Herbert Wertheim School of Optometry and Vision Science

Overview

The Herbert Wertheim School of Optometry and Vision Science provides professional training in the art and science of vision care. The four-year professional program leads to the degree of Doctor of Optometry, which qualifies graduates to take the national and state board examinations required for licensure.

Doctors of Optometry are health-care professionals. Optometry is a primary health-care profession that encompasses the prevention and remediation of disorders of the vision system through examination, diagnosis, treatment, and/or management of visual efficiency, eye health, and related systemic manifestations. Optometry graduates are trained to diagnose eye diseases, including the ocular manifestations of systemic diseases. The scope of contemporary optometric practice provides practitioners with independent responsibility for nonsurgical pharmaceutical treatment of eye disorders and diseases.

Doctors of Optometry are educated in the sciences of anatomy, chemistry, physics, mathematics, neurology, bacteriology, microbiology, disease processes and detection, pharmacology, behavioral science, social science, public health, and many other related fields. The school provides four years of comprehensive training in vision care aimed at preparing primary eye care providers. The first and second years emphasize courses in the sciences that are foundational to optometry and pre-clinical training in the fundamentals of the optometric examination. Subjects taught include the anatomy and physiology of the eye and visual system; visual perception and sensitivity; optics; oculomotor functions and neurology; binocular vision and space perception; evidence-based optometry; systemic and ocular pharmacology; systemic disease and its ocular manifestations; infant vision; diagnosis and treatment of sensorimotor anomalies; contact lenses; and clinical examination of the visual system. Active responsibility for patient care begins in the spring of the second year. The third year is devoted to advanced training in management and rehabilitation of sensorimotor anomalies, diagnosis and treatment of anterior and posterior segment ocular disease, low vision, advanced procedures in disease diagnosis, and caring for patients in the school’s primary care clinics. The fourth year consists of advanced patient care experience acquired in internal rotations through the school’s specialty clinics in areas such as low vision, pathology, contact lenses, infant vision, community and geriatric health care, and external rotations through eye care centers located in leading hospitals, medical centers, and clinics across the country.

Optometry offers a wide variety of interesting, challenging, and rewarding careers in private practice, in hospitals and other health organizations, and in public service. The education and clinical experience gained at the Herbert Wertheim School of Optometry and Vision Science equip its graduates with the knowledge base and skills necessary to provide the highest level of contemporary vision care and to engage in lifelong learning to ensure they remain at the forefront of their profession.

Optometric Residency Program

A one-year Optometric Residency program is available to Doctors of Optometry seeking advanced optometric training. Areas of clinical study include binocular vision, cornea and contact lens, low vision, ocular disease, pediatrics, community health, and primary care. Successful completion of the program leads to the awarding of the Optometric Residency Certificate.

For further information about the Optometric Residency Program, please email optometry-residency@berkeley.edu.

Undergraduate Program

There is no undergraduate program offered by the Herbert Wertheim School of Optometry and Vision Science.

- Vision Science (p. 21)

OPTOM 10 The Eye and Vision in a Changing Environment 2 Units

Terms offered: Spring 2020, Spring 2019, Spring 2018

Course covers introduction to the basis of common sight-reducing visual disorders with major public health implications for society--e.g., myopia, cataracts, diabetic hypertensive eye disorders, developmental disorders (e.g., lazy eye), and environmentally induced disease and disorders (solar eye burns, cataracts). Major approaches to the prevention, diagnosis, and treatment of common disorders will be addressed in terms of the biological and optical sciences underlying the treatment or prevention. Impact of eye care on society and health and care delivery will be reviewed.

The Eye and Vision in a Changing Environment: Read More [+]
OPTOM C10 The Eye and Vision in a Changing Environment 2 Units
Terms offered: Spring 2010, Spring 2009, Spring 2008
Course covers introduction to the basis of common sight reducing visual disorders with major public health implications for society--e.g., myopia, cataracts, diabetic hypertensive eye disorders, developmental disorders (e.g., lazy eye), and environmentally induced disease and disorders (solar eye burns, cataracts). Major approaches to the prevention, diagnosis, and treatment of common disorders will be addressed in terms of the biological and optical sciences underlying the treatment or prevention. Impact of eye care on society and health and care delivery will be reviewed.

OPTOM 84 Sophomore Seminar 1 or 2 Units
Terms offered: Spring 2011, Spring 2010, Spring 2009
Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.

OPTOM 39B Freshman/Sophomore Seminar 2 - 4 Units
Terms offered: Fall 2010, Fall 2009, Fall 2008
Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester. No prerequisites. Enrollment limits are set by the faculty, but the suggested limit is 25.

