Life Science, Business, and Entrepreneurship

The Robinson Life Science, Business, and Entrepreneurship (LSBE) Program is designed to help students bridge scientific inquiry and research with entrepreneurial and commercial application. LSBE offers specialized coursework taught by award-winning faculty, networking opportunities and specialized career coaching, and mentoring opportunities within a peer-to-peer cohort of students who are working to become future leaders and innovators.

Through LSBE, students will earn a BS in Business Administration AND a BA in one of the following biology majors: Molecular and Cell Biology (MCB) OR Integrative Biology (IB) OR Neuroscience (NEU).

Admission to LSBE is highly competitive and open only to students who enter UC Berkeley as freshmen. Course planning begins during freshman year, and students apply for admission to LSBE during the fall of sophomore year. All prerequisite requirements (https://lsbe.berkeley.edu/academics/) for Business and MCB, IB, or NEU must be completed by the end of sophomore year.

Students who complete the Program will be uniquely advantaged for careers in a variety of innovative industries and research institutions and will be competitive applicants to graduate programs including pre-health, biosciences, MBA, and beyond.

LSBE students complete all academic requirements for both Business Administration and Molecular and Cell Biology/Integrative Biology/Neuroscience in addition to the university and campus requirements, and all policies of each school are enforced. Additional Program requirements include a freshman introductory course and a senior capstone course. Students must contact LSBE staff to enroll in these program-specific courses.

Lower division and upper division Business Administration requirements can be found on the Business Administration program page (https://haas.berkeley.edu/undergrad/academics/).

Students have a choice between six emphases within Molecular and Cell Biology (https://guide.berkeley.edu/undergraduate/degree-programs/molecular-cell-biology/#majorrequirementstext):

- Biochemistry, Biophysics, & Structural Biology
- Cell Biology, Development & Physiology
- Genetics, Genomics, Evolution, and Development
- Immunology & Molecular Medicine
- Molecular Therapeutics
- Neurobiology

LSBE Program plans can be found on our website (https://lsbe.berkeley.edu/academics/).

Undergraduate students must fulfill the following requirements in addition to those required by their major program.

For a detailed lists of L&S requirements, please see Overview tab to the right in this guide or visit the L&S Degree Requirements (https://lssadvising.berkeley.edu/degree-requirements/) webpage. For College advising appointments, please visit the L&S Advising (https://lssadvising.berkeley.edu/home/) Pages.

University of California Requirements

Entry Level Writing (https://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/entry-level-writing-requirement/)

All students who will enter the University of California as freshmen must demonstrate their command of the English language by fulfilling the Entry Level Writing requirement. Fulfillment of this requirement is also a prerequisite to enrollment in all reading and composition courses at UC Berkeley and must be taken for a letter grade.
American History and American Institutions (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/american-history-institutions-requirement/)
The American History and American Institutions requirements are based on the principle that all U.S. residents who have graduated from an American university should have an understanding of the history and governmental institutions of the United States.

**Berkeley Campus Requirement**
American Cultures (http://americancultures.berkeley.edu/students/courses/)
All undergraduate students at Cal need to take and pass this campus requirement course in order to graduate. The requirement offers an exciting intellectual environment centered on the study of race, ethnicity and culture of the United States. AC courses are plentiful and offer students opportunities to be part of research-led, highly accomplished teaching environments, grappling with the complexity of American Culture.

**College of Letters & Science Essential Skills Requirements**
Quantitative Reasoning (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/quantitative-reasoning-requirement/)
The Quantitative Reasoning requirement is designed to ensure that students graduate with basic understanding and competency in math, statistics, or computer/data science. The requirement may be satisfied by exam or by taking an approved course taken for a letter grade.

Foreign Language (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/foreign-language-requirement/)
The Foreign Language requirement may be satisfied by demonstrating proficiency in reading comprehension, writing, and conversation in a foreign language equivalent to the second semester college level, either by passing an exam or by completing approved course work taken for a letter grade.

Reading and Composition (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/reading-composition-requirement/)
In order to provide a solid foundation in reading, writing, and critical thinking the College of Letters and Science requires two semesters of lower division work in composition in sequence. Students must complete parts A & B reading and composition courses in sequential order by the end of their fourth semester for a letter grade.

**College of Letters & Science 7 Course Breadth Requirements**
Breadth Requirements (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/#breadthrequirementstext)
The undergraduate breadth requirements provide Berkeley students with a rich and varied educational experience outside of their major program. As the foundation of a liberal arts education, breadth courses give students a view into the intellectual life of the University while introducing them to a multitude of perspectives and approaches to research and scholarship. Engaging students in new disciplines and with peers from other majors, the breadth experience strengthens interdisciplinary connections and context that prepares Berkeley graduates to understand and solve the complex issues of their day.

**Unit Requirements**
- 120 total units
- Of the 120 units, 36 must be upper division units
- Of the 36 upper division units, 6 must be taken in courses offered outside your major department

**Residence Requirements**
For units to be considered in "residence," you must be registered in courses on the Berkeley campus as a student in the College of Letters & Science. Most students automatically fulfill the residence requirement by attending classes at Cal for four years, or two years for transfer students. In general, there is no need to be concerned about this requirement, unless you graduate early, go abroad for a semester or year, or want to take courses at another institution or through UC Extension during your senior year. In these cases, you should make an appointment to meet an L&S College adviser to determine how you can meet the Senior Residence Requirement.

Note: Courses taken through UC Extension do not count toward residence.

**Senior Residence Requirement**
After you become a senior (with 90 semester units earned toward your B.A. degree), you must complete at least 24 of the remaining 30 units in residence at least two semesters. To count as residence, a semester must consist of at least 6 passed units. Intercampus Visitor, EAP, and UC Berkeley-Washington Program (UCDC) units are excluded.

You may use a Berkeley Summer Session to satisfy one semester of the Senior Residence requirement, provided that you successfully complete 6 units of course work in the Summer Session and that you have been enrolled previously in the college.

**Modified Senior Residence Requirement**
Participants in the UC Education Abroad Program (EAP), Berkeley Summer Abroad, or the UC Berkeley Washington Program (UCDC) may meet a Modified Senior Residence requirement by completing 24 (excluding EAP) of their final 60 semester units in residence. At least 12 of these 24 units must be completed after you have completed 90 units.

**Upper Division Residence Requirement**
You must complete in residence a minimum of 18 units of upper division courses (excluding UCEAP units), 12 of which must satisfy the requirements for your major.

Each student's plan will vary depending on the chosen biology major (MCB/IB/NEU) and AP/IB exam scores, if applicable. Seek individual advising from Haas (https://haas.berkeley.edu/undergrad/student-life-services/advising/), MCB (https://mcb.berkeley.edu/undergrad/advising/advising-office/advising-services/), IB (https://ib.berkeley.edu/undergrad/advising.php), and Neuroscience (https://neuroscience.berkeley.edu/academics/undergraduate/advising/).

The sample course schedules below show a four-year plan for completing all program requirements, taking classes only during Fall and Spring Semesters. Many courses are offered during the summer as well.
should schedule advising (links above) to discuss your options in detail.

**MCB Plan**

Please note that the MCB degree has 9 emphases, so the plan below indicates "MCB UD" for an MCB upper-division course that will depend on the emphasis you choose to pursue during your junior and senior years.

### First Year

**Total Units:** 133-139

### Plan Notes:

- This plan assumes one Breadth course will also be an American Cultures (AC) course.
- This plan assumes the student has completed the Entry Level Writing, American History and Institutions, and Foreign Language requirement prior to admission to UC Berkeley.
- This plan assumes the student does not require CHEM 32 or MATH 32.
- This plan assumes exam score or prior course works will fulfill R&C A (http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/reading-composition-requirement/).
- BIOLOGY 1A, BIOLOGY 1B, MCELLBI 102, or MCELLBI C100A will fulfill the Biological Sciences Breadth Requirement.
- CHEM 1A, CHEM 3A, or CHEM 3B will fulfill the Physical Sciences Breadth Requirement.

- Molecular Cell Biology accepts AP for BIOLOGY 1A/BIOLOGY 1AL, BIOLOGY 1B and CHEM 1A/CHEM 1AL if not planning post-BA health-related programs. Talk with the LSBE advisor about this option.
- Haas accepts AP for Economics.

**IB Plan**

IB offers two emphases, so the plan below indicates "IB UD" for an IB upper-division course that will depend on the emphasis you choose to pursue during your junior and senior years.

### First Year

<table>
<thead>
<tr>

</table>

**Total Units:** 18-20

**Total Units:** 122-140

### Plan Notes:

- This plan assumes one Breadth course will also be an American Cultures (AC) course.
- This plan assumes the student has completed the Entry Level Writing, American History and Institutions, and Foreign Language requirement prior to admission to UC Berkeley.
- This plan assumes the student does not require CHEM 32 or MATH 32.
- BIOLOGY 1A or BIOLOGY 1B will fulfill the Biological Sciences Breadth Requirement.
- CHEM 1A will fulfill the Physical Sciences Breadth Requirement.
- Molecular Cell Biology accepts AP for BIOLOGY 1A/BIOLOGY 1AL, BIOLOGY 1B and CHEM 1A/CHEM 1AL if
not planning post-BA health-related programs. Talk with the LSBE advisor about this option.

- Haas accepts AP for Economics.

Neuroscience Plan

Neuroscience requires three electives to complete; these have been denoted as "NEU UD."

<table>

Total Units: 130-139

Plan Notes:

- This plan assumes one Breadth course will also be an American Cultures (AC) course.
- This plan assumes the student has completed the Entry Level Writing, American History and Institutions, and Foreign Language requirements prior to admission to UC Berkeley.
- This plan assumes the student does not require CHEM 32 or MATH 32.
- BIOLOGY 1A will fulfill the Biological Sciences Breadth Requirement.
- CHEM 1A will fulfill the Physical Sciences Breadth Requirement.
- Haas accepts AP for Economics.

Major Maps help undergraduate students discover academic, co-curricular, and discovery opportunities at UC Berkeley based on intended major or field of interest. Developed by the Division of Undergraduate Education in collaboration with academic departments, these experience maps will help you:

- **Explore** your major and gain a better understanding of your field of study
- **Connect** with people and programs that inspire and sustain your creativity, drive, curiosity and success
- **Discover** opportunities for independent inquiry, enterprise, and creative expression
- **Engage** locally and globally to broaden your perspectives and change the world
- **Reflect** on your academic career and prepare for life after Berkeley

Use the major map below as a guide to planning your undergraduate journey and designing your own unique Berkeley experience.

View the Life Science, Business, and Entrepreneurship Major Map PDF, [https://ue.berkeley.edu/sites/default/files/life_science_business_and_entrepreneurship.pdf](https://ue.berkeley.edu/sites/default/files/life_science_business_and_entrepreneurship.pdf)

Life Sciences, Business, and Entrepreneurship Program staff are available on the third floor of the Valley Life Sciences Building in room 3060. Advising hours are Monday - Thursday 9:00 - 4:00 and Friday 9:00 - 3:00. The office closes for lunch from 12:00 - 1:00 every day. Check our website [https://lsbe.berkeley.edu/meet-team/contact-us/](https://lsbe.berkeley.edu/meet-team/contact-us/) for details regarding our advising hours as they are subject to change throughout the year. To schedule an appointment or for more information about the Program, email lsbe@berkeley.edu.
MCELLBI 15 Current Topics in the Biological Sciences 2 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
Students in this course will critically examine modern methods of biological investigations and their social implications. Relevant literature will be used to present basic biological concepts that address the cultural, technological and health aspects of current topics in the biological sciences. Designing and evaluating scientific questions will be stressed.
Current Topics in the Biological Sciences: Read More [+]

Rules & Requirements
Prerequisites: Suitable for freshmen who plan to major in a biological science
Repeat rules: Course may be repeated for credit when topic changes.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Instructor: Matsui

MCELLBI 24 Freshman Seminars 1 Unit
Terms offered: Fall 2024, Spring 2024, Fall 2023
The Berkeley Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Berkeley Seminars are offered in all campus departments, and topics vary from department to department and semester to semester. Final assessment to be decided by the instructor when the class is offered.
Freshman Seminars: Read More [+]

Rules & Requirements
Prerequisites: Open to freshmen only
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of seminar per week

MCELLBI C31 Big Ideas in Cell Biology 3 Units
Terms offered: Spring 2014, Spring 2012
An introduction for students who do not intend to major in biology but who wish to satisfy their breadth requirement in Biological Sciences. Some major concepts of modern biology, ranging from the role of DNA and the way cells communicate, to interactions of cells and creatures with their environment, will be discussed without jargon and with attention to their relevance in contemporary life and culture.
Big Ideas in Cell Biology: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Wilt
Also listed as: L & S C30X

MCELLBI 32 Introduction to Human Physiology 3 Units
Terms offered: Fall 2024, Summer 2024 8 Week Session, Fall 2023
A comprehensive introduction to human biology. The course will concentrate on basic mechanisms underlying human life processes, including cells and membranes; nerve and muscle function; cardiovascular, respiratory, renal, and gastrointestinal physiology; metabolism, endocrinology, and reproduction.
Introduction to Human Physiology: Read More [+]

Rules & Requirements
Prerequisites: One year high school or college chemistry

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Summer: 8 weeks - 6 hours of lecture and 2 hours of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Ball

Formerly known as: Molecular and Cell Biology 90A

Freshman Seminars: Read Less [-]
MCELLBI 32L Introduction to Human Physiology Laboratory 2 Units
Terms offered: Fall 2024, Summer 2024 Second 6 Week Session, Fall 2023
Experiments and demonstrations are designed to amplify and reinforce information presented in 32. Exercises include investigations into the structure and function of muscle, nerve, cardiovascular, renal, respiratory, endocrine, and blood systems.
Introduction to Human Physiology Laboratory: Read More [+]
Rules & Requirements
Prerequisites: 32 or may be taken concurrently
Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture and 3 hours of laboratory per week
Summer:
6 weeks - 2 hours of lecture and 8 hours of laboratory per week
8 weeks - 2 hours of lecture and 6 hours of laboratory per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Instructor: Ball
Introduction to Human Physiology Laboratory: Read Less [-]

MCELLBI 38 Stem Cell Biology, Ethics and Societal Impact 3 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
Innovations in bioengineering and use of stem cells will significantly impact our ability to combat human disease, genetic disorders and physiological dysfunction. An understanding of human stem cell biology will be critical to make informed decisions on our health and public policy.
Stem Cell Biology, Ethics and Societal Impact: Read More [+]
Rules & Requirements
Repeat rules: Course may be repeated for credit with instructor consent.
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Summer:
6 weeks - 7.5 hours of lecture per week
8 weeks - 6 hours of lecture and 2 hours of discussion per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Firestone, Ball
Stem Cell Biology, Ethics and Societal Impact: Read Less [-]

MCELLBI 41 Genetics and Society 3 Units
Terms offered: Spring 2016, Spring 2013, Summer 2012 8 Week Session
Basic communication of inheritance; gene mapping; gene expression and genetic disease in animals and humans; social inheritance of genetics.
Genetics and Society: Read More [+]
Rules & Requirements
Prerequisites: Primarily for students not specializing in biology
Credit Restrictions: Students will receive no credit for Molecular and Cell Biology 41 after completing Biology 1A, Biology 1B, or Letters and Science 18.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week
Summer:
6 weeks - 7.5 hours of lecture per week
8 weeks - 6 hours of lecture and 2 hours of discussion per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Genetics and Society: Read Less [-]
MCELLBI C44 Biology for Voters 3 Units
Terms offered: Spring 2017, Spring 2015, Spring 2014
This is a Discovery Course for non-Biology majors designed to introduce lower-division college students to biology through the lens of the contemporary problems facing people, the planet and the species of the planet. Modern genetic contributions will be presented on such issues as genetic engineering of plants and animals, the emergence of new pathogens, the role of genetic variation among individuals, and the extent to which DNA is and isn’t destiny. Each week will close with the presentation and discussion of a defining biological challenge facing the world.

Student Learning Outcomes: The learning objectives will be, at one end, to understand what an experiment is, how it controlled and what does one need to know about an experiment to be able to rely upon any conclusion. That is the fundamental issue in all science, and is frequently overlooked in many media accounts of science. A second objective is to learn enough of the language of biology to be able to ask the kind of informed questions that we would want all elected representatives to pay attention to. A third objective is for students to cultivate confidence that through non-specialized information sources they can become informed consumers of contemporary scientific thought, and to develop those habits of intellect to think about evidence in a scientific manner. A fourth objective is for students to enjoy the abundance of high quality books, articles and multimedia that will enable a lifetime of discovery outside the structure of a college course.

MCELLBI 50 The Immune System and Disease 4 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
Course will discuss how the immune system resolves, prevents, or causes disease. A general overview of the immune system will be covered in the first five weeks followed by five weeks discussing infectious diseases including anthrax, mad cow, herpes, malaria, tuberculosis, and HIV. In addition, other lectures will focus on current immunology topics including vaccines, autoimmunity, allergy, transplantation, and cancer.

Objectives & Outcomes

Rules & Requirements

Prerequisites: High school chemistry or Chemistry 1A and high school biology or Biology 1A. Biology 1AL is not required

Credit Restrictions: Students will receive no credit for Molecular and Cell Biology 50 after completing Molecular and Cell Biology 102, C100A/Chemistry C130, or Chemistry 135.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Beatty

The Immune System and Disease: Read Less [-]
MCELLBI 55 Plagues and Pandemics 3 Units
Terms offered: Fall 2024, Summer 2024 Second 6 Week Session, Fall 2023
Discussion of how infectious agents cause disease and impact society at large. We will examine historical and current examples of plagues and pandemics and consider the question of what we should do to ameliorate the impact of infectious disease in the future. The course is intended for non-majors and will begin by briefly providing necessary background in microbiology and immunology. The primary focus in each subsequent week, however, will be on discussing a particular infectious disease. The course will be broad in scope covering biological, historical, ethical and social implications of each disease.

