Landscape Architecture and Environmental Planning

Overview

Our mission is to engage in research and teaching that will inspire and inform our profession through innovative landscape design and planning. We emphasize critical thinking about the ecological, social, cultural, and visual performance of landscape spaces and systems. Our research, practice, and curricula set high standards for analytical ability, creativity, aesthetics, and practical understanding. As a result, our graduates are prepared to serve as national and international landscape design and planning leaders, building thriving communities in a world of rapid political, economic, and environmental change.

The department faculty engages in research and teaching across a range of landscape scales from downtown plazas to wilderness areas to build inclusive, vibrant cities, construct resilient metropolitan ecologies, restore degraded ecosystems, and meet the challenge of climate change. The department particularly emphasizes the application of social and ecological science in the design and planning process, with the intent of building landscapes that responsibly serve both society and the environment in the long term.

The Department of Landscape Architecture and Environmental Planning (LAEP) offers a Bachelor of Arts degree (BA) in Landscape Architecture. This program offers both a liberal arts oriented and preprofessional education. The Department of Landscape Architecture and Environmental Planning offers a minor in the History and Theory of Landscape Architecture and Environmental Planning. The department also cosponsors the Sustainable Design Minor with the Department of Architecture.

At the graduate level, the department offers a Master of Landscape Architecture, (an accredited professional degree requiring two or three years, depending on the student’s incoming background), with the option to specialize in Environmental Planning, and a PhD in Landscape Architecture and Environmental Planning.

Understanding the need for professionals with the knowledge and skills of more than one discipline, the Department of Landscape Architecture and Environmental Planning offers concurrent master’s degree programs with the other departments in the College of Environmental Design. See the links below for further information:

- Building and Site Design/Ecological Factors (MLA/MArch)
- Environmental Planning (MLA/MCP)
- Urban Design (MLA/MCP)

For questions about any of the concurrent programs, contact the LAEP Graduate Office at laepgrad@berkeley.edu.

Licensure and Accreditation

The BA and MLA degrees are certified by the State of California and counts as part of the education/experience requirement of the Uniform National Examination (U.N.E.) as well as for the Landscape Architects Registration Examination (L.A.R.E.) for licensure. Visit the Landscape Architects Technical Committee (http://www.latc.ca.gov/) and the Council of Landscape Architectural Registration Boards (https://www.clarb.org/) for more information about licensure in California. The MLA degree is accredited by the Landscape Architecture Accreditation Board and under California regulations requires only two years of apprenticeship under a licensed landscape architect to qualify for the U.N.E. and L.A.R.E.
LD ARCH 1 Drawing a Green Future: Fundamentals of Visual Representation and Creativity 4 Units
Terms offered: Summer 2024 8 Week Session, Spring 2024, Summer 2023 8 Week Session
This introductory studio course is open to all undergraduate students in the University, who want to investigate the process of drawing as a method to learn how to perceive, observe and represent the environment. This studio will encourage visual thinking as a formative tool for problem solving that provides a means to envision a sustainable future. The focus will be on the critical coordination between hand, mind and idea.
Drawing a Green Future: Fundamentals of Visual Representation and Creativity: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 6 hours of studio per week
Summer: 8 weeks - 4 hours of lecture and 6 hours of studio per week

Additional Details
Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Sullivan

LD ARCH 12 Environmental Science for Sustainable Development 4 Units
Terms offered: Summer 2024 8 Week Session, Fall 2023, Summer 2023 8 Week Session
The scientific basis of sustainability, explored through study of energy, water, food, natural resources, and built environment. Physical/ecological processes and systems, and human impacts from the global scale to local energy/resource use. Energy and water audits, opportunities to increase sustainability of processes/practices. Discussion/lab section involves field data collection/analysis (e.g., habitat characteristics and macroinvertebrate communities in local streams, measurement of atmospheric particulate matter concentrations, measurement of water savings from updated irrigation technologies) and a final, integrative sustainability assessment project.
Environmental Science for Sustainable Development: Read More [+]

Rules & Requirements
Prerequisites: Department chair must approve written proposal
Credit Restrictions: Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog.
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1-4 hours of directed group study per week
Summer: 6 weeks - 2.5-10 hours of directed group study per week
8 weeks - 1.5-7.5 hours of directed group study per week
10 weeks - 1.5-6 hours of directed group study per week

Additional Details
Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Directed Group Study for Freshmen and Sophomores: Read Less [-]

LD ARCH 98 Directed Group Study for Freshmen and Sophomores 1 - 4 Units
Terms offered: Fall 2015, Spring 2013, Spring 2012
Supervised group studies of various topics relevant to department that are not covered in depth by other courses. Topics may be initiated by students. Open to students in good standing who, in consultation with a faculty sponsor, present a proposal with clearly formulated objectives and means of implementation. Intended for exceptional students. Topics vary from semester to semester.

