# Quantitative Reasoning Requirement 

## Guidelines for Quantitative Reasoning Courses

The Quantitative Reasoning requirement is designed to ensure that students graduate with basic understanding and competency in mathematics, statistics, or computer science. The requirement may be satisfied by exam or by taking an approved course. Coursework used to satisfy Quantitative Reasoning must be completed with a letter grade of C - or higher.

## Satisfying Quantitative Reasoning with an Exam

- SAT Math Section - Minimum Score: 620
- SAT Subject Test, Math Level 2 - Minimum Score: 520
- ACT Math Portion - Minimum Score: 28
- Advanced Placement Exams in Calculus AB or BC - Score: 3, 4, or 5
- Advanced Placement Exams in Calculus BC: AB Subscore - Score: 3, 4, or 5
- Advanced Placement Exam in Computer Science Principles - Score: 3 , 4, or 5
- Advanced Placement Exam in Statistics - Score: 3, 4, or 5
- International Baccalaureate Higher Level (HL) Exam in Mathematics, Further Mathematics, Analysis and Approaches, or Applications and Interpretation - Score: 5, 6, or 7
- International Baccalaureate Higher Level (HL) Exam in Computer Science - Score: 5, 6, or 7
- GCE A-Level Mathematics Exam - Score: A, B, or C (or 1, 2, 3)
- Quantitative Reasoning Exam offered by the Department of Mathematics (https://math.berkeley.edu/programs/undergraduate/) Minimum Score: 20

## Satisfying Quantitative Reasoning Requirement with a Berkeley Course

The following Berkeley course options, completed with a letter grade of C - or higher, satisfy the Quantitative Reasoning requirement:

| COMPSCI C8 | Foundations of Data Science | 4 |
| :--- | :--- | :--- |
| COMPSCI 10 | The Beauty and Joy of Computing | 4 |
| COMPSCI W10 | The Beauty and Joy of Computing | 4 |
| COMPSCI 61A | The Structure and Interpretation of Computer | 4 |
|  | Programs | 4 |
| COMPSCI 61B | Data Structures | 4 |
| COMPSCI 61C | Great Ideas of Computer Architecture (Machine | 4 |
|  | Structures) | 4 |
| COMPSCI 70 | Discrete Mathematics and Probability Theory | 4 |
| DATA C8 | Foundations of Data Science | 4 |
| INFO C8 | Foundations of Data Science | 4 |
| MATH 1A | Calculus | 4 |
| MATH N1A | Calculus | 4 |
| MATH 1B | Calculus | 4 |
| MATH N1B | Calculus | 4 |

| MATH 10A | Methods of Mathematics: Calculus, Statistics, and <br> Combinatorics | 4 |
| :--- | :--- | :--- |
| MATH N10A | Methods of Mathematics: Calculus, Statistics, and <br> Combinatorics | 4 |
| MATH 10B | Methods of Mathematics: Calculus, Statistics, and <br>  <br>  <br> Combinatorics | 4 |
| MATH N10B | Methods of Mathematics: Calculus, Statistics, and <br> Combinatorics | 4 |
| MATH 16A | Analytic Geometry and Calculus | 3 |
| MATH N16A | Analytic Geometry and Calculus | 3 |
| MATH 16B | Analytic Geometry and Calculus | 3 |
| MATH N16B | Analytic Geometry and Calculus | 3 |
| MATH 32 | Precalculus | 4 |
| MATH N32 | Precalculus | 4 |
| MATH 53 | Multivariable Calculus | 4 |
| MATH H53 | Honors Multivariable Calculus | 4 |
| MATH N53 | Multivariable Calculus | 4 |
| MATH W53 | Multivariable Calculus | 4 |
| MATH 54 | Linear Algebra and Differential Equations | 4 |
| MATH H54 | Honors Linear Algebra and Differential Equations | 4 |
| MATH N54 | Linear Algebra and Differential Equations | 4 |
| MATH W54 | Linear Algebra and Differential Equations | 4 |
| MATH 55 | Discrete Mathematics | 4 |
| MATH N55 | Discrete Mathematics | 4 |
| MATH 74 | Transition to Upper Division Mathematics | 3 |
| STAT 2 | Introduction to Statistics | 4 |
| STAT C8 | Foundations of Data Science | 4 |
| STAT 20 | Introduction to Probability and Statistics | 4 |
| STAT 21 | Introductory Probability and Statistics for Business | 4 |
| STAT W21 | Introductory Probability and Statistics for Business | 4 |

Be sure to review the course descriptions and prerequisites in the Berkeley Academic Guide (http://guide.berkeley.edu/) to ensure adequate preparation before enrolling. The Department of Mathematics also offers an on-line placement exam (https://math.berkeley.edu/ courses/choosing-courses/) to help students choose between MATH 32, 16 A and 1 A .

Most students who have not fulfilled this requirement prior to admission enroll in MATH 32 (Pre-Calculus), STAT 2 (Introduction to Statistics) or COMPSCI/INFO/STAT C8 (Foundations of Data Science).

Those students prepared to complete an upper division (courses numbered 100-199) course in lieu of an approved lower-division course (courses numbered 1-99), should contact L\&S advising (asklns@berkeley.edu) to confirm approval prior to enrollment. Only courses valued at 3 units or higher, and with a prerequisite of one of the approved lower-division courses will be considered.

## Satisfying Quantitative Requirement with a Transfer Course

All transfer courses pursued for Quantitative Reasoning must be completed with a $C$ - or higher.

- Students admitted with IGETC Certification or UC Reciprocity have satisfied Quantitative Reasoning. No additional course work is required.
- Students can complete a pre-approved Quantitative Reasoning course at a California Community College. Pre-approved courses can be found on ASSIST (http://www.assist.org/web-assist/ welcome.html). Refer to the L\&S Transfer Credit page (https:// Isadvising.berkeley.edu/progress-planning/transfer-credit/) for instructions on how to take transfer credit as an L\&S student before enrolling at a California Community College.
- UC Berkeley Extension course STAT X10, Math X11, Math X12 are additional pre-approved transfer course options for Quantitative Reasoning.
- Successful completion of transferable courses from other higher education institutions (i.e. 2 -year or 4 -year campus in the U.S. or non-UCEAP courses from abroad) may also be considered. Course descriptions and syllabi will be required to make a determination. For more information on pursuing transfer courses for Quantitative Reasoning at another higher education institution, review L\&S's Transfer Credit: Other Higher Education Institutions (https:// Isadvising.berkeley.edu/progress-planning/transfer-credit/other-higher-education-institution/) webpage.