OPTOM 98 Directed Group Study 1 Unit
Terms offered: Fall 2023, Fall 2022, Fall 2021
Directed group study for undergraduates interested in the field of optometry.
OPTOM 198 Directed Group Studies 1 - 4 Units
Terms offered: Spring 2011, Spring 2010, Spring 2009
Directed group study for undergraduates interested in the field of Optometry.
Directed Group Studies: Read More [+]
Rules & Requirements
Credit Restrictions: Enrollment is restricted; requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 1-4 hours of directed group study per week
Additional Details
Subject/Course Level: Optometry/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Directed Group Studies: Read Less [-]

OPTOM 200A Clinical Examination of the Visual System 2 Units
Terms offered: Fall 2015, Fall 2014, Fall 2013
First in a 5-semester series designed to cover the theory and technical skills necessary to conduct a routine clinical exam of the eye and visual system. Topics include case history, visual acuities, objective and subjective methods of determining refractive status. Basic examination of anterior ocular structures and the ocular funds; perimetry.
Clinical Examination of the Visual System: Read More [+]
Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week
Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Formerly known as: 100A
Clinical Examination of the Visual System: Read Less [-]

OPTOM 200AL Clinical Examination of the Visual System 3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Fundamentals of the optometric examination. Case history, visual acuities, objective and subjective methods of determining refractive status. Basic examination of anterior ocular structures and the ocular funds; perimetry.
Clinical Examination of the Visual System: Read More [+]
Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 6 hours of laboratory per week
Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Clinical Examination of the Visual System: Read Less [-]

OPTOM 200B Clinical Examination of the Visual System 2 Units
Terms offered: Spring 2016, Spring 2015, Spring 2014
Students will learn the diagnostic elements of the optometric examination, including increased proficiency in case history, entrance testing, refraction, phoropter testing, ocular health testing, case presentation, patient consultation, presbyopia testing, advanced biomicroscopy techniques, and the signs and symptoms related to different refractive errors. Classification and epidemiology of refractive errors, evaluation of accommodative and binocular status.
Clinical Examination of the Visual System: Read More [+]
Rules & Requirements
Prerequisites: 200A
Credit Restrictions: Students will receive no credit for OPTOM 200B after completing OPTOM 100B.
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week
Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Formerly known as: 100B
Clinical Examination of the Visual System: Read Less [-]
OPTOM 200BL Clinical Examination of the Visual System 3 Units
Terms offered: Spring 2021, Spring 2020, Spring 2017
Theory and techniques of the various procedures that are part of a routine optometric examination of the visual system. In this course, students will be taught more diagnostic elements of the optometric examination, including increased proficiency in case history, entrance testing, refraction, phoropter testing, ocular health testing, case presentation, patient consultation, presbyopia testing, advanced biomicroscopy techniques, and the signs and symptoms related to different refractive errors.
Rules & Requirements
Prerequisites: Opt 200A, Opt 200AL
Repeat rules: Course may be repeated for credit with advisor consent.
Hours & Format
Fall and/or spring: 15 weeks - 6 hours of laboratory per week
Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Clinical Examination of the Visual System: Read Less [-]

OPTOM 200C Clinical Examination of the Visual System 2 Units
Terms offered: Fall 2015, Fall 2014, Fall 2013
Case analysis of refractive, accommodative, and binocular anomalies. Pediatric examination techniques. Advanced methods of examining the peripheral ocular fundus; anterior angle evaluation.
Rules & Requirements
Prerequisites: 200B
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week
Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Letter grade.
Formerly known as: 100C
Clinical Examination of the Visual System: Read Less [-]

OPTOM 200D Clinical Examination of the Visual System 2 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015
Modification of the exam sequence for specific patient needs. Evaluation and management of tear film disorders; analysis of vision with cataract. Patient management and professional communications; legal and ethical issues; managed care and optometry.
Rules & Requirements
Prerequisites: 200C, 200CL
Repeat rules: Course may be repeated for credit with advisor consent.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week
Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Letter grade.
Clinical Examination of the Visual System: Read Less [-]
OPTOM 200DL Clinical Examination of the Visual System 2 Units
Terms offered: Spring 2021, Spring 2020, Spring 2017
Modification of the exam sequence for specific patient needs. Evaluation and management of tear film disorders; analysis of vision with cataract. Patient management and professional communications; legal and ethical issues; managed care and optometry.
Clinical Examination of the Visual System: Read More [+]
Rules & Requirements
Prerequisites: Optom 200C, Optom 200CL
Repeat rules: Course may be repeated for credit with advisor consent.
Hours & Format
Fall and/or spring: 15 weeks - 4 hours of laboratory per week
Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Letter grade.
Clinical Examination of the Visual System: Read Less [-]

OPTOM 200E Advanced Procedures in Ocular Disease Diagnosis and Management 2 Units
Terms offered: Fall 2023
Instrumentation, techniques, and principles for examination, diagnosis, and treatment of ocular disease, including advanced laser trabeculoplasty, YAG capsulotomy, injections, suturing, dilation & irrigation, and peri-operative cataract care.
Advanced Procedures in Ocular Disease Diagnosis and Management: Read More [+]
Objectives & Outcomes
Course Objectives: To build on clinical skills and knowledge gained from previous courses that will enable interns to provide full scope contemporary optometric care. Lectures are used to present a context for the procedures and allow students to see how the skills can be applied in the clinic.
Rules & Requirements
Prerequisites: OPTOM 200A, 200AL, 200B, 200BL, 200C, 200CL, 200D, 200DL
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture and 2 hours of laboratory per week
Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructors: Whiteside, Shabazian, Kunai
Advanced Procedures in Ocular Disease Diagnosis and Management: Read Less [-]