LD ARCH 101 Fundamentals of Landscape Design 5 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
This studio introduces students to the programmatic, artistic, and technical aspects of land form and topographic adjustments to accommodate human use. Topics include pedestrian and vehicular circulation, conservation and addition of plant materials, movement of water, recreation use, and creation of views. Sculptural land forms will be emphasized through the use of topographic plans, sections, and contour models.
Fundamentals of Landscape Design: Read More [+]

Rules & Requirements
Prerequisites: Environmental Design 11A-11B or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 6 hours of studio per week

Additional Details
Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Fundamentals of Landscape Design: Read Less [-]
LD ARCH 102 Case Studies in Landscape Design 5 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
This studio stresses the shaping and coordination of ideas from initial concept to complete design product. A product(s) of intermediate scale and complexity (such as a garden, small park, plaza, or campus courtyard) will be developed in detail including the selection of planting, selection of construction materials, and topographic design. Lecture modules on selected professional topics are integrated into this course.

Case Studies in Landscape Design: Read More [+]

Rules & Requirements

Prerequisites: 101 or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 6 hours of studio per week

LD ARCH 103 Energy, Fantasy, and Form 5 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
This is an undergraduate studio with a central focus on climate modification for energy conservation. We will research historical precedents in order to develop new garden forms for passive green designs. We will also explore how past cultures integrated metaphysics into their gardens as an adjunct to microclimate and habitat design. The contemporary landscape should be a balanced interweaving of proportion, function, comfort, energy conservation, and enlightenment. Additionally, we will study the choreography of space and investigate how to animate the landscape through the creative interpretation of text and film. Many new and exciting opportunities lie ahead for the creation of garden forms that not only conserve energy, but are also works of art and places of spiritual renewal.

Energy, Fantasy, and Form: Read More [+]

Rules & Requirements

Prerequisites: 101, 102, Environmental Design 11A-11B, (Arch 100A or 100B for Architecture students) or by consent of instructor
Repeat rules: Course may be repeated for credit up to a total of 8 units.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 6 hours of studio per week

Additional Details

Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Instructor: Sullivan

Energy, Fantasy, and Form: Read Less [-]

LD ARCH 110 Ecological Analysis 3 Units
Terms offered: Fall 2020, Fall 2019, Fall 2018
Analysis of environmental factors, ecosystem functions, and ecosystem dynamics, as related to decision-making for landscape planning and design.

Ecological Analysis: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: McBride

Ecological Analysis: Read Less [-]
LD ARCH 110L Ecological Analysis Laboratory 2 Units

Terms offered: Fall 2020, Fall 2019, Fall 2018
Introduction to field techniques for assessment of landscape factors. Factors include topography, geology, climate, soil, hydrology, flora, vegetation, and wildlife.
Ecological Analysis Laboratory: Read More [+]

Rules & Requirements

Prerequisites: Landscape Architecture 110 (may be taken concurrently)

Hours & Format

Fall and/or spring: 15 weeks - 4 hours of laboratory per week

Additional Details

Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: McBride

Ecological Analysis Laboratory: Read Less [-]

LD ARCH C110A Ecological Analysis 4 Units

Terms offered: Fall 2023, Fall 2022, Fall 2021
This course focuses on natural factors of the environment that are fundamental to ecosystem management, land use planning and landscape design and their relationships to one another in different terrestrial ecosystems, from predominantly natural to predominantly anthropogenic. Lectures explore the key concepts on ecosystem structure, function and dynamics and discuss different types of ecological data, their interpretation and visualization that can aid in landscape research, planning and design workflow. Laboratory sections advance lecture topics by providing hands-on training in common types of ecosystem analyses using quantitative methods and geospatial tools.
Ecological Analysis: Read More [+]

Objectives & Outcomes

Course Objectives: Develop an understanding of natural factors of the environment that are fundamental to ecosystem management, landscape design and land use planning and common approaches for their assessment and analysis of their relationships to one another.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of laboratory per week

Additional Details

Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Also listed as: ESPM C110A

Ecological Analysis: Read Less [-]

LD ARCH 111 Plants in Design 3 Units

Terms offered: Spring 2022, Spring 2021, Fall 2019
Through lecture, research, and studio assignments, this course introduces the use of plants as design elements in the landscape, from the urban scale to the site-specific scale, focusing on the public open space. By analyzing historic, contemporary, and Bay Area examples, the course examines the spatial, visual, and sensory qualities of vegetation, as well as the interplay with ecological functions and engineering uses of plants.
Plants in Design: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

Plants in Design: Read Less [-]

LD ARCH 112 Landscape Plants: Identification and Use 4 Units

Terms offered: Spring 2024, Spring 2023, Spring 2022
This course is an introduction to the identification and recognition, as well as design applications and uses, of plants in the landscape. Through lectures, assignments, and fieldwork, the course provides class participants with an appreciation of the importance of vertical vegetation as a design element. Students will be introduced to a variety of built projects and plants commonly used in Bay Area landscapes.
Landscape Plants: Identification and Use: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 6 hours of fieldwork per week

Additional Details

Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.

