Environmental Earth Science

Bachelor of Arts (BA)

The environmental earth science major is designed to provide students with a broad background in the earth sciences with an emphasis on environmental sciences. Interrelationships between physical, biological, and chemical processes at Earth's surface will be emphasized. The major focuses broadly on the natural sciences by primarily using earth science as a base for expanding outward depending upon students' interests by incorporating courses in biology, hydrology, hazardous waste management, ecology, and natural resources. The program is designed to provide background for graduate study in environmental science, preparation for work within government agencies such as the Environmental Protection Agency, Bureau of Land Management, United States Geological Survey or consulting firms, or broader involvement in land use planning, business, policy, law or management.

Declaring the Major

The department strongly encourages students to see the student services advisor as early as possible. Students are accepted into the major with a C average or better. There are a number of scholarships and research opportunities as well as other benefits available to declared majors.

Honors Program

Students in the honors program must fulfill the following additional requirements: (1) maintain a GPA of at least 3.3 in all courses in the major, and an overall GPA of at least 3.3 in the University; and (2) carry out an individual research or study project, involving at least 3 units of EPS H195. The project is chosen in consultation with a departmental advisor, and the written report is judged by the student’s research supervisor and a departmental adviser.

Minor Program

For information regarding the requirements, please see the Minor Requirements tab. Program planning and confirmation should be done with the undergraduate student services advisor and the environmental earth science faculty advisor.

Other Majors and Minors Offered by the Department of Earth and Planetary Science

Atmospheric Science (https://guide.berkeley.edu/undergraduate/degree-programs/atmospheric-science/): BA, Minor
Climate Science (https://guide.berkeley.edu/undergraduate/degree-programs/climate-science/): Minor
Geology (https://guide.berkeley.edu/undergraduate/degree-programs/geology/): BA, Minor
Geophysics (https://guide.berkeley.edu/undergraduate/degree-programs/geophysics/): BA, Minor
Marine Science (https://guide.berkeley.edu/undergraduate/degree-programs/marine-science/): BA, Minor
Planetary Science (https://guide.berkeley.edu/undergraduate/degree-programs/planetary-science/): BA, Minor

In addition to the University, campus, and college requirements, listed on the College Requirements tab, students must fulfill the below requirements specific to their major program.

General Guidelines

1. All courses taken to fulfill the major requirements below must be taken for graded credit, other than courses listed which are offered on a Pass/No Pass basis only. Other exceptions to this requirement are noted as applicable.
2. No more than two upper division courses may be used to simultaneously fulfill requirements for a student's double major and no more one course may be used to fulfill minor program requirements with the exception of minors offered outside of the College of Letters & Science.
3. A minimum grade point average (GPA) of 2.0 must be maintained in both upper and lower division courses used to fulfill the major requirements.
4. For more information on AP/IB Exam Scores & A-Level Course Equivalencies for EPS Majors, please see here.

For information regarding residence requirements and unit requirements, please see the College Requirements tab.

Lower Division Requirements

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>

</tbody>
</table>

Electives, select 12 upper division units from the following list of suggested courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>EPS 100A</td>
<td>Minerals: Their Constitution and Origin</td>
<td>4</td>
</tr>
</tbody>
</table>

Other suggested courses:
A minimum grade point average (GPA) of 2.0 is required in the upper-
division courses to fulfill the minor requirements.

Courses used to fulfill the minor requirements may be applied toward
the Seven-Course Breadth requirement, for Letters & Science
students.

No more than one upper division course may be used to
simultaneously fulfill requirements for a student's major and minor
programs.

All minor requirements must be completed prior to the last day of
finals during the semester in which the student plans to graduate. If
students cannot finish all courses required for the minor by that time,
they should see a College of Letters & Science adviser.

All minor requirements must be completed within the unit ceiling. (For
further information regarding the unit ceiling, please see the College
Requirements tab.)

**Requirements**

**Lower Division**

- **EPS 50** The Planet Earth (or equivalent) 4

**Upper Division**

Select a minimum of five of the following:

- **EPS 100A** Minerals: Their Constitution and Origin [4]
- **EPS 100B** Geodynamics [4]
- **EPS 113** Communicating Ocean Science [4]
- **EPS 102** History and Evolution of Planet Earth [4]
- **EPS 103** Introduction to Aquatic and Marine Geochemistry
  [4]
- **EPS 109** Computer Simulations with Jupyter Notebooks [4]
- **EPS 115** Stratigraphy and Earth History [4]
- **EPS 117** Geomorphology [4]
- **EPS 131** Geochemistry [4]
- **EPS C178** Applied Geophysics [3]
- **EPS C180** Air Pollution [3]
- **EPS C181** Atmosphere, Ocean, and Climate Dynamics [3]

Undergraduate students must fulfill the following requirements in addition
to those required by their major program.

For a detailed lists of L&S requirements, please see Overview tab
to the right in this guide or visit the L&S Degree Requirements
(https://lsadvising.berkeley.edu/degree-requirements/) webpage. For College
advising appointments, please visit the L&S Advising (https://
lsadvising.berkeley.edu/home/) Pages.

**University of California Requirements**

**Entry Level Writing**

All students who will enter the University of California as freshmen must
demonstrate their command of the English language by fulfilling the
Entry Level Writing requirement. Fulfillment of this requirement is also a
prerequisite to enrollment in all reading and composition courses at UC
Berkeley and must be taken for a letter grade.

**General Guidelines**

1. All minors must be declared before the first day of classes in your
   Expected Graduation Term (EGT). For summer graduates, minors
   must be declared prior to the first day of Summer Session A.

2. All upper-division courses must be taken for a letter grade.

3. A minimum of three of the upper-division courses taken to fulfill the
   minor requirements must be completed at UC Berkeley.
American History and American Institutions (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/american-history-institutions-requirement/)
The American History and American Institutions requirements are based on the principle that all U.S. residents who have graduated from an American university should have an understanding of the history and governmental institutions of the United States.

Berkeley Campus Requirement
American Cultures (http://americancultures.berkeley.edu/students/courses/)
All undergraduate students at Cal need to take and pass this campus requirement course in order to graduate. The requirement offers an exciting intellectual environment centered on the study of race, ethnicity and culture of the United States. AC courses are plentiful and offer students opportunities to be part of research-led, highly accomplished teaching environments, grappling with the complexity of American Culture.

