Society and Environment

Bachelor of Science (BS)
Social and environmental problems are deeply intertwined. This major introduces students to the main approaches and theory for environmental social sciences including how social science tools can be applied to environmental problems and how social science theories contribute to understanding environmental problems. At the upper-division level, there are three major areas of concentration. Students are exposed to all three areas and choose to focus on one: US Environmental Policy and Management, Global Environmental Politics, or Justice and Sustainability.

Society and Environment graduates are well-prepared for careers in fields such as environmental consulting, education, health, or law; community, urban, or regional planning; and other related areas of environmentalism in public agencies, nonprofit conservation organizations, and private companies. Graduates are well-qualified for a variety of graduate programs, including law school.

Admission to the Major
Advice on admission for freshmen and transfer students can be found on the Rausser College of Natural Resources Admissions Guide (https://guide.berkeley.edu/undergraduate/colleges-schools/natural-resources/admissionstext) page or the Prospective Student website (https://nature.berkeley.edu/prospective-students/). Freshman students may apply directly to the major, or they may select the Rausser College undeclared option and declare the major by the end of their fourth semester. Transfer students may apply directly to the major through the UC application.

Information for current Berkeley students who would like to declare the major after admission, including information on a change of major or change of college, please see chapter 6 of the Rausser College Undergraduate Student Handbook (https://nature.berkeley.edu/handbook/).

Honors Program
Students with a cumulative grade point average (GPA) of 3.6 or higher may enroll in the Rausser College of Natural Resources honors program (H196) once they have reached upper-division standing. To fulfill the program requirements, students design, conduct, and report on an individual research project working with a faculty sponsor. For further information on the honors program, please see the Rausser website, https://nature.berkeley.edu/honors (https://nature.berkeley.edu/honors/).

Minor Program
There is no minor program in Society and Environment.

Other Majors and Minors Offered by the Department of Environmental Science, Policy, and Management
Conservation and Resource Studies (http://guide.berkeley.edu/undergraduate/degree-programs/conservation-resource-studies/) (Major and Minor)
Environmental Sciences (http://guide.berkeley.edu/undergraduate/degree-programs/environmental-sciences/) (Major only)
Ecosystem Management & Forestry (http://guide.berkeley.edu/undergraduate/degree-programs/ecosystem-management-forestry/) (Major and Minor)
Molecular Environmental Biology (http://guide.berkeley.edu/undergraduate/degree-programs/molecular-environmental-biology/) (Major only)
Food Systems (http://guide.berkeley.edu/undergraduate/degree-programs/food-systems/) (Minor only)

In addition to the University, campus, and college requirements listed on the College Requirements tab, students must fulfill the below requirements specific to their major program.

General Guidelines
1. All courses taken to fulfill the major requirements below must be taken for letter-graded credit, other than courses listed which are offered on a Pass/No Pass basis only. Other exceptions to this requirement are noted as applicable.
2. A minimum cumulative grade point average (GPA) of 2.0 is required.
3. A minimum GPA of 2.0 in upper-division major requirements is required.
4. At least 15 of the 36 required upper-division units must be taken in the Rausser departments (EEP, ERG, ES, ESPM, NAT RES, NST, PMB).
5. A maximum of 16 units of independent study (courses numbered 97, 98, 99, 197, 198, and 199) may count toward graduation, with a maximum of 4 units of independent study per semester.
6. No more than 1/3 of the total units attempted at UC Berkeley may be taken Pass/No Pass. This includes units in the Education Abroad Program and UC Intercampus Visitor or Exchange Programs.
7. A maximum of 4 units of physical education courses will count toward graduation.
8. When a student takes a “Special Topics” or “Advanced Topics” course (ESPM 150s, SOCIOL 139s, Anthro 189s, etc.), the student is responsible for verifying that the specific course title and course number match the course that is listed as an approved course for the major.

For information regarding residency requirements and unit requirements, please see the College Requirements tab.

Lower Division Requirements
ESPM Environmental Science Core (cannot overlap with breadth)
Select one of the following: 4

Area of Concentration Requirement

Students select a total of seven courses in the areas of concentration. In consultation with a faculty adviser, students choose their primary area of concentration and:

1. Select one of the ESPM courses in their primary area as their core course.
2. Select three additional courses from that area of concentration (ESPM or non-ESPM) to fulfill the primary area of concentration.
3. Choose three additional courses (ESPM or non-ESPM), with at least one course from each of the other two concentrations.

At least three of the seven courses (12 units) in the areas of concentration must come from the approved ESPM courses.

1. US Environmental Policy and Management

Reading and Composition (http://guide.berkeley.edu/undergraduate/colleges-schools/natural-resources/reading-composition-requirement/)

In order to provide a solid foundation in reading, writing and critical thinking all majors in the College require two semesters of lower division work in composition. Students must complete a first-level reading and composition course by the end of their second semester and a second-level course by the end of their fourth semester.

Foreign Language (http://guide.berkeley.edu/undergraduate/colleges-schools/natural-resources/foreign-language-requirement/): EEP Majors only

The Foreign Language requirement is only required by Environmental Economics and Policy (EEP) majors. It may be satisfied by demonstrating proficiency in reading comprehension, writing, and conversation in a foreign language equivalent to the second semester college level, either by passing an exam or by completing approved course work.

Quantitative Reasoning (http://guide.berkeley.edu/undergraduate/colleges-schools/natural-resources/quantitative-reasoning-requirement/): EEP Majors only

The Quantitative Reasoning requirement is only required by Environmental Economics and Policy (EEP) majors. The requirement may be satisfied by exam or by taking an approved course.

Undergraduate Breadth

Undergraduate breadth provide Berkeley students with a rich and varied educational experience outside of their major program and many students complete their breadth courses in their first two years. Breadth courses are built into the Rausser College major requirements and each major requires a different number of breath courses and categories. The EEP major is the only college major that requires the entire 7 course breadth. Refer to the major snapshots on each Rausser College major page (https://nature.berkeley.edu/advising/majors-minors/) for additional information.

High School Exam Credit

Unit Requirements

Students must complete at least 120 semester units of courses subject to certain guidelines:

- At least 36 units must be upper division courses, including a minimum of 15 units of upper division courses in the Rausser College.
• A maximum of 16 units of Special Studies coursework (courses numbered 97, 98, 99, 197, 198, or 199) is allowed towards the 120 units; a maximum of four is allowed in a given semester.
• A maximum of 4 units of Physical Education from any school attended will count towards the 120 units.
• Students may receive unit credit for courses graded P (including P/ NP units taken through EAP) up to a limit of one-third of the total units taken and passed on the Berkeley campus at the time of graduation. Courses taken for P/NP in the Spring 2020 semester will not count toward this limit.

<table>
<thead>
<tr>
<th>Semester Unit Minimum</th>
</tr>
</thead>
<tbody>
<tr>
<td>All Rausser College students must enroll in at least 12 units each fall and spring semester.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Semester Unit Maximum</th>
</tr>
</thead>
<tbody>
<tr>
<td>To request permission to take more than 20.5 units in a semester, please see the major adviser.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Semester Limit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students admitted as freshmen must graduate within 8 fall/spring semesters at UC Berkeley. Students admitted as transfer students must graduate within 4 fall/spring semesters at UC Berkeley. Students who go on EAP and UCDC can petition for additional semesters. Other UC-affiliated programs, such as the Gump Station in Moorea, may also be considered. Summer session, UC Extension and non-UC study abroad programs do not count towards this semester limit. Students approved for double majors or simultaneous degrees in two colleges may be granted an additional semester. Rausser College does not limit the number of total units a student can accrue.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Senior Residence Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Once you achieve and exceed 90 units (senior status), you must complete at least 24 of the remaining 30 units in residence at the Rausser College of Natural Resources over at least 2 semesters. To count as residence, a semester must consist of at least 6 passed units taken while the student is a member of Rausser. At least one of the two terms must be a fall or spring semester. Senior residence terms do not need to be completed consecutively. All courses offered on campus for the fall, spring, and summer terms by Berkeley departments and programs and all Berkeley online (‘W’) courses count. Inter-campus Visitor, Education Abroad Program, UC Berkeley Washington Program, and UC Berkeley Extension units do not count toward this requirement. Students may use Summer Session to satisfy one semester of the Senior Residence Requirement, provided that 6 units of coursework are completed.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Modified Senior Residence Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Participants in a fall, spring or summer UC Education Abroad Program (UCEAP), Berkeley Summer Abroad, or the UC Berkeley Washington Program may meet a modified Senior Residence Requirement by completing 24 of their final 60 semester units in residence (excluding UCEAP). At least 12 of these 24 units must be completed after senior status is reached. International travel study programs sponsored by Summer Sessions and education abroad programs offered outside of the UC system do not qualify for modified senior residence. Most students automatically satisfy the residence requirement by attending classes here for four years. In general, there is no need to be concerned about this requirement, unless students go abroad for a semester or year or want to take courses at another institution or through University Extension during their senior year. In these cases, students should make an appointment to see an adviser to determine how they can meet the Senior Residence Requirement.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Grade Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>• A 2.0 UC GPA is required for graduation.</td>
</tr>
<tr>
<td>• A 2.0 average in all upper division courses required of the major program is required for graduation.</td>
</tr>
<tr>
<td>• A grade of at least C- is required in all courses for the major. Major and minor coursework taken in Spring 2020, Fall 2020, and Spring 2021 may be completed with P/NP grading option. See more details below.</td>
</tr>

<tr>
<td>After much consultation across the colleges of UC Berkeley, and via our college Executive Committee, the following decisions have been made about the selection of the P/NP grade option (CPN) by undergraduate students during the Fall 2020 &amp; Spring 2021 semesters for the Rausser College of Natural Resources.</td>
</tr>
</tbody>
</table>

| College Course Requirements: Reading and Composition, Quantitative Reasoning, and Foreign Language requirements normally satisfied with letter grades may be met with a passed (P) grade during the Fall 2020 semester. This does not include the system-wide Entry Level Writing requirement. College Writing R1A must be taken for a letter grade and completed with a C or better to fulfill the Entry Level Writing requirement. |

<table>
<thead>
<tr>
<th>Requirements to Graduate: No changes in policy.</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Rausser College students must have at least a 2.0 cumulative UC GPA to declare a Rausser College major.</td>
</tr>
<tr>
<td>• Non-Rausser College students must have at least a 3.0 cumulative UC GPA to change to or add a Rausser College major.</td>
</tr>
<tr>
<td>• Students must have at least a 2.0 cumulative UC GPA to graduate, both overall and in the upper-division courses required for the major.</td>
</tr>
<tr>
<td>• Academic Probation: The terms for Academic Probation (AP) have been modified.</td>
</tr>
<tr>
<td>• Rausser CNR students currently in good standing who earn all “P” grades will remain in good standing.</td>
</tr>
<tr>
<td>• Students currently in good standing who earn NP grades, Incompletes, or failing letter grades for more than 50% of units will be placed on academic probation and will be required to meet with their college advisor and complete an Academic Success Plan for the subsequent semester.</td>
</tr>
<tr>
<td>• Students on AP must take all coursework for letter grades. Students on AP may be removed from probationary status with sufficient letter graded course work to raise their cumulative GPA above 2.0.</td>
</tr>
</tbody>
</table>
| • Students on Academic Probation who do not attain sufficient letter-graded coursework to be removed from AP (ie. enough
grade points to raise cumulative GPA above 2.0 cumulative GPA) will remain on AP for the subsequent semester and must complete an Academic Success Plan with their college advisor.

