Nutritional Sciences: Dietetics

Bachelor of Science (BS)

The Department of Nutritional Sciences and Toxicology (NST) offers three undergraduate major program specializations: Physiology and Metabolism, Dietetics, and Toxicology leading to a Bachelor of Science (BS) degree.

Now is an exciting time to explore the sciences of nutrition and toxicology. The media have highlighted many questions about the role of diet in development and aging, the safety of genetically modified foods, links among diet, cancer, and chronic diseases, and the problems of global malnutrition.

The curriculum, driven by NST faculty research, covers a breadth of topics including functions and mechanisms of nutrient actions to the benefits and hazards of chemical agents, cultural and socio-economic determinants of human diets, and development of programs and policies to address human and environmental health and safety.

Overview of Specialization

NOTE: The Nutritional Science - Dietetics specialization is undergoing significant changes beginning in 2023 as a response to changes in the professional requirements for becoming a Registered Dietitian Nutritionist as governed by the Accreditation Council for Education in Nutrition and Dietetics (ACEND).

Beginning January 1, 2024, professionals looking to pursue the RDN pathway will be required to obtain a graduate degree in order to pursue the required Dietetic internship and sit for the RD exam. In response, the UC Berkeley Department of Nutritional Science and Toxicology will offer its own graduate program in Nutritional Sciences & Dietetics (https://nst.berkeley.edu/mnsd/about/) which will mean significant changes to, and the eventual phasing out of, the current Nutritional Science - Dietetics undergraduate major. Subsequently, any UC Berkeley student interested in becoming a Registered Dietitian who will graduate after the Spring 2022 semester is encouraged to pursue the Nutritional Science - Physiology and Metabolism specialization (http://guide.berkeley.edu/undergraduate/degree-programs/physiology-and-metabolism/) as an undergraduate and then complete a graduate program in Dietetics to meet the new professional guidelines. Please contact the Nutritional Science undergraduate advisor (https://nature.berkeley.edu/advising/meet-rausser-advisors/) to discuss in greater detail.

The Nutritional Science - Dietetics degree prepares students for a career as a Registered Dietitian Nutritionist (RDN). RDNs translate the science of nutrition into practical applications in clinical, food service, or community settings. Graduates of this program must complete a dietetics internship and pass a national examination to become an RDN.

The Dietetics curriculum provides an excellent foundation in the biological and chemical sciences, and a preprofessional focus on applying knowledge of nutritional sciences to benefit human health and to abate disease. The Dietetics program, known formally as the Didactic Program in Dietetics (DPD) prepares dietitians for positions of leadership in health care, education, industry, government, and community health, as well as in professional organizations. The program fills a community need for highly trained nutrition professionals while providing academic background for graduate study in nutrition or related fields. The program focuses on excellence in intellectual development, to the development of a professional inquiring attitude, and to equality of opportunity.

Graduates of this program receive preprofessional verification and are eligible to apply to supervised practice programs in order to receive practical training in multiple aspects of dietetics practice. Such programs generally take nine to twelve months. The DPD program director assists students in applying for supervised practice programs. Upon completion of the academic course work and a post-baccalaureate program of supervised practice, students are eligible to take the nationally administered Registration Examination. Once this exam is passed, the RDN credential is earned. As outlined above, beginning in 2024, a graduate degree will also be required for students to be eligible to sit for the RD exam, in addition to the accredited coursework and practical training listed above. For this reason, students who are interested in the RDN credential are encouraged instead to pursue the Nutritional Science - Physiology and Metabolism specialization as an undergraduate and then pursue a Dietetics graduate program.

The DPD at UC Berkeley is accredited by the Accreditation Council for Education in Nutrition and Dietetics Education (ACEND) of the Academy of Nutrition and Dietetics (AND). Beginning June 2024, the undergraduate specialization will no longer be accredited by the Accreditation Council for Nutrition and Dietetics (ACEND (https://www.eatrightpro.org/acend/)). Graduates after June 2024 will be ineligible for a dietetics supervised practice program. Please contact the Nutritional Science undergraduate advisor (https://nature.berkeley.edu/advising/meet-rausser-advisors/) to discuss in greater detail.

Admission to the Major

Advice on admission for freshmen and transfer students can be found on the Rausser College of Natural Resources Prospective Student website (https://nature.berkeley.edu/prospective-students/). Freshmen students apply to the Nutritional Science B.S. major and then declare their specialization in Dietetics once they have completed the required subset of prerequisites for this major specialization (https://nature.berkeley.edu/sites/default/files/FINAL%2520FOR%2520NUR%2520Student%2520Declaring%2520Major%252011-15.pdf). Freshmen applying to Rausser College may also select the Rausser College undeclared option and declare the major by the end of their fourth semester. Transfer students may apply directly to the major and indicate their intended specialization through the UC application. After Fall 2022, no additional students will be admitted under the Nutritional Sciences Dietetics specialization, as new first year or junior transfer students. Students applying after Fall 2022 who wish to pursue the RDN credential should consider the Nutritional Science - Physiology and Metabolism (https://nature.berkeley.edu/advising/majors/nutritional-sciences-physiology-metabolism/) or Nutritional Science - Toxicology (https://nature.berkeley.edu/advising/majors/molecular-toxicology/) undergraduate major instead and then pursue Dietetics for their graduate studies.

Information for current Berkeley students who would like to declare the major after admission, including information on a change of major or change of college, please see Rausser College’s Change of College page (https://nature.berkeley.edu/advising/change-college/).

Rausser College Honors Program

The honors program is individual research, NUSCTX H196 (http://guide.berkeley.edu/search/?P=NUSCTX%20H196), for two semesters
under the supervision of a faculty member. The supervised independent honors research is specific to aspects of the Nutritional Sciences and Toxicology major, followed by an oral presentation, and written thesis report. Acceptance in the Rausser College Honors Program is required through an application process. Students who are interested in the Honors program should apply during their junior or senior year. Students must have a 3.6 grade-point average (GPA) in order to be eligible for the honors program. Please visit Rausser College’s Honors webpage (https://nature.berkeley.edu/advising/honors-program/) to learn more.

**Minor Program**

The department offers a minor program in Nutritional Sciences. The course work for the minor addresses topics in Human Nutrition and Nutrient Function. Elective options range from Nutrition in the Community to Metabolic Regulation to Medical Nutrition Therapy. The minor is best suited for students already pursuing a bioscience degree: a background in chemistry, organic chemistry, biology, and biochemistry is necessary to be prepared to do upper division work in this field. Visit the Nutritional Sciences minor page (https://nature.berkeley.edu/advising/minors/nutritional-sciences/#text=The%20Department%20of%20Nutritional%20Sciences,Metabolic%20Regulation%20to%20Human%20Diet) for information regarding how to declare the minor.