Rules & Requirements
Credit Restrictions: Students will receive no credit for MCELLBI 55 after completing CHEM C130, MCELLBI 150, MCELLBI C103, MCELLBI 102, or CHEM 135.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Summer: 6 weeks - 7.5 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Beatty, Vance

Plagues and Pandemics: Read More [+]

MCELLBI 63L Introduction to Neuroanatomy Lab 2 Units
Terms offered: Summer 2019 Second 6 Week Session
This lab course is an introduction to mammalian neuroanatomy for non-MCB majors. We will do dissections, explore physical anatomical models, and observe microscopic structures within preserved brain slices from a variety of mammalian species. The hands-on exploration of anatomy is key to understanding how the different functional regions of the nervous system are interconnected. Besides gaining a better understanding of anatomy, you will gain important scientific skills such as conducting parts of a neurological exam, fluorescent and light microscopy, reading MRI scans and conducting fine dissections. The course will culminate with a group project using the online Allen Brain Atlas to investigate a novel scientific question.

Rules & Requirements
Prerequisites: MCELLBI 63 (may be taken concurrently) or equivalent
Credit Restrictions: Students will receive no credit for Molecular and Cell Biology 63L after taking Molecular and Cell Biology 160L or 163L

Hours & Format
Summer: 6 weeks - 8 hours of laboratory per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Ball

Introduction to Neuroanatomy Lab: Read Less [-]
MCELLBI C75 Introduction to the Biotechnology Field and Industry 2 Units
Terms offered: Spring 2019
This course offers an introduction to the field of biotechnology and will cover the history of the field, its impact on medicine and society, key methodologies, important therapeutic areas, and the range of career options available in the biopharmaceutical industry. In addition to lectures on innovation and entrepreneurship, students will hear from lecturers with expertise ranging from molecular biology to clinical trial design and interpretation. Several case studies of historically impactful scientists, entrepreneurs, and biotherapeutic companies will be presented. Students will work in teams to create and develop novel biotechnology company ideas to present in class. Intended for students interested in the Biology +Business program.

Introduction to the Biotechnology Field and Industry: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Alternative to final exam.

Instructors: Kirn, Lasky
Formerly known as: Molecular and Cell Biology C95B/Undergrad. Business Administration C95B
Also listed as: UGBA C95B

MCELLBI 84B Sophomore Seminar 1 or 2 Units
Terms offered: Fall 2013, Spring 2013, Fall 2012
Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.

Sophomore Seminar: Read More [+]

Rules & Requirements
Prerequisites: At discretion of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1-2 hours of seminar per week
Summer:
6 weeks - 4-6 hours of seminar per week
8 weeks - 3-4 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: The grading option will be decided by the instructor when the class is offered. Final exam required.

Sophomore Seminar: Read Less [-]
MCELLBI 88 Immunotherapy of Cancer: Success and Failures 2 Units
Terms offered: Spring 2018, Spring 2017
We will work with a variety of datasets that describe a molecular view of cells and how they divide. We will learn about the processes that cause cells to become specialized (differentiate) and to give rise to cancer (transform). We will analyze data on genetic mutations in cancer that distinguish tumor cells from normal cells. We will learn how mutations are detected by the immune system and the basis of cancer immunotherapy. Finally we will analyze data on clinical trials of cancer immunotherapy to define the correlates of success in curing the disease. The students are expected to gain an understanding of data that reveals the basics of cell physiology and cancer, how immunotherapies of cancer work and their current limitations.

MCELLBI C96 Studying the Biological Sciences 1 Unit
Terms offered: Fall 2024, Fall 2023, Fall 2022
Students will be introduced to the "culture" of the biological sciences, along with an in-depth orientation to the academic life and the culture of the university as they relate to majoring in biology. Students will learn concepts, skills, and information that they can use in their major courses, and as future science professionals.

MCELLBI 98 Directed Group Study 1 - 4 Units
Terms offered: Fall 2023, Spring 2023, Fall 2022
Lectures and small group discussions focusing on topics of interest, varying from semester to semester.

MCELLBI 99 Supervised Independent Study 1 - 4 Units
Terms offered: Spring 2012, Fall 2009, Spring 2009
Supervised Independent Study: Read More [+]

Rules & Requirements
Prerequisites: Foundations of Data Science: COMPSCI C8, DATASCI C8, INFO C8 or STAT C8

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture and 1 hour of laboratory per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Shastri

MCELLBI 100B Biochemistry: Pathways, Mechanisms, and Regulation 4 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
This course surveys cellular metabolism with a focus on the underlying bioenergetics, mechanisms, and chemistry. Lectures will cover major principles in the biochemistry of metabolism and also highlight selected topics including signaling, transport, metabolic engineering, and human diseases related to metabolic dysfunction. The course is designed for majors in the biochemistry and molecular biology, genetics and development, or immunology emphases.

MCELLBI C103 Bacterial Pathogenesis 3 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
This course for upper division and graduate students will explore the molecular and cellular basis of microbial pathogenesis. The course will focus on model microbial systems which illustrate mechanisms of pathogenesis. Most of the emphasis will be on bacterial pathogens of mammals, but there will be some discussion of viral and protozoan pathogens. There will be an emphasis on experimental approaches. The course will also include some aspects of bacterial genetics and physiology, immune response to infection, and the cell biology of host-parasite interactions.

Rules & Requirements
Prerequisites: BIOLOGY 1A and CHEM 3B
Credit Restrictions: Students will receive no credit for MCELLBI C103 after completing PB HLTH 262.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Portnoy
Also listed as: PLANTBI C103

MCELLBI 104 Genetics, Genomics, and Cell Biology 4 Units
Terms offered: Fall 2024, Summer 2024 8 Week Session, Spring 2024
This course will introduce students to key concepts in genetic analysis, eukaryotic cell biology, and state-of-the-art approaches in genomic medicine. Lectures will highlight basic knowledge of cellular processes with the basis for human diseases, particularly cancer. Prerequisite courses will have introduced students to the concepts of cells, the central dogma of molecular biology, and gene regulation. Emphasis in this course will be on eukaryotic cell processes, including cellular organization, dynamics, and signaling.

Rules & Requirements
Prerequisites: BIOLOGY 1A

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Summer: 8 weeks - 6 hours of lecture and 2 hours of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

MCELLBI 110 Molecular Biology: Macromolecular Synthesis and Cellular Function 4 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023

Rules & Requirements
Prerequisites: C100A (may not be taken concurrently); Plan 1 Emphasis 1 (BMB) majors should take 100B prior to 110

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
MCELLBI C110L General Biochemistry and Molecular Biology Laboratory 4 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Experimental techniques of biochemistry and molecular biology, designed to accompany the lectures in Molecular and Cell Biology 100B and 110. General Biochemistry and Molecular Biology Laboratory: Read More [+] Rules & Requirements
Prerequisites: 110 (may be taken concurrently)
Hours & Format
Fall and/or spring: 15 weeks - 2-2 hours of lecture and 6-8 hours of laboratory per week

**MCELLBI C114 Introduction to Comparative Virology 4 Units**

Terms offered: Spring 2024, Spring 2023, Spring 2022

This course will provide a comparative overview of virus life cycles and strategies viruses use to infect and replicate in hosts. We will discuss virus structure and classification and the molecular basis of viral reproduction, evolution, assembly, and virus-host interactions. Common features used during virus replication and host cellular responses to infection will be covered. Topics also include are common and emerging virus diseases, their control, and factors affecting their spread.

**Introduction to Comparative Virology: Read More [+]**

**Rules & Requirements**

**Prerequisites:** Introductory chemistry (Chemistry 1A or 3A-3B or equivalent) and introductory biology (Biology 1A, 1AL, and 1B or equivalent) and general biochemistry (Molecular and Cell Biology C100A or equivalent—preferably completed but may be taken concurrently)

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week

**Additional Details**

**Subject/Course Level:** Molecular and Cell Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Glaunsinger

**MCELLBI C116 Microbial Diversity 3 Units**

Terms offered: Fall 2024, Fall 2022, Fall 2021

This course for upper-division and graduate students will broadly survey myriad types of microbial organisms, both procaryote and eucaryote, using a phylogenetic framework to organize the concept of “biodiversity.” Emphasis will be on the evolutionary development of the many biochemical themes, how they mold our biosphere, and the organisms that affect the global biochemistry. Molecular mechanisms that occur in different lineages will be compared and contrasted to illustrate fundamental biological strategies. Graduate students additionally should enroll in C216, Microbial Diversity Workshop.

**Microbial Diversity: Read More [+]**

**Rules & Requirements**

**Prerequisites:** Upper-division standing. C112 or consent of instructor and organic chemistry (may be taken concurrently)

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Additional Details**

**Subject/Course Level:** Molecular and Cell Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Coates

**Formerly known as:** 116

MCELLBI C117 Advanced Plant Biochemistry
4 Units
Terms offered: Spring 2024, Spring 2023
Students will build on the central metabolic pathways to learn about plant-specific metabolism from a more mechanistic perspective, including photosynthesis, regulation of sugar and starch metabolism, chloroplast-based pathways of inorganic nutrient (nitrogen, sulfur) processing, N2 fixing in free-living and symbiotic bacteria, polyunsaturated fatty acid and oil biosynthesis and accumulation, secondary metabolism, cell-wall structure and biosynthesis. Instruction will focus on a research-based approach, including retrieving and researching the primary literature, and understanding experimental design in modern plant biochemistry.
Advanced Plant Biochemistry: Read More [+]

Rules & Requirements
Prerequisites: A minimum grade of C- in MCELLBI C100A/CHEM C130, MCELLBI 102, MCELLBI 104, MCELLBI 140, PLANTBI 135, or equivalent

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture, 1 hour of discussion, and 1 hour of tutorial per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Merchant
Also listed as: PLANTBI C136
Advanced Plant Biochemistry: Read Less [-]

MCELLBI 120 Therapeutics Discovery and Development
4 Units
Terms offered: Fall 2024, Fall 2023
This class is designed to introduce students to crucial concepts that underlie the discovery and development of therapeutic modalities. It will cover questions of target discovery and validation; basic properties of therapeutic modalities, such as small molecules, designer proteins, or genome engineering approaches; the design and execution of chemical screens; the medicinal chemistry, pharmacodynamics and -kinetics that is required for drug development; and the steps needed to introduce a new modality into the clinic. Lectures are based on a combination of textbook readings and primary literature and summarized through case studies that highlight critical aspects of drug discovery and development.
Therapeutics Discovery and Development: Read More [+]

Rules & Requirements
Prerequisites: MCELLBI 104 (can be taken concurrently) and MCELLBI C100A/CHEM C130 or MCELLBI 102

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Urmov
Therapeutics Discovery and Development: Read Less [-]
MCELLBI 120L Therapeutics Discovery Laboratory 4 Units
Terms offered: Not yet offered
This lab course will familiarize students with general principles of drug discovery and action. The first module focuses on aspects of small molecule function by comparing stoichiometric inhibitors and PROTAC molecules against the BTK kinase. Students will learn how to purify protein, monitor drug binding and in vitro efficiency, and determine effects on cell survival. The second module focuses on genomic therapies by introducing students to principles of CRISPR genome editing. Students will design genome editing strategies and cognate guide RNAs and then perform an editing experiment that replaces a catalytic Cys residue in BTK with Ser. Students will compare stoichiometric inhibitors against BTK to PROTAC in wildtype or mutant cells.

Rules & Requirements
Prerequisites: MCELLBI C100A or MCELLBI 102

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture and 8 hours of laboratory per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

MCELLBI C130 Cell Biology: from Discovery to Disease 4 Units
Terms offered: Spring 2024
This course will investigate a wide range of topics in cell biology, focusing on modern and classic experimental approaches that have provided important insights, and the relevance of their findings to understanding human health and disease. We will emphasize the importance of quantitative understanding in research topics that are current areas of discovery. We aim to convey an understanding of how cellular structure and function arise as a result of the properties of macromolecules and how understanding the behavior of molecules is needed to explain how cells and organisms operate. This understanding thus also explains what happens when normal cellular functions are impacted, leading to cellular dysfunction and disease.

Rules & Requirements
Prerequisites: Upper Division Standing; MCELLBI 102 or MCELLBI C100A
Credit Restrictions: Students will receive no credit for MCELLBI 130 after completing MCELLBI 130.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

MCELLBI C134 Genome Organization and Nuclear Dynamics 3 Units
Terms offered: Spring 2024, Fall 2022, Spring 2022
This course focuses on the structure, functions, and dynamics of eukaryotic chromosomes and their organization within cell nuclei. All life on earth relies on genetic information, which is encoded within nucleic acids (DNA and RNA). Most organisms have DNA-based genomes; bacterial and archaean genomes typically comprise a single circular DNA molecule, while the genomes of most eukaryotes are divided into a variable number of linear DNA molecules. These contiguous DNA strands, along with the associated proteins and other components that contribute to their organization and function, are known as “chromosomes.”

Genome Organization and Nuclear Dynamics: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Also listed as: PLANTBI C134

Genome Organization and Nuclear Dynamics: Read Less [-]

MCELLBI 135A Topics in Cell and Developmental Biology: Molecular Endocrinology 3 Units
Terms offered: Fall 2024, Fall 2023, Fall 2022
Molecular mechanisms by which hormones elicit specific responses and regulate gene expression; hormone-receptor interaction; synthesis, transport and targeting of hormones, growth factors and receptors.

Topics in Cell and Developmental Biology: Molecular Endocrinology: Read More [+]

Rules & Requirements
Prerequisites: BIOLOGY 1A. Recommended: MCELLBI 102 or MCELLBI C110A/CHEM C130 (may be taken concurrently)
Credit Restrictions: Students will receive no credit for Molecular and Cell Biology 135A after taking Physiology 142.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Firestone

Topics in Cell and Developmental Biology: Molecular Endocrinology: Read Less [-]
MCELLBI 136 Physiology 4 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Principles of mammalian (primarily human) physiology emphasizing physical, chemical, molecular and cellular bases of functional biology. The following topics will be covered: cellular and membrane ion and nonelectrolyte transport; cell and endocrine regulation; autonomic nervous system regulation; skeletal, smooth and cardiac muscle; cardiovascular physiology; respiration; renal physiology; gastrointestinal physiology. Discussion section led by Graduate Student Instructor will review material covered in lecture.

MCELLBI 140 General Genetics 4 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
An in depth introduction to genes, their sexual and asexual transmission in individuals and populations, and gene regulation in prokaryotes and eukaryotes. Gene manipulation by recombination, molecular cloning and genome editing is presented in contexts ranging from fundamental mechanisms of chromosome biology to applications in development, aging and disease. Human genetic variation and quantitative evaluation are illuminated. Non-Mendelian and epigenetic modes of inheritance of transposable elements, prions and chromatin states are paired with discussions of groundbreaking technology rewriting the rules of how the genome is analyzed, with attention to the ethical considerations ranging from the history of eugenics to modern controversies.

MCELLBI 137L Physical Biology of the Cell 4 Units
Terms offered: Spring 2024, Spring 2022, Spring 2020
Biology is being revolutionized by new experimental techniques that have made it possible to measure the inner workings of molecules, cells and multicellular organisms with unprecedented precision. The objective of this course is to explore this deluge of quantitative data through the use of biological numeracy. We will develop theoretical models that make precise predictions about biological phenomena. These predictions will be tested through the hands-on analysis of experimental data and by performing numerical simulations using Matlab. A laptop is required for this course, but no previous programming experience is required.

MCELLBI 140L Genetics Laboratory 4 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
Experimental techniques in classical and molecular genetics.
MCELLBI 141 Developmental Biology 4 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
An introduction to principles and processes of embryonic and post-embryonic development, stressing mechanisms of cell and tissue interactions, morphogenesis and regulation of gene expression.
Developmental Biology: Read More [+]

Rules & Requirements

Prerequisites: 102 or C100A; Biology 1A, 1AL, and 1B; 110 or 130 recommended

MCELLBI 143 Evolution of Genomes, Cells, and Development 3 Units
Terms offered: Fall 2023, Fall 2016, Fall 2015
This course is intended for upper-division undergraduates seeking an interactive course based on modern concepts in evolution and comparative genomics. The course will emphasize the contribution of molecular evolution to a series of seminal events in life's history: origin of life; origin of cells; origin of eukaryotes; origin of multicellularity; evolution of animal development; human origins.
Evolution of Genomes, Cells, and Development: Read More [+]

Rules & Requirements

Prerequisites: Biology 1A-1B and Molecular and Cell Biology C100A or 102; 104 or 140 recommended

Credit Restrictions: Student will receive no credit for 143 after completing ZOOLOGY 109.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Whiteman

Formerly known as: Integrative Biology 160

Also listed as: INTEGBI C160

Evolution of Genomes, Cells, and Development: Read Less [-]

MCELLBI C144 Evolution 4 Units
Terms offered: Fall 2024, Fall 2023
An analysis of the patterns and processes of organic evolution. History and philosophy of evolutionary thought; the different lines of evidence and fields of inquiry that bear on the understanding of evolution. The major features and processes of evolution through geologic times; the generation of new forms and new lineages; extinction; population processes of selection, adaptation, and other forces; genetics, genomics, and the molecular basis of evolution; evolutionary developmental biology; sexual selection; behavioral evolution; applications of evolutionary biology to medical, agricultural, conservational, and anthropological research.
Evolution: Read More [+]

Rules & Requirements

Credit Restrictions: Students will receive no credit for INTEGBI 160 after completing ZOOLOGY 109.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: King

**MCELLBI C146 Data Science for Biology 3 Units**

Terms offered: Spring 2024, Fall 2022, Spring 2007, Spring 2005

Biology has become a data science! This lab course aims for student curiosity to drive hands-on case studies and coding projects about biological applications of data science. The course design supports students’ development of fundamental and transferable computational and statistical skills for critically thinking about and using data in biology. Ethical considerations are interwoven throughout. This course offers projects with multiple levels of sophistication and complexity, enabling participation for students with varying levels of experience.