College of Letters & Science Essential Skills Requirements
Quantitative Reasoning (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/quantitative-reasoning-requirement/)
The Quantitative Reasoning requirement is designed to ensure that students graduate with basic understanding and competency in math, statistics, or computer/data science. The requirement may be satisfied by exam or by taking an approved course taken for a letter grade.

Foreign Language (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/foreign-language-requirement/)
The Foreign Language requirement may be satisfied by demonstrating proficiency in reading comprehension, writing, and conversation in a foreign language equivalent to the second semester college level, either by passing an exam or by completing approved course work taken for a letter grade.

Reading and Composition (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/reading-composition-requirement/)
In order to provide a solid foundation in reading, writing, and critical thinking the College of Letters and Science requires two semesters of lower division work in composition in sequence. Students must complete parts A & B reading and composition courses in sequential order by the end of their fourth semester for a letter grade.

College of Letters & Science 7 Course Breadth Requirements
Breadth Requirements (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/#breadthrequirementstext)
The undergraduate breadth requirements provide Berkeley students with a rich and varied educational experience outside of their major program. As the foundation of a liberal arts education, breadth courses give students a view into the intellectual life of the University while introducing them to a multitude of perspectives and approaches to research and scholarship. Engaging students in new disciplines and with peers from other majors, the breadth experience strengthens interdisciplinary connections and context that prepares Berkeley graduates to understand and solve the complex issues of their day.

Unit Requirements
• 120 total units
• Of the 120 units, 36 must be upper division units
• Of the 36 upper division units, 6 must be taken in courses offered outside your major department

Residence Requirements
For units to be considered in “residence,” you must be registered in courses on the Berkeley campus as a student in the College of Letters & Science. Most students automatically fulfill the residence requirement by attending classes at Cal for four years, or two years for transfer students. In general, there is no need to be concerned about this requirement, unless you graduate early, go abroad for a semester or year, or want to take courses at another institution or through UC Extension during your senior year. In these cases, you should make an appointment to meet an L&S College adviser to determine how you can meet the Senior Residence Requirement.

Note: Courses taken through UC Extension do not count toward residence.

Senior Residence Requirement
After you become a senior (with 90 semester units earned toward your B.A. degree), you must complete at least 24 of the remaining 30 units in residence in at least two semesters. To count as residence, a semester must consist of at least 6 passed units. Intercampus Visitor, EAP, and UC Berkeley-Washington Program (UCDC) units are excluded.

You may use a Berkeley Summer Session to satisfy one semester of the Senior Residence requirement, provided that you successfully complete 6 units of course work in the Summer Session and that you have been enrolled previously in the college.

Modified Senior Residence Requirement
Participants in the UC Education Abroad Program (EAP), Berkeley Summer Abroad, or the UC Berkeley Washington Program (UCDC) may meet a Modified Senior Residence requirement by completing 24 (excluding EAP) of their final 60 semester units in residence. At least 12 of these 24 units must be completed after you have completed 90 units.

Upper Division Residence Requirement
You must complete in residence a minimum of 18 units of upper division courses (excluding UCEAP units), 12 of which must satisfy the requirements for your major.

Mission
The goal of the earth and planetary sciences (EPS) BA degree is to provide students with a broad and sound education that provides general and specialized knowledge and is intellectually challenging and stimulating. Upon completion of the degree students are ready to enter graduate school at top-ranking institutions (about half of them choose this path), find employment in the profession (geological and environmental engineering and consulting are major opportunities), continue in public education as teachers, or use their background as a sound basis for a new career such as in public policy, law or medical sciences.
Learning Goals for the Major

EPS majors acquire knowledge through course work, laboratory training (expertise in experimental techniques), primary field research, library research, and computer applications, with oral presentations and written reports required in many of our classes.

The undergraduate program provides strong technical training for those who wish to pursue professional careers in the earth, environmental and planetary sciences, as well as training in analytical, creative and critical thinking and communication that serves well those who choose paths in new fields.

The environmental earth science track focuses broadly on the natural sciences, using earth science as a base to expand outward. This track can accommodate the student's interest by incorporating classes in biology, hydrology, hazardous waste management, ecology, and natural resources. Interrelationships are key to this course of study, with an emphasis on how the physical, biological, and chemical processes at the earth's surface affect each other.

This track is excellent preparation for graduate study in environmental science, but it also provides a strong foundation for work within governmental agencies such as the Environmental Protection Agency, Bureau of Land Management, United States Geological Survey or consulting firms, or broader involvement in land use planning, business, policy, law or management. This is a great way to obtain a good science foundation for students who are interested in teaching science in elementary or secondary education.

Major maps are experience maps that help undergraduates plan their Berkeley journey based on intended major or field of interest. Featuring student opportunities and resources from your college and department as well as across campus, each map includes curated suggestions for planning your studies, engaging outside the classroom, and pursuing your career goals in a timeline format.

Use the major map below to explore potential paths and design your own unique undergraduate experience:

EPS 10 Earth’s Greatest Volcanic Eruptions 3 Units
Terms offered: Prior to 2007
A science-based course on the most significant eruptions Earth has produced. Most eruptions discussed will be from within historic time and will involve information from geology (volcanology), geography, archaeology, history, art, and paleoenvironmental records such as tree-rings and ice-cores. After a two-class introduction to volcanoes, volcanic activity, and volcanology, and the hazards vs benefits of eruptions, each class will feature one of more eruptions of different types from around the world. A science-based interpretation of the eruptions and effects on human-kind and the environment, will be presented. Class participants will learn about one type of natural hazard, its causes, and the variability of volcanism on Earth.

Earth's Greatest Volcanic Eruptions: Read More [+]

Hours & Format
Summer: 6 weeks - 8 hours of lecture per week

Subject/Course Level: Earth and Planetary Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Self, Manga

EPS C12 The Planets 3 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
A tour of the mysteries and inner workings of our solar system. What are planets made of? Why do they orbit the sun the way they do? How do planets form, and what are they made of? Why do some bizarre moons have oceans, volcanoes, and ice floes? What makes the Earth hospitable for life? Is the Earth a common type of planet or some cosmic quirk? This course will introduce basic physics, chemistry, and math to understand planets, moons, rings, comets, asteroids, atmospheres, and oceans. Understanding other worlds will help us save our own planet and help us understand our place in the universe.