- Students on Academic Probation who earn NP grades, Incompletes, or failing letter grades for more than 50% of units will be Subject to Dismissal and will be required to meet with their college advisor and complete an Academic Success Plan for the subsequent semester.

- Term Probation: Students in this category are placed on academic probation if their GPA falls below 1.5 in any fall or spring semester ("Term"). To get back into good standing, you must earn a UC Berkeley term GPA of 2.0 the following regular semester (fall/spring) and maintain an overall GPA of 2.0. If you fail to meet these conditions, you will be subject to dismissal from the University. For Fall 2020 & Spring 2021, the terms for Term Probation have been modified.

- Rausser CNR students currently in good standing who earn all "P" grades will remain in good standing and will not be placed on Term Probation.

- Transferring Credit: If you are taking coursework through another institution in Fall 2020 & Spring 2021, P grades earned will be accepted for all degree requirements. Note: This does not include the systemwide Entry Level Writing requirement. College Writing R1A must be taken for a letter grade and completed with a C or better to fulfill the Entry Level Writing requirement.

For additional information, please see Changes to Policies and Procedures for Fall 2020, Spring 2021, & Summer 2021 (https://nature.berkeley.edu/advising/AY-2020-2021-policy-adjustments/).

Spring 2020

In light of the substantial disruptions to instruction caused by the novel coronavirus emergency, the Berkeley Division of the Academic Senate made changes to grading options for the Spring 2020 semester. Rausser College adjusted college requirements as follows:

- College Course Requirements: All passing course work taken in Spring 2020 may be used for college requirements regardless of the grading option selected.

- Requirements to Graduate: To graduate, Rausser College students usually must have at least a 2.0 cumulative UC GPA to graduate, both overall and in the upper-division courses required for their major. For Spring 2020, students with at least a 1.9 cumulative GPA overall and in the upper-division courses required for their major to graduate will be considered as having met the requirement.

- Academic Probation: Recognizing the challenges to teaching and learning during the COVID-19 pandemic, Rausser College of Natural Resources will not be penalizing any students’ academic progress for Spring 2020.

- Students in good academic standing who earn all “P” grades will remain in good standing.

- Students, who are in good standing, who earn NP grades, Incompletes, or failing grades for more than 50% of units will be required to meet with their college advisor and complete an Academic Success Plan for Fall 2020 by September 11, 2020, but will not be placed on Academic Probation.

- Students on Academic Probation may be removed from probationary status with sufficient letter graded course work to raise their cumulative GPA above 2.0.

- Students on Academic Probation who do not attain sufficient letter-graded coursework to be removed from AP (ie. enough grade points to raise cumulative GPA above 2.0 cumulative GPA) will remain on AP for Fall 2020 and must complete an Academic Success Plan with their college advisor by September 11, 2020.

- Term Probation: Recognizing the challenges to teaching and learning during the COVID-19 pandemic, Rausser College of Natural Resources will not be penalizing any students’ academic progress for Spring 2020.

- Students in good academic standing who earn all “P” grades will remain in good standing.

- Students on Term Probation, but not AP, may be removed from probationary status with passing grades in at least 50% of units for Spring 2020.

- Students on Term Probation at the start of Spring 2020 who earn NP, Incomplete, or failing grades for more than 50% of units must complete an Academic Success Plan with their college advisor by September 11, 2020 and will remain on Term Probation.

- Transferring Credit: If you are taking coursework through another institution in Spring 2020 (i.e. through Concurrent Enrollment or instead of being enrolled in Spring 2020 at UC Berkeley) and that institution has moved to a P/NP-default or P/NP-only grading model, P grades earned will be accepted for all degree requirements.

For additional information, please see Changes to Policies and Procedures for Spring 2020 (https://nature.berkeley.edu/advising/spring-2020-changing-policies-faq/).

### Learning Goals for the Major

The Society and Environment major develops students’ capacities to theorize, analyze, interpret and influence social causes and consequences of environmental problems.

Graduates are expected to play effective and credible roles in the public, professional, and scientific arenas in which they choose to work. These arenas include, for example, the politics, policy, and management of urban, agricultural, forest, land, and water systems and the particular sets of socioeconomic, scientific, industrial, and governmental institutions these engage.

Major Maps help undergraduate students discover academic, co-curricular, and discovery opportunities at UC Berkeley based on intended major or field of interest. Developed by the Division of Undergraduate Education in collaboration with academic departments, these experience maps will help you:

- **Explore** your major and gain a better understanding of your field of study
- **Connect** with people and programs that inspire and sustain your creativity, drive, curiosity and success
- **Discover** opportunities for independent inquiry, enterprise, and creative expression
- **Engage** locally and globally to broaden your perspectives and change the world
- **Reflect** on your academic career and prepare for life after Berkeley

Use the major map below as a guide to planning your undergraduate journey and designing your own unique Berkeley experience.

View the Society and Environment Major Map PDF. ([https://ue.berkeley.edu/sites/default/files/society_and_environment.pdf](https://ue.berkeley.edu/sites/default/files/society_and_environment.pdf))
In the Rausser College of Natural Resources, we provide holistic, individual advising services to prospective and current students who are pursuing majors and minors in our college. We assist with a range of topics including course selection, academic decision-making, achieving personal and academic goals, and maximizing the Berkeley experience.

If you are looking to explore your options, or you are ready to declare a major, double major, or minor, contact the undergraduate adviser for your intended major. Visit our website (https://nature.berkeley.edu/advising/meet-cnr-advisors/) to explore all of our advising services.

**ESPM 2 The Biosphere 3 Units**

Terms offered: Fall 2022, Fall 2021, Fall 2020

An introduction to the unifying principles and fundamental concepts underlying our scientific understanding of the biosphere. Topics covered include the physical life support system on earth; nutrient cycles and factors regulating the chemical composition of water, air, and soil; the architecture and physiology of life; population biology and community ecology; human dependence on the biosphere; and the magnitude and consequences of human interventions in the biosphere.

The Biosphere: Read More [+]

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

Instructors:

FROM FARM TO TABLE: FOOD SYSTEMS IN A CHANGING WORLD: Read Less [-]

**ESPM 5 FROM FARM TO TABLE: FOOD SYSTEMS IN A CHANGING WORLD 4 Units**

Terms offered: Summer 2021 Second 6 Week Session, Summer 2020 Second 6 Week Session, Summer 2019 Second 6 Week Session

This course explores the journey of the U.S. food supply from the farm to the family table. The ecology, management, and politics of farming under a global change scenario, the impact of our changing patterns of demand on food processing and retail, the opportunities and costs of exports, and the way different groups access, use, and consume food.

FROM FARM TO TABLE: FOOD SYSTEMS IN A CHANGING WORLD: Read More [+]

**Hours & Format**

Summer: 6 weeks - 7.5 hours of lecture and 2.5 hours of discussion per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

Instructors:

FROM FARM TO TABLE: FOOD SYSTEMS IN A CHANGING WORLD: Read Less [-]

**ESPM 6 Environmental Biology 3 Units**

Terms offered: Fall 2022, Fall 2021, Fall 2020

Basic biological and ecological principles discussed in relation to environmental disruptions. Human interactions with the environment; their meaning for animals and plants. Discussion of basic ecological processes as a basis for understanding environmental problems and formulating strategies for their solution.

Environmental Biology: Read More [+]

**Rules & Requirements**

**Prerequisites:** One course in introductory college biology is recommended. Intended for nonscience majors

**Hours & Format**

Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

Instructor:

Environmental Biology: Read Less [-]
ESPM 9 Environmental Science Case Study Seminar 3 Units
Terms offered: Spring 2012, Spring 2011, Spring 2010
Utilizing a field intensive seminar format, the course will introduce lower division students to the process of addressing real environmental problems. Through a progression of case studies, students will explore a spectrum of research design and implementation approaches. By the end of the semester, they will be able to frame a researchable question, design a protocol for gathering relevant information, analyze the information, and derive an objective conclusion. Throughout the semester, students will present case study results in oral and written form.

ESPM C11 Americans and the Global Forest 4 Units
Terms offered: Spring 2017, Spring 2015, Spring 2014
This course challenges students to think about how individual and American consumer decisions affect forest ecosystems around the world. A survey course that highlights the consequences of different ways of thinking about the forest as a global ecosystem and as a source of goods like trees, water, wildlife, food, jobs, and services. The scientific tools and concepts that have guided management of the forest for the last 100 years, and the laws, rules, and informal institutions that have shaped use of the forests, are analyzed.

ESPM 10 Environmental Issues 4 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
Relationship between human society and the natural environment; case studies of ecosystem maintenance and disruption. Issues of economic development, population, energy, resources, technology, and alternative systems.

ESPM 15 Introduction to Environmental Sciences 3 Units
Terms offered: Summer 2023 Second 6 Week Session, Spring 2023, Fall 2022
Introduction to the science underlying biological and physical environmental problems, including water and air quality, global change, energy, ecosystem services, introduced and endangered species, water supply, solid waste, human population, and interaction of technical, social, and political approaches to environmental management.
ESPM C22AC Fire: Past, Present and Future Interactions with the People and Ecosystems of California 4 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
The course presents a diachronic perspective on human-fire interactions with local ecosystems in California that spans over 10,000 years. The course will provide an historical perspective on human-fire interactions at the landscape scale using a diverse range of data sources drawn from the fields of fire ecology, biology, history, anthropology, and archaeology. An important component includes examining how diverse cultures and ethnicity influenced how people perceived and used fire at the landscape scale in ancient, historical and modern times. The implications of these diverse fire practices and policies will be analyzed and the consequences they have had for transforming habitats and propagating catastrophic fires will be explored.

ESPM 24 Freshman Seminar 1 Unit
Terms offered: Spring 2023, Spring 2022, Fall 2021
The Freshman Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Freshman Seminars are offered in all campus departments, and topics may vary from department to department and semester to semester. Enrollment limited to fifteen freshman.

ESPM 39E Freshman/Sophomore Seminar 1 - 3 Units
Terms offered: Fall 2012
Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

ESPM 40 Insects and Human Society 3 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
An introduction to the diversity and natural history of insects in natural and human environments. The course examines the wonder of insects, their interactions with the living world, and their contributions to and impacts on human society.

Insects and Human Society: Read More [+]

ESPM 39E Freshman/Sophomore Seminar 1 - 3 Units
Terms offered: Fall 2012
Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Freshman/Sophomore Seminar: Read More [+]

Rules & Requirements
Prerequisites: Priority given to freshmen and sophomores
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2-4 hours of seminar per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate

Grading/Final exam status: The grading option will be decided by the instructor when the class is offered. Final exam required.

Freshman/Sophomore Seminar: Read Less [-]

ESPM 40 Insects and Human Society 3 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
An introduction to the diversity and natural history of insects in natural and human environments. The course examines the wonder of insects, their interactions with the living world, and their contributions to and impacts on human society.

