Engineering Physics

Bachelor of Science (BS)
The engineering physics major offered through the Engineering Science Program interweaves classical and modern physics, chemistry, and mathematics with their engineering applications. Chief among the attractions of the major is its flexibility in that students have the ability to take diverse engineering, math, and science classes based on individual research goals. The solid base in physics and mathematics is augmented with a selection of engineering course options that prepare students to tackle complex problems faced by society.

Admission to the Major
Prospective undergraduates in the College of Engineering must apply to one specific major/degree program. For further information, please see the College of Engineering’s website (http://coe.berkeley.edu/students/prospective-students/admissions.html).

Admission to engineering via a Change of College application for current UC Berkeley students is very competitive as there are few open spaces. Admission to the Major interweaves classical and modern physics, chemistry, and mathematics with their engineering applications. Chief among the attractions of the major is its flexibility in that students have the ability to take diverse engineering, math, and science classes based on individual research goals. The solid base in physics and mathematics is augmented with a selection of engineering course options that prepare students to tackle complex problems faced by society.

Minor Program
There is no minor program in engineering physics.

Other Majors offered by the Engineering Science Program
Energy Engineering (https://guide.berkeley.edu/undergraduate/degree-programs/energy-engineering/) (Major and Minor)

Engineering Mathematics and Statistics (https://guide.berkeley.edu/undergraduate/degree-programs/engineering-math-statistics/) (Major)

Environmental Engineering Science (https://guide.berkeley.edu/undergraduate/degree-programs/environmental-engineering-science/) (Major)

In addition to the University, campus, and college requirements, students must fulfill the requirements listed below specific to their major program.

General Guidelines
1. All technical courses taken in satisfaction of major requirements must be taken for a letter grade.

2. No more than one upper division course may be used to simultaneously fulfill requirements for a student’s major and minor programs.

3. A minimum overall grade point average (GPA) of 2.0 is required for all work undertaken at UC Berkeley.

4. A minimum GPA of 2.0 is required for all technical courses taken in satisfaction of major requirements.

For a detailed plan of study by year and semester, please see the Plan of Study tab.

Lower Division Requirements

Lower division technical electives, select three from the following: 11-14

ASTRON 7A Introduction to Astrophysics [4]
ASTRON 7B Introduction to Astrophysics [4]
BIOLOGY 1A General Biology Lecture & 1AL and General Biology Laboratory
BIOLOGY 1B General Biology Lecture and Laboratory [4]
CHEM 1B General Chemistry [4]
CHEM 3A Chemical Structure and Reactivity & 3AL and Organic Chemistry Laboratory
CHEM 4B General Chemistry and Quantitative Analysis [5]
EECS 16A Designing Information Devices and Systems I [4]
EECS 16B Designing Information Devices and Systems II [4]
MAT SCI 45 Properties of Materials [3] (MAT SCI 45L recommended)

MEC ENG C85/ CIV ENG C30 Introduction to Solid Mechanics [3]
ENGIN 92 Perspectives in Engineering (Optional) 1

Upper Division Requirements

Due to the interdisciplinary nature of this major, electives must be selected and approved in consultation with a faculty adviser.

Technical Electives must include:

- 2 prerequisites of the advised to complete

Students planning to pursue graduate school in physics are intended for students majoring in chemistry or a closely related field.

Students in the College of Engineering must complete no fewer than 120 semester units with the following provisions:

1. Completion of the requirements of one engineering major program (https://engineering.berkeley.edu/students/undergraduate-guide/degree-requirements/major-programs/) of study.
2. A minimum overall grade point average of 2.00 (C average) and a minimum 2.00 grade point average in upper division technical coursework required of the major.
3. The final 30 units and two semesters must be completed in residence in the College of Engineering on the Berkeley campus.
4. All technical courses (math, science, and engineering) that can fulfill requirements for the student's major must be taken on a letter graded basis (unless they are only offered P/NP).
5. Entering freshmen are allowed a maximum of eight semesters to complete their degree requirements. Entering junior transfers are allowed five semesters to complete their degree requirements. Summer terms are optional and do not count toward the maximum. Students are responsible for planning and satisfyingly completing all graduation requirements within the maximum allowable semesters.
6. Adhere to all college policies and procedures (https://engineering.berkeley.edu/students/undergraduate-guide/policies-procedures/) as they complete degree requirements.
7. Complete lower division technical courses before enrolling in upper division technical courses.

### Humanities and Social Sciences (H/SS) Requirement

To promote a rich and varied educational experience outside of the technical requirements for each major, the College of Engineering has a six-course Humanities and Social Sciences breadth requirement (http://engineering.berkeley.edu/student-services/degree-requirements/humanities-and-social-sciences/), which must be completed to graduate. This requirement, built into all the engineering programs of study, includes two Reading and Composition courses (R&C), and four additional courses within which a number of specific conditions must be satisfied. See the humanities and social sciences (https://engineering.berkeley.edu/students/undergraduate-guide/degree-requirements/humanities-and-social-sciences/) section of our website for details.