Landscape Plants: Identification and Use: Read Less [-]
LD ARCH 119 Flood Risk Management 3 Units
Terms offered: Spring 2024, Spring 2023
This course explains fundamental concepts in flood risk management, summarizes the history of flood management in California, the US, and globally, and tracks the development of state-of-the-art approaches to assessing flood risk, equity implications, and utilizing nature-based solutions to sustainably manage floods. The course is offered at both the upper-division undergraduate (LA119) and graduate (LA229) levels. Lectures are the same for both undergrad and grad courses, but there are separate discussion sections and requirements.

Objectives & Outcomes
Course Objectives: The objective of the course is to provide students with an understanding of the physical processes giving rise to floods, and also the social and institutional response to flood risk.

Student Learning Outcomes: Students will learn the fundamental hydrologic processes behind flooding, the models commonly employed to assess the extent of flood hazard, the limitations of extrapolating short hydrologic records to estimate long-return period floods such as the 100-year flood, limitations of structural measures to control flood hazard, and increase in flood hazard arising from climate change.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details
Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Kondolf

LD ARCH 120 Topographic Form and Design Technology 3 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
Technical, graphic and computational exercises, and studio problems in topographic site design and the shaping of the site for surface drainage.

Rules & Requirements
Prerequisites: 102 or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 2 hours of studio per week

Additional Details
Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Instructor: Jewell

LD ARCH 121 Design in Detail: Introduction to Landscape Materials and Construction 4 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
This course introduces the visual and physical characteristics of landscape construction materials including, but not limited to, stone, brick, concrete, metal, asphalt, and wood. Additionally, lectures cover the production and availability of these materials, any existing evaluations on their sustainability, and their potential impact on the immediate environment. Students also learn to utilize standard sources of information on building materials and the terminology typically utilized when choosing and specifying construction materials. They become familiar with dimensional standards for landscape structures, including pavements, stairs, furnishings, retaining walls, freestanding walls, fences, decks, and small overhead structures.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of laboratory per week

Additional Details
Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Kondolf

Design in Detail: Introduction to Landscape Materials and Construction: Read Less [-]
LD ARCH 122 Hydrology for Planners 4 Units
Terms offered: Spring 2022, Spring 2019, Spring 2018
This course presents an overview of relevant hydrologic, hydraulic, and geomorphic processes, to provide the planner and ecologist with insight to incorporate these processes into the planning process and coordinate with specialists in the field of hydrology. Relevant government regulations and policies are also reviewed. The course is not intended to duplicate more specialized courses offered in such fields as engineering hydrology, coastal engineering, or geology, but rather to provide an integrated understanding. The course takes a process- and field-based approach to hydrology, and emphasizes interdisciplinary perspectives.

Hydrology for Planners: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of laboratory per week

Additional Details
Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Alternate method of final assessment during regularly scheduled final exam group (e.g., presentation, final project, etc.).
Instructor: Kondolf
Hydrology for Planners: Read Less [-]

LD ARCH 130 Sustainable Landscapes and Cities 4 Units
Terms offered: Summer 2024 8 Week Session, Spring 2024, Summer 2023 8 Week Session
This course is an introduction to issues of sustainability in the designed landscape and in our cities. It includes environmental history as well as contemporary social, environmental and political issues surrounding sustainable design and activism. The course stresses motives and values expressed through environmental design at various scales – from neighborhood to global and examines problems affecting healthy environments and their solutions. Students study the need for protection and restoration of healthy ecological systems within the design of cities and landscapes and discuss ways to enable these systems to thrive. Readings and discussions focus on means to evaluate, create and advocate for healthy, sustainable environments.

Sustainable Landscapes and Cities: Read More [+]

Objectives & Outcomes
Course Objectives: This course is an important elective to majors in the College of Natural Resources and CED students who have Architecture and City Planning majors. A new CED major, Sustainable Environmental Design (SED), has increased the number of students who require this class. It also fulfills the Social and Behavioral breadth requirement. Therefore, it is clear that the course enrollment should be increased to accommodate students from both inside and outside the CED. This course offers students the opportunity to examine a specific range of sustainable design interventions that attempt to address primary problems related to climate change, the need for healthy watersheds, adequate food security and socially resilient communities in the face of rapid environmental change. Students will see the complexity of various aspects and approaches required of sustainable design and occasionally competing goals of a project.