Data Science for Biology: Read More [+]

**Objectives & Outcomes**

Course Objectives:
- Students will become empowered to use basic coding approaches to access, work with, and analyze biological data.
- Students will learn how to appropriately apply statistical tests to biological data.
- Students will learn how to select and evaluate methods and tools for data analysis.
- Students will understand how to grapple with the ethical considerations of biological data.

**Rules & Requirements**

Prerequisites: Biology 1A; Biology 1B (can be taken concurrently); Data C8 or equivalent statistics and programming experience.

**Hours & Format**

Fall and/or spring: 15 weeks - 4 hours of laboratory per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Alternative method of final assessment during regularly scheduled final exam group (e.g., presentation, final project, etc.).

Instructors: Brenner, Eisen

Also listed as: BIO ENG C146/PLANTBI C146

Data Science for Biology: Read Less [-]

**MCELLBI C148 Microbial Genomics and Genetics 4 Units**

Terms offered: Spring 2024, Spring 2023, Spring 2022

Course emphasizes bacterial and archaeal genetics and comparative genomics. Genetics and genomic methods used to dissect metabolic and development processes in bacteria, archaea, and selected microbial eukaryotes. Genetic mechanisms integrated with genomic information to address integration and diversity of microbial processes. Introduction to the use of computational tools for a comparative analysis of microbial genomes and determining relationships among bacteria, archaea, and microbial eukaryotes.

Microbial Genomics and Genetics: Read More [+]

**Rules & Requirements**

Prerequisites: Molecular and Cell Biology C100A/Chemistry C130 or Molecular and Cell Biology 102

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Summer:
- 8 weeks - 6 hours of lecture and 2 hours of discussion per week
- 10 weeks - 5 hours of lecture and 1.5 hours of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Brenner, Taga

Also listed as: PLANTBI C148

Microbial Genomics and Genetics: Read Less [-]

**MCELLBI 149 The Human Genome 3 Units**

Terms offered: Fall 2024, Fall 2023, Fall 2022

This is an upper division course for majors in MCB with an interest in an in-depth exploration of the forces that shape the human genome and the human population, as well as the ways that human genetic information can be used in medicine, ancestry and forensics. The course will combine lectures and discussion of research papers.

The Human Genome: Read More [+]

**Rules & Requirements**

Prerequisites: MCELLBI 110 and MCELLBI 140, MCELLBI 104 or equivalent

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructors: Eisen, Meyer, Rokhsar

The Human Genome: Read Less [-]
MCELLBI 150 Molecular Immunology 4 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Fundamentals of immunology with emphasis on biochemical and molecular approaches to study of the immune system and its application in medicine and biotechnology. Topics covered include description of the immune system, antibody and T-cell receptor structure and function, genes of the immunoglobulin superfamily, cells and molecular mediators that regulate the immune response, allergy, autoimmunity, immunodeficiency, tissue and organ transplants, and tumor immunology.

Molecular Immunology: Read More [+]

Rules & Requirements
Prerequisites: C100A/Chemistry C130, or 102

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

MCELLBI 150L Immunology Laboratory 4 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Experimental techniques in mammalian molecular biology and cellular immunology. Molecular techniques covered include PCR and recombinant DNA procedures such as gene cloning, gene transfer, DNA sequencing, Southern blot, and restriction mapping. Immunological techniques covered include cell culture and monoclonal antibody production, flow cytometry, ELISA, immunoprecipitation, and western blot.

Immunology Laboratory: Read Less [-]

MCELLBI 153 Molecular Medicine 4 Units
Terms offered: Fall 2024, Fall 2023, Fall 2022
The overarching goal of MCB153 is to convey to students the scientific and regulatory process by which therapeutic drugs are developed and created. After completing this course, students will have a firm understanding on the mechanism of action of several therapies used to fight disease. The course will cover areas such as the discovery and refinement of antibiotics, anti-virals, cancer therapies and CRISPR-based therapies. Furthermore, MCB153 will delve into disease areas not covered in other courses, such as autoimmune diseases, cardiovascular diseases and neurological diseases. Lastly, MCB153 will implement a “case study” for each topic displaying real world challenges and solutions to treating complex diseases.

Molecular Medicine: Read More [+]

Rules & Requirements
Prerequisites: BIOLOGY 1A and MCELLBI 102, MCELLBI C100A, or CHEM 135

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

MCELLBI 153L Immunology Laboratory 4 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Experimental techniques in mammalian molecular biology and cellular immunology. Molecular techniques covered include PCR and recombinant DNA procedures such as gene cloning, gene transfer, DNA sequencing, Southern blot, and restriction mapping. Immunological techniques covered include cell culture and monoclonal antibody production, flow cytometry, ELISA, immunoprecipitation, and western blot.

Immunology Laboratory: Read Less [-]

MCELLBI 160 Cellular and Molecular Neurobiology 4 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
Comprehensive introductory survey of cellular and molecular neuroscience, including cellular neurophysiology, ion channel function, synaptic function and plasticity, sensory transduction, and brain development. Includes introduction to molecular basis of neurological disease. Analysis from the level of molecules to cells to simple circuits.

Cellular and Molecular Neurobiology: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A and 1AL. Prerequisite or co-requisite: Physics 8B

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Formerly known as: Microbiology 103L

Immunology Laboratory: Read Less [-]
MCELLBI 160L Neurobiology Laboratory 4 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
Experimental analyses of properties and interactions of nerve cells and systems, illustrating principal features and current methods. Techniques employed include computer simulation of neuron properties, electrophysiological recording and stimulation of nerves and cells, digitally enhanced video imaging of outgrowth, fluorescence immunocytochemistry, analysis of sensory: CNS mapping, human-evoked potential recording, sensory psychophysics. Neurobiology Laboratory: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A, 1AL; Physics 8A, 8B; MCB 160 or equivalent (may be taken concurrently). Recommended: a course in physical chemistry

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture and 8 hours of laboratory per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Neurobiology Laboratory: Read Less [-]

MCELLBI 166 Biophysical Neurobiology 3 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
Electrochemistry and ion transport phenomena, equivalent circuits, excitability, action potentials, voltage clamp and the Hodgkin-Huxley model. Biophysical properties of ion channels. Statistical and electrophysiological models of synaptic transmission, Quantitative models for dendritic structure and neuronal morphogenesis. Sensory transduction, cellular networks as computational devices, information processing and transfer. Biophysical Neurobiology: Read More [+]

Objectives & Outcomes
Course Objectives: 1) Derive equations for Nernst and GHK membrane potential from fundamental physics concepts.
2) Describe the experiments and theory underlying the Hodgkin-Huxley model.
3) Understand biophysical properties of gating particles called ion channels.
4) Apply and solve equivalent circuit models to describe resting and excitable cells, synaptic transmission and sensory transduction.
5) Use Poisson, Gaussian and binomial distributions to analyze the gating of ion channels, synaptic transmission, and absolute sensitivity of vision.
6) Model dendritic structure based on quantitative descriptors of shape and energy minimization theory.
7) Explain experiments and models of sensory transduction, neuronal integration and lateral inhibition.

Rules & Requirements
Prerequisites: Biology 1A, 1AL, Physics 8A-8B, Chemistry 1A, 3A/3AL-3B, or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Elul, Isacoff, Miller
Biophysical Neurobiology: Read Less [-]
MCELLBI 168 Sensory Neuroscience 4 Units  
Terms offered: Fall 1995  
Sensory cells monitor the environment to trigger behaviors required to feed, avoid danger and thrive. This interactive course combines lectures with instructor-led discussions of research from the scientific literature. Our goals are two fold. First, we will present current concepts in sensory neurobiology by illustrating how different sensory inputs govern homeostasis and behavior. Second, though discussions of scientific data, the course will foster critical thinking skills, and provide practice in drawing logical, evidence-based conclusions.  
Sensory Neuroscience: Read More [+]

Rules & Requirements

Prerequisites: MCELLBI 160 or BIOLOGY 1A/1AL-1B, PHYSICS 8A-8B and consent of Instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Lumpkin, Bautista

MCELLBI 170L Molecular and Cell Biology Laboratory 4 Units  
Terms offered: Summer 2024 First 6 Week Session, Summer 2023 First 6 Week Session, Summer 2022 First 6 Week Session  
This laboratory course for majors in Chemical Biology, Cell Biology, and Biochemistry & Molecular Biology is designed to have students learn the theory and practicality of modern laboratory science. The first and last third of the course will focus on Molecular Biology and Biochemistry where the students will learn basic skills and investigate the role of Kinesin 5 in Mitosis. In the middle Cell Biology portion of the course you will learn about cell structure and the cytoskeleton with an emphasis on microscopy techniques.  
Molecular and Cell Biology Laboratory: Read More [+]

Rules & Requirements

Prerequisites: MCELLBI 102, MCELLBI 104, MCELLBI 110 or MCELLBI 140

Credit Restrictions: Students will receive no credit for Molecular and Cell Biology 170L after taking Molecular and Cell Biology 133L, 140L or C110L/Chemistry C110L

Hours & Format

Summer: 6 weeks - 5 hours of lecture and 14 hours of laboratory per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam not required.

Instructor: Le Blanc

**MCELLBI C175 Life Sciences, Business, and Entrepreneurship Capstone Course 4 Units**

Terms offered: Prior to 2007

Blended lecture / Project-based course where student teams build out a business plan for a mock biotech company, demonstrating advanced knowledge in therapeutics and business development. Throughout the course student teams will work toward a final project in which they will identify and present a technology overview, disease overview and explanation of unmet need, a development plan, a commercialization plan, risk mitigation strategy, and financials. Class will include field trips, guest lectures, and a pitch competition with prize.

Life Sciences, Business, and Entrepreneurship Capstone Course: Read More [+]

**Rules & Requirements**

**Prerequisites:** Students must be in their fourth and final year of the Life Sciences, Business, and Entrepreneurship Program in order to enroll in this class

**Hours & Format**

**Fall and/or spring:** 15 weeks - 4 hours of lecture per week

**Additional Details**

**Subject/Course Level:** Molecular and Cell Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Alternative to final exam.

**Instructors:** Schaletzky, Dillin

**Also listed as:** UGBA C195C

**MCELLBI 180 Undergraduate Teaching of Biology 1A Laboratory 1 or 2 Units**

Terms offered: Summer 2022 8 Week Session, Spring 2012, Spring 2007

Course consists of a weekly three-hour training session that focuses on laboratory techniques, instructional aids, and problem solving, plus an additional three hour weekly laboratory where the UGSI is required to assist a GSI in the instruction of laboratory (answering questions, providing demonstrations, etc.).

Undergraduate Teaching of Biology 1A Laboratory: Read More [+]

**Rules & Requirements**

**Prerequisites:** Biology 1A, 1AL with a minimum grade of B. Appointment as a UGSI in biology by consent of instructor. Restricted to undergraduate students

**Repeat rules:** Course may be repeated for credit up to a total of 4 units.

**Hours & Format**

**Fall and/or spring:** 15 weeks - 3-6 hours of session per week

**Summer:** 8 weeks - 6-12 hours of session per week

**Additional Details**

**Subject/Course Level:** Molecular and Cell Biology/Undergraduate

**Grading/Final exam status:** Offered for pass/not pass grade only. Final exam not required.

Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam required.
Instructors: Hockemeyer, Wilson
Intro to CRISPR: From Basic Biology to Genome Editing Technology: Read Less [-]
MCELLBI N184L Intro to CRISPR Lab: From Basic Biology to Genome Editing Technology 1 Unit
Terms offered: Summer 2019 3 Week Session
This 3 week lab course will focus on applications of CRISPR technology as a platform for genome editing and functional genomics. The program will consist of a hands-on laboratory experience demonstrating how CRISPR systems work in situ, as well as use genome editing both in vitro and in vivo. Students will utilize fundamental molecular biology techniques and learn additional protocols specific to genome editing. Two bioinformatics based lessons will cover the essential programs and analyses used in the genome editing field. This course requires concurrent enrollment in a lecture component (MCELLBI N184), where lecturers will address topics in genome editing and CRISPR-Cas9 research.

Rules & Requirements
Prerequisites: Biology 1A/1AL or equivalent course. MCELLBI N184 (may be taken concurrently)

Hours & Format
Summer: 3 weeks - 14 hours of laboratory per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

Instructors: Hockemeyer, Wilson

Intro to CRISPR Lab: From Basic Biology to Genome Editing Technology: Read More [+]
MCELLBI 194 Undergraduate Student Instructor for Molecular and Cell Biology Courses 1 - 2 Units
Terms offered: Fall 2018, Fall 2017
UGSIs will work under supervision of instructor and/or GSI. The UGSI will attend three hours of lecture per week where they will assist a GSI in instruction (answering questions, providing demonstrations, facilitating activities, etc.). In addition, UGSIs will meet with students from their section for zero to three hours of tutoring per week depending on the number of units. UGSIs do not evaluate students' work or assign grades. UGSIs will be graded on attendance and preparation of one lesson plan and one quiz. Required to attend any mandatory preparatory and review meetings.
Undergraduate Student Instructor for Molecular and Cell Biology Courses: Read More [+]

Rules & Requirements
Prerequisites: Must have completed course applying to UGSI with a grade of B or better; or consent of instructor
Repeat rules: Course may be repeated for credit up to a total of 4 units.

Hours & Format
Fall and/or spring: 15 weeks - 3-3 hours of lecture per week
Summer: 8 weeks - 6-6 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

MCELLBI H196A Honors Research 1 - 4 Units
Terms offered: Fall 2015, Fall 2014, Spring 2014
Individual research and thesis preparation under the supervision of a faculty member. Acceptance to the Molecular and Cell Biology Honors Program is required. Contact the MCB Undergraduate Affairs Office, 3060 Valley Life Sciences Building, for application and details. Honor students must complete at least two semesters of research, taking a minimum of 4 units and a maximum of 8 units of H196A-196B. If desired, one semester of 199 can be used to replace H196A.
Honors Research: Read More [+]

Rules & Requirements
Prerequisites: Senior honors status and consent of instructor
Repeat rules: Course may be repeated for credit up to a total of 4 units.

Hours & Format
Fall and/or spring: 15 weeks - 1-4 hours of independent study per week
Summer: 8 weeks - 1.5-7.5 hours of independent study per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

MCELLBI H196B Honors Research 1 - 4 Units
Terms offered: Spring 2020, Spring 2016, Spring 2015
Individual research and completion of thesis under the supervision of a faculty member. This course satisfies the thesis requirement for the Molecular and Cell Biology Department Honors Program. Contact the MCB Undergraduate Affairs Office, 3060 Valley Life Sciences Building, for program details and an application. Honor students must complete at least two semesters of research, taking a minimum of 4 units and a maximum of 8 units of H196A-196B. One semester of H196B is required.

MCELLBI 200A Fundamentals of Molecular and Cell Biology 3 Units  
Terms offered: Fall 2024, Fall 2023, Fall 2022  
The goal of this course is to provide graduate-level instruction on molecular and cellular biosciences from a highly-integrated systems perspective, rather than using a more classic, techniques-oriented format. A collection of approaches, and a focus on critical thinking and problem solving, will be used to show how fundamental, highly-significant biological problems are "cracked open." Reading will be assigned from a mix of classic and current peer-reviewed papers selected by the instructors.
Fundamentals of Molecular and Cell Biology: Read More [+]  
Rules & Requirements  
Prerequisites: 200A and 200B must be taken concurrently. Combined course required and restricted to all MCB first-year graduate students

Hours & Format  
Fall and/or spring: 15 weeks - 2 hours of lecture and 4 hours of discussion per week  

Additional Details  
Subject/Course Level: Molecular and Cell Biology/Graduate  
Grading: Offered for satisfactory/unsatisfactory grade only.

Fundamentals of Molecular and Cell Biology: Read Less [-]
MCELLBI 200B Fundamentals of Molecular and Cell Biology 3 Units
Terms offered: Fall 2024, Fall 2023, Fall 2022

Instructors: Marqusee, Rio, Drubin, Rine, Vance, Feller

MCELLBI 201A CRISPR Gene Editing, Stem Cell and Genomic Analysis 6 Units
Terms offered: Summer 2024 Second 6 Week Session
This course seeks to develop students’ foundation in critical lab skills and introduce them to the fundamental principles and technologies driving modern biomedical research. After completing MCELLBI 201A, students will have a firm understanding of CRISPR gene editing, cell culture, and genomic analysis. Students will learn the fundamentals of hypothesis-driven research, obtain critical thinking skills for data interpretation, and deliver effective written and oral reports of their results.

Rules & Requirements
Prerequisites: BIOLOGY 1A and MCELLBI 102 or equivalent courses
Credit Restrictions: Students will receive no credit for MCELLBI 201A after completing MCELLBI 201A. A deficient grade in MCELLBI 201A may be removed by taking MCELLBI 201B.

Hours & Format
Summer: 6 weeks - 4 hours of lecture and 18 hours of laboratory per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Instructor: Ingolia

MCELLBI 201B CRISPR Gene Editing, Stem Cell and Genomic Analysis 4 Units
Terms offered: Fall 2024
This course seeks to build upon students’ foundations set in MCELLBI 201A, in which they were introduced to the fundamental principles and technologies driving modern biomedical research. MCELLBI 201B aims to develop students’ skills in bioinformatics and quantitative data analysis. After completing this course, students will understand the RNA-Seq and ChIP-Seq pipelines and carry out their own analyses. Students will continue to learn the fundamentals of experimental design, obtain critical thinking skills for data interpretation, and deliver effective presentations on their results.