**Certificate Program**

The full-time Individualized Supervised Practice Program (ISPP) in Dietetics prepares participants for a career as a Registered Dietitian Nutritionist (RDN). The ISPP curriculum provides experience in the application of nutrition through supervised dietetic practice at various hospitals, food service institutions, long-term care, public health, and wellness facilities across the United States. Beginning January 1, 2024, professionals looking to pursue the RDN pathway will be required to obtain a graduate degree in order to pursue the required Dietetic internship and sit for the RD exam. Given this requirement, beginning in 2023, applicants must hold a graduate degree to apply to the ISPP. The last application review period will be spring 2023 for a fall 2023 start. The program will close in June of 2024.

**Other Minor Offered by the Department of Nutritional Sciences and Toxicology**

Toxicology (http://guide.berkeley.edu/undergraduate/degree-programs/nutritional-sciences-toxicology/#minorrequirementstext) (Minor only)

In addition to the University, campus, and college requirements, listed on the College Requirements tab, students must fulfill the below requirements specific to their major program.

All students must complete R1A & R1B (or equivalent Reading and Comprehension course) before the end of their Sophomore year.

**NOTE:** The curriculum has been revised effective Fall 2016. Students admitted prior to Fall 16 and following the previous curriculum should refer to the 2015-16 Guide (http://guide.berkeley.edu/archive/2015-16/undergraduate/degree-programs/nutritional-science/#majorrequirementstext)

The Rausser College of Natural Resources Undergraduate Handbook (https://nature.berkeley.edu/handbook/) serves as a guide to the academic policies and information that students need in order to be successful while completing their coursework at Berkeley.

**Dietetics Specialization**

**NOTE:** The Nutritional Science - Dietetics specialization is undergoing significant changes beginning in 2023 as a response to changes in the professional requirements for becoming a Registered Dietitian Nutritionist as governed by the Accreditation Council for Education in Nutrition and Dietetics (ACEND).

Beginning January 1, 2024, professionals looking to pursue the RDN pathway will be required to obtain a graduate degree in order to pursue the required Dietetic internship and sit for the RD exam. In response, the UC Berkeley Department of Nutritional Science and Toxicology is planning to offer its own graduate program in Dietetics which will mean significant changes to, and the eventual phasing out of, the current Nutritional Science - Dietetics undergraduate major. Subsequently, any UC Berkeley student interested in becoming a Registered Dietitian who will graduate after the Spring 2022 semester is encouraged to pursue the Nutritional Science - Physiology and Metabolism specialization (http://guide.berkeley.edu/undergraduate/degree-programs/physiology-and-metabolism/) as an undergraduate and then complete a graduate program in Dietetics to meet the new professional guidelines. Please contact the Nutritional Science undergraduate advisor (https://nature.berkeley.edu/advising/meet-rausser-advisors/) to discuss in greater detail.

Students should be ready to declare the Dietetics specialization at the end of their sophomore year and the upper division curriculum must be completed within two years of declaring the Dietetics specialization unless a petition has been approved.

For Breadth, students are required to take 5 additional units of course work in American Cultures, Arts & Literature, Historical Studies, International Studies, Philosophy & Values, Social & Behavioral Sciences, or Foreign Language. Please refer to the L&S seven course breadth categories here (https://ls.berkeley.edu/seven-course-breadth-requirement/)

**Lower Division Requirements**

Select one course from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTHRO 3</td>
<td>Introduction to Social and Cultural Anthropology</td>
<td>4</td>
</tr>
<tr>
<td>or ANTHRO 3A</td>
<td>Introduction to Social/Cultural Anthropology (American Cultures)</td>
<td></td>
</tr>
<tr>
<td>or PSYCH 1</td>
<td>General Psychology</td>
<td></td>
</tr>
<tr>
<td>or PSYCH 2</td>
<td>Principles of Psychology</td>
<td></td>
</tr>
<tr>
<td>or SOCIOL 3A</td>
<td>Principles of Sociology: American Cultures</td>
<td></td>
</tr>
</tbody>

</tbody>
</table>

Complete all of the following:
and 40 hours of orientation/instruction within a ten-month period. There
practice in a professional work setting or alternate practice experience
May. The ISPP requires a minimum of 1,360 hours of supervised dietetic
clinical nutrition or community nutrition.

The ISPP is 10 months and will generally begin in August and end in
clinical nutrition or community nutrition. Students who are pursuing the opportuni-
ty to be a Registered Dietitian Nutritionist (RDN) will participate in either an
ership or Individualized Supervised Practice Program (ISPP) after they complete their Dietetics
coursework before they are qualified to sit for the RDN exam. The
Dietetics Program Director works with students in seminars and 1-on-1 to
help plan for either of these pathways. Below is more information about
the ISPP specifically.

The ISPP in Dietetics prepares participants for a career as a Registered Dietitian Nutritionist (RDN). The ISPP curriculum provides experience in the application of nutrition through supervised dietetic practice at various hospitals, food service institutions, long-term care, public health, and wellness facilities across the United States. The ISPP is currently accredited by the Accreditation Council for Education in Nutrition and Dietetics Education (https://www.eatrightpro.org/acend/) (ACEND) of the Academy of Nutrition and Dietetics. Dietetics is a dynamic and rapidly evolving field. The ISPP will offer training in various practice settings to provide participants with a strong foundation in applied dietetics. Participants of the ISPP can apply for one of two program concentrations: clinical nutrition or community nutrition.

The ISPP is 10 months and will generally begin in August and end in
May. The ISPP requires a minimum of 1,360 hours of supervised dietetic
practice in a professional work setting or alternate practice experience and 40 hours of orientation/instruction within a ten-month period. There
are no courses associated with this certificate. The ISPP is full-time. Participants must meet performance standards from all preceptors and maintain professional and ethical standards as outlined in the Academy of Nutrition and Dietetics Code of Ethics. Upon successful completion of the ISPP, a continuing education/specialized professional (CESP) certificate program in dietetics supervised practice and verification of completion statement will be issued. A degree will not be granted.

For more information on earning this certificate, please see the Individualized Supervised Practice Program handbook (https://nature.berkeley.edu/sites/default/files/UCB%20ISPP%20Handbook.pdf).

Reading and Composition (http://guide.berkeley.edu/undergraduate/colleges-schools/natural-resources/reading-composition-requirement/)

In order to provide a solid foundation in reading, writing and critical thinking all majors in the College require two semesters of lower division work in composition. Students must complete a first-level reading and composition course by the end of their second semester and a second-level course by the end of their fourth semester.

Foreign Language (http://guide.berkeley.edu/undergraduate/colleges-schools/natural-resources/foreign-language-requirement/): EEP Majors only

The Foreign Language requirement is only required by Environmental Economics and Policy (EEP) majors. It may be satisfied by demonstrating proficiency in reading comprehension, writing, and conversation in a foreign language equivalent to the second semester college level, either by passing an exam or by completing approved course work.