### Class Schedule Requirements

- Minimum units per semester: 12.0
- Maximum units per semester: 20.5
- Minimum technical courses: College of Engineering undergraduates must include at least two letter graded technical courses (of at least 3 units each) in their semester program. Every semester students are expected to make normal progress in their declared major. Normal progress is determined by the student's Engineering Student Services Advisor. (Note: For most majors, normal progress (https://engineering.berkeley.edu/academics/undergraduate-guide/policies-procedures/scholarship-progress/#ac12282) will require enrolling in 3-4 technical courses required of your current major each semester.) Students who are not in compliance with this policy by the end of the fifth week of the semester are subject to a registration block that will delay enrollment for the following semester.
• All technical courses (math, science, engineering) that satisfy requirements for the major must be taken on a letter-graded basis (unless only offered as P/NP).

Minimum Academic Requirements

• Students must have a minimum overall and semester grade point average of 2.00 (C average). Students will be subject to suspension or dismissal from the University if during any fall or spring semester their overall UC GPA falls below a 2.00, or their semester GPA is less than 2.00.

• Students must achieve a minimum grade point average of 2.00 (C average) in upper division technical courses required for the major curriculum each semester.

• A minimum overall grade point average of 2.00 and a minimum 2.00 grade point average in upper division technical course work required for the major are required to earn a Bachelor of Science in the College of Engineering.

• Students must make normal degree progress toward the Bachelor of Science degree and their officially declared major.

Unit Requirements

To earn a Bachelor of Science in Engineering, students must complete at least 120 semester units of courses subject to certain guidelines:

• Completion of the requirements of one engineering major program (https://engineering.berkeley.edu/students/undergraduate-guide/degree-requirements/major-programs/) of study.

• A maximum of 16 units of special studies coursework (courses numbered 97, 98, 99, 197, 198, or 199) is allowed to count towards the B.S. degree, and no more than 4 units in any single term can be counted.

• A maximum of 4 units of physical education from any school attended will count towards the 120 units.

• Passed (P) grades may account for no more than one third of the total units completed at UC Berkeley, Fall Program for First Semester (FPF), UC Education Abroad Program (UCEAP), or UC Berkeley Washington Program (UCDC) toward the 120 overall minimum unit requirement. Transfer credit is not factored into the limit. This includes transfer units from outside of the UC system, other UC campuses, credit-bearing exams, as well as UC Berkeley Extension XB units.

Normal Progress

Students in the College of Engineering must enroll in a full-time program and make normal progress (https://engineering.berkeley.edu/students/undergraduate-guide/policies-procedures/scholarship-progress#ac12282) each semester toward their declared major. Students who fail to achieve normal academic progress shall be subject to suspension or dismissal. (Note: Students with official accommodations established by the Disabled Students' Program, with health or family issues, or with other reasons deemed appropriate by the dean may petition for an exception to normal progress rules.)

University of California Requirements

Entry Level Writing (https://guide.berkeley.edu/undergraduate/education/#earningyourdegreetext)

All students who will enter the University of California as freshmen must demonstrate their command of the English language by satisfying the Entry Level Writing Requirement (ELWR). The UC Entry Level Writing Requirement website (https://admission.universityofcalifornia.edu/elwr/) provides information on how to satisfy the requirement.

American History and American Institutions (https://guide.berkeley.edu/undergraduate/education/#earningyourdegreetext)

The American History and Institutions (AH&I) requirements are based on the principle that a US resident graduated from an American university should have an understanding of the history and governmental institutions of the United States.

Campus Requirement

American Cultures (https://guide.berkeley.edu/undergraduate/education/#earningyourdegreetext)

The American Cultures requirement is a Berkeley campus requirement, one that all undergraduate students at Berkeley need to pass in order to graduate. You satisfy the requirement by passing, with a grade of C or better, an American Cultures course. You may take an American Cultures course any time during your undergraduate career at Berkeley. The requirement was instituted in 1991 to introduce students to the diverse cultures of the United States through a comparative framework. Courses are offered in more than fifty departments in many different disciplines at both the lower and upper division level.

For more detailed information regarding the courses listed below (e.g., elective information, GPA requirements, etc.), please see the College Requirements and Major Requirements tabs.