Rules & Requirements
Prerequisites: MCELLBI 201A
Credit Restrictions: Students will receive no credit for MCELLBI 201B after completing MCELLBI 201B. A deficient grade in MCELLBI 201B may be removed by taking MCELLBI 201B.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture and 9 hours of laboratory per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Instructor: Ingolia

MCELLBI C205 Modern Optical Microscopy for the Modern Biologist 3 Units
Terms offered: Fall 2024, Fall 2023, Spring 2023
This course is intended for graduate students in the early stages of their thesis research who are contemplating using modern microscopy tools as part of their work. It endeavors to cut through the confusion of the wide array of new imaging methods, with a practical description of the pros and cons of each. In addition to providing an intuitive physical understanding how these microscopes work, the course will offer hands on experience with cutting-edge microscopes where students will be able to see firsthand how different imaging modalities perform on their own samples, and where they will be able to access computational tools for the visualization and analysis of their data.

Modern Optical Microscopy for the Modern Biologist: Read More [+]

Rules & Requirements
Credit Restrictions: Students will receive no credit for MCELLBI 205 after completing MCELLBI 205, or MCELLBI 205. A deficient grade in MCELLBI 205 may be removed by taking MCELLBI 205, or MCELLBI 205.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Instructors: Betzig, Ji
Formerly known as: Molecular and Cell Biology 205
Also listed as: NEU C272/PHYSICS C218
Modern Optical Microscopy for the Modern Biologist: Read Less [-]

MCELLBI 206 Physical Biochemistry 3 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
Application of modern physical concepts and experimental methods to the analysis of the structure, function, and interaction of large molecules of biological interest.
Physical Biochemistry: Read More [+]

Rules & Requirements
Prerequisites: MCB C100A or equivalent. Admission to the course requires formal consent of instructors, except for MCB graduate students and graduate students in the laboratories of MCB faculty

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Formerly known as: 200
Advanced Biochemistry and Molecular Biology: Macromolecular Reactions and the Cell: Read Less [-]

MCELLBI 210 Advanced Biochemistry and Molecular Biology: Macromolecular Reactions and the Cell 4 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
General course for first-year graduate students. Covers our current understanding of, methodological approaches for analyzing, and recent advances in the function of cellular macromolecules and macromolecular complexes in DNA replication, recombination, transposition and repair, gene expression and its regulation, mRNA splicing, genome organization, noncoding RNAs, signal transduction, protein synthesis, folding and degradation, growth control, and other life processes.
Advanced Biochemistry and Molecular Biology: Macromolecular Reactions and the Cell: Read More [+]

Rules & Requirements
Prerequisites: 110 or equivalent. Admission to the course requires formal consent of instructors, except for MCB graduate students and graduate students in the laboratories of MCB faculty

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Formerly known as: 200
Advanced Biochemistry and Molecular Biology: Macromolecular Reactions and the Cell: Read Less [-]

MCELLBI C212A Chemical Biology I - Structure, Synthesis and Function of Biomolecules 1 Unit
Terms offered: Spring 2024, Spring 2023, Spring 2022
This course will present the structure of proteins, nucleic acids, and oligosaccharides from the perspective of organic chemistry. Modern methods for the synthesis and purification of these molecules will also be presented.
Chemical Biology I - Structure, Synthesis and Function of Biomolecules: Read More [+]

Rules & Requirements

Hours & Format
Fall and/or spring: 5 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Also listed as: CHEM C271A
Chemical Biology I - Structure, Synthesis and Function of Biomolecules: Read Less [-]
MCELLBI C212B Chemical Biology II - Enzyme Reaction Mechanisms 1 Unit
Terms offered: Spring 2024, Spring 2023, Spring 2022
This course will focus on the principles of enzyme catalysis. The course will begin with an introduction of the general concepts of enzyme catalysis which will be followed by detailed examples that will examine the chemistry behind the reactions and the three-dimensional structures that carry out the transformations.

Chemical Biology II - Enzyme Reaction Mechanisms: Read More [+]

Hours & Format
Fall and/or spring: 5 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Also listed as: CHEM C271B
Chemical Biology II - Enzyme Reaction Mechanisms: Read Less [-]

MCELLBI C212C Chemical Biology III - Contemporary Topics in Chemical Biology 1 Unit
Terms offered: Spring 2024, Spring 2023, Spring 2022
This course will build on the principles discussed in Chemical Biology I and II. The focus will consist of case studies where rigorous chemical approaches have been brought to bear on biological questions. Potential subject areas will include signal transduction, photosynthesis, immunology, virology, and cancer. For each topic, the appropriate bioanalytical techniques will be emphasized.

Chemical Biology III - Contemporary Topics in Chemical Biology: Read More [+]

Hours & Format
Fall and/or spring: 5 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Also listed as: CHEM C271C
Chemical Biology III - Contemporary Topics in Chemical Biology: Read Less [-]

MCELLBI C214 Protein Chemistry, Enzymology, and Bio-organic Chemistry 2 Units
Terms offered: Spring 2020, Spring 2015, Spring 2014, Spring 2013
The topics covered will be chosen from the following: protein structure; protein-protein interactions; enzyme kinetics and mechanism; enzyme design. Intended for graduate students in chemistry, biochemistry, and molecular and cell biology.

Protein Chemistry, Enzymology, and Bio-organic Chemistry: Read More [+]

Rules & Requirements
Prerequisites: Graduate standing or consent of instructor

Hours & Format
Fall and/or spring:
10 weeks - 3 hours of lecture per week
15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Also listed as: CHEM C230
Protein Chemistry, Enzymology, and Bio-organic Chemistry: Read Less [-]

MCELLBI C216 Microbial Diversity Workshop 1 Unit
Terms offered: Fall 2024, Fall 2022, Fall 2021, Fall 2020
This workshop for graduate students will parallel C116, Microbial Diversity, which should be taken concurrently. Emphasis in the workshop will be on review of research literature and formulation of paper pertinent to research in microbial diversity.

Microbial Diversity Workshop: Read More [+]

Rules & Requirements
Prerequisites: Graduate standing; C112 or consent of instructor and organic chemistry (may be taken concurrently)

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of workshop and 1 hour of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Instructor: Coates
Formerly known as: Molecular and Cell Biology C216, Plant and Microbial Biology C216
Also listed as: PLANTBI C216
Microbial Diversity Workshop: Read Less [-]
MCELLBI 218B Research Review in Biochemistry and Molecular Biology: Trace Elements in the Plant Lineage 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Merchant

Research Review in Biochemistry and Molecular Biology: Trace Elements in the Plant Lineage: Read Less [-]

MCELLBI 218C Research Review in Biochemistry and Molecular Biology: Synthetic Biology and Cellular Enzymology 2 Units
Terms offered: Spring 2024, Fall 2023, Spring 2023
Synthetic biology, metabolic engineering, systems biology, enzyme mechanism, and gene discovery. Research Review in Biochemistry and Molecular Biology: Synthetic Biology and Cellular Enzymology: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor or consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Chang

Research Review in Biochemistry and Molecular Biology: Synthetic Biology and Cellular Enzymology: Read Less [-]

MCELLBI 218F Research Review in Biochemistry and Molecular Biology: Energy-dependent Proteases and Molecular Machines 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Our goals are to decipher the fundamental principles that govern substrate engagement, de-ubiquitylation, unfolding, and translocation by the proteasome. Research Review in Biochemistry and Molecular Biology: Energy-dependent Proteases and Molecular Machines: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor or consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Martin

Research Review in Biochemistry and Molecular Biology: Energy-dependent Proteases and Molecular Machines: Read Less [-]

MCELLBI 218H Research Review in Biochemistry and Molecular Biology: Protein Synthesis in Bacteria and Mammals 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
The mechanism of protein synthesis in bacteria and human cells. Specific areas of interest include the structure and function of the ribosome and the regulation of protein synthesis. Research Review in Biochemistry and Molecular Biology: Protein Synthesis in Bacteria and Mammals: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Cate

Research Review in Biochemistry and Molecular Biology: Protein Synthesis in Bacteria and Mammals: Read Less [-]
MCELLBI 218I Research Review in Biochemistry and Molecular Biology: Chemical Biology and Inorganic Chemistry 2 Units
Terms offered: Spring 2024, Fall 2023, Spring 2023
Research and literature topics in chemical biology and inorganic chemistry relevant to human health and disease and energy science will be discussed.
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Chris Chang
Research Review in Biochemistry and Molecular Biology: Chemical Biology and Inorganic Chemistry: Read Less [-]

MCELLBI 218J Research Review in Biochemistry and Molecular Biology: Advanced 20th Century Perspectives on Cancer Cell Genetics 2 Units
Terms offered: Fall 2022, Fall 2021, Spring 2021
Transduction of cellular sequences and genetic regulation of transformation by oncogenic retroviruses as models for natural carcinogenesis, including a critical review of the current research.
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Duesberg
Research Review in Biochemistry and Molecular Biology: Advanced 20th Century Perspectives on Cancer Cell Genetics: Read Less [-]

MCELLBI 218M Research Review in Molecular Mechanisms of Membrane Transport 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
In our laboratory, we study mechanisms by which molecules are transported across lipid bilayer membranes. Current research efforts to understand mechanisms of protein translocation across intracellular organelles and transport of other biomolecules will be discussed.
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Park
Research Review in Molecular Mechanisms of Membrane Transport: Read Less [-]

MCELLBI 218O Research Review in Biochemistry and Molecular Biology: Chemical Biology and Enzymology 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Topics at the interface of chemistry and biology with a particular focus on mechanisms of enzyme catalysis.
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Marletta
Research Review in Biochemistry and Molecular Biology: Chemical Biology and Enzymology: Read Less [-]
MCELLBI 218P Research Review in Biochemistry and Molecular Biology: Chemical Biology and Neuroscience 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Molecular approaches to designing and deploying tools for voltage imaging and brain mapping.
Research Review in Biochemistry and Molecular Biology: Chemical Biology and Neuroscience: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructors: Miller, Evan

Research Review in Biochemistry and Molecular Biology: Chemical Biology and Neuroscience: Read Less [-]

MCELLBI 218Q Research Review in Biochemistry and Molecular Biology: Single Molecular Imaging of Macromolecular Enzymes 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Yildiz laboratory combines molecular biology and single molecule biophysical techniques to understand mechanisms that underlie cellular organization and motility. Specific focuses of the lab are to dissect 1) the mechanism of cytoplasmic dynein motility, 2) the regulation of intraflagellar transport, and 3) the protection and maintenance of mammalian telomeres.
Research Review in Biochemistry and Molecular Biology: Chemical Biology and Neuroscience: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Yildiz

Research Review in Biochemistry and Molecular Biology: Single Molecular Imaging of Macromolecular Enzymes: Read Less [-]

MCELLBI 218S Research Review in Biochemistry and Molecular Biology: Cryo-Electron Microscopy of Macromolecules 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Structure-function studies of the cytoskeleton and large molecular machines by cryo-electron microscopy and image reconstruction.
Research Review in Biochemistry and Molecular Biology: Cryo-Electron Microscopy of Macromolecules: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Nogales

Research Review in Biochemistry and Molecular Biology: Cryo-Electron Microscopy of Macromolecules: Read Less [-]

MCELLBI 218T Electron Cryo-tomography of Macromolecular Complexes 2 Units
Terms offered: Spring 2023, Fall 2022, Spring 2022
Different methods for determining how the in situ structure and arrangement of macromolecular complexes influence cell morphology and function will be discussed via literature review and implemented through lab-based research and discussions.
Electron Cryo-tomography of Macromolecular Complexes: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Davies

Electron Cryo-tomography of Macromolecular Complexes: Read Less [-]
MCELLBI 218U Research Review in Biochemistry and Molecular Biology: Epigenetic Gene Regulation 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Discussion of recent advances in the mechanism of epigenetic modifications on mammalian gene regulation and developing tools for precision editing of epigenetic modifications for controlling gene expression.
Research Review in Biochemistry and Molecular Biology: Epigenetic Gene Regulation: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Nunez
Research Review in Biochemistry and Molecular Biology: Epigenetic Gene Regulation: Read Less [-]

MCELLBI 218V Research Review in Biochemistry and Molecular Biology: Biophysics of Macromolecule Transport Across Membranes 2 Units
Terms offered: Fall 2014, Spring 2014, Fall 2013
Review of current literature and discussion of original research.
Research Review in Biochemistry and Molecular Biology: Biophysics of Macromolecule Transport Across Membranes: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Krantz
Research Review in Biochemistry and Molecular Biology: Biophysics of Macromolecule Transport Across Membranes: Read Less [-]

MCELLBI 219A Structural Membrane Biology 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
The mechanisms by which protein complexes use their structures to bud, bend, and sever membranes will be covered in research reports and reviews of the current literature and in discussion of current experiments in the field.
Structural Membrane Biology: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Savage
Structural Membrane Biology: Read Less [-]
MCELLBI 219B Regulation of Translation 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Understanding the molecular basis and physiological role of translational regulation in gene expression with an emphasis on global profiling and functional genomics.
Regulation of Translation: Read More [+]  
Rules & Requirements  
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor  
Repeat rules: Course may be repeated for credit without restriction.  
Hours & Format  
Fall and/or spring: 15 weeks - 2 hours of seminar per week  
Additional Details  
Subject/Course Level: Molecular and Cell Biology/Graduate  
Grading: Offered for satisfactory/unsatisfactory grade only.  
Instructor: Ingolia  
Regulation of Translation: Read Less [-]  

MCELLBI 219H Research Review in Biochemistry and Molecular Biology: Molecular and Cell Biology of Listeria monocytogenes Pathogenesis 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Discussion of recent research on the genetics, cell biology, and immunology of the model facultative intracellular bacterial pathogen, Research Review in Biochemistry and Molecular Biology: Molecular and Cell Biology of Listeria monocytogenes Pathogenesis: Read More [+]
Rules & Requirements  
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor  
Repeat rules: Course may be repeated for credit without restriction.  
Hours & Format  
Fall and/or spring: 15 weeks - 2 hours of seminar per week  
Additional Details  
Subject/Course Level: Molecular and Cell Biology/Graduate  
Grading: Offered for satisfactory/unsatisfactory grade only.  
Instructor: Portnoy  
Research Review in Biochemistry and Molecular Biology: Molecular and Cell Biology of Listeria monocytogenes Pathogenesis: Read Less [-]  

MCELLBI 219K Research Review in Chemical Biology, Synthetic Biology, Organic Chemistry and Biophysics 2 Units
Terms offered: Spring 2021, Spring 2002, Fall 2001
Discussion of recent research on chemical biology, synthetic biology, organic chemistry and biophysics. 
Research Review in Chemical Biology, Synthetic Biology, Organic Chemistry and Biophysics: Read More [+]  
Rules & Requirements  
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor  
Repeat rules: Course may be repeated for credit without restriction.  
Hours & Format  
Fall and/or spring: 15 weeks - 2 hours of seminar per week  
Additional Details  
Subject/Course Level: Molecular and Cell Biology/Graduate  
Grading: Offered for satisfactory/unsatisfactory grade only.  
Instructor: Schepartz  
Research Review in Chemical Biology, Synthetic Biology, Organic Chemistry and Biophysics: Read Less [-]  

MCELLBI 219S Research Review in Biochemistry and Molecular Biology: Structural Biology of Signaling and Replication 2 Units
Terms offered: Spring 2024, Fall 2023, Spring 2023
Mechanisms and structure in DNA replication and eukaryotic cell signaling.
Research Review in Biochemistry and Molecular Biology: Structural Biology of Signaling and Replication: Read More [+]
Rules & Requirements  
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor  
Repeat rules: Course may be repeated for credit without restriction.  
Hours & Format  
Fall and/or spring: 15 weeks - 2 hours of seminar per week  
Additional Details  
Subject/Course Level: Molecular and Cell Biology/Graduate  
Grading: Offered for satisfactory/unsatisfactory grade only.  
Instructor: Kuriyan  
Research Review in Biochemistry and Molecular Biology: Structural Biology of Signaling and Replication: Read Less [-]
MCELLBI 219U Research Review in Biochemistry and Molecular Biology: Single Molecule Biophysics 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Methods of single molecule manipulation and visualization that are used to characterize the structure and mechanochemical properties of translocating DNA binding protein such as RNA polymerase and to investigate the mechanical denaturation of single protein molecules will be covered in research reports and reviews of the current literature and in discussion of current experiments in the field.
Research Review in Biochemistry and Molecular Biology: Single Molecule Biophysics: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Bustamante
Research Review in Biochemistry and Molecular Biology: Single Molecule Biophysics: Read Less [-]

MCELLBI 219Y Research Review in Biochemistry and Molecular Biology: Regulation of HIV Gene Expression 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Regulation of HIV gene expression by viral proteins and cellular cofactors will be covered in research reports and reviews of the current literature and in discussion of current experiments in the field.
Research Review in Biochemistry and Molecular Biology: Regulation of HIV Gene Expression: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Zhou
Research Review in Biochemistry and Molecular Biology: Regulation of HIV Gene Expression: Read Less [-]

MCELLBI 219Z Research Review in Biochemistry and Molecular Biology: Polymerase and RNA Biochemistry and Biology 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Emphasizes eukaryotic retroelement reverse transcriptases and retroelement mobility.
Research Review in Biochemistry and Molecular Biology: Polymerase and RNA Biochemistry and Biology: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Collins
Research Review in Biochemistry and Molecular Biology: Polymerase and RNA Biochemistry and Biology: Read Less [-]

MCELLBI 220 Therapeutic Modalities 4 Units
Terms offered: Spring 2024
This class is designed to introduce graduate students to a range of therapeutic modalities that are in development or use. It will focus on small molecules, genomic therapies (including genome editing), and biologics. This class will present different applications of small molecules, RNA or DNA therapeutics, and biologics and discuss both advantages and challenges in their clinical use.
Therapeutic Modalities: Read More [+]
Rules & Requirements
Prerequisites: For MCB students, MCELLBI 200A and MCELLBI 200B are prerequisites for this class. Students outside of MCB should check with the head instructor whether they have the required background to follow this class most productively
Credit Restrictions: Students will receive no credit for MCELLBI 220 after completing MCELLBI 220. A deficient grade in MCELLBI 220 may be removed by taking MCELLBI 220.
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Instructor: Olzmann
Therapeutic Modalities: Read Less [-]
MCELLBI 227 Science Writing and Professional Development 2 Units
Terms offered: Fall 2024
The overarching goal of this course is to provide students with professional skills in scientific reading, scientific writing, creating a CV or resume and cover letters and understanding the structures of academic institutions and biotech companies. In addition, the class will provide career advice for students entering the academic or biotech workplaces.