The Planets: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Summer: 6 weeks - 7.5 hours of lecture and 2.5 hours of discussion per week

Environmental Earth Sciences: Read Less [-]

**EPS 81 Extreme Weather and Climate 3 Units**
Terms offered: Spring 2024, Spring 2023, Spring 2020
This course provides a fundamental understanding of the extreme weather and climate variability that have affected Earth in recent decades. We begin with an overview of fire weather and hurricanes, using these phenomena to explore general principles that are also relevant to drought, tornadoes, and other extreme weather. Then we examine how atmospheric composition, planetary orbits, and radiation control global climate, and how all of these influence extreme weather. Additional topics include prediction of complex systems, chaos theory, feedbacks, instability, atmospheric aerosols, and air pollution. We use the atmospheres of other planets for comparison, learning more about Earth by seeing just how different planetary climate can be.
Extreme Weather and Climate: Read More [+]

EPS 88 PyEarth: A Python Introduction to Earth Science 2 Units
Terms offered: Fall 2024, Fall 2023, Spring 2023
Earthquakes and El Ninos are examples of natural hazards in California. The course uses Python/Jupyter Notebook and real-world observations to introduce students to these and other Earth phenomena and their underlying physics. The students will learn how to access and visualize the data, extract signals, and make probability forecasts. The final module is a project that synthesizes the course material to make a probabilistic forecast. The course will be co-taught by a team of EPS faculty, and the focus of each semester will depend on the expertise of the faculty in charge.

Genesis and Interpretation of Rocks: Read Less [-]

**EPS C100 Communicating Ocean Science 4 Units**

For undergraduates interested in improving their ability to communicate their scientific knowledge by teaching ocean science in elementary schools or science centers/aquariums. The course will combine instruction in inquiry-based teaching methods and learning pedagogy with six weeks of supervised teaching experience in a local school classroom or the Lawrence Hall of Science with a partner. Thus, students will practice communicating scientific knowledge and receive mentoring on how to improve their presentations.

Communicating Ocean Science: Read More [+]

**Rules & Requirements**

**Prerequisites:** One course in introductory biology, geology, chemistry, physics, or marine science required and interest in ocean science; junior, senior, or graduate standing; consent of instructor required for sophomores

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of fieldwork per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Rhew

**Formerly known as:** Earth and Planetary Science C100/Geography C146/Integrative Biology C100

**Also listed as:** GEOG C146/INTEGBI C100

Communicating Ocean Science: Read Less [-]
**EPS 101 Field Geology and Digital Mapping 4 Units**
Terms offered: Fall 2024, Fall 2023, Fall 2022
Geological mapping, field observation, and problem-solving in the Berkeley hills and environs leading to original interpretation of geological processes and history from stratigraphic, structural, and lithological investigations. Integration of the Berkeley hills geology into the Coast Ranges and California as a whole through field trips to key localities. Training in digital field mapping, global positioning systems, and laser surveying. Interdisciplinary focus encourages participation by nonmajors.

**Rules & Requirements**

**Prerequisites:** 50 or equivalent introductory course in Earth and Planetary Science

**Hours & Format**

Fall and/or spring: 15 weeks - 7 hours of fieldwork and 2 hours of lecture per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam not required.

**Formerly known as:** Geology 101

Field Geology and Digital Mapping: Read Less [-]

**EPS 102 History and Evolution of Planet Earth 4 Units**
Terms offered: Fall 2024, Fall 2023, Fall 2022
Formation and evolution of the earth. Nucleosynthesis; formation of the solar system; planetary accretion; dating the earth and solar system; formation of the core, mantle, oceans, and atmosphere; plate tectonics; heat transfer and internal dynamics; stratigraphic record of environment, and evolution; climate history and climate change.

**History and Evolution of Planet Earth: Read More [+]**

**Rules & Requirements**

**Prerequisites:** 50

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

History and Evolution of Planet Earth: Read Less [-]

**EPS 103 Introduction to Aquatic and Marine Geochemistry 4 Units**
Terms offered: Spring 2024, Spring 2023, Spring 2022
Introduction to marine geochemistry: the global water cycle; processes governing the distribution of chemical species within the hydrosphere; ocean circulation; chemical mass balances, fluxes, and reactions in the marine environment from global to submicron scales; carbon system equilibrium chemistry and biogeochemistry of fresh and salt water; applications of natural and anthropogenic stable and radioactive tracers; internal ocean processes. Students participate in a one day field trip to sample and analyze waters in the vicinity of Tomales Bay and Point Reyes.

3 hours of lecture and 1.5 hours of discussion week, and a 10 hour field trip.

Introduction to Aquatic and Marine Geochemistry: Read More [+]

**Rules & Requirements**

**Prerequisites:** Chemistry 1A, Mathematics 1A or 16A. C82 recommended

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Bishop

Introduction to Aquatic and Marine Geochemistry: Read Less [-]

**EPS 104 Mathematical Methods in Geophysics 4 Units**
Terms offered: Spring 2024, Spring 2023, Spring 2022
Linear systems. Linear inverse problems, least squares; generalized inverse, resolution; Fourier series, integral transforms; time series analysis, spherical harmonics; partial differential equations of geophysics; functions of a complex variable; probability and significance tests, maximum likelihood methods. Intended for students in geophysics and other physical sciences.