Student Learning Outcomes: On the required field trip to San Francisco, students will be able to see and critique the efficacy of policy; of existing and emerging landscape design technology; to observe interventions intended to assist existing natural systems in urban environments and promote their viability; to see the value of community building to help establish resilient neighborhoods; to become verbally articulate about these issues. Students will learn about and discuss the inter-connectedness of natural systems overlapped by human habitation. They will learn about design that can facilitate positive social systems and how the combination of ecological and social communities can present answers to some of the pressing environmental problems we face. Students will learn how various design strategies involve land preservation, watershed protection and restoration; local food production networks; resilient neighborhood design through community participation in open space design; pedestrian and bicycle friendly streets, urban forestry; reducing the waste stream.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week
Summer: 8 weeks - 6 hours of lecture and 2 hours of discussion per week

Additional Details
Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: McRae
Sustainable Landscapes and Cities: Read Less [-]
LD ARCH 133 Drawn from the Field 3 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
This course will provide students an opportunity to analyze and interpret the iconic built landscapes of the Bay Area through direct observation and field sketching. The vision for the course is influenced by the global popularity of the Urban Sketchers movement, a phenomenon based on personal engagement with one’s environment. The annotated sketchbook will be used as the primary tool for investigation and documentation of core fundamental principles and elements of landscape and urban design. Lectures and hands-on demonstrations will give students the tools to respond to and construct meaning from their on-site observations.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture and 2 hours of fieldwork per week

Additional Details
Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Sullivan

LD ARCH 134A Drawing Workshop 1 3 Units
Terms offered: Fall 2018, Fall 2017, Fall 2016
This studio will elaborate on a number of studio themes while introducing the students to a variety of graphic mediums and drawing techniques. Measured drawing procedures (including orthographic projections) will be augmented by figure-ground principles and themes of contrast, color, chiaroscuro, and compositions. On-site and visits to galleries and museums will complement the studio sessions.

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of studio per week

Additional Details
Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Final exam not required.
Instructor: Hood

LD ARCH 134B Drawing Workshop II 3 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
This course introduces students to digital tools relevant to the discipline of landscape architecture. The course encompasses a series of lectures, labs exercises and projects designed to equip students with a foundational and expandable computing skill set relevant to the education and practice of landscape architecture. In addition to establishing technical competency, the course emphasizes establishing creative workflows between software applications.

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture and 3 hours of laboratory per week

Additional Details
Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Kullmann

LD ARCH 135 Sacred Landscapes 3 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
This course is a laboratory for invention and visual perception. A designed landscape has the potential to induce a powerful emotional experience. The premise of this course is based on the idea that highly valued places are works of art, as well as places of enlightenment and transformation. This class will explore ideas of ‘sacredness’ in the landscape through a series of design explorations and a summation project. Our journey of discovery aspires to provide future landscape architects with a new and unique perspective to help them recognize and generate Sacred Landscapes.

Rules & Requirements
Prerequisites: Environmental Design 11A-11B or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 1 hour of lecture and 2 hours of studio per week

Additional Details
Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Sullivan
LD ARCH 140 Social and Psychological Factors in Open Space Design 3 Units
Terms offered: Spring 2024, Spring 2023, Fall 2021
User-oriented approach to design. Post-occupancy evaluation as a tool for understanding use of designed open spaces. Design as a communication process. Environmental needs of vulnerable populations—children, elderly, disabled, low-income families. Personal and societal environmental values.

Hours & Format
Fall and/or spring: 15 weeks - 1.5 hours of lecture and 1.5 hours of discussion per week

Additional Details
Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.

LD ARCH 154 Special Topics in Landscape Architecture and Environmental Planning 1 - 3 Units
Terms offered: Fall 2022, Fall 2021, Fall 2020
Designed to be a forum for presentation of student research, discussions with faculty researchers and practitioners, and examination of topical issues in landscape architecture and environmental planning. Topics will be announced at the beginning of each semester.

Hours & Format
Fall and/or spring: 15 weeks - 1-3 hours of seminar per week

Additional Details
Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.

LD ARCH 160 Professional Practice Seminar 2 or 3 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
This course provides instruction and guidance in the professional practice aspect of landscape architecture in the United States. Covering the breadth of the profession, we will learn the professional duties of a landscape architect, and the process of completing a real-life landscape architectural project. The goal of this class will be to learn what it means to be a practicing, licensed landscape architect, with the understanding that this is ultimately a construction based, service-oriented industry.