Rules & Requirements
Prerequisites: This course will be limited to students enrolled in the MCB Master of Biotechnology program

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Instructor: Beatty

Science Writing and Professional Development: Read Less [-]

MCELLBI 229A Research Review in Viruses as Models for Eukaryote Gene Expression and Replication 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Recent developments in eukaryote viral and cellular regulation. New concepts in transcription and RNA replication, with particular emphasis on virus-cell interactions.
Research Review in Viruses as Models for Eukaryote Gene Expression and Replication: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Botchan
Formerly known as: Molecular and Cell Biology 249L
Research Review in Viruses as Models for Eukaryote Gene Expression and Replication: Read Less [-]

MCELLBI 229B Research Review in Molecular Therapeutics: Imaging Single Molecules: Fashion or Game Changer? 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Research review in genetics, genomics and development. We will explore how the detection of single particles (DNA, RNA, proteins) can help with understanding cellular organization and enzymatic processes dynamics and kinetics. Most of the experiments described will be drawn from the gene expression and nuclear organization literature.
Research Review in Molecular Therapeutics: Imaging Single Molecules: Fashion or Game Changer?: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Darzacq
Formerly known as: Molecular and Cell Biology 249L
Research Review in Molecular Therapeutics: Imaging Single Molecules: Fashion or Game Changer?: Read Less [-]
MCELLBI 229C Research Review in Molecular Therapeutics: Structure and Function of RNA
2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
RNA structure, folding, and function. Specific topics include ribozyme mechanisms, RNA-mediated translation initiation, and protein targeting and secretion.
Research Review in Molecular Therapeutics: Structure and Function of RNA: Read More [+]  
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Doudna
Formerly known as: Molecular and Cell Biology 219J
Research Review in Molecular Therapeutics: Structure and Function of RNA: Read Less [-]

MCELLBI 229D Research Review in Molecular Therapeutics: Diseases/Retina 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Evaluation of current research in molecular mechanisms underlying diseases of the retina.
Research Review in Molecular Therapeutics: Diseases/Retina: Read More [+]  
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Flannery
Formerly known as: Molecular and Cell Biology 269U
Research Review in Molecular Therapeutics: Diseases/Retina: Read Less [-]

MCELLBI 229E Research Review in Molecular Therapeutics: The Protein Folding Problem 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Protein structure, stability, design, and the pathway of protein folding.
Research Review in Molecular Therapeutics: The Protein Folding Problem: Read More [+]  
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Marqusee
Formerly known as: Molecular and Cell Biology 218R
Research Review in Molecular Therapeutics: The Protein Folding Problem: Read Less [-]

MCELLBI 229F Research Review in Molecular Therapeutics: Virus-Host Interactions 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Understanding the creative strategies viruses use to manipulate gene expression in host cells, with a focus on RNA-based regulation of gene expression.
Research Review in Molecular Therapeutics: Virus-Host Interactions: Read More [+]  
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Glaunsinger
Formerly known as: Molecular and Cell Biology 219G
Research Review in Molecular Therapeutics: Virus-Host Interactions: Read Less [-]
MCELLBI 229G Mapping Metabolic Drivers of Disease using Chemoproteomic and Metabolomic Platforms 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023
We will discuss current research in the following three areas: 1) mapping metabolic drivers of human diseases using chemoproteomic and metabolomic platforms; 2) expanding the druggable proteome through mapping and pharmacologically interrogating proteome-wide hyper-reactive and ligandable hotspots; 3) mapping proteome-wide targets of environmental and pharmaceutical chemicals towards understanding novel toxicological mechanisms.

Mapping Metabolic Drivers of Disease using Chemoproteomic and Metabolomic Platforms: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Nomura

Formerly known as: Molecular and Cell Biology 218A

Mapping Metabolic Drivers of Disease using Chemoproteomic and Metabolomic Platforms: Read Less [-]

MCELLBI 229H Research Review in Molecular Therapeutics: Mechanisms of lipid homeostasis and lipotoxicity 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023
Discussion of recent literature and original research. Current research examines the cell biology of lipid homeostasis, including the mechanisms that regulate lipid droplet biogenesis, oxidative lipid damage, and ferroptosis.

Research Review in Molecular Therapeutics: Mechanisms of lipid homeostasis and lipotoxicity: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Olzmann

Formerly known as: Molecular and Cell Biology 239A

Research Review in Molecular Therapeutics: Mechanisms of lipid homeostasis and lipotoxicity: Read Less [-]

MCELLBI 229I Research Review in Molecular Therapeutics: Regulation of the Cell Cycle 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023
Review of current literature and discussion of original research.

Research Review in Molecular Therapeutics: Regulation of the Cell Cycle: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Rape

Formerly known as: Molecular and Cell Biology 239B

Research Review in Molecular Therapeutics: Regulation of the Cell Cycle: Read Less [-]
MCELLBI 229J Research Review in Understanding and Exploiting Complex Biological Processes and Machines 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Covers aspects of ribosome engineering, organelle imaging and interactions, protein delivery, and cell signaling.
Research Review in Understanding and Exploiting Complex Biological Processes and Machines: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Schepartz
Formerly known as: Molecular and Cell Biology 218N
Research Review in Understanding and Exploiting Complex Biological Processes and Machines: Read Less [-]

MCELLBI 229K Research Review in Molecular Therapeutics: Eukaryotic Gene Expression 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Protein-DNA interactions and the control of gene expression in eukaryotes.
Research Review in Molecular Therapeutics: Eukaryotic Gene Expression: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Tjian
Formerly known as: Molecular and Cell Biology 219F
Research Review in Molecular Therapeutics: Eukaryotic Gene Expression: Read Less [-]

MCELLBI 229L Research Review in Molecular Therapeutics: Structure and Function of the Human Epigenome 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Research focuses on (i) understanding the interplay between regulatory information encoded in the primary sequence of the human genome and epigenomic information inscribed by the joint action of trans-acting factors, chromatin remodelers, modifiers, and readers that yields a particular functional state in primary cells of the immune and central nervous systems; (ii) leveraging this understanding to engineer novel architectures for targeted epigenome editors customized for use in these and other clinically relevant human cell types; (iii) establishing preclinical proof-of-concept for the use of the resulting epigenome-editing molecular therapeutics in ex vivo and in vivo models of autoimmune and neurologic disease.
Research Review in Molecular Therapeutics: Structure and Function of the Human Epigenome: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Urnov
Formerly known as: Molecular and Cell Biology 249AA
Research Review in Molecular Therapeutics: Structure and Function of the Human Epigenome: Read Less [-]
MCELLBI 229M Research Review in Molecular Therapeutics: CRISPR Enzyme Delivery Technology 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
The molecular engineering of novel delivery technology to facilitate therapeutic genome editing. Delivery of pre-formed CRISPR ribonucleoprotein enzymes is a central focus, and progress in the field will be covered via research presentations as well as reviews of recent literature.
Research Review in Molecular Therapeutics: CRISPR Enzyme Delivery Technology: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Wilson

Formerly known as: Molecular and Cell Biology 218G
Research Review in Molecular Therapeutics: CRISPR Enzyme Delivery Technology: Read Less [-]

MCELLBI 229N Research Review in Molecular Therapeutics: Molecular and Cellular Mechanisms of Nutrient Sensing 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
In our laboratory, we study the molecular mechanisms of nutrient sensing and growth control. Specific areas of interest include the mTOR pathway, energy sensing, lysosomal biology and translational control.
Research Review in Molecular Therapeutics: Molecular and Cellular Mechanisms of Nutrient Sensing: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Zoncu

Formerly known as: Molecular and Cell Biology 218Z
Research Review in Molecular Therapeutics: Molecular and Cellular Mechanisms of Nutrient Sensing: Read Less [-]

MCELLBI 230 Advanced Cell and Developmental Biology 4 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
This course will discuss modern concepts of cell and developmental biology, with a strong emphasis on regulatory mechanisms at different length-scales (intermolecular, intracellular and intercellular). It will cover methods of quantitative, single-cell, and organismal biology in cell lines, stem cells, and model organisms. A solid foundation of core cell biology concepts, such as the cell cycle, cytoskeleton, or vesicle transport, is strongly recommended.
Advanced Cell and Developmental Biology: Read More [+]

Rules & Requirements
Prerequisites: 130. Formal consent of instructors required, except for MCB graduate students and graduate students in the laboratories of MCB faculty

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Advanced Cell and Developmental Biology: Read Less [-]
MCELLBI 231 Advanced Developmental and Stem Cell Biology 4 Units
Terms offered: Spring 2018, Spring 2017, Spring 2015
Principles of animal development will be set forth from the classical and recent experimental analysis of induction, localization, patterning mutants, axis formation, regional gene expression, and cell interactions. Early development of selected vertebrates and invertebrates will be examined, and emerging topics in microRNA and stem cell biology will be highlighted. A weekly discussion section with readings from the research literature is required.

Advanced Developmental and Stem Cell Biology: Read More [+]

Rules & Requirements

Prerequisites: Previous course in development (131 or equivalent) or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1-2 hours of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.

Advanced Developmental and Stem Cell Biology: Read Less [-]

MCELLBI 236 Advanced Mammalian Physiology 5 Units
Terms offered: Fall 2024, Fall 2023, Fall 2022
Principles of mammalian (primarily human) physiology emphasizing physical, chemical, molecular, and cellular bases of functional biology. The following topics will be covered: cellular and membrane ion and nonelectrolyte transport; cell and endocrine regulation; autonomic nervous system regulation; skeletal, smooth, and cardiac muscle; cardiovascular physiology; respiration; renal physiology; gastrointestinal physiology. Discussion section will study advanced physiological topics, including: presentations by the faculty; problem sets; discussion of the primary literature and of reviews; two presentations by each student on topics in current physiological research.

Advanced Mammalian Physiology: Read More [+]

Rules & Requirements

Prerequisites: Consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.

Advanced Mammalian Physiology: Read Less [-]

MCELLBI 237L Advanced Physical Biology of the Cell 4 Units
Terms offered: Spring 2024, Spring 2022, Spring 2020
Biology is being revolutionized by new experimental techniques that have made it possible to measure the inner workings of molecules, cells and multicellular organisms with unprecedented precision. The objective of this course is to explore this deluge of quantitative data through the use of biological numeracy. We will develop theoretical models that make precise predictions about biological phenomena. These predictions will be tested through the hands-on analysis of experimental data and by performing numerical simulations using Matlab. A laptop is required for this course, but no previous programming experience is required.

Advanced Physical Biology of the Cell: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of laboratory per week

Summer: 8 weeks - 6 hours of lecture and 2 hours of laboratory per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Instructor: Garcia

Advanced Physical Biology of the Cell: Read Less [-]

MCELLBI C237 Stem Cells and Directed Organogenesis 3 Units
Terms offered: Spring 2015, Spring 2014, Spring 2013
This course will provide an overview of basic and applied embryonic stem cell (ESC) biology. Topics will include early embryonic development, ESC laboratory methods, biomaterials for directed differentiation and other stem cell manipulations, and clinical uses of stem cells.

Stem Cells and Directed Organogenesis: Read More [+]

Rules & Requirements

Prerequisites: Consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 6 hours of laboratory and 1 hour of lecture per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Instructor: Conboy

Also listed as: BIO ENG C218
Stem Cells and Directed Organogenesis: Read Less [-]
MCELLBI 238 Stem Cell Research and Gene Therapy: Questions, Solutions and Current Frontiers 1 Unit
Terms offered: Fall 2023, Fall 2022
This lecture series will cover modern approaches to stem cell biology, regenerative medicine and gene therapy. Lectures will include a broad introduction to the day’s topic, followed by in depth discussion of one specific recent example- preferably from the speaker’s own laboratory- that addresses an imminent question in the field. Relevant research articles will be assigned as background reading. Students are expected to become thoroughly familiar with these materials prior to each class meeting.

Stem Cell Research and Gene Therapy: Questions, Solutions and Current Frontiers: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Hockemeyer

Stem Cell Research and Gene Therapy: Questions, Solutions and Current Frontiers: Read Less [-]

MCELLBI 239BB Research Review in Cell and Developmental Biology: Mechanics and Dynamics of Cell Movements 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Research in our laboratory is focused on the mechanics and dynamics of cell movements on the purified protein, single cell, and tissue levels. For these studies, we are developing new instruments to quantify cell and molecular mechanics bases on optical microscopy, force microscopy, and microfabrication.
Research Review in Cell and Developmental Biology: Mechanics and Dynamics of Cell Movements: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Fletcher

Research Review in Cell and Developmental Biology: Mechanics and Dynamics of Cell Movements: Read Less [-]

MCELLBI 239C The Regulation of Meiotic Gene Expression and Cellular Morphogenesis 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
The mechanisms that link cellular differentiation programs and dynamic gene regulation in complex eukaryotic systems remain mysterious. Such programs drive diverse and central biological processes including organismal development, immune function, disease progression, and meiosis. This course is focused on the molecular basis for the cellular remodeling accompanying meiosis, the highly conserved process by which gametes are produced.
The Regulation of Meiotic Gene Expression and Cellular Morphogenesis: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Brar

The Regulation of Meiotic Gene Expression and Cellular Morphogenesis: Read Less [-]
MCELLBI 239D Research Review in Cell and Developmental Biology: Glial Cell Biology 2 Units
Terms offered: Fall 2024, Spring 2024, Spring 2018
Review of relevant literature and discussion of ongoing research: cytoskeletal regulation and mRNA transport in glia; organelle biogenesis and homeostasis, including of Golgi outposts; myelination in learning and behavior; gliovascular development; biophysics of liquid condensates; mechanisms of neurological disease.
Research Review in Cell and Developmental Biology: Glial Cell Biology: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Fu
Research Review in Cell and Developmental Biology: Glial Cell Biology: Read Less [-]

MCELLBI 239EE Research Review in Cell and Developmental Biology: Cell Morphogenesis 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Review of current literature and discussion of original research. Research Review in Cell and Developmental Biology: Cell Morphogenesis: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Bilder
Research Review in Cell and Developmental Biology: Regulation of Cell Polarity in Drosophila: Read Less [-]

MCELLBI 239R Research Review in Cell and Developmental Biology: Telomere Biology of Human Stem Cells 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
The goal of our laboratory is to understand the key functions of telomeres and telomerase in tissue homeostasis, tumorigenesis, and aging. To this end, we generate genetically engineered human pluripotent and adult stem cell models to measure telomere and telomerase function during cellular differentiation and tumor formation.
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Hockemeyer
Research Review in Cell and Developmental Biology: Telomere Biology of Human Stem Cells: Read Less [-]

MCELLBI 239S Research Review in Cell and Developmental Biology: Organ Formation and Function in Zebrafish 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Current research examines the control mechanisms of how cells behave, how cells talk to one another, and how cells sense, change, and maintain their space in the context of organogenesis.
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Swinburne
Research Review in Cell and Developmental Biology: Organ Formation and Function in Zebrafish: Read Less [-]
MCELLBI 239T Research Review in Cell and Developmental Biology: The Cell Biology of Fertilization 2 Units
Terms offered: Fall 2023, Spring 2023, Fall 2022
Research in our lab is focused on the cell biology of mammalian fertilization. Our lab uses biophysical, biochemical, and molecular genetics methods to study sperm ion channels and transporters that regulate sperm motility, chemotaxis, and the acrosome reaction. A better understanding of these processes will eventually lead to the development of effective tools to control and preserve male fertility, improve the reproductive health of human population worldwide, and advance family planning.

