Overview
The Department of Plant and Microbial Biology consists of the Division of Plant Biology and the Division of Microbial Biology. Programs at both the undergraduate and graduate levels have been designed to offer students maximum flexibility in defining their own areas of interest. In addition to departmental resources that are available in Koshland Hall, the facilities of the College of Natural Resources Biological Imaging Facility and the United States Department of Agriculture Plant Gene Expression Center are available for the programs of the department.

The Division of Plant Biology
The Division of Plant Biology program emphasizes basic research and its application to plants and promotes the design of plant biotechnologies. With an increasing awareness of environmental problems, global changes, and emerging food needs, plants are a focal point for new research initiatives and educational training programs. Understanding the biology of plants, their development, their responses to the environment, and the impact of human activities on the plant biosphere are many of the challenges that will continue to fuel the expansion of plant biology research well into the twenty-first century.

The Division of Microbial Biology
The Division of Microbial Biology was established within the department to provide a focus for microbial biology at UC Berkeley. There is a growing awareness that microbes and microbial activities are essential to maintaining a high quality of life for all eukaryotes. Moreover, understanding the microbial world is necessary if we are to comprehend the global ecosystem, evolutionary history, and diversity of life on earth. The twenty-first century will bring a new understanding of the workings of the global ecosystem and a wealth of new technologies derived from the microbial world. The new microbial biology research programs are designed to meet this challenge.

Undergraduate Programs
Genetics and Plant Biology (http://guide.berkeley.edu/undergraduate/degree-programs/genetics-plant-biology/): BS
Microbial Biology (http://guide.berkeley.edu/undergraduate/degree-programs/microbial-biology/): BS

Graduate Programs
The department and affiliated graduate group offer the following graduate degrees:
Microbiology (http://guide.berkeley.edu/graduate/degree-programs/microbiology/): PhD
Plant Biology (http://guide.berkeley.edu/graduate/degree-programs/plant-biology/): PhD

Plant and Microbial Biology

PLANTBI 200C Plant Diversity and Evolution
1.5 Unit
Terms offered: Fall 2022, Fall 2021, Fall 2020
This course will introduce the students to the diversity of plant form and function and provide them with a basic understanding of the tools and techniques used to study plant diversification and evolution. Molecular and morphological data will be discussed and plant diversity will be introduced at molecular, population, organismal, and ecological levels.

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 5 weeks - 4 hours of lecture and 2 hours of discussion per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Letter grade.
Instructor: Blackman

PLANTBI 200D Plant Cell Biology 1.5 Unit
Terms offered: Spring 2023, Spring 2022, Fall 2020
The course will describe the conceptual framework of plant cell biology followed by in-depth discussion of several active areas of research including cell wall biology, membrane transport, cellular trafficking, and cell signaling.

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 5 weeks - 4 hours of lecture and 2 hours of discussion per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Letter grade.
Instructor: Luan

PLANTBI 200E Plant Biochemistry 1.5 Unit
Terms offered: Fall 2021, Spring 2021, Fall 2019
The aim of this course is to augment the student's knowledge of key plant-specific (or particularly relevant) biochemical processes focusing on the underlying experiments used to deduce key cycles coupled with current areas of exploration and debate surrounding a given topic area. In addition, this section will broaden and deepen the student's knowledge of biochemistry in general including basic enzyme kinetics, assessment of enzymatic (biochemical) function, and modes of regulation.

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 5 weeks - 4 hours of lecture and 2 hours of discussion per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Letter grade.
Instructor: Scheller

PLANTBI 200F Plant-Environment Interactions 1.5 Unit
Terms offered: Spring 2023, Spring 2022, Spring 2021
Students will be provided with both the historical framework and current topics in the molecular mechanisms underlying plant dynamic responses to external signals and stresses.

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 5 weeks - 4 hours of lecture and 2 hours of discussion per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Letter grade.
Instructor: Harmon
PLANTBI 201 Faculty Research Review 2
Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
Presentation and discussion of faculty research in the areas of plant and microbial biology. Faculty speakers review recent advances in their area of expertise and present an outlook of current research activities in their laboratories. The format of the class is designed to stimulate a dialogue between instructor and students in the course of each presentation.
Faculty Research Review: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Faculty Research Review: Read Less [-]

PLANTBI 202 Faculty Research Review 2
Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
Presentation and discussion of faculty research in the area of microbial biology. Faculty speakers review recent advances in their area of expertise and present an outlook of current research activities in their laboratories. The format of the class is designed to stimulate a dialogue between instructor and students in the course of each presentation.
Faculty Research Review: Read More [+]

Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Faculty Research Review: Read Less [-]