Insects and Human Society: Read More [+]

ESPM 52 History of Native American Land, Colonialism, and Heritage Preservation 3 Units

Terms offered: Spring 2022

The purpose of this course is to examine Native American societies, political systems, and human-environment relationships within CA and the U.S. This survey of Native American history will provide context for modern issues in land and resource management and government-to-government relationships between tribes and local, state, and federal agencies. Special attention will be given to the CA region, as there are many aspects of CA that make it an exceptional or unique case within the larger US historical narrative. Recurring themes or core concepts discussed throughout the course will include climate change, cultural and environmental impacts from colonialism, Indigenous persistence, stewardship, cultural landscapes, and tribal sovereignty.

Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Gong

ESPM 88A Exploring Geospatial Data 2 Units
Terms offered: Spring 2017, Spring 2016
From interactive web maps to spatial data analysis, digital geographic data and information are becoming an important part of the data science landscape. Almost everything happens somewhere that can be mapped on the surface of the earth. In many cases the where matters as much to an analysis as the what and the why. Geospatial data analysis allows a researcher to consider location explicitly. This course provides an introduction to working with digital geographic data, or geospatial data. We will explore concepts of geospatial data representation, methods for acquisition, processing and analysis, and techniques for creating compelling geovisualizations. No prior knowledge is assumed or expected.
Exploring Geospatial Data: Read More [+]

Rules & Requirements
Prerequisites: This course is meant to be taken concurrently with Computer Science C8/Statistics C8/Information C8: Foundations of Data Science. Students may take more than one 88 (data science connector) course if they wish, ideally concurrent with or after having taken the C8 course

Hours & Format
Fall and/or spring: 15 weeks - 0.5 hours of lecture, 0.5 hours of discussion, and 1 hour of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Kelly

Exploring Geospatial Data: Read Less [-]
ESPM 88B Data Sciences in Ecology and the Environment 2 Units
Terms offered: Spring 2016
Many of the greatest challenges we face today come from understanding and interacting with the natural world: from global climate change to the sudden collapse of fisheries and forests, from the spread of disease and invasive species to the unknown wealth of medical, cultural, and technological value we derive from nature. Advances in satellites and microsensors, computation, informatics and the Internet have made available unprecedented amounts of data about the natural world, and with it, new challenges of sifting, processing and synthesizing large and diverse sources of information. In this course, students will apply methods and understanding they gain in the Foundations course to realworld ecological and environmental data

ESPM 98BC Berkeley Connect 1 Unit
Terms offered: Spring 2023, Fall 2022, Spring 2022
Berkeley Connect is a mentoring program, offered through various academic departments, that helps students build intellectual community. Over the course of a semester, enrolled students participate in regular small-group discussions facilitated by a graduate student mentor (following a faculty-directed curriculum), meet with their graduate student mentor for one-on-one academic advising, attend lectures and panel discussions featuring department faculty and alumni, and go on field trips to campus resources. Students are not required to be declared majors in order to participate.
Berkeley Connect: Read More [+]

Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

**ESPM 99 Supervised Independent Study and Research 1 - 3 Units**

Terms offered: Spring 2021, Fall 2016, Spring 2016

Supervised independent study or research on topics relevant to department that are not covered in depth by other courses. Open to students in good standing who, in consultation with a faculty sponsor, present a proposal with clearly formulated objectives and means of implementation. Intended for exceptional students.

**Rules & Requirements**

**Prerequisites:** Lower division standing (3.4 GPA or better), consent of instructor, adviser, and department chair. Usually restricted to ESPM majors

**Repeat rules:** Course may be repeated for credit without restriction.

**Hours & Format**

Fall and/or spring: 15 weeks - 0 hours of independent study per week

Summer:
- 6 weeks - 1-5 hours of independent study per week
- 8 weeks - 1-4 hours of independent study per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Undergraduate

**Grading/Final exam status:** Offered for pass/not pass grade only. Final exam not required.

Supervised Independent Study and Research: Read Less [-]

**ESPM 100 Environmental Problem Solving 4 Units**

Terms offered: Fall 2022, Fall 2021, Fall 2020

Analysis of contrasting approaches to understanding and solving environmental and resource management problems. Case studies and hands-on problem solving that integrate concepts, principles, and practices from physical, biological, social, and economic disciplines. Their use in environmental policies and resource and management plans. This course is the prerequisite to 196A.

**Rules & Requirements**

**Prerequisites:** One course in ecology; one course in mathematics or statistics; one course in a social science or economics

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Frankie

Environmental Problem Solving: Read Less [-]

**ESPM 101A The Politics and Practice of Sustainability Transitions 4 Units**

Terms offered: Fall 2022, Summer 2011 8 Week Session, Summer 2010 8 Week Session

Human societies have significant knowledge about environmental and social problems, such as climate change, biodiversity loss, and chemical pollution, as well as the underlying causes. We have a growing sense of what could be done to make societies more sustainable and just. Yet there appear to be many obstacles and much inertia in progressing towards implementing deeper changes in complex social and economic systems, from the food system to chemical manufacturing to urban transportation. This course explores sustainability transitions as a way to work through the politics and practice of making significant changes in societies, economies, and political institutions.

**Rules & Requirements**

**Prerequisites:** Completion of upper division statistics requirement. Open only to declared Environmental Sciences majors

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture, 1 hour of discussion, and 3 hours of laboratory per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam not required.

**Instructor:** Iles

The Politics and Practice of Sustainability Transitions: Read Less [-]

**ESPM 100ES Introduction to the Methods of Environmental Science 4 Units**

Terms offered: Spring 2023, Spring 2022, Spring 2021

Introduction to basic methods used in environmental research by biological, physical, and social scientists; designed to teach skills necessary to conduct independent thesis research in the required senior seminar, 196A-196B/196L. Topics include development of research questions, sampling methods, experimental design, statistical analysis, scientific writing and graphics, and introductions to special techniques for characterizing environmental conditions and features. This course is the prerequisite to 196A.

**Rules & Requirements**

**Prerequisites:** Completion of upper division statistics requirement. Open only to declared Environmental Sciences majors

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture, 1 hour of discussion, and 3 hours of laboratory per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Undergraduate

**Grading/Final exam status:** Letter grade. Alternative to final exam.

**Instructor:** Battles

**ESPM 102D Climate and Energy Policy 4 Units**

Terms offered: Spring 2023, Spring 2022, Fall 2020

This intermediate level course engages with both the politics and the design of climate and clean energy policy, with a focus on the United States. Key themes include political strategies to climate change, the choice of policy instruments, the role of various state actors and interest groups in policy making, the interaction of policy and low-carbon technology markets, and the US and global politics. The course combines the study of analytical concepts with in-depth case studies.

**Climate and Energy Policy: Read More [+]**

**Rules & Requirements**

**Prerequisites:** One of the following is required: - ESPM 60 Environmental Policy, Administration, and Law - ENVECON C1 Introduction to Environmental Economics and Policy, - POL SCI 1 Introduction to American Politics, or - Consent of instructor

**Hours & Format**

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Summer:** 6 weeks - 8 hours of lecture and 2 hours of discussion per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Undergraduate

ESPM 105A Sierra Nevada Ecology 4 Units
Terms offered: Summer 2023 10 Week Session, Summer 2022 10 Week Session, Summer 2021 8 Week Session
Introduction to silvicultural theory, forest operations, and utilization and manufacture of forest products. Evaluation of silviculture for managing forest stands for multiple objectives including regeneration, stand density control, forest growth, genetic improvement, and prescribed burning. Introduction to harvest and access systems, wood structure and quality, and manufacture of forest product. Field trips and lectures to local areas illustrating different approaches to forest problems.
Rules & Requirements
Prerequisites: Eight hours biology
Hours & Format
Summer: 8 weeks - 10 hours of lecture and 30 hours of fieldwork per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: McBride

ESPM 105B Forest Measurements 1 Unit
Terms offered: Summer 2023 10 Week Session, Summer 2022 10 Week Session, Summer 2021 8 Week Session
This course teaches students how to use common forestry tools, maps, and various sampling methods to collect information about the forest environment. Thirty percent of the time is spent in the classroom learning about the techniques and working up field data. The remaining time is spent in the field applying these techniques in real-world settings. Skills taught will include tree and plot measurement procedures, map reading, and simple field orienteering principles.
Rules & Requirements
Prerequisites: 105A
Hours & Format
Summer: 8 weeks - 12 hours of lecture and 18 hours of fieldwork per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
ESPM 105C Silviculture and Utilization 3 Units
Terms offered: Summer 2023 10 Week Session, Summer 2022 10 Week Session, Summer 2021 8 Week Session

ESPM 106 American Wildlife: Management and Policy in the 21st Century 3 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
This course will introduce the history of key wildlife management and policy paradigms, such as parks and protected areas, threatened and endangered species protections, and state wildlife management. We will then explore in depth a number of species case studies in the Greater Yellowstone Ecosystem, a major laboratory for wildlife science, management and policy. The course will draw on lectures, readings, discussions, and guest perspectives. The course will help students majoring in related fields to prepare for careers in wildlife science and related conservation, management, and policy efforts; but students of any major should come away with a better understanding of key issues facing iconic American wildlife species.

**ESPM C107 Biology and Geomorphology of Tropical Islands 15 Units**

Terms offered: Fall 2022, Fall 2021, Fall 2020, Fall 2019

In this class, students study the natural history and evolutionary biology of island terrestrial and freshwater organisms and their communities, and of marine organisms in the coral reef and lagoon systems. The students also learn about the geomorphology of volcanic islands, coral reefs, and reef islands. Features of island biogeography are illustrated with topics linked to subsequent field studies on the island of Moorea, French Polynesia. The course trains students as independent scientists, as students develop, conduct, and communicate independent research projects on a topic of their choice.

Environmental Change Genetics: Read Less [-]
ESPM 109A Island and Coral Reef Resilience and Ecosystem Services 3 Units
Terms offered: Prior to 2007
Students will learn the fundamentals of island and reef biology, geology, marine ecology and their inter-connectedness, as well as the physical and biological forces shaping and maintaining these ecosystems. The course will involve a significant amount of time in the field to expose students to the different island habitats and explore the ecosystem services provided by island habitats to local peoples and beyond. Students will interact directly with local people to learn about local perspectives on the value of these systems.

Objectives & Outcomes

Course Objectives: 1. To provide fundamentals of island and reef biology, geology, marine ecology and their inter-connectedness, as well as the physical and biological forces shaping and maintaining these ecosystems.
2. To experience in the field the different island habitats and explore the ecosystem services provided by island habitats to local peoples and beyond.
3. To interact directly with local people to learn about local perspectives on the value of these systems.

Student Learning Outcomes: 1. Students will be able to summarize the fundamentals of Sustainability Science in the context of oceanography, geoscience, genetics, ecology, anthropology, economics, statistics and data science.
2. Students will be able to demonstrate a quantitative and qualitative understanding of interactions among individual organisms and between species and their biotic and abiotic environment.
3. Students will be able to design experiments to understand the importance and inter-connectedness of biological and physical forces that shape and maintain island ecosystems.
4. Students will be able to interpret the value of ecosystem services that islands provide.
5. Students will be able to articulate the perspective of local people on the value of island ecosystems based on their first hand experiences.
6. Students will be able to investigate and communicate the connections between the biological and social sciences and humanities as they affect sustainable development.