### Fall Units | Spring Units
---|---
CHEM 4A or 1A and 1AL | MATH 1B
4 | 4
MATH 1A | PHYSICS 5A or 7A
4 | 3-4
Reading & Composition Part A Course | ENGIN 7, COMPSCI 61A, COMPSCI 61B, or PHYSICS 77
4 | 3-4
Humanities/Social Sciences Course | Technical Elective
3-4 | 3-5
Freshman Seminar or ENGIN 92 (optional) | 0-1

| Fall Units | Spring Units |
---|---|
MATH 53 | MATH 54
4 | 4
PHYSICS 5B & 5BL | PHYSICS 5C & 5CL
5 | 5
or | or
Technical Elective | Technical Elective
3-5 | 3-5
Reading & Composition Part B Course | Humanities/Social Sciences Course
4 | 3-4

| Fall Units | Spring Units |
---|---|
MEC ENG 104 or PHYSICS 105 | ENGIN 40 or PHYSICS 112
3-4 | 4
PHYSICS 137A | PHYSICS 137
4 | 4
CHEM 4A is intended for students majoring in Chemistry or a closely-related field.

The Humanities/Social Sciences (H/SS) requirement includes two approved Reading & Composition (R&C) courses and four additional approved courses, with which a number of specific conditions must be satisfied. R&C courses must be taken for a letter grade (C- or better required). The first half (R&C Part A) must be completed by the end of the freshman year; the second half (R&C Part B) must be completed by no later than the end of the sophomore year. The remaining courses may be taken at any time during the program. See Humanities and Social Science Requirements for complete details and a list of approved courses.

### Math Series: Select one sequence from the following:

<table>
<thead>
<tr>
<th>Math Series Course</th>
<th>Course</th>
<th>Fall Units</th>
<th>Spring Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 104 and MATH 185</td>
<td>4 Math Series Course</td>
<td>4</td>
<td>4</td>
</tr>
</tbody>
</table>

### Humanities/Social Sciences Course

<table>
<thead>
<tr>
<th>Course</th>
<th>3-4 Technical Elective</th>
<th>3-4</th>
</tr>
</thead>
</table>

### Electromagnetics & Optics Series: Select one sequence from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>4 Electromagnet &amp; Optics Series course</th>
<th>3-4</th>
</tr>
</thead>
</table>

- Three courses from the following lower division technical electives: ASTRON 7A, ASTRON 7B, BIOLOGY 1A plus BIOLOGY 1AL, BIOLOGY 1B, CHEM 1B, CHEM 3A plus CHEM 3AL, CHEM 4B, COMPSCI 70, EECS 16A, EECS 16B, MAT SCI 45 (MAT SCI 45L recommended), MEC ENG C85/CIV ENG C30.

- 15 units of upper division courses in engineering. Upper division engineering units cannot include: any course taken on a Pass/No Pass basis; any course that counts as H/SS; BIO ENG 100, DES INV courses (except DES INV 190E), ENGIN 125, ENGIN 157AC, ENGIN 180, ENGIN 183 series, ENGIN 185, ENGIN 187, ENGIN 195 series, IND ENG 172, IND ENG 185, IND ENG 186, the IND ENG 190 series, IND ENG 191, IND ENG 192, IND ENG 195, MEC ENG 191AC, MEC ENG 190K, and MEC ENG 191K.

- A minimum of 14 units of upper division physics.

- The 15 units of upper division engineering and 14 units of upper division physics DO include all required upper division engineering and physics units completed. If in selecting options to meet upper division requirements the totals do not come to 15 units of engineering and 14 units of physics, additional units (chosen in consultation with a faculty adviser) must be added.

- At least 40 units of approved upper division technical subjects (mathematics, statistics, science, and engineering). These 40 units DO include all required upper division technical course work taken for the major.

### Technical Electives must include:

- Students planning to pursue graduate school in physics are advised to complete PHYSICS 111B (for 3 units) to satisfy the laboratory requirement. Note: Students will need to obtain consent of the PHYSICS 111B instructor if they have not completed the prerequisites of PHYSICS 111A and PHYSICS 137A.

### Electromagnetic & Optics Series: Select one sequence from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>4 Electromagnetic &amp; Optics Series course</th>
<th>3-4</th>
</tr>
</thead>
</table>

Major Maps help undergraduate students discover academic, co-curricular, and discovery opportunities at UC Berkeley based on intended major or field of interest. Developed by the Division of Undergraduate Education in collaboration with academic departments, these experience maps will help you:

- **Explore** your major and gain a better understanding of your field of study
- **Connect** with people and programs that inspire and sustain your creativity, drive, curiosity and success
- **Discover** opportunities for independent inquiry, enterprise, and creative expression
- **Engage** locally and globally to broaden your perspectives and change the world
- **Reflect** on your academic career and prepare for life after Berkeley
Use the major map below as a guide to planning your undergraduate journey and designing your own unique Berkeley experience.

View the Engineering Physics Major Map PDF. (https://ue.berkeley.edu/sites/default/files/engineering_science.pdf)