**Mathematical Methods in Geophysics: Read More [+]**

**Rules & Requirements**

**Prerequisites:** Mathematics 53-54

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of laboratory per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Formerly known as:** Geophysics 104

Mathematical Methods in Geophysics: Read Less [-]
EPS 108 Geodynamics 4 Units
Terms offered: Spring 2023, Spring 2021, Spring 2019
Basic principles in studying the physical properties of earth materials and the dynamic processes of the earth. Examples are drawn from tectonics, mechanics of earthquakes, etc., to augment course material.
Geodynamics: Read More [+]

Rules & Requirements
Prerequisites: EPS 50, Physics 7A, or Mathematics 53, 54

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Geodynamics: Read Less [-]

EPS 109 Computer Simulations with Jupyter Notebooks 4 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
Introduction to modern computer simulation methods and their application to selected Earth and Planetary Science problems. In hands-on computer labs, students will learn about numerical algorithms, learn to program and modify provided programs, and display the solution graphically. This is an introductory course and no programming experience is required. Examples include fractals in geophysics, properties of materials at high pressure, celestial mechanics, and diffusion processes in the Earth. Topics range from ordinary and partial differential equations to molecular dynamics and Monte Carlo simulations.
Computer Simulations with Jupyter Notebooks: Read More [+]

Rules & Requirements
Prerequisites: Math 1A or equivalent

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 2 hours of laboratory per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Computer Simulations with Jupyter Notebooks: Read Less [-]

EPS 113 Biological Oceanography and Biogeochemistry 4 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
We will survey the biological oceanography underlying geochemical transformations in the sea. Students will develop a strong understanding of evolution, the central dogma of molecular biology, cell structure across the domains of life, population ecology, the metabolic strategies employed by marine organisms, and the biomarkers of life in the ocean. These biological concepts will be the foundation for understanding geochemical shifts as the earth was oxygenated, changes in inorganic nutrient pools with depth and location, nitrogen cycling, Southern Ocean silica leakage, the cryptic sulfur cycle, redox chemistry leveraged by organisms at hydrothermal vents, and the biological carbon pump.
Biological Oceanography and Biogeochemistry: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Biological Oceanography and Biogeochemistry: Read Less [-]

EPS 115 Stratigraphy and Earth History 4 Units
Terms offered: Spring 2022, Spring 2020, Spring 2018
Collecting, analyzing, and presenting stratigraphic data; dating and correlating sedimentary rocks; recognizing ancient environments and reconstructing Earth history; seismic and sequence stratigraphy; event stratigraphy and neocatastrophism; applications of stratigraphy to climate change, petroleum geology, and archaeology.
Stratigraphy and Earth History: Read More [+]

Rules & Requirements
Prerequisites: 50, 100A, 100B, or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Alvarez
Formerly known as: Geology 115

Stratigraphy and Earth History: Read Less [-]
**EPS 116 Structural Geology and Tectonics 3 Units**

Terms offered: Fall 2024, Fall 2022, Fall 2020

Introduction to the geometry and mechanics of brittle and ductile geologic structures; their origins and genetic relation to stress fields and their use as kinematic indicators; case histories of selected regions to elucidate tectonic evolution in different plate tectonic settings. Laboratory exercises will focus on analysis of hand specimens and structural relations portrayed on geologic maps. Several trips to observe geologic structures in the field to supplement laboratory exercises.

**Rules & Requirements**

**Prerequisites:** 50

**Hours & Format**

Fall and/or spring: 15 weeks - 2 hours of lecture and 2 hours of laboratory per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Alternative to final exam.

**Instructor:** Burgmann

Structural Geology and Tectonics: Read Less [-]

---

**EPS 117 Geomorphology 4 Units**

Terms offered: Fall 2024, Fall 2023, Fall 2022

Quantitative examination of landforms, runoff generation, weathering, mechanics of soil erosion by water and wind, mass wasting, glacial and periglacial processes and hillslope evolution.

**Rules & Requirements**

**Prerequisites:** Consent of instructor

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Brimhall

Formerly known as: Geology 117

Geomorphology: Read Less [-]

---

**EPS 118 Advanced Field Course 4 Units**

Terms offered: Spring 2024, Spring 2022, Spring 2021

Advanced geological mapping, intensive field observation, and problem solving in the field areas selected by instructors. Includes preparation of final reports.

**Rules & Requirements**

**Prerequisites:** 50, 100A-100B, 101, or consent of instructor; 119 is strongly recommended

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of discussion per week

Summer: 6 weeks - 7.5 hours of lecture and 5 hours of discussion per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam not required.

**Instructor:** Brimhall

Formerly known as: Geology 118

Advanced Field Course: Read Less [-]

---

**EPS 119 Geologic Field Studies 2 Units**

Terms offered: Fall 2023, Fall 2021, Spring 2019

Two to four weekend field trips to localities of geological interest.

**Rules & Requirements**

**Prerequisites:** 101 and consent of instructor

**Repeat rules:** Course may be repeated for credit without restriction.

**Hours & Format**

Fall and/or spring: 15 weeks - 0 hours of fieldwork per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Brimhall

Formerly known as: Geology 119

Geologic Field Studies: Read Less [-]
**EPS 122 Physics of the Earth and Planetary Interiors 3 Units**
Terms offered: Spring 2024, Spring 2022, Spring 2020
Gravity field, density distribution, and internal seismic structure of the Earth and planets. Constitution, composition, temperature distribution, and energetics of the Earth's interior. The geomagnetic field and the geodynamo, and concepts in seismic imaging and geophysical fluid dynamics. This course welcomes physics, computer science, engineering and applied maths majors.
Physics of the Earth and Planetary Interiors: Read More [+]

**Rules & Requirements**

Prerequisites: Physics 7A-B, Mathematics 53-54, or equivalent

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Earth and Planetary Science/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Physics of the Earth and Planetary Interiors: Read Less [-]

**EPS 124 Isotopic Geochemistry 4 Units**
Terms offered: Spring 2023, Spring 2021, Spring 2019
An overview of the use of natural isotopic variations to study earth, planetary, and environmental problems. Topics include geochronology, cosmogenic isotope studies of surficial processes, radiocarbon and the carbon cycle, water isotopes in the water cycle, and radiogenic and stable isotope studies of planetary evolution, mantle dynamics, volcanoes, groundwater, and geothermal systems. The course begins with a short introduction to nuclear processes and includes simple mathematical models used in isotope geochemistry.
Isotopic Geochemistry: Read More [+]

**Rules & Requirements**

Prerequisites: Chemistry 1A-1B, Mathematics 1A-1B

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Earth and Planetary Science/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Shuster

Isotopic Geochemistry: Read Less [-]

**EPS 125 Stable Isotope Geochemistry 4 Units**
Terms offered: Spring 2024, Spring 2022, Spring 2020
This course provides an introduction to the principles of stable isotope geochemistry and the application of these principles to problems in Earth and planetary science. This course provides a foundation for the physical, chemical, and biological processes that cause isotopes to fractionate in nature including the kinetic theory of gases, equilibrium thermodynamics, and the kinetics of chemical reactions. These principles will be applied to the study of problems related to the water cycle, paleoclimate, igneous petrology, biogeochemical cycles in the past and present, and planetary science.