Quantitative Reasoning (http://guide.berkeley.edu/undergraduate/colleges-schools/natural-resources/quantitative-reasoning-requirement/): EEP Majors only

The Quantitative Reasoning requirement is only required by Environmental Economics and Policy (EEP) majors. The requirement may be satisfied by exam or by taking an approved course.

Undergraduate Breadth

Undergraduate breadth provide Berkeley students with a rich and varied educational experience outside of their major program and many students complete their breadth courses in their first two years. Breadth courses are built into the Rausser College major requirements and each major requires a different number of breath courses and categories. The EEP major is the only college major that requires the entire 7 course breadth. Refer to the major snapshots on each Rausser College major page (https://nature.berkeley.edu/advising/majors-minors/) for additional information.

High School Exam Credit

Unit Requirements

Students must complete at least 120 semester units of courses subject to certain guidelines:

<table>
<thead>
<tr>
<th>Upper Division Requirements</th>
<th>Unit Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1A &amp; 1AL General Chemistry and General Chemistry Laboratory</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 3A &amp; 3AL Chemical Structure and Reactivity and Organic Chemistry Laboratory</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 3B &amp; 3BL Chemical Structure and Reactivity and Organic Chemistry Laboratory</td>
<td>5</td>
</tr>
<tr>
<td>NUSCTX 10 Introduction to Human Nutrition or NUSCTX 105 Introduction to Human Nutrition: Managing Life</td>
<td>3</td>
</tr>
<tr>
<td>MCELLBi 32 Introduction to Human Physiology &amp; 32L and Introduction to Human Physiology Laboratory</td>
<td>5</td>
</tr>
<tr>
<td>BIOLOGY 1A General Biology Lecture &amp; 1AL and General Biology Laboratory</td>
<td>5</td>
</tr>
</tbody>
</table>

Individualized Supervised Practice Program

Students who are pursuing the opportunity to be a Registered Dietitian Nutritionist (RDN) will participate in either an internship or Individualized Supervised Practice Program (ISPP) after they complete their Dietetics coursework before they are qualified to sit for the RDN exam. The Dietetics Program Director works with students in seminars and 1-on-1 to help plan for either of these pathways. Below is more information about the ISPP specifically.

The ISPP in Dietetics prepares participants for a career as a Registered Dietitian Nutritionist (RDN). The ISPP curriculum provides experience in the application of nutrition through supervised dietetic practice at various hospitals, food service institutions, long-term care, public health, and wellness facilities across the United States. The ISPP is currently accredited by the Accreditation Council for Education in Nutrition and Dietetics Education (https://www.eatrightpro.org/acend/) (ACEND) of the Academy of Nutrition and Dietetics. Dietetics is a dynamic and rapidly evolving field. The ISPP will offer training in various practice settings to provide participants with a strong foundation in applied dietetics. Participants of the ISPP can apply for one of two program concentrations: clinical nutrition or community nutrition.

The ISPP is 10 months and will generally begin in August and end in May. The ISPP requires a minimum of 1,360 hours of supervised dietetic practice in a professional work setting or alternate practice experience and 40 hours of orientation/instruction within a ten-month period. There are no courses associated with this certificate. The ISPP is full-time. Participants must meet performance standards from all preceptors and maintain professional and ethical standards as outlined in the Academy of Nutrition and Dietetics Code of Ethics. Upon successful completion of the ISPP, a continuing education/specialized professional (CESP) certificate program in dietetics supervised practice and verification of completion statement will be issued. A degree will not be granted.

For more information on earning this certificate, please see the Individualized Supervised Practice Program handbook (https://nature.berkeley.edu/sites/default/files/UCB%20ISPP%20Handbook.pdf).

Reading and Composition (http://guide.berkeley.edu/undergraduate/colleges-schools/natural-resources/reading-composition-requirement/)

In order to provide a solid foundation in reading, writing and critical thinking all majors in the College require two semesters of lower division work in composition. Students must complete a first-level reading and composition course by the end of their second semester and a second-level course by the end of their fourth semester.

Foreign Language (http://guide.berkeley.edu/undergraduate/colleges-schools/natural-resources/foreign-language-requirement/): EEP Majors only

The Foreign Language requirement is only required by Environmental Economics and Policy (EEP) majors. It may be satisfied by demonstrating proficiency in reading comprehension, writing, and conversation in a foreign language equivalent to the second semester college level, either by passing an exam or by completing approved course work.

Quantitative Reasoning (http://guide.berkeley.edu/undergraduate/colleges-schools/natural-resources/quantitative-reasoning-requirement/): EEP Majors only

The Quantitative Reasoning requirement is only required by Environmental Economics and Policy (EEP) majors. The requirement may be satisfied by exam or by taking an approved course.

Undergraduate Breadth

Undergraduate breadth provide Berkeley students with a rich and varied educational experience outside of their major program and many students complete their breadth courses in their first two years. Breadth courses are built into the Rausser College major requirements and each major requires a different number of breath courses and categories. The EEP major is the only college major that requires the entire 7 course breadth. Refer to the major snapshots on each Rausser College major page (https://nature.berkeley.edu/advising/majors-minors/) for additional information.

High School Exam Credit

Unit Requirements

Students must complete at least 120 semester units of courses subject to certain guidelines:
• At least 36 units must be upper division courses, including a minimum of 15 units of upper division courses in the Rausser College.

• A maximum of 16 units of Special Studies coursework (courses numbered 97, 98, 99, 197, 198, or 199) is allowed towards the 120 units; a maximum of four is allowed in a given semester.

• A maximum of 4 units of Physical Education from any school attended will count towards the 120 units.

• Students may receive unit credit for courses graded P (including P/NP units taken through EAP) up to a limit of one-third of the total units taken and passed on the Berkeley campus at the time of graduation. Courses taken for P/NP in the Spring 2020 semester will not count toward this limit.

**Semester Unit Minimum**

All Rausser College students must enroll in at least 12 units each fall and spring semester.

**Semester Unit Maximum**

To request permission to take more than 20.5 units in a semester, please see the major adviser.

**Semester Limit**

Students admitted as freshmen must graduate within 8 fall/spring semesters at UC Berkeley. Students admitted as transfer students must graduate within 4 fall/spring semesters at UC Berkeley. Students who go on EAP and UCDC can petition for additional semesters. Other UC-affiliated programs, such as the Gump Station in Moorea, may also be considered. Summer session, UC Extension and non-UC study abroad programs do not count towards this semester limit. Students approved for double majors or simultaneous degrees in two colleges may be granted an additional semester. Rausser College does not limit the number of total units a student can accrue.

**Senior Residence Requirement**

Once you achieve and exceed 90 units (senior status), you must complete at least 24 of the remaining 30 units in residence at the Rausser College of Natural Resources over at least 2 semesters. To count as residence, a semester must consist of at least 6 passed units taken while the student is a member of Rausser. At least one of the two terms must be a fall or spring semester. Senior residence terms do not need to be completed consecutively. All courses offered on campus for the fall, spring, and summer terms by Berkeley departments and programs and all Berkeley online (‘W’) courses count. Inter-campus Visitor, Education Abroad Program, UC Berkeley Washington Program, and UC Berkeley Extension units do not count toward this requirement.