Hours & Format
Fall and/or spring: 15 weeks - 2-2 hours of seminar per week

Additional Details
Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Mozingo

LD ARCH 170 History and Literature of Landscape Architecture 3 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
This course surveys the history of landscape architecture in four realms: 1) gardens; 2) urban open space, that is, plazas, parks, and recreation systems; 3) urban and suburban design; and 4) regional and environmental planning. The course will review the cultural and social contexts which have shaped and informed landscape architecture practice and aesthetics, as well as the environmental concerns, horticultural practices, and technological innovations of historic landscapes.

Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details
Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Mozingo
LD ARCH C171 The American Designed Landscape Since 1850 3 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
This course surveys the history of American landscape architecture since 1850 in four realms: 1) urban open spaces—that is squares, plazas, parks, and recreation systems; 2) urban and suburban design; 3) regional and environmental planning; 4) gardens. The course will review the cultural and social contexts which have shaped and informed landscape architecture in the United States since the advent of the public parks movement, as well as, the aesthetic precepts, environmental concerns, horticultural practices, and technological innovations of American landscapes. Students will complete a midterm, final, and a research assignment.

LD ARCH C177 GIS and Environmental Spatial Data Analysis 4 Units
Terms offered: Spring 2017, Spring 2016, Spring 2015
This course offers an introduction to spatial data analysis. It integrates ArcGIS analysis with spatial statistical analysis for the study of pattern and process applicable to a wide variety of fields. Major topics covered include: spatial sampling, processing data with ARC Info, exploratory GIS analysis, spatial decomposition, spatial point patterns and Ripley's K function, spatial autocorrelation, geostatistics, spatially weighted regression, spatial autoregression, generalized linear models and generalized linear mixed models.

LD ARCH 187 Representation as Research: Contemporary Topics in Landscape Visualization 3 Units
Terms offered: Prior to 2007
Representations typically demonstrate two different forms of landscape analysis—empirical data and personal perception/aesthetics—but landscape provides opportunities for their overlaps in order to advance and synthesize robust research. Through lectures, technical tutorials, and reading discussions, this course will profile contemporary landscape research practices and representational techniques. We will use visualization to advance landscape research, theory, and site analysis, focusing specifically on methods that tackle issues of temporality and ephemerality. We will generate original media that communicates spatial, ecological, and cultural complexities.

Rules & Requirements
Prerequisites: Working knowledge of Rhino, AutoCAD, Adobe Creative Suite (Illustrator, Photoshop, InDesign)

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of laboratory and 1 hour of lecture per week

Additional Details
Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Alternative to final exam.
Instructor: Cooper
Formerly known as: Landscape Architecture 189
Representation as Research: Contemporary Topics in Landscape Visualization: Read Less [-]

LD ARCH C188 Geographic Information Science 4 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
This course introduces the student to the rapidly expanding field of Geographic Information Systems (GIS). It addresses both theory and application and provides the student with a dynamic analytical framework within which temporal and spatial data and information is gathered, integrated, interpreted, and manipulated. It emphasizes a conceptual appreciation of GIS and offers an opportunity to apply some of those concepts to contemporary geographical and planning issues.

Rules & Requirements
Prerequisites: Some computer experience

Hours & Format
Fall and/or spring: 15 weeks - 3-3 hours of lecture and 1-2 hours of laboratory per week

Additional Details
Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Letter grade. Final exam required.
Instructor: Kim
Also listed as: GEOG C188

Rules & Requirements
Prerequisites: Consent of instructor
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 1-4 hours of independent study per week
Summer:
6 weeks - 2.5-10 hours of independent study per week
8 weeks - 1.5-7.5 hours of independent study per week
10 weeks - 1.5-6 hours of independent study per week

Additional Details
Subject/Course Level: Landscape Architecture/Undergraduate
Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.
Supervised Independent Study and Research: Read Less [-]

LD ARCH 200A Fundamentals of Landscape Design 5 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
This studio introduces students to the programmatic, artistic, and technical aspects of land form and topographic adjustments to accommodate human use. Topics include pedestrian and vehicular circulation, conservation and addition of plant materials, movement of water, recreation use, and creation of views. Sculptural land forms will be emphasized through the use of topographic plans, sections, and contour models.
Fundamentals of Landscape Design: Read More [+]

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 6 hours of studio per week

Additional Details
Subject/Course Level: Landscape Architecture/Graduate
Grading: Letter grade.
Instructor: Hill

LD ARCH 200B Case Studies in Landscape Design 5 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
This studio stresses the shaping and coordination of ideas from initial concept to complete design product. A product(s) of intermediate scale and complexity (such as a garden, small park, plaza, or campus courtyard) will be developed in detail including the selection of planting, selection of construction materials, and topographic design. Lecture modules on selected professional topics are integrated into this course.