Stable Isotope Geochemistry: Read More [+]

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Earth and Planetary Science/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Stolper

Stable Isotope Geochemistry: Read Less [-]

**EPS C129 Biometeorology 3 Units**
Terms offered: Fall 2024, Fall 2022, Fall 2020
This course describes how the physical environment (light, wind, temperature, humidity) of plants and soil affects the physiological status of plants and how plants affect their physical environment. Using experimental data and theory, it examines physical, biological, and chemical processes affecting transfer of momentum, energy, and material (water, CO2, atmospheric trace gases) between vegetation and the atmosphere. Plant biometeorology instrumentation and measurements are also discussed.

Biometeorology: Read More [+]

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Earth and Planetary Science/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Baldocchi

Also listed as: ESPM C129

Biometeorology: Read Less [-]
EPS 130 Strong Motion Seismology 3 Units

Grading/Final exam status: Letter grade. Final exam required.
Instructors: Chiang, Dressing, Militzer
Also listed as: ASTRON C162
Planetary Astrophysics: Read Less [-]
EPS C178 Applied Geophysics 3 Units
Terms offered: Fall 2024, Fall 2022, Fall 2021, Fall 2019
The theory and practice of geophysical methods for determining the subsurface distribution of physical rock and soil properties. Measurements of gravity and magnetic fields, electrical and electromagnetic fields, and seismic velocity are interpreted to map the subsurface distribution of density, magnetic susceptibility, electrical conductivity, and mechanical properties.
Applied Geophysics: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Rector
Also listed as: CIV ENG C178

Applied Geophysics: Read Less [-]

EPS C180 Air Pollution 3 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
This course is an introduction to air pollution and the chemistry of earth's atmosphere. We will focus on the fundamental natural processes controlling trace gas and aerosol concentrations in the atmosphere, and how anthropogenic activity has affected those processes at the local, regional, and global scales. Specific topics include stratospheric ozone depletion, increasing concentrations of greenhouse gases, smog, and changes in the oxidation capacity of the troposphere.
Air Pollution: Read More [+]

Rules & Requirements
Prerequisites: CHEM 1A, CHEM 1B, and PHYSICS 8A or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Chiang, Fung, Boos
Also listed as: CIV ENG C106/ESPM C180

Air Pollution: Read Less [-]

EPS C181 Atmosphere, Ocean, and Climate Dynamics 3 Units
Terms offered: Fall 2024, Fall 2023, Fall 2022, Fall 2020
This course examines the processes that determine the structure and circulation of the Earth's atmosphere and ocean, and how they control regional and global climate. The approach is deductive rather than descriptive: to determine the properties and behavior of the atmosphere and ocean based on the laws of physics and fluid dynamics. Topics will include interaction between radiation and atmospheric composition; the role of water in the energy and radiation balance; governing equations for atmospheric and oceanic motion, mass conservation, and thermodynamic energy balance; geostrophic flow, quasigeostrophic motion, baroclinic instability, and dynamics of extratropical cyclones and wind-driven ocean gyres.
Atmosphere, Ocean, and Climate Dynamics: Read More [+]

Rules & Requirements
Prerequisites: Mathematics 53, 54; Physics 7A-7B-7C

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Chiang, Fung, Boos
Also listed as: GEOG C139

Atmosphere, Ocean, and Climate Dynamics: Read Less [-]
EPS C182 Atmospheric Chemistry and Physics Laboratory 3 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
Fluid dynamics, radiative transfer, and the kinetics, spectroscopy, and measurement of atmospherically relevant species are explored through laboratory experiments, numerical simulations, and field observations. Atmospheric Chemistry and Physics Laboratory: Read More [+]

Rules & Requirements
Prerequisites: Earth and Planetary Science 50 and 102 with grades of C- or higher (one of which may be taken concurrently) or two of the following: Chemistry 120A, 120B, C130, or 130B with grades of C- or higher (one of which may be taken concurrently)
Credit Restrictions: Deficiency in C182 may be removed by successfully completing 125. Consent of instructor is required to enroll in C182 after completing 125.

Hours & Format
Fall and/or spring: 15 weeks - 1.5 hours of lecture and 5 hours of laboratory per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Formerly known as: Chemistry C182/Earth and Planetary Science C182
Also listed as: CHEM C182

EPS C183 Carbon Cycle Dynamics 3 Units
Terms offered: Fall 2023, Fall 2021, Spring 2019
The focus is the (unsolved) puzzle of the contemporary carbon cycle. Why is the concentration of atmospheric CO2 changing at the rate observed? What are the terrestrial and oceanic processes that add and remove carbon from the atmosphere? What are the carbon management strategies under discussion? How can emission protocols be verified? Students are encouraged to gain hands-on experience with the available data, and learn modeling skills to evaluate hypotheses of carbon sources and sinks.
Carbon Cycle Dynamics: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Formerly known as: Chemistry C182/Earth and Planetary Science C182
Also listed as: CHEM C182

EPS H195 Senior Honors Course 3 Units
Terms offered: Fall 2014, Spring 2013, Fall 2012
Original research and preparation of an acceptable thesis. May be taken during two consecutive semesters of senior year and may be substituted for six units of the upper division requirement with consent of major adviser.
Senior Honors Course: Read More [+]

Rules & Requirements
Prerequisites: Limited to honors candidates
Repeat rules: Course may be repeated for credit up to a total of 6 units.