PLANTBI 205A Introduction to Research 2 - 12 Units
Terms offered: Fall 2022, Fall 2020, Fall 2019
Closely supervised experimental work under the direction of an individual faculty member; an introduction to experimental methods and research approaches in particular areas of plant and microbial biology.
Introduction to Research: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 2-12 hours of independent study per week
Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Letter grade. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.
Introduction to Research: Read Less [-]

PLANTBI 205B Introduction to Research 2 - 12 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
Closely supervised experimental work under the direction of an individual faculty member; an introduction to experimental methods and research approaches in particular areas of plant and microbial biology.
Introduction to Research: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 2-12 hours of independent study per week
Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Letter grade. This is part two of a year long series course. Upon completion, the final grade will be applied to both parts of the series.
Introduction to Research: Read Less [-]
PLANTBI 210 Scientific Reasoning and Logic 1 Unit
Terms offered: Spring 2023, Fall 2021, Fall 2020
The objectives of this class are to teach students to critically read and interpret scientific papers. Students will read and discuss strongly and poorly reasoned papers. At the end of the class the student should understand the logic and reasoning which make a paper strong, often classic, contribution.

Scientific Reasoning and Logic: Read More [+]

Rules & Format
Fall and/or spring: 15 weeks - 1 hour of lecture per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Letter grade.
Instructor: Quail

PLANTBI C216 Microbial Diversity Workshop 1 Unit
Terms offered: Fall 2022, Fall 2021, Fall 2020
This workshop for graduate students will parallel C116, Microbial Diversity, which should be taken concurrently. Emphasis in the workshop will be on review of research literature and formulation of paper pertinent to research in microbial diversity.

Microbial Diversity Workshop: Read More [+]

Rules & Requirements
Prerequisites: Graduate standing; C112 or consent of instructor and organic chemistry (may be taken concurrently)

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of workshop and 1 hour of discussion per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Letter grade.
Instructor: Coates

Formerly known as: Molecular and Cell Biology C216, Plant and Microbial Biology C216
Also listed as: MCELLBI C216

Microbial Diversity Workshop: Read Less [-]

PLANTBI 220A Microbial Genetics 1.5 Unit
Terms offered: Fall 2022, Fall 2021, Fall 2020
The students will learn fundamental principles and advanced techniques in microbial genetics. The use of genetics in deducing biochemical pathways, protein interactions, and signal transduction pathways will be explored through reading and discussion of current and classic papers from the primary literature. Experimental design and interpretation will be the focus of problem sets solved in student-coordinated sessions.

Microbial Genetics: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 5 weeks - 4 hours of lecture and 2 hours of discussion per week

Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Letter grade.
Instructor: Taga

PLANTBI 220B Genomics and Computational Biology 1.5 Unit
Terms offered: Spring 2023, Fall 2022, Spring 2022
Principles of computational and genomic biology. Covers evolutionary, algorithmic, and statistical foundations of sequence analysis, allowing students to understand concepts underlying modern computational methods. Practical applications will be pursued in student-coordinated sessions. Combined lecture with 200B.

PLANTBI 222 Biochemistry of Biofuels: Concepts and Foundations 1 Unit
Terms offered: Spring 2015, Spring 2014, Spring 2013
This course offers a consideration of genes, enzymes, metabolic pathways and biochemical processes leading to the generation of hydrogen, bio-oils, ethanol, and other biofuels. Discussion of biochemistry is extended to cover product yields and techno-economic analyses of commercial viability of the various biofuel products. Lectures are based on historical and contemporary papers in plant and microbial biochemistry, integrating structure, function and evolution of the molecular, cellular, and organismal levels, and discussing how this knowledge can be applied in the generation of renewable biofuels.

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Letter grade.
Instructor: Melis

PLANTBI C224 The Berkeley Lectures on Energy: Energy from Biomass 3 Units
Terms offered: Fall 2015, Fall 2014, Fall 2013
After an introduction to the different aspects of our global energy consumption, the course will focus on the role of biomass. The course will illustrate how the global scale of energy guides the biomass research. Emphasis will be placed on the integration of the biological aspects (crop selection, harvesting, storage, and distribution, and chemical composition of biomass) with the chemical aspects to convert biomass to energy. The course aims to engage students in state-of-art research.
The Berkeley Lectures on Energy: Energy from Biomass: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A; Chemistry 1B or 4B, Mathematics 1B
Repeat rules: Course may be repeated for credit under special circumstances: Repeatable when topic changes with consent of instructor.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Letter grade.
Instructors: Bell, Blanch, Clark, Smit, C. Somerville

Also listed as: BIO ENG C281/CHM ENG C295A

PLANTBI 238 Readings in Environmental Microbiology 1 Unit
Terms offered: Fall 2014, Spring 2014, Fall 2013
Special Topics and Advanced Seminars in Plant Pathology. Seminar/discussion by graduate students of current research in the field of plant pathogenic bacteria.

Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of discussion per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Lindow
Formerly known as: Environmental Science, Policy, and Management 238A

Readings in Environmental Microbiology: Read Less [-]

PLANTBI C277 Communicating Quantitative Information 2 Units
Terms offered: Fall 2021, Spring 2020, Spring 2019
This course will cover several aspects of communicating quantitative information, with a primary focus on visualizations for publications, presentations, and posters. Other topics include sharing of data and analyses, such as new publication models and interactive notebooks, as well as lifecycle data management and publication. Primary discussion will be on conceptual issues, and students will be expected to use various systems and resources as self-directed homestudy.

Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1.5 hours of seminar and 1.5 hours of discussion per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Letter grade.
Instructor: Brenner
Also listed as: MCELLBI C277

Communicating Quantitative Information: Read Less [-]
PLANTBI 290 Seminar 1 - 2 Units
Terms offered: Spring 2023, Fall 2022, Fall 2021
Advanced study in various fields of plant biology and microbial biology. Topics will be announced in advance of each semester. Enrollment in more than one section permitted.
Seminar: Read More [+]

Rules & Requirements

Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring:
8 weeks - 2-4 hours of seminar per week
15 weeks - 1-2 hours of seminar per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Letter grade.

Seminar: Read Less [-]

PLANTBI 292 Research Review in Plant and Microbial Biology 1 Unit
Terms offered: Spring 2023, Fall 2022, Spring 2022
Lectures, reports, and discussions on current research in plant and microbial biology. Sections are operated independently and directed toward different topics.
Research Review in Plant and Microbial Biology: Read More [+]

Rules & Requirements

Prerequisites: Open to properly qualified graduate students with consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Letter grade.

PLANTBI 296 Graduate Supervised Independent Study 1 - 12 Units
Terms offered: Spring 2023, Fall 2022, Spring 2022
Graduate student independent study under the supervision of a faculty member. Sections are operated independently and directed toward different topics.
Graduate Supervised Independent Study: Read More [+]

Rules & Requirements

Prerequisites: Graduate standing
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1-12 hours of independent study per week
Summer:
6 weeks - 2.5-30 hours of independent study per week
8 weeks - 1.5-22.5 hours of independent study per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.

Graduate Supervised Independent Study: Read Less [-]

PLANTBI 297 Grant Writing and Research Presentations 2 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
Each student will write a grant proposal in three steps: a one page outline, a three-page pre-proposal, and a complete 10-page grant proposal. There will be feedback at each step in the process -- each participant will review the other grant proposals. Some of the scheduled classes will include discussion of the outlines and pre-proposals, and the last class will be organized as a grant panel, with students assigned as primary and secondary reviewers.
Grant Writing and Research Presentations: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

PLANTBI 375 Workshop on Teaching 2 Units
Terms offered: Fall 2020, Fall 2019, Fall 2018
Designed for all graduate students. This course has two goals: discussion of questions and problems relating to the GSI’s teaching, and learning how to design and execute a whole course. Effective teaching methods will be introduced by experienced GSIs and faculty. Students will participate in reciprocal classroom visits, visitation and critique of faculty lectures, course design, lecture preparation, sample lecture presentation, and discussion of current literature on teaching.
Workshop on Teaching: Read More [+]

Rules & Requirements
Prerequisites: Graduate student status
Repeat rules: Course may be repeated for credit up to a total of 4 units.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Professional course for teachers or prospective teachers
Grading: Offered for satisfactory/unsatisfactory grade only.

Instructors: Fischer, Kerfeld

Workshop on Teaching: Read Less [-]

PLANTBI 602 Individual Study for Graduate Students 1 - 2 Units
Terms offered: Spring 2023, Fall 2022, Spring 2022
Individual study in consultation with the major field advisor, intended to provide an opportunity for qualified students to prepare for examinations required of Ph.D. candidates
Individual Study for Graduate Students: Read More [+]

Rules & Requirements
Prerequisites: Graduate standing and instructor consent
Credit Restrictions: Course does not satisfy unit or residence requirements for doctoral degree.
Repeat rules: Course may be repeated for credit with instructor consent.

Hours & Format
Fall and/or spring: 15 weeks - 1-2 hours of independent study per week
Summer:
6 weeks - 1-2 hours of independent study per week
8 weeks - 1-2 hours of independent study per week

Additional Details
Subject/Course Level: Plant and Microbial Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