LD ARCH 201 Ecological Factors in Urban Landscape Design 5 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
Through lectures, studio problems, research projects, and discussion, this course will explore the challenge and potential incorporating ecological factors in urban contexts. The course focuses on the interaction of landscape science (hydrology, geology, etc.) with the necessities and mechanisms of the human environment (urban design, transportation, economics, etc.). Lectures and research projects will particularly emphasize innovative and forward thinking solutions to the ecological problems of the human environment. Throughout the semester, reading and discussion sessions will highlight the connections between the broader concerns of the global ecological crisis and landscape design and planning.
Ecological Factors in Urban Landscape Design: Read More [+]

Rules & Requirements
Prerequisites: 110, 134A-134B, or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 6 hours of studio per week

Additional Details
Subject/Course Level: Landscape Architecture/Graduate
Grading: Letter grade.

Ecological Factors in Urban Landscape Design: Read Less [-]

LD ARCH 202 Design of Landscape Sites 5 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
A site design studio stressing the shaping and coordination of ideas from initial concept to complete design of open space in various contexts. Typical projects will be of an intermediate scale and might include a park, plaza, museum sculpture garden, playground, office park, or housing project. Modules on social factors and planting design are included.
Design of Landscape Sites: Read More [+]

Rules & Requirements
Prerequisites: 201 or consent of instructor

Hours & Format
Fall and/or spring: 15 weeks - 2 hours of lecture and 6 hours of studio per week

LD ARCH C203 Shaping the Public Realm 5 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
This interdisciplinary studio focuses on the public realm of cities and explores opportunities for creating more humane and delightful public places. Problems will be at multiple scales in both existing urban centers and in areas of new growth. Skills in analyzing, designing, and communicating urban design problems will be developed. Studio work will be supplemented with lectures, discussions, and field trips. Visiting professionals will present case studies and will serve on reviews.
Shaping the Public Realm: Read More [+]

Grading: Letter grade.
Instructor: Meyer

LD ARCH 205 Environmental Planning Studio 5 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
Application of environmental planning principles to a complex problem involving a variety of environmental criteria and desired land uses in a complex institutional and political setting. Student teams will identify needed data, assess environmental developmental problems, weigh competing uses, and prepare an environmental management plan.
Rules & Requirements
Prerequisites: 201 or consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 6 hours of studio per week
Additional Details
Subject/Course Level: Landscape Architecture/Graduate
Grading: Letter grade.
Instructors: Radke, Kondolf

LD ARCH 206 Final Project Preparation Studio: Thesis and Reports 5 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
This is a spring studio for students to work on final projects (theses and professional reports). The studio, including lectures by the instructor, is meant to train and assist students in thesis or professional project research and help them in finalizing their thesis or professional report topic. The course includes weekly exercises ranging from writing articles documenting, illustrating, and critiquing landscapes to finally producing a thesis or professional report.
Rules & Requirements
Prerequisites: 252 and graduate standing
Hours & Format
Fall and/or spring: 15 weeks - 3 hours of lecture and 6 hours of studio per week
Additional Details
Subject/Course Level: Landscape Architecture/Graduate
Grading: Letter grade.
Instructor: Mozingo

LD ARCH 221 Quantitative Methods in Environmental Planning 3 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
Discussion and critique of the application of quantitative methods to environmental assessment, analysis, and evaluation in environmental planning. Topics to include geographical information systems and data bases, remote sensing, and multivariate analysis. This course emphasizes computer applications and data analysis.
Rules & Requirements
Prerequisites: 201 or consent of instructor
Hours & Format
Fall and/or spring: 15 weeks - 1.5 hours of lecture and 3 hours of laboratory per week
Additional Details
Subject/Course Level: Landscape Architecture/Graduate
Grading: Letter grade.
Instructor: Radke
LD ARCH 222 Hydrology for Planners 4 Units
Terms offered: Spring 2022, Spring 2019, Spring 2018
This course presents an overview of relevant hydrologic, hydraulic, and geomorphic processes, to provide the planner and ecologist with insight sufficient to coordinate with technical specialists in the field of hydrology. In addition, relevant regulations and policies are reviewed.
Hydrology for Planners: Read More [+]

Restoration of Rivers and Streams: Read Less [-]
LD ARCH 229 Flood Risk Management 3 Units
Terms offered: Spring 2024, Spring 2023
This course explains fundamental concepts in flood risk management, summarizes the history of flood management in California, the US, and globally, and tracks the development of state-of-the-art approaches to assessing flood risk, equity implications, and utilizing nature-based solutions to sustainably manage floods. The course is offered at both the upper-division undergraduate (LA119) and graduate (LA229) levels. Lectures are the same for both undergrad and grad courses, but there are separate discussion sections and requirements.