Hours & Format

Fall and/or spring: 3 weeks - 15 hours of lecture and 15 hours of fieldwork per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

ESPM 109B Polynesian Culture and Society 3 Units
Terms offered: Prior to 2007
This course is based at the Atitia Community Center adjacent to the Gump Station and on Tetiaroa. Students will learn about the history of the peopling of Oceania, and the waves of exploration and interaction that have shaped the Pacific. Students will be immersed into the way in which the first peoples of these islands understand and interact with their island homes, from a traditional to modern perspective, and with insights on human-environment interactions. Students will be presented with necessary historical and cultural context including basic language training, archeological field trips and interactions with local youth and elders at the Atitia Center and beyond to learn about local customs, traditions and attitude.

Objectives & Outcomes

Course Objectives: 1. To experience Polynesian atoll culture.
2. To provide in immersion in life of first peoples from a traditional to modern perspective, and with insights on human-environment interactions.
3. To present necessary historical and cultural context including basic language training, archeological field trips and interactions with local youth and elders at the Atitia Center and beyond to learn about local customs, traditions and attitude.

Student Learning Outcomes: 1. Students will gain an understanding of Oceania as a whole and Tahiti’s place within it.
2. Students will be able to interpret basic languages and legends of Polynesian culture.
3. Students will be able to compare atoll and island culture from both traditional and modern perspectives.
4. Students will be able to articulate challenges to sustainability for island cultures.
5. Students will gain an appreciation of traditional ecological knowledge and how it shapes Tahitian culture.

Hours & Format

Fall and/or spring: 3 weeks - 15 hours of lecture and 15 hours of fieldwork per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
ESPM 109C Issues in Biodiversity 3 Units

Terms offered: Prior to 2007

An overview of the major issues facing biodiversity globally today including habitat destruction, pollution, invasive species and disease, and examine how these issues are affecting island nations with a focus on French Polynesia. This course will make extensive use of the Biocode Project database to examine biodiversity on Moorea, and discuss genetic resilience and conservation technologies. We will then explore local attitudes and perspectives about these issues and examine local biodiversity initiatives.

Issues in Biodiversity: Read More [+]

Objectives & Outcomes

Course Objectives:
1. To review of the major issues facing biodiversity globally today including habitat destruction, pollution, invasive species and disease.
2. To experience how these issues are affecting island nations with a focus on French Polynesia.
3. To use the Biocode Project database to examine biodiversity on Moorea, and discuss genetic resilience and conservation technologies.
4. To explore local attitudes and perspectives about these issues and examine local biodiversity initiatives.

Student Learning Outcomes:
1. Students will be able to recognize species within some particular group of organisms and interpret key aspects of their ecology, phylogeny, and conservation needs from both a modern scientific approach as well as that of traditional ecological knowledge.
2. Students will be able to articulate the goals and value of fundamental ecological and genetic observatories for sustainability science.
3. Students will obtain skills of database use and visualization.
4. Students will be able to design and evaluate initiatives with the goal to conserve biodiversity.

Hours & Format

Fall and/or spring: 3 weeks - 15 hours of lecture and 15 hours of fieldwork per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

ESPM 109D Environmental Planning, Management, and Policy 3 Units

Terms offered: Prior to 2007

Students will be given an overview of the state of the field, as well as an understanding of current theory and practice; including western approaches and indigenous environmental management of terrestrial and marine resources. Rahui, a traditional Polynesian marine conservation practice will be examined through interaction with local communities that use it. Students will also learn about EU, Pacific-wide and international funding and conservation management initiatives affecting the lives and environment of Polynesians and people worldwide.

Environmental Planning, Management, and Policy: Read More [+]

Objectives & Outcomes

Course Objectives:
1. To provide overview of the state of environment planning, management, and policy, as well as an understanding of current theory and practice; including western approaches and indigenous environmental management of terrestrial and marine resources.
2. To examine, Rahui, a traditional Polynesian marine conservation practice, through interaction with local communities that use it, and the French Polynesian division of the Pew Charitable Trust.
3. To learn about EU, Pacific-wide and international funding and conservation management initiatives affecting the lives and environment of Polynesians.

Student Learning Outcomes:
1. Students will be able to identify, interpret, and communicate sustainability ideas, needs and programs to others in different cultural contexts and multilingual societies, demonstrating effective scientific communication skills through development and delivery of oral presentations and written reports and case studies.
2. Students will be able to articulate the state of environment planning, management, and policy, as well as an understanding of current theory and practice; including western approaches and indigenous environmental management of terrestrial and marine resources.
3. Students will be able to interpret elements of modern marine conservation practice and how different agencies are necessary for effective action.
4. Students will be able to evaluate effectiveness of EU, Pacific-wide and international funding and conservation management initiatives affecting the lives and environment of local peoples.

Hours & Format

Fall and/or spring: 3 weeks - 15 hours of lecture and 15 hours of fieldwork per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Environmental Planning, Management, and Policy: Read Less [-]
ESPM 109E Data Science, Communication and Professionalism 3 Units
Terms offered: Prior to 2007
The course will provide the fundamentals of data science across all disciplines and put them into practice on a project relevant to Island Sustainability. Exercises and group projects will hone oral, written, physical, and multimedia communication skills, with an emphasis on communicating for collaboration and outreach. Professional and ethical behavior will be emphasized in the context of Island Sustainability. Instruction will be primarily related to lecture material but will also cover issues related to conducting fieldwork, interacting with local/host communities, etc.

Objectives & Outcomes
Course Objectives: 1. To understand the fundamentals of data science across all disciplines and put them into practice on a project relevant to Island Sustainability.
2. To develop oral, written, physical, and multimedia communication skills, with an emphasis on communicating for collaboration and outreach.
3. To understand and practice professional and ethical behavior in the context of Island Sustainability.

Student Learning Outcomes: 1. Students will be able to identify, interpret, and communicate sustainability ideas, needs and programs to others in different cultural contexts and multilingual societies, demonstrating effective scientific communication skills through development and delivery of oral presentations and written reports and case studies.
2. Students will be able to articulate the state of environment planning, management, and policy, as well as an understanding of current theory and practice; including western approaches and indigenous environmental management of terrestrial and marine resources.
3. Students will be able to interpret elements of modern marine conservation practice and how different agencies are necessary for effective action.
4. Students will be able to evaluate effectiveness of EU, Pacific-wide and international funding and conservation management initiatives affecting the lives and environment of local peoples.

Hours & Format
Fall and/or spring: 3 weeks - 15 hours of lecture and 5 hours of fieldwork per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternate method of final assessment during regularly scheduled final exam group (e.g., presentation, final project, etc.).

ESPM 110 Primate Ecology 4 Units
Terms offered: Spring 2011, Spring 2010, Spring 2008
This course examines the comparative ecology of sympatric primate species in forests of Central and South America, Africa, and Southeast Asia. In addition to primate ecology, students will master comparative information on the three main tropical forest regions of the world and examine the impact of selective logging on primate densities and diversities in each area.

Objectives & Outcomes
Course Objectives: Develop an understanding of natural factors of the environment that are fundamental to ecosystem management, land use planning and common approaches for their assessment and analysis of their relationships to one another.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Milton

ESPM C110A Ecological Analysis 4 Units
Terms offered: Fall 2022, Fall 2021
This course focuses on natural factors of the environment that are fundamental to ecosystem management, land use planning and landscape design and their relationships to one another in different terrestrial ecosystems, from predominantly natural to predominantly anthropogenic. Lectures explore the key concepts on ecosystem structure, function and dynamics and discuss different types of ecological data, their interpretation and visualization that can aid in landscape research, planning and design workflow. Laboratory sections advance lecture topics by providing hands-on training in common types of ecosystem analyses using quantitative methods and geospatial tools.

Objectives & Outcomes
Course Objectives: Develop an understanding of natural factors of the environment that are fundamental to ecosystem management, landscape design and land use planning and common approaches for their assessment and analysis of their relationships to one another.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

ESPM 111 Ecosystem Ecology 4 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
This course will develop principles of ecosystems ecology, emphasizing terrestrial ecosystems, and will consider how these principles apply to ecosystem recovery and to regional and global fluxes of carbon and nutrients.
Ecosystem Ecology: Read More [+]

Rules & Requirements
Prerequisites: Biology 1B

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Baldocchi, Silver

Formerly known as: C111, Integrative Biology C155

ESPM 112 Microbial Ecology 3 Units
Terms offered: Spring 2023, Spring 2021, Spring 2020
Introduction to the ecology of microorganisms. Topics include the ecology and evolution of microbes and their relationship with each other and the environment. The role and function of microbes in several ecosystems is also discussed.
Microbial Ecology: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A and Biology 1B; Molecular and Cell Biology 102 is recommended

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Almeida, Banfield

Formerly known as: C111, Integrative Biology C155

ESPM 112L Microbial Metagenomic Data Analysis Lab 1 Unit
Terms offered: Spring 2023, Spring 2021, Spring 2020
We will teach students how to perform genome-resolved metagenomics. We will start with raw data in the form of DNA sequencing reads, assemble the data, reconstruct genomes for coexisting organisms, evaluate overall community composition (which organisms are present and at what abundance levels), predict metabolic capacities, calculate growth rates, and investigate changes in the community over time. Working in pairs, the students will analyze real, unpublished data, identify an interesting question and investigate it. Evaluation is based on a final presentation of research findings.
Microbial Metagenomic Data Analysis Lab: Read More [+]

Rules & Requirements
Prerequisites: Concurrent enrollment in Environmental Science Policy and Management 112 will be required for enrollment in Environmental Science Policy and Management 112L. Biology 1A and Biology 1B; Molecular and Cell Biology 102 is recommended

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternate method of final assessment during regularly scheduled final exam group (e.g., presentation, final project, etc.).
Instructors: Almeida, Banfield

Insect Ecology: Read Less [-]

ESPM 113 Insect Ecology 3 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
Ecology of insects: interactions with the physical environment; structure and functioning of insect populations and communities; behavioral ecology of predator-prey interactions; plant-insect interactions; social insects; pollination biology; applied insect ecology.
Insect Ecology: Read More [+]

Rules & Requirements
Prerequisites: Biology 1B or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Mills

Insect Ecology: Read Less [-]
**ESPM 114 Wildlife Ecology 3 Units**
Terms offered: Spring 2023, Spring 2022, Spring 2021
Introduction to wildlife ecology and its relationship to management programs. Includes population, community, and ecosystem levels of organization, followed by selected case studies.
Wildlife Ecology: Read More [+]

**Rules & Requirements**
Prerequisites: Upper division or graduate standing

**Hours & Format**
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week
Summer: 8 weeks - 6.5 hours of lecture and 2 hours of discussion per week

**Additional Details**
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Brashares

Wildlife Ecology: Read Less [-]

