 Music and Violence 4 Units
Terms offered: Fall 1995
Music can be a form of weapon or torture; a mediating force in conflict resolution; a force complicit with violence; storehouse of memory or process of healing for survivors of violence; a mode of resistance against a violent regime; and a creative process of alliance-building, among others. This seminar explores the various intersections of music and violence, and the emerging body of scholarship within ethnomusicology over the last decade dedicated to the subject. We will investigate the role of expressive culture in generating, mediating, contesting, or sustaining political and other social violence, and ask how music enables us to think creatively through the relationship between critical attention, compassion, and commitment.

MUSIC 232 Music and the Imagination 4 Units
Terms offered: Spring 1996
This seminar explores the techniques of imaginative processes through which humans design alternative narratives, histories, futures, and subjectivities. Focusing on the musical and sonic, we examine how the musical imagination relates to other social and cultural processes by which we imagine culture into being. After a brief investigation of the anthropology of the imagination, we turn to the process of imagining the historical past; urban nostalgias and immigrant cultures; transnational and diasporic imaginaries; and the dystopian imagination in music. We consider how and why music participates in the social life of romanticism and fantasy, and how these roles inform conceptions of music’s importance to and place in society.

MUSIC 233 Sound, Technology, and Power 4 Units

Terms offered: Fall 1996
This seminar queries the relation between sound, technology, and power. Taking these three keywords/concepts as broad starting points, we will engage with theoretical approaches and case studies that span the emergence of recording technologies at the turn of the 19th century to algorithmic and robotic systems in the present. We will consider the avenues through which difference is represented, constructed, unsettled, and disturbed in music, films, archives, engineering, and software, among others. We will approach these matters from a variety of perspectives (e.g. Latin American, Chicano, feminist, and Black radical intellectual genealogies) and academic disciplines (science, ethnic, media, cultural, border, and indigenous studies).

MUSIC 234 Ethnographies of Sound Studies 4 Units

Terms offered: Not yet offered
This seminar will explore the trajectories and creative possibilities within sound studies through close reading of groundbreaking and recent ethnographic monographs. Each monograph is paired with theoretical texts from various fields that have informed the analytical and methodological approaches taken by the author. Students will consider the new possibilities and limitations that sound offers us, not only as a scholarly subject but also a medium of creative expression and social critique. Many authors will visit as guests—this will also provide an opportunity to inquire into the process of writing monographs; to learn how to generate generative and generous questions; and to ask how to participate in and create a scholarly community.

MUSIC 245 Music, Sexuality, and Gender 4 Units
Terms offered: Spring 2020, Fall 2000, Fall 1997
This course introduces ethno/musicological approaches to the study of sexuality and gender. We will study scholarly works that consider how music informs and reflects cultural constructions of femininity, masculinity, and non-binary genders, and consider questions of sexuality within and apart from these frameworks. Taking wide-ranging examples that include popular music, folk and indigenous musics, and European art music, we will investigate how gendered and sexualized subjectivities are negotiated through musical practices such as composition, performance, audition, and consumption. Class readings will include ethnomusicological, musicological, anthropological, feminist, Marxist, and queer theory approaches.

MUSIC 258A Sound and Music Computing with CNMAT Technologies 4 Units
Terms offered: Spring 2024, Fall 2022, Fall 2021
Explores the intersection of music and computers using a combination of scientific, technological, and artistic methodologies. Musical concerns within a computational frame are addressed through the acquisition of basic programming skills for the creation and control of digital sound. Will learn core concepts and techniques of computer-based music composition using the Cycling74/MaxMSP programming environment in combination with associated software tools and programming approaches created by the Center for New Music and Audio Technologies. Included will be exposure to the essentials of digital audio signal processing, musical acoustics and psychoacoustics, sound analysis and synthesis. The course is hands-on & taught from the computer lab.

MUSIC 258B Situated Instrument Design for Musical Expression 4 Units
Terms offered: Spring 2024, Spring 2023, Spring 2019
The practice and theory of contextual instrument design for use in musical expression is explored. Students create new instruments and performance environments using a variety of physical interaction paradigms, programming practices, and musical processes emerging from the UC Berkeley Center for New Music and Audio Technologies (CNMAT). Building on the methodologies established in Music 258A, the course develops aesthetic, analytic and technical skills through discussion, empirical study, and collaborative engagement. With a balance of artistic and technical concerns, participants deepen understanding of the creative process, demonstrating the results through class installation and public performance.