Objectives & Outcomes

Course Objectives: The objective of the course is to provide students with an understanding of the physical processes giving rise to floods, and also the social and institutional response to flood risk.

Student Learning Outcomes: Students will learn the fundamental hydrologic processes behind flooding, the models commonly employed to assess the extent of flood hazard, the limitations of extrapolating short hydrologic records to estimate long-return period floods such as the 100-year flood, limitations of structural measures to control flood hazard, and increase in flood hazard arising from climate change.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Landscape Architecture/Graduate
Grading: Letter grade.
Instructor: Kondolf

Flood Risk Management: Read More [+]

LD ARCH C231 Environmental Planning and Regulation 3 Units
Terms offered: Spring 2024, Spring 2023, Fall 2020, Fall 2019
This course will examine emerging trends in environmental planning and policy and the basic regulatory framework for environmental planning encountered in the U.S. We will also relate the institutional and policy framework of California and the United States to other nations and emerging international institutions. The emphasis of the course will be on regulating "residuals" as they affect three media: air, water, and land.

Objectives & Outcomes

Course Objectives: The objective of the course is to provide students with an understanding of the physical processes giving rise to floods, and also the social and institutional response to flood risk.

Student Learning Outcomes: Students will learn the fundamental hydrologic processes behind flooding, the models commonly employed to assess the extent of flood hazard, the limitations of extrapolating short hydrologic records to estimate long-return period floods such as the 100-year flood, limitations of structural measures to control flood hazard, and increase in flood hazard arising from climate change.

LD ARCH 233 Drawn from the Field 3 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
This course will provide students an opportunity to analyze and interpret the iconic built landscapes of the Bay Area through direct observation and field sketching. The vision for the course is influenced by the global popularity of the Urban Sketchers movement, a phenomenon based on personal engagement with one’s environment. The annotated sketchbook will be used as the primary tool for investigation and documentation of core fundamental principles and elements of landscape and urban design. Lectures and hands-on demonstrations will give students the tools to respond to and construct meaning from their on-site observations.

Drawn from the Field: Read More [+]

Rules & Requirements

Credit Restrictions: Students will receive no credit for LD ARCH 233 after completing LD ARCH 233. A deficient grade in LD ARCH 233 may be removed by taking LD ARCH 233.

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of lecture and 2 hours of fieldwork per week

LD ARCH 234B Landscape Processes through Drawing and Modeling 3 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
This course will explore landscape representation through a variety of drawing types and conventions, across a range of scales, and through a deep engagement with digital media. This course builds on the foundational methods developed in LA 234A, incorporating new methods, tools, and techniques for digital visualization. The course is structured through lectures and discussions about the historical and theoretical relevance of the theme, as well as, lab sessions focused on demonstrating representational tools and techniques. Simultaneous to these units, continued development of analog sketching will be expected. Landscape Processes through Drawing and Modeling: Read More [+]

LD ARCH 235 Design Thinking: Art, Nature, Consciousness 3 Units
Terms offered: Fall 2019, Fall 2018, Spring 2004
This course is a laboratory for design thinking, invention and visual perception. A designed landscape has the potential to induce a powerful emotional experience. The premise of this course is based on the idea that highly valued places are works of art, as well as places of enlightenment and transformation. This class will explore ideas of ‘sacredness’ in the landscape through a series of design explorations and a summation project. Our journey of discovery aspires to provide future landscape architects with a new and unique perspective to help them recognize and generate sacred landscapes. Design Thinking will outline a process for creative practice that builds upon historic approaches while imagining new possibilities.

Design Thinking: Art, Nature, Consciousness: Read Less [-]
LD ARCH 237 The Process of Environmental Planning 3 Units
Terms offered: Spring 2024, Spring 2023, Spring 2022
A review of the techniques used in environmental planning, and evaluation of alternate means of implementation in varying environmental and political circumstances. The class will examine and critique a number of well-known environmental planning programs and plans. Lectures and discussion will address recurrent planning problems, such as the limitations of available data, legal and political constraints on plans, conflicts among specialists.

LD ARCH C241 Research Methods in Environmental Design 4 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021, Spring 2021

LD ARCH C242 Community Engagement and Public Participation in Planning Processes 3 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
This course examines the theories, practices, and ethics of undertaking community engagement and public participation relative to planning processes. Students will learn about traditional forms of engagement and participation, while also testing newer theories and practices in the field.