OPTOM 200F Advanced Procedures in Ocular Disease Diagnosis and Management 2 Units
Terms offered: Not yet offered
Instrumentation, techniques, and principles for examination, diagnosis, and treatment of ocular disease, including ophthalmic laser instrumentation, surgical laser procedures, minor surgical techniques, pre- and post-operative considerations, thresholds for making appropriate surgical referrals, informed consent, and safety considerations.
Advanced Procedures in Ocular Disease Diagnosis and Management: Read More [+]
Rules & Requirements
Prerequisites: OPTOM 200E, OPTOM 200D, OPTOM 200C, OPTOM 200B, OPTOM 200A OPTOM 200DL, OPTOM 200CL, OPTOM 200BL, OPTOM 200AL,
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture and 2 hours of laboratory per week
Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructors: Whiteside, Shabazian, Kunai
Advanced Procedures in Ocular Disease Diagnosis and Management: Read Less [-]

OPTOM 203A Geometric Optics 4 Units
Terms offered: Not yet offered
Geometrical methods applied to the optics of lenses, mirrors, and prisms. Thin lens eye models, magnification, astigmatism, prism properties of lenses, thick lenses.
Geometric Optics: Read More [+]
Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture, 1 hour of discussion, and 2 hours of laboratory per week
Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Formerly known as: Vision Science 203A
Instructors: Whiteside, Kanai, Shabazian
Geometric Optics: Read Less [-]
OPTOM 203B Optical System and Physical Optics 4 Units
Terms offered: Not yet offered
Principles of optical systems, principles and clinical applications of apertures and stops, aberrations and optical instruments. Optics of the eye. Selected topics in physical optics, diffraction, interference, polarization.
Optical System and Physical Optics: Read More [+]
Objectives & Outcomes
Course Objectives: to be able to apply basic principles to design systems or solve problems
to understand basic principles underlying optical systems and physical optics
Rules & Requirements
Prerequisites: 203A
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture, 1 hour of discussion, and 2 hours of laboratory per week
Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Formerly known as: Vision Science 203B
Optical System and Physical Optics: Read Less [-]

OPTOM 205 Visual Perception Sensitivity 4 Units
Terms offered: Not yet offered
This course will provide a fundamental understanding of visual processing, so students will be able to (1) understand the limitations of the clinical procedures in an eye exam; (2) address patients' complaints and symptoms. Content covered includes psychophysical basis for clinical tests in acuity, perimetry, and color vision. The visual stimulus and photometry. Visual receptors, psychophysical methods and visual threshold, light sensitivity, contrast sensitivity, light and dark adaptation, temporal and spatial properties of visual function, color vision, visual illusion, how visual perception changes with age and disease, and the basis for advanced diagnostic procedures.
Visual Perception Sensitivity: Read More [+]
Rules & Requirements
Credit Restrictions: Students will receive no credit for OPTOM 205 after completing VIS SCI 104.
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 3.5 hours of lecture, 1 hour of discussion, and 2 hours of laboratory per week
Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Formerly known as: Vision Science 205
Visual Perception Sensitivity: Read Less [-]
OPTOM 206A Anatomy and Physiology of the Eye 2 Units

Terms offered: Not yet offered
The course begins with an overview of the gross anatomy and physiology of the eye, followed by a brief introduction of basic cellular biology and genetics. Subsequent lectures mainly focus on anterior parts of the eyeball to explore the anatomy, physiological function and related eye diseases in detail.

Anatomy and Physiology of the Eye:

Objectives & Outcomes

Course Objectives: To teach the fundamental knowledge about Anatomy and Physiology of the Eye with advanced molecular, cellular and genetic information that are related to ocular diseases in clinic diagnosis/treatment.

Rules & Requirements

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 7.5 weeks - 4 hours of lecture per week

Additional Details

Subject/Course Level: Optometry/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Formerly known as: Vision Science 206A

Anatomy and Physiology of the Eye: Read Less [-]

OPTOM 206B Anatomy and Physiology of the Eye and Visual System 3 Units

Terms offered: Not yet offered
This course emphasizes learning the terminology, definitions and structural relationships of the bones, muscles, adnexa, vasculature and nervous tissue of the eye and orbit. Relevant clinical case examples will be used to highlight the application of basic anatomy and physiology for diagnosing and managing diseases and disorders of the eye and visual system. Topics covered include structure and function of the tissues of the eye, ocular appendages, vasculature, cranial nerves, and the central visual pathways. Basic concepts of physiological, neurological, embryological, and immunological processes as they relate to the eye and vision will be covered.

Anatomy and Physiology of the Eye and Visual System:

Objectives & Outcomes

Course Objectives: To teach the fundamental knowledge about Anatomy and Physiology of the Eye with advanced molecular, cellular and genetic information that are related to ocular diseases in clinic diagnosis/treatment.