Students may use Summer Session to satisfy one semester of the Senior Residence Requirement, provided that 6 units of coursework are completed.

**Modified Senior Residence Requirement**

Participants in a fall, spring or summer UC Education Abroad Program (UCEAP), Berkeley Summer Abroad, or the UC Berkeley Washington Program may meet a modified Senior Residence Requirement by completing 24 of their final 60 semester units in residence (excluding UCEAP). At least 12 of these 24 units must be completed after senior status is reached. International travel study programs sponsored by Summer Sessions and education abroad programs offered outside of the UC system do not qualify for modified senior residence. Most students automatically satisfy the residence requirement by attending classes here for four years. In general, there is no need to be concerned about this requirement, unless students go abroad for a semester or year or want to take courses at another institution or through University Extension during their senior year. In these cases, students should make an appointment to see an adviser to determine how they can meet the Senior Residence Requirement.

**Grade Requirements**

• A 2.0 UC GPA is required for graduation.

• A 2.0 average in all upper division courses required of the major program is required for graduation.

• A grade of at least C- is required in all courses for the major. Major and minor coursework taken in Spring 2020, Fall 2020, and Spring 2021 may be completed with P/NP grading option. See more details below.

**Changes in Policies and Procedures during the COVID-19 Pandemic**

**Fall 2020, Spring 2021, SUMMER 2021**

After much consultation across the colleges of UC Berkeley, and via our college Executive Committee, the following decisions have been made about the selection of the P/NP grade option (CPN) by undergraduate students during the Fall 2020 & Spring 2021 semesters for the Rausser College of Natural Resources.

• College Course Requirements: Reading and Composition, Quantitative Reasoning, and Foreign Language requirements normally satisfied with letter grades may be met with a passed (P) grade during the Fall 2020 semester. This does not include the system-wide Entry Level Writing requirement. College Writing R1A must be taken for a letter grade and completed with a C or better to fulfill the Entry Level Writing requirement.

• Requirements to Graduate: No changes in policy.

• Rausser College students must have at least a 2.0 cumulative UC GPA to declare a Rausser College major.

• Non-Rausser College students must have at least a 3.0 cumulative UC GPA to change to or add a Rausser College major.

• Students must have at least a 2.0 cumulative UC GPA to graduate, both overall and in the upper-division courses required for the major.

• Academic Probation: The terms for Academic Probation (AP) have been modified.

• Rausser CNR students currently in good standing who earn all “P” grades will remain in good standing.

• Students currently in good standing who earn NP grades, Incompletes, or failing letter grades for more than 50% of units will be placed on academic probation and will be required to meet with their college advisor and complete an Academic Success Plan for the subsequent semester.

• Students on AP must take all coursework for letter grades. Students on AP may be removed from probationary status with
sufficient letter graded course work to raise their cumulative GPA above 2.0.

- Students on Academic Probation who do not attain sufficient letter-graded coursework to be removed from AP (ie. enough grade points to raise cumulative GPA above 2.0 cumulative GPA) will remain on AP for the subsequent semester and must complete an Academic Success Plan with their college advisor.

- Students on Academic Probation who earn NP grades, Incompletes, or failing letter grades for more than 50% of units will be Subject to Dismissal and will be required to meet with their college advisor and complete an Academic Success Plan for the subsequent semester.

- Term Probation: Students in this category are placed on academic probation if their GPA falls below 1.5 in any fall or spring semester ("Term"). To get back into good standing, you must earn a UC Berkeley term GPA of 2.0 the following regular semester (fall/spring) and maintain an overall GPA of 2.0. If you fail to meet these conditions, you will be subject to dismissal from the University. For Fall 2020 & Spring 2021, the terms for Term Probation have been modified.

- Rausser CNR students currently in good standing who earn all "P" grades will remain in good standing and will not be placed on Term Probation.

- Transferring Credit: If you are taking coursework through another institution in Fall 2020 & Spring 2021, P grades earned will be accepted for all degree requirements. Note: This does not include the systemwide Entry Level Writing requirement. College Writing R1A must be taken for a letter grade and completed with a C or better to fulfill the Entry Level Writing requirement.

For additional information, please see Changes to Policies and Procedures for Fall 2020, Spring 2021, & Summer 2021 (https://nature.berkeley.edu/advising/AY-2020-2021-policy-adjustments/).

Spring 2020

In light of the substantial disruptions to instruction caused by the novel coronavirus emergency, the Berkeley Division of the Academic Senate made changes to grading options for the Spring 2020 semester. Rausser College adjusted college requirements as follows:

- College Course Requirements: All passing course work taken in Spring 2020 may be used for college requirements regardless of the grading option selected.

- Requirements to Graduate: To graduate, Rausser College students usually must have at least a 2.0 cumulative UC GPA to graduate, both overall and in the upper-division courses required for their major. For Spring 2020, students with at least a 1.9 cumulative GPA overall and in the upper-division courses required for their major to graduate will be considered as having met the requirement.

- Academic Probation: Recognizing the challenges to teaching and learning during the COVID-19 pandemic, Rausser College of Natural Resources will not be penalizing any students’ academic progress for Spring 2020.

- Students in good academic standing who earn all “P” grades will remain in good standing.

- Students, who are in good standing, who earn NP grades, Incompletes, or failing grades for more than 50% of units will be required to meet with their college advisor and complete an Academic Success Plan for Fall 2020 by September 11, 2020, but will not be placed on Academic Probation.

- Students on Academic Probation may be removed from probationary status with sufficient letter graded course work to raise their cumulative GPA above 2.0.

- Students on Academic Probation who do not attain sufficient letter-graded coursework to be removed from AP (ie. enough grade points to raise cumulative GPA above 2.0 cumulative GPA) will remain on AP for Fall 2020 and must complete an Academic Success Plan with their college advisor by September 11, 2020.

- Students on Term Probation, but not AP, may be removed from probationary status with passing grades in at least 50% of units for Spring 2020.

- Students on Term Probation at the start of Spring 2020 who earn NP, Incomplete, or failing grades for more than 50% of units must complete an Academic Success Plan with their college advisor by September 11, 2020 and will remain on Term Probation.

- Transferring Credit: If you are taking coursework through another institution in Spring 2020 (i.e. through Concurrent Enrollment or instead of being enrolled in Spring 2020 at UC Berkeley) and that institution has moved to a P/NP-default or P/NP-only grading model, P grades earned will be accepted for all degree requirements.

For additional information, please see Changes to Policies and Procedures for Spring 2020 (https://nature.berkeley.edu/advising/spring-2020-changing-policies-faq/).