**ESPM 115B Biology of Aquatic Insects 2 Units**
Terms offered: Fall 2011, Fall 2009, Spring 2009
Identification and ecology of aquatic insects, including their role as indicators of environmental quality.
Biology of Aquatic Insects: Read More [+]

**Rules & Requirements**
Prerequisites: Introductory course in a biological science

**Hours & Format**
Fall and/or spring: 15 weeks - 2 hours of lecture per week

**Additional Details**
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Resh

Biology of Aquatic Insects: Read Less [-]

**ESPM 115C Fish Ecology 3 Units**
Terms offered: Fall 2011, Fall 2010, Fall 2009
Introduction to fish ecology, with particular emphasis on the identification and ecology of California’s inland fishes. This course will expose students to the diversity of fishes found in California, emphasizing the physical (e.g., temperature, flow), biotic (e.g., predation, competition), and human-related (e.g., dams, fisheries) factors that affect the distribution, diversity, and abundance of these fishes.
Fish Ecology: Read More [+]

**Rules & Requirements**
Prerequisites: Introductory course in biological science; upper division or graduate standing

**Hours & Format**
Fall and/or spring: 15 weeks - 2 hours of lecture, 1 hour of fieldwork, and 3 hours of laboratory per week

**Additional Details**
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Carlson

Fish Ecology: Read Less [-]

**ESPM C115A Freshwater Ecology 3 Units**
Terms offered: Spring 2023, Spring 2022, Spring 2021
Lakes, rivers, wetlands, and estuaries are biologically rich, dynamic, and among the most vital and the most vulnerable of Earth’s ecosystems. Lectures will introduce general topics including the natural history of freshwater biota and habitats, ecological interactions, and ecosystem linkages and dynamics. Broad principles will be illustrated with results from selected recent research publications. Factors affecting resilience or vulnerability of freshwater ecosystems to change will be examined. Course requirements: two exams and a short synthesis paper projecting the future states of a freshwater or estuarine ecosystem of the student’s choice under plausible scenarios of local, regional, or global change.
Freshwater Ecology: Read More [+]

**Hours & Format**
Fall and/or spring: 15 weeks - 2 hours of lecture and 2 hours of laboratory per week

**Additional Details**
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Power, Carlson, Ruhi
Formerly known as: Integrative Biology 171
Also listed as: INTEGBI C171
Freshwater Ecology: Read Less [-]
ESPM C115C Fish Ecology 3 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
Introduction to fish ecology, with particular emphasis on the identification and ecology of California's inland fishes. This course will expose students to the diversity of fishes found in California, emphasizing the physical (e.g., temperature, flow), biotic (e.g., predation, competition), and human-related (e.g., dams, fisheries) factors that affect the distribution, diversity, and abundance of these fishes.

Fish Ecology: Read More [+]

Rules & Requirements
Prerequisites: Introductory course in biological science; upper division or graduate standing

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Carlson
Also listed as: INTEGBI C176L

ESPM 116B Grassland and Woodland Ecology 4 Units
Terms offered: Spring 2023, Fall 2021, Fall 2020
An introduction to the ecology of selected grasslands, woodlands, and shrublands in the western U.S. through a biogeographical survey of rangeland ecosystems. Selected plant communities and their response to management, climate, and environmental factors, and the effects of fire, grazing, and direct manipulation on ecological structure and function. Includes an introduction to rangeland plants.

Grassland and Woodland Ecology: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Huntsinger

ESPM 116C Tropical Forest Ecology 3 Units
Terms offered: Spring 2011, Spring 2009, Spring 2008
Introduction to the ecology of terrestrial tropical ecosystems, with particular emphasis on neotropical forests. Explores unique aspects of tropical ecosystems, especially nutrient cycles, net primary productivity, biological diversity, forest structure and dynamics, disturbance ecology, and the natural history of key forest organisms. Basic ecology is integrated with discussion of human disturbances, restoration of tropical ecosystems, and the global importance of tropical forests.

Tropical Forest Ecology: Read More [+]

Rules & Requirements
Prerequisites: One course in ecology and one course in chemistry or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Silver

ESPM 117 Urban Garden Ecosystems 4 Units
Terms offered: Summer 2023 Second 6 Week Session, Summer 2022 Second 6 Week Session, Summer 2019 First 6 Week Session
An ecosystem approach to the study of urban gardens with an organic perspective. Topics include fundamentals of horticulture, soil properties and fertility, pest and disease management, and food preservation. Laboratories include methods in garden design, plant propagation, compost technique, soil preparation, irrigation systems, pest management, individual or group projects, demonstrations, and discussions. Enrollment may be limited.

Urban Garden Ecosystems: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week
Summer: 6 weeks - 6.5 hours of lecture and 6 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Altieri
ESPM 118 Agricultural Ecology 4 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
Examines in a holistic framework fundamental biological, technical, socio-economic, and political processes that govern agroecosystem productivity and stability. Management techniques and farming systems' designs that sustain long term production are emphasized. One Saturday field trip and one optional field trip.
Agricultural Ecology: Read More [+]

Rules & Requirements

Prerequisites: Consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of laboratory per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Alternate method of final assessment during regularly scheduled final exam group (e.g., presentation, final project, etc.).

Instructors: Altieri, Bowles

Agricultural Ecology: Read Less [-]

ESPM 119 Chemical Ecology 2 Units
Terms offered: Fall 2015, Fall 2014, Fall 2013
Plant toxins and their effects on animals, hormonal interactions between plants and animals, feeding preferences, animal pheromones, and defense substances, biochemical interactions between higher plants, and phytoalexins and phytotoxins.
Chemical Ecology: Read More [+]

Rules & Requirements

Prerequisites: Introductory courses in organic chemistry and biology or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Kubo

Chemical Ecology: Read Less [-]

ESPM 120 Science of Soils 3 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
This course will introduce students to the study and management of soils as natural bodies, as media for plant growth and as integral components of terrestrial ecosystems. It will present basic concepts of soil science including: soil formation and classification, the physical, chemical, and biological properties of soils, the role of soil in supplying water and nutrients to plants and soil organisms, as well as applications of soil concepts in farming or engineering. The course will also introduce the relationships of soils to environmental problems.
Science of Soils: Read More [+]

Rules & Requirements

Prerequisites: Chemistry 1A, 3A

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Ammundson, Pallud

Science of Soils: Read Less [-]

ESPM 121 Development and Classification of Soils 3 Units
Terms offered: Fall 2021, Fall 2019, Spring 2015
Development, morphology, and classification of soils as related to geology, environmental factors, and time. Soils as functioning parts of ecosystems; use of soils in archeological and paleoclimatic studies; anthropogenic effects on soil ecosystems.
Development and Classification of Soils: Read More [+]

Rules & Requirements

Prerequisites: Earth and Planetary Sciences 100A-100B, and Chemistry 1A, 3A recommended

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Amundson

Development and Classification of Soils: Read Less [-]
ESPM 122 Field Study of Soil Development 1 Unit
Terms offered: Spring 2015, Spring 2009, Spring 2006
Five day-long Saturday field trips to locations in central California. The field study of soil development and morphology. Methods of soil morphological descriptions; study of factors controlling soil development; relationship of soil morphology to land use; quaternary geology of central California; use of soils in dating landscapes.
Field Study of Soil Development: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of fieldwork per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Instructor: Amundson

Gender and Environment:
Read Less [-]

ESPM C124 Gender and Environment 4 Units
Terms offered: Spring 2023, Fall 2022
This course examines the centrality of gender and intersectionality in understanding nature-society relations across time and space. During the first half of the semester, students will become familiar with key feminist theoretical approaches to studying environmental problems, including ecofeminism, feminist environmentalism, feminist critiques of science, feminist political ecology, and queer and more-than-human ecologies. In the remainder of the semester, students will apply the theories learned to explore contemporary feminist environmental movements and analyze key topics, such as resource politics, pollution and toxins, environmental and reproductive justice, climate change, and the ethics of care.
Gender and Environment: Read More [+]

Objectives & Outcomes
Student Learning Outcomes: Upon taking this course, students will be able to: 1) explain different approaches to theorizing the gender-environment nexus; and 2) apply theoretical and conceptual tools to engage with, reflect on, and critique contemporary local and global environmental issues from an intersectional feminist perspective.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Gillespie
Also listed as: GEOG C148/INTEGBI C166
Biogeography: Read Less [-]

ESPM C125 Biogeography 4 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
The course will provide a historical background for the field of biogeography and the ecological foundations needed to understand the distribution and abundance of species and their changes over time. It will also discuss developing technologies (including genomic tools and environmental models) together with the availability of big data and increasingly sophisticated analytical tools to examine the relevance of the field to global change biology, conservation, and invasion biology, as well as sustainable food systems and ecosystem services.
Biogeography: Read More [+]

Rules & Requirements
Prerequisites: BIO 1B

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate
Grading/Final exam status: Letter grade. Alternate method of final assessment during regularly scheduled final exam group (e.g., presentation, final project, etc.).
Instructor: Chung

Animal Behavior:
Read Less [-]

ESPM C126 Animal Behavior 4 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
An introduction to comparative animal behavior and behavioral physiology in an evolutionary context, including but not limited to analysis of behavior, genetics and development, learning, aggression, reproduction, adaptiveness, and physiological substrates.
Animal Behavior: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A, 1B, or Environmental Science, Policy, and Management 140. Molecular and Cell Biology 140 and C160 recommended
Credit Restrictions: Students will receive no credit for 144 after taking C144, 145, 146LF, or Psychology C115B.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Lacey, Caldwell, Bentley, Elias
Also listed as: INTEGBI C144

Chemistry of Soils: Read Less [-]  

**ESPM C129 Biometeorology 3 Units**

Terms offered: Fall 2022, Fall 2020, Fall 2018

This course describes how the physical environment (light, wind, temperature, humidity) of plants and soil affects the physiological status of plants and how plants affect their physical environment. Using experimental data and theory, it examines physical, biological, and chemical processes affecting transfer of momentum, energy, and material (water, CO2, atmospheric trace gases) between vegetation and the atmosphere. Plant biometeorology instrumentation and measurements are also discussed.

Biometeorology: Read More [+]  

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture per week  

**Additional Details**

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate  

Grading/Final exam status: Letter grade. Alternative to final exam.

**ESPM 130 Treaty Rights and Food Fights: The Native American Food Sovereignty Movement 4 Units**

Terms offered: Fall 2000, Fall 1999, Fall 1997

This course will introduce students to the Native American food sovereignty movement in North America, addressing issues of cultural and physical health caused by disruptions to traditional food systems; the work of Native chefs to employ gastrodiplomacy through their cooking and help communities decolonize their diets; farmers and seed keepers’ work toward seed sovereignty; efforts to combat climate change, environmental contamination, and extractive industries to preserve food systems; fights to maintain treaty rights that ensure access to land and foods; and tribal communities’ work to develop food policies to support these issues.