Rules & Requirements

Prerequisites: OPTOM 206A
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture, 0.5 hours of discussion, and 1 hour of laboratory per week

Additional Details

Subject/Course Level: Optometry/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Formerly known as: Vision Science 206B

Anatomy and Physiology of the Eye and Visual System: Read Less [-]
**OPTOM 206D Neuroanatomy and Neurophysiology of the Eye and Visual System 2 Units**

Terms offered: Not yet offered

This course focuses on structure and function of the neurosensory retina, photoreceptors, RPE including blood supply. Current concepts of etiology and management of major retinal conditions. Overview of diagnostic techniques in retinal imaging, electrophysiologic testing and new genetic approaches. Structure and function of the early visual pathway, including retinal ganglion cells, optic nerves, lateral geniculate nucleus and visual cortex. Pupillary responses. Specialization in the visual cortex. Neuroanatomy and Neurophysiology of the Eye and Visual System: Read More [+]

**Rules & Requirements**

**Prerequisites:** 206A (must be taken concurrently)

**Repeat rules:** Course may be repeated for credit without restriction.

**Hours & Format**

Fall and/or spring: 7.5 weeks - 4 hours of lecture per week

**Additional Details**

**Subject/Course Level:** Optometry/Graduate

**Grading:** Offered for satisfactory/unsatisfactory grade only.

**Formerly known as:** Vision Science 206D

Neuroanatomy and Neurophysiology of the Eye and Visual System: Read Less [-]

**OPTOM 213 Evidence Based Optometry 1**

Unit

Terms offered: Fall 2015, Fall 2014, Spring 2014

Basic concepts in evidence based optometry including various clinical study designs, potential sources of bias in each design as well as development of a systematic approach to evaluate strength of evidence from published studies, to identify potential limitations and develop appreciation for the importance of evidence based practice as a practice philosophy.

Evidence Based Optometry: Read More [+]

**Rules & Requirements**

**Repeat rules:** Course may be repeated for credit without restriction.

**Hours & Format**

Fall and/or spring: 15 weeks - 1 hour of lecture per week

**Additional Details**

**Subject/Course Level:** Optometry/Graduate

**Grading:** Letter grade.

**Instructor:** Liu

Evidence Based Optometry: Read Less [-]

**OPTOM 217 Oculomotor Functions and Neurology 2 Units**

Terms offered: Not yet offered

Neuro-anatomical pathways for the control of eye position and movement, gaze holding, image stabilization, and tracking eye movement systems, oculomotor signs of disorders of the central nervous system (palsies, nystagmus, ophthalmoplegia, cog-wheel pursuits, saccadic dysmetria), the near visual-motor response and the synergistic coupling of accommodation and convergence, binocular misalignment (heterophoria and fixation disparity), and presbyopia.

Oculomotor Functions and Neurology: Read More [+]

**Rules & Requirements**

**Prerequisites:** OPTOM 203A

**Repeat rules:** Course may be repeated for credit without restriction.

**Hours & Format**

Fall and/or spring: 7.5 weeks - 3 hours of lecture and 2 hours of laboratory per week

**Additional Details**

**Subject/Course Level:** Optometry/Graduate

**Grading:** Offered for satisfactory/unsatisfactory grade only.

**Instructor:** Otero-Milan

**Formerly known as:** Vision Science 217

Oculomotor Functions and Neurology: Read Less [-]
OPTOM 219 Binocular Vision and Space Perception 2 Units
Terms offered: Not yet offered
The goals of this course are to provide mastery of the fundamentals of binocular vision and to introduce the role of binocular vision in optometric primary care. Topics covered include: perception of space, direction and distance, binocular retinal correspondence, horopters, differential magnification effects and anomalies of binocular vision development, sensory vision, local stereopsis, static and dynamic stereopsis, binocular depth cues.
Binocular Vision and Space Perception: Read More [+]

Rules & Requirements
Prerequisites: OPTOM 203A
Repeat rules: Course may be repeated for credit with instructor consent.

Hours & Format
Fall and/or spring: 7.5 weeks - 3 hours of lecture and 2 hours of laboratory per week

Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Cooper
Formerly known as: Vision Science 219
Binocular Vision and Space Perception: Read Less [-]

OPTOM 222A Optics of Ophthalmic Lenses 4 Units
Terms offered: Spring 2021, Spring 2020, Spring 2016
Optical and physical characteristics of ophthalmic lenses, to include spheric and aspherical surface of single and multifocal lens designs, and ophthalmic prisms. Lens power measurement methods, lens thickness power relationships and considerations in designing prescription eyewear. Characteristics of absorptive lenses, ophthalmic coatings, lens materials, and their role in ocular protection.
Optics of Ophthalmic Lenses: Read More [+]

Objectives & Outcomes
Course Objectives:
Develop an understanding of ophthalmic dispensing principles and its proper clinical application.
Facilitate successful completion of Ophthalmic Optics related questions on the clinical and written NBO exam
To facilitate the appreciation for the field of ophthalmic optics pertaining to lens materials properties and the optics and properties of ophthalmic lenses.
To have in concept, an understanding of the overall process by which ophthalmic prescriptions are designed & fabricated.
To understand the proper utilization of ophthalmic materials, ophthalmic lenses and its design; its relationship to meeting the patient’s visual needs in an Optometric practice.