Nutritional Sciences and Toxicology Learning Goals

1. To provide preparation in critical thinking, problem solving, and analytical skills.

2. To provide insight and in-depth information on the interaction of natural and man-made toxicants with people and their impact on human health and disease (depth).

3. To provide strong academic preparation for successful contributions to research, education, industry and government, and/or participation in advanced studies in health and biosciences (breadth).

4. To inspire students to advance the health and well-being of citizens (value)

Major Maps help undergraduate students discover academic, co-curricular, and discovery opportunities at UC Berkeley based on intended major or field of interest. Developed by the Division of Undergraduate Education in collaboration with academic departments, these experience maps will help you:
• **Explore** your major and gain a better understanding of your field of study

• **Connect** with people and programs that inspire and sustain your creativity, drive, curiosity and success

• **Discover** opportunities for independent inquiry, enterprise, and creative expression

• **Engage** locally and globally to broaden your perspectives and change the world

• **Reflect** on your academic career and prepare for life after Berkeley

Use the major map below as a guide to planning your undergraduate journey and designing your own unique Berkeley experience.

View the Nutritional Sciences Major Map PDF. ([https://vcue.berkeley.edu/sites/default/files/nutritional_sciences.pdf](https://vcue.berkeley.edu/sites/default/files/nutritional_sciences.pdf))

In the Rausser College of Natural Resources, we provide holistic, individual advising services to prospective and current students who are pursuing major and minors in our college. We assist with a range of topics including course selection, academic decision-making, achieving personal and academic goals, and maximizing the Berkeley experience.

If you are looking to explore your options, or you are ready to declare a major, double major, or minor, contact the undergraduate adviser for your intended major.

Visit our website ([https://nature.berkeley.edu/advising/meet-cnr-advisors/](https://nature.berkeley.edu/advising/meet-cnr-advisors/)) to explore all of our advising services.

3 Units

Terms offered: Fall 2022, Summer 2022 First 6 Week Session, Summer 2022 Second 6 Week Session

This course focuses on relationships between diet and health, and responses of the human body to diet and food components, including macro and micro nutrients, water, phytochemicals, and alcohol. This course also provides an overview of the interplay between nutrients and physiological and behavioral responses. Lectures, which address contributions of diet to optimal health or disease risk, are based on current nutritional, biochemical, and medical knowledge. Goals include enabling students to make informed decisions about their nutritional needs and current issues concerning nutrition.

*Introduction to Human Nutrition: Read More [+] Rules & Requirements*

**Credit Restrictions:** Students will receive no credit for NUSCTX 10 after completing NUTRSCI 10, NUTRSCI S10X, or NUSCTX 10S. A deficient grade in NUSCTX 10 may be removed by taking NUSCTX 10S.

**Hours & Format**

Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Summer:

6 weeks - 6 hours of lecture and 1.5 hours of discussion per week

8 weeks - 4 hours of lecture and 2 hours of discussion per week

**Additional Details**

**Subject/Course Level:** Nutritional Sciences and Toxicology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

NUSCTX 10S Introduction to Human Nutrition: Managing Life 3 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
The course will center on how the body processes nutrients, as well as other components of diet such as water, alcohol, and plant constituents. We will explore how these processes can have a lasting effect on our health and behavior. Students will gain a general understanding of basic human nutrition, how key biological, physical, social and psychological factors affect how we eat. The goal is that students gain sufficient knowledge to be able to make informed dietary choices based on individual nutritional needs, and to understand how these choices can have a long lasting impact on one's life. The lecture will be delivered in two modalities 1) In-person lectures 2) Lectures will be streamed and recorded for viewing later.

Rules & Requirements
Credit Restrictions: Students will receive no credit for NUSCTX 10S after completing NUSCTX 10. A deficient grade in NUSCTX 10S may be removed by taking NUSCTX 10.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Nutritional Sciences and Toxicology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Aponte

Introduction to Human Nutrition: Managing Life: Read Less [-]

NUSCTX 11 Introduction to Toxicology 3 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
Discussion of principles for the evaluation of toxic hazard of natural and man-made substances present in the environment, the workplace, food, drink, and drugs. The bases for species selectivity, individual variations in sensitivity and resistance, and the combined effects of toxic agents will be addressed. Issues related to the impact of toxic agents in modern society will be emphasized.

Introduction to Toxicology: Read More [+]

Rules & Requirements
Prerequisites: Open to students pursuing science and non science majors

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Nutritional Sciences and Toxicology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Vulpe, Nomura, Wang

NUSCTX 20 Personal Food Security and Wellness 2 Units
Terms offered: Spring 2023, Fall 2022, Spring 2022
Food insecurity is broadly defined as having unreliable access to adequate foods resulting in disrupted eating patterns or reduced food intake due to a lack of money and other resources for food. NST 20 will improve nutrition-related behaviors and support students in need of improving their food security status. Students whom have limited cooking and food preparation experience will acquire foundational nutrition knowledge and basic cooking skills to be able to prepare healthful and affordable meals in consideration of existing factors, such as: food availability; food budgeting; and time management.

Personal Food Security and Wellness: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture and 2 hours of laboratory per week

Additional Details
Subject/Course Level: Nutritional Sciences and Toxicology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Personal Food Security and Wellness: Read Less [-]
NUSCTX 24 Freshman Seminar 1 Unit
Terms offered: Spring 2023, Fall 2022, Spring 2022
The Freshman Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Freshman seminars are offered in all campus departments, and topics vary from department to department and semester to semester.
Freshman Seminar: Read More [+]

Rules & Requirements

Repeat rules: Course may be repeated for credit when topic changes.

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of seminar per week

Additional Details

Subject/Course Level: Nutritional Sciences and Toxicology/Undergraduate

Grading/Final exam status: The grading option will be decided by the instructor when the class is offered. Final Exam To be decided by the instructor when the class is offered.