Hours & Format
Fall and/or spring: 15 weeks - 0-0 hours of independent study per week
Summer:
6 weeks - 0-0 hours of independent study per week
8 weeks - 0-0 hours of independent study per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Senior Honors Course: Read Less [-]

EPS 197 Field Study 1 - 4 Units
Terms offered: Fall 2010
Written proposal signed by faculty sponsor and approved by major faculty advisor. Supervised experience relevant to specific aspects of students’ EPS specialization in off-campus organization. Regular meetings with faculty sponsor and written report required.
Field Study: Read More [+]

Rules & Requirements
Prerequisites: Upper division standing and declared major in Earth and Planetary Science
Credit Restrictions: Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog.
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3-12 hours of fieldwork per week
Summer:
6 weeks - 7.5-30 hours of fieldwork per week
8 weeks - 6-24 hours of fieldwork per week
10 weeks - 4.5-18 hours of fieldwork per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Field Study: Read Less [-]
**EPS 198 Directed Group Study 1 - 4 Units**
Terms offered: Spring 2024, Fall 2023, Spring 2023
Group studies of selected topics which vary from semester to semester.
Directed Group Study: Read More [+]

**Rules & Requirements**
Repeat rules: Course may be repeated for credit without restriction.

**Hours & Format**
Fall and/or spring: 15 weeks - 1-4 hours of directed group study per week

Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Formerly known as: Geology 198

**EPS 199 Supervised Independent Study and Research 1 - 4 Units**
Terms offered: Fall 2020, Fall 2015, Spring 2015
Enrollment is restricted by regulations.
Supervised Independent Study and Research: Read More [+]

**Rules & Requirements**
Repeat rules: Course may be repeated for credit without restriction.

**Hours & Format**
Fall and/or spring: 15 weeks - 1-4 hours of independent study per week
Summer:
6 weeks - 2.5-10 hours of independent study per week
8 weeks - 1.5-7.5 hours of independent study per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Formerly known as: Geology 199

**EPS 200 Problems in Hydrogeology 4 Units**
Terms offered: Spring 2022, Spring 2021, Fall 2019
Current problems in fluid flow, heat flow, and solute transport in the earth.
Pressure- and thermal-driven flow, instability, convection, interaction between fluid flow and chemical reactions. Pore pressure; faulting and earthquakes; diagenesis; hydrocarbon migration and trapping; flow-associated mineralization; contaminant problems.
Problems in Hydrogeology: Read More [+]

**Rules & Requirements**
Prerequisites: Physics 7A-7B, Chemistry 1A-1B, Math 53 and 54; open to senior undergraduates with appropriate prerequisites

**Hours & Format**
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Graduate
Grading: Letter grade.
Formerly known as: Geophysics C200 and Geology C200

**EPS 203 Introduction to Aquatic and Marine Geochemistry 4 Units**
Terms offered: Spring 2023, Spring 2022, Spring 2021
Introduction to marine geochemistry: the global water cycle; processes governing the distribution of chemical species within the hydrosphere; ocean circulation; chemical mass balances, fluxes, and reactions in the marine environment from global to submicron scales; carbon system equilibrium chemistry and biogeochemistry of fresh and salt water; applications of natural and anthropogenic stable and radioactive tracers; internal ocean processes. Students participate in a one day field trip to sample and analyze waters in the vicinity of Tomales Bay and Point Reyes. 3 hours of lecture and 1.5 hours of discussion week, and a 10 hour field trip.
Introduction to Aquatic and Marine Geochemistry: Read More [+]

**Rules & Requirements**
Prerequisites: Chemistry 1A, Mathematics 1A, or 16A. C82 recommended

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of seminar per week
Additional Details
Subject/Course Level: Earth and Planetary Science/Graduate
Grading: Letter grade.
Formerly known as: Geology 212
Advanced Stratigraphy and Tectonics: Read Less [-]

EPS 214 Igneous Petrology 4 Units
Terms offered: Spring 2024, Spring 2020, Spring 2017
The composition, generation, and cooling of magmas to form igneous rocks. The physical and thermodynamic properties of silicate liquids.
Igneous Petrology: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 4 hours of laboratory per week
Additional Details
Subject/Course Level: Earth and Planetary Science/Graduate
Grading: Letter grade.
Formerly known as: Geology 214
Igneous Petrology: Read Less [-]

EPS 216 Active Tectonics 3 Units
Terms offered: Fall 2023, Fall 2021, Fall 2018
This course is a graduate course designed to introduce students in the earth sciences to the geology of earthquakes, including tectonic geomorphology, paleoseismology and the analysis and interpretation of geodetic measurements of active deformation. While the focus will be primarily on seismically active faults, we will also discuss deformation associated with landslides, regional isostatic rebound, and volcanoes, as well as measurements of global plate motions. We will address methods and applications in paleoseismology, tectonic geomorphology, and geodesy. The course will address measurement techniques (e.g., GPS, leveling, etc.), data analysis and inversion, and subsequent modeling and interpretation of the data. The integration of geodetic measurements with geologic and seismologic data allows an improved understanding of active processes.
Active Tectonics: Read More [+]
Rules & Requirements
Prerequisites: 116 or equivalent, Physics 7A or equivalent, or consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Earth and Planetary Science/Graduate
Grading: Letter grade.
Formerly known as: Geology 207
Active Tectonics: Read Less [-]
**EPS 217 Fluvial Geomorphology 4 Units**
Terms offered: Spring 2020, Spring 2019, Spring 2018
Application of fluid mechanics to sediment transport and development of river morphology. Form and process in river meanders, the pool-riffle sequence, aggradation, grade, and baselevel.
Fluvial Geomorphology: Read More [+]

**Rules & Requirements**

**Prerequisites:** Consent of instructor

**Repeat rules:** Course may be repeated for credit without restriction.

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of laboratory per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Graduate

**Grading:** Letter grade.

**Formerly known as:** Geology 217

Fluvial Geomorphology: Read Less [-]

**EPS 220 Advanced Concepts in Mineral Physics 3 Units**
Terms offered: Fall 2022, Fall 2021, Spring 2020
A combined seminar and lecture course covering advanced topics related to mineral physics. The interface between geophysics with the other physical sciences is emphasized. Topics vary each semester.
Advanced Concepts in Mineral Physics: Read More [+]

**Rules & Requirements**

**Prerequisites:** Consent of instructor

**Repeat rules:** Course may be repeated for credit without restriction.

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Graduate

**Grading:** Letter grade.

**Formerly known as:** Geophysics 220

Advanced Concepts in Mineral Physics: Read Less [-]