Rules & Requirements
Prerequisites: Vision Science 203A

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of laboratory per week

Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Optics of Ophthalmic Lenses: Read Less [-]
OPTOM 222B Advanced Clinical Optics 2
Units
Terms offered: Fall 2015, Spring 2015, Fall 2014
Ophthalmic lens aberrations and minimization. Ophthalmic lens designs
relating to anisometropia, aniseikonia, and high refractive errors. Optics
of the eye, contact lens optics, and optical principles of low vision aids.
Environmental vision and related ophthalmic standards.
Advanced Clinical Optics: Read More [+]
Rules & Requirements
Prerequisites: 222A

OPTOM 226A Systemic Pharmacology 2.5
Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Basic pharmacology, terminology, and concepts (both pharmacodynamic
and pharmacokinetic) and pharmacotheraphy of medical conditions
commonly encountered in clinical optometric practice (including
cardiovascular disease, respiratory disease, diabetes, infection and
inflammatory conditions, as well as central nervous system disorders).
Systemic Pharmacology: Read More [+]
Rules & Requirements
Prerequisites: Vision Science 206D

OPTOM 226B Ocular Pharmacology 2.5 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015
Basic pharmacology, terminology, and concepts (both pharmacodynamic
and pharmacokinetic) as applied to the eye and ophthalmic drugs, clinical
prescribing issues including formulation, dosing and prescribing, and
pharmacotherapy of anti-inflammatory, centrally acting, hormonal and
other "specialist" systemic drugs.
Ocular Pharmacology: Read More [+]
Rules & Requirements
Prerequisites: 222A

OPTOM 230A Graduate General Clinical
Practice 2 - 6 Units
Terms offered: Fall 2015, Fall 2014, Fall 2013
General optometric practice for four hours per week per credit hour,
including optometric examination, dispensing, consultation, and
subsequent vision care of patients, performed independently by graduate
student clinicians.
Graduate General Clinical Practice: Read More [+]
Rules & Requirements
Prerequisites: O.D. degree
Repeat rules: Course may be repeated for credit without restriction.

Instructor: Wildsoet

Ocular Pharmacology: Read Less [-]
OPTOM 230B Graduate General Clinical Practice 2 - 6 Units
Terms offered: Spring 2023, Spring 2017, Spring 2016
General optometric practice for four hours per week per credit hour, including optometric examination, dispensing, consultation, and subsequent vision care of patients, performed independently by graduate student clinicians.
Graduate General Clinical Practice: Read More [+]
Rules & Requirements
Prerequisites: O.D. degree
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 0 hours of clinic per week
Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Letter grade.
Graduate General Clinical Practice: Read Less [-]

OPTOM 231B Graduate Specialty Clinics 2 - 8 Units
Terms offered: Spring 2024, Spring 2023, Spring 2017
Clinical examination of patients in designated specialty clinics. More than one clinical specialty may be taken simultaneously.
Graduate Specialty Clinics: Read More [+]
Rules & Requirements
Prerequisites: O.D. degree
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 0 hours of clinic per week

Grading: Letter grade.
Graduate Specialty Clinics: Read Less [-]

OPTOM 236A Systemic Disease and its Ocular Manifestations 3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
The pathophysiology, pharmacotherapy, and clinical management of systemic and ocular diseases will be discussed through a combination of lecture and problem-based learning approaches. Disease processes will be emphasized and include cellular injury and repair, inflammation, infection, degeneration, and neoplasia. Neurologic, cardiovascular, endocrine, pulmonary, and congenital disease and their relative ocular manifestations will be presented.
Systemic Disease and its Ocular Manifestations: Read More [+]
Rules & Requirements
Prerequisites: 200D. 236A is a prerequisite for 236B
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 2 hours of discussion per week
Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Letter grade.
Instructor: Harvey
Systemic Disease and its Ocular Manifestations: Read Less [-]
OPTOM 236B Systemic Disease and its Ocular Manifestations 3 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015
The pathophysiology, pharmacotherapy, and clinical management of systemic and ocular diseases will be discussed through a combination of lecture and problem-based learning approaches. Disease processes will be emphasized and include cellular injury and repair, inflammation, infection, degeneration, and neoplasia. Neurologic, cardiovascular, endocrine, pulmonary, and congenital disease and their relative ocular manifestations will be presented.

Systemic Disease and its Ocular Manifestations: Read More [+]

Rules & Requirements

OPTOM 240 Diagnosis and Treatment of Sensory/Motor Anomalies 3 Units
Terms offered: Spring 2021, Spring 2020, Spring 2017
Diagnosis and treatment of heterophoria, accommodative, vergence and oculomotor anomalies including sensory anomalies and amblyopia. Rationale and methods for treatment with lenses, prism, occlusion, and vision training. Design and implementation of treatment programs.