Instructor: Chang

Formerly known as: Nutritional Sciences 24

NUSCTX 30 Sports Nutrition 3 Units
Terms offered: Summer 2021 First 6 Week Session, Summer 2020 Second 6 Week Session
A survey course of nutrition with an emphasis on the relationships among diet, physical activity, and health; exploration of the changes in the metabolism of carbohydrates, lipids, protein and water; discussion of the function of vitamins and minerals; practical application of evidence-based dietary recommendations for common sports and varying physical intensities.
Sports Nutrition: Read More [+]

Rules & Requirements

Prerequisites: None

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Summer:
6 weeks - 9 hours of lecture per week
8 weeks - 6 hours of lecture per week

Additional Details

Subject/Course Level: Nutritional Sciences and Toxicology/Undergraduate

Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

Instructor: Deegan

Formerly known as: Nutritional Sciences 98

NUSCTX 98 Directed Group Study 1 - 3 Units
Terms offered: Spring 2019, Fall 2016, Spring 2016
Study of special topics in nutritional sciences that are not covered in depth in regular courses.
Directed Group Study: Read More [+]

Rules & Requirements

Prerequisites: Lower division standing and consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 1-3 hours of directed group study per week

Summer:
6 weeks - 3-8 hours of directed group study per week
8 weeks - 2-6 hours of directed group study per week

Additional Details

Subject/Course Level: Nutritional Sciences and Toxicology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Sul, Chen

NUSCTX 103 Nutrient Function and Metabolism 4 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
Delivery of nutrients from foods to mammalian cells; major metabolic pathways; function of nutrients in energy metabolism, nitrogen and lipid metabolism, structural tissues and regulation; essentiality, activation, storage, excretion, and toxicity of nutrients.
Nutrient Function and Metabolism: Read More [+]

Rules & Requirements

Prerequisites: Required: Bio 1A, Recommended: MCB 32 and 102

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Summer:
6 weeks - 9 hours of lecture per week
8 weeks - 6 hours of lecture per week

Additional Details

Subject/Course Level: Nutritional Sciences and Toxicology/Undergraduate

**NUSCTX 104AC Human Food Practices AC 3 Units**  
Terms offered: Prior to 2007  
This course will broadly address the historical, ecological, socioeconomic, biological, political, cultural, and personal components of the human diet in addition to nutrition problems, programs, and consumer protection. It is a nutrition course with an anthropological slant that examines why we eat what we eat and contributes to the pursuit of multidisciplinary degrees in nutrition policy and planning. As an American Cultures course, we will also discuss cuisines from a variety of different countries and regions, with a specific focus on those in America, and examine how race and ethnicity affect diet, food access, and relationship with food. Introduction to Human Nutrition (NST10) is recommended as a prerequisite.

Food, Culture, and the Environment: Read More [+]

**Rules & Requirements**

**Prerequisites:** Nutritional Sciences and Toxicology 10 (Recommended)

**Requirements this course satisfies:** Satisfies the American Cultures requirement

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week  
Summer: 8 weeks - 4 hours of lecture and 2 hours of discussion per week

**Additional Details**

**Subject/Course Level:** Nutritional Sciences and Toxicology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**NUSCTX 105 Mediterranean Nutrition and Food System 3 Units**

Terms offered: Summer 2022 10 Week Session

Studies consistently demonstrate that the Mediterranean dietary pattern reduces risk of chronic disease and adherence rates are higher compared to other diets prescribed to promote health. More recently, the Mediterranean diet is highlighted as a diet with a relatively lower environmental impact. This course will examine the key elements of the Mediterranean diet, compare different types of Mediterranean diets, and discuss how beneficial aspects of this diet are found around the world. Additionally, students in this course will study food systems through specific ingredients produced on the beautiful and culturally rich island of Chios, Greece, where the course is based.

**Mediterranean Nutrition and Food System: Read More [+]**

**Hours & Format**

**Summer:** 4 weeks - 6 hours of lecture, 12 hours of discussion, and 4 hours of fieldwork per week

NUSCTX 161A Medical Nutrition Therapy 4 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
This fall course serves as the first of a two part series that addresses the nutritional component of treating disease. The Nutrition Care Process of the Academy of Nutrition and Dietetics provides the framework for nutritional status assessment, diagnosis, nutrition intervention, and evaluation. Disease pathophysiology, diagnosis, medical and pharmacological treatments, and nutritional therapies for prevention and treatment are explored for conditions common throughout the lifecycle. The first part focuses on cardiovascular disease. Additional diseases are addressed in 161B in the spring semester. This course will provide an opportunity to apply knowledge of MNT through case studies and various activities.
Medical Nutrition Therapy: Read More [+] 
Rules & Requirements

NUSCTX 208 Foods 4 Units
Terms offered: Not yet offered
The course will begin by discovering the science of foods; the functional role of foods as ingredients; and the impact on food quality, acceptability and compatibility as measured by sensory evaluation methods. Students will then integrate their knowledge of chemistry and food science by modifying recipes for wellness and disease prevention and management. Students will explore food preparation techniques and world cuisines to further their appreciation of foods, eating patterns, and food trends across cultures. Students will apply principles of food safety and sanitation to the procurement, storage and production of foods. This course is designed to prepare MNSD students for supervised practice internships and a career as a registered dietitian.

Foods: Read More [+]

Objectives & Outcomes
Course Objectives: Applies an understanding of complementary and integrative nutrition by exploring culinary medicine and functional foods (1.9.2).
Applies and demonstrates an understanding of agricultural practices and processes (3.4).
Applies principles of food safety and sanitation to the storage, production and service of food (3.3).
Demonstrates knowledge of and is able to manage food preparation techniques (1.12).
Develops and leads implementation of risk management strategies and programs (5.5)
Gains a foundational knowledge on public and global health issues and nutritional needs by examining the sustainability and global supply of ingredients (1.16, 1.16.2).
Integrates knowledge of chemistry and food science as it pertains to food and nutrition product development and when making modifications to food (1.4).
Integrates the principles of cultural competence within own practice and when directing services (1.7).
The objective of the course is to provide an opportunity for students to meet the following Accreditation Council for Education in Nutrition and Dietetics competencies (competency number):
Applies knowledge of microbiology and food safety (1.3).

Rules & Requirements
Prerequisites: graduate student standing, course reserved for students in the MNSD program

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 6 hours of laboratory per week

Additional Details
Subject/Course Level: Nutritional Sciences and Toxicology/Graduate
Grading: Letter grade.
Foods: Read Less [-]
NUSCTX 210 Research Methods & Analysis in Nutritional Science 4 Units
Terms offered: Not yet offered
This course will familiarize students with current methodologies of assessing nutritional status through molecular biology, clinical/biochemical analysis, and dietary experimentation and analysis. Upon completion of this course, students will understand the work of a nutrition scientist, including asking scientific questions and generating hypotheses, using creativity and critical thinking to develop experimental design and execute laboratory procedures, as well as interpreting data and presenting (written and oral) findings from results obtained. Throughout the course, students will perform several nutritional assessments and compare and contrast the results to those obtained from a controlled analytical method and/or specimen.
Research Methods & Analysis in Nutritional Science: Read More [+]

Objectives & Outcomes

Course Objectives:
Applies an understanding of environmental, molecular factors (e.g., genes, proteins, metabolites) and food in the development and management of disease. (1.1)
Applies current research and evidence-informed practice to services. (6.3)
Applies knowledge of math and statistics. (1.10)
Applies scientific methods utilizing ethical research practices when reviewing, evaluating, and conducting research. (6.2)
Demonstrates computer skills and uses nutrition informatics in the decision making process. (1.13)
Incorporates critical thinking skills in practice. (6.1)
Uses effective communication, collaboration and advocacy skills. (7.2)

Rules & Requirements

Prerequisites: graduate student standing, course reserved for students in the MNSD program

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 6 hours of laboratory per week

Additional Details
Subject/Course Level: Nutritional Sciences and Toxicology/Graduate
Grading: Letter grade.