**EPS 224 Isotopic Geochemistry 4 Units**
Terms offered: Spring 2024, Spring 2023, Spring 2021
An overview of the use of natural isotopic variations to study earth, planetary, and environmental problems. Topics include geochronology, cosmogenic isotope studies of surficial processes, radiocarbon and the carbon cycle, water isotopes in the water cycle, and radiogenic and stable isotope studies of planetary evolution, mantle dynamics, volcanoes, groundwater, and geothermal systems. The course begins with a short introduction to nuclear processes and includes simple mathematical models used in isotope geochemistry.
Isotopic Geochemistry: Read More [+]

**Rules & Requirements**

**Prerequisites:** Chemistry 1A-1B, Mathematics 1A-1B

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Graduate

**Grading:** Letter grade.

**Instructor:** David Shuster

Isotopic Geochemistry: Read Less [-]

**EPS 225 Topics in High-Pressure Research 2 Units**
Terms offered: Spring 2023, Spring 2022, Fall 2021
Analysis of current developments and techniques in experimental and theoretical high-pressure research, with applications in the physical sciences. Topics vary each semester.
Topics in High-Pressure Research: Read More [+]

**Rules & Requirements**

**Prerequisites:** Consent of instructor

**Repeat rules:** Course may be repeated for credit without restriction.

**Hours & Format**

Fall and/or spring: 15 weeks - 2 hours of lecture per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Graduate

**Grading:** Letter grade.

**Formerly known as:** Geophysics 225

Topics in High-Pressure Research: Read Less [-]
EPS 229 Introduction to Climate Modeling 3 Units
Terms offered: Fall 2022, Spring 2021, Spring 2018
This course emphasizes the fundamentals of the climate system via a hierarchy of climate models. Topics will include energy balance, numerical techniques, climate observations, atmospheric and oceanic circulation and heat transports, and parameterizations of eddy processes. The model hierarchy will also explore nonlinear and stochastic processes, and biogeochemistry. Students will build computational models to investigate climate feedbacks, climate sensitivity, and response times.
Introduction to Climate Modeling: Read More [+]

Rules & Requirements
Repeat rules: Course may be repeated for credit with instructor consent.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Graduate
Grading: Letter grade.
Instructor: Fung
Formerly known as: Earth and Planetary Science C229/Integrative Biology C229

Introduction to Climate Modeling: Read Less [-]

EPS 230 Radiation and Its Interactions with Climate 3 Units
Terms offered: Fall 2023, Fall 2021, Fall 2019
Introduction to role of radiative processes in structure and evolution of the climate system. Electromagnetism; solar and terrestrial radiation; interactions of radiation with Earth's atmosphere, ocean, and land surface; greenhouse and runaway greenhouse effects; radiative balance of the climate system; energy-balance climate models; effects of clouds and aerosols; interactions of radiation with atmospheric and oceanic dynamics; radiative processes and paleoclimate; radiative processes and anthropogenic global warming.
Radiation and Its Interactions with Climate: Read More [+]

Rules & Requirements
Prerequisites: Physics 105, 110A, 110B

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Graduate
Grading: Letter grade.
Instructor: Collins
Radiation and Its Interactions with Climate: Read Less [-]

EPS 236 Geological Fluid Mechanics 4 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
An advanced course in the application of fluid mechanics in the earth sciences, with emphasis on the design and scaling of laboratory and numerical models. Principals of inviscid and viscous fluid flow; dynamic similarity; boundary layers; convection; instabilities; gravity currents; mixing and chaos; porous flow. Applications to mantle convection, magma dynamics, atmosphere and ocean dynamics, sediment/debris flows, and hydrogeology. Topics may vary from year to year.
Geological Fluid Mechanics: Read More [+]

Rules & Requirements
Prerequisites: Continuum/fluid mechanics at the level of 108 or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Graduate
Grading: Letter grade.
Formerly known as: Geophysics 238
Geological Fluid Mechanics: Read Less [-]

EPS C241 Stable Isotope Ecology 5 Units
Course focuses on principles and applications of stable isotope chemistry as applied to the broad science of ecology. Lecture topics include principles of isotope behavior and chemistry, and isotope measurements in the context of terrestrial, aquatic, and marine ecological processes and problems. Students participate in a set of laboratory exercises involving preparation of samples of choice for isotopic analyses, the use of the mass spectrometer and optical analysis systems, and the anlaysis of data.
Stable Isotope Ecology: Read More [+]

Rules & Requirements
Prerequisites: Graduate standing

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Graduate
Grading: Letter grade.
Instructors: Amundson, Dawson, Mambelli
Also listed as: ESPM C220/INTEGBI C227
Stable Isotope Ecology: Read Less [-]
EPS C242 Glaciology 4 Units
Terms offered: Spring 2024, Spring 2021, Spring 2020, Spring 2018
A review of the mechanics of glacial systems, including formation of ice masses, glacial flow mechanisms, subglacial hydrology, temperature and heat transport, global flow, and response of ice sheets and glaciers. We will use this knowledge to examine glaciers as geomorphologic agents and as participants in climate change.
Glaciology: Read More [+]

Rules & Requirements
Prerequisites: Graduate standing or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Graduate
Grading: Letter grade.
Instructor: Cuffey
Formerly known as: 241
Also listed as: GEOG C241
Glaciology: Read Less [-]

EPS C249 Solar System Astrophysics 3 Units
Terms offered: Fall 2019, Fall 2018, Fall 2017
The physical foundations of planetary sciences. Topics include planetary interiors and surfaces, planetary atmospheres and magnetospheres, and smaller bodies in our solar system. The physical processes at work are developed in some detail, and an evolutionary picture for our solar system, and each class of objects, is developed. Some discussion of other (potential) planetary systems is also included.
Solar System Astrophysics: Read More [+]

Rules & Requirements
Prerequisites: 149, 169, C160A or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Graduate
Grading: Letter grade.
Instructors: Chiang, de Pater
Also listed as: ASTRON C249
Solar System Astrophysics: Read Less [-]

EPS 250 Advanced Topics in Earth and Environmental Sciences 3 Units
Terms offered: Fall 2016, Fall 2014, Fall 2013
Review of recent literature and discussion of ongoing research at the interface between earth science and environmental science.
Advanced Topics in Earth and Environmental Sciences: Read More [+]

Rules & Requirements
Prerequisites: Consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of seminar per week