Diagnosis and Treatment of Sensory/Motor Anomalies: Read More [+]

Rules & Requirements

Prerequisites: Vision Science 217 and 219

Hours & Format
Fall and/or spring: 15 weeks - 2.5 hours of lecture and 16 hours of laboratory per week

Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Letter grade.

Formerly known as: 140

Diagnosis and Treatment of Sensory/Motor Anomalies: Read Less [-]

OPTOM 241 Advanced Management and Rehabilitation of Sensory/Motor Anomalies 3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
Advanced diagnosis, prognosis and treatment of strabismus, neurologic oculomotor disorders, amblyopia, and other associated sensory anomalies. Assessment and management of developmental and acquired visual perceptual disorders in relationship to learning disabilities. Design and implementation of treatment programs.

Advanced Management and Rehabilitation of Sensory/Motor Anomalies: Read More [+]

Rules & Requirements

Prerequisites: 240

Hours & Format
Fall and/or spring: 15 weeks - 2.5 hours of lecture and 16 hours of laboratory per week

Additional Details
Subject/Course Level: Optometry/Graduate
Grading: Letter grade.

Formerly known as: 141

Advanced Management and Rehabilitation of Sensory/Motor Anomalies: Read Less [-]

OPTOM 246 Diagnosis and Treatment of Anterior Segment Ocular Disease 4 Units
Terms offered: Fall 2015, Fall 2014, Fall 2013
This course series consists of the pathophysiology, pharmacotherapy, and clinical management of systemic and ocular diseases through a combination of lecture and problem-based learning approaches. Disease processes will be emphasized and include cellular injury and repair, inflammation, infection, degeneration, and neoplasia. Neurologic, cardiovascular, endocrine, pulmonary, and congenital disease, and their relative ocular manifestations will be presented. The basic principles of pharmacology will be followed by overviews of drugs used to treat diseases of each system. The role of the optometrist in the health care system will be emphasized.

OPTOM 271A Exploring principles of practice management and modes of optometric practice 0.5 Units
Terms offered: Fall 2023
Discussion of the numerous opportunities and modes of practice in optometry. Discussion of business and management principles related to optometry, as well as basic financial literacy. Topics will include personal financial management, budgeting, and investing in order to develop financial stability upon graduation and maintain it in the future. Additional discussion will include the importance of managing personnel and patients, practicing cultural humility, understanding issues related to diversity and equity, as well as the importance of providing sustainable health solutions and promoting a more equitable healthcare environment. Exploring principles of practice management and modes of optometric practice: Read More [+]

Objectives & Outcomes

Course Objectives: To establish the foundations of financial literacy and financial stability.
To understand the importance and significance of diversity, equity, and inclusion, as well as social determinants in healthcare.
To understand the importance of human resource management in healthcare and how it is critical to success and patient care.
To understand the various modes of practice in optometry and explore the numerous pathways of an optometric career in the healthcare system.

Rules & Requirements

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 0.25 hours of lecture and 0.25 hours of discussion per week

Additional Details

Subject/Course Level: Optometry/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Wang

Exploring principles of practice management and modes of optometric practice: Read Less [-]

OPTOM 271B Exploring principles of practice management and modes of optometric practice 0.5 Units
Terms offered: Spring 2024
This course is the second in a two-part series designed to evaluate the numerous opportunities and modes of practice in optometry. Principles of business and management will be introduced, as well as basic financial literacy. Topics covered will include management of personal finances, budgeting, and investing. Students will be introduced to the various opportunities available to optometrists and different modes of practice, as well as the importance of navigating business relationships and patient-provider interactions with an appreciation for cultural differences. Emphasis will be placed on raising the awareness of diversity and equity issues that are key to providing sustainable health solutions and an equitable healthcare environment. Exploring principles of practice management and modes of optometric practice: Read More [+]

OPTOM 490A Optometric Spanish - Beginner Level I 1 Unit
Terms offered: Prior to 2007
This course provides an introduction to Spanish in its uses in a clinical optometry setting with the Spanish-speaking patient. Basic vocabulary and grammar acquisition and skill building exercises will help the practitioner perform conversations and procedures in simple but accurate and clear communications. The sounds and structures of Spanish, including the present tense and some other verbs will be covered. All materials will be taught and practiced in relation to their practical application in a clinical setting.
Optometric Spanish - Beginner Level I: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture per week
Summer: 8 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Optometry/Other professional
Grading: Offered for satisfactory/unsatisfactory grade only.
Optometric Spanish - Beginner Level I: Read Less [-]

OPTOM 490B Optometric Spanish - Intermediate Level II 1 Unit
Terms offered: Summer 2008 10 Week Session
This course provides vocabulary and grammar acquisition and skill building for the intermediate to advanced Spanish student who works with Spanish-speaking patients in the field of optometry. Emphasis is on practical, hands-on application of the materials: patient interviewing, doing various aspects of the eye exam, taking a history, and giving diagnostic, treatment, and follow-through information to the patient, with appropriate cultural sensitivity, taking into consideration the socio-cultural background of the patient. The goal is accurate and sophisticated communication.
Optometric Spanish - Intermediate Level II: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture per week
Summer: 8 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Optometry/Other professional
Grading: Offered for satisfactory/unsatisfactory grade only.
Optometric Spanish - Intermediate Level II: Read Less [-]