Research Review in Cell and Developmental Biology: The Cell Biology of Fertilization: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Drubin

Research Review in Cell and Developmental Biology: The Cytoskeleton and Morphogenesis: Read Less [-]

MCELLBI 239V Research Review in Cell and Developmental Biology: Molecular Mechanisms of Transduction in Touch and Pain Receptors 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Review of current literature and discussion of current research.
Current research focuses on elucidating the molecular mechanisms of somatosensory mechanotransduction.
Research Review in Cell and Developmental Biology: Molecular Mechanisms of Transduction in Touch and Pain Receptors: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Bautista

Research Review in Cell and Developmental Biology: Molecular Mechanisms of Transduction in Touch and Pain Receptors: Read Less [-]

MCELLBI 239W Research Review in Cell and Developmental Biology: Leech Embryology and Development 2 Units
Terms offered: Fall 2023, Spring 2023, Fall 2022
Review of current literature and discussion of original research.
Research Review in Cell and Developmental Biology: Leech Embryology and Development: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Weisblat

Research Review in Cell and Developmental Biology: Leech Embryology and Development: Read Less [-]
MCELLBI 239Z Research Review in Cell and Developmental Biology: Chromosome Remodeling and Reorganization During Meiosis 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
How chromosomes are reorganized during meiosis to accomplish the pairing, recombination, and segregation leading up to successful gamete production.
Research Review in Cell and Developmental Biology: Chromosome Remodeling and Reorganization During Meiosis: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Dernburg

Research Review in Cell and Developmental Biology: Chromosome Remodeling and Reorganization During Meiosis: Read Less [-]

MCELLBI 240 Advanced Genetic Analysis 4 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
Principles and practice of classical and modern genetic analysis as applied to eukaryotic organisms, including yeast, nematodes, mice and humans; isolation and analysis of mutations; gene mapping; suppressor analysis; chromosome structure; control of gene expression; and developmental genetics.
Advanced Genetic Analysis: Read More [+]

Rules & Requirements
Prerequisites: Graduate standing with 110 or 140 or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Instructors: Dernburg, Meyer

Advanced Genetic Analysis: Read Less [-]

MCELLBI C242 CTEG Evolution, Genetics, and Genomics Seminar 1 Unit
Terms offered: Fall 2024, Spring 2024, Fall 2023
This graduate seminar consists of weekly presentations from Berkeley graduate students as well as outside speakers on topics surrounding evolution, genetics, and genomics. Many labs spread across different departments have research programs focused on evolution, genetics, and genomics. However, it can be challenging to keep abreast of this research and to identify potential collaborations due to the dispersion of labs across different departments and specialties. The Center for Theoretical and Evolutionary Genetics (CTEG) is an informal group of labs that collectively work on genetics and genomics. The seminar seeks to provide a common space for graduate students to present their research and learn about the research of their colleagues.
CTEG Evolution, Genetics, and Genomics Seminar: Read More [+]

Rules & Requirements
Prerequisites: Graduate standing
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructors: Sudmant, Moorjani

Also listed as: INTEGBI C242
CTEG Evolution, Genetics, and Genomics Seminar: Read Less [-]

MCELLBI C243 Seq: Methods and Applications 3 Units
Terms offered: Spring 2015, Spring 2014
A graduate seminar class in which a group of students will closely examine recent computational methods in high-throughput sequencing followed by directly examining interesting biological applications thereof. Seq: Methods and Applications: Read More [+]

Rules & Requirements
Prerequisites: Graduate standing in Math, MCB, and Computational Biology; or consent of the instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Instructor: Pachter

Also listed as: MATH C243
Seq: Methods and Applications: Read Less [-]
MCELLBI C244 Discrete Mathematics for the Life Sciences 4 Units
Terms offered: Spring 2013
Introduction to algebraic statistics and probability, optimization, phylogenetic combinatorics, graphs and networks, polyhedral and metric geometry.
Discrete Mathematics for the Life Sciences: Read More [+]
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Also listed as: MATH C239
Discrete Mathematics for the Life Sciences: Read Less [-]

MCELLBI 249A Research in Genetics and Development: From Sequence to Function in Transcription Factors 2 Units
Terms offered: Fall 2024, Spring 2024, Spring 2014
This course explores experimental and computational approaches to studying the sequence to function relationships of intrinsically disordered proteins. Emphasis on the activation domains of transcription factors. High-throughput experiments, machine learning, evolutionary comparisons, and all atom simulations will be discussed. Additional emphasis will be placed on characterizing the functional consequences of patient mutations in activation domains.
Research in Genetics and Development: From Sequence to Function in Transcription Factors: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Dillin
Research Review in Genetics and Development: Aging and Protein Homeostasis: Read Less [-]

MCELLBI 249BB Research Review in Genetics and Development: Aging and Protein Homeostasis 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Central to the aging process is the unfolding of the proteome. Specific areas under study include cellular responses to protein misfolding and coordination of these responses across an organism.
Research Review in Genetics and Development: Aging and Protein Homeostasis: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Rio
Research Review in Genetics and Development: Nucleic Acid-Protein Interactions and Control of Gene Expression 2 Units: Read Less [-]

MCELLBI 249C Research Review in Genetics and Development: Nucleic Acid-Protein Interactions and Control of Gene Expression 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Biochemical and molecular genetic aspects of eukaryotic messenger RNA splicing and transposition, with an emphasis on as an experimental system.
Research Review in Genetics and Development: Nucleic Acid-Protein Interactions and Control of Gene Expression: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Rio
Research Review in Genetics and Development: Nucleic Acid-Protein Interactions and Control of Gene Expression: Read Less [-]
MCELLBI 249D Research Review in Genetics and Development: Mechanisms of Genetic Regulation in Yeast 2 Units
Terms offered: Fall 2023, Spring 2023, Fall 2022
Genes, gene products and molecular mechanisms that control cell types in the unicellular eukaryote.
Research Review in Genetics and Development: Mechanisms of Genetic Regulation in Yeast: Read More [+] Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Rine
Research Review in Genetics and Development: Mechanisms of Genetic Regulation in Yeast: Read Less [-]

MCELLBI 249F Research Review in Genetics and Development: Neuronal Development 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Molecular and genetic approaches to the problem of how neurons develop, with emphasis on and .
Research Review in Genetics and Development: Neuronal Development: Read More [+] Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Garriga
Research Review in Genetics and Development: Neuronal Development: Read Less [-]

MCELLBI 249G Research Review in Genetics and Development: Developmental and Evolutionary Genetics 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
We study how genes control pattern formation during development and pattern modification during evolution.
Research Review in Genetics and Development: Developmental and Evolutionary Genetics: Read More [+] Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Miller
Research Review in Genetics and Development: Developmental and Evolutionary Genetics: Read Less [-]

MCELLBI 249H Investigating Cellular Aging and Chromosome Segregation during Gametogenesis 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
This course focuses on understanding 1) how cellular aging is affected during gametogenesis, the developmental program that produces gametes for sexual reproduction and 2) how chromosome segregation is regulated during meiosis, the specialized cell division that generates gametes.
Investigating Cellular Aging and Chromosome Segregation during Gametogenesis: Read More [+] Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Unal
Investigating Cellular Aging and Chromosome Segregation during Gametogenesis: Read Less [-]
MCELLBI 249HH Research Review in Genetics and Development: Human Population Genetics and Evolutionary Biology 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Research focuses on use of statistical and computational approaches to study questions in human genetics and evolutionary biology. This includes, but is not limited to, studying (1) how different evolutionary processes such as mutation rate evolve across primates, (2) when key events (such as introgression and adaptations) occurred in human history, and (3) how we can leverage large-scale datasets to identify genetic variants related to human adaptation and disease.

MCELLBI 249I Research Review in Genetics and Development: RNA Systems Biology 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
How does the sequence of an RNA determine its post-transcriptional regulation? Genomic and systems biology investigations of alternative splicing, translation, and other post-transcriptional regulatory processes.

MCELLBI 249J Research Review in Genetics and Development: Developmental and Molecular Genetics of C. elegans 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Molecular and genetical analysis of sex determination and dosage compensation in the nematode.
MCELLBI 249K Research Review in Genetics and Development: Animal Origins 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Evaluation of current research on choanoflagellates, sponges, and animal origins. Intended to complement ongoing research for graduate students. Research Review in Genetics and Development: Animal Origins: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: King
Research Review in Genetics and Development: Animal Origins: Read Less [-]

MCELLBI 249M Research Review in Genetics and Development: Saccharomyces Cerevisiae Microtubule Cytoskeleton 2 Units
Terms offered: Fall 2023, Spring 2023, Fall 2022
Review of current literature and discussion of current research. Research Review in Genetics and Development: Saccharomyces Cerevisiae Microtubule Cytoskeleton: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Barnes
Research Review in Genetics and Development: Saccharomyces Cerevisiae Microtubule Cytoskeleton: Read Less [-]

MCELLBI 249MM Physical Biology of Living Organisms 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Research review in genetics, genomics and development. In development a single cell goes through a series of repeated divisions and these cells read the program encoded in their DNA in order to become familiar cell types such as those found in muscle, liver, or our brains. The goal of our lab is to uncover the rules behind these decisions with the objective of predicting and manipulating developmental programs from just looking at DNA sequence. In order to reach this predictive understanding we combine physics, synthetic biology, and new technologies to query and control developmental decisions in real time at the single cell level in the fruit fly embryo.
Physical Biology of Living Organisms: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Garcia
Physical Biology of Living Organisms: Read Less [-]
MCELLBI 249O Research Review in Genetics and Development: Genome Sequences 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023
Biochemistry, cancer biology and virology, cell biology, computational biology, genetics, microbiology, molecular and cell physiology.
Research Review in Genetics and Development: Genome Sequences: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Eisen

Research Review in Genetics and Development: Genome Sequences: Read Less [-]

MCELLBI 249P Research Review in Genetics and Development: Evolution of Genome Structure and Cellular Diversity 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023
Review of current literature and discussion of original research in the evolution of genome structure, aging, and cellular and organismal diversity.
Research Review in Genetics and Development: Evolution of Genome Structure and Cellular Diversity: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Sudmant

Research Review in Genetics and Development: Evolution of Genome Structure and Cellular Diversity: Read Less [-]

MCELLBI 249Q Research Review in Genetics and Development: Computational Genomics 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023
Recent developments in computational methods for genomics and their application for understanding the structure and function of genes encoded in completely sequenced genomes.
Research Review in Genetics and Development: Computational Genomics: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Brenner

Research Review in Genetics and Development: Computational Genomics: Read Less [-]

MCELLBI 249R Research Review in Genetics and Development: Vertebrate development and tissue regeneration 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023
Topics on gene regulatory network control of neural crest cell differentiation during development, vertebrate evolution, and tissue regeneration will be discussed.
Research Review in Genetics and Development: Vertebrate development and tissue regeneration: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Martik

Research Review in Genetics and Development: Vertebrate development and tissue regeneration: Read Less [-]
MCELLBI 249T Research Review in Genetics, Genomics and Development: Evolution of Genomes 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Comparative analysis of eukaryotic genomes to inform the origins and diversification of animals and plants.
Research Review in Genetics, Genomics and Development: Evolution of Genomes: Read More [+]  
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Rokhsar

Research Review in Genetics, Genomics and Development: Evolution of Genomes: Read Less [-]

MCELLBI 249V Research Review in Genetics and Development: Induction in Vertebrate Development and ES Cell Differentiation 2 Units
Terms offered: Fall 2023, Spring 2023, Fall 2022
The Roelink laboratory is interested in the mechanisms of embryonic induction, the phenomenon in which a group of cells changes the developmental fate of neighboring cells via the release of inducers.
Research Review in Genetics and Development: Induction in Vertebrate Development and ES Cell Differentiation: Read More [+]  
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Roelink

Research Review in Genetics and Development: Induction in Vertebrate Development and ES Cell Differentiation: Read Less [-]  

MCELLBI 249W Research Review in Genetics and Development: Archaeal Genetics and Methane Metabolism 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Discussions pertaining to the development of new genetic tools for archaeal model organisms with a particular emphasis on methane metabolizing archaea in order to characterize their physiology, evolution and metabolism.
Research Review in Genetics and Development: Archaeal Genetics and Methane Metabolism: Read More [+]  
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Nayak

Research Review in Genetics and Development: Archaeal Genetics and Methane Metabolism: Read Less [-]
MCELLBI 249Y Research Review in Genetics and Development: Mechanisms of Gene Control in Vertebrate Animals 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
This course will focus on mechanisms of gene control in vertebrate animals, particularly in the area of vertebrate development. Amphibian egg formation, mesoderm induction, neural induction, and patterning of the nervous system at the molecular level. Control of transcription, post-transcriptional control of gene expression (including control of RNA turnover and RNA localization).
Research Review in Genetics and Development: Mechanisms of Gene Control in Vertebrate Animals: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Harland
Formerly known as: 218Y
Research Review in Genetics and Development: Mechanisms of Gene Control in Vertebrate Animals: Read Less [-]

MCELLBI 249Z Research Review in Genetics and Development: Chromosome Structure and Integrity, Genome Evolution 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Use of genetic, cell biological, and biochemical approaches in budding yeast to understand genome integrity, genome evolution, and most recently desiccation tolerance.
Research Review in Genetics and Development: Chromosome Structure and Integrity, Genome Evolution: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Koshland
Research Review in Genetics and Development: Chromosome Structure and Integrity, Genome Evolution: Read Less [-]

MCELLBI 250 Advanced Immunology 4 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
Molecular and cellular analysis of the immune response emphasizing concepts and methodology. Innate immunity, pathogen sensors, antibodies and T cell receptors, lymphocyte activation, tolerance and selection. Antigen processing, T cell subtypes, and T regulatory cells. NK cells, tumor surveillance, and AIDS.
Advanced Immunology: Read More [+]
Rules & Requirements
Prerequisites: 100, 110, 140, 150 or consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Advanced Immunology: Read Less [-]
MCELLBI 251 The Regulation of Immune System Development and Function 1 Unit
Terms offered: Spring 2022, Spring 2021, Fall 2020
This is an advanced seminar course which will consider current research questions and experimental approaches in molecular and cellular immunology. Each registrant will present a 30-minute research talk describing the problems they are studying, the approach they are taking, their preliminary data, and technical problems. Other course participants (including basic immunology faculty) will provide criticism and suggestions.

The Regulation of Immune System Development and Function: Read More [+]

Rules & Requirements

Prerequisites: 250 or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Winoto
The Regulation of Immune System Development and Function: Read Less [-]

MCELLBI 259A Mycobacterium Tuberculosis (Mtb) 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
The TB field has entered a new era with the convergence of genetic tools, genome sequencing, bioinformatics, advanced imaging techniques, animal models of infection, and high-throughput assays that allow us to study this multi-faceted interaction between Mtb and its host. We use all of these tools to probe the molecular and cellular events that enable M. tuberculosis to evade host defense mechanisms.
Mycobacterium Tuberculosis (Mtb): Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Cox
Mycobacterium Tuberculosis (Mtb): Read Less [-]

MCELLBI 259C Research Review in Immunology and Pathogenesis: Nuclear Receptor-Mediated Regulation of Neuroinflammation 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
In this course we will discuss our research as well as recent literatures focusing on understanding of 1) How is homeostasis in the CNS regulated by innate immune functions of microglia? 2) How can we intervene in dysfunction of microglia-mediated immune functions using NRs signaling and transcription?
Research Review in Immunology and Pathogenesis: Nuclear Receptor-Mediated Regulation of Neuroinflammation: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Saijo
Research Review in Immunology and Pathogenesis: Nuclear Receptor-Mediated Regulation of Neuroinflammation: Read Less [-]
MCELLBI 259D Research Review in Immunology and Pathogenesis: Mycobacterial Biology and Host-Pathogen Interactions 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
We will discuss macrophage biology and innate immunity in the context of infection with "Mycobacterium tuberculosis" through discussion of current research from the Stanley Lab and both cutting edge and classic literature in relevant fields.
Research Review in Immunology and Pathogenesis: Mycobacterial Biology and Host-Pathogen Interactions: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Stanley
Research Review in Immunology and Pathogenesis: Mycobacterial Biology and Host-Pathogen Interactions: Read Less [-]

MCELLBI 259E Research Review in Immunology and Pathogenesis: Regulation of T Cell Receptor Genes Expression 2 Units
Terms offered: Spring 2024, Fall 2023, Spring 2023
Molecular biology of T cell receptor genes and their transcription controlling proteins/genes. Programmed cell death during thymocyte differentiation.
Research Review in Immunology and Pathogenesis: Regulation of T Cell Receptor Genes Expression: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Winoto
Research Review in Immunology and Pathogenesis: Regulation of T Cell Receptor Genes Expression: Read Less [-]

MCELLBI 259F Research Review in Immunology and Pathogenesis: Natural Killer (NK) Cell and T Cell Receptors 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Molecular and biological basis for recognition by natural killer cells and T cells.
Research Review in Immunology and Pathogenesis: Natural Killer (NK) Cell and T Cell Receptors: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Raulet
Research Review in Immunology and Pathogenesis: Natural Killer (NK) Cell and T Cell Receptors: Read Less [-]

MCELLBI 259G Research Review in Immunology and Pathogenesis: T Cell Development 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Molecular and cellular aspects of thymocyte differentiation.
Research Review in Immunology and Pathogenesis: T Cell Development: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Robey
Research Review in Immunology and Pathogenesis: T Cell Development: Read Less [-]
MCELLBI 259H Research Review in Immunology and Pathogenesis: B Cell Differentiation 2 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
Molecular basis of terminal B cell differentiation. Role of transcription factors in B cell activation.
Research Review in Immunology and Pathogenesis: B Cell Differentiation: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Sha

Research Review in Immunology and Pathogenesis: B Cell Differentiation: Read Less [-]

MCELLBI 259J Research Review in Immunology and Pathogenesis: Immune Evasion by Viruses 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
The mechanisms used by viruses to counteract the pressure of the immune system.
Research Review in Immunology and Pathogenesis: Immune Evasion by Viruses: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Coscoy

Research Review in Immunology and Pathogenesis: Immune Evasion by Viruses: Read Less [-]

MCELLBI 259K Research Review in Immunology and Pathogenesis: Epigenetic Control for Regulatory T Cell Function in Cancer and Autoimmunity 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Intersecting the fields of cancer biology, immunology, and epigenetics to strengthen our own immune defense mechanisms against our own cancers by reprogramming T cell function specifically within the tumor microenvironment.
Research Review in Immunology and Pathogenesis: Epigenetic Control for Regulatory T Cell Function in Cancer and Autoimmunity: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Dupage

Research Review in Immunology and Pathogenesis: Epigenetic Control for Regulatory T Cell Function in Cancer and Autoimmunity: Read Less [-]

MCELLBI 259M Research Review in Immunology and Pathogenesis: Innate Immunity and Innate Control of Adaptive Immunity 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Innate immunity and innate control of adaptive immunity.
Research Review in Immunology and Pathogenesis: Innate Immunity and Innate Control of Adaptive Immunity: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Barton

Research Review in Immunology and Pathogenesis: Innate Immunity and Innate Control of Adaptive Immunity: Read Less [-]
MCELLBI 259N Research Review in Immunology and Pathogenesis: Immunology, Microbiology, and Genetics of Bacterial Pathogenesis 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Role of innate host responses in defense against intracellular bacterial pathogens.
Research Review in Immunology and Pathogenesis: Immunology, Microbiology, and Genetics of Bacterial Pathogenesis: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Vance

Research Review in Immunology and Pathogenesis: Immunology, Microbiology, and Genetics of Bacterial Pathogenesis: Read Less [-]

MCELLBI 259O Research Review in Immunology and Pathogenesis: Circadian rhythms in Parasitic Diseases 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
We will discuss circadian rhythms research, at the behavioral, tissue and molecular scales. Our main focus is the circadian regulation of gene expression and its impact in host physiology. We will also focus on malaria and sleeping sickness infections, understanding the clinical aspects, the immune response to parasites and the vector transmission.
Research Review in Immunology and Pathogenesis: Circadian rhythms in Parasitic Diseases: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Rijo-Ferreira