Subject/Course Level: Earth and Planetary Science/Graduate
Grading: Letter grade.
Formerly known as: Geology 250
Advanced Topics in Earth and Environmental Sciences: Read Less [-]

EPS 251 Carbon Cycle Dynamics 3 Units
Terms offered: Fall 2023, Fall 2021, Spring 2019
In this course, we will focus on the (unsolved) puzzle of the contemporary carbon cycle. Why is the concentration of atmospheric CO2 changing at the rate observed? What are the terrestrial and oceanic processes that add and remove carbon from the atmosphere? What are the processes responsible for long-term storage of carbon on land and in the sea? Emphasis will be placed on the observations and modeling needed to evaluate hypotheses about carbon sources and sinks. Past records will be examined for clues about sensitivity of carbon processes to climate variations.
Carbon Cycle Dynamics: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 6 hours of lecture per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Graduate
Grading: Letter grade.
Formerly known as: Geology 219
Carbon Cycle Dynamics: Read Less [-]
EPS 254 Advanced Topics in Seismology and Geophysics 1 Unit  
Terms offered: Fall 2024, Spring 2024, Fall 2023  
Lectures on various topics representing current advances in seismology and geophysics, including local crustal and earthquake studies, regional tectonics, structure of the earth's mantle, and core and global dynamics.  
Advanced Topics in Seismology and Geophysics: Read More [+]

Rules & Requirements

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of lecture per week

Additional Details

**EPS 271 Field Geology and Digital Mapping 4 Units**
Terms offered: Fall 2024, Fall 2023, Fall 2022
Geological mapping, field observation, and problem solving in the Berkeley hills and environs leading to original interpretation of geological processes and history from stratigraphic, structural, and lithological investigations. Integration of the Berkeley hills geology into the tectonic and paleo-climatic record of the Coast Ranges and California as a whole through systematic field mapping in key localities and reading of original literature. Training in digital field mapping, use of digital base maps, and use of global positioning systems.

Field Geology and Digital Mapping: Read More [+]

**Rules & Requirements**

**Prerequisites:** 50 or equivalent introductory course for majors

**Credit Restrictions:** Students will receive no credit for 271 after taking 101.

**Hours & Format**

Fall and/or spring: 15 weeks - 7 hours of fieldwork and 2 hours of lecture per week

**Additional Details**

**Subject/Course Level:** Earth and Planetary Science/Graduate

**Grading:** Letter grade.

**Instructor:** Brimhall

Field Geology and Digital Mapping: Read Less [-]

**EPS C276 Seismic Hazard Analysis and Design Ground Motions 3 Units**
Terms offered: Spring 2023, Spring 2021, Spring 2019
Deterministic and probabilistic approaches for seismic hazard analysis. Separation of uncertainty into aleatory variability and epistemic uncertainty. Discussion of seismic source and ground motion characterization and hazard computation. Development of time histories for dynamic analyses of structures and seismic risk computation, including selection of ground motion parameters for estimating structural response, development of fragility curves, and methods for risk calculations.

Seismic Hazard Analysis and Design Ground Motions: Read More [+]

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

EPS C292 Planetary Science Seminar 1 Unit
Terms offered: Fall 2024, Spring 2024, Fall 2023, Spring 2023
The departments of Astronomy and Earth and Planetary Science offer a joint research seminar in advanced topics in planetary science, featuring speakers drawn from graduate students, postdoctoral researchers, faculty, and visiting scholars. Topics will span planetary interiors; surface morphology; atmospheres; dynamics; planet formation; and astrobiology. Speakers will vary from semester to semester. Meetings will be held once a week for 1 hour each, and the schedule of speakers will be determined on the first day of class. To pass the class, participants will be required to give a 30-minute presentation, either on their own research or on recent results from the literature.
Planetary Science Seminar: Read More [+]

Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.

EPS C295Z Energy Solutions: Carbon Capture and Sequestration 3 Units
After a brief overview of the chemistry of carbon dioxide in the land, ocean, and atmosphere, the course will survey the capture and sequestration of CO2 from anthropogenic sources. Emphasis will be placed on the integration of materials synthesis and unit operation design, including the chemistry and engineering aspects of sequestration. The course primarily addresses scientific and engineering challenges and aims to engage students in state-of-the-art research in global energy challenges.
Energy Solutions: Carbon Capture and Sequestration: Read More [+]

Rules & Requirements
Prerequisites: Chemistry 4B or 1B, Mathematics 1B, and Physics 7B, or equivalents

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Graduate
Grading: Letter grade.
Instructors: Bourg, DePaolo, Long, Reimer, Smit

Subject/Course Level: Earth and Planetary Science/Graduate
Grading: The grading option will be decided by the instructor when the class is offered.
Formerly known as: Geology 298
Directed Group Study for Graduates: Read Less [-]

EPS C301 Communicating Ocean Science 4 Units
For graduate students interested in improving their ability to communicate their scientific knowledge by teaching ocean science in elementary schools or science centers/aquariums. The course will combine instruction in inquiry-based teaching methods and learning pedagogy with six weeks of supervised teaching experience in a local school classroom or the Lawrence Hall of Science with a partner. Thus, students will practice communicating scientific knowledge and receive mentoring on how to improve their presentations.
Communicating Ocean Science: Read More [+]

Rules & Requirements
Prerequisites: One course in introductory biology, geology, chemistry, physics, or marine science required and interest in ocean science, junior, senior, or graduate standing; consent of instructor required for sophomores

Hours & Format
Fall and/or spring: 15 weeks - 2.5 hours of lecture, 1 hour of discussion, and 2 hours of fieldwork per week

Additional Details
Subject/Course Level: Earth and Planetary Science/Professional course for teachers or prospective teachers
Instructor: Ingram
Also listed as: GEOG C301/INTEGBI C215
Communicating Ocean Science: Read Less [-]
EPS 375 Professional Preparation: Supervised Teaching of Geology and Geophysics 1 - 6 Units
Terms offered: Fall 2021, Fall 2020, Fall 2019
Discussion, curriculum, class observation, and practice teaching in geology, geophysics, and earth science.
Professional Preparation: Supervised Teaching of Geology and Geophysics: Read More [+]

Rules & Requirements

Prerequisites: Graduate standing and appointment as graduate student instructor

Repeat rules: Course may be repeated for credit without restriction.