Seminar in Vision Science: Read Less [-]

VIS SCI 206C Anatomy and Physiology of the Eye and Visual System 2 Units
Terms offered: Spring 2021, Spring 2020, Spring 2019
Problem-based learning approach using clinical case examples.
Continuation of 206A-206B.
Rules & Requirements
Prerequisites: 206A-206B
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 7.5 weeks - 4 hours of seminar per week
Additional Details
Subject/Course Level: Vision Science/Graduate
Grading: Letter grade.
Formerly known as: 106C
Anatomy and Physiology of the Eye and Visual System: Read Less [-]

VIS SCI 215 Visual System Development 2
Units
Terms offered: Fall 2015, Fall 2014, Fall 2013
Rules & Requirements
Prerequisites: 206B
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week
Additional Details
Subject/Course Level: Vision Science/Graduate
Grading: Letter grade.
Formerly known as: 115
Visual System Development: Read Less [-]
VIS SCI 230 Ethics in Scientific Research 2 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
This seminar will examine a range of ethical issues that arise in the process of doing science. Beginning with the philosophical and social foundations, we will consider the pathogenesis of fraud, statistics and deception, the ethics of authorship and publication, research with human subjects, the use of animals, the definition(s) of misconduct and the difference between misconduct and questionable research practices, the relationship between industry and science, and finally, the responsibilities and obligations of the scientist in society.

Ethics in Scientific Research: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 30 hours of seminar per week

Additional Details
Subject/Course Level: Vision Science/Graduate
Grading: Letter grade.

Ethics in Scientific Research: Read Less [-]

VIS SCI 260B Introduction to Ocular Biology 3 Units
Terms offered: Fall 2023, Fall 2020, Fall 2019
The course will provide an overview of eye development, anterior eye anatomy and physiology and ocular disease. The course will be a combination of didactic lectures and problem-based learning. This is one of the four courses that form the Vision Science core curriculum.

Introduction to Ocular Biology: Read More [+]

Rules & Requirements
Repeat rules: Course may be repeated for credit with instructor consent.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Vision Science/Graduate
Grading: Letter grade.
Instructor: Suzanne Fleiszig

Introduction to Ocular Biology: Read Less [-]
**VIS SCI 260D Seeing in Time, Space and Color 3 Units**

Terms offered: Spring 2024, Spring 2023, Spring 2022

The course will provide an overview of how we see in time (temporal signal processing, eye motion, motion detection), space (stereo vision, depth perception), and color as well as the anatomical and physiological factors that facilitate these capabilities. The course will be series of didactic lectures. This is one of the four courses that form the Vision Science core curriculum

**Rules & Requirements**

- **Repeat rules**: Course may be repeated for credit with instructor consent.

**Hours & Format**

- **Fall and/or spring**: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

**Additional Details**

- **Subject/Course Level**: Vision Science/Graduate
- **Grading**: Letter grade.
- **Instructor**: Martin Banks

See a full page of the course description.

**VIS SCI 262 Visual Cognitive Neuroscience 3 Units**

Terms offered: Fall 2021, Fall 2018, Spring 2016

The course will provide an overview of visual cognitive neuroscience, drawing from neuroanatomy, neurophysiology in humans and animal models, psychophysics, neuroimaging, neuropsychology, and computational models of vision and cognition. Topics will include basic anatomy and physiology of the mammalian visual system, motion perception and processing, depth perception and representation of visual space, brightness and color, object and face recognition, visual attention, developmental and adult plasticity, perceptual learning, multisensory integration, and visual awareness.

**Rules & Requirements**

- **Prerequisites**: Consent of instructor
- **Repeat rules**: Course may be repeated for credit without restriction.

**Hours & Format**

- **Fall and/or spring**: 15 weeks - 2 hours of lecture per week

**Additional Details**

- **Subject/Course Level**: Vision Science/Graduate
- **Grading**: Letter grade.
- **Instructor**: Silver

See a full page of the course description.

**VIS SCI 265 Neural Computation 3 Units**

Terms offered: Fall 2022, Fall 2020, Fall 2018

This course provides an introduction to the theory of neural computation. The goal is to familiarize students with the major theoretical frameworks and models used in neuroscience and psychology, and to provide hands-on experience in using these models. Topics include neural network models, supervised and unsupervised learning rules, associative memory models, probabilistic/graphical models, and models of neural coding in the brain.

**Rules & Requirements**

- **Prerequisites**: Calculus, differential equations, basic probability and statistics, linear algebra, and familiarity with high level programming languages such as Matlab

**Hours & Format**

- **Fall and/or spring**: 15 weeks - 3 hours of lecture per week

**Additional Details**

- **Subject/Course Level**: Vision Science/Graduate
- **Grading**: Letter grade.
- **Instructor**: Olshausen

See a full page of the course description.