Treaty Rights and Food Fights: The Native American Food Sovereignty Movement: Read More [+]  

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week  

**Additional Details**

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate  

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructor: Hoover

Also listed as:  

Treaty Rights and Food Fights: The Native American Food Sovereignty Movement: Read Less [-]
ESPM 130A Forest Hydrology 4 Units
Terms offered: Spring 2019, Spring 2018
This course introduces the fundamental physical principles that are necessary to understand
the distribution and dynamics of water near the Earth's surface. A quantitative approach will provide
mathematical descriptions of hydrological phenomena that will be used for a variety of hydrological
applications to river flow hydraulics, flood frequency analysis, evapotranspiration from terrestrial
ecosystems, groundwater flow, and ecohydrological dynamics. The course will provide an introduction to
hydrological processes and data analysis. The purpose of the laboratory is to illustrate in an experimental
setting the principles and applications introduced in lecture.

Rules & Requirements
Prerequisites: Chemistry 1A, Mathematics 1A-1B, Physics 7A, or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: D’Odorico

Forest Hydrology: Read Less [-]

ESPM C130 Terrestrial Hydrology 4 Units
Terms offered: Fall 2022, Spring 2021, Spring 2020
A quantitative introduction to the hydrology of the terrestrial environment including lower atmosphere, watersheds, lakes, and streams. All aspects of the hydrologic cycle, including precipitation, infiltration, evapotranspiration, overland flow, streamflow, and groundwater flow. Chemistry and dating of groundwater and surface water. Development of quantitative insights through problem solving and use of simple models. This course requires one field experiment and several group computer lab assignments.

Rules & Requirements
Prerequisites: CHEM 1A, MATH 1A, MATH 1B, and PHYSICS 7A; or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Larsen
Also listed as: CIV ENG C103N/GEOG C136

Terrestrial Hydrology: Read Less [-]
ESPM 131 Soil Microbiology and Biogeochemistry 4 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
Introduction to the organisms that live in the soil and their activities in the soil ecosystem. Lectures will cover the physical and chemical properties of soils and the soil as a habitat for microorganisms, the diversity and ecology of soil microorganisms, and their activity in the context of biogeochemical cycling, plant-microbe interactions, global environmental change and bioremediation. Goals: To gain fundamental knowledge of the occurrence and activities of soil microorganisms and their influence on soil productivity and environmental quality as well as potential applications of soil microbiology.

Soil Microbiology and Biogeochemistry: Read More [+]

Objectives & Outcomes
Course Objectives: The overall objective of the class is to provide an overview of the soil as a habitat for microorganisms, and to introduce students to the diversity, ecology and activity of soil microorganisms in the context of biogeochemical cycling, plant-microbe interactions, global environmental change and bioremediation.

Rules & Requirements
Prerequisites: Biology 1A-1B

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructors: Pallud, Brodie

Soil Microbiology and Biogeochemistry: Read Less [-]

ESPM 132 Spider Biology 4 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
Covers topics ranging from mythological ideas about spiders and their importance in traditional cultures and folklore, to diversity patterns, ecology, behavior, and general biology of spiders. In the laboratory section, students learn to identify local spiders and to prepare a collection.

Spider Biology: Read More [+]

Rules & Requirements
Prerequisites: Biology 1A-1B

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Gillespie

Spider Biology: Read Less [-]

ESPM C133 Water Resources and the Environment 3 Units
Terms offered: Spring 2018, Spring 2016
Distribution, dynamics, and use of water resources in the global environment. Water scarcity, water rights, and water wars. The terrestrial hydrologic cycle. Contemporary environmental issues in water resource management, including droughts, floods, saltwater intrusion, water contamination and remediation, river restoration, hydraulic fracturing, dams, and engineering of waterways. The role of water in ecosystem processes and geomorphology. How water resources are measured and monitored. Basic water resource calculations. Effects of climate change on water quantity, quality, and timing.

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Bruns

ESPM C135A Migration in the Contemporary World: California and Beyond 4 Units
Terms offered: Fall 2019
This course is designed to allow students to delve into the topic of migration in the contemporary world. Readings, discussions, and assignments will focus on 1) past and present immigration to California and beyond 2) the impact of immigration in relation to labor, health and the environment and 3) contemporary immigrant activism and organizing. A primary goal of the course is to utilize sociocultural theories to describe the experiences of immigrants in the U.S. Students will communicate what they are learning through discussions, weekly reading reflection, academic papers, and an Op-Ed. A variety of teaching methods will be employed including lectures, discussions and guest presentations (authors and individuals featured in books).
Migration in the Contemporary World: California and Beyond: Read More [+]
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Instructor: O’Rourke
Sustainable Industry: Read Less [-]

ESPM 136 Sustainable Industry 4 Units
Terms offered: Fall 2022, Fall 2021, Spring 2003
Academics, policy-makers, workers, communities, consumers, and business leaders are increasingly concerned about the environmental and social impacts of industry. A range of fields have emerged to respond to these concerns, seeking to redesign and re-align industrial systems and activities to be more ecologically and socially sound. This course explores internal firm capabilities (core functions, practices, technologies) and external pressures (governments, NGOs) to advance more sustainable industry. The course examines emerging production and consumption systems, introduces several methods for mapping and measuring the environmental and social impacts of industry, and evaluates recent strategies to advance more sustainable production.
Sustainable Industry: Read More [+]
Rules & Requirements
Credit Restrictions: Students will receive no credit for ESPM 136 after completing ESPM 136. A deficient grade in ESPM 136 may be removed by taking ESPM 136.
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: O’Rourke

ESPM 137 Landscape Ecology 3 Units
Terms offered: Fall 2021, Fall 2020, Fall 2019
This course will cover broad topics in landscape ecology with the goal of answering the core questions of how patterns develop on landscapes, how these patterns relate to biotic and abiotic processes, and how these patterns and processes change through time. Lab exercises will focus on practical aspects of landscape ecological analysis using modern tools like remote sensing, GIS, population modeling, and landscape genetics.
Landscape Ecology: Read More [+]
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Wang
Landscape Ecology: Read Less [-]
ESPM C138 Introduction to Comparative Virology 4 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
This course will provide a comparative overview of virus life cycles and strategies viruses use to infect and replicate in hosts. We will discuss virus structure and classification and the molecular basis of viral reproduction, evolution, assembly, and virus-host interactions. Common features used during virus replication and host cellular responses to infection will be covered. Topics also included are common and emerging virus diseases, their control, and factors affecting their spread.

Introduction to Comparative Virology: Read More [+]

Rules & Requirements

Prerequisites: Introductory chemistry (Chemistry 1A or 3A-3B or equivalent) and introductory biology (Biology 1A, 1AL, and 1B or equivalent) and general biochemistry (Molecular and Cell Biology C100A or equivalent--preferably completed but may be taken concurrently)

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Glaunsinger

ESPM 139A Genetics of Amphibian Declines CURE 3 Units
Terms offered: Fall 2022
The Genetics of Amphibian Declines Lab is a course-based research experience (CURE) where students conduct team-based original research projects. Contemporary loss of amphibian biodiversity is due in large part to the impacts of emerging infectious disease. We will study these pathogens of amphibians in local Bay Area field sites. Students will be guided through all stages of the scientific research process from reading the primary literature and forming hypotheses to designing experiments, collecting and analyzing data, and presenting results. Students will learn collaborative research skills and contribute new biological knowledge to the field of amphibian disease ecology.

Genetics of Amphibian Declines CURE: Read More [+]

Rules & Requirements

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Rosenblum

ESPM 140 General Entomology 4 Units
Terms offered: Spring 2023, Spring 2022, Spring 2020
A comprehensive course on the biology of terrestrial and aquatic insects, their morphology, physiology, behavior, taxonomy, and ecology. The lab covers the identification and classification of insect orders and common families, insect collecting and sampling methods, and includes a required insect collection project. Course includes an overnight field trip to a research property.

General Entomology: Read More [+]

Rules & Requirements

Prerequisites: Introductory course in a biological science

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 6 hours of laboratory per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Will
General Entomology: Read Less [-]
ESPM 141 Development of Taxonomic Identification Keys and Natural Language Descriptions 2 Units
Terms offered: Prior to 2007
Tools for identification of organisms to species or higher-level taxonomic groups are critically needed. This course will allow students to learn both the theoretical basis of and practical skills for building traditional dichotomous keys and various types of interactive keys. Emphasis will be on learning to build a web-based interactive key and developing natural language descriptions through students' individual projects. Students can train on the Microptics Digital XLT imaging system and learn to use Lucid and Lucid Phoenix software. Other Internet identification tools will also be surveyed and discussed. Each student will produce an online key as a project.

Development of Taxonomic Identification Keys and Natural Language Descriptions: Read More [+]

Rules & Requirements
Prerequisites: Prior knowledge of focus group for project
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Instructor: Will

ESPM 142 Insect Behavior 4 or 3 Units
Terms offered: Fall 2022, Fall 2020, Fall 2019
Insects display an incredibly rich array of behaviors, including extravagant displays, rituals, deception, sociality, and slavery. In some cases, these behaviors are innate, but in other cases individual insects can actively learn and modify their future behaviors based on real-life experiences. This course will focus on the development, structure, and function of insect behaviors, using examples from classic and recent publications. We will examine the evolution of insect behavior, how these behaviors play a role in the ecology of the organisms that express them, and explore various modes of communication that allow insects to judge their environment and respond appropriately.

Insect Behavior: Read More [+]

Rules & Requirements
Prerequisites: High school biology course or Bio1B, Biology 1A and 1B

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week, 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Tsutsui

ESPM 149 Bodies, Difference, and the Environment 4 Units
Terms offered: Not yet offered
This course centers the body as a key analytic to understanding the more-than-human world. The sick, injured, and disabled body is a central and reoccurring theme within environmental scholarship, as is its opposite, the healthy, robust, and fit body. In this class we will explore the sociopolitical and ethical relationships between altered bodily capacity, vulnerability, dependency, and systems of violence to nature and people, while attending to the sometimes troubling ways conversations around ecological health and fitness are informed by social inequality.

Bodies, Difference, and the Environment: Read More [+]

Objectives & Outcomes

Course Objectives:
1.) To read critically, carefully, generously, creatively, and playfully;
2.) To develop questions of and from course texts;
3.) To develop an understanding of identity formation, intersectionality, and social inequality
4.) To identify the ways in which cultural beliefs about “nature” have been shaped by categories of human difference
5.) To recognize that perceptions of “nature” have social, political, and economic effects that in turn impact our bodies
6.) To discuss the methods that have been used to critique, resist, and challenge traditional Western understandings of “nature.”

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Taylor

ESPM 150 Special Topics in Environmental Science, Policy, and Management 2 - 4 Units
Terms offered: Spring 2023, Fall 2022, Spring 2022
Special topics in Environmental Science, Policy, and Management. Topics may vary from semester to semester. Special Topics in Environmental Science, Policy, and Management: Read More [+]
Rules & Requirements
Repeat rules: Course may be repeated for credit when topic changes.