Introduction to Research in Nutritional Sciences: Read More [+]

NUSCTX 211A Introduction to Research in Nutritional Sciences 4 - 8 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
Supervised experimental work under the direction of individual faculty members, which introduces experimental methods and research approaches in metabolic biology/nutritional biochemistry.

Rules & Requirements

Prerequisites: Restricted to graduate students in the metabolic biology graduate program with the consent of the principal investigator

Hours & Format
Fall and/or spring: 15 weeks - 4-4 hours of laboratory per week

Additional Details
Subject/Course Level: Nutritional Sciences and Toxicology/Graduate
Grading: Letter grade. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Instructor: Napoli

NUSTCTX 220 Molecular Toxicology 4 Units
Terms offered: Spring 2012, Spring 2011, Spring 2010
Molecular toxicology attempts to understand the mechanisms by which hazardous compounds cause their toxic effects. The course will focus on our understanding of the important tissue and cellular components involved in chemical exposure from entry to effect to exit. Topics include metabolism and mechanisms of toxins, toxicogenomics, toxin effects in individuals and groups, and tools to predict toxicology.
Molecular Toxicology: Read More [+]

Rules & Requirements

Prerequisites: 110 or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

NUSTCTX 235 Food Systems Management 4 Units
Terms offered: Not yet offered
Principles of organization and management applied to institutional food service systems will be discussed and applied in this graduate level course. Topics will range from production and delivery systems, management of resources, quality assurance, equipment, layout, marketing, personnel management and fiscal management. Students will apply concepts through laboratory experiences, projects and engagement with institutional settings. ServSafe certification exam must be completed by the end of the semester.
Food Systems Management: Read More [+]

Objectives & Outcomes

Course Objectives:
Applies knowledge of math and statistics.
Applies principles of food safety and sanitation to the storage, production and service of food.
Demonstrates knowledge of and is able to manage food preparation techniques.
Demonstrates computer skills and uses nutrition informatics in the decision making process.
Oversees the purchasing, receipt and storage of products used in food production and services.
Applies a framework to assess, develop, implement and evaluate products, programs and services.
Applies and demonstrates an understanding of agricultural practices and processes.
Applies knowledge of social, psychological and environmental aspects of eating and food.
Integrates knowledge of maximizing sustainability, food and water waste, reusable/ biodegradable items, local and global produce sourcing and access to food.
Applies principles of organization management.
Applies project management principles to achieve project goals and objectives.
Demonstrates leadership skills to guide practice.
Develops and leads implementation of risk management strategies and programs.
Directs the production and distribution of quantity and quality food products.
Leads quality and performance improvement activities to measure, evaluate and improve program services, products and initiatives.

Rules & Requirements

Prerequisites: graduate student standing, course reserved for students in the MNSD program

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of discussion per week

Additional Details

Subject/Course Level: Nutritional Sciences and Toxicology/Graduate

Grading: Letter grade.

NUSCTX 245 Counseling in Nutritional Sciences 2 Units
Terms offered: Not yet offered
This graduate level course will focus on applying behavior change theory in nutrition counseling. Strategies for effective nutrition counseling and behavior change will be discussed. Students will apply the Nutrition Care Process and utilize appropriate Medical Nutrition Therapy and theory-driven interventions to address behavior change. Integrated practice will occur through mock counseling sessions and role playing activities for various populations and conditions. This course is designed to prepare MNSD students for supervised practice internships and a career as a Registered Dietitian Nutritionist.
Counseling in Nutritional Sciences: Read More [+]

Objectives & Outcomes

Course Objectives: Applies knowledge of nutritional health promotion and disease prevention for individuals, groups and populations. (1.15) Applies knowledge of social, psychological and environmental aspects of eating and food. (1.6) Assumes professional responsibilities to provide safe, ethical and effective nutrition services. (7.1) Implements or coordinates nutritional interventions for individuals, groups or populations. (2.4) Integrates knowledge of nutrition and physical activity in the provision of nutrition care across the life cycle. (1.14) Integrates the principles of cultural competence within own practice and when directing services. (1.7) Uses effective communication, collaboration and advocacy skills. (7.2) Utilizes the nutrition care process with individuals, groups or populations in a variety of practice settings. (2.3)

Rules & Requirements

Prerequisites: NST 261, Nutritional Assessment and the Lifespan, graduate student standing, course reserved for students in the MNSD program

Hours & Format

Fall and/or spring: 7 weeks - 2 hours of lecture and 2 hours of workshop per week

Additional Details

Subject/Course Level: Nutritional Sciences and Toxicology/Graduate
Grading: Letter grade.
Counseling in Nutritional Sciences: Read Less [-]

NUSCTX 250 Advanced Topics in Metabolic Biology 3 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
Overview lectures and discussion of primary literature will be combined in this course to provide a working knowledge of principles, regulation, and experimental approaches in metabolic biology. Select topics ranging from molecular mechanism of metabolite synthesis and cellular signaling to integrative physiology of organismal metabolic homeostasis will be discussed with a particular emphasis on their connection to human diseases.
Advanced Topics in Metabolic Biology: Read More [+]

Objectives & Outcomes

Course Objectives: Use selective topics in metabolic biology to provide a working understanding of basic concepts and technical approaches in metabolic biology.

Student Learning Outcomes: Students learning outcomes will be focused on their ability to derive basic concepts and technical approaches in metabolic biology from the lectures and primary literature discussion.

Rules & Requirements

Prerequisites: Molecular and Cell Biology 102 or equivalent

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Nutritional Sciences and Toxicology/Graduate
Grading: Letter grade.
Instructor: Nomura
Advanced Topics in Metabolic Biology: Read Less [-]
NUSCTX 260 Metabolic Bases of Human Health and Diseases Graduate Level 4 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
The physiological bases of human nutrient homeostasis and common disorders resulting from over and under nutrition will be discussed with a specific focus on macronutrients. Topics related to nutrient deficiency and excess will include adaptation to starvation and the effects of caloric restriction on life-span, obesity and its complications, lipoprotein metabolism and cardiovascular disease, as well as a detailed discussion of the causes, disease mechanisms, and treatment of diabetes mellitus. Metabolic Bases of Human Health and Diseases Graduate Level: Read More [+]

Objectives & Outcomes

Course Objectives: After completing the lectures and discussion sessions, students will have developed an advanced understanding of the contribution of nutrients and metabolic pathway regulation to the development of human diseases. This will be a direct extension and disease oriented application of the general metabolic pathways discussed in NST103. After this unit, the students will have gained insights into basic concepts in metabolic biology, their relationship to common disorders such as diabetes, cancer, and cardiovascular disease as well as the basis for metabolism based pharmacological interventions. In addition critical reading of primary literature and the presentation of advanced topics in metabolic biology will be practiced.