**VIS SCI C265 Neural Computation 3 Units**

Terms offered: Prior to 2007

This course provides an introduction to the theory of neural computation. The goal is to familiarize students with the major theoretical frameworks and models used in neuroscience and psychology, and to provide hands-on experience in using these models. Topics include neural network models, supervised and unsupervised learning rules, associative memory models, probabilistic/graphical models, and models of neural coding in the brain.

**Rules & Requirements**

- **Prerequisites**: Calculus, differential equations, basic probability and statistics, linear algebra, and familiarity with high level programming languages such as Matlab

**Hours & Format**

- **Fall and/or spring**: 15 weeks - 3 hours of lecture per week

**Additional Details**

- **Subject/Course Level**: Vision Science/Graduate
- **Grading**: Letter grade.
- **Instructor**: Olshausen

**Also listed as**: NEUROSC C265

See a full page of the course description.
VIS SCI C280 Computer Vision 3 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022

Rules & Requirements
Prerequisites: MATH 1A; MATH 1B; MATH 53; and MATH 54 (Knowledge of linear algebra and calculus)

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Vision Science/Graduate
Grading: Letter grade.
Instructor: Malik
Also listed as: COMPSCI C280

VIS SCI 298 Group Studies, Seminars, or Group Research 1 - 6 Units
Terms offered: Spring 2024, Fall 2023, Spring 2023
Group studies of selected topics. Advanced studies in various subjects through special seminars on topics to be selected each year, informal groups studying special problems, group participation in experimental problems and analysis.

Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2-6 hours of lecture per week

Additional Details
Subject/Course Level: Vision Science/Graduate
Grading: Letter grade.

VIS SCI C299 Research in Vision Science 1 - 12 Units
Terms offered: Summer 2024 Second 6 Week Session, Spring 2024, Fall 2023
Research.

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Summer:
6 weeks - 1-16 hours of independent study per week
8 weeks - 1-12 hours of independent study per week

Additional Details
Subject/Course Level: Vision Science/Graduate
Grading: Letter grade.

VIS SCI 300 Teaching Methods in Vision Science 1 Unit
Terms offered: Spring 2024, Spring 2023, Fall 2022
Instruction in teaching methods and materials, in vision science and optometry; practice teaching in classrooms and laboratory.

Rules & Requirements
Prerequisites: Graduate standing in vision science
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture per week

Additional Details
Subject/Course Level: Vision Science/Professional course for teachers or prospective teachers
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Silver

Group Studies, Seminars, or Group Research: Read Less [-]
VIS SCI 375A Teaching Methods in Vision Science, I 1 Unit
Terms offered: Fall 2023
Instruction in teaching methods and materials in vision science and optometry; practice teaching in classroom and laboratory. Lectures, discussion and outside work related to learning effective teaching styles, developing optimal teaching environments, accessing teaching resources, and fostering professional development.
Teaching Methods in Vision Science, I: Read More [+]

Rules & Requirements
Prerequisites: This course is restricted to student in the Vision Science graduate program
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Vision Science/Professional course for teachers or prospective teachers
Grading: Offered for satisfactory/unsatisfactory grade only.
Teaching Methods in Vision Science, I: Read Less [-]

VIS SCI 375B Teaching Methods in Vision Science, II 1 Unit
Terms offered: Not yet offered
Instruction in teaching methods and materials in vision science and optometry; practice on teaching in the classroom and laboratory. Lectures, discussion and outside work related to teaching methods and assessment of student learning, including lecture-based, problem-based, active, and inquiry-based learning. Instruction on student engagement and effective communication.
Teaching Methods in Vision Science, II: Read More [+]

Rules & Requirements
Prerequisites: This course is restricted to students in the Vision Science graduate program
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Vision Science/Professional course for teachers or prospective teachers
Grading: Offered for satisfactory/unsatisfactory grade only.
Teaching Methods in Vision Science, II: Read Less [-]

VIS SCI 601 Individual Study for Master's Students 1 - 6 Units
Terms offered: Spring 2021, Spring 2020, Spring 2019
Individual study for the comprehensive requirements in consultation with the adviser in vision science.
Individual Study for Master's Students: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor
Credit Restrictions: Course does not satisfy unit or residence requirements for master's degree.

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week

Additional Details
Subject/Course Level: Vision Science/Graduate examination preparation
Grading: Offered for satisfactory/unsatisfactory grade only.
Individual Study for Master's Students: Read Less [-]

VIS SCI 602 Individual Study for Doctoral Students 1 - 6 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
Individual study in consultation with the adviser in vision science, intended to provide an opportunity for qualified students to prepare themselves for the various examinations required for the Ph. D.
Individual Study for Doctoral Students: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor
Credit Restrictions: Course does not satisfy unit or residence requirements.

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week

Additional Details
Subject/Course Level: Vision Science/Graduate examination preparation
Grading: Offered for satisfactory/unsatisfactory grade only.
Individual Study for Doctoral Students: Read Less [-]