Hours & Format
Fall and/or spring: 15 weeks - 2-3 hours of lecture and 0-1 hours of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Society, Environment, and Culture 4 Units
Terms offered: Spring 2020, Spring 2019, Spring 2018
Society and the natural environment are vitally linked in a number of ways. Environmental problems such as pollution and natural resource depletion are not only problems for society, affecting the way we live our lives; they are also problems of society—the result of patterns of social organization and social practices. In this course we will explore some various issues, concepts, and processes pertaining to the diverse approaches to understanding the relationship between human society, culture, and the environment. Society, Environment, and Culture: Read More [+]
Rules & Requirements
Prerequisites: Upper division standing

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Mascarenhas

ESPM 151 Society, Environment, and Culture

ESPM 152 Global Change Biology 3 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
The course will focus on understanding how anthropogenic changes to the global environment (e.g., climate change, habitat destruction, global trade) impact organisms. We will evaluate responses to global change in a wide diversity of organisms (from microbes to mammals) and ecosystems (from arctic to temperate to tropical). We will also explore conservation and mitigation strategies in the face of global change. Discussions will draw on recent primary research and case studies. Global Change Biology: Read More [+]
Rules & Requirements
Prerequisites: An introductory course in biological science; upper division or graduate standing

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week
Summer: 8 weeks - 4.5 hours of lecture and 1.5 hours of discussion per week

Additional Details

Global Change Biology: Read Less [-]
ESPM C153 Ecology 3 Units
Terms offered: Spring 2023, Spring 2022
Ecology is a scientific discipline that focuses on the interactions between organisms and their environment. This class will provide an overview of core concepts and applications, and will also provide practice with writing, small-group work, critical thinking, and data analysis.
The class will specifically cover principles of population ecology, illustrated with examples from marine, freshwater, and terrestrial habitats. It will consider the roles of physical and biological processes in structuring natural communities. Observational, experimental, and theoretical approaches will be discussed. Topics will include quantitative approaches relying on algebra, visual analysis of graphs, and elementary calculus.

Ecology: Read More [+]

Rules & Requirements
Prerequisites: Biology 1B or consent of instructor
Credit Restrictions: Students will receive no credit for INTEGBI C153 after completing ESPM 153, or INTEGBI C153. A deficient grade in INTEGBI C153 may be removed by taking ESPM 153, or INTEGBI C153.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

ESPM 157 Data Science in Global Change Ecology 4 Units

Terms offered: Fall 2022, Fall 2021, Fall 2020

Many of the greatest challenges we face today come from understanding and interacting with the natural world: from global climate change to the sudden collapse of fisheries and forests, from the spread of disease and invasive species to the unknown wealth of medical, cultural, and technological value we derive from nature. Advances in satellites and micro-sensors, computation, informatics and the Internet have made available unprecedented amounts of data about the natural world, and with it, new challenges of sifting, processing and synthesizing large and diverse sources of information. In this course, students will learn and apply fundamental computing, statistics and modeling concepts to a series of real-world ecological and environment.

Rules & Requirements

Prerequisites: No prior knowledge is assumed or expected, though prior exposure to programming, particularly from the Foundations of Data Science (COMPSCI C8 / INFO C8 / STAT C8), will be helpful.

Hours & Format

Fall and/or spring: 15 weeks - 4 hours of laboratory per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructor: Boettiger

Data Science in Global Change Ecology: Read Less [-]

ESPM 158 Biodiversity Conservation in Working Landscapes 4 Units

Terms offered: Spring 2017, Spring 2016, Spring 2015

Most of the world's lands and seas occur outside of protected areas, so this course examines biodiversity conservation in “working landscapes” like farms, ranches, and urban areas. Students will study fundamental concepts in ecology and conservation biology, and evaluate case studies to assess how conservation approaches have evolved and which are working. Students will gain skills in evaluating and summarizing scientific literature, and in-depth knowledge of conservation in practice.

Rules & Requirements

Prerequisites: Biology IB is required; Environmental Science Policy and Management C103/Integrative Biology C156 or other ecology course desired

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of laboratory per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructor: Kremen

Biodiversity Conservation in Working Landscapes: Read Less [-]
**ESPM 160AC American Environmental and Cultural History 4 Units**

Terms offered: Spring 2021, Summer 2019 Second 6 Week Session, Summer 2018 Second 6 Week Session

History of the American environment and the ways in which different cultural groups have perceived, used, managed, and conserved it from colonial times to the present. Cultures include American Indians and European and African Americans. Natural resources development includes gathering-hunting-fishing; farming, mining, ranching, forestry, and urbanization. Changes in attitudes and behaviors toward nature and past and present conservation and environmental movements are also examined. Readings are from primary source documents supplemented by recent essays.

**Rules & Requirements**

**Credit Restrictions:** Students will receive no credit for Environ Sci, Policy, and Management ESPM 160AC/HIST120AC after taking Environ Sci, Policy and Management ESPM 160AC

**Requirements this course satisfies:** Satisfies the American Cultures requirement

**Hours & Format**

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week

**Summer:** 6 weeks - 7.5 hours of lecture and 3 hours of discussion per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Grading/Final exam status:** Letter grade. Alternative to final exam.

Environmental Philosophy and Ethics: Read Less [-]
**ESPM 161A Thinking With Animals 4 Units**

Terms offered: Fall 2022

Animals have long been the subject of human inquiry. As historian Harriet Ritvo writes, “Learned attention to the animal is far from new.” However, in recent decades social movements, artists, and scholars have focused more frequently, and perhaps more urgently, on what Derrida called “the question of the animal.” In this course we will look to how centering the animal challenges human exceptionalism, anthropocentrism, and traditional critical discourse. Tracing the ways work in animal studies denaturalizes hierarchical taxonomies, defines key concepts such as human and animal, and articulates boundaries between species, this course will follow the various political, relational, ethical and imaginative implications of thinking with animals.

**Objectives & Outcomes**

**Course Objectives:** To be able to interrogate the taxonomies and hierarchical systems that have traditionally served to divide human from animal

To develop an understanding of the key concepts emerging from the field of animal studies

To develop questions of and from course texts;

To discuss the methods that have been used to critique, resist, and challenge traditional Western understandings of species hierarchy

To identify the ways in which cultural beliefs about “animals” are shaped by categories of human difference

To read critically, carefully, generously, creatively, and playfully;

**Hours & Format**

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Additional Details**

**Subject/Course Level:** Environ Sci, Policy, and Management/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

ESPM 162A Health, Medicine, Society and Environment 4 Units
Terms offered: Fall 2020, Fall 2019, Fall 2018
Introduces students to intersections between health, medicine, society, and environment through medical and environmental anthropology, political ecology, medical geography, and the social studies of science, technology and the natural environment. Readings, discussions, and assignments will explore the sociocultural, political economic, and environmental aspects of illness, care, disease, biomedicine, and health (in)equity.
Health, Medicine, Society and Environment: Read More [+]

Objectives & Outcomes

Course Objectives: This course will provide an overview of key theoretical and methodological approaches as well as central arguments to understand the relationships between health, medicine, society and environment. The course will lend context and highlight concepts that are important to understandings of and movements toward social and health equity.

Student Learning Outcomes: Critically assess social and health issues appearing in scholarly publications and the popular press; . Practice communicating ideas and analyses in language that can be generally understood; Work with classmates from multiple disciplines and backgrounds in order to realize the importance of multidisciplinary approaches for solving social and health inequities; Apply sociocultural, political economic, and critical theory frameworks for understanding conflicts in the realms of public health, global health, medicine, and public policy.; Demonstrate knowledge in major areas of health and society in relation to current debates in medical anthropology and cognate social sciences.; Engage with increasingly popular subfields of the medical social sciences including those on issues of health inequities, care, medical science, sickness, anguish, and resistance.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Environ Sci, Policy, and Management/ Undergraduate

Grading/Final exam status: Letter grade. Alternate method of final assessment during regularly scheduled final exam group (e.g., presentation, final project, etc.).

ESPM C170 Carbon Cycle Dynamics 3 Units
Terms offered: Fall 2021, Spring 2019, Spring 2016
The focus is the (unsolved) puzzle of the contemporary carbon cycle. Why is the concentration of atmospheric CO2 changing at the rate observed? What are the terrestrial and oceanic processes that add and remove carbon from the atmosphere? What are the carbon management strategies under discussion? How can emission protocols be verified? Students are encouraged to gain hands-on experience with the available data, and learn modeling skills to evaluate hypotheses of carbon sources and sinks.
Carbon Cycle Dynamics: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

ESPM 172 Remote Sensing of the Environment 3 Units
Terms offered: Spring 2020, Fall 2013, Spring 2010
The course will introduce junior/senior undergraduate students to the basic physical concepts of remote sensing as they relate to different earth surface processes. It will introduce students to a variety of recently developed ground, airborne, and satellite instruments and their applications to monitor and analyze environmental processes. These include active (e.g., Lidar), and passive (radiometers) sensors, optical (e.g., Landsat, MODIS), microwave (e.g., SMAP), and gravitational (e.g., GRACE) satellites.
Remote Sensing of the Environment: Read More [+]

Rules & Requirements
Credit Restrictions: Students will receive no credit for ESPM 172 after completing FOREST 102.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

ESPM 173 Introduction to Ecological Data Analysis 3 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
Introduces concepts and methods for practical analysis of data from ecology and related disciplines. Topics include data summaries, distributions, and probability; comparison of data groups using t-tests and analysis of variance; comparison of multi-factor groups using analysis of variance; evaluation of continuous relationships between variables using regression and correlation; and a glimpse at more advanced topics. In computer laboratories, students put concepts into practice and interpret results.

Introduction to Ecological Data Analysis: Read More [+]

ESPM 174A Applied Time Series Analysis for Ecology and Environmental Sciences 3 Units
Terms offered: Fall 2021, Fall 2020
In this course we will learn how to analyze time-series data using real-world examples from ecology and environmental sciences. We will study how to mathematically describe a time series, and test hypotheses about the underlying processes generating the observed patterns. We will cover univariate and multivariate state-space models, with an incursion into statistical forecasting and analyses in the frequency domain (e.g., Discrete Fast Fourier Transform).

**ESPM C176 CLIMATE JUSTICE 4 Units**

Terms offered: Fall 2022

Climate change is transforming our world in ways we are only beginning to understand, and in many ways we cannot yet imagine. The emerging theoretical and practical lenses of social and environmental justice (EJ) provide tools with which to examine and understand this new world. Using literature, media, and engaged field experiences, this course brings together the scholarship, scientific and engineering innovation, policy, literature and media, and activism around the interacting themes of climate change and social justice.

**CLIMATE JUSTICE:** Read More [+]

**Rules & Requirements**

**Credit Restrictions:** Students will receive no credit for ENE,RES C160 after completing ENE,RES 160, or ARCH 153. A deficient grade in ENE,RES C160 may be removed by taking ENE,RES 160, or ARCH 153.

**Hours & Format**

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

ESPM 177A Sustainable Water and Food Security 4 Units

Terms offered: Summer 2021 Second 6 Week Session, Summer 2020 Second 6 Week Session, Spring 2019

In this class we will study basic principles of environmental sustainability from the perspective of water and food security, and apply them to human use of land and land based resources. An analysis of major mechanisms of land degradation and of the major technological advances that are expected to burst food production worldwide will be used as the basis for a discussion on the extent to which the Earth can sustainably feed humanity.