Research Review in Immunology and Pathogenesis: Circadian rhythms in Parasitic Diseases: Read Less [-]

MCELLBI 259P Research Review in Immunology and Pathogenesis: Cellular barriers to retroviral infection 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Cellular biology and genetics of retroviral infection and cellular antiviral mechanisms. Functional genomics approaches in key host/virus interactions.
Research Review in Immunology and Pathogenesis: Cellular barriers to retroviral infection: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: OhAinle

Research Review in Immunology and Pathogenesis: Cellular barriers to retroviral infection: Read Less [-]

MCELLBI C261 Cellular and Developmental Neurobiology 3 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
This course covers the molecular/cellular basis of neuron excitability (membrane potentials, action potential generation and propagation, ion channels), synaptic transmission and plasticity, sensory receptor function, and developmental neurobiology.
Cellular and Developmental Neurobiology: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Also listed as: NEUROSC C261
Cellular and Developmental Neurobiology: Read Less [-]
Life Science, Business, and Entrepreneurship

MCELLBI 269C Research Review in Neurobiology: Molecular Mechanisms of Neuronal Plasticity 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Research in our laboratory focuses on understanding how neurons use biochemical pathways to integrate diverse types of information in order to adjust synaptic strength and modulate neuronal excitability, and how these interactions go awry in disease. To investigate this we are taking a multi-disciplinary approach incorporating molecular, biochemical, imaging, and electrophysiological analyses in mouse and human cells. Research Review in Neurobiology: Molecular Mechanisms of Neuronal Plasticity: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Bateup
Research Review in Neurobiology: Molecular Mechanisms of Neuronal Plasticity: Read Less [-]

MCELLBI 269D Research Review in Neurobiology: Signaling Within and Between Neurons 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Review of recent research in molecular mechanisms involved in intracellular and extracellular signaling in the nervous system. Research Review in Neurobiology: Signaling Within and Between Neurons: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Kramer
Research Review in Neurobiology: Signaling Within and Between Neurons: Read Less [-]

MCELLBI 269E Molecular and Biophysical Neuroscience 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Review of research in molecular and biophysical aspects of sensory transduction and electrical signaling in the nervous system. Molecular and Biophysical Neuroscience: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of the instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Brohawn
Molecular and Biophysical Neuroscience: Read Less [-]

MCELLBI 269F Optogenetic Dissection of Neural Circuits 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Research review in neurobiology. Review of recent optogenetic strategies for dissecting neural connectivity, function, and dysfunction in the rodent and primate brain. Optogenetic Dissection of Neural Circuits: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Lammel
Optogenetic Dissection of Neural Circuits: Read Less [-]
MCELLBI 269G Research Review in Development and Application of Advanced Methods for In Vivo Imaging 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Development and application of optical imaging methods for clearer, deeper, and faster imaging of biological tissue in vivo, including a critical review of the current research.
Research Review in Development and Application of Advanced Methods for In Vivo Imaging: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Ji
Research Review in Development and Application of Advanced Methods for In Vivo Imaging: Read Less [-]

MCELLBI 269I Research Review in Neurobiology: Stem Cells and Gene Therapy in the Nervous System 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
The basic investigation of neural differentiation of stem cells, as well as the use of stem cells and gene delivery for neuroregeneration.
Research Review in Neurobiology: Stem Cells and Gene Therapy in the Nervous System: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Schaffer
Research Review in Neurobiology: Stem Cells and Gene Therapy in the Nervous System: Read Less [-]

MCELLBI 269J Research Review in Neurobiology: Taste Recognition in Drosophila 2 Units
Terms offered: Fall 2023, Spring 2023, Fall 2022
The molecular and cellular basis of taste perception in the model organism.
Research Review in Neurobiology: Taste Recognition in Drosophila: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Scott
Research Review in Neurobiology: Taste Recognition in Drosophila: Read Less [-]

MCELLBI 269K Research Review in Neurobiology: Instructive Cues for Neural Form and Function 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Molecular and circuit studies of the mechanisms that specify synaptic properties and how these properties bias the timescales of neuronal computation.
Research Review in Neurobiology: Instructive Cues for Neural Form and Function: Read More [+]
Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Gomez
Research Review in Neurobiology: Instructive Cues for Neural Form and Function: Read Less [-]
MCELLBI 269M Research Review in Neurobiology: Insect Neurophysiology 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Drosophila mutants that have behavioral abnormalities to unravel new and basic features of nervous system structure and function.
Research Review in Neurobiology: Insect Neurophysiology: Read More

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Tanouye

Research Review in Neurobiology: Insect Neurophysiology: Read Less

MCELLBI 269N Research Review in Neurobiology: Synaptic and Circuit Mechanisms that Support Spatial Navigation 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Research in the Fisher laboratory focuses on spatial navigation in fruit flies in order to understand how nervous systems flexibly process information. Our research combines in vivo electrophysiology, 2-photon imaging, advanced genetic approaches and quantitative behavioral analysis to understand how the fly's brain constructs and maintains a sense of direction under ever-changing conditions.
Research Review in Neurobiology: Synaptic and Circuit Mechanisms that Support Spatial Navigation: Read More

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Adesnik

MCELLBI 269O Research Review in Neurobiology: Neural Circuits for Sensory Processing and Behavior 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Microcircuitry of the cerebral cortex that underlies sensory processing and adaptive behavior.
Research Review in Neurobiology: Neural Circuits for Sensory Processing and Behavior: Read More

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Tsao

Research Review in Neurobiology: Visual Neuroscience: Read Less

MCELLBI 269P Research Review in Neurobiology: Visual Neuroscience 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Mechanisms for visual object representation including recognition, memory, segmentation, tracking, 3D representation, and embedding into meaningful scenes. Understanding the function of feedforward and feedback pathways in vision.
Research Review in Neurobiology: Visual Neuroscience: Read More

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Fisher

Research Review in Neurobiology: Visual Neuroscience: Read Less
MCELLBI 269Q Research Review in Neurobiology: Sensory Processing and Plasticity in Cerebral Cortex 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
How the cerebral cortex processes sensory input and stores information about the sensory world. We focus on the rat’s primary somatosensory (S1) cortex.

Research Review in Neurobiology: Sensory Processing and Plasticity in Cerebral Cortex: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

MCELLBI 269W Research Review in Neurobiology: Neural Activity Affecting the Assembly of Neural Circuits 2 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
How neural activity affects the assembly of neural circuits.
Research Review in Neurobiology: Neural Activity Affecting the Assembly of Neural Circuits: Read More [+]

Rules & Requirements
Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Feller

Research Review in Neurobiology: Neural Activity Affecting the Assembly of Neural Circuits: Read Less [-]
MCELLBI 275 Therapeutics Development in Biotech: Financing, Regulation and Social Ethics 2 Units

Terms offered: Fall 2024
This course offers an introduction to the field of biotechnology and will cover the history of the field, its impact on medicine and society, key methodologies, important therapeutic areas, and the range of career options available in the biopharmaceutical industry. Students will hear from lecturers with expertise ranging from molecular biology to clinical trial design and interpretation and be given an integrated overview of a complex area. Students will actively participate in experiential learning about relevant topics and presenting their findings in class, which will deepen understanding. There will be interactive elements, using a Socratic discussion format. Students are expected to participate actively. Therapeutics Development in Biotech: Financing, Regulation and Social Ethics: Read More [+]

Rules & Requirements

Prerequisites: Students must be enrolled in the Master of Biotechnology program

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Letter grade.

Instructor: Schaletzky

Therapeutics Development in Biotech: Financing, Regulation and Social Ethics: Read Less [-]

MCELLBI 276 Sample Management, Drug Discovery and Lab Automation 2 Units

Terms offered: Not yet offered
Automation plays an increasing role in academic and biotech labs. High-Throughput Screening (HTS) leverages screening of large libraries for activity against biological targets for drug discovery, enabled by automation, miniaturized assays and large-scale data analysis. Students learn process automation and hands-on training on sample management and liquid handling robotics. Students conduct a primary screen and follow up hits through dose response, using LIMS/Sample Management/Sample Tracking/Equipment Validation/QC and data analysis and interpretation. Students will understand what is required to run a HTS experiment, use robotics, data processing and control software, and learn how automation can help with accuracy and precision.

Sample Management, Drug Discovery and Lab Automation: Read More [+]

Rules & Requirements

Prerequisites: This course will be limited to students enrolled in the MCB Master of Biotechnology program

Hours & Format

Fall and/or spring: 3 weeks - 10 hours of lecture and 20 hours of laboratory per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Letter grade.

Sample Management, Drug Discovery and Lab Automation: Read Less [-]

MCELLBI C277 Communicating Quantitative Information 2 Units

Terms offered: Fall 2021, Spring 2020, Spring 2019
This course will cover several aspects of communicating quantitative information, with a primary focus on visualizations for publications, presentations, and posters. Other topics include sharing of data and analyses, such as new publication models and interactive notebooks, as well as lifecycle data management and publication. Primary discussion will be on conceptual issues, and students will be expected to use various systems and resources as self-directed homestudy.

Communicating Quantitative Information: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 1.5 hours of seminar and 1.5 hours of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Letter grade.

Instructor: Brenner

Also listed as: PLANTBI C277

Communicating Quantitative Information: Read Less [-]
MCELLBI 280A Selected Topics in Molecular and Cell Biology 1 Unit
Terms offered: Spring 2022, Spring 2012, Spring 2011
The course will focus on fundamental principles, essential concepts, and recent advances in select topics in molecular and cell biology. Topics include genomics and computational biology, molecular evolution, neurons and synapses, microbiology and immunology, macromolecular structure and function, and scientific writing. Courses are taught in tandem and may be taken individually.
Selected Topics in Molecular and Cell Biology: Read More [+]
Rules & Requirements
Prerequisites: Graduate standing or consent of instructor
Repeat rules: Course may be repeated for credit when topic changes.

Hours & Format
Fall and/or spring: 5 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.

Selected Topics in Molecular and Cell Biology: Read Less [-]

MCELLBI 280B Selected Topics in Molecular and Cell Biology 1 Unit
Terms offered: Spring 2012, Spring 2011, Spring 2010
The course will focus on fundamental principles, essential concepts, and recent advances in select topics in molecular and cell biology. Topics include genomics and computational biology, molecular evolution, neurons and synapses, microbiology and immunology, macromolecular structure and function, and scientific writing. Courses are taught in tandem and may be taken individually.

MCELLBI 288 Data Science for Molecular and Cell Biology 3 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
Data science is rapidly becoming a critical skill for molecular and cell biologists. This course provides a survey of data science concepts and methods, including practical statistical inference and modeling, data visualization and exploration, elementary machine learning, and simulation. The course is practically oriented. Diverse real-world datasets, along with simulated data, will be used to develop skills and intuition.
Data Science for Molecular and Cell Biology: Read More [+]

Rules & Requirements
Prerequisites: Graduate standing in the biological sciences or permission from instructors. Prior introductory exposure to programming is desired. e.g., through Data Science 8, MCB Python “boot camp,” or self taught from introductory programming tutorials. Please see http://python.berkeley.edu/resources/ for suggested resources. No prior statistics is assumed. The course is not suitable for students with advanced training in statistics or machine learning
Repeat rules: Course may be repeated for credit with instructor consent.

Hours & Format
Fall and/or spring: 15 weeks - 4 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructors: Rokhsar, Eisen
Data Science for Molecular and Cell Biology: Read Less [-]
MCELLBI 289 Master of Biotechnology Capstone Course 5 Units
Terms offered: Not yet offered
This capstone course fosters collaborative learning by bringing together students each week to discuss their internship project that they have been working on individually or in small groups under the supervision of their internship mentor. Students are encouraged to apply critical thinking skills to evaluate other projects and to provide constructive feedback. Students will work towards a final written report and oral presentation. They will identify and present a technology overview, explanation of unmet need, a central working hypothesis, a plan to test said hypothesis, execution of their plan, and a final research product. The final presentation will be in a poster presentation format.
Master of Biotechnology Capstone Course: Read More [+]

Rules & Requirements

Prerequisites: MCELLBI 201A and MCELLBI 201B. Students must be enrolled in the Master of Biotechnology program

Hours & Format
Fall and/or spring: 15 weeks - 5 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Instructor: Luo

MCELLBI 290 Graduate Seminar 1 Unit
Terms offered: Fall 2024, Spring 2024, Fall 2023
Graduate student presentations on selected research topics in molecular and cell biology. Several sections covering different topics offered each semester. Concurrent enrollment in more than one section is permitted. List of topics to be announced before each semester.
Graduate Seminar: Read More [+]

Rules & Requirements

Prerequisites: Graduate standing in the department or consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1-2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade.
Graduate Seminar: Read Less [-]

MCELLBI 291A Introduction to Research 2 - 12 Units
Terms offered: Fall 2024, Fall 2023, Fall 2022
Closely supervised experimental work under the direction of an individual faculty member; an introduction to experimental methods and research approaches in particular areas of molecular and cell biology.
Introduction to Research: Read More [+]

Rules & Requirements

Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2-12 hours of independent study per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.
Introduction to Research: Read Less [-]

MCELLBI 291B Introduction to Research 2 - 12 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
Closely supervised experimental work under the direction of an individual faculty member; an introduction to experimental methods and research approaches in particular areas of molecular and cell biology.
Introduction to Research: Read More [+]

Rules & Requirements

Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2-12 hours of independent study per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Letter grade. This is part two of a year long series course. Upon completion, the final grade will be applied to both parts of the series.
Introduction to Research: Read Less [-]
MCELLBI 292 Research 3 - 12 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Individual research under the supervision of a faculty member.

Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Research Seminar: Read Less [-]

MCELLBI 293C Responsible Conduct in Research 1 Unit
Terms offered: Spring 2024, Fall 2023, Spring 2023
The purpose of this course is to ensure that research trainees receive ample training in Responsible Conduct in Research. Students also gain an understanding of federal, state, and UC Berkeley policies and resources available to further support their research endeavors.
Responsible Conduct in Research: Read More [+]
Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 1.5 hours of lecture and 1.5 hours of discussion per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Sharma
Responsible Conduct in Research: Read Less [-]

MCELLBI 293D Rigor and Reproducibility in Research 1 Unit
Terms offered: Prior to 2007
The purpose of this course is to ensure that research trainees receive training in Rigor and Reproducibility in Research. Students also gain an understanding of federal, state, and UC Berkeley policies and resources available to further support their research endeavors.
Rigor and Reproducibility in Research: Read More [+]
Rules & Requirements
Prerequisites: Consent of Instructor
Repeat rules: Course may be repeated for credit without restriction.
Hours & Format
Fall and/or spring: 15 weeks - 1.5 hours of lecture per week
Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Sharma
Rigor and Reproducibility in Research: Read Less [-]
MCELLBI 293R Responsible Conduct of Research Refresher 1 Unit
Terms offered: Prior to 2007
This refresher course will cover topics in responsible conduct in research drawing from case studies of the Association of American Medical Colleges and the NIH. Students will review case studies in preparation for class discussion. Required of all 4th year MCB graduate students funded on NIH training grants.

Objectives & Outcomes
Course Objectives: Collaborative research including collaborations with industry
Data acquisition and laboratory tools; management, sharing and ownership
Mentor/mentee responsibilities and relationships
Policies regarding human subjects, live vertebrate animal subjects in research, and safe laboratory practices
Research misconduct and policies for handling misconduct
Responsible authorship and publication
The scientist as a responsible member of society, contemporary ethical issues in biomedical research, and the environmental and societal impacts of scientific research

Rules & Requirements
Prerequisites: Consent of instructor. Must be a 4th year MCB graduate student

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructor: Sharma

MCELLBI 293S Foundations of Biostatistical Practice 1 Unit
Terms offered: Fall 2018, Spring 2018
This course is designed to introduce students to the foundations of statistics in the context of biological research. Rather than focusing on a catalog of specific methods (by essence non-exhaustive and rapidly outdated), the course emphasizes general concepts and approaches necessary for sound statistical practice. Topics covered include: exploratory data analysis (EDA); data visualization; inferential reasoning; models and assumptions; statistical computing; computationally reproducible research. The statistical methods and software are motivated by and illustrated on data structures that arise in current biological and medical research.

Rules & Requirements
Prerequisites: Consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.

MCELLBI 294 Current Topics in Biomedical Sciences 1 Unit
Terms offered: Fall 2022, Fall 2021, Spring 2021
This course will discuss cutting-edge topics in biochemistry, structural biology, cell biology, developmental biology and genetics. Lectures will be given by internationally recognized biomedical scientists that visit the Molecular and Cell Biology Department and present work currently performed in their laboratories. The class will include topics ranging from structural analysis of important signaling molecules, live cell imaging and high resolution microscopy of critical cellular structures, to genetic dissection of essential signaling networks in cells and developmental pathways in multicellular organisms. It is the goal of this class to expose students to both the breadth and highest standards of current biomedical research.