LD ARCH C250 Theories of Urban Form and Design 3 Units
Terms offered: Fall 2023, Fall 2022, Fall 2021
Theories and patterns of urban form throughout history are studied with emphasis on the role of planning and design in shaping cities and the relationship between urban form and social, economic, and geographic factors. Using a case study approach, cities are evaluated in terms of various theories and performance dimensions.
LD ARCH 251 Theories of Landscape Architecture and Environmental Planning 2 Units
Terms offered: Fall 2016, Spring 2016, Fall 2014
The focus will be on debate and discussion of central ideas in landscape architecture and environmental planning, drawing on primary literature over many decades of thought. This is not a history course, but it will include some literature that goes back to the early years of the field. This course covers the breadth of thinking in the field, including both environmental planning and landscape design as well as other sub disciplines. Each week students will lead a debate on a different theoretical issue.

Theories of Landscape Architecture and Environmental Planning: Read More [+]

Hours & Format

LD ARCH 287 Representation as Research: Contemporary Topics in Landscape Visualization 3 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
 Representations typically demonstrate two different forms of landscape analysis—empirical data and personal perception/aesthetics—but landscape provides opportunities for their overlaps in order to advance and synthesize robust research. Through lectures, technical tutorials, and reading discussions, this course will profile contemporary landscape research practices and representational techniques. We will use visualization to advance landscape research, theory, and site analysis, focusing specifically on methods that tackle issues of temporality and ephemerality. We will generate original media that communicates spatial, ecological, and cultural complexities.

Representation as Research: Contemporary Topics in Landscape Visualization: Read More [+]

Rules & Requirements

LD ARCH 289 Applied Remote Sensing 3 Units
Terms offered: Spring 2022, Spring 2021, Spring 2020
This course consists of one lecture and one computer lab per week introducing fundamental principles and methods of environmental remote sensing and their practical applications. We will explore strategies for working with different types of remote sensing data and extracting image-based landscape information for various environmental research and planning objectives. This course focuses largely on local to regional scale applications of remote sensing in ecology, environmental planning and design, civil & environmental engineering and natural resource management.

Applied Remote Sensing: Read More [+]

Objectives & Outcomes
Course Objectives: Become familiar with different types of data and instruments in remote sensing and learn how to choose the optimal remote sensing data and procedure for various landscape and environmental analysis applications.
Develop the capacity to work with the remote sensing literature and synthesize the relevant knowledge across different studies.
Explore traditional and novel remote sensing techniques and their use in landscape planning, environmental studies and natural resource management.
Learn practical skills and techniques to extracting landscape information from remote sensing data as image interpretation, classification, accuracy assessment, mapping and change analysis.

Rules & Requirements
Prerequisites: An introductory GIS course such as LA C188/Geography C188, ESPM 233 or equivalent

Hours & Format
Fall and/or spring: 15 weeks - 1.5 hours of lecture and 1.5 hours of laboratory per week

Additional Details
Subject/Course Level: Landscape Architecture/Graduate
Grading: Letter grade.
Instructor: Dronova

LD ARCH 300 Supervised Teaching in Landscape Architecture and Environmental Planning 2 Units
Terms offered: Spring 2018, Spring 2017, Fall 2016
Supervised teaching experience in undergraduate courses. Regular meetings with faculty sponsor. See departmental sheet for other limitations.
Supervised Teaching in Landscape Architecture and Environmental Planning: Read More [+]

Rules & Requirements
Prerequisites: Graduate standing and appointment as a Teaching Assistant
Repeat rules: Course may be repeated for credit without restriction.

Hours & Format
Fall and/or spring: 15 weeks - 0 hours of independent study per week

Additional Details
Subject/Course Level: Landscape Architecture/Professional course for teachers or prospective teachers
Grading: Offered for satisfactory/unsatisfactory grade only.

Supervised Teaching in Landscape Architecture and Environmental Planning: Read Less [-]
LD ARCH 301 Methods of Teaching in Landscape Architecture and Environmental Planning 2 Units
Terms offered: Fall 2012, Fall 2010, Fall 2009
This course presents general pedagogical principles and methods adapted to teaching in the fields of landscape architecture, environmental planning, and environmental sciences. The format varies from week to week, but involves presentations by faculty and experienced graduate student instructors (GSIs), guided discussions, sharing of teaching experiences for current GSIs, discussion of readings on effective teaching, viewing of videos, and presentation by GSIs of sections for upcoming weeks. Required of all graduate students to be eligible for appointment as GSIs; may be taken concurrently with first GSI position for entering students. Topics include learning objectives, lesson plans, active learning, group learning, classroom diversity, assessing student learning, giving constructive feedback, teaching in the studio environment, engaging students through field exercises, grading, and composing effective tests.
Methods of Teaching in Landscape Architecture and Environmental Planning: Read More [+]