Sustainable Water and Food Security: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of laboratory per week

Summer: 6 weeks - 7.5 hours of lecture and 2.5 hours of laboratory per week

ESPM C177 GIS and Environmental Spatial Data Analysis 4 Units

Terms offered: Spring 2017, Spring 2016, Spring 2015

This course offers an introduction to spatial data analysis. It integrates ArcGIS analysis with spatial statistical analysis for the study of pattern and process applicable to a wide variety of fields. Major topics covered include: spatial sampling, processing data with ARC Info, exploratory GIS analysis, spatial decomposition, spatial point patterns and Ripley's K function, spatial autocorrelation, geostatistics, spatially weighted regression, spatial autoregression, generalized linear models and generalized linear mixed models.

GIS and Environmental Spatial Data Analysis: Read More [+]

Rules & Requirements

Prerequisites: Requirements are course in GIS and a course in probability and statistics. We invite participation of undergraduates and graduate students from: ESPM, Landscape Architecture & Environmental Planning, City and Regional Planning, IB, Civil Engineering, Energy and Resources Group, Public Health, Earth and Planetary Science, and other campus departments or units with students interested in learning and using spatial analysis for the environment - both natural and built

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

Additional Details

ESPM C179A GC-Maker Lab I: Skills and Theory 2 Units
Terms offered: Fall 2016
In the environmental and biological sciences, one of the biggest challenges in transitioning from student to researcher is learning how to measure something without an off-the-shelf device. This course will provide the theoretical background and the practice of building a Gas Chromatograph (GC) system for environmental research. The first semester is for students who seek to develop fundamental skills in instrumental development and design. The second semester (c179b) is only open to those who have taken this first semester course and will entail the construction of a working gas chromatograph system. This class will be especially useful for students who wish to pursue research following graduation.

GC-Maker Lab I: Skills and Theory: Read More [+]

Rules & Requirements
Prerequisites: Chem 3AL, or instructor permission

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.

Also listed as: GEOG C179A

GC-Maker Lab I: Skills and Theory: Read Less [-]
ESPM C179B GC-Maker Lab II: Instrument development 4 Units
Terms offered: Spring 2017
In the environmental and biological sciences, one of the biggest challenges in transitioning from student to researcher is learning how to measure something without an off-the-shelf device. This course will involve the actual building a gas chromatograph (GC) system for environmental research. In addition, we will provide the option of building a mini datalogging sensor for measuring basic environmental parameters using the Arduino platform. This course offered in the spring semester is only open to those who have taken this first semester course (c179A), which covers the fundamental skills required to undertake this project. This class is designed for upper division undergraduates to early graduate students.

Rules & Requirements
Prerequisites: Chem 3AL, GC-Maker Lab I (fall semester)
Hours & Format
Fall and/or spring: 15 weeks - 6 hours of laboratory per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Rhew
Also listed as: GEOG C179B

ESPM C180 Air Pollution 3 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
This course is an introduction to air pollution and the chemistry of earth's atmosphere. We will focus on the fundamental natural processes controlling trace gas and aerosol concentrations in the atmosphere, and how anthropogenic activity has affected those processes at the local, regional, and global scales. Specific topics include stratospheric ozone depletion, increasing concentrations of green house gasses, smog, and changes in the oxidation capacity of the troposphere.

Rules & Requirements
Prerequisites: CHEM 1A, CHEM 1B, and PHYSICS 8A or consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Goldstein
Also listed as: CIV ENG C106/EPS C180

ESPM 181A Fire Ecology 3 Units
Terms offered: Spring 2021, Spring 2019, Spring 2018
Fundamentals of wildland fire including fire behavior modeling, fire history methods, prescribed fire techniques, fire ecology, fire management, fire in the urban-wildland intermix, wildland fire, and ecosystem sustainability. Laboratories on inventory methods, fire history, modeling of fire behavior and risk, and prescribed burning.

Rules & Requirements
Prerequisites: Consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Stephens

Fire Ecology: Read Less [-]
ESPM 182 Forest Operations Management 3 Units
Terms offered: Fall 2022, Fall 2020, Fall 2018
The purpose of the course is to provide students with basic knowledge of
how to plan for and conduct forest treatments. It is meant as a companion
to silviculture, which is the planning out and scheduling of treatments in
order to meet defined objectives in forests. As such, Forest Operations
does not focus on the reason for conducting treatments but rather how
they are done. Topics include the types of equipment that are used
in thinning, harvesting, prescribed fire, and vegetation management.
The administrative requirements involved with planning operations
(e.g. permit acquisition and contracts) are covered, as are principles of
road maintenance and road abandonment. Two weekend field trips are
required. A prescribed fire will be planned.
Rules & Requirements
Prerequisites: 105A, 105B, 105C, 105D . It is preferred that ESPM 185
is taken prior to or at the same time as ESPM 182
Hours & Format
Fall and/or spring: 10 weeks - 1 hour of lecture, 1 hour of discussion,
3.2 hours of fieldwork, and 1.6 hours of laboratory per week
Summer: 6 weeks - 3 hours of lecture, 3 hours of discussion, 6 hours of
fieldwork, and 6 hours of laboratory per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/
Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: York

ESPM 183 Forest Ecosystem Management and Planning 4 Units
Terms offered: Spring 2023, Spring 2022, Spring 2021
Introduces students to concepts and quantitative tools needed for the
sustainable management and planning of multi-use forest ecosystems.
Topics covered include: forest regulation; estimation of ecological,
economic, and social values; construction of dynamic forest models;
methods for optimal decision-making; development of forest management
plans; and ethics of natural resource management. Application to current
issues in temperate and tropical forest management are discussed.
Quantitative, analytical, and communication skills are emphasized. Oral
presentation required.
Rules & Requirements
Prerequisites: ESPM 102C or instructor permission
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of
laboratory per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/
Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: O'Hara

ESPM C183 Forest Ecosystem Management 4 Units
Terms offered: Spring 2016, Spring 2015, Spring 2014
Introduces students to concepts and quantitative tools needed for
the sustainable management of multi-use forest ecosystems. Topics
covered include: estimation of ecological, economic, and social values:
construction of dynamic forest models, methods for optimal decision-
making, and development of forest management plans. Application
to current issues in temperate and tropical forest management are
discussed. Quantitative, analytical, and communication skills are
emphasized. Oral presentation required.
Rules & Requirements
Prerequisites: ESPM 102C or instructor permission
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 3 hours of
laboratory per week
Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/
Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Potts
Also listed as: ENVECON C183
ESPM 184 Agroforestry Systems 3 Units
Terms offered: Fall 2010, Fall 2009, Fall 2008
Agroforestry principles and systems in use worldwide are examined, with emphasis on contemporary temperate agroforestry system design and management. Economic, biologic, social, and political conditions for successful agroforestry systems are analyzed. Some laboratory sessions will be field trips that will extend beyond the scheduled lab time.

Rules & Requirements
Prerequisites: Upper division standing

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Altieri

Agroforestry Systems: Read Less [-]

ESPM 185 Applied Forest Ecology 4 Units
Terms offered: Fall 2021, Fall 2020, Fall 2019
Concepts and applications of silviculture for the establishment, growth, composition, and quality of forest trees and stands. Silviculture is presented as a tool to meet multiple resource and ecosystem management objectives related to wildlife habitat, watershed resources, forest health, or timber production. Two weekend field trips will be scheduled in lieu of several laboratories.

Rules & Requirements
Prerequisites: IB 153, ESPM 102A or course in community ecology

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 4 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: O'Hara

Applied Forest Ecology: Read Less [-]

ESPM 186 Grassland and Woodland Management and Conservation 4 Units
Terms offered: Fall 2022, Spring 2022, Spring 2021
California’s woodlands, grasslands, and shrublands provide abundant environmental benefits including extensive wildlife habitat. Most is used for ranching and managed through grazing animals. Ecosystem stewardship and ecological dynamics meet in rangeland management, including new institutional arrangements for conservation and restoration, management for carbon sequestration, and Indigenous partnerships. Origins of grazing animals and methods for assessing management outcomes.

Rules & Requirements
Prerequisites: One course in ecology; upper division or graduate standing

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture, 1 hour of fieldwork, and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Suding

Grassland and Woodland Management and Conservation: Read Less [-]

ESPM 187 Restoration Ecology 4 Units
Terms offered: Spring 2014, Spring 2013, Spring 2012
This course covers ecological theories that inform the practice of ecological restoration, with particular focus on local (Bay Area) restoration and linkages with social, political, and economic factors. Laboratories focus on assessment techniques and cumulate with formulation of a restoration management plan. Laboratories will be based at the Richmond Field Station, served by campus shuttle.

Rules & Requirements
Prerequisites: One course in ecology; upper division or graduate standing

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture, 1 hour of fieldwork, and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Suding

Instructor: Barrett

Case Histories in Wildlife Management: Read Less [-]

ESPM 189A Urban Ecology and Evolution 4 Units
Terms offered: Spring 2023
This course examines the complex, coupled and heterogeneous interactions that occur among organisms, humans, and the urban environment. We will emphasize foundational concepts in urban ecology spanning the organismal, population, community, and ecosystem levels, with special focus on the role of social-ecological dynamics in shaping the emergent properties of urban biological systems. We will also discuss how such interactions lead to rapid evolutionary change in cities and discuss what that means for urban biodiversity and conservation. Finally, we will address how cities regionally and globally have similar and dissimilar properties, and how we can apply urban ecological principles to urban planning, design, conservation, wildlife manage.
Urban Ecology and Evolution: Read More [+]

Rules & Requirements
Prerequisites: Introductory Statistics Course

Hours & Format
Fall and/or spring: 15 weeks - 4 hours of lecture and 2 hours of laboratory per week

ESPM 198 Directed Group Studies for Advanced Undergraduates 1 - 3 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
Group study of special topics in environmental science, policy, and management that are not covered in depth in regular courses in the department.

Rules & Requirements
Prerequisites: Upper division standing; consent of instructor; campus and departmental restrictions apply
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1-3 hours of directed group study per week
Summer:
6 weeks - 2.5-7.5 hours of directed group study per week
8 weeks - 1.5-5.5 hours of directed group study per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

ESPM 198BC Berkeley Connect 1 Unit
Terms offered: Spring 2023, Fall 2022, Spring 2022
Berkeley Connect is a mentoring program, offered through various academic departments, that helps students build intellectual community. Over the course of a semester, enrolled students participate in regular small-group discussions facilitated by a graduate student mentor (following a faculty-directed curriculum), meet with their graduate student mentor for one-on-one academic advising, attend lectures and panel discussions featuring department faculty and alumni, and go on field trips to campus resources. Students are not required to be declared majors in order to participate.

Rules & Requirements
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

ESPM 199 Supervised Independent Study and Research 1 - 4 Units
Terms offered: Fall 2021, Spring 2021, Fall 2020
Enrollment restrictions apply; see the Courses and Curricula section of this catalog. Supervised independent study and research specific to aspects of environmental science, policy, and management.

Rules & Requirements
Prerequisites: Upper division standing; campus and departmental restrictions apply
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week
Summer:
6 weeks - 1-5 hours of independent study per week
8 weeks - 1-4 hours of independent study per week

Additional Details
Subject/Course Level: Environ Sci, Policy, and Management/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