Rules & Requirements

Prerequisites: MCB110, NST103 or equivalent

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Nutritional Sciences and Toxicology/Graduate

Grading: Letter grade.

Instructors: Stahl, Napoli, Krauss

Metabolic Bases of Human Health and Diseases Graduate Level: Read Less [-]

NUSCTX 261 Nutrition Care Process and the Lifespan 4 Units
Terms offered: Not yet offered
Course explores nutritional status across the lifespan. The NCP will be utilized as a framework to explore nutritional care throughout the lifespan. Students will determine nutritional status by considering anthropometrics and physical assessment, biochemical data, clinical findings, dietary intake, complementary and integrative therapies, and physical activity. Disease pathophysiology, diagnosis, medical and pharmacological treatments, and nutritional therapies and nutrition-related pharmacotherapy will be discussed for conditions common across the lifespan. Students will be responsible for utilizing medical terminology and documentation and for identifying relevant current research to support their nutritional recommendations.

Nutrition Care Process and the Lifespan: Read More [+]

Objectives & Outcomes

Course Objectives: Applies an understanding of anatomy, physiology and biochemistry. (1.2)
Applies an understanding of environmental, molecular factors (e.g. genes, proteins, metabolites) and food in the development and management of disease. (1.1)
Applies an understanding of the impact of complementary and integrative nutrition on drugs, disease, health and wellness. (1.9)
Applies current research and evidence-informed practice to services. (6.3)
Applies knowledge of medical terminology when communicating with individuals, groups and other health professionals. (1.11)
Applies knowledge of nutritional health promotion and disease prevention for individuals, groups and populations. (1.15)
Applies knowledge of pathophysiology and nutritional biochemistry to physiology, health and disease. (1.5)
Applies knowledge of pharmacology to recommend, prescribe and administer medical nutrition therapy. (1.8)
Applies knowledge of social, psychological and environmental aspects of eating and food. (1.6)

Implements or coordinates nutritional interventions for individuals, groups or populations. (2.4)
Incorporates critical thinking skills in practice. (6.1)
Integrates knowledge of nutrition and physical activity in the provision of nutrition care across the life cycle. (1.14)
Integrates nutritional biochemistry knowledge to make informed food and nutrition decisions for optimal health. (1.4.2)
Prescribes, recommends and administers nutrition-related pharmacotherapy. (2.5)
Selects, develops and/or implements nutritional screening tools for individuals, groups or populations. (2.2)
Utilizes the nutrition care process with individuals, groups or populations in a variety of practice settings. (2.3)

Rules & Requirements

Prerequisites: graduate student standing, course reserved for students in the MNSD program

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of discussion per week

Additional Details

Subject/Course Level: Nutritional Sciences and Toxicology/Graduate

Grading: Letter grade.

NUSCTX 266 Nutrition in the Community 3 Units
Terms offered: Not yet offered
Course addresses nutrition in the context of the community and population. It explores nutrition programs that serve various segments of the population and the relationships of these programs to nutrition policy at the local, national, and international levels. The course provides an opportunity for community assessment, program planning, implementation, and evaluation. The history, science, current issues and innovations involved in improving nutrition among various communities will be presented. Nutritional concerns, including food security and global health, will be discussed. This course is designed to prepare MNSD students for supervised practice internships and a career as a RDN.
Nutrition in the Community: Read More [+]

Objectives & Outcomes

Course Objectives: Applies a framework to assess, develop, implement and evaluate products, programs and services. (2.1)
Applies knowledge of nutritional health promotion and disease prevention for individuals, groups and populations. (1.15)
Applies knowledge of social, psychological and environmental aspects of eating and foods. (1.6)
Engages in legislative and regulatory activities that address community, population and global nutrition health and nutrition policy. (4.2)
Gains a foundational knowledge on public and global health issues and nutritional needs. (1.16)
Implements or coordinates nutritional interventions for individuals, groups or populations. (2.4)
Utilizes program planning steps to develop, implement, monitor and evaluate community and population programs. (4.1)

Rules & Requirements

Prerequisites: graduate student standing, course reserved for students in the MNSD program

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

NUSCTX 290 Advanced Seminars in Nutritional Sciences 2 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
Advanced study of topics in nutritional sciences. More than one section may be taken simultaneously.
Rules & Requirements
Prerequisites: Graduate standing
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week
Additional Details
Subject/Course Level: Nutritional Sciences and Toxicology/Graduate
Grading: Letter grade.

NUSCTX 292 Graduate Research Colloquium 1 Unit
Terms offered: Spring 2023, Fall 2022, Spring 2022
Presentations by graduate students of research proposals and results of their research. Participation in discussion and evaluation of others' presentations is required.
Rules & Requirements
Prerequisites: Graduate standing
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 1-2 hours of colloquium per week
Additional Details
Subject/Course Level: Nutritional Sciences and Toxicology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.

NUSCTX 293 Research Seminar 1 Unit
Terms offered: Fall 2022, Fall 2021, Fall 2020
Presentation and discussion of faculty research projects and experimental techniques in metabolic biology/nutritional biochemistry. Intended primarily for first year graduate students.
Rules & Requirements
Prerequisites: Graduate standing or consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture per week
Additional Details
Subject/Course Level: Nutritional Sciences and Toxicology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.

NUSCTX 294 Dietetics Professional Practice 2 Units
Terms offered: Not yet offered
This course is intended to enhance student understanding and appreciation of professional responsibilities and conduct as future dietetic professionals. Current topics in the field of nutritional sciences and dietetics will be discussed. The course will provide a platform for students to begin to prepare for the registered dietitian nutritionist credentialing examination.
Rules & Requirements
Prerequisites: Graduate standing or consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Nutritional Sciences and Toxicology/Graduate
Grading: Letter grade.
**NUSCTX 295 Capstone Project in Nutritional Sciences 11 Units**

Terms offered: Not yet offered

The Capstone course gives students the opportunity to synthesize their graduate level course work by connecting their academic knowledge from their coursework to a capstone research project. Students will learn new research techniques and approaches and broaden their exposure to nutrition research. The project will entail a technical research poster and presentation of their work.

*Capstone Project in Nutritional Sciences: Read More [+]*

**Objectives & Outcomes**

**Course Objectives:**
- Applies an understanding of environmental, molecular factors (e.g. genes, proteins, metabolites) and food in the development and management of disease. (1.1)
- Applies current research and evidence-informed practice to services. (6.3)
- Applies knowledge of math and statistics. (1.10)
- Applies project management principles to achieve project goals and objectives. (5.3)
- Applies scientific methods utilizing ethical research practices when reviewing, evaluating, and conducting research. (6.2)
- Demonstrates computer skills and uses nutrition informatics in the decision making process (1.13)
- Incorporates critical thinking skills in practice. (6.1)
- Uses effective communication, collaboration and advocacy skills. (7.2)