Rules & Requirements
Prerequisites: Molecular and Cell Biology graduate students only
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
MCELLBI 295 Careers for Life Sciences Ph.D's 1 Unit
Terms offered: Spring 2024, Spring 2023, Spring 2022
This course is designed to assist graduate students in the biological sciences with planning their postgraduate careers. Weekly guest speakers will present their experiences on a variety of topics. Postdoctoral students are invited. Topics may include academia; job searches; setting up a laboratory; patent law/technology transfer; public policy/regulatory affairs; bioinformatics; science writing/technical support; forensic science; postdoctoral positions in industry; teaching, and other topics of interest.
Careers for Life Sciences Ph.D's: Read More [+]

Rules & Requirements
Prerequisites: Open to graduate and postdoctoral students

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate
Grading: Offered for satisfactory/unsatisfactory grade only.
Careers for Life Sciences Ph.D's: Read Less [-]

MCELLBI 296 Molecular and Cell Biology Colloquium 0.0 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Meetings for the presentation of original work by faculty, visiting lecturers, and graduate students.
Molecular and Cell Biology Colloquium: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 1.5 hours of colloquium per week

Additional Details

MCELLBI 375 Pedagogy for MCB Graduate Student Instructors 2 Units
Terms offered: Prior to 2007
This course introduces new graduate student instructors to effective teaching methods that they can use in their MCB courses. Through readings, discussions and demonstrations, students will learn how to engage and motivate students, facilitate active participation, plan a class period, and write exam or practice problems. Emphasis will be placed on science education literature and proven practical techniques. We will also provide support and solutions for dealing with difficult situations that may come up during the semester.
Pedagogy for MCB Graduate Student Instructors: Read More [+]

Rules & Requirements
Prerequisites: Appointment as graduate student instructor or consent of instructor

Hours & Format
Fall and/or spring: 10 weeks - 1 hour of seminar per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Professional course for teachers or prospective teachers
Grading: Offered for satisfactory/unsatisfactory grade only.
Instructors: Ball, Beatty, Barnes

MCELLBI 602 Individual Study for Doctoral Students 1 - 8 Units
Terms offered: Spring 2006, Spring 2005, Fall 2004
Individual study in consultation with the major field adviser. Intended to provide an opportunity for qualified students to prepare themselves for the various examinations required of candidates for the Ph.D.

Rules & Requirements
Prerequisites: Restricted to Ph.D. candidates
Credit Restrictions: Course does not satisfy unit or residence requirements for doctoral degree.
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Summer:
6 weeks - 1-8 hours of independent study per week
8 weeks - 1-8 hours of independent study per week

Additional Details
Subject/Course Level: Molecular and Cell Biology/Graduate examination preparation
Grading: Offered for satisfactory/unsatisfactory grade only.

UGBA C5 Introduction to Entrepreneurship 2 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
This course offers students a taste of what it's really like to start a business. In addition to learning key foundational entrepreneurial concepts such as idea generation & evaluation, customer & product development, creating a business model, fundraising, marketing, and scaling & exiting a business, students will also hear from successful entrepreneurs who share their perspectives and best practices. Students will apply core concepts by working in teams to evaluate and select a venture idea that they will then develop throughout the semester.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Undergrad. Business Administration/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Also listed as: L & S C5

UGBA 10X Foundations of Business 3 Units
Terms offered: Fall 2024
This team-taught introductory course to the four-year Spieker Undergraduate Business Program is grounded in the Haas Defining Leadership Principles. Covering business fundamentals, teamwork, and critical thinking, the course explores contemporary business topics along with their historical and conceptual foundations, and their social and psychological implications. The course includes two weekly lectures and one small section meeting, featuring hands-on individual and group exercises for practical application of the concepts. Regular guest speakers connect students to real-world business problems.

Rules & Requirements
Credit Restrictions: A deficient grade in UGBA 10X may be removed by taking UGBA 10.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of laboratory per week

Additional Details
Subject/Course Level: Undergrad. Business Administration/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
UGBA C12 The Berkeley Changemaker 2 - 3 Units
Terms offered: Fall 2024, Summer 2024 Second 6 Week Session, Spring 2024, Fall 2023
Berkeley Changemaker impact occurs across many fronts: scientific, artistic, social, and entrepreneurial. This course helps students identify as a Berkeley Changemaker and learn the critical thinking, communication, and collaboration skills to become one. Combining disciplines across UC Berkeley, the course also helps launch the Berkeley Discovery arc. Students develop their own leadership styles and discover how they can create and lead diverse teams to act upon the world. Values in Berkeley’s DNA like Questioning the Status Quo and going Beyond Yourself support students in leading from whatever position they occupy, preparing them to leave their mark on campus, in their communities, or beyond. More at: http://changemaker.berkeley.edu.

The Berkeley Changemaker: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2-2 hours of lecture and 0-1.5 hours of discussion per week
Summer:
6 weeks - 6-6 hours of lecture and 0-0 hours of discussion per week
8 weeks - 4-4 hours of lecture and 0-3 hours of discussion per week

Additional Details

UGBA 88 Data and Decisions 2 Units
Terms offered: Fall 2024, Summer 2024 8 Week Session, Spring 2024
The goal of this connector course is to provide an understanding of how
data and statistical analysis can improve managerial decision-making.
We will explore statistical methods for gleaning insights from economic
and social data, with an emphasis on approaches to identifying causal
relationships. We will discuss how to design and analyze randomized
experiments and introduce econometric methods for estimating causal
effects in non-experimental data. The course draws on a variety
of business and social science applications, including advertising,
management, online marketplaces, labor markets, and education. This
course, in combination with the Data 8 Foundations course, satisfies the
statistics prerequisite for admission to Haas.
Data and Decisions: Read More [+]

Rules & Requirements

Prerequisites: One semester of Calculus (Math 16A or Math 1A).
Also, this is a Data Science connector course and may only be taken concurrently with or after completing Computer Science C8/Statistics C8/
Information C8

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture per week
Summer: 8 weeks - 4 hours of lecture per week

UGBA C95B Introduction to the
Biotechnology Field and Industry 2 Units
Terms offered: Spring 2019
This course offers an introduction to the field of biotechnology and will
cover the history of the field, its impact on medicine and society, key
methodologies, important therapeutic areas, and the range of career
equipment available in the biopharmaceutical industry. In addition to lectures
on innovation and entrepreneurship, students will hear from lecturers
with expertise ranging from molecular biology to clinical trial design and
interpretation. Several case studies of historically impactful scientists,
enrepreneurs, and biotherapeutic companies will be presented. Students
will work in teams to create and develop novel biotechnology company
ideas to present in class. Intended for students interested in the Biology
+Business program.

UGBA 123 Operating and Financial Reporting Issues in the Financial Services Industry 3 Units
Terms offered: Fall 2024, Fall 2023, Fall 2022
This course examines how accounting in the financial services industry – banking, insurance, investment industry, and real estate – actually operates. Students learn about underwriting and pricing in each sector, investment processes and controls, incentive-based profit sharing, risk management, and the factors that contribute to profitability. Students learn what financial statements reveal about estimates companies make regarding liabilities and, more generally, what they reveal about how companies deal with uncertainty associated with predicting and measuring financial results. Students examine the controversy over employing Fair Value Accounting across sectors and learn about other sector-specific accounting requirements.
Operating and Financial Reporting Issues in the Financial Services Industry: Read More [+]
Rules & Requirements
Prerequisites: Students are encouraged to complete UGBA 102A or to possess a basic understanding about how financial statements are prepared

UGBA 125 Ethics in Accounting 3 Units
Terms offered: Fall 2024, Fall 2023, Fall 2022
This course focuses on ethics related to the accounting for and reporting of financial statements and related financial information, and touches on the ethics of tax preparers. It is taught within the context of the American Institute of Certified Public Accountants (AICPA), as well as broader ethical concepts. This course fulfills the accounting ethics education requirement of the California Board of Accountancy, needed for a California CPA license. The course covers (i) theories and rules and (ii) the application of these theories and rules to case studies drawn from real life. Students are taught not only to identify the risks of fraud, but also how an organization’s culture and structure might be altered to reduce the risks.
Ethics in Accounting: Read More [+]

UGBA 131A Corporate Strategy and Valuation 3 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
The course is designed to cover advanced corporate finance issues. Its purpose is two-fold. First, it will help students develop a tool-box, both conceptual and quantitative, to address real-world corporate financial issues that they will likely use immediately in any finance-related career. Second, the course is designed to give the “the big picture,” i.e., sharpen understanding of how corporate financial strategy helps increase a firm’s value in a dynamic environment. The course examines qualitative factors that help determine financial strategy, including the costs of financial distress and the value of financial flexibility, as well as quantitative techniques, such as option pricing, that will be helpful in various analyses.

UGBA 156 Berkeley Changemaker: Living with Agency 2 Units
Terms offered: Spring 2024
What does it mean to “live with agency”? This course emphasizes the Berkeley Changemaker pillars of critical thinking, effective communication, and productive collaboration. You will combine critical examination of evidence-based, multi-disciplinary research and theories with personal self-reflection. These are interwoven with implementable strategies, directly applicable to the business context, to help you develop a sharper sense of who you want to be along with tools to make that happen. Frequent guest speakers, simulations, and discussions allow you to learn from others as you expand your network. L&S/UGBA C12/C196C is not a prerequisite but is highly recommended since this course complements and builds on that class. Berkeley Changemaker: Living with Agency: Read More [+]

UGBA 160 Customer Insights 3 Units
Terms offered: Fall 2024, Spring 2024, Fall 2023
Consumer behavior is the study of how consumers process information, form attitudes and judgments, and make decisions. Its study is critical to understand how consumers think and behave, which is critical for a company wishing to develop a customer focus. Given how different people are, it is amazing how similarly their minds work. Consumer psychology is the systematic study of how consumers perceive information, how they encode it in memory, integrate it with other sources of information, retrieve it from memory, and utilize it to make decisions. It is one of the building blocks of the study of marketing and provides the student with a set of tools with diverse applications. Customer Insights: Read More [+]

UGBA 161 Market Research: Tools and Techniques for Data Collection and Analysis
3 Units
Terms offered: Spring 2020, Spring 2019, Spring 2017
Information technology has allowed firms to gather and process large quantities of information about consumers' choices and reactions to marketing campaigns. However, few firms have the expertise to intelligently act on such information. This course addresses this shortcoming by teaching students how to use customer information to better market to consumers. In addition, the course addresses how information technology affects marketing strategy.

UGBA 162A Product Branding and Branded Entertainment 2 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
As consumers demand information and products tailored specifically to their individual needs, brands strive to create alternative advertising methods to build lasting relationships and retain “top of mind” status. Smart consumers, especially those in niche markets, have dismissed traditional avenues of sponsorship and product placement. Course explores how and why brand executives across multiple industries are leveraging entertainment to connect with niche markets. It educates students about how marketers develop creative and entertaining ways to connect with multi-hyphenate customers. Course culminates in a Creative Pitch, based on a case study, and a Client Presentation where students present marketing campaigns to industry executives.

UGBA 171 Tech and the City: How to Get Urban Innovation Right 3 Units
Terms offered: Spring 2024, Spring 2022
This course critically examines how new technologies and business models impact cities, and identifies the approaches that produce not only the best business outcomes, but also the most equitable and sustainable outcomes. To begin, we explore what makes cities such compelling laboratories for technology innovation, learn from past attempts at “smart city” interventions, and discuss how technologists can identify more effective solutions to today’s urban challenges. We’ll then hear from a variety of cutting edge practitioners, including venture investors, startup founders, government officials, tech journalists and community organizers about the unique opportunities and challenges of building an urban tech startup today.

UGBA 176 Innovations in Communications and Public Relations 2 Units
Terms offered: Fall 2024, Fall 2023, Fall 2022
This course introduces students to public relations and how it is used by companies, non-profits and individuals to build and support their brands through innovative communication techniques. Students will hear from and have direct access to entrepreneurs and established executives who share insights on how they’ve used creative public relations campaigns and communications skills to create attention and value for their brand or avoid it in a crisis. They also learn to work in teams crafting effective media responses for an existing company needing real help now (not a case study). The semester ends with each student applying this technique to create their own personal brand that they can refine as they prepare to move into the workforce.

UGBA 190C Collaborative Innovation 4 Units
Terms offered: Spring 2022, Spring 2020
This is a project-based course in collaborative innovation where students experience group creativity and team-based design by using techniques from across the disciplines of business, theater, design, and art practice. Students will leverage problem framing and solving techniques derived from critical thinking, systems thinking, and creative problem solving (popularly known today as design thinking). The course is grounded in a brief weekly lecture that sets out the theoretical, historical, and cultural contexts for particular innovation practices, but the majority of the class involves hands-on studio-based learning guided by an interdisciplinary team of teachers leading small group collaborative projects.
Collaborative Innovation: Read More [+]

UGBA 192AC Social Movements and Social Media 3 Units
Terms offered: Spring 2020, Spring 2019, Fall 2017
This course provides a survey of innovative social movements and their complex relationships to social media technologies. It will examine the evolution from pre-social-media to present-day mobilizing strategies and the interplay between explicitly policy- and advocacy-focused approaches and related efforts rooted in music, visual arts, popular culture and celebrities. The course will place into comparative relief the discourses of explicitly racially- or ethnically-defined movements and movements that mobilize based on other, sometimes overlapping categories of marginalization including class, immigration status, gender identity and occupational category.
Social Movements and Social Media: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

UGBA 192B Strategic Philanthropy 2 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
This course teaches students the concepts and practices of effective philanthropy. It offers students the experience of studying relevant theories and frameworks for assessing potential grant recipients and a real-world grant making experience in which they complete a series of nonprofit organizational assessments and then make actual grants totaling $10,000 to a limited number of organizations. Students learn about the evolution of the philanthropic sector from traditional entities, such as private, corporate and community foundations, to an array of new funding intermediaries, technology-driven philanthropies, open source platforms, “impact” investors, and venture philanthropy partnerships.

Strategic Philanthropy: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

UGBA 192E Social Entrepreneurship 2 Units
Terms offered: Fall 2024, Fall 2023, Fall 2022
This course is designed to provide broad exposure to the theories and activities of social entrepreneurship. The inquiry is grounded in real-world examples that illustrate the topics and stimulate thinking, discussion, and learning. Working in groups, students develop a business plan or pitch deck for a social enterprise that addresses an issue that is of interest/concern to the student team. Students with preexisting social enterprise ideas or plans that they would like to further develop and refine are welcomed and encouraged to use this class project as an opportunity to do so.

Social Entrepreneurship: Read More [+]

UGBA 192F Edible Education 3 Units
Terms offered: Prior to 2007
This course is a lecture series that explores the food system and its critical role in our culture, well-being and survival. Students will develop food-systems intelligence—a personal understanding of how the diverse facets of the food system relate to one another, especially one's own role as a participant in the food system and how individual and collective choices, actions, policies and public and private interests affect it. The course explores personal ethics, complex systems, entrepreneurial agency, and ways to develop a multi-sector perspective to food-systems change making. Students will develop plans at an individual, local, national, or global scale to improve, and possibly transform our food system.

UGBA 192ID Impact Startup Disco 1 Unit
Terms offered: Spring 2024, Spring 2023, Spring 2022
This is a high-octane, single weekend course (plus one intro day) for students interested in meeting other innovators and getting hands-on experience developing a new impact startup concept. All “social and environmental” impact themes are welcome. The course is inspired by other “hackathon” and startup weekend formats. A structured roadmap helps guide students through a sprint formation and ideation process. All students will be asked to submit an idea during the week prior to the class. After a peer vote selects the top ideas, teams are organically formed during the first session. At the end of the course, each team will present their validated concept and their next steps plan to a panel of impact venture experts.

UGBA 192L Applied Impact Evaluation 2 Units
Terms offered: Prior to 2007
This course covers the methods and applications of impact evaluations, which is the science of measuring the causal impact of a program or policy on outcomes of interest. At its essence, impact evaluation is about generating evidence on which policies work, and which don’t. This subject matter should appeal to three main audiences: (1) those in decision-making positions, such as policy makers and business leaders, and need to consume the information generated from impact evaluations to make informed evidence-based decisions, (2) project managers, development practitioners and business managers who commission impact evaluations and (3) researchers who actually design and implement impact evaluations.
Applied Impact Evaluation: Read More [+]
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week
Additional Details
Subject/Course Level: Undergrad. Business Administration/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.

UGBA 192S Business and Sustainability 2 Units
Terms offered: Summer 2024 First 6 Week Session, Summer 2023 First 6 Week Session, Summer 2022 First 6 Week Session
This course—a mixture of lectures, readings, business cases and corporate speakers—uses theory, frameworks, tools and business cases to teach students how to systematically evaluate and implement sustainability strategies that also maintain or maximize financial returns. Students are taught to identify opportunities to create business value from environmental and social challenges, and to evaluate the competitive implications related to sustainability initiatives. What type of long-term strategies can organizations set to simultaneously foster sustainable development strategy and sound financial practice? How should decision makers make trade-offs between these two organizational objectives? When is “sustainability” also “good business”? Business and Sustainability: Read More [+]

UGBA 193B Energy & Civilization 4 Units
Terms offered: Fall 2024, Fall 2023, Fall 2022
Energy is one of the main drivers of civilization. Today we are at the precipice of what many hope will be a major paradigm shift in energy production and use. Two transitions are needed. On the one hand, we must find ways to extend the benefits of our existing energy system to the impoverished people living in the developing world while continuing to provide these benefits to the people of the developed world. On the other hand, we must completely overhaul the existing system to fight climate change and other forms of air and water pollution. Are these shifts truly within our reach? Can we achieve both simultaneously? If so, how? This Big Ideas course will grapple with these questions using an interdisciplinary systems approach.
Energy & Civilization: Read More [+]

Rules & Requirements
Credit Restrictions: Students will receive no credit for UGBA 193B after completing L & S 126. A deficient grade in UGBA 193B may be removed by taking L & S 126.

UGBA C196C The Berkeley Changemaker 2 - 3 Units
Terms offered: Fall 2024, Summer 2024 Second 6 Week Session, Spring 2024, Fall 2023, Summer 2023 Second 6 Week Session
Berkeley Changemaker impact occurs across many fronts: scientific, artistic, social, and entrepreneurial. This course helps students identify as a Berkeley Changemaker and learn the critical thinking, communication, and collaboration skills to become one. Combining disciplines across UC Berkeley, the course also helps launch the Berkeley Discovery arc. Students develop their own leadership styles and discover how they can create and lead diverse teams to act upon the world. Values in Berkeley’s DNA like Questioning the Status Quo and going Beyond Yourself support students in leading from whatever position they occupy, preparing them to leave their mark on campus, in their communities, or beyond.
